to devote himself professionally to that art. His opera 'Billidet og Busten' (The Picture and the Bust), first performed Apr. 9, 1832, and other works on a large scale, such as music to dramas and a cantata by Öhlenschläger, are less valued than his songs, especially his National Songs in 11 vols., his songs for school use, 13 vols., and above all, his church music and his collection of Psalm Tunes, published in 1853, and since adopted in the churches throughout the country. His success in this direction may be owing to his position as organist to the church of the Trinity, Copenhagen, from 1838. He was a professor of singing at the Metropolitan School from 1843, and in the same year he established the first of those musical associations for the working classes now so popular in Denmark. He was appointed inspector of the public singing schools in 1859. Berggreen wrote occasional articles in the leading Danish papers, and for a short time edited a musical publication no longer existing. One of his most distinguished pupils in harmony and thorough-bass was Gade. For details of his early life and lists of his works, see Erslew's *Almindeligt Forfatter Lexicon*, Copenhagen, 1843, and its supplements.

L. M. M.

BERGMANN, Carl (*b.* Ebersbach, Saxony, 1821; *d.* Aug. 16, 1876), a German conductor who was largely instrumental in promoting orchestral music in the United States.

He studied under Zimmermann in Zittau and Hesse in Breslau, and emigrated to America in 1850, joining the Germania Orchestra as violoncellist. The Germania Orchestra was an organisation of German musicians, many of them former members of Josef Gungl's band; it was giving concerts of high-class music in New York, Boston, Philadelphia and other large cities in the Eastern States. A few months after Bergmann joined the orchestra he became its leader, and such he remained until its dissolution in 1854. He conducted the concerts of the Handel and Haydn Society of Boston (*q.v.*) from 1852–54, and then went to New York, where he became conductor of the Männergesangverein Arion. In 1855 he began conducting concerts for the Philharmonic Society of New York, alternating for ten years with associates. From 1866–76 he was sole conductor. Bergmann was the pioneer in America of the new school of conductors as distinguished from the old class of mere time-beaters. He was strongly individual and assertive in his interpretations, a radical, and an enthusiastic and devoted champion of Liszt and Wagner. Half the numbers in one of his concerts in 1853 were of Wagner's music (see Thomas, Theodore). H. E. K.

BERGONZI family, violin-makers.

(1) Carlo (*b. circa* 1685; *d.* 1747), was possibly the son of Francesco Bergonzi or Baganzi. He worked as a violin-maker in Cremona, and was a native of that town. It has been stated that he was a pupil of Nicola Amati, but the dates make this impossible, and any label describing him as 'allieve di Nicola Amati' must be spurious. Hitherto it has generally been held that he was a pupil of Antonio Stradivari, but the most recent researches of Messrs. Hill give them good reason to question this. In the year 1742, on the death of Ombono Stradivari, Antonio's younger son, Bergonzi went to live in Stradivari's house in the Piazza San Domenico, but not by right of inheritance as sometimes stated. Bergonzi's earliest labels date from about 1716; his violins are now very scarce, but his best work approaches the high standard set by Stradivari and Guarnieri. In his early work he followed the Stradivari and Guarnieri models, but later he developed a greater individuality of style; this was especially the case with the sound-holes, which he placed lower down, and they were also more open in design than those of Stradivari. Messrs. Hill are of opinion that they have never seen any examples of violas, violoncellos or double-basses which they would attribute to Carlo Bergonzi.

(2) Michel Angelo, son of Carlo (*b.* 1722; *d. circa* 1770), made violins, but not of the same standard of excellence as his father. It has been stated that he made some good double-basses, but Messrs. Hill have never seen an example which they would attribute to him.

(3) Nicola, (4) Zosimo and (5) Carlo, sons of Michel Angelo, were also violin-makers in Cremona. E. H. F.

BERINGER, Oscar (*b.* Furtwangen, Baden, July 14, 1844; *d.* London, Feb. 21, 1922), a distinguished pianist.

In 1849 his father was compelled to fly to England as a political refugee, where he lived in straitened circumstances. Owing to this reason the only musical education Oscar Beringer received, up to his 19th year, was from an elder sister. During the years 1859 and 1860 he gave several series of pianoforte recitals at the Crystal Palace, and in 1861 made his first appearance at the Saturday Concerts. Recognising the necessity of going through a course of systematic training, he studied at Leipzig under Moscheles, Richter, Reinecke, Plaidy, etc., from 1864–66, and continued his studies at Berlin under Tausig, Ehlert, Weitzmann, etc. In 1869 he was appointed a professor at Tausig's 'Schule des höheren Clavierspiels' at Berlin, but in 1871 he returned to England, where he repeatedly played with great success at the Crystal Palace Saturday Concerts, Musical Union, etc. In Jan. 1872 he played at the Gewandhaus Concerts at Leipzig, and on his return to England in the following year he founded in London an 'Academy for the Higher Development of

Pianoforte Playing,' an institution which fully bore out the promise of its name until its close in 1897. On Oct. 14, 1882, he played the pianoforte part in Brahms's second concerto on its first performance in England. In 1885 Beringer was appointed a professor in the R.A.M., and joined the committee of management in 1898. He joined the Associated Board of the R.A.M. and the R.C.M. in 1900. His compositions include an Andante and Allegro for pianoforte and orchestra (performed, 1880, at the Crystal Palace and at Cowen's Orchestral Concerts), sonatinas for the piano, a number of small instructive pieces, and several songs.

W. B. S.

BÉRIOT, (1) CHARLES AUGUSTE DE (*b.* Louvain, Feb. 20, 1802; *d.* there, Apr. 8, 1870) a celebrated violinist, born of a noble Belgian family.

He had his first instruction in the violin from a local teacher, named Tiby, who was his guardian after the death of his parents; and made such rapid progress that, when only 9 years of age, he successfully performed in public a concerto of Viotti. He himself ascribed great influence on the formation of his character and the development of his talent to the well-known scholar and philosopher Jacotot, who, though himself no musician, imbued his young friend with principles of perseverance and self-reliance, which he never lost sight of throughout life, and which, more than anything else, contributed to make him attain that proficiency in his art on which his fame rests.

When 19 years of age he went to Paris and pursued his studies there for some time under the advice of Viotti and Baillot, without actually being the pupil of either. After a short time he made his appearance in public with great success. From Paris he repeatedly visited England, where he met with a most brilliant reception. His London début was at the third concert in aid of the R.A.M., May 24, 1826. His first appearance at the Philharmonic Society took place on May 1, 1826, when he was announced as 'Violon de la chambre de sa Majesté le Roi de France.' On his return to Belgium he was nominated solo-violinist to the King of the Netherlands, which appointment he lost by the Revolution of 1830.

For the next five years he travelled and gave concerts in England, France, Belgium and Italy, together with the famous singer Maria MALIBRAN (*q.v.*), whom he married ten days after the annulling of her former marriage in the French courts. At this time de Bériot was universally recognised as one of the most eminent of living violinists. After the sudden death of his wife in 1836 he retired to Brussels, and appeared only occasionally in public till 1840, when he undertook a tour through Germany, and married Marie Huber, the daughter of a Viennese magistrate. In 1842, on the death of Baillot, Auber offered de Bériot his place in the Paris Conservatoire; bu Brussels suited him better, and in 1843 he was appointed professor of violin-playing at Brussels Conservatoire, and remained there till 1852, when the failure of his eyesight caused him to retire. He became totally blind in 1858.

De Bériot may justly be considered the founder of the modern Franco-Belgian school of violin-playing, as distinguished from the classical Paris school, represented by Viotti, Kreutzer, Rode and Baillot. He was the first after Paganini to adopt a great variety of brilliant effects in the way of harmonics, arpeggi, pizzicati, etc., sacrificing to a certain extent the severity of style and breadth of tone in which the old French school excelled. His playing was distinguished by unfailing accuracy of intonation, great neatness and facility of bowing, grace, elegance and piquancy. His compositions, which for a considerable time enjoyed general popularity, although not of much value as works of art, abound in pleasing melodies, have a certain easy, natural flow, and are such as to bring out the characteristic effects of the instrument in the most brilliant manner. The influence of Donizetti and Bellini on the one hand, and Auber on the other, are clearly visible.

De Bériot published 7 concertos, 11 'Airs variés,' several books of studies, 4 trios for piano, violin and violoncello, and, together with Osborne, Thalberg and other pianists, a number of 'Duos brillants' for piano and violin. He also wrote a rather diffuse book of instruction, *École transcendentale de violon*, and a *Grande Méthode*, published in 1858. Henri Vieuxtemps was the most distinguished of his numerous pupils.

His son, (2) CHARLES (*b.* Feb. 12, 1833), was a good pianist.

P. D.

Corrections from *A Contribution towards an accurate biography of de Bériot and Malibran* by Edward Heron-Allen (*De fidiculis opuscula*, opusc. vi.), 1894.

BERLIJN, ANTON (*b.* Amsterdam, May 2, 1817; *d.* there, Jan. 16, 1870), of Jewish parentage, studied under L. Erck and afterwards under Fr. Schneider. He composed 9 operas, 7 ballets, an oratorio, 'Moses,' several symphonies, of which one was produced by Spohr at Cassels, and many minor works. Although honoured by many royal patrons, and the membership of the Academy of St. Cecilia at Rome, his name is little known beyond the confines of his native country.

E. v. d. S.

BERLIN. The musical life of Berlin may be conveniently divided into three sections: (1) opera; (2) instrumental and vocal music; (3) musical organisations. In the following general summary the names of those institutions which are given particular description in

paragraphs arranged alphabetically are printed in capitals.

Opera Organisations.—Opera is the real backbone of musical life in Berlin. The Staatsoper (State Opera, formerly Royal Opera) (see below under Operatic History) received an annual subsidy from the budget of the Prussian Ministry of Education, this having its origin in the period when the opera was an appendage to the Palace of the Brandenburg electors. The entire staff of the Opera were salaried servants of the State, and the Opera itself was under the control of a department of the Ministry. The subsidy was withdrawn temporarily in 1924 owing to the impoverished condition of the Prussian finances, and the State Opera House was compelled to make itself self-supporting. This it did by amalgamating with the Oper am Königsplatz, whither the productions of the State Opera, together with scenery, etc., are transferred as required. The third opera house in Berlin, the Deutsches, is the property of the city. A fourth, Grosse Volksoper (the People's Grand Opera), run by a co-operative society at low prices, played between 1920 and 1925 at the Theater des Westens in Charlottenburg, but was forced to go into liquidation, though with some prospect of subsequent revival. It is plain, however, that at present Berlin is not capable of supporting more than three opera houses. Even so, the seating capacity of these three (State Opera, 1574, Oper am Königsplatz, 2500, Deutsches, 2300) presupposes a continued interest in opera throughout the long Berlin season (October to April) that is not always borne out by the financial results.

The State Opera has always suffered a little from its official connexions, having been subject for about 200 years to the patronage of the Electors and Kings of Prussia. This was not always in the best interests of artistic progress, and until the revolution took place opera in Berlin had always to struggle against the 'officialism' of the court and the Ministry. Under the Republic the directors have had more liberal opportunities. The periods may be roughly divided into the era of Spontini and the spectacular; the grand opera period of Meyerbeer, Nicolai and their successors; the age of Wagner and the music drama; and the moderns. Owing to the opposition of the court the operas of Wagner were late in appearing in Berlin. Possibly the prejudices of the Hohenzollerns against a protégé of the Wittelsbachs may have been the cause.

Though the State Opera in Berlin does not show, and indeed has never shown, the enterprise of Dresden, Munich, Weimar or even Stuttgart, it is now in no way behind the other capitals of Europe in its programmes or the standard of their production. The scheme of each season is planned for the production primarily of the German opera, and a certain historical consideration guides the selection, offering for comparison or contrast the masterpieces of all the foreign schools. Wagner, Saint-Saëns, Humperdinck, Cornelius, Hans Pfitzner, Moussorgsky, Smetana, Bizet, Verdi, Mascagni, Leoncavallo, d'Albert, Puccini, Richard Strauss, Max von Schillings, Franz Schrecker, Korngold form the backbone of the Berlin programmes, together with the earlier classics. The scheme at the Deutsches Opernhaus is based on a more popular cast than that of the State Opera. While it lasted, the Grosse Volksoper (People's Grand Opera) confined itself to Wagner and the well-tried operas of Mozart, Verdi, Puccini and occasionally Moussorgsky or Rimsky-Korsakov. Lighter operatic performances, *e.g.* Offenbach's 'Orpheus in the Underworld,' have occasionally been given with indifferent financial but very considerable artistic success in the Grosse Schauspielhaus, originally built for the superb mounting of stage plays by Max Reinhardt. A further interesting operatic venture is the Berliner Kammer-Oper, which has produced a number of one-act and two-act 'chamber opera' of Pergolese, Offenbach, Poise, Mozart, Haydn, etc.

The Grosse Berliner Oper-Verein exists to facilitate visits to opera performances for its 6500 members, principally at the Deutsches Opernhaus. It also seeks to cultivate popular interest in opera, both the older and the newer, by means of lectures accompanied by musical renderings by way of illustration.

The history of the attempts to produce opera in Berlin as a private venture free from the trammels of official subsidy and control is a tale of lost causes. The main result of each successive venture was to enrich the city with a new theatre designed for the production of opera and abandoned to musical comedy or stage plays. Apart from the Kroll Theatre (now taken over by the Prussian State as the Oper am Königsplatz), the Walhalla Theatre (formerly Nationaltheater), Komische Oper (now given up to 'revue'), Kurfürstenoper (now Deutsches Künstlertheater) and Theater des Westens (now a musical comedy theatre), all bear witness to failures, more or less splendid, and none without its touch of tragedy.

Orchestral Music in Berlin has a history running in two parallel streams, occasionally intermingling. As in the case of the opera, the earliest orchestras appear to have owed their origin and support to the influence of the court, and the tide of their fortunes flowed and ebbed with court patronage. But a private orchestra was an adjunct to the court life certainly from the days of the Elector John Sigismund of Brandenburg, who founded a Hof-Kapelle in 1574. Frederick the Great (1740–86) had his own court orchestra of

15 players, with Carl Heinrich Graun as conductor. His 'Rheinsberger Kapelle' was the parent body of the first State Opera orchestra, having been strengthened for the purpose to 40 performers.

It seems probable that the extra strength was drawn from the several amateur orchestras then flourishing in Berlin. Johann Philipp Sack, organist at the Dom, founded a Musikausübende Gesellschaft (music-performing society) in 1752, and a few years later a society was founded by Anton Bachman (*b.* 1716; *d.* 1800), one of the players in the Royal Orchestra, for weekly concerts. At this period amateur orchestras came into existence all over Germany. But by the end of the century they had become definitely amateur and dilettante as opposed to the professional orchestra; the change has been ascribed to the production of Beethoven's symphonies, which were then definitely beyond their powers. The amateur orchestras dissolved into smaller organisations, but the tradition is unbroken. The link is the Orchestra Vereinigung Berliner Musikfreunde (now Berliner Orchesterverein von 1810 und 1866), the earliest records of which begin with a quartet society for chamber music, in existence in 1810. Among its members have been Joachim, Radecke and Mendelssohn. It now has 130 playing members, under the direction of Carl Zimmer. Others of importance are the Akademische Orchestra (Ernst Pretorius); the Sinfonie Verein (Schrattenholz); the Orchesterverein Lichterfelde (Grawert); the Philharmonische Vereinigung (R. Kurth). In all there are some 25 amateur orchestras of sufficient standing to give public performances. Some exist for the cultivation of some special form of music, *e.g.* the Society for the Cultivation of Old Classical Music (Schwarz Reiflingen).

With the break in the connexion between amateur and professional orchestras, three great professional orchestras came into prominence in Berlin, the Königliche Hof-orchester, the Philharmonische Orchester and the Mozart later Sinfonie Orchester. There are at present in Berlin some ten professional concert and recital orchestras devoted to symphonic music.

The history of the Hoforchester is closely interwoven with that of the Opera. Among its conductors were Johann Friedrich Reichardt (1775–91), Meyerbeer (1842–64), Radecke (1871-87), Felix Weingartner (1891-98), Richard Strauss (1898–1918). Under the Republic its court connexions disappeared, and it ceased to have any other separate function than the performance of a series of symphony concerts every season in the State Opera House. To conduct these one of the leading conductors from some other German city is usually invited. The concerts are held on Friday evenings, and are preceded by a noon performance. The tendency has always been towards classical conservatism, but in late years the works of living composers have occasionally been given.

The Philharmonische Orchester was founded in 1882, and celebrated its 25th anniversary in 1907, when a festival concert was given in its honour by the Singakademie, with which, from its foundation, it had always retained the closest associations. The following have been among its principal conductors:

Karl Klindworth . . .	1884
Josef Rebiček	1897
Arthur Nikisch . . .	1897–1922
Wilhelm Furtwängler . .	1922–

Its address is Bernburgerstrasse 22a, Berlin S.W.11.

The Berlin Sinfonie Orchester, a limited company, was founded as the Blüthner Orchestra in September 1908 by members of the Mozart Orchestra, which had been dissolved in that year. The first director was Oskar Fried, and under him it developed rapidly, so that it soon took its place as occupying, side by side with the Philharmonic Orchestra, the leading position in the Berlin musical world. In that year it had already 80 members, and during the first winter of its existence it gave regular symphony subscription concerts, conducted by Panzer, von Hausegger and Weingartner. Its reputation rapidly grew, and in the next few years it had visited most of the large provincial cities (Dresden, Hamburg, Hanover, Stettin, among others) for series of subscription concerts. It toured abroad on several occasions, especially in Scandinavia, Russia, Austria, Hungary and Rumania. Most of the leading German conductors have conducted it, among them Siegfried Wagner, Josef Stransky, Wendel, Georg Schumann, Furtwängler, Richard Strauss, Eduard von Strauss, Abendroth, Paul Scheinpflug, also Mascagni and Stravinsky.

The present strength of the orchestra is 75 performers, under the direction of Peter Raabe and Julius Kopsch. Its address is Berlin W. 35, Lutzowstr. 76.

Chamber Music and Church Music.—Berlin is one of the leading capitals of Europe for the performance of chamber music and the giving of recitals. There are some 200 concert halls devoted almost solely to the purpose, with a total seating accommodation of 12,900. The largest is the hall of the Philharmonie (2200 seats). Others are the Singakademie (1320), the concert hall of the Hochschule für Musik (1244), Blüthnersaal (1169), Beethovensaal (1036), Kammermusikhaus (808), Bechsteinsaal (504), Meistersaal (400).

The cultivation of church music in Berlin has been fostered by the existence of the Akademie für Kirchenmusik, founded in 1822. In more modern times it has centred

round the two choirs of the Dom (Lutheran) and the Basilica St. Hedwig (Catholic). The Dom choir was originally founded on the model of the Sistine choir for services in the Alte Dom. In 1878 it numbered some 50 boys and 15 men, who sang the services for the most part *a cappella*, largely traditional and in regular routine of Sundays. The second stage of the Dom choir dates from the choirmastership of Adolf Becker (*b.* 1834; choirmaster 1891; *d.* 1899). During this period the old Dom was pulled down and the new Dom erected. A concert society of the Domchor had made its public appearance in 1884. Under Becker this was developed, and the Domchor began to play a prominent part in Berlin concert life. The third and modern stage was reached when Becker was succeeded by Hugo Rüdel. The music library of the choir was revised, the singing became more dramatic in character, and the choir sang to orchestral accompaniment. When the State subsidies ceased at the Revolution, the Konzertchor of the Dom was able to provide the necessary funds.

The choir of the Basilica St. Hedwig had the normal history of most larger Catholic churches till it became the executive instrument of the Gesellschaft zur Förderung der kirchlichen Tonkunst, the 'regens chori,' Pius Kalt, being leader of both since 1914. This association did much to raise the local standard of Catholic church music. Other leaders in the development of *musica sacra* in Berlin are the Motett choir and the choir of the Michaelkirche. As elsewhere in Germany, Berlin owes a great deal also in the cultivation of sacred music to the Caecilienverein, an organisation of societies founded by Franz Xaver Witt (1834–88) in Regensburg in 1867.

The performance of sacred music by secular societies received its first impetus from the foundation of the Singakademie in 1791. This has provided the model for choral societies throughout Germany. The secular societies owe their origin to Karl Friedrich Zelter, director of the Singakademie from 1800–1832. In 1809 Otto Grell, a singer, left Berlin for Vienna, and some members of the Singakademie gave him a farewell concert. Out of this there was formed in the following year under Zelter's leadership the first Liedertafel, composed of some 20 male voices from the Singakademie. It was conducted for many years by Zelter, who wrote a number of partsongs for it. A second Liedertafel was formed in Berlin in 1819, and the movement then spread, becoming established most firmly in the Rhineland. One of the more successful was the Stern'sche Gesangverein, founded by Julius Stern, which Max Bruch conducted from 1878–80.

There are at present (1925) in Greater Berlin some 82 mixed choirs, 61 male voice choirs and 16 women's choirs. The secular choral societies are organised into the Deutsche Sängerbund, founded in 1862, now comprising some 250,000 singers.

Education.—The background of Berlin musical life is the organised care devoted to musical education, designed to produce not only competent musicians and composers but also keen and intelligent audiences. Sight-singing is part of the curriculum in all the State schools, and music teachers with State training and diplomas are on the permanent staffs of all secondary educational institutions. The principal State institution is the Hochschule für Musik (see below).

There are 74 privately owned Conservatoria in Berlin. Of these the best known are the Stern'sches Konservatorium der Musik and the Konservatorium der Musik Klindworth-Scharwenka. Julius Stern (1820–83) founded, in company with Theodor Kullak and A. B. Marx, the Konservatorium bearing his name. Kullak left in 1855 to found an institution of his own (Neue Akademie der Tonkunst), and Marx left two years later. Stern, working alone, brought his school to a very high level. The present director of the Konservatorium (Bernburgerstrasse 22a-23) is Professor Alexander von Fielitz. There are classes in all branches of music, in conjunction with an opera school, orchestra and conductor school, and seminary for music teachers. In 1924 there were 1703 students. The Klindworth-Scharwenka Konservatorium grew out of the amalgamation of the piano school of Karl Klindworth, founded in 1884, with the Konservatorium of Xaver Scharwenka, founded 1881. The director is Herr Robert Robitschek (Genthinerstrasse 11). It gives instruction in all branches of instrumental music, singing, composition and conducting, and is united with an operatic school and seminary for music teachers.

The Musikpädagogisches Forschungsinstitut (Pallasstrasse 12) is primarily a research institute for teachers of music for the practical application of experience to instruction.

Every branch of the musical life of Berlin is pervaded by organisations designed to co-ordinate effort or interests. Some exist for furthering the interests of professional musicians, as the Berliner Tonkünstler Verein (Zietenstrasse 24), founded in 1884, which is at the same time a place of gatherings, a mutual benevolent institution and an engagement agency. It possesses a large library. The President is Arnold Ebel. Others are for the promotion of musical performances, as the Gesellschaft der Musikfreunde zu Berlin, which organises concerts with the Philharmonische Orchester for its members, the Berliner Konzertgesellschaft, which promotes symphony, chamber and oratorio concerts, and the Inter-

nationale Gesellschaft für neue Musik (German section of the INTERNATIONAL SOCIETY FOR CONTEMPORARY MUSIC, *q.v.*). Composers, operatic performers, musicians, organists, conductors, music teachers are all highly organised both professionally and in the trade union sense of the word.

ACADEMY OF ARTS (*Academie der Künste*) was founded by the Elector Friedrich III. of Brandenburg in 1698 for promoting fine arts. The section devoted to music was amalgamated to the Academy in 1833. The whole is under the Prussian State Ministry for Science, Art and Education. The Academy consists of the Senate, the association of members and the official educational institutions. The latter comprises the following music institutions :

1. The Academic High School for Music (see below, HOCHSCHULE) ;
2. The Academic School for Musical Composition (see below, MEISTERSCHULE) ;
3. The Academy for Church and School Music (see below, KIRCHENMUSIK).

HOCHSCHULE.—The *Staatliche akademische Hochschule für Musik* in Berlin, formerly the 'Royal' High School for Music at Berlin, was founded in 1869. Joachim was its first director. It was established in its present form in 1875, on the reorganisation of the Royal Academy of Arts. It was formed by the amalgamation of two distinct bodies. The first of these, which constitutes the Abteilung für musikalische Composition of the present school, was founded in Mar. 1833. In 1869 the Abteilung für ausübende Tonkunst (consisting only of instrumental classes for violin, violoncello and piano) was added under the direction of Joachim. In 1871 an organ class, in 1872 classes for brass instruments, double bass and solo vocalists, and in 1873 a choral class were added ; and in 1874 a full chorus was organised : the *cappella* choir of the school has attained great renown in the performance of works by Bach and others.

The Hochschule now consists of ten departments, as follows : (1) composition and theory ; (2) singing ; (3) violin and violoncello ; (4) piano and organ ; (5) orchestral instruments ; (6) school of conducting ; (7) choral school ; (8) opera school ; (9) operatic chorus school ; (10) orchestral school. The director is Franz SCHRECKER (*q.v.*), who is also chief lecturer in the composition departments. In Jan. 1925 there were 441 students, 25 per cent of whom are educated free of charge. The staff consists of 51 professors and other assistants. The academic year is divided into two half-yearly terms beginning on Apr. 1 and Oct. 1, when new students are admitted. Students must have completed their 16th year and produce evidence of preliminary general and musical education and talent. The diploma course in most of the subjects is two years.

The school is housed in an imposing modern building in the Fasanenstrasse, opened with much ceremony in 1902, and since enlarged and improved. The students form an orchestra of 120 members, which gives regular performances, and each term produce an opera.

The Hochschule possesses a museum of musical instruments designed to illustrate development from the year 1500 to the present day, together with a collection of ancient and extra-European musical instruments. It was founded in 1888 and is under the direction of Curt Sachs. It is open on Tuesdays, Thursdays, Saturdays and Sundays from 11 to 1.

KIRCHENMUSIK (*Staatliche Akademie für Kirchen- und Schulmusik*). This institution was founded in Berlin (36 Hardenbergstrasse, Charlottenburg) in 1822, and was placed under the direction of the (Royal) Academy of Arts in 1875. The director of the institution is a member of the Senate of Academy. The institution is devoted to the education of organists, cantors and music masters for higher schools and seminaries. There are eleven professors giving instruction in the organ, pianoforte, violin, singing, harmony, counterpoint and form, instrumentation, ancient musical notation, Gregorian music, organ construction, physiology and hygiene of the voice. The first director was Bernhard Klein. The post is held (1925) by Curt Thiel.

MEISTERSCHULE (*Akademische Meisterschulen für musikalische Komposition*) (Berlin-Charlottenburg, Fasanenstrasse 1) exists for the purpose of affording opportunity for students to obtain further education in composition under the immediate direction of a master. The school is under the direction of a board, on which are Hans Pfitzer and G. Schumann.

SINGAKADEMIE.—The Berlin Singakademie was founded by Karl Friedrich Christian Fasch (*b.* Zerbst, 1736 ; *d.* 1800) who was appointed in 1756 (with Philipp Emanuel Bach) cembalist to Frederick the Great. Fasch lost this post in consequence of the Seven Years' War, and retired in Berlin as music teacher and composer. The Singakademie originated with some attempts made by Fasch and a few of his pupils and musical friends to perform his own sacred compositions for mixed voices. The Society was founded on May 24, 1791. The original members were 27, thus distributed : 7 soprani, 5 alti, 7 tenors and 8 basses. At first it met in the house of Frau Voitus, Unter den Linden 59 (this was pulled down many years ago), and for long retained its private character. On Nov. 5, 1793, it was granted the use of a room in the Royal Academy of Arts, and from this circumstance it derived its name. Fasch's object was to promote the practice of sacred music, both accompanied and unaccompanied, but especially the latter. The society at first confined itself to Fasch's

own compositions, among others his 16-part Mass *a cappella*, but it soon extended its field. Only imperfect records remain of the performances during this early period.

Fasch died in 1800, and was succeeded by Karl Friedrich Zelter (*b.* 1758; *d.* 1832), who had been his pupil and one of the original members of the Society. Under his direction the Singakademie really began its flourishing public career. In 1802 it numbered over 200 members. In 1800 Mozart's Requiem was produced, in 1807 Handel's 'Judas Maccabæus,' in 1815 Haydn's 'Creation.' An offshoot of the Society was the foundation by Zelter (in 1809) of the first Liedertafel. The first public performance of the Singakademie was given at Easter 1801, the proceeds being devoted to charity. But the Society outgrew its room in the Academy, and in 1827 it built its first concert hall, with a residence for the director, on a piece of ground presented by Friedrich Wilhelm III. called the Kastanienwald, adjoining the University. This in later years became too small, in spite of reconstructions carried out in 1888 and 1904, but it remains the home of the society. The first practice there was held on a Tuesday, and Tuesday has ever since remained the weekly practice day. In 1829 a great event in the annals of the Society took place; this was the first performance of the St. Matthew Passion music of J. S. Bach, conducted by Mendelssohn. It marked an epoch in the revival of Bach's works after nearly a century of neglect. Small thanks were due to Zelter. When Mendelssohn proposed it to him he flatly refused, and it was only owing to the persistence of Mendelssohn's friend, Eduard Devrient, the actor, that Zelter gave way.

Zelter died in 1832. His successor as director was Karl Friedrich Rungenhagen (*b.* 1778; *d.* 1851), who had been his assistant since 1815. Under him the St. John Passion music of Bach was produced for the first time in 1833, the B minor Mass (in abbreviated form) in 1834, Beethoven's Ninth Symphony and the Kyrie and Gloria from the Missa Solennis in 1836. The Society of that period performed many of the compositions of Rungenhagen, who was a prolific writer of good sound music for choral singing.

The Singakademie had now taken the shape it was to preserve and exhibit as a model to other societies throughout Germany. Rungenhagen died in 1851 and was followed by Eduard Grell (*b.* 1800; *d.* 1886), organist and choirmaster of the Dom, who had been a vice-director of the Society since 1832. Grell remained director until 1876, when he retired on account of old age. He retained the post of honorary director and was succeeded by Martin Blumner (*b.* 1827; *d.* 1901), the historian of the Society. During Blumner's term of office the Singakademie celebrated its centenary with a festival held on May 24-26, 1891, in which Bach's B minor Mass was the chief work. Blumner's last service to the Society was the production of Friedrich Kiel's oratorio 'Christus' in Jan. 1899.

After a few months' interval during which the practices were conducted by the vice-director, Hermann Kawerau, Dr. Georg Schumann (*b.* Königstein, Saxony, 1866) was appointed to the vacant office.

Under his direction the number of active members and subscribing members steadily increased. Eight concerts were regularly given each season in the Singakademie, the Society co-operating with the Philharmonische Orchester. They rapidly became a feature of the musical life of Berlin. Each year a recital of the Passion music of St. Matthew was given in the Garnisonkirche. The Society's choirs sang at many public festivals. In Apr.-May 1913 members of the Singakademie visited Milan, Turin and Bologna, in conjunction with a Philharmonic Orchestra of 60 performers, and performed the Passion Music of St. Matthew and St. John and Brahms's German Requiem. The Society also gave special performances on various festival occasions, such as the Emperor's Jubilee, the Schiller, Mendelssohn, Schumann, Haydn and Liszt centenaries, Bach, Mozart and Handel festivals and for such purposes as the purchase of Bach's birthplace at Eisenach, and the founding of a fund for musicians. The 125th anniversary of the Society was celebrated on May 27 and 28, 1916, with the production of Georg Schumann's oratorio 'Ruth,' first produced in Mar. 1909.

Many new and revived works have been produced by the Society under Schumann's direction. In Oct. 1901 came César Franck's 'Les Béatitudes,' Elgar's 'The Apostles' in Feb. 1906, four Bach Cantatas (1907), Psalm settings of Schütz, Mendelssohn, Liszt and Max Reger (1911), Max Bruch's 'Easter Cantata' (1910), Sgambati's Requiem (1910), works by Taubert, Kaun, W. Braunfels, Richard Strauss and Anton Bruckner (1913), and Enrico Bossi's 'Giovanna d' Arco' (1914). During the war (1914–18) the Society's efforts were allowed to suffer no interruption. In 1915 Bach's Cantata 'Ein' feste Burg' was produced for the first time, and the Passion Music of St. Matthew was sung for the hundredth. In 1916 Liszt's 'St. Elizabeth,' Max Reger's Requiem and 'Der Einsiedler,' and in 1917 (besides the first performance of Max Bruch's 'Gustav Adolf') Taubmann's 'Kampf und Friede' and R. Schumann's 'Manfred' were produced. In 1918 the new work was Carl Prohaska's 'Frühlingsfeier,' in 1919 Klose's 'Sonnegeist,' Max Bruch's 'Trauerfeier' (sung from MS.), and Rezniček's 'Vater Unser.' In 1920 Taubmann's Deutsche Messe was given. In 1920

the Passion Music of St. Matthew was sung for the 120th time, and in 1925 the Passion Music of St. John for the 30th time.

The Singakademie has served as a model for most of the vocal unions of Germany. Its structure is exceedingly simple, the governing body consisting of a director, who has charge of all musical matters, and a committee of members (women as well as men) who manage the business. All of these are elected at general meetings. Since 1815 the director has had a fixed salary out of the funds of the Society. New members are admitted by the director and the committee. In 1925 there were 500 singing members and 315 other members.

Operatic History

Staatsoper.—As already indicated, opera in Berlin has a long and chequered history, due in part to the vagaries in temperament of its patrons the Brandenburg electors and their successors the kings of Prussia. This product of the renaissance was late in finding a foothold in Berlin, and at the outset was an imported Italian product. The first recorded performances, and there is no reason to think that there was anything earlier, took place in the reign of Frederick III. (1688), whose wife, Sophie Charlotte, must count as the first patroness of the Italian opera and the French ballet. The performances, carried out in the court theatre, were of course private, and it was not till 1702 that the first public operatic performances, given by the court players, were produced in a theatre built specially for the purpose. Berlin then lagged far behind the capitals of other German states, notably Dresden. In 1728 Frederick the Great (then Crown Prince) visited the court of Saxony and the gala performance at the opera, given in honour of his visit, fired him to emulation, and he resolved that when he ascended the throne one of his first works should be the erection of an opera house worthy of his capital. Plans by Baron von Knobelsdorf, Frederick's minister for public works, were already in existence and a beginning was made in 1740 to clear away the old fortifications and level out the sandy mounds. Meanwhile opera was carried on at the Schloss Theatre, and the first gala performance was held to welcome Frederick back from his victories in Silesia. The piece given was 'Rodelinda, King of the Lombards,' by Carl Heinrich Graun.

The new building was not fully complete when on Dec. 7, 1742, it opened with great ceremony, Graun's opera 'Cæsar and Cleopatra' being given. The opera was still the private undertaking of the court, and tickets were allotted (they could not be bought or sold), while the entire conduct of the performances was under exotic influences. The performers were engaged in Italy, the entire ballet imported from France. As for the works, the court dictated the subject and Graun produced the work. In fifteen years he turned out 26 operas, as an additional task to his musical duties.

As the consequence of the Seven Years' War the Opera House was closed from 1756–64. Graun had died in 1759, and owing to the impoverishment of both the State and the Royal House no successor was appointed (though there are records of occasional performances) till 1775, when the King appointed Johann Friedrich Rheinhardt. The King lost interest in the opera. On one occasion he is said to have told off a regiment to attend and fill out the empty benches. Rheinhardt made little difference to the dull tradition that had grown round it; the opera still remained Italian and official, deaf to the rise of other movements elsewhere in Europe.

The scene in fact shifted to the National Theater in the Gendarmenplatz, which had a separate history. Here the middle period of the development of opera in Germany had its beginning. The turning-point was the production of Mozart's 'Die Entführung' in 1788, soon to be followed by 'Figaro's Hochzeit' and 'Don Juan.' Under B. A. Weber, the National Theater rose on the tide of the new movement. Here 'Die Zauberflöte' was produced by him. Gradually the Royal Opera House declined in importance.

After the peace of Tilsit, however, it came to the fore once more, under Count Karl von Brühl as intendant. Had Count von Brühl been able to command the ear of the King, the story of the next few years might have been different, but Frederick William III. loved show more than music, and the spectacular under Spontini held sway. It was not till June 18, 1821, that the fight was won. On that date the first performance of the 'Freischütz' took place, with astounding success. This is one of the very few pieces of permanent value of which the initial production has taken place at the State Opera at Berlin. Another is Otto Nicolai's 'Merry Wives of Windsor,' produced in Berlin 1849.

The era of Meyerbeer now began. After the success of 'Les Hugenots' he was summoned to Berlin, his native city, to succeed Spontini as Generalmusikdirector, and Nicolai became one of the two Kapellmeister under his administration. The fire of Aug. 18, 1843, destroyed the Opera House down to the foundations of Langhans, but the rebuilding was begun at once and the new building opened once more with Meyerbeer's 'Das Feldlager in Schlesien,' written for the occasion. It had an unexpected outcome for the composer. He had written it for a new young Swedish singer, named Jenny Lind, whom he had discovered, and his attempt to

introduce her into the company led, with characteristic Berlin jealousy, to disputes and his resignation. He retained the post of director of the court music, however, and conducted in person the performance of his opera 'Der Prophet' in 1850.

The classic age of the State Opera House now began to unfold under Count Botho von Hülsen. Only in one respect were the ideas of the period in Berlin behind the times. Meyerbeer, with his wonderful discernment, had produced Wagner's 'Der fliegende Holländer' before the fire (the author being then little known), but under the deadening influence of the Hohenzollerns a nervous conservatism marked every advance, and Wagner had established his imperishable fame elsewhere before Berlin could be brought to produce him. Von Hulsen struggled in vain, and Carl Eckert, the champion of the German opera, supported him. The first performance of the 'Ring' cycle in Berlin took place at the Victoria Theatre in May 1881, and it was attended by Wagner in person as an affront to von Hülsen. The path was, however, not really smoothed out for German opera till the period of von Hülsen's successor, Count Bolke von Hochberg (1886–1902). During this period, though no new works of outstanding importance were produced in the State Opera House, a very high level in performance of new and current works was reached. Under Felix Weingartner and Richard Strauss the orchestra was brought to a high standard.

It had long been realised that the Opera House of Frederick the Great, in spite of its having been remodelled, reseated and redecorated on various occasions, was inadequate for the needs of Berlin. On the instructions of the Emperor William II., plans for a new Opera House were made in 1896, and as a preliminary the Prussian State had bought the 'New Opera Theatre' in the Königsplatz, familiarly known after the proprietor as 'Kroll's' (on the side opposite to the Reichstag) for the sum of 2½ million marks for the purpose of pulling it down and building the new Royal Opera House on its site. A succession of difficulties delayed the scheme, and when at last building was about to be begun in 1914 the war intervened. Subsequently the dilapidated building of the New Opera Theatre was repaired and in part rebuilt to become the 'Oper am Königsplatz.' It was opened in 1922, 'Die Meistersinger' being given as the inaugural performance, with Kleiber conducting.

The later history of the State Opera is that of opera in Germany generally. A short interregnum took place in 1918 when Richard Strauss became intendant, and then control passed to Max von Schillings. Under his direction the State Opera fell into line with European production, though it showed no greatly adventurous spirit. Max von Schillings was, however, summarily dismissed on Nov. 27, 1925, as the result of a dispute with the Prussian Ministry of the Interior over the estimates for a renewal of the subsidy.

The State Opera House had enjoyed an annual subsidy from the Prussian Budget and its members' official status. After the war, owing to the collapse of the Prussian State finances, the subsidy was withdrawn. It became impossible to continue the productions on the same scale, and the Opera House was again in danger of closing its doors. But a working union was effected with the Oper am Königsplatz, which acted as an overflow house, producing the same operas, using the same casts and scenery, and charging slightly lower prices. The State Opera seats 1574 persons, the Oper am Königsplatz 2500. The two together can be self-supporting.

The Deutsches Oper, Charlottenburg (Bismarkstrasse 34), a fine modern house, was built for the Municipal Council of Charlottenburg from plans of Seeling in 1911–12, and was opened on Oct. 7, 1912, with the performance of 'Fidelio,' conducted by Waghalter. It holds 2300 persons. It was leased to a company, the Deutsches Opernhaus A.G., for 30 years, to be carried on in the public interest. Certain clauses were attached by the Municipality to the lease for free and cheaper performances. The Opera House was under the direction of Georg Hartmann, and for the first years of its existence it carried out the intentions of its promoters, its production reaching a very high level. During the war, however, its prosperity declined, and in the subsequent years it underwent a series of financial vicissitudes which were not without their effect on the artistic value of its later productions. In 1925, however, a financial reconstruction took place, and the productions were able to be resumed on the former scale. The future of the Deutsches Opernhaus has now been guaranteed for some years.

In Feb. 1925 the Berlin 'Magistrat' (Municipal Council of Berlin) founded a municipal share company from which private capital was excluded, and it granted an annual subsidy of 150,000 marks as working capital together with a further sum up to 150,000 marks for emergencies. It also granted the sum of 80,000 marks towards the liquidation of the old company. Therewith the finances of the Deutsches were once more placed upon a sound footing. It was reopened on Sept. 18, 1925, with a gala performance of 'Die Meistersinger,' under Bruno Walter.

The most frequently played pieces have been 'Tales of Hoffmann,' 'Fledermaus,' 'Carmen,' 'Freischütz,' 'Fidelio,' 'Tannhäuser,' 'Marta,' 'Figaro's Hochzeit,' 'Lohengrin,' 'Parsifal.'

It has been the scene of several original productions, but none that have proved lasting successes. H. G. D.

BERLIOZ, Hector (*b.* La Côte St. André, near Grenoble, Dec. 11, 1803 ; *d.* Paris, Mar. 8, 1869), an eminent French composer and pioneer of romanticism.

The son of a country doctor, he was at first educated for the practice of medicine ; and, though allowed to play with music as a pastime, was prohibited from any thought of music as a career. The most plastic years of his life were thus almost entirely wasted. For his father's profession he felt nothing better than ' a cold disgust ' ; for the profession which he was afterwards to choose he received, during his boyhood, no training worth the mention ; at an age when Mozart and Mendelssohn were finished masters, his whole musical attainment consisted in a rudimentary acquaintance with Catel's *Harmony*, a few boyish compositions, and a very moderate proficiency on the flageolet. It is true that his poetic genius was early stimulated by the study of Virgil, and by the discovery, in a neglected corner, of a few fragments from Gluck's ' Orfeo ' ; but these ill replaced the technical exercises which his ardent and mercurial temper especially needed. The remarkable inequality of his composition may be explained, at any rate in part, as the work of a vivid imagination, striving to explain itself in a tongue which he never perfectly understood.

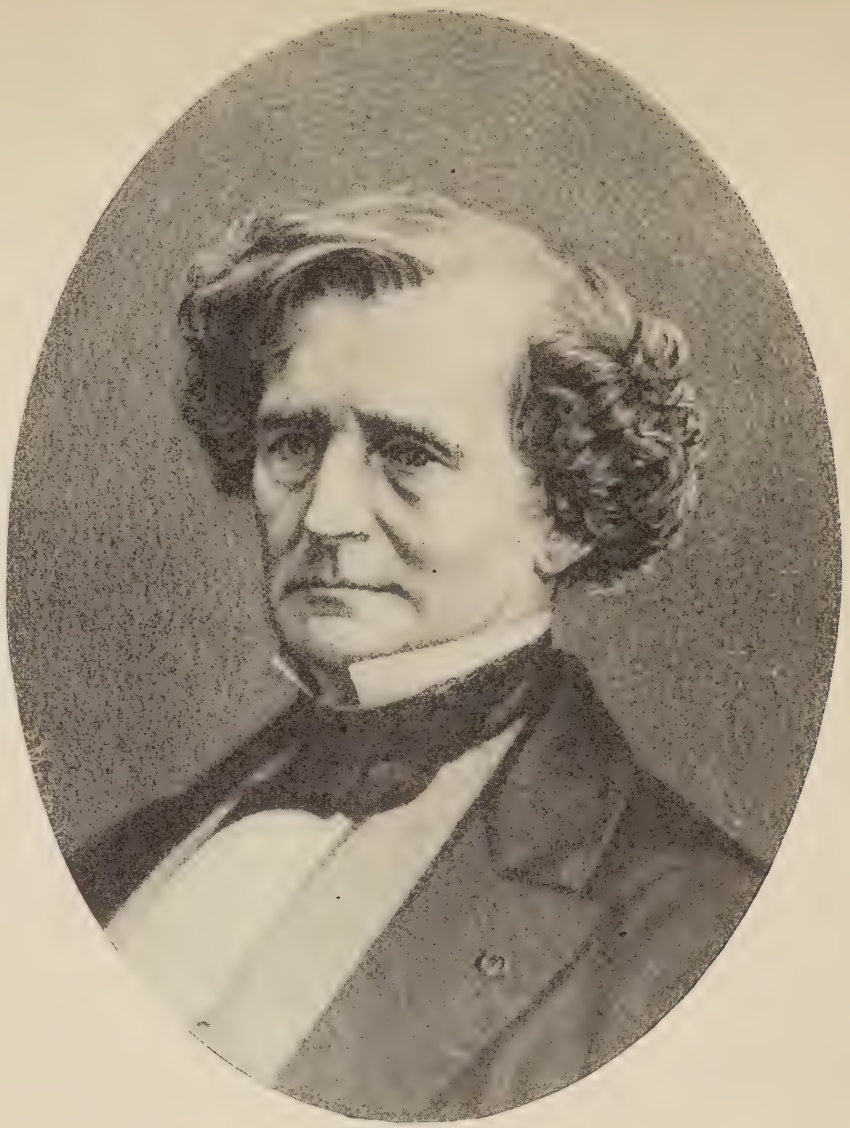
In the year 1822 he was sent to follow his course at the Medical School of Paris. But the dissecting-room was too much for him, the doors of the Conservatoire Library stood open ; after a short struggle, the conclusion of which was foregone from the outset, he announced his determination to devote himself entirely to music. His parents argued, expostulated and finally cut off supplies, but it was all to no purpose ; Berlioz had burned his ships and there was no longer any question of retreating. He applied to Lesueur for lessons, with which he made such rapid progress that in a few months' time he was able to compose a Mass for the Church of St. Roch ; and in 1823 he was admitted, as a regular pupil, to the Conservatoire.

The next seven years were spent in continuous and truceless conflict. Lesueur was the only one among the professors whom he could tolerate ; for Cherubini, the director, he seems to have felt a positive detestation ; he was impatient of academic methods, and wholly contemptuous of academic taste. His mind moved in a larger world than that of his teachers ; his poet at the time was Shakespeare, his composer Beethoven, while they were still preoccupied with smooth counterpoint and the trim correctness of the classical drama. On the other hand, it is clear that he lost much through sheer intractability. Like many pioneers of the Romantic movement he indulged too much in disdain, and concluded too readily that because an accurate style may sometimes cover poverty of thought it is therefore useless to a thinker. Even had he been indisputably right in regarding current methods as enemies to progress, he would still have done well to apply the maxim, ' *fas est et ab hoste doceri.*'

At the same time his life during this period showed a courage and a determination that were little short of heroic. He was in disgrace with his parents, in disgrace with his teachers, in such extreme poverty that he was forced to maintain himself as a chorus-singer at one of the minor theatres, baffled at every turn by constant opposition and by repeated failure. Yet he never faltered or lost heart ; he maintained his purpose with the most uncompromising fidelity ; and if he sometimes delivered his message in too strident a tone, at any rate he stood to it loyally and recked nothing of consequences. At last, in 1830, the tide of his fortune turned. His cantata ' La Mort de Sardanapale,' appropriately finished amid the rifle-shots of the July Revolution, won him the Prix de Rome,[1] and opened the prospect of a successful career. He was still almost unknown, except as a rebel. Since the St. Roch Mass he had written a few compositions, ' Eight Scenes from Faust,' the overtures ' Les Francs-Juges ' and ' Waverley,' the ' Symphonie fantastique,' the ' Fantasia on Shakespeare's *Tempest*,' but they had made no mark and attained no reputation ; the episodes of his own artistic life may be said to date from the year which, by an odd coincidence, saw Chopin's arrival in Paris and Schumann's emancipation from the study of the law.

The terms of the Prix de Rome imposed three years of travel, the first two to be spent in Italy. But after eighteen months Berlioz could bear expatriation no longer ; he petitioned the ministry for leave to return, and by the middle of 1832 was once more established in Paris. He brought with him a revision of the ' Symphonie fantastique,' a monologue ' Lélio ' (intended as its sequel) which was mainly a pasticcio of earlier compositions, drafts of overtures to ' King Lear ' and the ' Corsair,' [2] and a few songs, of which one, ' La Captive,' is worthy of a place among the great lyrics of the world. It is not a little significant that, of the scanty fruits which he gathered on his Italian journey, the finest should be the lamentation of a prisoner in a foreign land.

In 1833 he married Henrietta Smithson, an Irish actress, who had been playing Shakespeare at the Odéon, and forthwith set himself in good earnest to work for a livelihood. At first it



[1] The cantata ' La Mort d'Orphée,' with which he first competed unsuccessfully for the Prix de Rome (1827), was found after a disappearance of nearly forty years in 1923, and is preserved in the National Library at Paris. See Catalogue at the end of this article.

was an uphill task. Pupils were few, publishers unenterprising; concerts only showed how easily receipts could be swallowed up in expenses; the populace maintained that indifference which it usually exhibits towards any artist who cannot introduce himself as a virtuoso. He applied for the directorship of the Gymnase Musicale; it was refused him by Thiers. He applied for the professorship of harmony at the Conservatoire; it was refused him by Cherubini. An accident had closed the public career of his wife; the birth of his son Louis brought a new mouth to feed; from sheer necessity he became a journalist, and supported his household by writing criticisms and feuilletons which, as he complains to his friend Humbert Ferrand, left him almost no time for composition. Yet, in spite of all difficulties and distractions, the seven years which followed his marriage were the most active of his whole life. He was a true improvisatore, and, his interest once engaged, could cover pages of complex orchestration with an almost miraculous rapidity; indeed, he tells us that he had to invent a system of shorthand in order to keep pace with the unceasing flow of his ideas. Between 1833 and 1840[1] he produced the cantata on the death of Napoleon, the three symphonies 'Harold en Italie,' 'Symphonie funèbre et triomphale' and 'Roméo et Juliette,' the opera of 'Benvenuto Cellini,' the Requiem, first performed in 1837 for the disaster at Constantine, several songs, including 'Les Nuits d'été,' the 'Rêverie et caprice' for violin, and the ballad 'Sara la baigneuse,' originally written for male quartet, and afterwards enlarged for chorus and orchestra. Toward the end of this period he began to reap a material reward which relieved him from further drudgery. The Requiem, commissioned by the French Government, was repaid with a fee of 4000 francs; in 1838, Paganini sent him 20,000 for 'Harold en Italie,' and in 1840, he received another 10,000 for the 'Symphonie funèbre et triomphale.' This enabled him not only to throw off the burden of journalism but to indulge a long-cherished project of a tour through Germany where, thanks to Liszt and Schumann, his name was already well known. Unfortunately, at the last moment, Madame Berlioz refused to consent to his departure, and the quarrel became so acute that it ended in a separation. There is no need to revive here the miserable story of broken nerves and of a jealousy not altogether unmerited. It is enough to say that Berlioz continued to maintain his wife until her death, Mar. 3, 1854; but that, although they sometimes met on friendly terms, there was never any real reconciliation between them.

After all the visit was delayed for over two years, partly by the performance of 'Freischütz' in Paris, for which Berlioz orchestrated the 'Invitation à la valse,' partly by engagements in Paris and Brussels which occupied the greater part of 1842. But at the beginning of 1843 he was once more his own master and at once proceeded to put his project into execution. The tour was a triumphant success. He travelled over the country from Cologne to Berlin, from Stuttgart to Hamburg, giving concerts at all the principal cities, and despite some academic opposition, received everywhere with crowded audiences and enthusiastic applause. Schumann offered him a cordial welcome; Mendelssohn, who disliked his music, showed him every courtesy, and gave him every facility for performance; the King of Prussia postponed a journey in order to hear 'Roméo' at Potsdam; the whole campaign was one long triumphal procession, and the burden of every bulletin is 'another victory: let them know it in Paris.'

About the middle of 1843, Berlioz returned, covered with laurels; he was set, for a livelihood, to conduct the music of other composers. In 1845 he made an equally successful tour in Austria, brought back a new composition 'La Damnation de Faust,' and produced it in 1846 before a scanty and apathetic audience. Next year he won fresh triumphs in Russia, returned once more to find an official post vacant at the Opéra, and lost it through the machinations of Roqueplan. And all this time it is clear from his letters that he regarded his travels as a soldier regards foreign service, and that his whole affection was lavished on the brilliant, disdainful city that was using him so ill.

Between 1847 and 1855 he paid four visits to England. The first was undertaken, at Jullien's request, for a season of opera at Drury Lane, but it began with insufficient preparation, and it ended in sheer disaster. The other three were of better omen. In 1851 he came over as a member of the Jury at the Great Exhibition, and wrote an admirably fair and lucid report on the merits of the competing instruments; in 1852 and 1855 he was engaged as conductor of the New Philharmonic, and produced at Exeter Hall his 'Roméo' symphony and some selections from his 'Faust.' On June 25, 1853, he conducted his 'Benvenuto Cellini' at Drury Lane. It is interesting to remember that in 1855 Wagner was also in London, conducting the concerts of the rival society. Between them the two revolutionaries kept the public alert, and the newspapers fully occupied.

His writings at this time show an allegiance curiously divided between literary and musical composition. On his return from Germany in 1843 he published his *Voyage musical*, with some valuable essays on Weber, Gluck and Beethoven; in 1844 he wrote the 'Hymne à la France' for an industrial exhibition in Paris;

[1] The overture to 'Rob Roy,' first performed in 1834, was written in 1832.

next year came 'Faust,' and then, after his Russian visit, the *Traité de l'instrumentation* (numbered in his catalogue of compositions as op. 10), and the 'Fuite en Égypte,' which he afterwards enlarged into his sole attempt at oratorio, 'L'Enfance du Christ.' In 1850 he printed two volumes of songs—'Fleurs des Landes' and 'Feuillets d'album'—and revised his choral ballad of 'Sara la baigneuse'; after which follow in steady succession 'La Menace des Francs' (1851), *Les Soirées de l'orchestre* (1853), a most entertaining collection of sketches and criticisms, three choruses printed in 1854 under the title of 'Tristia,'[1] and at the beginning of 1855 his revised version of the overture to the 'Corsair.' Between 1835 and 1863 he wrote occasionally for the *Débats*, and in more than one field carried on a vigorous warfare against Scudo, Fétis and the other Parisian critics. He did well to be angry. We have but to read the attacks upon him to understand how far they were animated by a mere spirit of partisanship; we have but to recall the story of Pierre Ducré to realise the extreme incompetence of his antagonists.

In 1855 came the Paris Exhibition, and Berlioz was commissioned to write a Te Deum for its opening, and a cantata, 'L'Impériale,' for its close. The latter, though printed among his works as op. 26, has long disappeared from the concert-room; the former, occasionally given at our larger festivals, may claim to rank beside the Requiem, than which it is even more gigantic in scale, and more exacting in requirement. It was published at the end of the year, together with 'Lélio' and the 'Enfance du Christ,' and at last roused Paris to some tardy recognition of her most distinguished composer. Hitherto he had received no decoration except the Cross of the Legion of Honour; in 1856 he succeeded to a *fauteuil* in the Académie, and three years later was elected to the only public appointment which he ever held—the librarianship of the Conservatoire. It was fitting that he should end his days as authorised guardian of the scores which had first encouraged him to embark on his career.

On the death of his first wife he married Mlle. Martin Recio, a singer of small capacity and high ambition, who frequently imperilled the success of her husband's work by insisting on the leading part in its performance. Yet through seven years of ill-assorted union he treated her with the utmost patience and tenderness, and her sudden death in 1862 left him in a prostration of grief. 'I have no words to express my desolation,' he says in the few lines which carry the news to Ferrand. Indeed life had become very lonely for him. His son Louis was serving abroad in the French navy, his most intimate friend lived away from Paris, in his own immediate circle hardly any one remained to whom he could look for companionship. His public career, too, though lightened by a few moments of success, closed with a heavy and unmerited disappointment. Early in 1862 he made an enduring mark on French criticism with his volume entitled *À travers Chants*. Later in the same year his little opera of 'Béatrice et Bénédict' was brought out at Baden, and well received; but in 1863, 'Les Troyens à Carthage,' the second part of the work which he intended as his masterpiece, was driven after a short run from the boards of the Théâtre Lyrique. Berlioz never recovered the shock of its failure. He was worn out with labour and warfare, with public conflict and private sorrow, and he had no longer any heart to continue the struggle. At one of the performances his friends tried to cheer him by pointing to the audience, and saying, 'Eh bien! les voilà qui viennent.' 'Oui, ils viennent,' answered the composer sadly, 'mais, moi je m'en vais.'

After 'Les Troyens' Berlioz wrote no more, and the history of his remaining years is little better than a chronicle of encroaching sickness. In 1867 he was well enough to accept a second invitation to Russia; but in 1868 his health entirely broke down, and he died at Paris in the sixty-sixth year of his age. He was honoured with a stately and ceremonious funeral, and ten years later, Mar. 8, 1879, a commemorative concert of his works filled the Hippodrome from floor to roof. 'Le génie,' says an author who well knew the Parisian temperament, 'c'est le talent des hommes morts.' In Mar. 1903 a bust of Berlioz, by M. Léopold Bernstamm, was erected in front of the theatre at Monte Carlo, in commemoration of the transference of 'La Damnation de Faust' to the stage of that place. On Aug. 15 of the same year, a statue by M. Urbain was unveiled at Grenoble, and on the two following days musical performances of 'La Damnation de Faust,' etc., were given. The actual centenary of Berlioz's birth was duly celebrated in Paris by performances of the same work at two of the Lamoureux Concerts, by a series of performances at the Colonne Concerts, and by a performance of 'Roméo et Juliette' at the Conservatoire, in Dec. 1903.

The Art of Berlioz

That he possessed genius is beyond all question or controversy. No composer has ever been more original, in the true sense of the term; none has ever written with more spontaneous force or with more vehement and volcanic energy. His imagination seems always at white heat; his eloquence pours forth in a turbid, impetuous torrent which levels all obstacles and overpowers all restraint. It is the fashion to compare him with Victor Hugo,

[1] Of these the 'Méditation religieuse' was written in 1831, and the other two in 1848.

and on one side at any rate the comparison is just. Both were artists of immense creative power, both were endowed with an exceptional gift of oratory, both ranged at will over the entire gamut of human passion. But here resemblance ends. Beside the extravagance of Berlioz, Hugo is reticent; beside the technical errors of the musician the verse of the poet is as faultless as a Greek statue.

There is, indeed, a singular perversity in Berlioz's music, due partly to a twist in his disposition, partly to deficiency of early training. He had, for example, a spring of pure and beautiful melody, and in 'La Captive,' in the love-scene from 'Roméo,' in the great septet from 'Les Troyens,' he showed that he could employ it to noble purpose. Yet time after time he ruins his cause by subordinating beauty to emphasis, and is so anxious to impress that he forgets how to charm. The Evening Song in 'Faust' is spoiled by the very cadences that were intended to make it effective. The beginning of the Pilgrim's March in 'Harold' is delightful, the last strain offends like a misplaced epigram. No doubt there are other artists who have yielded to a similar temptation. Chopin used often to end his dreamiest improvisations with an unexpected discord. Heine often closes with a freakish jest a song full of pathos or romance. But these men did it out of sheer mischief, Berlioz because it seemed to him the natural outcome of his thought. On the other hand, it should be said that he has, in this matter, the qualities of his defects. His phrase, often beautiful, is almost always telling and incisive, and his command of rhythm was, at the time when he lived, without parallel in the history of music.

It is in the general fabric of his composition that his technical deficiencies are most apparent. His harmony is usually rich in colour, but in progression it is too frequently awkward or commonplace, either securing its point of colour by an ugly line, or giving a false appearance of movement by a mere rhythmic arrangement of scales or arpeggios. This comes not from want of harmonic perception but from want of proper education in counterpoint, with which, as with all forms of purely musical design, Berlioz was very imperfectly acquainted Nor does he seem to have been aware of his own limitations. He draws public attention to the correctness of the Amen fugue in his 'Faust,' but ignores the fact that it could have been written by any forward pupil in a musical college. He regards the structure of the 'Symphonie fantastique' as the legitimate outcome of Beethoven's principles, and does not see how often he violates the laws which he is professing to develop. On neither of these issues, therefore, has he any claim to be regarded as a true reformer. When he keeps the rules he can only apply them to some elementary problem; when he tries to extend their province he loses himself in the wilderness.

It is a pleasanter task to consider the one department of pure musical art in which his genius found its amplest scope and its fullest expression. As a master of Orchestration (*q.v.*) his claim to the first rank is incontestable. He knew the capacities of the different instruments better than the virtuosi who played them. He could foresee by intuition the effect of every possible combination or arrangement. He had inexhaustible invention, boundless audacity, an unerring sense of colour, and that highest economy of resource which knows when to spare and when to lavish. In the 'Invitation,' in the first movement of the 'Tempest Fantaisie,' in the opening of the 'Racóczy March,' he can move with perfect ease through a scheme of low tones and delicate values; in the Requiem, in the Te Deum, in the 'Damnation de Faust' he can make his canvas glow and blaze with the hues of Mont Pelée or Krakatoa. His work, in short, marks a new era in instrumentation, and has been directly or indirectly the guide of every composer since his day.

No doubt his larger effects require conditions that are not very readily available. Towards the end of the famous *Traité de l'instrumentation* he sketches the construction of an ideal orchestra, which should faithfully and precisely carry out his intentions: 242 strings, four of which are tuned an octave below the double basses, 30 grand pianos, 30 harps, legions of wind-players and percussion-players; an army of sound equipped for the most overpowering conquests. And though, like many of his ideals, this remained for him unattainable, he usually approached as near to it as circumstances would allow. In his 'Tuba Mirum' and his 'Lachrymosa' the forces employed are of enormous magnitude: an immense number of bowed instruments, the wood-wind doubled, trebled, quadrupled, a tempest of rolling drums and clashing cymbals; and, at each corner of the stage, a blare of brazen instruments which carry, as from the four winds of heaven, their ringing, shattering trumpet-calls. Well might Heine say that such music reminded him of primeval monsters and fabulous empires. It is out of scale with our civilised restrictions and reticences: for good and for ill it echoes over a wider expanse. But at the same time it is compelled to face the blunt practical issue of performance; to be fully understood it must be heard frequently, and it defeats its own end if it insists upon requirements which can rarely be satisfied. 'I understand,' said the King of Prussia, 'that you are the composer who writes for five hundred musicians.' 'Your Majesty has been misinformed,' answered Berlioz, 'I sometimes write for four hundred and fifty.'

From the technical side, then, Berlioz's

chief claim to immortality is that of a brilliant and audacious colourist. It remains to consider the purpose for which he employed his medium. On this point he is entirely explicit: music was to him a language capable of conveying definite impressions, of arousing definite emotions, even of narrating a definite series of events. In every one of his vocal works, from the 'Élégie' to 'Les Troyens,' the main office of his music was to illustrate and reinforce the words. In every one of his instrumental works, from 'Harold' and the 'Symphonie fantastique' to the little violin-piece which he wrote for Artôt, he was principally occupied in telling a story or in painting a picture. His weakness in pure design was partly the cause, but still more the effect, of his preoccupation with the dramatic or descriptive aspect of his art. With him, more than with any other great composer for the concert-room, it is possible to abstract form from content and to balance neglect of the one against enthusiastic devotion to the other.

Now there can be no doubt that music possesses a very intimate power of stirring man's emotional nature, and that it can strongly reinforce appeals made by the other arts—by articulate words, for instance, or by determinate action and scenery. But the attempt to make music self-articulate, in the manner which Berlioz intended, is for two reasons foredoomed to failure. It violates the essential character of the art; it offers almost irresistible temptations to ugliness. For, in the first place, the nature of musical expression and of its effect on the human organism is far too vague and nebulous to be tied down to any very precise significance. It is as idle to inquire the meaning of a composition as to inquire the meaning of a sunset. We may call the sunset 'angry' without passing the legitimate bounds of metaphor; but we should have little patience with the fancy that seriously enlarged upon the degree or cause of its anger. In exactly the same way we may call a musical composition 'agitated' or 'gay,' but we cannot give concrete shape to its gaiety or its agitation. Indeed, we are commonly irritated by any attempt to explain the poetic significance of a musical work. We may sometimes forgive it —in the 'Florentinische Nächte' of Heine, for example, or in Henry Kingsley's 'Ravenshoe' —but even there we feel that it needs forgiveness, that it is forcing our attention into a wrong channel, that it is unduly particularising those broad emotional types which supply the forms of music with their only real content. And if any man doubt this he may bring the matter to a clear issue: let him hear the 'Symphonie fantastique,' and endeavour from the music alone to reconstruct the romance.

Secondly, when music rises to its highest, even these broad types of emotion are merged into one. The slow movement of the choral symphony fills us with the same overpowering sense of rapture and worship as a sight of the Alps; it is not this or that kind of feeling that is stirred in us but our entire soul. Only when the art descends to lower slopes can we begin to discriminate, to distinguish, to set boundary-lines; and the further the descent the easier and more convincing is the demarcation. Music which inflicts actual pain may well call up painful associations, and may so help imaginative hearers to call up some vague nightmare-pictures of savagery or horror. It is not for nothing that the instrumental work of Berlioz grows most nearly articulate in the 'Ronde du Sabbat,' in the 'Brigands' Orgy,' and in the orchestral setting of the 'Ride to the Abyss.'

However, like all great artists, Berlioz was better than his own theory. He often allowed it to lead him into extravagant aberration; he even narrates with pride that at the performance of his Requiem one of the audience was frightened into a syncope—an interesting commentary upon Schiller's view of the function of Art. But though his theory of the programme is impracticable, and though it is only by lowering his art that he can even approximate to its realisation, yet the fact remains that he has written a great deal of vigorous and stirring music, and that he often rises to a level of pure beauty which only genius can attain. After all, his *parti pris* was as much inherited as assumed. French music has always been closely connected with literary movements and ideals; it has always somewhat tended to subordinate form to expression. Even the exquisite style of Couperin was never satisfied without a 'poetic content,' and from him the line of ancestry runs directly enough through Rameau, Gossec and Lesueur, until it reaches the greatest and most gifted of Lesueur's pupils.

As might naturally be expected his best sustained work is to be found in his vocal compositions, both because here his deficiencies of pure design are covered, and because here he has the collaboration of a text to give body and substance to his fancies. 'Les Troyens' is probably the finest extant specimen of spectacular opera, full of pageantry and movement, vividly conceived and vividly pourtrayed. The whole of the final tableau, with the great prophetic utterance of Dido, based upon themes which recall happy hours to her memory, is strangely anticipatory of the end of 'Die Götterdämmerung.' 'Béatrice et Bénédict' is a charming comedy, wonderfully supple and light-handed; and 'Benvenuto,' though far less dextrous, yet contains a good many scenes of real dramatic power. His two great ritual works, the Requiem and the Te Deum, stand like colossal statues at the gates of a barbarian temple. They are absolutely unchristian in feeling, they suggest human sacrifices and

blood-curdling rites, they grip emotion by the throat and leave it gasping for breath. But for sheer savage force and strength they are, in their kind, unsurpassed, and amid these terrors are many passages of a strange, inhuman beauty. Among his cantatas, 'La Damnation de Faust' holds the pre-eminent place; indeed, it is Berlioz in quintessence. All his merits are here, all his defects; of fabric now clumsily woven, now of the closest texture, cruel modulations and phrases of a haunting sweetness, the most exquisite tenderness alternating with the wildest violence, all clothed with his vivid colour and with his consummate mastery of orchestral resource.

His criticisms exhibit the same curious alternation of extremes. It was long before he could see any beauty in Palestrina; of Bach and Handel he spoke in disdainful ignorance. He cared little for Chopin, little for Schumann, and he passed over the Paris edition of Schubert's songs with a few casual words about 'Erlkönig.' On the other hand he was one of the first musicians in Europe who really appreciated Beethoven, and his papers on Gluck and Weber are masterpieces of sound insight and clear expression. He counts, too, among the very small number of writers on music who deserve to be read for their literary style.

'The *Mémoires*,' says W. E. Henley, 'is one of the few essays in artistic biography which may claim equal honours with Benvenuto's story of himself and his own doings; the two volumes of correspondence rank with the most interesting epistolary matter of their time; in the *Grotesques*, the *À travers Chants*, the *Soirées de l'orchestre* there is enough of fun and earnest, of fine criticism and diabolical humour, of wit and fancy and invention, to furnish forth a dozen ordinary critics and leave a rich remainder when all's done.'

He has not Schumann's range or sympathy. Here, as in his art, he could see only from his own standpoint: but in art, in criticism, in life he looked through keen eyes, and spoke out with a fearless and undaunted eloquence.

The following is a list of his works:

(The numbers in small Roman type refer to the volumes of the complete edition published by Messrs. Breitkopf & Härtel.)

Op.
1. Eight scenes from 'Faust.' (1828-29.) [x.]
1 bis. Overture to 'Waverley.' (1827-28.) [iv.]
2. 'Irlande'; nine mélodies pour une et deux voix sur des traductions de Thomas Moore. (1829.) [xiv., xv., xvi., xvii.]
3. Overture to 'Les Francs-Juges.' (1827-28.) [iv.]
4. Overture to 'King Lear.' (1831.) [iv.]
5. 'Grande Messe des morts.' (Requiem, 1837.) [vii.]
6. 'Le 5 mai'; cantata on the death of Napoleon. (1834.) [xiii.]
7. 'Les Nuits d'été'; six songs to words by Théophile Gautier. (1833-34; rewritten in 1841 and 1856.) [With orchestral acct. in vol. xv., piano acct. in vol. xvii.]
8. Rêverie et caprice, vln. and orch. (1839.) [vi.]
9. Overture 'Le Carnaval romain.' (1843.) [v.]
10. *Grande Traité de l'instrumentation et d'orchestration modernes. Avec supplément 'Le chef d'orchestre.'*
11. 'Sara la baigneuse'; choral ballad. (1834-50.) [xiv.]
12. 'La Captive'; song for mezzo-sopr. and orch. (1832-48.) [xv.] Also with acct. for PF. and v'cl. and PF. alone. [xvii.]
13. 'Fleurs de Landes'; five songs, for one or more voices. (1831-34, pubd. 1850.) [xvi. and xvii.] One, 'Le Jeune Pâtre breton,' with orch. [xv.]
14. Symphonie fantastique; 'Épisode de la vie d'un artiste.' (1830-31.) [i.]
14 bis. 'Lélio; ou le Retour à la vie.' Monodrama.[1] (1827-32.) [xiii.]

[1] The 'Chœur des ombres' in this work is taken from the 'méditation' in the cantata 'La Mort de Cléopâtre' (performed for the first time under Weingartner at the Queen's Hall, London, Nov. 12, 1903), and the last number from the 'Fantasia on Shakespeare's Tempest.'

Op.
15. Symphonie funèbre et triomphale. (1834-40.) [i.]
16. 'Harold en Italie': symphony with viola obbligato. (1834) [ii.]
17. 'Roméo et Juliette': dramatic symphony. (1838.) [iii.]
18. 'Tristia'; two works for chorus and orch.: 'Méditation religieuse' (1831); 'Ballade sur la mort d'Ophélie' (1848) [xiv.]; and a 'Marche funèbre pour la dernière scène d'Hamlet' (1848) for orch. [vi.]; the three published together in 1850.
19. 'Feuillets d'album'; six songs (two for chorus). (1845-55.) [xiv., xv., xvi., xvii.]
20. 'Vox populi'; two works for chorus and orch. 1. 'La Menace des Francs' (1851); 'Hymne à la France' (1844). Published together in 1851. [xiv., xvi.]
21. Overture to 'The Corsair.' (1831, rewritten in 1844 and 1855.) [v.]
22. 'Te Deum.' (1849-54.) [viii.]
23. 'Benvenuto Cellini,' opera in three acts. (1835-37.)
24. 'La Damnation de Faust.' (1846.) [xi., xii.]
25. 'L'Enfance du Christ'; oratorio in three parts. (1850-54.) [ix.]
26. 'L'Impériale'; cantata for the Paris Exhibition. (1855.) [xiii.]
27. *Deest.*
28. 'L'Étoile de la liberté' (Le Temple universel); Chorus. (1860.) [xvi.]

WORKS WITHOUT OPUS NUMBERS

'Resurrexit' from the St. Roch Mass. (1822, rewritten 1825 and 1832.) [vii.]
Ten Songs. (Written between 1825 and 1834.) [xvi., xvii.]
Three cantatas: 'La Révolution grecque.' (1826.) [x.]
'Herminie.' (1828.) [xv.]
'La Mort de Cléopâtre.' (1829.) [xv.]
Chorus of Magi (1828, rewritten in 1832.) [vii.]
Two fugues for chorus and orch. (1828-29.) [vi.]
Overture to 'Rob Roy.' (1832.) [iv.]
Two Motets: 'Veni Creator' and 'Tantum ergo.' [vii.]
Three pieces for harmonium: 'Toccata,' 'Sérénade agreste à la Madone,' and 'Hymne pour l'Élévation.' (1845.) [vi.]
'L'Apothéose' for chorus. (1848.) [xvi.]
'Hymne pour la consécration du nouveau Tabernacle.' (1859.) [xvi.]
'Béatrice et Bénédict,' comic opera, two acts. (1860-62.)
'Les Troyens'; grand opera in two parts: (1) 'La Prise de Troie' (first and second acts); (2) 'Les Troyens à Carthage' (third, fourth and fifth acts).
'March from Les Troyens' arranged for concert use.
'La Mort d'Orphée,' cantata written in 1827, first competition for Prix de Rome. M.S. National Library, Paris.

ARRANGEMENTS, ETC.

Recitatives for 'Der Freischütz.' (1841.)
'L'Invitation à la valse,' by Weber, for orch. (1841.)
'Pater Noster' and 'Adoremus,' by Bortniansky. (1843.)
Marche marocaine, by L. von Meyer. (1845.)
'Plaisir d'amour,' by Martini. (1859.)
'Erlkönig,' by Schubert. (1860.)

LITERARY AND CRITICAL WORKS

Traité de l'instrumentation (see above, op. 10). Trans.: German, J. Leibrock (1843); English, Mary Cowden Clarke; Spanish, Camps y Soler. Modern revised editions (German) by Weingartner, R. Strauss; (Italian), by E. Panizza (1913).
Voyage musical en Allemagne et en Italie, études sur Beethoven, Gluck, et Weber. (1843.)
Les Soirées de l'orchestre. (1853.)
Les Grotesques de la musique. (1859.)
À travers Chants. (1862.)
Mémoires de Berlioz. Two vols. (1870.)
Correspondance inédite. (1879.)
Lettres intimes. (1882.)
Les Musiciens et la musique (a collection of articles, mainly on the work of Berlioz's contemporaries, from the *Journal des Débats*, with an introduction by André Hallays. 1903.)
Literarische Werke. Erste Gesamtausgabe in zehn Bänden, Leipzig, 1903-12.

LETTERS

Briefe hervorragender Zeitgenossen an Franz Liszt, ed. by La Mara (1895), contains 61 letters of Berlioz.
Briefe von Hector Berlioz an die Fürstin Carolyne Sayn Wittgenstein, ed by La Mara (1903).
Lettres inédites de Hector Berlioz à Thomas Gounet, ed. by L. Michoud and G. Allix (1903).
Une Page d'amour romantique. Lettres inédites à Mme. Estelle F. . . . (*Revue bleue*, 1903).
Les Années romantiques; Le Musicien errant (1919), ed. by J. Tiersot.
Correspondance inédite (*Revue bleue*, 1917).
Autobiographie inédite (*Revue bleue*, 1919).
Nouvelles Lettres d'Hector Berlioz (*R.M.I.*, 1905), ed. by J. G. Prod'homme.
Les Lettres de Berlioz à Auguste Morel (*Le Guide musical*), 1912, pp. 609, 629, 647, 667, 687, 707), ed. by J. G. Prod'homme.
Lettres inédites de Hector Berlioz (*R.M.I.*, 1913), ed. by J. G. Prod'homme.

Many of the autobiographical details in these works are untrustworthy. W. H. H[W].

BERMUDO, Juan (*b.* Ecija, near Seville, beginning of the 16th cent.), a Franciscan friar of Andalucía, friend and admirer of Morales, and author of two important theoretical works.

1. Libro llamado Declaración de instrumentos (Osuna: 1549 and 1555; Granada, 1555). (B.M.; Bibl. Nat., Paris; Munich; Staats-Bibl., Vienna; Bibl. Nac., Madrid; Bibl. Diputació, Barcelona; Escurial.)
2. El Arte Tripharia (Osuna, 1550). (Bibl. Nac., Madrid.)

The latter was written as a 'plaine and easie introduction' to music for the use of the nuns of the convent of Montilla.

The former is of more ample scope, and includes a description of instruments and tablature as well as an introduction to music. The book is remarkable for its clarity of style; and incidentally gives valuable biographical evidence in relation to Morales, who wrote a dedicatory epistle to the second edition, dated Oct. 22, 1550, and describing himself 'Maestro de Capilla del Señor Duque de Arcos.' Morales died in 1553 before the book was published, but Bermudo constantly refers to him, and admires him for breaking rules when the occasion demanded it. Bermudo has recorded the only saying of Morales which has been preserved:

'Si lo que hazen algunos tañedores de organo se sacasse en limpio grandes faltas hallariamos.' (If we really knew what some organists played, we should find very bad mistakes.) 'And Morales was quite right,' he adds, 'because on an instrument it is possible to play consecutive fifths or octaves without being noticed; but with voices the mistake is obvious at once.'

J. B. T.

BERNABEI, (1) Ercole (*b.* Caprarola, *c.* 1620; *d.* Munich, 1687 or 8), a pupil of Benevoli, and successively maestro di cappella at the Lateran in Rome, from 1665, and at San Luigi de' Francesi from 1667; he seems to have entered the Cappella Giulia, St. Peter's, on June 20, 1672, but not to have been maestro di cappella there, as he is only called 'musico' in the letter of recommendation which Cardinal Barberini sent to the Elector of Bavaria in 1674, and in consequence of which Bernabei obtained the post of maestro di cappella to the court of Munich. Bernabei's compositions include a set of three-part madrigals, called 'Concerto madrigalesco,' published at Rome, 1669; 'Sacrae modulationes,' Munich, 1691, and various motets, etc. in MS. at Munich, Modena, Dresden and Vienna. The text-books of two operas given in Munich, 1680 and 1686, are preserved there.

His son, (2) Gioseffo Antonio (*b.* Rome, *c.* 1649; *d.* Mar. 9, 1732), was sent for to Munich in 1677 and appointed assistant to his father, whom he succeeded in Jan. 1688.

His compositions include a book of seven masses for four voices and strings, printed 1710; masses and motets in MS. at Munich, Berlin, Bologna, Dresden, and a large collection of church music in the court library of Vienna. Between 1678 and 1691 he wrote 16 operas, many of them only preserved in the form of libretti (*Q.-L.*).

Bibl.—R. de Rensis, *Ercole Bernabei*, Rome, 1920; Raffaele Casimiri, *Ercole Bernabei, maestro della Capella musicale Lateranense* (5 luglio, 1665—5 marzo, 1667), p. 12, Rome, 1920.

BERNACCHI, Antonio (*b.* Bologna, June 1685; *d.* Mar. 1756), was equally celebrated as a singer (evirato) and as a master.

During several years he received the instruction of Pistocchi (*q.v.*), then the first singing-master in Italy, where there were at that time not a few; and to his care and skill, as well as to his own application, genius and splendid soprano voice, the young Bernacchi owed his early superiority over all the other singers of his day, and the title which he gained of 'Il Rè dei cantatori.' Fétis says that he made his first appearance in 1722; but it is much more likely that he did this ten years earlier, for he was singing in London in 1716 in the opera 'Clearte,' and in Handel's 'Rinaldo' in 1717, when he sang the part of Goffredo, which had previously been sung by Vanini Boschi and Galerati, two female contralti. While in England, his voice was thought to be weak and defective; but he covered these faults with so much skill that his singing was always much more admired by musicians than by the public. He remained here at first only for one season, after which he returned to Italy. In 1726 he entered the service of the Elector of Bavaria, and subsequently that of the Emperor. Bernacchi now altered his style, making use of an embroidery of roulades—a great innovation upon the old simple method of singing. This novelty had an immense success; and was immediately adopted by all the other singers, in spite of the outcry raised by the purists of the old school. Martinelli and Algarotti agree in blaming him for sacrificing expression to execution, and for 'opening the door to all the innovations which have debased the art.' Rousseau relates that Pistocchi, on hearing his former pupil, exclaimed, 'Ah! woe is me! I taught thee to sing, and now thou wilt "play"!' The *Daily Courant* of July 2, 1729, announced that

'Mr. Handel, who is just returned from Italy, has contracted with the following persons to perform in the Italian Opera: Sig. Bernacchi, who is esteemed the best singer in Italy.'

The Opera, which had been closed for

eighteen months, reopened Dec. 2 with 'Lotario,' and a revival of 'Tolomeo, in both of which Bernacchi played the principal character, formerly sustained by Senesino. In the season of 1730 he sang in Handel's 'Partenope,' after which he returned once more to Italy, with the desire of founding there a school for teaching his own method. Raff, Amadori, Mancini, Guarducci, and many more, were his scholars. The objection of the purists to Bernacchi's fioriture as new, has no foundation; for these embellishments were as old as the 16th century, and were only developed by him and employed more after the manner of instrumental music. He was also a good composer, having learnt composition from G. A. Bernabei; the Conservatoire at Paris possesses some songs and duets of his. He was admitted as a member of the Società Filarm. of Bologna in 1722, of which he was Princeps in 1748 and 1749. The libraries of the Accademia and Liceo of Bologna contain MSS. of vocal compositions in four and five parts, with and without accompaniments. J. M.

Bibl.—Lodovico Frati, *Antonio Bernacchi e la sua scuola di canto. R.M.I.*, Anno 29, 1922, pp. 473-91.

BERNAL, Antonio (16th cent.), a Spanish composer of the Sevillian school, and a contemporary of Morales. He is believed to have been choirmaster of the church of San Salvador at Seville. Morphy (*Les Luthistes espagnols*) prints a setting by him of an old Spanish ballad from the 'Orphenica Lira' of Miguel de Fuenllana (1554), while Eslava published a motet, 'Ave Sanctissimam' (*a* 4) attributed to him. The MS. 'Tonos castellanos' (*Bibl. Medinaceli*, Madrid) contains a madrigal by him, and some church music. J. B. T.

BERNAL, José (16th cent.), a singer in the service of the Emperor Charles V. He is possibly identical with the Bernal Gonzalez, compositions by whom are in the Chapter Library at Toledo. J. B. T.

BERNARD, Jean Emile Auguste (*b.* Marseilles, Nov. 28, 1843; *d.* Paris, Sept. 11, 1902), a pupil of the Paris Conservatoire, who became organist of Notre-Dame des Champs, retiring from the post in 1895. Bernard's serious and reflective disposition was shown in most of his compositions, from an organ fantasia and fugue, which obtained the prize offered by the Société des Compositeurs de Paris in 1877, to the violin concerto dedicated to Sarasate, and played by him at one of the Conservatoire concerts in 1895. A suite for violin and piano, often played by the same artist, became familiar to London audiences, and he also wrote a divertissement for wind instruments, a fantaisie, and a Concertstück for piano and orchestra, and andante and rondo for violoncello and orchestra; works for organ and piano, and a cantata, 'Guillaume le Conquérant,' for baritone solo, chorus and orchestra. G. F.

BERNARDI, see Senesino, Francesco.

BERNARDI, Bartolomeo (*b.* Bologna; *d.* Copenhagen, 1730), Kapellmeister at the Danish court. He was a noted violin virtuoso and composer. His opera 'Libussa' was performed at Prague in 1703. In 1696 he was apparently still in Italy, as his '10 Sonate à tre con il basso per l' organo,' op. 2, appeared in that year at Bologna, where another book of trio sonatas, op. 1, had been published in 1692, while a book of 'Sonate a violino solo,' op. 3, as well as other sonatas were published at Amsterdam. He composed also vocal duets and cantatas, and the Berlin library has a MS. book of instructions in very faulty German for playing from a figured bass. Many of his MS. compositions are said to have perished in the great fire of Copenhagen in 1745. Wasielewski mentions also a book of 12 solo sonatas, op. 1 (*Q.-L.*; Wasielewski).

BERNASCONI, (1) Andrea (*b.* Marseilles, 1706; *d.* Munich, Jan. 29, 1784), the son of a French officer of Italian descent (*Riemann*), was the composer of 21 operas and various sacred compositions. He held the position of Kapellmeister at Munich from 1755. He was the teacher of his step-daughter (2) Antonia, daughter of a valet de chambre of the Prince of Würtemburg whose widow married Andrea Bernasconi. She made her first appearance at Vienna, 1764, in 'Alceste,' which Gluck had written expressly for her. She afterwards sang at various Italian theatres, and in 1778 she appeared with Pacchierotti in 'Demofoönte,' a pasticcio, at the Opera in London. She was then a good musician, and a correct and skilful singer; but her voice was not powerful, and she was past her prime. She was a good actress.

In 1770–71 she had sung at Milan the part of Aspasia in Mozart's early opera 'Mitridate.' She distrusted the powers of the boy to compose the airs for her, and requested to see what she was to sing, to which he instantly acceded. She made trial of a piece, and was charmed with it. Mozart then, piqued at her want of confidence, gave her another, and a third, leaving Bernasconi quite confounded with so rare a talent and so rich an imagination at years so tender. Shortly afterwards an enemy (Gasparini of Turin) called on her with the words of the libretto set to different music, and endeavoured to persuade her not to sing the music of the young Mozart.

'She absolutely refused this wicked person, being quite overjoyed at the airs the young *maestro* had written for her, in which he consulted her inclination.'[1]

In 1783 Bernasconi was at Vienna, where she had settled, though not engaged at the Opera; but she gave a few performances of the 'Alceste' and 'Ifigenia in Tauride' of Gluck, and of a comic opera 'La Contadina in Corte,' which she had sung with success in London. J. M.

[1] Leopold Mozart's Letter.

BERNEKER, Constanz (*b.* Darkehmen, East Prussia, Oct. 30, 1844; *d.* Königsberg, June 9, 1906), studied at the Institute for Church Music and Royal Academy of Music, Berlin. After conducting some choral societies at Berlin he was (1872) appointed musical director of the Singakademie at Königsberg, and soon after organist of the cathedral. In 1885 he received the title of Royal Director of Music; and in 1895 became lecturer at the University. He was also teacher of composition at the Conservatoire. As a composer he excelled in choral works with orchestra, including an oratorio 'Judith,' 'The Song of Solomon,' 'Coronation Cantata,' and choruses to Schiller's *Bride of Messina.* He wrote also psalms, motets, partsongs, and lieder. In 1907 a society was formed at Königsberg for the publication of his works (*Riemann*).

BERNER, Friedrich Wilhelm (*b.* Breslau, May 16, 1780; *d.* May 9, 1827), pupil of his father, the organist of the Elisabeth Church there, under whose tuition he made such rapid progress as to be appointed his assistant at thirteen years of age.

Counterpoint and composition he learnt from Gehirnie, director of the choir at the Matthäuskirche, and at the same time from Reichardt the violoncello, horn, bassoon and clarinet, which last instrument he played in the orchestra of the theatre. The arrival of C. M. von Weber in Breslau to take the post of Kapellmeister roused Berner to fresh exertions. Weber valued him as an excellent pianoforte and clarinet player. In 1811 he and Schnabel were summoned to Berlin by Zelter to master the system of the Singakademie, with the view of establishing similar institutions in Breslau and the rest of Silesia, such being the wish of the Prussian Government. Berner was also entrusted with the task of cataloguing the musical treasures of the suppressed monasteries. More details of his life will be found in the *Hausfreund* for 1827, No. 15. Among his numerous pupils, Adolph Hesse was one of the most remarkable. He left many compositions both for voices and instruments, but his didactic writings are more valuable—*Grundregeln des Gesanges* (1815), *Theorie der Choralzwischenspiel* (1819), *Lehre von der musikalischen Interpunktion* (1821). Some of his songs were very popular, *e.g.* 'Deutsches Herz verzage nicht.' F. G.

BERNERS, Gerald Hugh Tyrwhitt-Wilson (*b.* Apley Park, Bridgnorth, Sept. 18, 1883), succeeded in 1918 to the barony of Berners, which dates from 1455. The first of his compositions to be published appeared therefore under the name of Gerald Tyrwhitt. He was in the diplomatic service from 1909–19 as hon. attaché at Constantinople and Rome. He received his first musical education at Dresden and Vienna, and has had intermittent guidance, chiefly in orchestration, from Stravinsky and Casella, but is mainly self-taught. Lord Berners employs a pungent idiom that shows external traces of his musical associations, but is nevertheless markedly personal. It makes great play with the newer harmonic devices, his characteristic use of which is attuned to his present predilection for humour and irony. The antithesis that whilst Continental critics, judging by the quality of that humour, have described him as the most English of our composers, English critics, judging by the idiom, have placed him among the least national, in itself indicates his place in modern music, which is that of a 'good European' whose cosmopolitanism has not obliterated a racial as well as racy manifestation of the comic spirit. The first of his compositions that was retained, though not the first to be published, included a setting of Heine's 'Du bist wie eine Blume' treated in the light of a passage in one of the poet's biographies, where it is stated that the famous lines were in the first place addressed to a small white pig. After the German Lied his irony found many other fruitful subjects, such as the conventions—sentimental, Straussian and other—of the waltzform; those of the Spanish idiom, real and spurious; and those of our own folk-song cult. This, however, must not be taken to imply either that his humour is always ironic or his intention always humorous. Some of his smaller works strike a different note and his only opera is 'straight' comedy. There is, in fact, some danger that when Lord Berners is in earnest, to those who know only his lighter vein it will appear that his humour is at fault, for that is the common penalty of a reputation for irony. The Valses bourgeoises were selected by the international jury for performance at Salzburg in 1923. His last important work is the operatic version referred to above of Prosper Mérimée's one-act comedy, 'Le Carrosse du Saint Sacrement,' which is set almost integrally, the original prose being somewhat shortened but not otherwise changed. This was produced in Paris in 1924 and has since undergone a revision. An English version is in preparation. The most frequently performed of his works is the Fantaisie espagnole, which seems to have secured an assured place in the repertory. E. E.

SONGS

Lieder Album, three songs in the German Manner. 1913.
Trois Chansons (G. Jean-Aubry). 1920.
Three Songs (English poets). 1920.
Dialogue between Tom Filuter and his Man, by Ned the Dog-Stealer. 1921.
Three Songs (Chanties, etc.). 1922.

PIANO

'Le Poisson d'or.' 1914.
Trois petites marches funèbres. 1914.
Fragments psychologiques. 1915.
Valses bourgeoises (duet). 1917.

ORCHESTRA

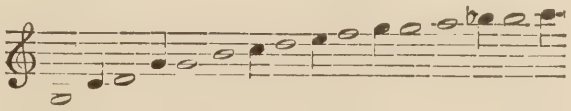
Three Pieces: Chinoiserie: Valse sentimentale; Kasatchok. 1916.
Fantaisie espagnole. 1918–19.
Fugue. 1924.

STAGE

Le Carrosse du Saint Sacrement (opera). 1923.

BERNHARD, Christoph (*b.* Danzig, 1627 or 1628; *d.* Nov. 14, 1692), Kapellmeister at Dresden.

He was a sailor's son and was so poor as to sing from door to door to keep himself from starving. By a Dr. Strauch he was placed in the Gymnasium, where he studied music under Balthazar Erben, and the organ under Paul Syfert. By the aid of the same benevolent individual he was enabled to visit Dresden with letters of recommendation to H. Schütz, the Kapellmeister. There his fine voice, at first an alto, but afterwards a tenor, so far attracted the notice of the Kurfürst as to induce him to take him into his service in 1649, and to send him to Italy with the view of perfecting his singing. In Rome he became intimate with Carissimi, and excited the enthusiasm of the Italians by his compositions, amongst others a Mass for ten voices. After returning with a party of young Italians to Dresden, he was enabled by the Kurfürst to make a second journey to Italy about 1651; on his return in 1655 he became vice-Kapellmeister. The Italians who had returned with him, however, intrigued against their benefactor, and at length compelled Bernhard to resign his post and take a cantorship at Hamburg, which he held from 1664–74, when he was recalled by the Kurfürst Johann George III., and remained in Dresden as Kapellmeister till his death. His facility in counterpoint was very remarkable, and some extraordinary instances of his ability in this direction may be found in his setting of the Latin hymn 'Prudentia Prudentiana' (Hamburg, 1669) in triple counterpoint, as well as in other of his works (*Q.-L.*). F. G.



BERNIER, Nicolas (*b.* Mantes, June 28, 1664; *d.* Paris, Sept. 5, 1734), choir-boy at Mantes, studied in Rome; maître de chapelle at Chartres, 1694; and at St. Germain l'Auxerrois, 1698; music-master of the Ste. Chapelle, Paris, 1704–26, and one of the four sub-conductors in 1723. Riemann says that Bernier, J. B. Morin and Clérambault were the earliest French cantata composers. Fétis characterises his style as cold and heavy, and his manner of writing as incorrect, like that of all his contemporaries. In his own time he was considered the foremost composer. He composed 7 books of cantatas, 3 books of motets with harpsichord (the third being a posthumous work), a number of cantatas and church music now in various continental libraries. (*Fétis*; *Q.-L.*). E. v. d. S.

BERNO (*d.* Reichenau, June 7, 1048), Abbot of Reichenau in Suabia (hence: Augiensis) from 1008 to the time of his death, wrote a *Tonarius* with a separate *Prologus*, a treatise *De varia psalmorum atque cantuum modulatione*, and another *De consona tonorum diversitate*, reproduced in Migne's *Patrology*, and in Gerbert, *Script.* ii. 62. Trithemius describes still another work of Berno's, *De instrumentis musicalibus*, which, if it could be found, might give us new information about the musical instruments of that period. E. v. d. S.

BERNSDORF, Eduard (*b.* Dessau, Mar. 25, 1825; *d.* June 27, 1901), a pupil of F. Schneider at Dessau and of A. B. Marx at Berlin; lived for many years at Leipzig.

He published various songs and pieces for the piano, but is chiefly known as editor of the *Universal Lexikon der Tonkunst* (3 vols., with supplement, 1856–65, begun by von Schladebach) and also as a critic in the well-known musical periodical, the *Signale*. A thorough conservative, with a strong antipathy to all modern efforts in music, he was within his own predilections, however, a keen and intelligent critic. A. M.

BERSAG HORN, a variety of valve-bugle stated to have been first used in the Bersaglieri corps of the Italian army. These horns are used in sets or families of four, viz., Soprano, Alto, Tenor and Baritone or Bass, all being pitched in B♭. The soprano and alto correspond in pitch and quality to the ordinary cornet and flügel horn respectively, and the tenor and baritone to the tenor and baritone althorns or saxhorns. Their distinction lies in the use of one valve or piston only in place of the usual three. This valve lowers the pitch a fourth, as from *c* to *g*, and affords a means of approximately completing the diatonic scale thus: open notes ♩, valve notes 𝅗𝅥.

During the late war, many regiments were supplied with these instruments for marching use, and as they were easily learned, the players were able to render harmonised music of a more varied character than is possible from the ordinary bugle band. D. J. B.

BERSELLI, Matteo, a celebrated Italian tenor, who came to England with Senesino; and with him made his first appearance in London in Bononcini's 'Astarto,' Nov. 19, 1720.

He sang next in December of the same year, with Senesino again, in the 'Radamisto' (revival) of Handel; and in 1721 he appeared in 'Muzio Scevola,' joint work of Mattei, Bononcini and Handel; in the 'Arsace' of Orlandini and Amadei; and in the anonymous 'L' Odio e l' Amore.' J. M.

BERTALI, Antonio (*b.* Verona, Mar. 1605; *d.* Vienna, Apr. 1, 1669), violinist in the court chapel, Vienna, Apr. 1, 1637, and Kapellmeister, Oct. 1, 1649. He became a favourite composer at the court, and the Emperor had his opera 'L' Inganno d' Amore' performed at the Reichstag of Ratisbon in 1653. He wrote a number of operas of which only a few are

still in existence; also 3 oratorios, masses and other church music; and the music for a ballet on horseback (*Q.-L.*; *Riemann*).

BERTEAU (BERTEAUD, BERTHAU) (*b.* Valenciennes; *d.* Paris, 1756), founder of the modern school of violoncello-playing. He studied the viola da gamba under Kozecz in Bohemia, but after some time exchanged it for the violoncello and made his début at the Concert Spirituel at Paris in 1739 with great success. The beauty of his tone and phrasing made him a favourite in the musical and fashionable circles of Paris, and quaint stories are told about his personal eccentricities. Among his pupils are Cupis, Janson and the elder Duport who, through his younger brother, Louis, handed Berteau's art down to future generations in a perfected manner. His known works consist in concertos and sonatas for violoncello and bass; some of these have appeared in modern editions. (See VIOLONCELLO-PLAYING.) E. v. d. S.

BERTHEAUME, ISIDORE (*b.* Paris, *c.* 1752; *d.* St. Petersburg, Mar. 20, 1802), an excellent violinist who appeared in 1761 as soloist at the Concert Spirituel of which he became the conductor in 1783, and leader at the Opéra-Comique in 1788. In 1791 he left Paris on account of the Revolution and went first to Eutin and then to St. Petersburg as solo violinist in the imperial private band. Grasset and Lafont were his most prominent pupils. He composed a concerto, 2 symphonies, concertantes *a* 2 violins, op. 6, 3 books of sonatas, and 6 duos for violin. E. v. d. S.

BERTIN, LOUISE ANGÉLIQUE (*b.* Roche, near Bièrre, Feb. 15, 1805; *d.* Apr. 26, 1877), a contralto singer, pianist and composer. 'Le Loup-garou' (Paris, 1827) and 'Faust' (1831) were her most successful operas, though Victor Hugo himself adapted the libretto for her 'La Esmeralda' (1836). Mlle. Bertin's imperfect studies account for the crudities and irregularities to be found in her writings among many evidences of genius.

BERTINI, (1) BENOÎT AUGUSTE (*b.* Lyons, June 5, 1780), was in 1793 a pupil of Clementi in London and subsequently himself a well-known teacher. He published (1830) a *Phonological System for acquiring extraordinary facility on all musical instruments as well as in singing.* (*Riemann.*)

He trained his younger and more famous brother, (2) HENRI (*b.* London, Oct. 28, 1798; *d.* Meylan, Oct. 1, 1876).

At the age of twelve his father, himself a musician, took Henri for a successful concert tour in Holland, the Netherlands and Germany. He was for some time in England and Scotland, but in 1821 settled in Paris until 1859, when he retired to Meylan. Fétis gives a complete list of his compositions, but his chief work is an admirable course of studies. A useful modern edition of 50 selected studies has been edited by Giuseppe Buonamici.

BERTINI, GIUSEPPE (*b.* Palermo, *c.* 1756; living in 1847), son of Salvatore Bertini, a musician at Palermo (1721–94); was director of the music in the Cappella Palatina, a composer of church music, and author of *Dizionario storico-critico degli scrittori di musica* (Palermo, 1814). This, although largely borrowed from Choron and Fayolles, contains interesting original articles on Italian musicians.

BERTINOTTI, TERESA (*b.* Savigliano, Piedmont, 1776; *d.* Bologna, Feb. 12, 1854), a dramatic singer.

At the age of 4 she began the study of music, under La Barbiera, at Naples. At twelve she made her first appearance, with other children, at the San Carlino Theatre, with great éclat. As she grew older, she showed the promise of great beauty, and developed a fine style of singing. Obtaining engagements only too easily she sang at Florence, Venice, Milan and Turin with prodigious success. In the latter town she married Felice RADICATI (*q.v.*), a violinist and composer of instrumental music. In 1805 she sang with brilliant success at Vienna for six months, and in 1807 went to Munich and sang before the court. She accepted an engagement from Louis Bonaparte, King of Holland, and went to the Hague. She came to London about 1810–11. Here she was thought to have a pleasing voice and a good manner; she appeared in 'Zaïra,' in which her songs were written for her by her husband, and performed extremely well in Mozart's 'Così fan tutte,' with Collini, Cauvini, Tramezzani and Naldi. She also sang in 'Il flauto magico,' and a revival of Guglielmi's 'Sidagero.' In Aug. and Sept. 1811 her company (with Michael Kelly as manager) performed in Dublin. She now returned to Italy, visited Genoa, and was next engaged at the end of 1812 for the opera at Lisbon. In 1814 she returned to Bologna, where her husband, who had obtained a place as first violin and professor, was killed in 1823 by an accident. She then retired from the stage, but continued to teach singing. J. M.

BERTOLDO, SPER' IN DIO (*b.* Modena, *c.* 1530; *d.* Padua, Aug. 13, 1570), organist of the cathedral of Padua. Of his compositions are known: 2 books of madrigals, 2 books of toccatas, ricercari, etc., for organ, as well as some madrigals and songs in collective volumes. E. v. d. S.

BERTOLLI, FRANCESCA, who arrived in England about the end of Sept. 1729, was a splendid contralto.

She was one of the new company with which Handel opened the season of 1729–30, and appeared in 'Lotario' and the revival of 'Tolomeo,' and in 'Partenope,' Feb. 24, 1730. She sang again in 'Poro,' Feb. 2, 1731, with Senesino: this opera had a run of 15 nights, at

that time a great success. Bertolli took in it the part formerly sung by Merighi. She took part in the revivals of 'Rodelinda' and 'Rinaldo' in the same season, and in the new operas, 'Ezio' and 'Sosarme,' at the beginning of 1732. In this season she sang, in English, the contralto music of 'Esther,' then performed first in public (Apr. 20), and repeated six times during May; and she appeared in 'Acis and Galatea,' sung partly in English and partly in Italian. In this same year she also performed in 'Flavio' and 'Alessandro' by Handel, and in Ariosti's 'Coriolano.' In 1733 she played in 'Ottone,' 'Tolomeo,' and 'Orlando,' and in 'Deborah,' Handel's second English oratorio. She followed Senesino, however, when that singer left Handel, and joined the opposition at the Lincoln's Inn Theatre: she sang in 'Onorio' in 1734, and in Veracini's 'Adriano in Siria' in 1735, as well as in other pieces. In 1737 she returned to Handel, and sang in his 'Arminio,' Jan. 12, at Covent Garden; 'Giustino,' Feb. 16; 'Berenice,' May 12; and a revival of 'Partenope.' J. M.

BERTON, (1) Pierre Montan (*b.* Maubert-Fontaines, Jan. 7, 1727; *d.* Paris, May 14, 1780), composed and adapted several operas, and was known as an excellent conductor. He held the position of *chef d'orchestre* at the opera in Paris from 1759, and at the time when the feud of the Gluckists and Piccinnists began to rage, and is said to have acted as peacemaker between the hostile parties.

His son, (2) Henri Montan (*b.* Paris, Sept. 17, 1767; *d.* there, Apr. 22, 1844), became a violinist in the orchestra of the opera as early as 1782. His teachers of composition were Rey and Sacchini. In 1782 he became deeply enamoured of Mlle. Maillard, a celebrated singer, by whom he had an illegitimate son Henri Francois (3) (see below). His first work was a comic opera, 'La Dame invisible,' written about the time referred to, but not performed till four years later (Dec. 1787). It is said that the young composer being too shy to produce his work it was shown by Mlle. Maillard to Sacchini, who at once recognised Berton's talent. Berton made his public début as a composer at the Concert Spirituel, for which he wrote several oratorios and cantatas. One of these, 'Absalon,' was first performed with considerable success in 1786. But he soon abandoned sacred music for the more congenial sphere of comic opera. In 1787 two dramatic works—'Les Promesses de mariage' and the above-named 'Dame invisible'—saw the light of the stage, and were favourably received.

The excitement of the revolutionary period did not fail to leave its traces on Berton's works, which followed the artistic movement created by contemporary events. His opéras-comiques 'Les Rigueurs du cloître' (1790) and 'Le Nouveau d'Assas' (1790) owe their existence to this period. In them the individual merits and demerits of his style become noticeable for the first time—easy and natural melody, great simplicity and clearness of harmonic combinations, and skilful handling of stage effects; but a want of grandeur and true dramatic depth, and frequently slipshod structure of the *ensembles*.

During the Reign of Terror Berton had a hard struggle for existence. The salary he received as professor of the Conservatoire did not enrich him. After unfruitful performances (1798) of an opera-buffa, 'Ponce de Léon' (produced 1797), of which he had written libretto and music, he was obliged to sell his piano and to break off the composition of his *chef-d'œuvre*, 'Montano et Stéphanie,' for want of music-paper. This work, an opera in 3 acts, was produced at the Opéra-Comique, Apr. 15, 1799 (this date is in the score), with words by Dejaure, the librettist of Kreutzer's 'Lodoïska' and many other pieces. The subject, a melodrama, is the same as Méhul's 'Ariodant.' Édouard Monnais, in his sketch entitled *Histoire d'un chef-d'œuvre*, has given a full account of the history of the work, founded partly on autobiographical fragments by the composer. Its success greatly advanced Berton's reputation, and freed him from the difficulties of the moment. It must suffice to add the titles of a few of the most celebrated of his numerous compositions: 'Le Délire' (1799), 'Aline, Reine de Golconde' (1803), 'Ninon chez Madame de Sévigné' (1808), 'Françoise de Foix' (1809), 'L'Enlèvement des Sabines' (ballet, 1811), 'Roger de Sicile' (1817). Many more are enumerated by Pougin in the supplement to Fétis; and Berton also wrote numerous operas in co-operation with Méhul, Spontini, Paër, Kreutzer, Boieldieu, and other contemporary composers, besides several ballets, cantatas for the ceremonies of the Revolution and First Empire, sacred music, symphonies, quartets, etc.

Berton was from 1795 professor of harmony at the Conservatoire, where he replaced Méhul as professor of composition, Jan. 1, 1818. In 1807 he became conductor at the Opéra-Comique, and in 1815 was made a member of the Institut. In 1828 he suffered by the bankruptcy of the Opéra-Comique, to which he had sold the right of performing his works for an annuity of 3000 francs. Moreover, he could not reconcile himself to the new currents of public taste. Rossini's success filled him with anger—a feeling which he vented in two pamphlets, *De la musique mécanique et de la musique philosophique* (1826), and *Épître à un célèbre compositeur français, précédée de quelques observations sur la musique mécanique et la musique philosophique* (1829). The celebrated composer is Boieldieu, who was by no means pleased with the dedication of a book so little

in accordance with his own views. He also wrote *Traité d'harmonie, suivi d'un dictionnaire des accords* (1815) and *Mémoire sur la construction des instruments à cordes et à archet* (1819).

(3) HENRI FRANÇOIS (*b.* Paris, May 3, 1784 ; *d.* July 15, 1832), the natural son of the above, studied at the Conservatoire, and in 1821 became professor of singing there. He was the composer of several operas, and professor of vocalisation at the Conservatoire.

BERTONI, FERDINANDO GIUSEPPE (*b.* Salo, near Venice, Aug. 15, 1725 ; *d.* Desenzano, near Brescia, Dec. 1, 1813), pupil of Padre Martini, and a celebrated composer in his time.

In 1747 he produced an opera, 'Cajetto,' and in 1752 was appointed organist of St. Mark's, Venice ; in 1757 he was choirmaster at the Conservatorio 'dei Mendicanti,' which post he held till the suppression of the Conservatori on the fall of the Republic in 1797. His opera, 'Orazio e Curazio,' appeared in Venice (1746), but it was not till the production of 'Orfeo' (1776) that he attracted attention. He composed it to the libretto which Gluck had set, and the same singer, Guadagni, took the part of Orfeo in both operas. The florid air inserted at the end of the first act of Gluck's 'Orphée,' 'Amour, viens rendre à mon âme,' was for many years attributed to Bertoni, who claimed that it was identical with one occurring in his own 'Tancredi' (performed in 1767 at Turin) ; it had appeared, in a form far more nearly like its present shape, in Gluck's 'Parnaso confuso,' 1765, and in his 'Aristeo,' 1769. In the definitive edition begun by Mlle. Pelletan, Saint-Saëns in the preface to 'Orphée' proves that the air is certainly by Gluck. In 1778 Bertoni was summoned to London with his friend Pacchierotti, and brought out his 'Quinto Fabio,' which had been successfully produced at Padua in the same year, and was equally well received here, owing in great part to Pacchierotti's performance of the part of Fabio. Bertoni visited London again with Pacchierotti, but the rage for Sacchini made it difficult for any one else to gain a hearing, and he returned finally to Venice in 1784. In the following year, on the death of Galuppi, he succeeded him as conductor at St. Mark's, the most honourable and lucrative post then open to a musician in Italy. Burney (*Hist.* iv. 514, 541) describes him as a man of ability and taste, but no genius. His works (see *Q.-L.*) comprise numerous operas, oratorios and instrumental compositions. *Riemann* mentions the publication (1783) of his 'Orfeo,' and that 6 string quartets, op. 2, and 6 piano sonatas, op. 9, were also published.

M. C. C. ; with addns.

BERTRAND, JEAN GUSTAVE (*b.* Vaugirard, near Paris, Dec. 24, 1834 ; *d.* Paris, 1880—*Baker*), was educated at the École des Chartes, where he devoted himself to the study of ancient music and history of the organ. He contributed to Didot's *Complément de l'Encyclopédie* and published many articles on music in *Les Débats, La Revue moderne, Le Nord, Le Ménestrel*, etc. His chief works are :

Histoire ecclésiastique de l'orgue (1859), a pamphlet on Ancient Music (Didot, 1862) ; *Les Origines de l'harmonie* (1866), *Les Nationalités musicales, étudiées dans le drame lyrique* (1872) ; and *De la réforme des études du chant au Conservatoire* (1871).

Bertrand filled the department of musical archæology in the *Commissions des Travaux historiques*.

G. C.

BERWALD, (1) JOHANN FRIEDRICH (*b.* Stockholm, Dec. 4, 1787 ; *d.* June 28, 1861), a violinist, son of one of the chamber musicians of the King of Sweden, travelled as an infant prodigy, composed a symphony, and was famous in Russia, Poland, Austria and Germany before he was ten years old.

His second symphony was finished in Leipzig in 1799. In 1817 he again travelled, but in 1819 returned to Stockholm, and remained there as Kapellmeister from 1834 till his death. His three daughters were singers of some repute.

F. G.

(2) FRANZ ADOLF (*b.* Stockholm, July 23, 1796 ; *d.* there, Apr. 30, 1868), nephew of the above, held an important position as composer of instrumental music.

He received lessons on the violin from his father ; later on studied under du Puy and held an appointment in the Royal Orchestra. He never received instruction in composition, and studied theory by himself. His first compositions, written fairly early, were not known till long afterwards. The music to 'Gustaf Vasa,' 'The Battle of Leipzig,' one septet, and a violin concerto were written before 1828. During his studies in Berlin he had the advantage of associating with Mendelssohn and Zelter, and composed there the opera 'Der Verräther.' He subsequently visited Vienna ; the opera, 'Estrella di Soria,' and the orchestral pieces, 'Elfenspiel,' 'Humoristisches Capriccio,' and 'Erinnerung an die Norwegischen Alpen,' originate from this time. They were successfully produced in Vienna.

Berwald, now full of hope, returned to Sweden, but his new compositions were not favourably received by the public ; even his beautiful symphony in G minor, first performed in 1843, was severely criticised. This may be largely ascribed to the poor rendering which his uncle, Kapellmeister Berwald, bestowed on it.

Again he went abroad to score successes at his concerts in Vienna, where 'Ein ländlisches Verlobungsfest in Schweden' was produced, with Jenny Lind in the principal rôle. He was elected an honorary member of the Mozarteum in Salzburg. In 1849 Berwald settled down in Sweden for good. He became a member of the

Academy of Music, where during the last year of his life he taught composition and instrumentation. Among his distinguished pupils was Christina Nilsson.

Franz Berwald has left four symphonies; two operas, 'Estrella di Soria' and 'Drottningen af Golconda'; orchestral pieces; several songs, and a great amount of chamber music. He particularly excelled in two quartets for strings.

Bibl.—Adolf Hillmann, *Frans Berwald. En biografisk studie*, p. 194. Stockholm, 1920.

G. A. S.

BESARD (Besardus), Jean Baptiste (*b.* Besançon, Vesontinus, 1567), composer and lutenist, a famous amateur, licentiate and doctor in law, the son of a merchant. He studied and took his degrees at the University of Dôle. He was a compiler of big works on history, philosophy and medicine. Having married in his native town in 1602, he is known to have stayed at Rome as pupil of the lutenist Lorenzini; then at Cologne, where his *Thesaurus harmonicus* was printed (1603), and the 5th volume of his *Mercurius gallo-belgicus* (1604). Finally he lived at Augsburg, where possibly he died, at an unknown date; his *Antrum philosophicum* was published there, and also his two last works on the lute, *Novus partus musicae duodena triun . . ., I sagoge in artem testudinariam . . .*, both in 1617.

The *Thesaurus harmonicus divini Laurencini romani* and its sequel, *Novus partus musicae . . .*, are valuable collections of lute music and important historically; they contain compositions by Besard, a great number of pieces belonging to different schools, and arrangements for the lute. These works are described in *Q.-L.*

Bibl.—Auguste Castan, *Notes sur J. B. Besard de Besançon (Mémoires de la Société d'Émulation du Doubs*, 1876); O. Chilesotti, *Di G. B. Besardo e del suo Thesaurus harmonicus* (Milan, 1886); Michel Brenet, *Notes sur l'histoire du luth en France* (Turin, Bocca, 1899). (Extract from *R.M.I.*)

M. L. P.

BESEKIRSKY, (1) Vasil Vasilievich (*b.* Moscow, 1836), pupil of Léonard, one of the best-known violinists of pure Russian blood. He formed some excellent pupils, among them Gregorovitch.

W. W. C.

He entered the orchestra of the Imperial Theatre, Moscow, in 1850, went to Brussels to study with Léonard (1858), and began a long series of European concert tours in 1868. He settled at Moscow as leader of the Imperial Theatre orchestra (1882–1902).

(2) Vassili (*b.* Moscow, 1879), son of the above, is also a fine violinist. He toured in Russia, Germany, Scandinavia (1910–13), and in U.S.A. (1914–16). (*Baker.*)

BESLER, (1) Samuel (*b.* Brieg, Silesia, Dec. 15, 1574; *d.* Breslau, July 19, 1625), was in 1605 rector of the Gymnasium 'zum heiligen Geist' at Breslau.

The library of St. Bernhardinus at Breslau, where he was cantor from 1602, contains a vast collection of his compositions for the Church, in which he was very prolific (see *Q.-L.*). Amongst four Passion-settings there is one according to St. John, printed by Baumann at Breslau, 1621.

F. G.

(2) Simon (*b.* Brieg, Aug. 27, 1583; *d.* Breslau, July 12, 1633) was first cantor at Stiegau from 1610–20, cantor of St. Mary Magdalene at Breslau, and then cantor and court musician at Liegnitz. Single parts of 4 to 6 voiced songs by him remain. (*Riemann.*)

BESLY, Maurice (*b.* Normanby, Yorks, Jan. 28, 1888), composer and conductor, was educated at Tonbridge and Caius College, Cambridge. After a short stage career he studied music at the Leipzig Conservatorium under Teichmüller, Schreck and Krehl (piano and composition). He became music-master of Tonbridge School (1912–14). After a period of war service (Belgian Croix de Guerre, Despatches, taken prisoner near Amiens, 1918) he became director of music at Queen's College, Oxford, and succeeded Sir Hugh Allen as conductor of the Oxford Orchestra. He gave his first concert in London with the L.S.O. in 1923, and conducted the Scottish Orchestra (*q.v.*) for a portion of the season 1924. As an orchestral conductor he shows considerable promise. His compositions include orchestral works played at Oxford, Bournemouth and elsewhere, songs, short choral works and piano pieces. He has made several successful transcriptions for orchestra from Bach's works.

C.

BESOZZI, an Italian family of distinguished wind-instrument players. (1) Alessandro (*b.* Parma, 1700; *d.* Turin, 1775), a very remarkable oboist, was in the service of the King of Sardinia. He published numerous sets of sonatas for violin, flute, as well as a few in which oboe is employed.

(2) His brother, Antonio (*b.* Parma, 1707; *d.* Turin, 1781), was also a celebrated oboist. He lived also at Dresden. On the death of Alessandro he took his post at Turin.

(3) Carlo (*b.* Dresden, *c.* 1738), Antonio's son, also a renowned oboist. It is he, according to Fétis, whom Burney heard at Dresden (where he was in the court band from 1755–92) and of whom (*Present State*, Germany, ii. 27, 45) he gives so detailed and favourable an account, comparing him with Fischer.

(4) A third brother, Hieronimo (*b.* Parma, 1713; *d.* Turin, shortly after the death of Antonio), a famous bassoon-player, the special associate of Alessandro. Burney's account of the two brothers, and his criticism and their remarkable duet performances, will always be read with interest (*Present State*, France and Italy, 69).

(5) Gaetano, the youngest of the four brothers (*b.* Parma, 1727), an oboist, was first at the Neapolitan and then at the French court, and lastly in London in 1793, where, notwithstanding his age, he was much admired for

the certainty of his playing and its exquisite finish.

(6) His son, HIERONIMO (*d.* Paris, 1785), played the same instrument as his father. Burney (*Present State*, France and Italy, 24) heard him at the Concert Spirituel at Paris in 1770. He had a son, (7) HENRI, who was flautist at the Opéra-Comique. (8) His son, LOUIS DÉSIRÉ (*b.* Versailles, Apr. 3, 1814; *d.* Nov. 11, 1879), carried off many prizes of the Conservatoire, and in 1837 the Grand Prix de Rome. F. G.

BESSEL, VASSILY VASSILIEVICH (*b.* St. Petersburg, 1843; *d.* Zurich, Apr. 25, 1907), founder of the music-publishing house on the Nevsky Prospect.

He was a fellow-student of Tchaikovsky at the Conservatoire, and was afterwards engaged as second violin in the ballet-orchestra of the Opera. In 1869 he set up in business, but did not begin to publish until 1871. From 1872–77 he brought out the weekly *Musical Leaflet*, and from 1885–89 the Russian *Musical Review*. He also wrote his reminiscences of Tchaikovsky. The firm of Bessel & Co. have published many important works by contemporary Russian composers, including the music dramas of Moussorgsky. R. N.

BESSEMS, ANTOINE (*b.* Antwerp, Apr. 6, 1809; *d.* there, Oct. 19, 1868), violinist. In his 16th year he composed motets and church music, and in 1826 was a scholar of Baillot's at the Conservatoire, Paris; in 1829 one of the first violins at the Théâtre Italien. After this he travelled, returned to Antwerp in 1852 for a time, and settled in Paris as a teacher. He composed much for the voice (both solo and chorus) and for the violin. F. G.

BESSON, GUSTAVE AUGUSTE (*b.* Paris, 1820; *d.* 1875),[1] a celebrated manufacturer of musical instruments.

His father was a colonel in the French army, and but for his love of music and for mechanics, there is no doubt young Besson would have adopted the same profession. In 1838, when scarcely 18 years of age, he produced a new model cornet, which met with the greatest success, and is to this day known as the 'Besson Model.' In 1841 he invented a system of rotary action, with six valves, the right hand being applied to the top valves, the left to those at the bottom. But he was not satisfied with this advance, as, owing to its internal proportions, it did not allow of a full bore when the valves were down. In 1854 he elaborated an improved system of full bore, by means of which the notes of the first and third valves separately, and those of the first and third together, were perfectly in tune—a result which had never before been obtained. The year following he was successful in turning out an instrument with a full bore, the valve and open notes being in all respects perfect. In 1858 were manufactured a series of instruments known to the profession as the 'Besson Girardin,' the feature of which was that the player was enabled to change from one key to another without changing mouthpiece, slide or crook. In the same year he introduced the circular system, by which method of manufacture the tubing was coiled in a circle round the pistons. His invention of 1859 consisted of instruments having eight independent positions, and giving the entire scale, a note to each valve. But the best and most successful of his inventions is what is known as the 'Prototype System,' which consists in having conical steel mandrels of exact mathematical proportions representing the different parts of the instrument. These mandrels are now in common use throughout the trade, and indeed several of Besson's inventions represent modifications of existing practice rather than new departures. In 1858 Besson started a factory in London without abandoning that of Paris founded in 1834. After his death it was continued by his widow and daughters and subsequently as a limited company. J. S^{D}., with addns.

Mention is also to be made of the 'clarinette-pédale,' a double-bass clarinet with a compass descending to the D below the lowest note of the double-basses, and with an apparatus for lowering it still further by the interval of a fourth; and of the 'cor-tuba' and the whole family of cornophones intended to reinforce the horns of the orchestra and to supersede the 'alto,' the 'baryton,' and instruments of that class. G. F.

BIBL.—CONSTANT PIERRE, *Les Facteurs d'instruments de musique: les luthiers et la facture instrumentale* (Paris, 1893); *La Facture instrumentale à l'exposition universelle de 1889* (Paris, 1890).

BEST, WILLIAM THOMAS (*b.* Carlisle, Aug. 13, 1826; *d.* Liverpool, May 10, 1897), one of the most famous organists of his time.

The son of a solicitor, he received his first instruction in music from John Norman, deputy organist of Carlisle Cathedral. He intended to follow the profession of a civil engineer and architect, but that pursuit proving distasteful he determined (when in Liverpool in 1840) to renew his musical studies, and devoted his attention to organ and pianoforte playing. The study of the organ was at that time greatly hindered by its defective construction, the unsuitable pedal compass, and the mode of tuning then in vogue, which rendered the performance of the works of the great organ composers almost an impossibility, whilst the number of professors practically acquainted with the works of Bach was then extremely small. Having determined on a rigid course of self-teaching, and fortunately obtaining the use of an organ of ameliorated construction, Best spent many years in perfecting himself in the art of organ-playing in all its

[1] Constant Pierre gives 1874.

branches. His first organ appointment was at Pembroke Road Chapel, Liverpool, in 1840; in 1847 he became organist of the church for the blind in that town, and in the following year organist to the Liverpool Philharmonic Society. In 1854 he came to London as organist of the Panopticon of Science and Art in Leicester Square, and was appointed organist of the church of St. Martin's in the Fields, and for a few months in 1855 of Lincoln's Inn Chapel. He returned to Liverpool in 1855 on receiving the appointment of organist to St. George's Hall at a salary of £300 a year, afterwards increased to £400. In 1859 he occasionally played organ solos at the Monday Popular Concerts. In 1860 he became organist of the parish church of Wallasey, Birkenhead, and in 1863 organist of Holy Trinity Church near Liverpool. In 1871 he opened the organ of the Albert Hall and in the same year began his connexion with the Handel Festivals, at which he played organ concertos until 1891 inclusive. In 1868 he was appointed organist of the Musical Society of Liverpool, and in 1872 was reappointed organist to the Liverpool Philharmonic Society. In 1880 he was granted a Civil-List pension of £100 a year; in 1890 he went to Australia to give recitals in the Town Hall, Sydney; in 1894 he retired with a pension from his Liverpool appointment. Best composed several church services, anthems and hymns, many fugues, sonatas and other pieces for the organ; 10 pianoforte pieces, 2 overtures, and a march for orchestra. He was also the author of *The Modern School for the Organ*, 1853, all the examples and studies in which are original, and *The Art of Organ Playing* (begun 1869). Best's arrangements for the organ and editions of the organ classics are exceedingly numerous. Among the former two series 'The Organ Student,' a collection of comparatively simple pieces, and 'Arrangements from the Scores of the Great Masters,' an advanced series for recital givers, must be named. Most famous among the later is his edition of Bach's organ works, a standard work which since Best's death has been revised by Dr. Eaglefield Hull (*q.v.*). W. H. H., with addns.

The unique position which Best occupied was due partly no doubt to his exceptional powers as an executant, but more to the fact that he alone amongst English organists of his day recognised and developed the secular uses of the instrument. He never held a cathedral appointment; his church work was of quite secondary value; he was pre-eminently a recitalist. His appointment to the organistship of St. George's Hall, Liverpool, in preference to S. S. Wesley, who had opened the organ and whose prestige as composer and cathedral organist seemed to many to entitle him to the appointment if he chose to take it, was an epoch-making event in the history of popular music in England. Best at once grasped the position. His was a civic appointment, and his duty was, by frequent recitals on the organ, to fill as far as possible the place which a municipal orchestra occupies in more artistically advanced communities. Consequently at his Thursday evening and Saturday afternoon recitals his repertory included 'everything worth playing that had ever been written for the organ, and everything in classical music that could suitably be arranged for it.' The policy may sometimes have erred on the side of liberality, and Best often found himself in opposition to musicians of the stricter type, but it was substantially the policy on which Manns's orchestral concerts at the Crystal Palace and at a later time Wood's promenade concerts at Queen's Hall were successfully built up. It succeeded equally in his case. As time went on he was able to abandon the fantasias on opera-tunes in favour of movements from symphonies, overtures, etc., and from the first he always included a fair proportion of solid music in his schemes. The miscellaneous character of his work developed his sensitiveness to subtleties of tone, and his performances, whether of original organ-music or of arrangements, were pre-eminent in their command of effects of organ registration. Statham says:

'I can remember when he was playing the overture to "Jessonda" how the very sound of the first chord seemed to give a certain oriental tint to the music; the stops had been carefully combined so as to give something different from the ordinary Great Organ tone.'

The same writer says:

'The most memorable Bach performance I recall was his playing of the Passacaglia. . . . The treatment of each variation with the exact kind of tone and combination of stops, loud or soft, which its character required was one of the most refined pieces of æstheticism in playing that I ever heard.'

The Organ and its Position in Musical Art, by H. H. Statham, from which the above quotations are taken, is concluded (p. 215) with a detailed study of Best's art based on close personal knowledge. C.

BETTI, Adolfe (*b.* Bagni di Lucca, 1875), first violinist in the Flonzaley Quartet; gold medallist at the Liège Conservatoire (1896). After touring Austria, Italy and Germany as soloist, he was chosen assistant professor to César Thomson in his virtuoso class in the Brussels Conservatoire, remaining there till 1903. W. W. C.

BETTS, Edward (*d. circa* 1830), violin-maker, was a nephew of John Edward Betts, and, like his uncle, a pupil of Richard Duke. He was a good craftsman and maintained the traditions to which he succeeded. E. H. F.

BETTS, John Edward (*b.* Stamford, Lincolnshire, 1755; *d.* 1823), violin-maker, became a pupil of Richard Duke. To distinguish him from his nephew, Edward, or Ned, Betts, he was generally known as 'old John Betts.' His

workshop was in the Royal Exchange in London. He is said to have had a great knowledge of Italian instruments, but he followed his master in copying the Stainer and Amati models, and was another of the many craftsmen who at this time failed to recognise the outstanding merits of Stradivari's work. E. H. F.

BETZ, Franz (*b.* Mayence, Mar. 19, 1835; *d.* Berlin, Aug. 11, 1900), a favourite baritone opera and concert singer, was educated at the Polytechnic, Carlsruhe, and made his début on the stage in 1856 at Hanover.

He afterwards sang in smaller towns, and in May 1859 played at Berlin as Don Carlos in 'Ernani,' with such success that he was promptly engaged, and was a member of the royal opera company until his retirement in 1897. In 1868 he was the original Hans Sachs at Munich, and in 1876 he sang the part of Wotan at Bayreuth, and was admirable in both parts. He sang the part of Falstaff on the production of Verdi's opera in Berlin. He also, on leave of absence, played at Vienna and other cities of Germany and Austria. In 1882 he visited England, and sang with great success at the Crystal Palace, May 6 and 27, and at the Richter concert of May 8. A. C.

BEVIGNANI, Enrico (*b.* Naples, Sept. 29, 1841; *d.* 1903), operatic conductor and composer. He studied under Albanese and Lillo; produced his opera 'Caterina Bloom' at Naples in 1863, and a year later came to London, where he began as an accompanist. Engaged by Mapleson for Her Majesty's, he remained there six years in association with Costa and Arditi, and married a niece of Tietjens. In 1871 he went to Covent Garden, where his career as a conductor lasted with increasing success until the end of the Gye régime. Among other new operas he directed the first performance in this country of Verdi's 'Aida' in June 1876. His singular aptitude for accompanying the voice attracted the notice of Mme. Patti, who made it a condition that Bevignani should conduct the whole of the operas in which she appeared at Covent Garden, and with one or two exceptions he did so. He also conducted for several years the Italian opera seasons at St. Petersburg, Moscow and (under Abbey and Grau) at New York. For a long time he made London his permanent home. During one of his visits to Russia the Tsar conferred upon him the knighthood of the Order of St. Stanislas, and he was likewise a Cavaliere of the Crown of Italy. H. K.

BEVIN, Elway, an eminent theoretical and practical musician of Welsh extraction, who received his musical education under Tallis.

He was vicar-choral of Wells Cathedral, 1575–84,[1] and in the latter year was suspended for not having communicated for four years. A Roman tendency is inferred; nevertheless he was retained, and he signed a Wells Charter in 1583–84. Archbishop Laud, in his visitation of Bristol, 1634, describes Bevin as 'a very old man.' According to Wood (*Fasti Oxon.* (Bliss), ii. 265), he was organist of Bristol Cathedral in 1589, and is also referred to in Harl. MSS. 7339/5b (B.M.) as 'organist of y^e^ Cathedral at Bristol, 1620.' He taught music to William Child (*b.* Bristol, 1606). Hawkins says it was upon Tallis's recommendation that he was admitted a gentleman extraordinary of the Chapel Royal, June 3, 1589; but this is an error—he was not admitted until June 3, 1605, at which period Tallis had been dead just upon 20 years. It has been stated that in 1637, on the discovery that Bevin was a papist, he was expelled the chapel, but no evidence of the expulsion can be found. The work by which Bevin is best known is his *Brief and Short Introduction to the Art of Musicke*, a treatise dedicated to Dr. Goodman, Bishop of Gloucester, to whom he says he is 'bound for many favours.' In it, he shows 'how to make discant of all proportions that are in use,' and claims that he can teach all who can sing to 'soone be able to compose three, four and five parts, and also to compose all sorts of canons that are usuall, by these directions of two or three parts in one upon the plain-song.' Bevin would seem to have been an authority on musical theory, and in his book, extracts from which are preserved in an early 18th-century copy (B.M. Add. MSS. 30,933/141-57), there are instructions for the making of canons even up to 60 parts in one. Although the rules given are comparatively few, the book is full of ingenious examples at all possible intervals, by augmentation and diminution, and every other known device, all constructed upon the same plain-song. There is a double canon by him (in organ score) (B.M. Add. MSS. 31,403/21), also a song, 'Hark, jolly shepherds,' and an anthem arranged as a canon of 20 parts in one (see below). There is further a volume of canons, bearing his autograph and the date 1611, in the Royal Library (B.M.), while *Q.-L.* also mentions a piece by Bevin in Benjamin Cosyn's Virginal Book (*c.* 1600). The treble and tenor parts of a 3-part 'Browning' by him are in the library at Ch. Ch. (979-83). Bevin's service in D minor (4 and 5 v.) (B.M. Harl. MSS. 7339/5-15b), was printed by Barnard ('Selected Church Music'), and later by Boyce in his 'Cathedral Music.' Besides such compositions as have already been mentioned, the following also exist in MS.:

SERVICES

First Whole Service (including Venite). Add. MSS. 29,289/57 (Altus part only).
Whole Service in D (including Venite). Add. MSS. 17,784/135b (Bassus part only).
Service in A minor (M. unfinished and N.D. lacking). Add. MSS. 29,430/38 (Tenor part only).

[1] Information from W. H. G. F.

ANTHEMS, Etc.

'By mirth much sicknes' (*a* 3). Baldwin /183v.
'Hear my crying, O God' (verse anthem). Harl. 6346/55 (words only).
'I had both monye and a frende.' Baldwin /169v.
'Lord, who shall dwell.' Baldwin /181v.
'Praise the Lord and call.' R.C.M. 1048-51.
'Remember . . .' (Canon, 20 parts in one). Add. MSS. 29,996/136.

J. M^K.

BEVINGTON & SONS, organ-builders in London. Henry Bevington, the founder of the house (1794), had been an apprentice to Ohrmann & Nutt, who were the successors of Snetzler. The business was subsequently carried on by Henry and Martin Bevington, sons of the founder, in Rose Street, Soho, in the same premises as were occupied by Ohrmann. The organs of St. Martin's in the Fields and of the Foundling Hospital in London, and that of St. Patrick's Cathedral, Dublin, were built by this firm. V. de P.

BEXFIELD, William Richard, Mus.D. (*b.* Norwich, Apr. 27, 1824; *d.* London, Oct. 29, 1853), became a chorister of the cathedral under Dr. Buck.

He was organist at Boston, Lincolnshire, graduated as Bachelor of Music at Oxford in 1846, and in Feb. 1848 was appointed organist of St. Helen's, Bishopsgate Street.

On Sept. 22, 1852, his oratorio 'Israel Restored,' produced by the Norwich Choral Society in Oct. 1851, was performed at the Norwich Musical Festival. A set of organ fugues and a collection of anthems by him were published in 1849, besides his oratorio.

W. H. H.

BIANCA, or The Bravo's Bride, 'grand legendary opera' in 4 acts; words by Palgrave Simpson; music by Balfe; produced at Covent Garden, Dec. 6, 1860.

BIANCHI, Bianca (*née* Schwarz) (*b.* near Heidelberg, June 27, 1858), operatic soprano. She studied piano with Wilczek in Heidelberg; meanwhile, developing a beautiful voice, she was engaged under a ten years' contract by the Hamburg impresario, Pollini, who sent her to Paris to work with Mme. Viardot-Garcia. In 1873 she made her début at Carlsruhe, and in the following year at Covent Garden, where she sang for three seasons under Frederic Gye's management. She was a delightful artist, and best suited by light soprano parts, such as Susanna, which she frequently sang to the Contessa of Albani, the Cherubino of Scalchi, the Figaro of Cotogni, and the Almaviva of Faure. She held her own in the finest casts, and was always warmly commended, but scarcely had her full chance at a period when Patti was heading a company of great singers and rivalry was inevitable. One of her best parts was Mathilde in 'Guillaume Tell.' She also sang occasionally at the Covent Garden Promenade Concerts under A. & S. Gatti, to the latter of whom she was at one time affianced; ultimately, however, she married a son of Pollini, and, after a few more years on the German stage, took up teaching at Munich and Salzburg, where she lived after her retirement. H. K.

BIANCHI, Francesco (*b.* Cremona, *c.* 1752; *d.* Hammersmith, Nov. 27, 1810), an operatic composer of some eminence. In 1775 he was appointed maestro al cembalo to the Italian Opera in Paris under Piccinni, and there composed his first operas, 'La Réduction de Paris' and 'Le Mort marié.'

In 1780 he produced 'Castore e Polluce' at Florence, with the English Storace as the prima donna. This successful opera was rapidly followed by many others (see *Q.-L.*). In 1783 he was made vice-conductor at S. Ambrogio in Milan, and held an important post at La Scala. From 1785–91 he was second organist at St. Mark's in Venice, in which city his 'Disertore Francese' was given. The hero (Pacchierotti) appeared in the uniform of a French soldier, which so scandalised the classic Venetians that they hissed the opera off the stage. Fortunately, however, the Duchess of Courland passing through Venice expressed a desire to hear it, and courtesy having compelled the audience to keep silence, the music so enchanted them that the objectionable costume was forgotten, and the opera obtained an exceptional success. Joseph II. offered to take Bianchi into his service, but died (1790) before the latter could reach Vienna.

In 1793 Bianchi came to London, having been offered an engagement at the King's Theatre on account of the success of his 'Semiramide,' in which the famous Banti was prima donna. This engagement lasted for seven years. In the intervals of the London season he made short tours abroad, and in one of these composed his 'Inez de Castro' at Naples (1794) for Mrs. Billington's (*q.v.*) first appearance on the Italian stage. Haydn's diary contains a favourable account of Bianchi's 'Acige e Galatea,' which he heard in London in 1794, but he considered the accompaniments too powerful for the voices. Haydn is also said to have kept one page in Bianchi's compositions turned down for reference when anything had ruffled his temper. Bianchi was conductor at the Crow Street Theatre, Dublin, in 1797–1800, and at Astley's, Dublin, from Nov. 1800 to May 1801. During that time his operas continued to be given in London, namely, 'Antigone' at the King's Theatre, May 24, 1796, 'Merope' in 1799, and 'Alzira' Feb. 28, 1801. In 1800 he married Miss Jackson, a singer, best known as Mrs. Bianchi Lacy—her name by her second marriage. From this time he was chiefly occupied in teaching till his death by his own hand at his house in Hammersmith. (See the *Morning Chronicle* of Nov. 29, and other papers of the same time, as well as the *Gentleman's Magazine* for Dec. 1810.) Bianchi composed about 20 operas and oratorios, besides instrumental music. He was also the author of a

work on the theory of music, portions of which are printed in the *Q. Mus. Rev.* (ii. 22).

M. C. C., with addns.

BIANCHI (Bianco, Blanchis), Pietro Antonio (*b.* Venice, late 16th cent.), priest; Kapellmeister and almoner of Archduke Ferdinand of Austria, 1597; canon of St. Salvator, Venice, 1609; composer of 'Canzoni napoletani' *a* 3 v. (1572); 1 book of madrigals (1582); 'Sacri concentus' *a* 8 v. (1609); 'Partimenti di bassi per l' organo dei voi motetti' *a* 8 v.; and several other vocal MS. compositions in various libraries. (See *Q.-L.*)

BIANCIARDA, Francesco (*b.* Casola, Siena, *c.* 1572; *d.* there, *c.* 1607), born at the castle of Siena. He was maestro di cappella at the cathedral of Siena, an excellent organist and composer, and one of the early introducers of the figured bass. In the dedication of his first book of motets he says that he was of humble birth. Eitner enumerates, as known to him, a book of masses in 4 and 8 parts, and 4 books of motets of which 2 were posthumous works, as well as his *Short Rules to play from a (Figured) Bass on any kind of Instrument*, which was published by Zucchi on Sept. 21, 1607, after his death. Banchieri says that Viadana, Bianciarda and Agazzari were the sweetest composers of his time. Fétis mentions a much greater number of works, but does not say whether they are still in existence.

E. v. d. S.

BIBER, Heinrich Johann Franz von (*b.* Wartenburg, Bohemia, Aug. 12, 1644; *d.* Salzburg, May 3, 1704), a celebrated German violin-player and composer, who occupied the double post of high steward and conductor of music at the court of the Prince-Archbishop of Salzburg. His reputation as a performer and composer was very great, and the Emperor Leopold was so delighted with him that he not only presented him with a gold chain and a considerable sum of money, but also ennobled him by the prefix 'von' in 1681. We, who have to form our estimate of Biber's merits and of his place in the history of Violin-playing (*q.v.*) from those of his compositions which have come down to us, may well contend that his is the first German violin music of any artistic worth at all. At that period the art of violin-playing and the style of composing for the instrument in Germany were entirely under the influence of Italy. Unfortunately the earliest German violinists appear to be more connected with Farina and his school than with Vitali, Torelli and Veracini. Thus we find that the works of J. J. Walther (*q.v.*), a contemporary of Biber, who enjoyed a great reputation in Germany, chiefly consist, like those of Farina, of unconnected phrases, equally void of musical ideas and form, apparently invented to show off the performer's skill in execution, and often only devoted to crude and childish imitation of natural sounds. Although Biber cannot be pronounced free from the faults of his German contemporaries—since his forms are often vague and his ideas somewhat aphoristic—still his sonatas contain some pieces which not only exhibit a well-defined form, but also contain fine and deeply felt ideas, and a style which, though nearly related to that of the best Italians of his time, has something characteristically German in its grave and pathetic severity. That Biber's powers of execution were very considerable we must conclude from his mode of writing for the violin, which presupposes great proficiency in the playing of double stops as well as dexterity in bowing. It is also worth notice that he appears to have been the first occasionally to modify the usual way of tuning the instrument (see Scordatura).

The following compositions of his have been published:

(1) 'Sonatae tam aris quam aulis servientes,' Salzburg, 1676. (2) Six sonatas for violin with figured bass; Salzburg, 1681. (The sixth of these was edited by F. David in his 'Hohe Schule des Violinspiels.') (3) 'Fidicinium sacro-profanum,' a set of twelve sonatas in four and five parts; Nürnberg, no date. (4) 'Harmonia artificiosa-ariosa,' a collection of seven partitas or suites for three instruments; Nürnberg, no date. (5) 'Vesperae longiores ac breviores' for 4 voices, 3 violins, 2 violas and 3 trombones ad libitum; Salzburg, 1693. (6) 'Trattenimento musicale,' Salzburg, 1699.

There is also a dramma musicale, 'Chi la dura la vince,' of his in MS., and much church music at Salzburg. An engraved portrait of him at the age of 36 is extant. P. D.

BIBL, (1) Andreas (*b.* Vienna, Apr. 8, 1797; *d.* 1878), from 1818 organist at S. Stephen's.

He came to the cathedral in Albrechtsberger's time as a singing boy, and learned organ-playing and composition from Josef Preindl. His style of playing was noble, and his compositions are clear and thoroughly church-like in character. He published preludes and fugues for the organ (Diabelli and Haslinger).

His son, (2) Rudolph (*b.* Jan. 6, 1832; *d.* Aug. 2, 1902), studied under Sechter, and became organist at the cathedral 1859, at the Imperial Chapel 1863, and Hofkapellmeister in 1897. His playing was that of a sound musician, and his compositions include:

Preludes and Fugues for organ.
Organ Sonata, op. 74.
Concerto for organ and orch., op. 68.
Organ 'School,' op. 81.
Two Requiems and other church pieces.
Vln. sonata, PF. pieces, etc. (*Riemann.*)

C. F. P.

BICINIUM (Lat. *bis* and *canere*), described by Walther as 'a two-part song,' is an obsolete name formerly used in Germany for any short 2-part composition. In the preface to Rhau's *Secundus tomus biciniorum* (1545) he uses as an equivalent the Greek *δίφωνα*:

'Nec video quomodo Tyrones canendo melius exerceri possint, quam si hæc *δίφωνα* illis proponantur. Sunt præterea ad omnia instrumenta valde accommoda.'

The title-page of Lindner's *Bicinia sacra* (1591) is in both Latin and German, the latter translating 'Bicinia' by 'Zweystimmige Gesänglein,' though the above extract from Rhau's preface

proves sufficiently that the term was not confined to vocal music only. 'TRICINIUM,' which is more rarely found, is an obsolete term for a short 3-part composition. The following are the chief collections of Bicinia and Tricinia mentioned by Eitner and other editors :

Tricinia . . . Latina, Germanica, Brabantica, et Gallica. . . . G. Rhau. Wittemberg, 1542.
Bicinia, Gallica, Latina, Germanica . . . tomus primus. G. Rhau. Wittemberg, 1545.
Secundus tomus biciniorum . . . G. Rhau. Wittemberg, 1545.[1]
Diphona amœna et florida . . . J. Montanus et A. Neuber. Nürnberg, 1549.
Selectissimorum triciniorum [bassus etc.] Discantus . . . J. Montanus et A. Neuber. Nürnberg, 1559.
Variarum linguarum tricinia . . . tenor[2] [Discantus] tomi secundi. J. Montanus et A. Neuber. Nürnberg, 1560 (1559?).[1]
Bicinia . . . P. Phalesius et J. Bellerus. Antwerp, 1590. (A later edition appeared in 1609.)
Bicinia sacra, ex variis autoribus . . . edita, etc. C. Gerlach. Nürnberg, 1591.[1]

W. B. S.

BICKHAM, GEORGE (jr.), an 18th-century engraver, principally famous for his two illustrated folio volumes, *The Musical Entertainer*, which was issued in parts (each containing 4 plates), covering a period from 1736–39. The plates, 200 in number, are songs with music, headed and surrounded with pictorial embellishments illustrative of the song. This work was the first of its type published in England, and led the way to many other similar issues. There are two editions of it, his own, and a rather later one bearing the imprint of Charles Corbett. F. K.

BIEREY, GOTTLOB BENEDICT (*b.* Dresden, July 25, 1772 ; *d.* near Breslau, May 5, 1840), a composer chiefly of comic operas, or rather of the 'Singspiele.' He was instructed in music by Weinlig. His opera 'Wladimir' was produced at Vienna in 1807 with much applause.

This success procured him the post of Kapellmeister in Breslau, vacated by C. M. von Weber, and in 1824 the direction of the theatre itself. He retired in 1828. Forty of his operas, great and small, are extant, and of these the following are printed with pianoforte arrangement :

'Das Blumenmädchen' (1802) ; 'Wladimir' (1807) ; 'Der betrogene Betrüger' ; 'Die schweizer Schäferin' ; 'Der Zufall,' 'Elias Ripsraps' (Breslau, 1810, much success) ; 'Die Pantoffeln' (Vienna, 1810) ; 'Der Zank.'

F. G.

BIGOT DE MOROGNES, MARIE (*née* Kiene) (*b.* Colmar, Alsace, Mar. 3, 1786 ; *d.* Paris, Sept. 16, 1820), a pianist who was interesting for her association with leading musicians of her time. She married in 1804 Bigot, librarian to Count Rasoumowsky, and accompanied him to Vienna.

Here she made the acquaintance of Haydn, Salieri and Beethoven. The first time she played to Haydn (then 72 or 73) the old man was so delighted as to embrace her, and to say, 'My dear child, that music is not mine ; it is yours ! ' and on the book from which she had been playing he wrote ' Feb. 20, 1805 : this day has Joseph Haydn been happy.' Beethoven also, after she had played to him a sonata of his own, is reported to have said, 'That is not exactly the reading I should have given ; but go on, if it is not quite myself, it is something better.' These anecdotes are given by Fétis, who may be presumed to have heard them from Madame Bigot herself. On May 1, 1805, she played at the opening concert of the Augarten, and the report of the *Allg. musik. Zeitung* characterises her playing as pleasing and often delicate and refined—a verdict which hardly bears out the expressions attributed to Haydn and Beethoven. A letter of Beethoven's, however, first published by Otto Jahn and reprinted by Thayer (*Beethoven*, ii. 337), puts his relations to her family beyond doubt ; and there is no reason to disbelieve the picturesque anecdote related by Nohl (*Beethoven*, ii. 246) of her having played the ' Sonata appassionata ' at sight from the autograph.

In 1809 the Bigots went to Paris. Here she became intimate with Baillot, Lamarre, Cherubini and many other prominent musicians. She played the music of Beethoven and Mozart with the two former both in public and private, and was highly valued by Cramer, Dussek and Clementi. The war of 1812, however, put a rude stop to this happiness ; Bigot was taken prisoner at Milan, lost his post at Count Rasoumowsky's, and his wife was thrown on her own resources. She accordingly began to give lessons, but the exertion interfered with her health. Before her death, however, she gave lessons to Felix Mendelssohn during a short visit to Paris in 1816 (his 7th year). He refers to her in a letter of Dec. 20, 1831, and the warmth of his attachment to her family may be seen from another letter of Feb. 24, 1838, to Madame Kiene (*Goethe und Mendelssohn*, 2nd ed. p. 136), which shows that Bigot was still alive, and that the relations between Madame Bigot's family and the great French musicians were still maintained. F. G.

BILHON (BILLON, JHAN, JEHAN, DU OR DE), JEAN DE, a French composer of the end of the 15th and beginning of the 16th centuries. Some of his masses, founded, as usual at the time, upon the themes of French chansons, are preserved in the Pontifical Chapel, where (according to Fétis) he was a singer. This is denied by Haberl. Other compositions of his (masses and motets) are to be found in various collections of church music published between the years 1534 and 1554, issued by ATTAINGNANT, Paris ; Moderne, Lyons ; Scotto and Gardano, Venice.

J. R. S. B. ; rev. M. L. P.

BILLINGS, WILLIAM (*b.* Boston, Massachusetts, Oct. 7, 1746 ; *d.* there, Sept. 29, 1800), was one of the earliest American composers. He was a tanner by trade, an uneducated man, but ardently devoted to choral singing. His compositions were mostly hymn tunes of a primitive character, the first being contained in *The New England Psalm Singer*

[1] A copy is in the B.M.
[2] The bass has a different title.

or American Chorister (Boston, 1770). He published six of such collections, some of which gained a large circulation. During the Revolution many of his hymns were of a patriotic sort. R. A.

BILLINGTON, Mrs. Elizabeth (*b.* London, *c.* 1768; *d.* near Venice, Aug. 25, 1818), a famous singer, daughter of Carl Weichsel, a native of Freiberg in Saxony, and principal oboist at the King's Theatre, London. Her mother was for several years a favourite singer at Vauxhall Gardens and elsewhere.

She and her brother Carl were from the earliest possible moment trained to music, and on Mar. 10, 1774, performed on the pianoforte and violin at their mother's benefit concert at the Haymarket Theatre. On May 20, 1777, she played at Hickford's Room with her brother and Sam Wesley. Before she had completed her 11th year she had written two sets of pianoforte sonatas. At 14 years old she appeared as a singer at Oxford, and on Oct. 13, 1783, became the wife of James Billington, a double-bass player. Immediately after their marriage they went to Dublin, where Mrs. Billington began her career as a stage singer in the opera of 'Orpheus and Eurydice.' On her return to London she obtained a trial engagement of twelve nights at Covent Garden, where she appeared, Feb. 13, 1786, as Rosetta in 'Love in a Village.' Her success was such that the managers immediately engaged her for the remainder of the season at a large salary. She speedily attained a position at the Concert of Ancient Music, where she disputed with Mara for supremacy. With the exception of a visit to Paris at the end of her first season, where she went to study with Sacchini, Mrs. Billington remained in England until 1794, when she went with her husband and brother to Italy. Their intention was to travel solely for amusement, but at Naples Sir William Hamilton, the English ambassador, induced Mrs. Billington and her brother to perform in private before the King, who immediately prevailed on Mrs. Billington to sing in public at the San Carlo Theatre. Accordingly, in May 1794, she made her appearance there in Francesco Bianchi's opera, 'Inez di Castro,' written expressly for her (see Bianchi). Her success was complete, but her triumph was suddenly interrupted by the death of her husband, who, as they were about to set out for the theatre for her second performance, was stricken by apoplexy, and almost immediately expired. An eruption of Mount Vesuvius occurring about the same time was by the superstitious Neapolitans attributed to permission having been given to a heretic to perform at the San Carlo, and fears were entertained for Mrs. Billington's safety. However, on renewing her performances she experienced the most favourable reception, and sang successively in operas composed for her by Paisiello, Paër and Himmel. In 1796 she went to Venice, where, owing to illness, she performed only once. She and her brother next visited Rome and all the principal places in Italy. In 1799 she married Felissent, from whom, however, she soon separated. In 1801 she returned to England, and the managers of Drury Lane and Covent Garden competing for her services, it was arranged that she should perform at each house alternately, and she accordingly appeared at Covent Garden Theatre on Oct. 3, 1801, as Mandane in Arne's 'Artaxerxes,' still retaining the name of Billington. From this time her services were in constant request at the Italian Opera, the theatres, the Concert of Ancient Music, the Vocal Concerts, the provincial festivals, etc., until 1811, when she retired from public life. During this part of her career two memorable events took place, viz. her singing with Banti, Mar. 25, 1802, in Nasolini's opera 'Merope,' and her performance in a duet with Mara on the latter's last appearance. Once afterwards Mrs. Billington quitted her retirement to perform at a concert given in Whitehall Chapel on June 28, 1814, in aid of the sufferers by the war in Germany. In 1817 she was reconciled to her husband, and quitted England with him for her estate of St. Artien near Venice, where she died in the following year. Mrs. Billington's compass was extensive (three octaves, from *a* to *a'''*), the upper notes being exquisitely beautiful. She excelled in passages of execution, but her powers of expression were limited. Sir Joshua Reynolds painted a fine portrait of her as St. Cecilia, now in the Public Library (Lenox collection), New York, and a miniature by Cosway is in the Victoria and Albert Museum, South Kensington. A miniature by A. Pope is in the possession of the Garrick Club (see *PLATE XIV.*). There is a portrait of her (head and shoulders) at St. Artien.

W. H. H., with addns.

BILLINGTON, Thomas (*b.* Exeter, *c.* 1754; *d.* Tunis, 1832), brother-in-law of Elizabeth Billington, harpist, pianist and composer.

He published:

A church service for 3 voices, 1784; Pope's 'Elegy to the Memory of an Unfortunate Lady'; Pope's 'Eloisa to Abelard' (partly compiled); 24 ballads to Shenstone's Pastorals; Prior's 'Garland'; Petrarch's 'Laura' and 'Laura's Wedding-day'; Pope's 'Messiah,' op. 13; 'Celadon and Amelia,' from Thomson's *Seasons*; Gray's 'Elegy,' op. 8; and many canzonets and harpsichord sonatas.

W. H. H.

BINCHOIS, Egidius, or Gilles de Binch (*b.* Binche, or Mons,[1] *c.* 1400; *d.* Lille, Sept. 20, 1460), one of the most famous musicians of that time.

He began life as a soldier, but soon left the army for the Church, and became a chaplain to Philip, Duke of Burgundy, probably before 1425. In 1437 he was appointed to a canonry in the Church of St. Wanden at Mons, and his name appears with that of Dufay in the list

[1] Recent investigation favours the latter. See *Revue de Musicologie*, E. Closson, 'L'Origine de Gilles Binchois.'

of non-resident canons who were summoned from Brussels to Mons in 1449. He also benefited from canonries of St. Pierre, Cassel; St. Donat, Bruges, and St. Vincent, Soignies. In 1452 he had risen to the position of second chaplain at the court of Burgundy, and he probably remained in the service of the Duke till his death.

He was regarded as one of the first composers of his day, and his name is coupled with those of Dunstable and Dufay by theoretical writers of the 15th century (see Tinctor, Prologue to the *Liber de arte contrapuncti*, in Coussemaker's *Scriptores*, iv. 77, and Franchinus, *Musica utriusque cantus practica*, iii. 4).

His reputation seems to have been greatest as a writer of secular songs. This may be inferred from the opening lines of an elegy on his death preserved in a manuscript at Dijon :

> 'Mort, tu as navré de ton dart
> *Le père de joyeuseté*
> En déployant ton étendart
> Sur Binchois, patron de bonté.'

As many as 27 of these songs are included in MS. Canonici. Misc. 213 in the Bodleian Library. They are all in 3 parts to French words. Seven of them are transcribed in Stainer's *Dufay and his Contemporaries*, but to modern ears they are by no means equal to similar compositions by Dunstable and Dufay, though they have occasional expressive touches. Six other French songs of his were printed in 1892 by Dr. Riemann from Cod. Mus. 3192 in the Library at Munich. Another song, 'Ce mois de may,' ascribed to Binchois in a Paris MS., and printed under his name by Kiesewetter in the Appendix to his *History of Music*, appears under the name of Dufay in the Canonici MS. Unlike Dunstable and Dufay, Binchois appears never to have set Italian words,[1] and there is no evidence that he was ever in Italy. Of his sacred compositions the largest collection is in the Trent manuscripts now in course of publication by Dr. Adler. A Gloria and Credo from one of his Masses seem to have been very widely appreciated. They are the only sacred compositions by Binchois included in the Canonici MS., where they occupy the first place in the book, and they are found in the Trent Codex 92, in Cod. Mus. 37 of the Liceo Musicale of Bologna and in MSS. 6 and 7 (formerly 11) of the Library of Cambrai. Fétis found a complete Mass by Binchois with a Kyrie *farci* in the Royal Library at Brussels, but his promise of early publication was never fulfilled. Other compositions of Binchois are in the following MSS.: Escurial (v. iii. 24, t. iv. a, 24); Rome (Urb. lat. 1411); Paris National Library (nouv. acq. f. 4379); and also *Codex Cartacus*, M 222, C 22, of the Strassburg Library. Among these last a copy by Coussemaker is preserved.

All the extant compositions by Binchois are in 3 parts, with the exception of a Gloria and Credo in the Trent Codex 87 which has a 'pars concordans' or optional fourth part. For reprints see *D.T.Ö.*, as well as other works here mentioned. A complete edition of Binchois is in preparation by Dr. W. Gurlitt of Freiburg, in Brisgau.

J. F. R. S. ; addns. M. L. P.

[1] Some Italian songs in MS. 2216 of the University Library of Bologna have been erroneously attributed to Binchois owing to their immediately following a Magnificat which bears his name.

Bibl.—Charles van den Borren, *Compositions inédites de Guillaume Dufay et de Gilles Binchois* (*Annales de l'Académie Royale d'Archéologie de Belgique*, 6th series, tome 10, liv. 1 and 2, pp. 109-20). E. Droz and G. Thibault, *Bibliographie des recueils de chansons du XVe siècle*; *Poëtes et musiciens du XVe siècle*. Paris, 1924.

BIND (Fr. *liaison* ; Ger. *Bindebogen* ; Ital. *legatura*), a curved line (also called *tie*) placed between two notes of the same degree, to denote the continuance of the sound during the value of both, instead of the repercussion of the second note. The employment of the bind is a necessity whenever a sound is required to be of a duration which cannot be expressed by any single note, as for example 5 or 7 quavers, and it is also convenient when the duration of a note extends beyond the limits of the bar. (See Slur, Bar and Tie.) F. T.

BINDER, Christlieb Sigmund (*b.* 1724 ; *d.* Dresden, Jan. 1789), a pupil of 'Pantaleon Hebenstreit,' exchanged the Pantaleon (*q.v.*) for the organ and was appointed (1753) organist at the Catholic church, Dresden. He was one of the most prolific composers for the pianoforte (in the style of Ph. E. Bach) of the mid-eighteenth century. His published works consist of PF. sonatas only, but a number of symphonies, harpsichord concertos and sonatas, as well as sonatas with flute, violin, trios and organ pieces are preserved in MS. Some sonatas, lessons and pieces have been republished at various times. O. Schmidt has included a selection from his works in 'Musik am sächsischen Hofe' (1903–4) (*Q.-L.*).

BINI, Pasqualino (*b.* Pesaro, *c.* 1720), a violinist, and a favourite pupil of Tartini, to whom he was recommended at the age of 15 by Cardinal Olivieri.

Under Tartini he practised with such diligence that in three or four years' time he overcame the chief difficulties of his master's music, and played it with greater force than the composer himself. On returning to Rome, under the protection of Cardinal Olivieri, he astonished the violinists by his performance, especially Montanari, the chief violin-player of the time at Rome, who was generally believed to have died of mortification at the superiority of Bini's talents. Hearing that Tartini had changed his style of playing, he returned to Padua and placed himself for another year under his old master, at the end of which time he is said to have played with wonderful certainty and expression. After his return to Rome

Tartini recommended Wiseman, his English friend, to Bini in the following words, which speak as highly for master as for scholar :

'Io lo mando a un mio scolare che suona più di me, e me ne glorio per essere un angelo di costume e religioso'—'I recommend him to a scholar who plays better than myself, and I am proud of it, as he is an angel in religion and morals.'

He was leader of the court band at Stuttgart in 1754 ; a violin sonata by him is in the State Library of Berlin, and a concerto in the collection of the Gesellschaft der Musikfreunde at Vienna. E. H. D., with addns.

BINIOU, see BAGPIPE.

BIONI, ANTONIO (*b.* Venice, *c.* 1698), dramatic composer, pupil of Giovanni Porta, produced his first opera, 'Climène,' in 1721, his next, 'Udine,' 1722, and during the next nine years 24 more, of which 'Endimione' (1727) had the highest reputation. In 1726 he was conductor, and in 1730 director, of the Italian theatre at Breslau, in 1731 the Elector of Mayence appointed him his chamber-composer, and in 1733 he probably returned to Italy. He conducted the performance of his 'Girita' at Vienna in 1738 and signed a dedication of a serenata for 5 v. from Vienna in 1739. A Mass for 4 v. is at Dresden, an opera, 'Issipile,' and the serenata above mentioned at Vienna, and smaller works at Schwerin and Berlin (*Q.-L.*).

M. C. C.

BIRCH, (1) CHARLOTTE ANN (*b. circa* 1815 ; *d.* London, Jan. 26, 1901), a soprano singer, was musically educated at the R.A.M. from 1831–34, and by Sir George Smart.

She appeared in public about 1834, and in 1836 was engaged by the Sacred Harmonic Society, and soon took a good position as a concert singer. In 1838 she made her first appearance at the Three Choirs Festival at Gloucester, and sang subsequently at Hereford in 1840 and 1846, at Gloucester in 1841, and at Worcester in 1842, and was engaged at the Birmingham Festival of 1840. In 1844 she visited Germany, and sang at Leipzig and other places. On Dec. 20, 1847, she appeared on the English stage at Drury Lane in Balfe's 'Maid of Honour,' but did not succeed in establishing herself as an operatic singer. About 1856 increasing deafness compelled her to abandon the public exercise of her profession. Her younger sister, (2) ELIZA ANN (*b. circa* 1830 ; *d.* Mar. 26, 1857), also a soprano singer and pupil of Sir George Smart, first appeared about 1844.

W. H. H.

BIRCHALL, ROBERT (*d.* 1819), music-publisher, etc., said to have been apprenticed to Randall, the successor of Walsh, established a musical circulating library about 1784, prior to which, in 1783, he had been associated in business with Beardmore and also with Andrews, successively at 129, 133 and 140 New Bond Street, being alone in the business at the latter addresses.

He managed the celebrated series of Ancient Concerts and most of the Benefit Concerts of those days. One of Birchall's earliest schemes was for a complete re-issue of Handel's works in 80 folio volumes (see proposals for printing these, dated 1783, and Burney's account of the Handel Commemoration, 1785). Birchall published many of Beethoven's works, including the original English editions of 'The Battle Symphony,' dedicated to the Prince Regent, in 1816, the sonata op. 96, the trio op. 97, an adaptation for the pianoforte of symphony No. 7—the copyrights of which he purchased from the composer. Beethoven's letters arranging for these, in queer English, and still queerer French, will be found in Nohl's two collections, *Briefe* and *Neue Briefe*. He amassed a large fortune and was succeeded by the firm named Birchall, Lonsdale & Mills. Christopher Lonsdale set up a separate business shortly before 1838 at 26 New Bond Street ; Richard Mills, a nephew of Birchall, remained at the old address, the house which is now occupied by W. E. Hill & Sons, the eminent violin dealers and experts. Samuel Chappell, the founder of the well-known firm at 50 New Bond Street, was originally at Birchall's. The catalogue of the house contains the celebrated collections formed by Latrobe, Mozart's operas, and an immense collection of standard works by the greatest composers and performers of the day. R. E. L. and F. K.

BIRD, HENRY RICHARD (*b.* Walthamstow, Nov. 14, 1842 ; *d.* Kensington, Nov. 21, 1915), organist and pianist, was the 3rd son of George Bird, organist of Walthamstow Parish Church.

He was appointed in Feb. 1851, when little more than 8 years old, organist of St. John's Church, Walthamstow, where the incumbent was an ardent musical amateur, and arranged for Henry Bird to study with Turle of Westminster. This eminent organist stopped Bird's organ practice, and turned his attention to piano, harmony and reading vocal and orchestral scores. In 1859 Bird came to London, and occupied successively the posts of organist at St. Mark's, Pentonville, Holy Trinity, Chelsea, and St. Gabriel's, Pimlico. While in Chelsea he conducted a large choral and orchestral society at the Town Hall, accompanied at several good private societies, and for many years accompanied at the Civil Service Musical Society, when it was conducted by Sullivan and John Foster. In 1872 Bird was appointed organist of St. Mary Abbotts, Kensington, a post he filled with much distinction until his death. In 1896 he joined the teaching staff of the R.C.M. He gave many classical concerts in Kensington, at one of which Plunket Greene made his first appearance ; this led to Bird's engagement as regular accompanist for Plunket Greene, and eventually procured him the appointment of permanent accompanist at the

Popular Concerts in 1891, a post which had not been filled by one regular and official accompanist since the days of Benedict. As an accompanist Bird gained a distinguished position in the musical world of London (*Mus. T.*, 1910, p. 289). M.

BIRD FLAGEOLET, see FIPPLE FLUTE (3).

BIRKENSTOCK, JOHANN ADAM (*b.* Alsfeld, Darmstadt, Feb. 19, 1687; *d.* Eisenach, Feb. 26, 1733), studied the violin under Fedeli at Cassels, Volumier at Berlin, Fiorelli at Bayreuth and de Val at Paris. He was appointed as violinist in the court orchestra at Cassels in 1709, first violinist 1721 and Konzertmeister in 1725. He toured in 1722, visiting Amsterdam, where he published 12 'Sonate a violino solo e violoncello o basso,' op. 1, liv. i. and ii. In 1730 he was appointed Kapellmeister at the court of Eisenach. *Riemann* mentions 2 books of 12 sonatas each as published in 1722, probably a mistake caused by the 2 books of op. 1; he also mentions 6 trio sonatas for 2 violins and bass, and 12 concertos for 4 violins, with viola, violoncello and bass, which Eitner (*Q.-L.*) has been unable to trace, as well as a symphony with oboes and horns (MS.) in the Upsala library. One entire sonata (for violoncello) and pieces from others have been re-edited by A. Moffat. E. v. d. S.

BIRKET FOSTER, MYLES, see FOSTER.

BIRMINGHAM. Music in Birmingham has an inner and an outer history. The outer is concerned with the Triennial Festivals, which for long had a national reputation—the inner with various efforts towards maintaining a continuous musical life, which had to struggle against the paralysing influence of the Festivals. The war of 1914–18 brought about the suspension of the Festivals and made other forms of musical activity difficult to sustain, but with the coming of peace, and the absence of an attempt to revive the Festival, the musical life of the city has been able to expand, and now assumes an importance comparable with that of Manchester and Glasgow.

BIRMINGHAM MUSICAL FESTIVALS. — The Festivals began in 1768, when performances were given in St. Philip's Church and in the theatre in King Street in aid of the funds of the General Hospital. A chorus of forty and a band of twenty-five had for conductor Capel Bond, of Coventry, and only Handel's music was performed. The works given included 'Messiah,' 'Alexander's Feast' and 'L'Allegro.' For a time the Festivals were held at irregular intervals, but from 1796–1829 the triennial arrangement obtained. In 1808 Dr. Crotch conducted, and Mozart's additional accompaniments to 'Messiah' were used in Birmingham for the first time. Samuel Wesley conducted in 1811, and T. Greatorex in 1820. At the 1829 Festival Costa appeared as a singer in a cantata by Zingarelli. Five years later, in 1834, the completion of the present Town Hall lent to the Festivals a dignity and importance they had not hitherto had. W. Knyvett was the general conductor, holding the position until 1840. In the chorus of 300 were male voices from Worcester and Lichfield, with a contingent of female voices from Lancashire. In 1837 Mendelssohn conducted his 'St. Paul' and appeared as organist. Mendelssohn and Moscheles shared the conducting in 1846; in that year 'Elijah' had its first performance. 1849 found Costa installed as conductor, the beginning of a reign lasting until 1882. Notable first performances during the period included Costa's 'Eli' (1855) and 'Naaman' (1864), and Gounod's 'Redemption' in 1882. In 1873 the Festival realised £7500 for the Hospital. 1855 saw the formation of the Birmingham Amateur Harmonic Association to provide the local contingent of choristers, an office later performed by the Festival Choral Society. The appointment of Dr. Richter in 1885 added sensibly to the musical importance of the institution. In that year 'Messiah' was given according to the original score, the novelties including Gounod's 'Mors et Vita,' Stanford's 'Three Holy Children,' Dvořák's 'Spectre's Bride' and Cowen's 'Sleeping Beauty.' 1888 brought Parry's 'Judith,' and 1891 Stanford's 'Eden' and Dvořák's Requiem. In 1894 the novelties were three—Parry's 'King Saul,' Goring Thomas's 'The Swan and the Skylark' and Henschel's Stabat Mater. Purcell's 'King Arthur' was revived in 1897, and Stanford's Requiem and Somervell's 'Ode to the Sea' had first performances. The turn of the century in 1900 brought a portent—the production of Elgar's 'The Dream of Gerontius.' The composer, when a young man, had been a violinist at a hinder desk in Stockley's Orchestra, a combination which gave popular concerts in the Town Hall. The poem, by Cardinal Newman, provides another link with Birmingham, for Newman resided for the thirty years preceding his death at the Oratory in Hagley Road; Elgar's manuscript score, also, is deposited there. Gervase Elwes, for so long identified with the tenor music of the oratorio, was educated at the Oratory School. A revival of Byrd's five-part Mass also lent distinction to the 1900 Festival. In 1903 Elgar's 'The Apostles' had its first performance, followed in 1906 by the same composer's 'The Kingdom.' At the 1906 Festival the first part of Bantock's 'Omar Khayyám' and Holbrooke's 'The Bells' were also given for the first time. The 1909 novelties included the third part of Bantock's 'Omar Khayyám' and Boughton's 'Midnight.' Sir Henry Wood was conductor in 1912, the last of a series of Festivals covering a period of nearly 150 years. Sibelius, however, conducted a first performance of his A minor Symphony (No. 4), and the other new

works included Elgar's 'The Music-Makers,' Bantock's symphonic poem 'Fifine at the Fair' and Walford Davies's 'The Song of St. Francis.' R. H. Wilson concluded a period as chorus-master extending over four Festivals. The orchestra numbered 140 and the chorus 350.

Concerts.—The inner history of Birmingham music is a story of enthusiastic effort fighting against local phlegm and adverse fortune, a story of many failures after an early promise of success, with a promise in the years since the war of better times in store. Chief among these must be reckoned the Halford concerts, conducted by George Halford and financed for many years by a group of public-spirited citizens. The Halford Orchestra gave programmes of the highest class, introducing to the city many new works and a host of eminent solo performers. They fell because the burden became too great to be borne. Another fine enterprise was the series of Promenade Orchestral Concerts given at the Theatre Royal for many years by Landon Ronald in association with Max Mossel. During the war Sir Thomas Beecham instituted a series of orchestral concerts, but with disastrous financial results, largely through the commandeering of the Town Hall by the War Office, with a resulting transference of the concerts to a mission building. Chamber music has had many enthusiastic promoters, among them Max Mossel, Madame Minadieu and Oscar Pollak. The popular taste for choral music has always operated against the efforts of instrumental music to find a secure footing, but there are signs of a broader outlook on the art. Through the instrumentality of Jesse Collings, a Member of Parliament of more than local fame, and others working with him, a number of choral societies, with in some cases an amateur orchestra attached, sprang into existence with a view to providing cheap concerts in the Town Hall on Saturday evenings. For a long term of years they did useful work, but the growth of other forms of entertainment, combined with a reactionary policy, has in recent years militated against them, and their vogue has gone. Their claims to possession of the Town Hall at present stand in the way of institution of concerts more in keeping with the spirit of the times. The concerts promoted by W. C. Stockley, for many years chorus-master to the Festival, are also deserving of mention in any account of earlier efforts to cultivate musical taste in Birmingham.

Midland Institute School.—The city's principal educational institution is the Midland Institute School of Music. Rather casually handled for many years, the appointment of Granville Bantock as Principal in 1900 was of prime importance, the residence of so eminent a composer in its midst meaning much to the music of the city. The number of students is large, a total of 1600 having been reached in a single year, and all branches of music are taught. It is questionable, however, whether the Institute School is to-day adequate to the city's needs, but many of its students have attained to eminence in various branches of the art. Among these may be mentioned Julius Harrison, Frank Mullings, Appleby Matthews, Clarence Raybould and Sydney Grew. Rutland Boughton was for many years a teacher there, and 'The Immortal Hour' was composed during his stay in the city. Vocal teaching in Birmingham has over a long period of years been singularly good; the number of G. A. Breeden's pupils who have found fame is remarkable. In 1905 Richard Peyton founded a Chair of Music at the University, Sir Edward Elgar being the first holder. Since 1907 Granville Bantock has been Peyton Professor. The course for the University's musical degree includes an Arts course.

The Competitive Festival.—In 1912 the Competitive Festival movement found a footing in Birmingham, largely through the efforts of Bantock and Messrs. Bowker and Stevens. The biennial Festival is now among the largest held in the country. In 1924 over 12,000 competitors appeared, these including 200 children's choirs drawn from the elementary schools of the city. The Festival was the first in the country to abolish the money prize.

Festival Choral Society.—This society is the principal present-day link with the past. Adrian Boult is conductor and Graham Godfrey chorus-master, their predecessors including Sir Henry Wood, Allen Blackall and Dr. Sinclair. Four concerts are given annually; recent productions have included Rachmaninoff's 'The Bells,' Bantock's 'The Great God Pan' and Dame Ethel Smyth's Mass.

The City Orchestra.—The founding of the City Orchestra in 1920 has been of incalculable benefit. Two years earlier, Appleby Matthews, a local pianist and choir conductor, had instituted a series of Sunday orchestral concerts at his own risk, which caught on with the public. Their success gave an impetus to the movement for a City Orchestra. Sponsored before the municipality by Neville Chamberlain, a grant of £1250 a year from the rates was made, while many handsome donations were received from private citizens. Its first conductor was Appleby Matthews, his Sunday concerts being merged in the activities of the civic body. Annually six symphony concerts (later increased to eight) were given, with six Saturday populars, twenty-four Sunday concerts and a series of six on Saturday afternoons for school children. Three, and sometimes four, guest conductors appear annually at the Symphony concerts. Sir Edward Elgar conducted the Orchestra's first concert in a

programme of his own works, and was accorded the honour of a civic reception by the municipality. In 1924 disagreements led to the severance of the original conductor's connexion with the Orchestra, Adrian Boult succeeding him. In spite of the grant, large deficits have been made on the concerts; the 1924–25 season was entered on with an adverse balance of over £3000. Nevertheless the authorities increased the grant in 1925, and the artistic results have justified their confidence.

City Choir.—Formed in 1921, the City of Birmingham Choir was intended to supplement the work of the Orchestra, though it is an independent body. Its work, however, has been carried on separately. Its conductor, Joseph Lewis, is also deputy-conductor of the City Orchestra. It has given concert performances of Boughton's 'Bethlehem' and a first public performance of the *a cappella* Mass of Vaughan Williams. Joseph Lewis is also musical director of the local Broadcasting Station, where he formed the first repertory organisation of orchestra, choir and soloists employed for the broadcasting of music.

Opera at the Repertory Theatre.—For opera the city had been dependent on the visits of touring companies, but in 1920 these opportunities began to be supplemented by occasional performances of *opéra intime* at the Repertory Theatre. In 1916 Barry Jackson had produced Clarence Raybould's 'The Sumida River.' In 1920 he gave a series of performances of 'Così fan tutte.' A year later Boughton's 'The Immortal Hour,' Cimarosa's 'Il matrimonio segreto,' and Donizetti's 'Don Pasquale' were added to the repertory. 1922 brought 'Don Giovanni,' and 1923 Ethel Smyth's 'The Boatswain's Mate' and 'Fête galante'—the last-named a first performance. During these years Appleby Matthews was musical director. In 1924 'The Seal-Woman,' by Bantock and Mrs. Kennedy-Fraser, was produced under Adrian Boult's direction.

Popular Music.—The City Police Band, largely through the instrumentality of C. H. Rafter, the Chief Constable, plays an important part in popularising music in the city. It is a body of sixty musicians, mostly drawn from Kneller Hall. It plays at the low pitch, and at special concerts has been conducted by Holst, Holbrooke and Cyril Jenkins. Richard Wassell is musical director, succeeding Appleby Matthews in 1922. In 1924 G. W. Cunningham succeeded C. W. Perkins as City Organist, the latter retiring after thirty-eight years' service. Forty recitals are given annually on the Town Hall instrument, a Hill organ with 4 manuals and 68 stops. Recitals are also given on the University organ at Bournbrook. The Town Hall has for long been found inadequate to the city's needs for concert-giving, and a scheme for a large City Hall is on foot; the site has already been secured. The carillon at Bournville should also be included among the musical amenities of Birmingham. Recitals are given on it by noted Belgian players, and a resident *carillonneur* is to be appointed.

A. J. S.

BIS (Fr.), 'twice'; (1) a cry equivalent to Encore (*q.v.*). The French even have a verb, *bisser*, to repeat.

(2) When written, as it sometimes is in MS. music, over a phrase or passage, it signifies that the notes are to be repeated; the same thing would be effected by dots of repetition at the beginning and end of the phrase.

BISCHOFF, Dr. Ludwig Friedrich Christian (*b.* Dessau, Nov. 27, 1794; *d.* Cologne, Feb. 24, 1867), musical critic and journalist.

His father was a violoncello-player in the Duke's band. In 1812 he entered the University of Berlin, and attended the philological lectures of Boeckh. But the war put a stop to study; Bischoff volunteered, and was taken prisoner by the French. After the treaty of Paris he resumed his studies and took his degree. He filled various posts in Switzerland, was professor at Berlin, and director of the gymnasium at Wesel from 1823–49. After 25 years he settled first in Bonn and then in Cologne. There he founded the *Rheinische Musikzeitung* (1850) and its successor, the *Nieder-Rheinische Musikzeitung* (1853), and edited the latter to the day of his death, acting also as reporter to the *Kölnische Zeitung*. In 1859 he published a translation of Oulibichev's *Beethoven*. The tendency of his papers was dead against that of the *Neue Zeitschrift* of Schumann and Brendel, in regard to Wagner and Liszt. Bischoff's worship for Haydn, Mozart and Beethoven, with whom he afterwards associated Mendelssohn, was so exclusive as to preclude his appreciating even Schumann.

A. M.

BISHOP, Ann (*b.* London, Jan. 9, 1810[1]; *d.* New York, Mar. 18, 1884), singer, daughter of a singing-master named Rivière. In her career as a singer she was known as Mme. Anna Bishop.

She studied the pianoforte under Moscheles, and in 1824 became a student at the R.A.M. Here she remained until her marriage with Sir Henry Bishop, July 9, 1831. In this year she appeared as a singer at the Philharmonic and other concerts. (See Alsager.) In 1839 she went on a tour in the provinces with Bochsa (*q.v.*), the harpist, and shortly after their return to London eloped with him to the Continent. Almost all the remainder of her life was spent in travelling. Before her return to England in 1846 she had been singing for more than two years at the San Carlo in Naples. In 1847 she spent four months in Dublin before she went to America; there she remained for

[1] Bapt. Marylebone Church, Apr. 24, 1810.

some years. In 1855, while on a tour in Australia, Bochsa died, and Mme. Bishop returned by way of South America to New York, where she married a certain Schulz. Shortly afterwards she visited England, singing at the Crystal Palace in 1858, and giving a farewell concert, Aug. 17, 1859. Another considerable period was now passed in various parts of America. In 1865 she sailed from California for the Sandwich Islands, and in the following year suffered considerable loss in a wreck between Honolulu and China. India and Australia were next visited, and after a final visit to London she settled down in New York, where she died. Her voice was a high soprano of brilliant quality (*D.N.B.*). M.

BISHOP, Sir Henry Rowley, Mus.D. (*b.* London, Nov. 18, 1786; *d.* there, Apr. 30, 1855), composer, learned music under Francesco Bianchi. His bias for dramatic composition soon developed itself in a remarkable degree.

In 1804 he wrote the music to a little piece entitled 'Angelina,' performed at Margate, and followed it by the music to a ballet, 'Tamerlan et Bajazet,' produced at the King's Theatre in 1806 (see list below). This led to his writing, in the same year, other pieces, performed at the Opera and Drury Lane Theatre. In 1809 his music to the 'Circassian Bride' was received with enthusiasm. It was performed at Drury Lane on Feb. 23, and on the following night the theatre was burnt to the ground, and the composer's score consumed in the flames. The merits of the young musician were so apparent that the proprietors of Covent Garden Theatre engaged him for three years to compose and direct the music. He entered on this important office in the season 1810–11.

The Philharmonic Society was established in 1813, and Bishop was one of its original members, and took his turn as conductor. In the following year he produced portions of the opera of 'The Farmer's Wife,' the melodrama of 'The Forest of Bondy,' a cantata for Braham called 'Hanover,' and other musical pieces. In this year he adapted the first of a series of foreign operas—Boieldieu's 'Jean de Paris'—which was followed in successive years by 'Don Giovanni,' 'Figaro,' 'Il Barbiere,' and 'Guillaume Tell.' A number of operatic pieces were produced in 1815, including additional music for Dr. Arne's 'Comus,' and for Michael Arne's 'Cymon.' Two of his well-known works, 'Guy Mannering' (of which Whittaker wrote a portion) and 'The Slave,' gave interest to the following year, in which also he wrote the musical interpolations in 'A Midsummer Night's Dream,' the first of a series of Shakespearian spoliations which, as G. A. Macfarren remarks, 'even the beauty of some of his introduced pieces has happily not preserved upon the stage.' In 1816 and 1817 he filled in addition to his post at Covent Garden that of director of the music at the King's Theatre, Haymarket. In 1825 Bishop accepted an engagement under Elliston, at Drury Lane, and the opera of 'The Fall of Algiers' was the first fruit of his new appointment. The engagement of Weber to write 'Oberon' for Covent Garden induced the rival management to set Bishop to work upon an opera that should oppose it; and, impressed with the magnitude of the competition, he occupied more than a year in the extremely careful composition of 'Aladdin,' which was produced in 1826, some weeks after Weber's opera. It had the misfortune of being allied to an even worse constructed drama than 'Oberon,' and it met with no success. In 1830 Bishop was appointed musical director at Vauxhall. In this capacity he wrote several operettas, and many songs, some of which, such as 'My pretty Jane,' acquired great popularity. In the season of 1840–41 he was engaged by Madame Vestris as musical director of Covent Garden, where he produced 'The Fortunate Isles,' to celebrate Queen Victoria's wedding. This was his last dramatic composition.

Apart from the stage a few other events of Bishop's life must be noticed. In 1819, in partnership with the proprietor of Covent Garden, he began the direction of the extraordinary performances, then miscalled Oratorios; and in the following season undertook the speculation on his own account, which he relinquished, however, before the beginning of another year. In July to Oct. 1820 he acted as maestro al piano at the Dublin Theatre, and received the freedom of that city by cordial and unanimous suffrage. In 1832 the Philharmonic Society commissioned him to write a work for their concerts, and the sacred cantata of 'The Seventh Day,' performed in 1833, was the result. It made no lasting impression. In 1839 he took his B.Mus. degree at Oxford, and his exercise was performed at a festival conducted by him. In Nov. 1841 he was elected to the musical professorship at Edinburgh, which he resigned in Dec. 1843. He was knighted in 1842, and on the death of Dr. Crotch was appointed in 1848 to the musical chair at Oxford. On the retirement of W. Knyvett in 1840, he was for three years occasionally, and in 1843 permanently, appointed conductor of the Ancient Concerts, which office he held until the discontinuance of the performances in 1848. His last composition of importance was the ode for the installation of the Earl of Derby as Chancellor of Oxford in 1853. On this occasion he received the degree of Doctor in Music, the ode being considered as his probational exercise. He was twice married—first, at St. Martin's-in-the-Fields, Apr. 30, 1809, to a Miss Sarah Lyon (*b.* July 4, 1787), a singer who appeared in his

'Circassian Bride,' and, second, to Ann Rivière. (See BISHOP, Ann.)

Besides his dramatic productions, and the 'Seventh Day,' Bishop composed an oratorio, 'The Fallen Angel,' which has never been performed; music for three tragedies, 'The Apostate,' 'Retribution,' and 'Mirandola'; and a 'Triumphal Ode,' performed at the Oratorios. He also arranged the 1st volume of 'Melodies of Various Nations'; 3 volumes of 'National Melodies,' to which Moore wrote the poetry; and a number of English melodies with Dr. Mackay's verses. He edited 'Messiah,' a large collection of Handel's songs, and many other works of importance.

He was buried in the Marylebone Cemetery, Finchley Road, where a monument to his memory was erected by subscription.

The following chronological list of his productions for the stage includes the works which he altered or adapted:

'Angelina,' 1804.
'Tamerlan et Bajazet,' 'Armide et Renaud,' 'Narcisse et les Grâces,' 'Love in a Tub,' 1806.
'Caractacus,' 'The Wife of Two Husbands,' 'The Mysterious Bride,' 'The Siege of St. Quentin,' 'The Corsair, or the Italian Nuptials,' 'The Travellers at Spa,' 1808.
'The Circassian Bride,' 'Mora's Love,' 'The Vintagers,' 1809.
'The Maniac,' 1810.
'The Knight of Snowdon,' 1811.
'The Virgin of the Sun,' 'The Æthiop,' 'The Lord of the Manor,' 'The Renegade,' 1812.
'Haroun al Raschid' (altered from 'The Æthiop,'), 'Poor Vulcan,' 'The Brazen Bust,' 'Harry le Roy,' 'The Miller and his Men,' and 'For England, Ho!' 1813.
'The Farmer's Wife,' 'The Wandering Boys,' 'Sadak and Kalastrade,' 'Lionel and Clarissa,' 'The Grande Alliance,' 'Aurora,' 'Doctor Sangrado,' 'Artaxerxes' (curtailed from 'Arne'), 'The Forest of Bondy,' 'The Maid of the Mill' (additions), and a compilation from Boieldieu's 'John of Paris,' 1814.
'Brother and Sister,' 'The Noble Outlaw,' 'Telemachus,' 'The Magpie or the Maid,' 'John du Bart,' 'Cymon' (additions), 'Comus' (additions), 1815.
'Midsummer Night's Dream,' 'Guy Mannering' (in which occurs the famous glee 'The Chough and Crow'), 'Who wants a Wife?' 'Exit by Mistake,' 'The Slave,' 'Royal Nuptials,' 1816.
'The Humorous Lieutenant,' 'The Heir of Vironi,' 'The Apostate,' 'The Libertine' (adapted from Don Giovanni), 'Teasing made Easy,' 'The Duke of Savoy,' 'The Father and his Children,' 1817.
'The Illustrious Traveller,' 'Fazio,' 'Zuma' (with Braham), 'The Devil's Bridge,' 'X Y Z,' 'The Burgomaster of Saardam, 'December and May,' 'The Barber of Seville' (adapted from Rossini), 1818.
'The Marriage of Figaro' (adapted from Mozart), 'Fortunatus and his Sons,' 'The Heart of Midlothian,' 'A Roland for an Oliver,' 'Swedish Patriotism,' 'The Gnome King,' 'The Comedy of Errors,' 1819.
'The Antiquary,' 'Henri Quatre,' 'Montoni,' 'Bothwell Brigg,' 'Twelfth Night,' 1820.
'Don John,' 'Henry IV.,' pt. ii., 'Two Gentlemen of Verona,' 1821.
'Montrose,' 'The Law of Java' (with the well-known 'Mynheer van Dunck'), 'Maid Marian,' 1822.
'The Vision of the Sun,' 'Clari' (with 'Home, Sweet Home'), 'The Beacon of Liberty,' 'Cortez,' 'The Vespers of Palermo,' 1823.
'Native Land,' 'Charles II.,' 'As You Like It,' 1824.
'The Fall of Algiers,' 'Masaniello' (from Auber), 'Tell' (from Rossini), 'Angelina' (rewritten), 'Faustus,' 'Coronation of Charles X.,' 1825.
'Aladdin,' 'The Knights of the Cross,' 1826.
'Yelva,' 1827.
'The Englishman in India,' 'Edward the Black Prince,' 'Don Pedro,' 'The Rencontre,' 1828.
'Home, Sweet Home,' 'The Night before the Wedding' (from Boieldieu), 1829.
'Ninetta,' 'Hofer' (from Rossini), 'Under the Oak,' 'Adelaide,' and music to 'Hamlet,' 1830.
'The Romance of a Day,' 1831.
'The Tyrolese Peasant,' 'The Election,' 'The Magic Fan,' 'The Sedan Chair,' 'The Bottle of Champagne,' 'The Demon' (from Meyerbeer), music to 'Kenilworth' and 'Waverley,' 1832.
'Manfred,' 1834.
'The Captain and the Colonel,' 1835.
'The Doom Kiss,' 1836.
'Rural Felicity,' additions to the 'Beggar's Opera,' music to 'Love's Labour's Lost,' 1839.
'The Fortunate Isles,' 1840.

BIBL.—RICHARD NORTHCOTT, *The Life of Sir Henry R. Bishop.* (Press Printers, Ltd., 1920.)
(*D.N.B.* An interesting article on Bishop's Glees, by G. A. Macfarren, is in *Mus. T.*, 1864, Ap., *et. seq.*)

BISHOP, JOHN (*b.* 1665; *d.* Winchester, Dec. 19, 1737), lay-clerk and organist, educated (according to Hawkins) under Daniel Roseingrave.

Between Michaelmas and Christmas, 1687, he was a lay-clerk of King's College, Cambridge, and in the following year was appointed to teach the choristers. In 1695 he succeeded Jeremiah Clarke as organist of Winchester College; he was afterwards appointed a lay-vicar of the Cathedral in place of T. Corfe, and in 1729 succeeded Vaughan Richardson as Cathedral organist. (Hawkins is wrong in calling him organist of Salisbury Cathedral.) He was buried in the cloisters of Winchester College Chapel. MSS. by him are contained in the collections of the British Museum, R.C.M., and Ch. Ch., Oxford. Philip Hayes's 'Harmonia Wiccamica' includes some of his compositions (*D.N.B.*). M.

BISHOP, JOHN (*b.* Cheltenham, July 31, 1817; *d.* there, Feb. 3, 1890), organist of various churches in and around his native town whose most public work was the score he made of Barnard's church music (see BARNARD), which is now in the British Museum.

BISHOP & SON, organ-builders in London. This factory was established about the end of the 18th century by James C. Bishop, and was known successively as Bishop, Son & Starr, Bishop, Starr & Richardson, Bishop & Starr, and now Bishop & Son. Besides many organs in England they have built those of the Cathedral and of the Town Hall, Bombay. They are the inventors of the Clarabella stop, the Anti-concussion Valves, and the Composition Pedals; but the last-mentioned invention is also claimed for FLIGHT (*q.v.*). V. de P.

BISPHAM, DAVID SCULL (*b.* Philadelphia, Jan. 5, 1857; *d.* New York, Oct. 2, 1921), American baritone singer. At first intended for business, he drifted into music. In 1886 he went to Milan and there studied with Vannuccini and Lamperti until 1889, when he went to London and became a pupil of Shakespeare, studying also elocution under Herman Vezin. His first appearance in London was in concert in 1890. His début in opera was made in Messager's 'La Basoche,' at the English Opera House, Nov. 3, 1891, where he won immediate favour by his artistic singing and humorous acting. In 1892 he made his first appearance in serious opera as Kurwenal, in 'Tristan und Isolde,' at Drury Lane, and sang not long afterwards at Covent Garden.

In the season of 1896–97 Bispham joined the company of the Metropolitan Opera House in New York. He appeared there and at Covent Garden in most of the leading baritone parts of Wagner's music dramas: the Dutchman, Wolfram, Telramund, Wotan, Alberich, Kurwenal, Beckmesser. Among his other

parts were Masetto, Pizarro, Escamillo, Alfio, Peter (in 'Hänsel und Gretel'), Iago, Falstaff and Urok (in Paderewski's 'Manru').

After 1902 Bispham devoted himself chiefly to song recitals and teaching. In 1898 he appeared in England and America in Hugo Müller's play 'Adelaide,' taking the part of Beethoven. Bispham was ardently devoted to the cause of using the English language in opera and song; and for many years delivered his song recitals only in English. In 1920 he published an autobiographical volume entitled *A Quaker Singer's Recollections.*

Bispham's voice was of fine power and quality, sometimes verging upon an excess of the nasal resonance. In opera he was a powerful delineator of character, when he was not carried too far towards theatricalism. In his autobiography he candidly avows that his Kurwenal and Beckmesser were generally recognised as the best of his time. R. A.

BITTER, Karl Hermann (*b.* Schwedt on the Oder, Feb. 27, 1813; *d.* Berlin, Sept. 12, 1885), author of works on Bach and other musical matters important in their day.

Having studied law and finance at the universities of Berlin and Bonn, he attained high official positions from 1846 onwards, at Frankfort, Minden, Posen, Schleswig and Düsseldorf, was appointed in 1877 Under-Secretary of State for the Interior, and in July 1879 was made Minister of Finance, which post he held until June 1882. During the war with France he had been Prefect of the department of the Vosges, and subsequently Civil Commissioner at Nancy.

His lively interest in music had many practical results — among other things the Schleswig-Holstein Festival of 1875 owed its existence chiefly to him; and his contributions to musical literature are of no small importance. The most valuable of these are the biographies of the Bachs—(1) *Johann Sebastian Bach,* in 2 vols. (1865)—2nd ed., revised, in 4 vols. (1881); (2) *Carl Philipp Emanuel Bach und Wilhelm Friedemann Bach und deren Brüder,* in 2 vols. (1868). Bitter's other literary works are:

Mozarts 'Don Juan' und Glucks 'Iphigenia in Tauris,' with new translations of the words of both operas (1866); *Über Gervinus Händel und Shakespeare* (1869); *Beiträge zur Geschichte des Oratoriums* (1872); *Eine Studie zum Stabat Mater* (1883); *Die Reform der Oper durch Gluck und R. Wagners Kunstwerk der Zukunft* (1884). To these must be added various contributions to periodical literature, the most recent of which (in the *Deutsche Revue* for Oct. 1885), *Gedanken über die Bildung eines Ministeriums der schönen Künste für Preussen* is remarkable. In 1870 Bitter edited Löwe's autobiography. His *Gesammelte Schriften* appeared in 1885.

A. D.

BITTNER, Julius (*b.* Vienna, Apr. 9, 1874), has made a name for himself as a composer of opera after pursuing a successful legal career in Vienna.

He studied with Josef Labor and Bruno Walter and produced many compositions, including chamber music, songs and 'Tänze aus Österreich' (piano, 2 and 4 hands), before the production of his first opera, 'Die rote Gret,' at Frankfort (1907). Qualities of accomplished musicianship and a strong dramatic sense relieved by a sense of humour have secured acceptance for a series of works produced in the theatres of the several German-speaking countries. The list includes the following:

'Die rote Gret.' (Frankfort, 1907.)
'Der Musikant.' (Vienna, 1910.)
'Der Bergsee.' (Vienna, 1911, revised 1922.)
'Das höllische Gold.' (Dresden, 1916.)
'Die Kohlheimerin.' (Vienna, 1921.)
'Das Rosengärtlein.' (Vienna, 1924.)

Lesser theatrical works include:

'Der Markt der Liebe,' a ballet. (Vienna, 1909.)
'Die unsterbliche Kanzlei,' a musical farce. (Vienna, 1918.)
'Der liebe Augustin,' a musical play (Schauspiel).
'Die Todestarantella,' a ballet. (Zürich, 1920.)

Bibl. — R. Specht, *Julius Bittner. eine Studie* (1921). (See *Riemann.*) C.

BIZET, Georges (properly Alexandre César Léopold) (*b.* Paris, Oct. 25, 1838; *d.* Bougival, near Paris, June 3, 1875), one of the most distinguished of French composers, was a highly successful pupil of the Conservatoire from 1849–57.

He studied the piano with Marmontel, the organ with Benoist, harmony with Zimmermann, and composition with Halévy, whose daughter Geneviève he married in 1869. In 1857 he divided with Lecocq the prize for an operetta. Bizet's first attempt at dramatic composition was 'La Prêtresse,' operetta in one act, performed at Baden-Baden 1854 (not published). 'Le Docteur Miracle,' given at the Bouffes Parisiens in April, 1857, won the first Prix de Rome in the same year. Among the works he sent from Rome were an opera, 'Don Procopio' (given at Monte Carlo, Mar. 10, 1906), which remained among some papers of Auber until 1895, a descriptive symphony with chorus, 'Vasco di Gama,' two symphonic movements, 'Marche funèbre et scherzo,' and an overture, 'La Chasse d'Ossian.' After his return to Paris it was a long time before his works gained general recognition, although opportunities were given for their performance. Neither 'Vasco di Gama' (1859) nor 'La Guzla de l'Emir' (1862), an opéra-comique in one act, was performed, but 'Les Pêcheurs de perles' (3 acts) and 'La Jolie Fille de Perth' (4 acts) were given at the Théâtre Lyrique, the former Sept. 29, 1863, and the latter Dec. 26, 1867. Neither of these, nor 'Djamileh' (1 act opéra-comique) (May 22, 1872) was thoroughly successful, and it was only after the whole world had been conquered by 'Carmen' that they enjoyed a certain amount of favour. 'Les Pêcheurs de perles' was given at Covent Garden, as 'Leila,' Apr. 22, 1887, and 'Djamileh' was given at Leipzig on Feb. 3, 1893, and at Covent Garden, June 13, 1893; part of the ballet music in 'La Jolie Fille de Perth' was used in 'Carmen,' and it is now permanently associated with that work. Bizet took part with Jonas, Legouix, and Delibes, in the composition (first

act) of the operetta 'Malbrough s'en va-t-en guerre,' produced at the Athénée, Dec. 13, 1867; but his first real success was with the overture to Sardou's 'Patrie' (1873), played at one of Pasdeloup's concerts (Feb. 15, 1874). His incidental music to Daudet's play 'L'Arlésienne' (Oct. 1, 1872) was very successful in itself (it was given in an English version, with Bizet's music, at the Prince of Wales's Theatre, in June 1887) and it has been still more so in the form of two orchestral suites. A concert suite, 'Roma,' was given under Pasdeloup's direction, Feb. 28, 1869 (Crystal Palace, Oct. 23, 1880), and a 'Petite Suite d'orchestre, Jeux d'enfants,' performed at the first Colonne concert (Odéon, Mar. 2, 1873), has long been popular wherever it is heard. Bizet also finished his father-in-law's (Halévy) operas, 'Noé' and 'Vanina d'Ornano,' and published various books of charming songs, which have only in comparatively recent times attained the popularity they deserve. Foremost among these is the wonderfully characteristic 'Les Adieux de l'hôtesse Arabe.'

Bizet was a remarkable pianist; his powers were recognised by Berlioz and Saint-Saëns; Liszt himself was astonished at his surety in playing and his facility in reading. He left piano compositions for 2 and 4 hands, and arranged quite a number of well-known compositions for the piano.

It remains to speak of Bizet's masterpiece, the 4 act opéra-comique, 'Carmen,' produced at the Opéra-Comique, Mar. 3, 1875; Prosper Mérimée's well-known story, even in the modified version of Meilhac and Halévy, was a little overbold for the polite tastes of the French public at that time, and the *brutalité* of the character was most prominently brought out by the original representative of the title-part, Mme. Galli-Marié. The opera attained 37 performances in the first 3 months, but only became a great success gradually, and it was after its introduction to England (in Italian, at Her Majesty's, June 22, 1878, with Mme. Minnie Hauck) that its real vogue began. If Bizet's intention was to soften down the animalism of the original, the treatment of the part preferred by Mme. Marie Roze, who sang it in English,[1] was in agreement with the idea of the composer.[2]

This modified interpretation was presented also by Mme. Trebelli, and later on by Mme. Patti, Mlle. Zélie de Lussan, and many others; the coarser and more sensual type of gipsy was to be seen in the representations of Mme. Pauline Lucca, Mlle. Belincioni in more recent days, and perhaps the greatest of all, Mme. Calvé. Historically the work in itself forms the end of a long tradition, that of the French opéra-comique, but enlarged, vivified, transformed in all its elements. The clearness and charm of the music is now universally admired. Formerly the style was reproached with not having enough of the gipsy characteristics, just as it was at first decried, with other works of Bizet, as following the Wagner theories too closely. Some of it may not be particularly Spanish or gipsy in style, but the feeling of the whole is so faithfully reflected in the music, and there is so unmistakable an 'atmosphere' of the south about it that its success is no matter of wonder. To what heights of dramatic power Bizet might have risen can only be guessed, for exactly 3 months after its production he died.

One of Bizet's chief characteristics was his love of what is known as 'local colour.' In the Oriental surroundings of two of his early operas he is at his happiest, and there it seems that as soon as he has finished such things as the invocation in 'Les Pêcheurs de perles,' the 'Ghazel' or the 'danse de l'almée' in 'Djamileh,' with their imitation of the rhythms and intervals of eastern music, he is somewhat at a loss for inspiration, and his music is that of the conventional French operatic school of his time. It is not so either in 'Carmen' or the 'Arlésienne' music, for both are suffused in the warm tones of the south, and these tones are not just confined to special numbers, such as the brilliant 'farandole' of the latter or the 'seguidilla' of the former. In orchestration Bizet was fond of trying experiments; some of these give 'Carmen' much of its distinction, for example, the use of the lowest notes of the harp, his treatment of the flute, and many other things, may be studied; and in one number of 'Djamileh' he introduced a pianoforte into his score, without much success. It is by 'Carmen' that he lives, and it is impossible not to be grateful for the amount of pleasure he has given by this fine and truly dramatic work to thousands of people in all parts of the world. M.; addns. M. L. P.

BLACK, Andrew (*b.* Glasgow, Jan. 15, 1859; *d.* Sidney, Australia, 1920), baritone singer, was in early days an organist, at the Anderston United Presbyterian church; after discovering that he possessed a fine baritone voice, he came to London, where he studied with Randegger and J. B. Welch, subsequently going to Milan to study with Domenico Scafati.

He was not long in winning fame as a singer

[1] It was, however, Selma Dolaro who sang the part of Carmen for the first performance in English of the Carl Rosa Co. (Her Majesty's, Feb. 5, 1879).

[2] It is by no means certain, however, that this was Bizet's idea. See *Revue musicale*, 1923, No. 6.

in Scotland, and at his London début, at the Crystal Palace on July 30, 1887, he was at once recognised as a most promising and accomplished artist. Among his early appearances there must be recorded his singing of the part of Lord Cranston in MacCunn's 'Lay of the Last Minstrel,' in the following February. He travelled in America, and made occasional appearances in opera there with success. It was at the Leeds Festival of 1892 that he definitely took a place in the first rank of concert-baritones; his principal performance was in the baritone part of Dvořák's 'Spectre's Bride.' The fame of his very dramatic interpretation of 'Elijah' had reached musicians before his appearance in that part at the Birmingham Festival of 1894; after that year he was more closely identified with it than any of the successors of Santley. Thenceforward he was in request for all the English Festivals and important concerts. He took the part of Judas in the first performance of Elgar's oratorio 'The Apostles' (Birmingham, 1903). In 1893 he became professor of singing at the Royal Manchester College of Music. (*Brit. Mus. Biog.*) M.

BLACK NOTATION, see NOTATION.

BLACKWELL, ISAAC (2nd half of 17th cent.), English musician, some of whose songs are in Playford's 'Choice Ayres' (1675). MSS. of his works are in Ely Cathedral, Cambridge, the Fitzwilliam Museum, etc. (See *Q.-L.*)

BLAES, (1) ARNOLD JOSEPH (*b.* Brussels, Dec. 1, 1814; *d.* there, Jan. 11, 1892), a great clarinet-player, pupil of Bachmann in the Conservatoire, where he obtained the 2nd prize in 1829 and the 1st in 1834.

He visited Holland, Germany and Russia, and in 1839 was awarded a medal for his performance before the Société des Concerts in Paris; he was solo clarinet to the King of the Belgians, and in 1842 succeeded Bachmann as professor in the Brussels Conservatoire.

(2) MME. ELISA, *née* MEERTI (*b.* Antwerp, *c.* 1820), a distinguished singer, and wife of the foregoing, was engaged by Mendelssohn to sing at the Gewandhaus concerts at Leipzig (Oct. 6, 1839), where her cultivated style, sympathetic voice and great personal gifts were long and highly appreciated. She was heard in most of the European capitals, and subsequently settled as a teacher in Brussels.

M. C. C.

BLAGROVE, (1) HENRY GAMBLE (*b.* Nottingham, Oct. 20, 1811; *d.* London, Dec. 15, 1872), violinist, son of a professor of music.

At 5 years old he performed in public. His father bringing him to London, he played in 1817 at Drury Lane Theatre in a performance called 'The Liliputians,' and subsequently played in public daily at the Exhibition Rooms in Spring Gardens. In 1821 he was placed under the tuition of Spagnoletti, and on the opening of the R.A.M. in 1823 he became one of its first pupils, Crotch and F. Cramer being his instructors. On the formation of Queen Adelaide's private band in 1830 Blagrove was appointed solo violinist, and continued so until 1837. In 1832 he went to Germany for the purpose of studying his instrument under Spohr, and remained there until Nov. 1834. After his return, he formed a permanent quartet party with H. Gattie, J. B. Dando and C. Lucas, and gave concerts in the Hanover Square Rooms, from 1836 onwards. He was leader of the State band at the coronation of Queen Victoria, and was also violin teacher to the Duke of Cambridge. In 1858 he again visited Germany, and a few years later played at the Lower Rhine Festival at Düsseldorf (*D.N.B.*).

W. H. H.

His brother, (2) RICHARD (*b.* Nottingham; *d.* there, Oct. 21, 1895), was for many years a viola player in great request in orchestral and chamber music; he was an ardent partisan of the concertina, and got from it effects that were unexpectedly artistic. M.

BLAHETKA, MARIE LEOPOLDINE (*b.* Guntramsdorf, Baden, Nov. 15, 1811; *d.* Boulogne, Jan. 12, 1887), an able performer on the piano and PHYSHARMONICA (*q.v.*); daughter of J. L. Blahetka and Babette Traeg.

At 5 years of age she was so good a player that by Beethoven's advice she was placed under Jos. Czerny for education as a musician. She afterwards had instruction from Kalkbrenner and Moscheles, and in composition from Sechter. In 1832 she published as op. 25 a concert-piece for piano and orchestra which deserves notice. In 1830 a romantic piece of hers, 'Die Räuber und die Sänger,' was produced at the Kärnthnerthor Theater, Vienna. A few years later she made another tour in France, and in 1840 settled in Boulogne. A few words in Schumann's *Gesammelte Schriften*, ii. 45, testify to her excellence as a player.

F. G.

BLAHOSLAV, JAN (*b.* Přerov, Moravia, 1528; *d.* Moravian Krumlov, 1571), a composer and distinguished writer, author of one of the earliest books on musical theory, *Musica: A Book which contains Information for the Use of Singers*, issued at Olomouc, 1558. A second issue (Ivančice) has a supplement entitled *Regule a naučeni potřeba Cantorum*, etc. (Rules and instructions for teachers and composers of songs), which deals chiefly with the laws of prosody. Blahoslav was one of the editors of the classic collection of songs and hymns of the Unity of the Bohemian Brethren, the Šamotulsky Cancional, 'Pisně Chval božskych' (Songs of Divine Praise), which, constantly corrected and repolished by him, passed through seven or eight editions between 1561–1618. The Cancionals of the Unity were completed by the collection of the great humanist

Commenius (Komensky) published in Amsterdam, 1659, the source of thematic material for more than one modern Czech composition.

Blahoslav studied at Wittenberg, Königsberg and Bâle before settling down to teach at Prostějov, where he helped to compile the history of the Unity. He contributed 49 songs to the Šamotulsky Cancional, several of which are still in popular use in Czechoslovakia.

R. N.

BLAINVILLE, Charles Henri de (*b.* near Tours, *c.* 1711; *d.* Paris, *c.* 1769), violoncellist and teacher of music. He is best known by his pretended discovery of a third mode which should hold the middle between major and minor, and which he called 'mode Hellénique,' but which was really equivalent to the Phrygian scale *e–e'*. He composed a symphony in this mode which J. J. Rousseau greatly admired, while Serre exposed its absurdity. This led to a heated controversy in the press and through pamphlets, in which Serre had the better of his opponents. Blainville published a *Harmonie théorético-pratique* (1746); *L'Esprit de l'art musical* (1754), of which J. A. Hiller published a German translation in 1767; *Histoire générale critique et philologique de la musique* (1767); and *Essai sur un troisième mode* (1751). He composed 6 (?) symphonies, 2 ballets, cantatas and 1 'livre de sonates pour le dessus de viole avec la basse continue.' E. v. d. S.

BLAKESMIT (Blakismet, Blacksmith), an English composer at the court of Henry II., 1154–89. Hawkins speaks of him as a singer, and he is mentioned also by Coussemaker, Cotton and Eitner. E. v. d. S.

BLAMONT, François Colin de (*b.* Versailles, Nov. 22, 1690; *d.* there, Feb. 14, 1760), was taught music by his father, Nicolas Colin, a member of the royal band. At 17 he was admitted to the service of the Duchess du Maine. His early cantata, 'Circé,' pleased Lalande so much that he consented to teach him, with the result that in 1719 he was made surintendant of the royal music, and subsequently ennobled, adding to his name that of Blamont and the title 'Chevalier.' He became 'Maître de la musique de la chambre' after Lalande's death, June 18, 1726. According to Beffara he was decorated with the Order of St. Michel, May 8, 1751. His works include:

'Les Festes grecques et romaines,' a ballet, produced in 1723; 'Le Retour des dieux sur la terre,' divertissement (for the marriage of Louis XV., 1725); 'Le Caprice d'Erato,' ballet-opera, in 1730; 'Endymion,' a pastorale-héroïque, in 1731; 'Les Caractères de l'amour,' a ballet-héroïque, in 1735 (with an additional act, 'Les Amours de printemps,' in 1739); as well as 3 books of 'cantates françaises à voix seule' (1723, 1729, 1732), a set of motets with orchestral accompaniment, in the style of Lalande, 1732, including a Te Deum, 'Jupiter vainqueur des Titans,' 1745, 'Les Fêtes de Thetys,' 1750.

His *Essai sur les goûts anciens et modernes de la musique française* (Paris, 1754), appeared at the time when the contest between French and Italian music was at its height. He upholds the traditional style of operatic writing, especially as regards the libretti, against the innovations of the more advanced school (*Q.-L.*). M.; addns. M. L. P.

BLANCHARD, Henri Louis (*b.* Bordeaux, Feb. 7, 1778; *d.* Paris, Dec. 18, 1858), studied the violin under Rodolphe Kreutzer, and composition under Beck, Méhul and Reicha.

From 1818–29 he was musical director at the Variétés, and composed a number of vaudeville airs which attained a popularity, and also trios and quartets for strings. These more solid works exhibit considerable talent. In 1830 he became director of the Théâtre Molière, where two of his plays were produced. A third had a great run at the Théâtre Français in 1831. His opera of 'Diane de Vernon' was produced at the Nouveautés, Apr. 4, 1831. As a musical critic Blanchard was able and impartial. He contributed articles to *L'Europe littéraire et musicale* (1833), *Le Foyer*, *Le Monde dramatique*, and *La Revue et Gazette*. His biographies of Beck, Berton, Cherubini, Garat and others, which originally appeared in these journals, have been published separately. M. C. C.

BLANCHE (Fr.), 'white,' is the ordinary French word for the note 𝅗𝅥 which we call a minim.

BLANCKENBURGH, see Blankenburg.

BLANCKS, Edward, an English church composer of the late 16th and early 17th centuries, who contributed to the Psalms in 4 parts (printed by Michael East, 1592) and also to Ravenscroft's Psalter (1621). He may be the same as the 'Mr. Blanke' whose 'Farewell' for 5 voices is in the Library of St. Michael's College, Tenbury (389/6). In these partbooks there are also an anthem, 'With wayling voice,' and a motet, 'Verbum caro factum est,' by the same composer. There are also parts of an Evening Service by Blanke preserved in the cathedral libraries at Durham and Peterhouse.

J. Mᴷ.

BLAND, John, a music-seller and publisher, established in or before 1779 at 45 High Holborn, where he remained until 1794, dying, or retiring, in that year.

He was commissioned in 1787 to go to Vienna for the purpose of inducing Haydn to visit England. In this mission he succeeded, and while in Vienna is said to have been the hero of the Razor quartet incident (see Haydn). When Haydn arrived in London, Jan. 1, 1791, he was for a short period a guest with Bland at his house in Holborn. Bland published many collections of catches and glees, and republished in volume and in sheet form most of Handel's compositions. Operas in the usual oblong shape and vast quantities of sheet music were also among Bland's publications. The historic place of business (which was at the corner of New Oxford Street) came, after Bland, into the hands of Lewis Houston and Hyde who, in 1796, were followed by Francis Linley, he in

turn giving place, before 1800, to William Hodsoll, who kept on the business for more than thirty years. In 1840, and for many years afterwards, the premises were occupied by Zenas T. Purday, a great publisher of sheet songs.

BLAND, Maria Theresa (*b.* 1769 ; *d.* Jan. 15, 1838), a singer, born of Italian Jewish parents named Romanzini, made her first appearance in public in 1773 at Hughes's Riding School, and at a more advanced age appeared as a singer on the opening of the Royal Circus (afterwards Surrey Theatre), Nov. 7, 1782, in a pantomime called ' Mandarina, or, The Refusal of Harlequin.'

She was very favourably received, and was next engaged at the Dublin Theatre, where she became an established favourite. On Oct. 24, 1786, she appeared at Drury Lane as Antonio in General Burgoyne's version of Grétry's ' Richard,' and remained attached to the Drury Lane company for nearly 40 years. On Oct. 21 1790, she was married to Bland, the brother of Mrs. Jordan, the celebrated actress. She sang at the Haymarket in 1791 in Arnold's ' Inkle and Yarico,' and for many years at Vauxhall, where her popularity was unbounded. She excelled as a ballad singer. She retired from public life in 1824, taking a benefit at Drury Lane, July 5. Her last public appearance took place at White Conduit House in July 1826. See W. Wroth's *Pleasure Garden*. Mrs. Bland had two sons, both singers.

(1) Charles, a tenor, appeared at Covent Garden as Oberon in Weber's opera, on its production, Apr. 12, 1826. His success, however, was but moderate. He subsequently appeared in the provinces, and in 1831 was singing at the Manchester Theatre. He then returned to London, and in 1831–32 appeared at the Olympic, and in 1833 and 1834 at Astley's.

(2) James (*b.* 1798 ; *d.* London, July 17, 1861), a bass, appeared in 1826 at the English Opera House (Lyceum) in Winter's ' Oracle.' He was afterwards engaged at Drury Lane. In 1831 he appeared at the Olympic as an actor and singer in burlesque with such success that he gradually abandoned serious singing and became the acknowledged representative of the kings and fathers in the extravaganzas of Planché and others. He died suddenly at the Strand Theatre. W. H. H., with addns.

BLAND & WELLER. This firm, which carried on business at 23 Oxford Street, must not be confounded with that of John Bland. It was founded by Anne Bland before 1790, who in 1793 went into partnership with Weller. About 1818–19, owing to the death or retirement of Bland, a sale of plates and copyrights took place, and the business was carried on for a few years as Weller & Co. F. K.

BLANGINI, Giuseppe Marco Maria Felice (*b.* Turin, Nov. 18, 1781 ; *d.* Paris, Dec. 18, 1841), a celebrated tenor-singer, teacher of singing and composer. At the age of 9 he was admitted into the choristers' school of Turin Cathedral. He made rapid progress in music under the Abbate Ottani, a pupil of Padre Martini. In 1799 Blangini went to Paris, where he soon became fashionable as a composer of songs and teacher of singing. In 1802 he was commissioned to complete Della Maria's unfinished opera ' La Fausse Duègne,' which was followed in 1803 by ' Chimère et réalité,' both for the Théâtre Feydeau, and in 1806 by ' Nephtali ou les Ammonites,' for the Grand Opéra. In 1805 he was called to Munich, where he produced ' Encore un tour de Caliphe,' and composed ' Inez de Castro,' and ' Les Fêtes lacédémoniennes,' which were not performed. In 1806 Napoleon's sister, Princess Borghese, appointed him her maître de chapelle, and in 1809 King Jerome made him his General Musikdirector at Cassel. In 1811 Blangini produced at Cassel ' Le Sacrifice d'Abraham,' and ' L'Amour philosophe,' and at the Feydeau in Paris, ' Les Femmes vengées.' In 1814 he returned to Paris, became professor of singing at the Conservatoire (Apr. 1, 1816), and in 1817 was called to the post of ' Surintendant de la chapelle du roi.' The whole fashionable world, particularly the Faubourg St. Germain, thronged to him for lessons. He drew up a list of his pupils, which includes 3 queens, 12 princesses, 25 countesses, etc. Blangini was an indefatigable composer of operas, though none of much interest were performed in Paris before ' La Marquise de Brinvilliers ' (1831), in which Cherubini and Carafa worked with him. His 174 ' Romances,' in 34 numbers, were the delight of a generation. His friend Maxime de Villemarest published his autobiography under the title *Souvenirs de Blangini, maître de chapelle du Roi de Bavière*, etc. (Paris, 1834). See also H. Radiquer, ' France 18e, 19e siècles,' *Encyclopédie de la Musique et Dictionnaire du Conservatoire.*

F. G. ; addns. M. L. P.

BLANKENBURG (Blanckenburgh), van (*b.* Gouda, 1654 ; *d.* after 1739) (there is good reason to suppose that Gerbrandt and Gideon van Blanckenburgh, and Quirijn van Blankenburg, are all the same person), studied mathematics at Leyden from 1680, was organist at Gouda in 1684, at the Hague in 1687, and at the New Church there in 1731.

He was the author of a work of historical importance, *Onderwyzinge hoemen alle de Toonen en halve Toonen, die meest gebruyckelyck zyn, op de Handt-Fluytzal konnen t'eenemal zuyverblaezen* (Amsterdam, P. Matthysz, 1684), a reprint of which was published at Amsterdam in 1871 ; and of a *Clavecimbel en Orgelboek der Psalmen en Kerkzangen* (1732 ; 3rd ed. 1772). In honour of the betrothal of the Prince of Orange he composed a collection of pieces in 2 parts (' De verdubbelde harmony,' 1733), which might be performed either upright or upside

down, forwards or backwards. His *Elementa musica* (1739) has some value as a theoretical work (*Q.-L.*). F. G.

BLARAMBERG, Paul Ivanovich (*b.* Orenburg, Sept. 26, 1841; *d.* Feb. 28, 1907), composer, was educated at the Alexandrovsky School in St. Petersburg, and entered the Government service. He retired in 1870 and edited, for a time, the Russian *Times*. In his early days Blaramberg wrote incidental music to Ostrovsky's play, *The Voyevoda*, and a cantata on Lermontov's poem, *The Demon*, from which the Tatar Dances were very popular. The decisive moment of his musical career was his meeting with Balakirev. After studying with him for a short period, he made a more ambitious effort: the opera, 'Mary of Burgundy,' to a libretto taken from a play by Victor Hugo. Completed in 1878, it was not performed until ten years later at Moscow. In 1881 Blaramberg wrote a national comic opera, 'The Mummers'; in 1887 a 1-act opera, 'The Roussalka Maiden,' and in 1891 another national opera, the subject taken from Ostrovsky's play, 'Tushino'. Blaramberg's style was first influenced by Meyerbeer and later by Wagner. His melody was pleasing but somewhat vapid; his technique, especially as regards harmony, was decidedly weak. The last act of 'Mary of Burgundy' proved him to possess considerable dramatic instinct. His facile, cosmopolitan style was not well adapted to the realistic national subjects he drew from the works of Ostrovsky. Besides these operas, Blaramberg composed:

Fantasia for solo, female chorus, and orchestra, 'The Dragon-Flies' (1879); a musical sketch, 'On the Volga,' for male chorus and orchestra; a symphonic poem, 'The Dying Gladiator'; a scherzo for orchestra; a symphony in B minor (1886); several folk-songs arranged for chorus *a cappella*, and a number of songs.

R. N.

BLAS DE CASTRO, Juan (*b.* Aragon *c.* 1560; *d.* Madrid, Aug. 6, 1631), Spanish composer of secular vocal music, and friend of the great dramatist Lope de Vega. From the *Elogio en la muerte de Juan Blas de Castro* (1637) it seems that about 1594 the composer was Músico Privado to the Duke of Alba at Salamanca. He appears in Lope's *Arcadia* in the character of Brasildo, *un excelente pastor en el arte de música*, playing upon the viol and singing. In 1605 he was musician and usher to Philip III. A stanza in the *Elegy* gives the information that for the last twenty years of his life he was blind. In 1621, however, he still held the post of usher to the King, and in 1622 his name occurs as recommended for the post of Scrivener in the royal Rent-office at Avila. Lope de Vega mentions Blas de Castro in many other poems and plays, *e.g. El peregrino en su patria* (1604)—the 'Pilgrim in his own country,' a pilgrim whose chief interests were mystery-plays and music—along with Cotes, Alonso Lobo, Palomares, and other contemporary musicians. He also appears in the *Jerusalén Conquistada* (1609), in *La Filomena* (1621; in the Epistle entitled *The Garden of Lope de Vega*), in the semi-autobiographical *Dorotea*, and in the plays, *El Caballero de Illescas*, *La Bella mal maridada*, and *El Acero de Madrid*. Tirso de Molina, author of the original play on Don Juan, also mentions the composer in *Los Cigarrales de Toledo*.

On the death of Blas de Castro, Philip IV. ordered that copies of all his works should be deposited in the Royal Library as models to future generations of composers; the MSS. were destroyed, however, in the fire of 1734. Twenty of his compositions (for 3 and 4 v.) are in the 'Cancionero de Sablonara' (Munich and Madrid) reprinted by D. Jesús Aroca (Madrid, 1916). They have generally the appearance of being songs sung in plays, but only one has been identified. (See Mitjana, *Rev. de Filología española*, *VI.* (1919), i. 3.) J. B. T.

BLASINSTRUMENTE, see Wind Instruments.

BLASIUS, Matthieu Frédéric (*b.* Lauterburg, Alsace, Apr. 23, 1758; *d.* Versailles, 1829), studied violin, clarinet and bassoon. He was director of the Republican Guard, later on conductor at the Opéra Comique and professor for wind instruments at the Paris Conservatoire. He was pensioned in 1816 and retired to Versailles. He wrote a good deal for military bands; also two operas, concertos for violin as well as for various wind instruments, string quartets, duets and trios, mostly for wind instruments, violin sonatas and sonatinas; also a 'Nouvelle Méthode pour la clarinette' (1796). One of the violin sonatas has been republished in Alard's 'Maîtres classiques.' E. v. d. S.

BLAUVELT, Lillian (*b.* Brooklyn, N.Y., Mar. 16, 1873), an American soprano. She studied the violin in her childhood; at the age of fifteen she began vocal study with Jacques Bouhy, in New York, and followed him to France for further instruction. Her first public appearance was in France; her début in opera was made in Brussels in 1891, in Gounod's 'Mireille,' and was followed by appearances as Juliet, Marguérite, Mignon, etc. On her return to America she sang often in concerts. In 1898 she went to Italy and appeared in Rome (in Verdi's Requiem), in Munich and in London. In that year she married William H. Pendleton. She sang thereafter in England and America, and appeared in opera at Covent Garden in 1903.

Her voice was an unusually clear and brilliant soprano, excellent in its finish in coloratura passages. R. A.

BLAUWAERT, Emil (*b.* St. Nikolaas, Belgium, June 13, 1845; *d.* Brussels, Feb. 2, 1891); a famous basso cantante, a pupil of the Brussels Conservatoire under Goossens and Warnots.

His début took place in 1865 in the principal part of Benoît's 'Lucifer,' with which he was identified for many years, singing it in Paris in 1883, and in London, Apr. 3, 1889. From 1874 onwards he was a successful teacher in the music-schools of Bruges, Antwerp and Mons; and in 1889 he attained the height of his reputation by his fine impersonation of Gurnemanz at Bayreuth, a performance which from the merely vocal point of view surpassed all other interpretations. M.

BLAVET, Michel (*b.* Besançon, Mar. 13, 1700; *d.* Paris, Oct. 28, 1768), flute *virtuoso* and composer, was successively in the service of the Duke de Lewis at Paris, Crown Prince Frederic of Prussia and Count de Clermont at Paris. He composed one of the first French opéras-comiques, as well as other operas, ballets, several books of flute sonatas, duet sonatas for 2 flutes or violins and 2 books of airs for flute or violin. He was also a good bassoon player. E. v. d. S.

BLAZE, François Henri Joseph, calling himself Castil-Blaze (*b.* Cavaillon, Dec. 1, 1784; *d.* Dec. 11, 1857), one of the most prolific writers on music and the drama whom France has produced.

His father (1763–1833), a lawyer by profession, was a good musician, friend of Grétry and Méhul, and composer of masses, operas and chamber music. Blaze was sent to Paris in 1799 to study the law, but became a pupil at the Conservatoire, and took private lessons in harmony. He obtained the position of sous-préfet in the Department of Vaucluse, and other appointments. In 1820 he threw up his post and set out with his family for the metropolis, chiefly with a view to publishing a book compiled during his leisure hours. It appeared in 1820, in two volumes, with the title *De l'opéra en France*, and is the work on which his claims to remembrance are chiefly founded. The first volume contains an elaborate though popular treatment of the various elements of music, including hints as to the choice of libretti, and the peculiarities of verse and diction best adapted for musical treatment. The second volume is devoted to the opera proper, describing at considerable length its various component parts, the overture, recitative, aria, ensemble, etc.

He attacks the various uses and abuses of theatrical managers, the arrogance of ignorant critics, and the miserable translations supplied by literary hacks for the masterpieces of foreign composers. On the latter point he was entitled to speak, having himself reproduced more or less felicitously the libretti of numerous Italian and German operas. Amongst these we may mention 'Figaro,' 'Don Juan,' and 'Zauberflöte'; 'Il Barbiere,' 'Gazza Ladra,' 'Otello,' 'Anna Bolena'; 'Der Freischütz,' 'Oberon,' 'Euryanthe'; and many others. Unfortunately Blaze frequently made bold to meddle with the scores, and even to introduce surreptitiously pieces of his own composition into the works of great masters. Amongst his romances 'King René' was deservedly popular. He wrote several pieces of sacred and chamber music, one serious and two comic operas, none of which was successful to any considerable extent. More valuable is a collection of songs of southern France called 'Chants de Provence.'

Other literary works by Blaze are:

Dictionnaire de Musique moderne (1821); *Biographie vlämischer Musiker* (1828); *Chapelle musique des Rois de France* (1832); *La Danse et les ballets depuis Bacchus jusqu'à Mademoiselle Taglioni* (1832); *Molière musicien* (1852); and a work in 3 vols. on the *Théâtres lyriques de Paris* (1847–56).

For 10 years previously to 1832 Blaze was musical critic of the *Journal des Débats*. He also wrote numerous articles for the *Constitutionnel*, the *Revue et Gazette musicale*, *Le Ménestrel*, etc., partly republished in book form. F. H.

BLAZE DE BURY, Baron Henri (*b.* Avignon, May 1813; *d.* Paris, Mar. 15, 1888), son of the foregoing, was first intended for the diplomatic service, and, while an attaché, was ennobled. In literary skill he surpassed his father; in musical knowledge he was decidedly his inferior. Amongst his works on music, which alone concern us here, the most remarkable are:

La Vie de Rossini (1854); *Musiciens contemporains*—short essays on leading musicians, such as Weber, Mendelssohn, Verdi and many others (1856); and *Meyerbeer et son temps* (1865). All these are reprints of articles contributed to the *Revue des deux mondes* and other periodicals.

Blaze de Bury wrote a comedy called 'La jeunesse de Goethe,' for which Meyerbeer supplied the incidental music. The score, unpublished when Meyerbeer died, was to remain so, along with other MSS., till 30 years after his decease, in accordance with his own arrangement. In 1868 Blaze de Bury attempted to set aside the portion of the will referring to the MS. in question, but the action brought against the family was unsuccessful. F. H.

BLECH, Leo (*b.* Aix-la-Chapelle, Apr. 21, 1871), pupil of Bargiel and Rudorff at Berlin. From 1892–98 he was conductor at the theatre, Aix-la-Chapelle, during which time he continued his studies, for four years, through the summer months under Humperdinck, and produced his first operas, 'Aglaja' and 'Cherubina.' In 1899 he went to Prague as first Kapellmeister of the German Landestheater; in 1906 he became Kapellmeister of the Berlin Opera; and in 1913 General-musikdirektor. He has written a number of operas, of which his 1-act comic opera, 'Das war ich,' met with great success in many towns. He composed also 3 symphonic poems, choral works with orchestra, songs and pianoforte pieces. E. v. d. S.

BLECHINSTRUMENTE (Ger.); Brass Instruments. See Wind Instruments.

BLEWITT, (1) Jonas (*d.* London, 1805), a

celebrated organist in the latter half of the 18th century, author of *A Complete Treatise on the Organ, with Explanatory Voluntaries*; 'Ten Voluntaries, or Pieces for the Organ,' etc.; 'Twelve Easy and Familiar Movements for the Organ,' etc. About 1795 he was organist of the united parishes of St. Margaret Pattens and St. Gabriel Fenchurch, also of St. Catherine Coleman, Fenchurch Street.

His son, (2) JONATHAN (*b.* London, *c.* 1780; *d.* there, Sept. 4, 1853), held various organistships in England till in 1811 he took up his abode in Ireland, as private organist to Lord Cahir. He was organist of St. Andrew's Church, Dublin, and composer and director of the music to the Theatre Royal in that city, succeeding Tom Cooke in the latter post in June 1813. In the same year the Duke of Leinster appointed him grand organist to the Masonic body of Ireland, and he became the conductor of the principal concerts in Dublin. He joined LOGIER (*q.v.*) in his system of musical instruction in Ireland, and soon procured the great majority of teaching in Dublin. In 1825 Blewitt was again in London, and wrote the music for a pantomime, 'The Man in the Moon; or, Harlequin Dog Star,' produced at Drury Lane with great success. In 1828 and 1829 he was director of the music at Sadler's Wells, and wrote several clever works:

'The Talisman of the Elements,' 'Auld Robin Gray,' 'My Old Woman' (adapted from Fétis), etc. He was also the composer of the operas of 'The Corsair,' 'The Magician,' 'The Island of Saints,' 'Rory O'More,' 'Mischief Making,' etc., and of a number of ballads, particularly in the Irish style, which enjoyed considerable popularity.

In his latter years he was connected with the Tivoli Gardens, Margate. In 1849 he revisited Ireland, as a pianist, with Templeton (*D.N.B.*).

E. F. R. and W. H. G. F.

BLEYLE, KARL (*b.* Feldkirch, Vorarlberg, May 7, 1880), studied first privately under Hugo Wehrle and S. de Lange; then at the conservatoire at Stuttgart (1897–99) under E. Singer and de Lange. From 1904–7 he studied at the Munich Conservatoire under Thuille, and later settled at Munich. His compositions consist chiefly of choral and orchestral works, a violin concerto and pianoforte pieces. E. v. d. S.

BLISS, ARTHUR (*b.* London, Aug. 2, 1891), composer, was educated at Rugby and at Pembroke College, Cambridge, taking his B.A. and Mus. Bac. in 1913. In the spring of 1914 he attended the R.C.M. for a term, during which he had a few lessons in composition from Stanford, besides valuable help from Vaughan Williams and Holst. Then war broke out. He obtained a commission, served in France with the 13th Battalion, Royal Fusiliers, then with the 1st Battalion, Grenadier Guards, was wounded on the Somme in 1916, gassed at Cambrai in 1918, and mentioned in despatches. Two of his early works, a string quartet in A major and a piano quartet in A minor, were performed whilst he was on active service, one of them being awarded a prize at the War Emergency Concerts. Both were also published, but on his return to musical life he destroyed the plates and the unsold copies, though the works are still to be found in some circulating libraries. During 1919 some incidental music which he had arranged from Elizabethan sources for 'As you like it' was performed at Stratford-on-Avon. In the autumn of that year he gave a series of Sunday concerts at the Lyric Theatre, Hammersmith, where he also conducted Pergolese's 'La Serva padrona.' About this time he wrote a piano quintet, somewhat influenced by contact with French musicians during a visit to Paris, and a rhapsody for two pianofortes and woodwind. Only the former has been performed (Aeolian Hall, Apr. 1920) and neither work is at present included in the official list of his compositions. This opens with 'Madam Noy,' a 'Witchery' song for soprano with flute, clarinet, bassoon, viola, harp and bass, composed in 1918 and first sung by Anne Thursfield in June 1920. Bliss regards this as the starting-point of his career as a composer, all preceding works being immature. Then followed a rhapsody for soprano, tenor, flute, cor anglais, string quartet and bass, the two voices vocalising on 'Ah' throughout, and being placed as instruments in the ensemble. This work was composed in 1919, and first performed in October 1920. It has been published by the Carnegie Trust and was performed at Salzburg by the International Society for Contemporary Music, in 1923. Next came 'Rout,' also composed in 1919, first performed in December 1920, and subsequently at Salzburg in 1922 during the preliminary meetings at which the International Society was founded. 'Rout' is for soprano with ten instruments, the text consisting of meaningless syllables chosen for their phonetic effect. Thus, by the close of 1920, Bliss had acquired a considerable reputation by means of three works of marked originality. He avows an inclination to experiment in untrodden ways of sonority and has employed many novel blends of timbre. His music reflects a breezy personality of refreshing vigour and vitality. It has revealed at various times influences whose number and variety make for safety. Chief among them may be mentioned those of Ravel followed by Stravinsky, and, less conspicuously, of 'les Six.' Later landmarks of his development are the 'Conversations,' the incidental music for Viola Tree's production of 'The Tempest' in 1921, the 'Mêlée fantasque' in memory of Lovat Fraser the same year, and the 'Colour Symphony' in four movements (purple, red, blue, green) composed for the Gloucester Festival, of 1922. In the spring of 1923 he left England to settle at Santa Barbara in California. Since his departure he has

composed a string quartet, several songs, including a cycle, 'The Women of Yueh,' with accompaniment for chamber orchestra, and some piano pieces. He is reported to be engaged upon 'Battle Variations' for orchestra and 'Inventions' for piano solo. E. E.

'Madam Noy' (E.H.W.M.). Song for soprano and six instruments (flute, clarinet, bassoon, viola, harp and bass). 1918.
Rhapsody for soprano and tenor voices, flute, cor anglais, string quartet and bass (Carnegie Trust). 1919.
'Rout' for soprano and chamber orchestra (flute, clarinet, harp, string quartet, bass, glockenspiel and side-drum), afterwards full orchestra. 1919.
'Conversations' for violin, viola, v'cl., flute (also bass flute) and oboe (also cor anglais). (5 numbers.) 1919.
Concerto, originally for piano and tenor voice accompanied by strings and percussion. Withdrawn in this form and being rewritten for two pianos and full orchestra. 1920.
Two studies for orchestra. 1920.
Incidental music to Shakespeare's 'The Tempest,' for tenor and bass voices, trumpet, trombone, four timpani, side-drum, tenor-drum, bass-drum, gong and pianoforte. 1921.
Mêlée fantasque for orchestra. 1921.
Two Nursery Rhymes (Frances Cornford) for soprano voice: (1) The Ragwort, with clarinet and piano; (2) The Dandelion, with clarinet. 1921.
Three Romantic Songs (Walter de la Mare). 1922.
A Colour Symphony for orchestra. 1922.
'Bliss,' one-step for piano. 1923.
The Ballads of the Four Seasons, song cycle (Li-Po). 1923.
Three Songs (W. H. Davies). 1923.
Song, 'Three Jolly Gentlemen' (Walter de la Mare). 1923.
The Women of Yueh, song cycle. (Translated from the Chinese by Shigeyoshi Obata), with accompaniment for flute, oboe, clarinet, bassoon, string quartet, bass, glockenspiel, triangle and side-drum. 1923.
String Quartet. 1923–24.
'Masks,' for piano solo. 1924.
Arrangements from Elizabethan music and from Purcell.
Incidental music to two plays.
Two Interludes, pianoforte. 1925.
Toccata, pianoforte. 1925.
Suite, pianoforte. 1925.
'Battle Variations' for orchestra; 'Inventions,' for piano solo.
'Hymn to Apollo,' orchestra. 1926.

BLITHEMAN, William (*d.* Whitsunday, 1591), English organist and composer of church music. In 1564 he was master of the choristers at Christ Church, Oxford, and took his B.Mus. at Cambridge in 1586. He was the instructor of John Bull, as is testified by the quotation below from Wood's *Fasti Oxon.*:

'This person (John Bull) who had a most prodigious hand on the Organ . . . was trained under an excellent master, Blitheman, organist to Queen Elizabeth.'

The following extracts from an epitaph once above his burial-place in St. Nicholas Olave's Church, Queenhithe, confirm this and give other details of his biography:

'Here Blitheman lies a worthy wight
. . . . . .
Of princes chapell gentilman
Unto his dying day.
Whom all took great delight to heare
Him on the organs play,
Whose passing skill in musicke's art
A scholar left behind
John Bull (by name) his master's veine
Expressing in each kind.'
(See Stow, *Survey Book*, iii. 211.)

Actually he became organist of the Chapel Royal in 1585. Bull was joint organist with him from 1588–91, and succeeded him at his death (West's *Cath. Org.*). Blitheman contributed an In Nomine to the 'Fitzwilliam Virginal Book.' Two 4-part motets 'In pace si dedero' and 'Gloria, laus et honor,' are in B.M. Add. MSS. 17,802-5 (the former is also in B.M. Add. MSS. 29,382-5). Another MS. (B.M. Add. MSS. 30,513), usually referred to as the Mulliner Book, contains the organ score of the following motets by Blitheman;

'Christe qui lux,' motet 'sine nomine,' 'An excellente meane,' 'Eterne rerum Conditor' (4 settings), T.D., 'Gloria tibi' (6 settings).

The 'meane' is printed in the appendix to Hawkins's *History*. J. M[K].

BLOCH, Ernest (*b.* Geneva, July 24, 1880), composer, had his first musical instruction from Jaques-Dalcroze. Already in 1895 he composed a string quartet and an 'Oriental Symphony.' Two years later he was sent to Brussels, where he continued his studies under Ysaÿe and Rasse at the Conservatoire. To this period belong a number of songs and pieces for piano and for violin; also an 'Orientale' for orchestra, a violin concerto, and a sonata for violoncello and piano.

In 1900 Bloch went to the Hoch Conservatoire at Frankfort on/M., where Iwan Knorr was his professor of composition, and the same year he wrote the symphonic poems 'Vivre-Aimer.' A symphony in C sharp minor was composed between 1901–02. After a year's study under Ludwig Thuille in Munich, Bloch went to live in Paris. Here his first published work, the four 'Historiettes au crépuscule' for voice and piano, appeared in 1903. About this time he began the composition of a lyric drama, 'Macbeth,' to a libretto based on Shakespeare by Edmond Fleg, but this was interrupted by the symphonic poems, 'Hiver-Printemps,' in 1905, and the four songs with piano or orchestra, 'Poèmes d'automne,' in 1906.

In 1909, the year which saw the completion of 'Macbeth,' Bloch was appointed to conduct the subscription concerts at Lausanne and Neuchâtel, engagements which were renewed the following year. 'Macbeth' was produced at the Opéra-Comique in Paris on Nov. 30, 1910. In 1912 two Psalms (137 and 114) for soprano and orchestra were composed, and in 1913 followed the 'Trois Poèmes juifs' for orchestra, written at Satigny near Geneva, and dedicated to the memory of the composer's father. Another Psalm (22), for baritone and orchestra, was completed in 1914.

In 1915 Bloch was appointed professor at the Geneva Conservatoire, where he lectured on the æsthetics of music. His activities there were interrupted the next year by his visit to America as conductor for Miss Maud Allen during her tour in the U.S.A. There he was invited by Muck to conduct his 'Trois Poèmes juifs' with the Boston Symphony Orchestra. In 1917 Bloch settled in New York. The 'Friends of Music' organised a concert devoted to his work, conducted by Artur Bodanzky and himself, and from that time onward he has frequently directed performances of his orchestral works in various important American cities.

Among the works begun in 1918 are a second opera, 'Jézabel,' and the suite for viola and piano. The latter was finished in 1919, when it won the Coolidge Prize, and about the same

time it was performed in an orchestral version by the National Symphony Orchestra.

A sonata for violin and piano is the most important work of 1920, in which year Bloch was appointed director of the Cleveland Institute of Music.

Even the early works of Bloch show no traces of strong outside influence. This must be ascribed to the fact that from the first he instinctively expressed himself in a peculiarly Jewish idiom such as no composer of his race had previously articulated with anything like the same instinctive power and inevitability. It was reserved for him to find a modern musical medium that conveys something akin to the poetry and passion, the turbulent sorrow and noble exaltation of Judaism as it is transmitted by the Old Testament, and still survives in its strongest modern representatives.

Already in Bloch's earliest works, as their titles suggest, this racial impulsion found an outlet, but it was at first mistaken by the composer himself as an unlocated Oriental trait, no doubt because a specific Jewish idiom was then all but unknown to modern music. It was in the Psalms (1912), and in the 'Trois Poèmes juifs' (1913), that he gave for the first time conscious and complete musical utterance to his Hebraic spiritual inheritance.

It is important to know that Bloch's music has no merely superficial Jewish character, imparted to it by adoption of Hebrew songs and other ready-made material, which he uses, in fact, only in rare cases. He regards the authenticity of the greater part of traditional Hebrew music as doubtful, and is aware that much of it was borrowed from other nations. His work is Jewish simply because his artistic nature happens to have fitted him to give expression to the racial currents that flow in his veins. He does so in a language that is his own, and thus his music reflects as much his individuality as his race. Many of his works, especially among those for chamber music combinations, though not distinctly Jewish, are no less strongly personal than 'Schelomo' or 'Israel.'

Bloch's harmony is subject to no restrictive system. Equally free is the rhythmic element of his music. He changes his time signatures very freely, and is fond of interpolating cadenza-like passages which, although barred for practical purposes, are devoid of metrical accents. Characteristic specimens of such free episodes, with explanatory footnotes, are to be found in the 'Trois Poèmes juifs' and in the later string quartet. As regards form, Bloch is rhapsodic rather than symphonic; he is inclined to let fully-developed melodic formations, logically strung together, take the place of gradual thematic evolution. His orchestration is laden with combinations of colour which match his subject-matter in glowing intensity and originality. E. B.

The following is a summary of Bloch's more important works:

OPERAS

Macbeth (produced Opéra-Comique, Paris, 1910).
Jézabel (begun 1918).

ORCHESTRAL

Symphonic Poems, 'Vivre-Aimer.' (1900.)
Symphony, C sharp minor. (1901–02.)
Symphonic Poems, 'Hiver-Printemps.' (1905.)
'Trois Poèmes juifs.' (1913.)
Rhapsody, 'Schelomo' (v'cl. with orch.). (1915.)
Symphony, 'Israel' (with voices). (1912–15.)
Symphony, 'La Montagne.'
Exotic Poem.

CHAMBER MUSIC

String quartet, B min. (1915.)
Suite, vla. and PF. (1919.)
Sonata, vln. and PF. (1920.)
Poem, 'Night,' for string quartet.
Quintet, PF. and strings. (1923.)
'Three Landscapes,' for string quartet.
Poem for PF., 'Jeremiah.'

VOICE AND PIANOFORTE

Four 'Historiettes au crépuscule.' (1903.)
Four Poèmes d'automne (also orch.). (1906.)
Three Psalms (cxxxvii., cxiv., xxii.) (also orch.). (1912–14.)

BLOCKX, Jan (*b.* Antwerp, Jan. 25, 1851; *d.* there, May 26, 1912), a very distinguished Belgian composer, was at first a choir boy, and a pupil of the Antwerp school of music, gaining great popularity as a composer in his native city at a very early age, with his numerous Flemish songs, various pieces of chamber music, and cantatas.

After completing his education at the Leipzig Conservatorium, he settled in Antwerp, where in 1886 he became a teacher at the Conservatorium, and director of the 'Cercle Artistique,' being appointed in 1902 to succeed Benoît, the pioneer of the Flemish national movement in Belgium, as director of the Antwerp Conservatorium. Blockx's choice of Flemish texts, both in the large cantatas (named below) for soli, choir and orchestra, and in several of his operas, shows him to have been a disciple of the national principles which Benoît propagated. His wider fame dated from the production of his ballet 'Milenka' at the Théâtre de la Monnaie at Brussels in 1886, repeated at Antwerp; this was followed by 'Maître Martin' (Opéra-Comique, Brussels, 1892); and 'Princesse d'Auberge' ('Herbergprinses') (lyric drama in three acts, Antwerp, 1896, in Flemish, and in French at Brussels, Ghent, Bordeaux, etc.). The great success of this was confirmed in 'Thiel Uylenspiegel' (Brussels, 1900), and still more in 'La Fiancée de la Mer' ('Der Bruid der Zee') (Antwerp, Brussels, 1902; Rouen, Lille, 1903), and subsequently given with fair frequency both in France and Germany. In his various compositions Blockx manifested a very interesting personality, which, while carrying out the newer tendencies in harmony and orchestration, succeeded in avoiding all imitation of Wagner. M. K.

The following is a list of Blockx's principal compositions:

CANTATAS

Op den Stroom.' (1875.)
'Het Droom van't Paradies.'
'Vredesang.'
'De Klokke Roelandt.' (1888.)
'Die Scheldezang.' (1903.)

OPERAS, Etc.

'Iets Vergeten,' 1-act. (Antwerp, 1877.)
'Milenka,' 1-act ballet. (Brussels, 1886.)
'Maître Martin,' 1-act opera. (Brussels, 1892.)
'Herbergprinses,' 3-act opera. (Antwerp, 1896.)
'Thiel Uylenspiegel.' (Brussels, 1900.)
'De Bruid der Zee' (La Fiancée de la mer). (Antwerp, 1902.)
'De Kapel.' (Antwerp, 1903.)
'Baldie.' (Antwerp, 1908.)

INSTRUMENTAL

Overture, 'Rubens,' for orchestra.
Romance, violin and orchestra.

Bibl.—Lucien Solvay, *Notice sur Jan Blockx*, Brussels, 1920.

BLODEK, Vilém (*b.* Prague, 1834; *d.* there, 1874), a virtuoso flautist and professor at the Prague Conservatoire. He composed several masses, symphonies, overtures, choruses for male voices, pianoforte pieces and songs, but his chief claim to remembrance is the opera in one act, 'V studni' (In the Well) which was produced in 1867, and still retains its place in the repertory of the Narodni Divadlo (National Theatre), Prague, and other Czechoslovak opera houses. It is a refined and tuneful comic opera, founded on a legend of St. John's Eve. The music has a certain Mozart-like freshness combined with an unaffected use of national melody. By the introduction of an instrumental intermezzo into his opera, Blodek forestalled Mascagni by nearly a quarter of a century. R. N.

BLONDEAU, Pierre Auguste Louis (*b.* Paris, Aug. 15,1784; *d.* there, 1865), studied at the conservatoire under Baillot, Gossec and Méhul; with a cantata, 'Maria Stuart,' he gained the Prix de Rome in 1808. After his return from Italy until 1842 he was viola player at the opéra. He composed 1 opera, 1 ballet, 3 overtures, 1 Mass for 2 choruses, 2 Te Deums, concertos for wind instruments, chamber music, pianoforte pieces and songs. He wrote also: *A Method for Singing*; *Elements of Music*; *Harmony*; *Counterpoint and Fugue*; an *Histoire de la musique moderne* (1847) and *Notice sur Palestrina.* E. v. d. s.

BLOW, John, Mus.D. (*b.* Nottinghamshire, 1648–49; *d.* Westminster, Oct. 1, 1708), an eminent English composer, organist and church musician.

Blow is generally believed to have been born at North Collingham, Notts.[1] The parish registers contain no entries relating to him or his family, but it has been discovered[2] that in 1646 a Henry Blow was married at Newark to a widow named Katherine Langworth, and that three of their children were baptized at the same place, viz., Henry in 1647; John,[3] Feb. 23, 1648–49, and Katherine. Since three of John Blow's children bore these Christian names, and as North Collingham is situated within six miles of Newark, it seems almost certain that the entries in the Newark registers refer to the parents of the composer and their family, and that Anthony à Wood's MS. note in the Bodleian Library,[4] to the effect that 'Dr. Rogers tells me that John Blow was borne in London,' cannot be relied on.

Blow was one of the first set of the children of the Chapel Royal on its re-establishment in 1660 under Captain Cooke. Clifford's 'Divine Services and Anthems' (1663) contain the words of three anthems, 'I will magnifie,' 'Lord, thou hast been our refuge,' and 'Lord, rebuke me not,' which had been set by him at that date; and to the same early period in his career belongs his share of the so-called 'Club Anthem,' 'I will always give thanks,' which was written in conjunction with Pelham Humfrey and William Turner: according to Tudway, to celebrate a naval victory over the Dutch in 1665; but on the authority of Boyce, as a record of the friendship of the three choristers. As Humfrey left the choir in 1664 it is more probable that Boyce's account of the origin of the work is correct. At about the same period Blow produced a 2-part setting of Herrick's 'Goe, perjur'd man,' written at Charles II.'s request in imitation of Carissimi's 'Dite, o cieli.' It was probably during the time he was a chorister that Blow studied under John Hingeston and Christopher Gibbons. On Aug. 21, 1667, Pepys wrote in his diary (ed. Wheatley, vii. 75):

'This morning came two of Captain Cooke's boys, whose voices are broke, and are gone from the Chapel, but have extraordinary skill; and they and my boy, with his broken voice, did sing three parts; their names were Blaew and Loggings; but, notwithstanding their skill, yet to hear them sing with their broken voices, which they could not command to keep in tune, would make a man mad—so bad it was.'

It has generally been assumed that Pepys's 'Blaew' was John Blow, but the editor of the diary remarks that this could hardly have been the case, as the composer at this time would have been 19 years of age. In 1668 Blow succeeded Albertus Bryne as organist of Westminster Abbey; on Mar. 16, 1673–74, he was sworn in as a Gentleman of the Chapel Royal, and on July 21 following he succeeded Pelham Humfrey as Master of the Children. In Sept. of the same year he was married at St. Paul's, Covent Garden, to Elizabeth, daughter of Edward Braddock, a member of the Abbey Choir and Clerk of the Cheque to the Chapel Royal. He received the honorary Mus.D. degree from the Dean of Canterbury on Dec. 10, 1677 (the Dean acting in consequence of the vacancy in the see). Blow's was the first musical degree of which there is any record granted by Lambeth. The Catalogue of the Music School Collection at Oxford shows that on at least three occasions—one so early as in 1671—act songs by him were performed in that university. An entry in the Act-Book of Westminster Abbey records that on Nov. 23, 1678, it was

4 Wood, 19 D (4), No. 106.

'ordered that two leases be made to Dr. Blow of tenements in Atkins Alley in ye Sanctuary for ye Residue of a terme therein to come of a lease lately made to Mr. Rashleigh.'

By a subsequent entry (Apr. 30, 1687) it seems that he was granted a lease 'of tenements in ye Sanctuary' for forty years. About this time, *i.e.* between Dec. 10, 1680, and Aug. 1687, he wrote the remarkable 'Masque for the Entertainment of the King,' 'Venus and Adonis,' in which the part of Venus was taken by Mary Davies, and that of Cupid by her daughter by Charles II., Lady Mary Tudor. This work, his only recorded composition for the stage, exists in contemporary manuscripts in the British Museum, Christ Church, Oxford, and Westminster Chapter Libraries; it was first printed in 1902 by G. E. P. Arkwright as vol. xxv. of his Old English edition (London, J. Williams).[1]

In Oct. 1676 the death of Christopher Gibbons created a vacancy of one of the three organists' posts in the Chapel Royal. It is generally believed that Blow was appointed, but the *Cheque Book* has no record of this, merely stating that

'Dr. Christopher Gibbons organist, . . . departed this life the 20th day of October 1676, in whose place was sworne Mr. John Chrissostome Dusharoll the 26 day of the same month 1676.'

Dusharoll (otherwise Sharole or Sharold) was in orders, and his name occurs among those of the 'ministers' at the Coronation of James II. in 1685. He died in 1687, in which year Chamberlayne (*Angliae notitia*) gives Blow's name as one of the three organists, the other two being Child and Purcell. The first mention in the *Cheque Book* of Blow as organist occurs in the list of the Gentlemen of the Chapel present at the Coronation of William and Mary (1689): at that of James II. Dr. Child heads the list of lay members of the chapel; his name is followed by those of the Clerk of the Cheque and of Blow, who is styled 'Master of the Children,' but no names of organists are given.

The various appointments held by Blow, and the dates when he occupied them, are rather obscure, mainly owing to the silence of contemporary records. In 1679 he is said either to have resigned or to have been dismissed from Westminster Abbey to make room for Purcell, on whose death in 1695 he was reappointed organist, remaining at the Abbey for the rest of his life. In 1687 he succeeded Wise as Almoner and Master of the Choristers at St. Paul's, which offices he resigned in 1693 to his pupil, Jeremiah Clarke. If Chamberlayne (*Angliae notitia*, 1692) is to be relied upon, in 1691 or 1692 he must also have resigned the Mastership of the Children of the Chapel Royal to Purcell, though the *Cheque Book* records that he held this post at his death. On the accession of James II. he was appointed a member of the royal band and composer in ordinary; in 1695 he shared with Father Smith the post of 'tuner of the regals, organ, virginals, flutes and recorders, and all other kind of wind instruments in ordinary to His Majesty'[2]; according to Chamberlayne (*Angliae notitia*), in 1692 he was master of the royal vocal music (Staggins being master of the band) at a salary of £100 per annum, and in 1699, 'upon a new establishment of a composer's place for the Chapell Royal,'[3] Blow was appointed with an annual salary of £40, afterwards raised to £73. In 1684 he took part in the organ competition between Smith and Harris at the Temple Church, the latter engaging Draghi to play upon his instrument and the former Blow and Purcell, with the result that Smith was victorious.

In addition to the work which his numerous appointments entailed, Blow was a voluminous composer. For New Year's day 1681–82 he wrote an ode, 'Great sir, the joy of all our hearts,' which was followed by similar compositions for 1683, 1686, 1687, 1688, 1689, 1693 (?), 1694 and 1700; for 1684, 1691, 1695 and 1700, odes, etc., for the celebration of St. Cecilia's day, the first of which was printed in score, the year of its production. For the coronation of James II. he wrote two anthems, 'Behold, O God, our Defender' and 'God spake sometimes in visions.' In 1689 he contributed some harpsichord pieces to the second part of Playford's 'Musick's Handmaid' (reprinted in 1705 as 'A Choice Collection of Lessons . . . by Dr. John Blow and the late Mr. Henry Purcell,' etc.). In 1695 he published an Epicedium for Queen Mary; in 1696 an ode on the death of Purcell. In 1697 he wrote an anthem ('I was glad when they said') for the opening of St. Paul's Cathedral, and in the same year another ('Praise the Lord, O my soul') to celebrate the peace of Ryswick. In 1700 there was issued a 'Choice Collection of Ayres for the Harpsichord or Spinett,' by Blow, Piggott, Clarke, Barrett and Croft; another collection, containing four 'Setts,' or suites, entirely by Blow, was issued by Walsh without date (probably in 1704), besides a set of 'Psalms set full for the Organ or Harpsichord' (no date). In 1700 he published 'Amphion Anglicus,' a selection of songs, etc., dedicated to Princess (afterwards Queen) Anne, which he intended to follow by a collection of his church music. Most of this, however, still remains in manuscript. Boyce printed three services and eleven anthems, but the list printed below identifies 110 anthems and 13 services. Sacred songs and duets by Blow appeared in Playford's 'Harmonia Sacra,' and many secular songs and catches in the 'Pleasant Musical Companion,' the 'Catch Club,' the *Gentleman's Journal*, and other collections of the period. About 1697 Blow was living at an estate he had

[1] Its stage representation has been revived in modern times by the Glastonbury Players both at Glastonbury and at the 'Old Vic' (1920).

[2] Warrant, printed in *Mus. T.*, Feb. 1, 1902.

[3] *Cheque Book*, ed. Rimbault, Camden Soc., 1872, p. 23.

bought at Hampton, but his death took place at his house in Broad Sanctuary, Westminster, on Oct. 1, 1708. He was buried in the north aisle of the Abbey, and above his grave there is a monument to his memory, on which appears an open book, containing the 'Gloria' in Canon from his service in G.

His will [1] (dated Jan. 3, 1707) shows him to have possessed considerable property, which was mainly divided between his three daughters; 'my sister Cage' and 'my niece Elizabeth Blow' are also mentioned. His wife had died in childbed on Oct. 29, 1683, aged 30. By her he had five children: (1) Henry (buried in Westminster Abbey, Sept. 1, 1676); (2) John (*d.* June 2, 1693, aged 15); (3) Katherine (*d.* unmarried, May 19, 1730); (4) Elizabeth (*m.* Apr. 30, 1719, to Capt. William Edgeworth, and *d.* Sept. 2, 1719); and (5) Mary (*d.* unmarried, Nov. 19, 1738). In person Blow is said by Sir John Hawkins to have been a very handsome man 'and remarkable for a gravity and decency in his deportment suited to his station.' Three paintings of him are in existence: (1) a half-length in the possession of Mr. Algernon Ashton (see *PLATE XX.*); (2) an oval head and shoulders, belonging to Dr. W. H. Cummings; and (3) a small head, at St. Michael's College, Tenbury. A fine print, drawn and engraved by R. White, is prefixed to 'Amphion Anglicus,' which also gives Blow's arms, argent, a saltire sable between 4 torteaux: the same coat appears on the tablet in Westminster Abbey.

Blow's considerable merits as a composer have always been overshadowed by those of his great pupil, Henry Purcell, and so little of his music has been printed that even now it is difficult to estimate his position properly. Dr. Burney, judging from the point of view of the late 18th century, devoted some pages of his history to an unusually bitter attack on the 'crudities' to be found in Blow's music. The particular instances quoted by Burney have been pronounced by Sir Hubert Parry [2] to 'do Dr. Blow for the most part great credit, for they show that he adventured beyond the range of the mere conventional, and often with the success which betokens genuine musical insight.' The whole question has been excellently dealt with by G. E. P. Arkwright in his introduction to 'Six Songs by Dr. John Blow' (Old English edition, No. xxiii., 1900). W. B. S.

The following list of Blow's anthems and services has been compiled by H. D. Statham from MSS. in the library of St. Michael's College, Tenbury, collated with those in the British Museum, Christ Church and Fitzwilliam libraries.

Tenbury 1176 (1700) and 797 (1715) are sets of partbooks. 1176 has four partbooks missing; 797 has one missing. 1176 has the organ scores. The dates of the Tenbury MSS. are given in brackets.

BLUETHNER, Julius Ferdinand (*b.* Falkenheim, Mar. 11, 1824; *d.* Leipzig, Apr. 13, 1910), founded the now famous firm of piano manufacturers which bears his name. He opened his piano manufactory at Leipzig, Nov. 7, 1853. In 1873 he took out a patent for his Aliquot system, which, through the vibration by influence of an additional unused string to each note, increases the value in combination of the octave upper partial.

A. J. H.

BLUMENFELD, Felix Michaelovitch (*b.* in the Russian government of Kherson, Apr. 19, 1863), composer, pianist and conductor, studied composition at the St. Petersburg Conservatoire under Rimsky-Korsakov, and piano under Stein, and was appointed a professor in 1885, at the close of his student years. He remained on the staff until 1918, besides being first chorus master, and then for a time conductor at the Maryinsky Theatre, conducting numerous symphony concerts and making frequent appearances as a pianist. Though his works include a symphony (op. 39), and a string quartet (op. 26), he is more widely known as a composer for his instrument, the piano. Apart from an 'Allegro de Concert,' with orchestra (op. 7), Variations (op. 8 and 34) and a Sonata-Fantaisie (op. 64), his piano works are mostly in the smaller forms. The best known of them are the set of 24 preludes, in four books (op. 17), which are a characteristic example of what might be termed his pianistic felicity, a quality which makes even his less interesting pieces generally attractive to play. He has also written a few songs. E. E.

BLUMENTHAL, Jacob (*b.* Hamburg, Oct. 4, 1829; *d.* Chelsea, May 17, 1908), pupil of F. W. Grund of Hamburg, and of C. M. von Bocklet and Sechter in Vienna, was the composer of songs which had a wide vogue in England.

His proficiency in pianoforte-playing was attained under Herz at the Conservatoire in Paris, which he entered in 1846. In 1848 he took up his residence in London, where he became pianist to Queen Victoria, and a very fashionable teacher. As a composer he is known for a large number of brilliant, effective and pretty pianoforte pieces, and for many songs, some of which, such as 'The Message,' have become widely and justly popular. Numerous song-albums, representing the work of his later life, show his command of a fluent sentiment. A. M.

BOATSWAIN'S MATE, THE, opera in 2 parts; founded on a story by W. W. Jacobs; written and composed by Ethel Smyth; produced Shaftesbury Theatre, Jan. 28, 1916.

BOB, a change-ringing term for a 'call' made by a 'conductor' to cause an alteration in the working of certain bells. W. W. S.

BOCAN, see Cordier, Jacques.

BOCCABADATI, Luigia (*b.* Parma; *d.* Turin, Oct. 12, 1850), a singer who made a brilliant début at Parma in 1817.

She appeared at Venice in 1823, at Rome in 1824, at Milan in 1826, and again at Rome in 1827; and was especially successful in opera buffa. On this account she was persuaded to sing at Naples during the years 1829, 1830 and 1831. Despréaux, the composer, writing from Naples, Feb. 17, 1830 (*R.M.* vol. vii. p. 172), describes her as

'a little dry, dark woman, who is neither young nor old. She executes difficult passages well; but she has no elegance, grace or charm about her. Her voice, although extensive, is harsh at the top, but otherwise she sings in tune.'

Berlioz says in the same *Revue* (xii. 75) in 1832,

'She is a *fort beau talent*, who deserves perhaps, more than her reputation.'

She appeared in London on Feb. 18, 1833, at the King's Theatre, in 'Cenerentola,' sang at Turin for three seasons, and at Lisbon in 1840, 1841 and 1842. She returned to Turin in 1843, and sang at Genoa in 1844, and in the next year at Palermo. She was married to a M. Gazzuoli, by whom she had a son, and a daughter Augustine, who was also a singer.

J. M.

BOCCHERINI, Luigi (*b.* Lucca, Feb. 19, 1743; *d.* Madrid, May 28, 1805), a highly gifted composer.

The first rudiments of music and the violoncello were taught him by his father, an able bass-

player, and the Abbé Vannucci, maestro di cappella to the Archbishop. The boy's ability was so great as to induce them to send him (1757) to Rome, where he rapidly made himself famous both as composer and player. Returning to Lucca he entered the theatre orchestra, and was in the town band from 1764–79. Two oratorios, 'Giuseppe riconosciuto' and 'Gioas,' were given at Lucca during this period, as well as an opera, probably 'La Clementina,' in 1765. He joined Filippo Manfredi, a scholar of Tartini, in a tour through Lombardy, Piedmont, and the south of France, and even as far as Paris, which they reached in 1768. Here they found a brilliant reception from Gossec, Capon and Dupont, sen., and their appearance at the Concert Spirituel confirmed the favourable judgment of their friends. Boccherini became the rage; Venier and La Chevardière, the publishers, contended for his first trios and quartets, the eminent Mme. Brillon de Jouy (to whom Boccherini dedicated 6 sonatas) attached herself to the two artists, and the Spanish ambassador, a keen amateur, pressed them to visit Madrid, promising them the warmest reception from the Prince of Asturias, afterwards Charles IV. Accordingly, in the end of 1768 or beginning of 1769 they started for Madrid, but their reception at first was disappointing. Neither King nor Prince offered the strangers any civility. They were, however, patronised by the Infante Don Luis, brother of the King, whom Boccherini has commemorated on the title-page of his 6 quartets (op. 6), calling himself 'Compositore e virtuoso di camera di S. A. R. Don Luigi infante d' Ispagnia,' a title which he retained until the death of the Infante in 1785. He seems to have travelled in Germany between 1782 and 1787, and in the latter year he dedicated a composition to Friedrich Wilhelm II., King of Prussia, which procured him a valuable present and the post of chamber-composer to the King, with an annual salary, but burdened with the condition that he should compose for the King alone. With the death of Friedrich in 1797 the salary ceased, and Boccherini found himself unknown except to a small circle of friends. He returned to Spain and found a patron in the Marquis Benavente, in whose palace he was able to hear his music performed by his former comrades of the Villa Arenas—whither his old protector Don Luis had retired after his *mésalliance*—and to become once again known. Meantime ill-health obliged him to drop the violoncello; he was often in want, and suffered severe domestic calamities. With the advent of Lucien Buonaparte, however, an ambassador of the French Republic at Madrid, better times arrived. Lucien appreciated Boccherini, and his productive talent revived. In 1799 he wrote 6 pianoforte quintets, and dedicated them to the French nation and Republic, but they were not published till after his death, and then appeared with the name of the Duchesse de Berri on the title-page. In 1801 and 1802 he dedicated 12 string quintets (op. 60 and 62) 'per il Cittadino Luciano Bonaparte,' and in 1801 a 'Stabat Mater' for 3 voices, presented to the same, and published by Sieber of Paris. After this Boccherini's star sank rapidly, and his poverty was so great that he was glad to make arrangements of his works for the guitar for the use of the Marquis Benavente and other wealthy amateurs, till at length death released him from his troubles. The last of his sons, Don José, died in Dec. 1847, as librarian to the Marquis Seralbo, leaving a son Fernando, professor at the Academy of Fine Arts in Madrid (1851), the last representative of the name of Boccherini.

Compositions.—The ability in Boccherini's chamber music, which is generally contemporary with Haydn's, is obvious and unquestionable. He is certainly wanting to some extent in force and contrast, but pleasant method, expressive melody, good treatment of ideas, and dignified style are never absent in his music. His originality was great, and had its influence on the progress of the art, though only a very small proportion of his work is ever heard in the modern concert room. Six sonatas for violoncello were edited by Grützmacher and Piatti, one quintet for strings is in Payne's miniature edition, and four violoncello concertos were published in Paris in 1898.

Boccherini and Haydn are often named together in respect of chamber music. Puppo the violinist is credited with the oft quoted saying that 'Boccherini is the wife of Haydn.' It is usually assumed that these two great composers knew and esteemed each other's works, and that they even corresponded. No evidence of this is brought forward by Picquot, the earnest and accurate biographer of Boccherini, but it is nevertheless a fact. In a letter to Artaria ('Arenas, Feb. 1781') Boccherini sends his respects to Haydn, and begs him to understand that he is an enthusiastic admirer of his genius. Haydn, on his side, in two letters to Artaria, mentions his intention of writing to Boccherini, and in the meantime returns a complimentary message. Artaria at that time had published several string trios and quartets of Boccherini's, and had for long been in business relations with him.

Boccherini's facility was so great that he has been described as a fountain, of which it was only necessary to turn the cock to produce or suspend the stream of music. That he was remarkably industrious is evident from the detailed catalogue of his works made by Picquot. His first 6 trios date from 1760, and were followed in the next year by 6 quartets, published in Paris in 1768. The total number

of his instrumental works amounts to 467, of which 74 are unpublished. The printed ones are as follows:

21 sonatas for PF. and vln.
6 ditto for vln. and bass.
6 sonatas for v'cl. and bass (assumed to be arrangements from violin sonatas, but probably original).
6 duets for 2 vlns.
48 trios for 2 vlns. and v'cl.
12 ditto for vln., vla., v'cl.
102 string quartets.
18 quintets for flute or oboe, 2 vlns., vla., v'cl.
12 ditto for PF., 2 vlns., vla., v'cl.
113 ditto for 2 vlns., vla. and 2 v'clli.
12 ditto for 2 vlns., 2 vlas. and v'cl.
16 sextets for various instruments.
2 octets for ditto.
1 suite for full orchestra.
20 symphonies, including 8 concertante.
4 v'cl. concertos.

In addition to the above his vocal works are:

Stabat Mater for 3 v., with quintet string accompaniment; Mass for 4 v. and instruments.
Christmas Cantata for 4 solo v., chorus and orch.
Villancicos or Motets for Christmas-time for 4 v. and orch.
An Opera or Melodrama, 'La Clementina.'
14 Concert Airs and Duets, with orchestra.
Of the vocal works the Stabat Mater alone is published (Paris, Sieber, op. 61).

The system of numeration, by which a new series of opus-numbers begins with each branch of his compositions, is very confusing: even from Eitner's catalogue, in *Q-L.*, it is difficult to get an exact idea of the extent of Boccherini's works.

There are also many other pieces which are either spurious or mere arrangements by Boccherini of his own works. See *Notice sur la vie et les ouvrages de Luigi Boccherini, suivie du catalogue raisonné de toutes ses œuvres, tant publiées qu'inédites*, par L. Picquot, Paris, Philipp, 1851, with two portraits; and the biography by D. A. Cerù (1864).

C. F. P., with addns.

BOCHSA, Robert Nicolas Charles (*b.* Montmédy, Aug. 9, 1789; *d.* Sydney, Jan. 6, 1856), composer and eminent harpist, was the son of Karl Bochsa (*d.* 1821), a flute and clarinet player.

Before he was 16 his opera 'Trajan' was produced at Lyons in honour of the Emperor's visit. His family having removed to Bordeaux, he became a pupil of Franz Beck, under whom he wrote a ballet, and an oratorio, 'Le Déluge universel.' In 1806 he entered the Conservatoire at Paris as a pupil first of Catel and then of Méhul. He studied the harp under Nadermann and Marin, but soon formed a style of his own. He was continually discovering new effects, even to the close of his life, and may fairly be said to have revolutionised harp-playing. In 1813 he was appointed harpist to the Emperor Napoleon, and three years later to Louis XVIII. and the Duc de Berri. Eight operas from his pen were performed at the Opéra-Comique between 1813 and 1816. He composed a Requiem to the memory of Louis XVI., which was performed with great solemnity in Jan. 1816; but a year later he was detected in extensive forgeries, and fled from France, never to return. He was tried in his absence, and condemned to 12 years' imprisonment, with a fine of 4000 francs. He took refuge in London, where his fine playing was universally admired, and so popular did the harp become that he was unable to satisfy all the applicants for lessons. Parish-Alvars and J. B. Chatterton were both pupils of Bochsa. In 1822 he undertook the joint management, with Sir George Smart, of the Lent oratorios, and in 1823 the entire direction of them. On the institution of the R.A.M., Bochsa was appointed professor of the harp and general secretary, but in 1827 was dismissed on account of public attacks upon his character which he was unable to deny. In 1826 he succeeded Coccia as conductor at the King's Theatre, and six years later was himself succeeded by Costa. Rossini's 'Comte Ory' was produced under his management. Bochsa gave annual concerts, the programme of which always contained some striking novelty, though not always in the best taste. For instance, at one of them, Jan. 22, 1829, Beethoven's 'Pastoral Symphony' was accompanied by acted illustrations. In 1839 he ran away with the wife of Sir Henry Bishop (see Bishop, Ann), and undertook a concert tour, visiting every country of Europe (except France), America and Australia, where he died. Immediately before his death he composed a Requiem, which was performed at his funeral.

As a composer Bochsa was too prolific for his own fame. His many compositions for the harp include a 'Method' for that instrument.

M. C. C.

BOCKLET, Carl Maria von (*b.* Prague, 1801; *d.* July 15, 1881), a pianist who learned the pianoforte from Zawora, the violin from Pixis, and composition from D. Weber.

In 1820 he settled in Vienna as first violin in the Theatre 'an der Wien,' but shortly after resigned the violin and gave his whole attention to the piano. Beethoven took much interest in him, and at different times wrote him three letters of recommendation (Nohl, *Beethovens Briefe*, Nos. 175, 176, 324). He was very intimate with Franz Schubert, whose piano compositions he was the first to bring into public notice, and for whom he had a romantic attachment. His great object in performance was to catch the spirit of the composition. Meeting with great success as a teacher, he gradually withdrew himself from all public appearance; but in 1866, after a long interval, appeared once more to introduce his son Heinrich to notice.

F. G.

BOCKSHORN, Samuel (*b.* 1629; *d.* Stuttgart, Nov. 12, 1665), was originally pupil and afterwards director of the music at the Gymnasium in Pressburg, about 1655 was director of the music at the church of the Trinity, Nuremberg, and in 1657 Kapellmeister to the Duke of Würtemberg.

Amongst his compositions, many of which

were published under his Latinised name, Capricornus, may be named :

'Opus Musicum,' for 1-8 voices, with instrument (1655); 'Geistliche Concerten' (1658); 'Geistliche Harmonien' (1659, 1660 and 1664); 'Theatrum musicum' (1659, 1669); the latter contains the 'Judicium Salomonis' (see CARISSIMI); 'Jubilus Bernhardi' (1660): 3 pt. sonatas (1660); a dramatic cantata, 'Raptus Proserpinæ' (1662). Two 'Lieder von dem Leyden und Tode Jesu' were published in 1660, and a volume of *Neucangestimmte . . . Tafel-Music* in 1670-71.

A number of motets and other sacred compositions are in the State Library at Berlin and elsewhere. (*Q.-L.*) His works were largely published, and even as late as 1708 a new edition of his sonatas, cappricci, allemandes, etc., was published in Vienna. F. G.

BIBL.—HANS BUCHNER, *S. Fr. Capricornus* (Bockshorn), *Munich Dissertation*, 1921-22.

BODANZKY, ARTUR (*b.* Vienna, Dec. 16, 1877), an Austrian conductor. He was a pupil of Grün, Grädener, and J. N. Fuchs at the Vienna Conservatory, and later of Zemlinsky, becoming a violinist in the orchestra of the Imperial Opera in 1896. In 1900 he was conductor of operetta at Budweis, in Bohemia, and then at the Karltheater, in Vienna. In 1902 Bodanzky became assistant to Mahler, then chief conductor of the Imperial Opera. He was thereafter conductor in various opera houses in Central Europe. He conducted the first 'Parsifal' performances at Covent Garden in 1914. In 1915 he was made chief German conductor at the Metropolitan Opera House, New York, succeeding Alfred Hertz. In 1918 he became also conductor of the Society of the Friends of Music, and in 1919 of the short-lived New Symphony Orchestra of New York. R. A.

BODE, JOHANN JOACHIM CHRISTOPH (*b.* Barum, Brunswick, Jan. 16, 1730; *d.* Weimar, Dec. 13, 1793). He had a strange and varied life as bassoon- and oboe-player, composer, newspaper editor (*Hamburger Correspondent*), printer (Lessing's *Hamburgische Dramaturgie*), and translator (Burney's *Present State of Music in Germany*, 1773). M. C. C.

BODENSCHATZ, ERHARD (*b.* Lichtenberg *c.* 1570; *d.* Gross-Osterhausen, 1638), studied theology and music at Leipzig, in 1600 became cantor at Schulpforta, in 1603 pastor at Rehausen, and in 1608 pastor at Gross-Osterhausen, near Querfurt. Bodenschatz's Magnificat (1599) and his 'General-bass' show him to have been an able contrapunist; but his real value arises from the collections of music which he brought out—'Psalterium Davidis,' 4 v. (Leipzig, 1605); 'Florilegium hymnorum,' 4 v. (Leipzig, 1606); a Psalter without title (1607); 'Harmonia angelica,' a collection of Luther's hymns (1608); 'Bicinia XC' (1615); and especially 'Florilegium Portense,' in 2 parts. Of Part 1 the first edition was printed by Lamberg of Leipzig in 1603, and contains 89 motets—increased in the second edition (1618) to 120. Part 2 appeared in 1621, and contained 150 motets. There is no score of the work. It was published, like our own 'Barnard,' in separate parts, small 4to—8 of the first Part, and 9 of the second, including in the latter case a basso continuo part. A copy of the work is in the British Museum. It has been frequently reprinted. A full list of the contents was given in earlier editions of this Dictionary. Other works include 'Manuale sacrum' (1627) and another edition (Leipzig, 1633), the second part entitled 'Geistliche Lieder und Psalmen' (Leipzig, 1627), both parts without the melodies. G. rev.

BODINUS, SEBASTIAN, an early 18th-century composer, born in the duchy of Altenburg. On his trios he calls himself chamber musician of the Prince of Würtemberg; later on he was Konzertmeister to the Margrave of Baden-Durlach. The publication of his numerous works falls probably between the first and fifth decades of the 18th century. They consist of concerti grossi, quartets and trios in various combinations, sonatas for violin and bass, sonatas for violin or oboe and bass, etc. (For list see *Q.-L.*) E. v. d. S.

BÖDDECKER, PHILIPP JAKOB, 17th-century organist and theorician who followed his father, PHILIPP FRIEDRICH, a composer of motets and sonatas, as organist of the Abbey Church (Stiftskirche) at Stuttgart, Apr. 23, 1686. He wrote an important work in 3 parts on thorough bass, *Manuductio nova methodico-practica bassum generalem* (Stuttgart, 1701). E. v. d. S.

BOEHM, ELIZABETH (*b.* Riga, 1756; *d.* 1797), a singer who made her first appearance in 1783. She afterwards married the tenor Cartellieri at Strelitz, from whom she separated, and married then Boehm the actor, under whose name she became one of the favourite actresses of the Berlin national theatre. She was the first to play Donna Elvira in Berlin (1790). F. G.

BÖHM, GEORG (*b.* Goldbach near Gotha, Sept. 1661; *d.* Lüneburg, May 18, 1733 [1]), was organist in Hamburg before 1698, when he became organist at the Johanniskirche of Lüneburg at the time when Bach was a member of the choir of the Michaeliskirche. It seems likely that it was his account of the music at Hamburg that suggested to Bach his famous journey to that city to hear Buxtehude. (See Spitta, *J. S. Bach*, Eng. trans. i. 194-6.) His compositions are numerous. He wrote music for Elmenhorst's hymns, a setting of the Passion, and many Choral-preludes and arrangements in the State and Hochschule libraries, Berlin, at Königsberg, Leipzig, etc. Some of his Chorals, his suites, and a prelude and fugue for clavier, are minutely analysed by Spitta, *J. S. Bach* (Eng. trans.), i. 203-10. Some of his Choral-preludes are published by Schuberth

[1] Date given by *Riemann*.

& Peter (*Alte Meister des Orgelspiels*, 1904). (See *B. J.-B.*, 1908, pp. 107-22; *ibid.* 1912, pp. 142-60.) M.; addns. C. S. T.

BOEHM, Joseph (*b.* Pest, Mar. 4, 1795; *d.* Vienna, Mar. 28, 1876), a violinist of repute and a great teacher.

He was a pupil first of his father, and then of Rode, who took a lively interest in his talent. After having played with much success at Vienna, he travelled (1815) for several years in Italy, giving concerts in most of the principal towns. On his return to Vienna in 1819 he was appointed professor of the violin at the Conservatorium, which post he occupied till 1848. In 1821 he became a member of the imperial band, and retired in 1868. But it is as a teacher that Boehm's name has won a permanent place in the history of modern violin-playing. For fifty years he resided at Vienna, devoting his powers to the instruction of his numerous pupils, among whom it will suffice to name Ernst, Joachim, L. Straus, Hellmesberger and Singer. In fact, all the excellent violinists of that period who came from Vienna were pupils either of Boehm or Mayseder (*q.v.*), or both. These two masters appear to have supplemented each other by the different bent of their talents: Mayseder excelling chiefly by brilliant technique, while breadth of tone and thorough musical style were the prominent features of Boehm's playing.

He published a number of compositions for the violin, polonaises, variations, a concertino, also a string-quartet, which, however, are of no importance. P. D.

BOEHM, Theobald (*b.* Munich, Apr. 9, 1793 or 1794; *d.* Nov. 25, 1881), a flute-player of distinction and Hof-Musicus at Munich.

Besides composing many brilliant works for his instrument, he introduced several notable improvements in its mechanism; especially a new fingering which bears his name, and was introduced in London about the year 1834. It has been found applicable also to the oboe and bassoon, and has been adapted by Klosé to the clarinet, though with less success than in the other cases, owing to the foundation of the latter scale on the interval of a twelfth.

Its principal peculiarity is the avoidance of what are termed 'cross-fingered' notes, viz. those which are produced by closing a hole below that through which the instrument is speaking. For this purpose the semitone is obtained by pressing down the middle finger of either hand, and the corresponding whole tone, by doing the same with the forefinger. A large number of duplicate fingerings is also introduced, which facilitate passages previously impracticable. On the flute the system has the advantage of keeping different keys more on a level as regards difficulty: E major, for instance, which on the old eight-keyed instrument was false, uneven in tone, and mechanically difficult, is materially simplified. On the other hand, it alters to a certain extent the quality of the tone, making it coarser and less characteristic. It also complicates the mechanism, rendering the instrument heavier, and more liable to leakage.

Boehm's method has been generally adopted by flute-players both in England and abroad. The history of a famous controversy as to the priority of its invention may be read in Christopher Welch's *History of the Boehm Flute* (1896). Klosé's modification applied to the clarinet is used in France for military bands; many of Boehm's contrivances are incorporated in the oboes of M. Barret as made by Triebert of Paris. Bassoons on this system are rarely to be met with. (See Fingering (3) and Flute; also Gordon.) W. H. S.

BÖHNER, Johann Ludwig (*b.* Töttelstedt, Gotha, Jan. 8, 1787; *d.* Mar. 28, 1860), deserves mention as the original of Hoffmann's 'Capellmeister Kreisler,' and thus of Schumann's 'Kreisleriana.'

He had an immense talent for music, which was developed by his father and by Kittl, J. S. Bach's pupil; but his habits were so irregular that he could never retain any regular employment.

He wandered about through Germany, and in 1808 lived at Jena, where he made the acquaintance of Goethe and Hoffmann, and was about 1810 theatre conductor at Nuremberg, but returned in the end to his native village. At length, drink and privation carried him off. He gave a concert at Leipzig in Sept. 1834, in speaking of which Schumann [1] mentions that he 'looked so poverty-stricken as quite to depress me. He was like an old lion with a thorn in his foot.' He had at one time been celebrated for his improvisation, but at this date Schumann was disappointed by it—'it was so gloomy and dull.' This was in the early days of the *Neue Zeitschrift für Musik*, and Schumann utters a half intention to write Böhneriana for the paper, founded on the old man's own confessions, 'both humorous and pathetic.' These were afterwards to be the basis of the PF. pieces, op. 16, called the 'Kreisleriana' (1838). Böhner's absurdities almost pass belief. He announced an organ concert at Oldenburg, the church was filled and every one full of expectation, when Böhner appeared in the organ-loft and said, 'It is impossible for Ludwig Böhner to play to such an idiotic audience.' [2] Fétis gives a long list of his works, containing an opera, orchestral pieces, quartets, sonatas, motets, etc., ending with op. 120. Some piano pieces were republished by the 'Böhner-Verein,' a small society in Gotha. G.

BOËLLMANN, Léon (*b.* Ensisheim, Alsace, Sept. 25, 1862; *d.* Paris, Oct. 11, 1897), composer and organist, entered the École de Musique

[1] *Jugend-Briefe.* Letter to von Fricken. [2] *Ibid.*

Religieuse, founded in Paris by Niedermeyer, at an early age, as a pupil of Eugène Gigout.

After obtaining various honours at this school, he was appointed in 1881 sub-organist, and soon afterwards chief organist at the church of St. Vincent de Paul, Paris. Boëllmann tried, in his numerous compositions, every form excepting only dramatic music. A symphony in F was played at the Conservatoire of Nancy, and afterwards under Lamoureux in Paris ; the 'Variations symphoniques' for violoncello and orchestra have made his name famous abroad, and have been often played in London. He also wrote a sonata for piano and violoncello ; a quartet, op. 10, for piano and strings, a work which gained the prize of the Société des Compositeurs in 1877 ; a trio, and much church music. His output for the organ was not large, but its quality is so good that it seems to have secured a permanent place in the repertory. It consists of 2 suites—the Gothic, and No. 2 in C—a set of 12 pieces, an Offertoire on 2 Noels, a Fantasia in A, and the well-known 'Fantaisie dialoguée' for organ and orchestra. The last-named work has been arranged for organ solo by Eugène Gigout. He was a fine organ player, and had a very remarkable gift of improvisation. Hugues Imbert, in a sketch of Boëllmann, has said :

'His music is naturally fresh, graceful, poetic, and built on solid scientific foundation. It is genuinely French, in that his harmonic treatment, though often bold, is never otherwise than clear. His symphonic compositions are written in a pure style, derived from his intimacy with the classics of music, and are admirably scored.'

G. F. ; addns. H. G.

BOËLY, Alexandre Pierre François (*b.* Versailles, Apr. 19, 1785 ; *d.* Paris, Dec. 27, 1858), composer, was the son of Jean François Boëly (1739–1814), 'ordinaire de la musique du roi,' and harp-master to the Countess of Artois. It is impossible to verify Fétis's assertion regarding his studies in violin and piano at the Conservatoire, as the laureates only are mentioned in the official annals. His piano teachers, however, are known—Mme. de Montgeroult, and the composer Ignaz Ladurner. His first post as organist was a temporary one at St. Gervais, Paris, between the death of the organist Marrignes (1834) and the appointment of Mlle. Bigot (1838). On Aug. 1, 1840, he was appointed at St. Germain l'Auxerrois, and remained there until Oct. 1, 1851. The marked characteristics of his considerable production for the pianoforte and the organ combine the French traditions of the 18th century with the influence of the German classics and romantics, Boëly's contemporaries. Beethoven's first sonatas were known in France when he composed his op. 1 (*c.* 1810), 'Deux sonates' ; his 'Trente caprices' op. 2 (*c.* 1812) are dedicated to Mme. Bigot, the well-known pianist. He composed for the piano a great number of études, some dedicated to Fred. Kalkbrenner and J. B. Cramer ; preludes, fugues, canons, sonatas for pianoforte and violin, collections of 'Pièces,' etc. His trios and quartets are in the style of Haydn, and when only twenty he was imbued with J. S. Bach's style, whose preludes and fugues had been published by Choron in 1809. His organ compositions, opp. 9, 10, 11, 12 (1842), consisting of offertories, masses, etc., '14 préludes ou pièces d'orgue sur les cantiques de Denizot,' are conceived in the same spirit.

Amongst musicians of his epoch his position was isolated, unofficial, and his music almost ignored. Admired by younger artists who never sought his help in vain, he acquainted them at St. Germain l'Auxerrois, with the works of J. S. Bach, an innovation at that time. C. Saint-Saëns never concealed how much he owed to the old organist, who dedicated to him a 'Fantaisie' (1858). C. Franck's organ music is directly influenced by Boëly. He was buried on the 29th of Dec. 1858, leaving more than 300 unpublished compositions issued by Richault as 'Collection des œuvres posthumes de A. P. F. Boëly' (1859–60). A collection of 41 pieces has been reprinted, edited by Michel Brenet (Sénart, Paris).

BOËMO, Padre, see Černohorsky.

BOER, Joseph, see Beer.

BOESENDORFER, Ludwig, the most famous piano-maker in Vienna. The firm was founded in 1828 by Ignaz (*b.* July 28, 1796 ; *d.* Apr. 14, 1859), the father of Ludwig (*b.* Apr. 1835), who succeeded to the business in 1859.

While adopting overstringing and high tension with nearly all other leading piano-makers, he adhered to the light Viennese action for his ordinary grand pianos, adopting, however, the English action with a simple repetition contrivance for his concert grand instruments. He went beyond all others in compass, his 'Imperial' grand pianos having the extraordinary range of 8 octaves (from F below the usual A). These were given up after a time, and the extreme compass reduced to 7½ octaves. He opened a concert room in 1872, which became the home of the chief chamber music concerts and piano recitals given in Vienna. A. J. H.

BOESSET (Boĕsset, Boisset), (1) Antione (Anthoine), Sieur de Villedieu (*b. circa* 1585 ; *d.* Paris, Dec. 8 or 9, 1643).[1] Recent investigation on the subject determines certain points of his musical career, which was, principally, that of a court musician. Through his marriage with Jeanne,[2] daughter of the composer Pierre

[1] Burial Certificate, Dec. 10. Fétis.
[2] Marriage Contract, Feb. 16, 1613.

Guédron, he bought from his father-in-law his post of 'maître des enfants de la musique de la chambre, du roi' (Louis XIII.), that is to say 'maître de la musique du roi.' According to Fétis, he became 'intendant' of the Queen's music in 1615. He is known to have been secretary-in-ordinary of the King's 'chambre' (1620), and his title of 'surintendant de la musique du roi et maître de la musique de la reine' appears on a document of Nov. 29, 1623.[1] He held that post until his death. He also bore the title of 'conseiller et maître d'hôtel ordinaire du roi.' He published from 1617–42, 9 books of 'Airs de cour' in 4 and 5 parts (Ballard). An English translation of the first book appeared with the title: 'French Court Ayres with their Ditties Englished' (London, 1629). He is mentioned in the title with the name of his father-in-law following his. These books consist chiefly of pieces composed for the ballets represented at court since 1613 (24 in number; see list in *Fétis*). Numerous airs of his are contained in the 8 books of 'Airs de cour de différents auteurs' (Ballard, 1621–28); in the 'Airs de cour mis en tablature de luth,' 1621–32, of which the 10th book is of his composition (Ballard). Some masses and motets are kept in the National Library. Reprints of 35 of his airs are extant in the collection: 'Chants de France et d'Italie,' 2nd series, by H. Expert (Sénart, Paris).

Of his three sons, the eldest, (2) Jean Baptiste, Seigneur de Dehault (*b. circa* 1613; *d.* Paris, Dec. 27, 1685), succeeded his father in his post of 'maître de la musique du roi' and that of 'surintendant' (Jan. 12, 1644). He was ennobled in 1648. He composed 2 books of 'Airs' in 3 or 4 parts (Ballard, 1669, 1671). The Philidor Collection (vol. 6), contains some of his 'airs' for the 'Ballet du temps' (1654), and 'Triomphe de Bacchus' (1666). He wrote the music for another ballet, 'Alcidiane,' performed Feb. 14, 1658, that of 'La Mort d'Adonis,' words by Perrin, of which some airs were sung at court in 1659. He is the composer of 'Paroles de musique pour le concert de chambre de la musique de la reine' (1667), and the choruses for Corneille's 'Andromède' (1650) are attributed to him. His son, (3) Claude Jean Baptiste, 'Seigneur de Launay' (*bapt.* Aug. 3, 1664), was his father's successor in posts and titles for ten years only. In 1696 he was replaced in both charges by Lully's second son Jean Baptiste, and by Colasse (not Lalande, as has been said). He published 'Fruits d'automne' (Ballard, 1684).

BOETHIUS, Anicius Manlius Torquatus Severinus (*b.* Rome, *c.* 475; *d.* Pavia, 524 or 525). He came of a noble family, studied in Rome and Athens and became one of the most brilliant scholars of his time. He was confidential advisor to Theodoric, king of the Eastern Goths, who raised him to the rank of sole consul (before there were always two); but falling, through court intrigues, under suspicion of treacherous dealings with the Byzantine emperor, he was imprisoned, and finally executed. Boethius wrote 5 books on music which, with the work of Cassiodorus, transmitted the knowledge of the musical art of the Greeks to the Middle Ages, and even to modern times. His works are preserved in many MSS. and printed copies of all ages.

E. v. d. s.

BOHÈME, LA, (1) opera in 4 acts; libretto founded on Mürger's *Vie de Bohème* by Giuseppe Giacosa and Luigi Illica; music by Puccini; produced, Teatro Regio, Turin, Feb. 1, 1896; Covent Garden, July 1, 1899; in English (Carl Rosa Co.), Manchester, Apr. 22, 1897; San Francisco, Mar. 1898; Wallack's Theatre, New York, May 16, 1898. (2) Opera on the same subject by Leoncavallo; produced Teatro della Fenice, Venice, May 6, 1897.

BOHEMIAN GIRL, THE, opera in 3 acts; libretto adapted by Bunn from Fanny Elssler's ballet of 'The Gipsy' (not the 'Gitana'); music by Balfe; produced Drury Lane, Nov. 27, 1843; Her Majesty's, Feb. 6, 1858, as 'La Zingara'; and in Dec. 1869, Théâtre Lyrique, Paris, as 'La Bohémienne,' with additions by the composer.

BOHEMIAN (CZECH) STRING QUARTET. This organisation was founded in 1892, by four young musicians, all being pupils of Professor Hanuš Wihan (Vihan) at the Prague Conservatoire in 1891: Karel Hoffmann (first violin), Josef Suk (second violin), Oskar Nedbal (viola), and Otto Berger (violoncellist). In the autumn of 1892, Wihan recommended the Chamber Music Union of Prague to engage his four pupils for one of their concerts. This was done, not without protest from some of the committee, who feared the engagement of mere students might lower the prestige of the Union. Results, however, proved Wihan to have been justified in his advice.

The name Bohemian (Czech) String Quartet was only assumed after the young players had given their first independently organised concert in Prague, on Oct. 22, 1892. One of the first works they took into practice as a corporate body was Smetana's quartet in E minor, op. 116, 'From my Life,' of which they have become the most intimate interpreters. Their deliberate choice of material for study, and of a name to work under, shows that they were resolved from the outset to dedicate themselves to the national service. In 1893 the Quartet gave four consecutive concerts with brilliant success in Vienna. Shortly afterwards Berlin endorsed the favour-

[1] National Library.

able verdict of Prague and Vienna, and the gates of the musical world were thrown open to them.

The personnel of the Quartet has undergone several changes. The chronic illness of Berger, which declared itself during the winter of 1893, threatened to put a premature end to its activities. Fortunately a permanent substitute was found in Professor Wihan himself, who then joined his pupils as violoncellist. In 1906 Nedbal left the Quartet and followed henceforth a conductor's career. His place was filled by the present viola player, Jiři Herold. In 1918 Wihan, then in his fifty-third year, resigned his place to Ladislav Zelenka.

From 1895 the Quartet, well established in Bohemia, steadily extended their reputation throughout Europe. Tours in Russia in 1895–96 and 1899–1900, included Finland, the Baltic provinces, and the Caucasus. The Società del Quartetto of Milan, and Liceo Società Benedetto Marcello of Venice invited them to Italy as early as 1895. They first played in France in 1896, and in Belgium in 1897. The foundation of their lasting popularity in Holland was laid in 1898, and in that year they came to England for the first time, playing in many centres, from Bournemouth to Edinburgh. In 1901 and 1902 they toured the Balkans and penetrated to Constantinople. The tenth anniversary of their organisation and their 1000th concert coincided in 1902. The history of the second decade of their activity is practically a repetition of similar tours and triumphs, only interrupted by the Great War of 1914–18.

The Quartet with its changes of personnel has undergone also some modifications of style. They modestly waited until 1911 before offering to the public for the first time their own interpretation of the entire cycle of Beethoven's quartets. They have rendered the same service to all Dvořák's chamber music, and have also given a series of concerts illustrating the historical development of the quartet. But although the didactic purpose has not been specially prominent in its concerts, the organisation has undoubtedly educated the Czechs in a pure taste, and a permanent wish to hear the best chamber music.

The programmes of fifteen concerts given between Oct. 1922 and Mar. 1923 in celebration of the thirtieth year of their activity bear witness to the great range of their musical sympathies

Opening their jubilee with the chamber works of Smetana, two concerts were next devoted to Dvořák. Other representative Czech composers included: Fibich, Chvala, Bendl, J. B. Foerster, Suk, Novák, and—among the younger school—Vycpálek, Jirak, Karel, and Štepan. The miscellaneous concerts were ordered as follows: I. Haydn, Cherubini, Mozart. II. Beethoven. III. Schubert, Schumann, Brahms. Then, after a series of Czech concerts, came XII. (*Russian*) Borodin, Tchaikovsky, Taneiev. XIII. (*Modern German*) Pfitzner, Reger, Schönberg. XIV. (*International*) Sgambati, Elgar, Grieg. XV. (*French*) Franck, d'Indy, Ravel.

In the autumn of 1922 all the members of the Quartet were appointed by the Ministry of Education professors at the Prague Conservatoire. R. N.

BOHN, Emil (*b.* Bielau, near Neisse, Jan. 14, 1839; *d.* Breslau, July 5, 1909), organist at the Kreuzkirche, Breslau, in 1868, founded the Bohn Choral Society in 1882, which became widely known by its historical concerts. In 1884 the University bestowed upon him the honorary degree of Ph.D. and appointed him lecturer on church music in 1887. He was elected honorary member by the academies of several countries; in 1895 he received the title of Professor, and in 1908 became a salaried Professor of the University. He composed songs for chorus and single voices. The importance of his work lies in his treatises and books on musical bibliography and history, and his collection of 16th and 17th century scores, which contain most valuable material with regard to the German polyphonic Lied (about 10,000 numbers), and are preserved in the Breslau town library (*Riemann*; *Mendel*).

BOHRER, the name of a family of musicians. (1) Caspar (*b.* Mannheim, 1744; *d.* Munich, Nov. 14, 1809), trumpeter in the court band, and remarkable performer on the double-bass; called to Munich in 1778.

(2) His son and pupil Anton (*b.* Munich, 1783; *d.* 1852), learned the violin from Kreutzer, and composition from Winter and Danzi, and became violin-player in the court orchestra at Munich. With his brother, (3) Max (*b.* 1785; *d.* Feb. 28, 1867), a clever violoncellist, he undertook in 1810 an extensive tour, ending in Russia, where they narrowly escaped transportation to Siberia as employés of the King of Bavaria, Napoleon's ally. In 1823 the brothers were appointed to the royal orchestra in Berlin, but, quarrelling with Spontini, lost their posts. Anton then resided in Paris till 1834, when he was made Konzertmeister at Hanover. Max was first violoncellist and Konzertmeister at Stuttgart, from 1832 until his death. The brothers married two sisters of Ferdinand David and of Madame Dulcken. Anton's daughter, Sophie (*b.* 1828; *d.* Petersburgh, 1849), was a promising pianist. F. G.

BOIELDIEU, François Adrien (*b.* Rouen, Dec. 16, 1775; *d.* Jarcy, Oct. 8, 1834), composer. His father held the position of secretary to Archbishop Larochefoucauld at Rouen. His mother kept a milliner's shop in the same city.

He studied music with Broche, the organist of Rouen cathedral, who, although an excellent musician and pupil of the celebrated Padre Martini, was known as a drunkard, and occasionally treated Boieldieu with brutality. We are not informed of any other master to whom the composer owed the rudimentary knowledge of his art. This knowledge, however acquired, was put to the test for the first time in 1793, when an opera by Boieldieu, called 'La Fille coupable' (words by his father), was performed at Rouen with considerable success. On Oct. 28, 1795, another opera written by him in co-operation with his father, 'Rosalie et Myrza,' was performed at the theatre of that city. The success of this second venture does not seem to have been brilliant, to judge at least by the *Journal de Rouen*, which, after briefly noticing the book, observes silence with regard to the music. Many of Boieldieu's 'romances' owe their origin to this period, and added considerably to the local reputation of the young composer. Much pecuniary advantage he does not seem to have derived from them, for Cochet, the Paris publisher of these minor compositions, told Fétis that Boieldieu was glad to part with the copyright for the moderate remuneration of 12 francs apiece. Soon after the appearance of his second opera Boieldieu left Rouen for good. Ambition and the consciousness of power caused him to be dissatisfied with the narrow sphere of his native city, particularly after the failure of a plan (advocated by him in an article in the *Journal de Rouen*, entitled *Réflexions patriotiques sur l'utilité de l'étude de la musique*) of starting a music school on the model of the newly-founded Conservatoire.

To Paris therefore Boieldieu went for a second time, with an introduction from Garat the singer to Jadin (a descendant of the well-known Belgian family of musicians), at whose house, as well as at that of the Erards, he found a hospitable reception, and became acquainted with the leading composers of the day, Cherubini amongst the number. Boieldieu made his début as an operatic composer in the capital with 'Les Deux Lettres' (1796),[1] and the 'Famille suisse,' which was performed at the Théâtre Feydeau in 1797, and had a run of thirty nights. Other operas followed in rapid succession. 'Le Calife de Bagdad' was performed in Sept. 1800 with enormous success. To these operatic works ought to be added some pieces of chamber music, which we mention less for their intrinsic value than for the sake of completeness. They are, according to Fétis, a concerto and 6 sonatas for pianoforte, duets for piano and violin, duets for harp and pianoforte, and 3 trios for pianoforte, harp and violoncello. To the success of these minor compositions Boieldieu owed his appointment as professor of the pianoforte at the Conservatoire, 1798–1809. With the year 1800 we may close the first period of Boieldieu's artistic career. Boieldieu's first manner is chiefly characterised by an absence of style—of individual style at least. He began by unconsciously adopting, and reproducing with great vigour, the peculiarities of other composers, and during this earlier period matter and manner too were as yet equally far from maturity.

After one of the successful performances of the 'Calife' Cherubini accosted the elated composer in the lobby of the theatre with the words 'Malheureux! are you not ashamed of such undeserved success?' Boieldieu's answer to this brusque admonition was a request for further musical instruction, a request immediately granted by Cherubini, and leading to a severe course of contrapuntal training under the great Italian master. The anecdote rests on good evidence, and is in perfect keeping with the characters of the two men, though Fétis strongly denies the fact of Boieldieu having received any kind of instruction or even advice from Cherubini—on what grounds it is not easy to perceive. Three years later 'Ma tante Aurore' was first performed at the Théâtre Feydeau, Jan. 13, 1803, and met with great success. Meanwhile Boieldieu had, in 1802, married Clotilde Mafleuroy, a dancer, a union however which did not prove to be happy, and in 1803 he left Paris for St. Petersburg, where he was appointed conductor of the Imperial Opera. Artistically speaking, the eight years spent by Boieldieu in Russia must be called all but total eclipse. By his agreement he was bound to compose three operas a year, besides marches for military bands, the libretti for the former to be found by the Emperor. But these were not forthcoming, and Boieldieu was obliged to have recourse to books already set to music by other composers. Numerous vaudevilles and operas belong to the Russian period (see list). Only three of these were reproduced by Boieldieu in Paris; the others he consigned to oblivion. 'Télémaque' ought to be mentioned as containing the charming air to the words 'Quel plaisir d'être en voyage,' afterwards transferred to 'Jean de Paris.'

In 1811 Boieldieu returned to Paris, where great changes had taken place in the meantime. Dalayrac was dead; Méhul and Cherubini, disgusted with the fickleness of public taste, kept silence; Nicolo Isouard was the only rival to be feared. But Boieldieu had not been forgotten by his old admirers. The revival of 'Ma tante Aurore' and the first performance in Paris of an improved version of 'Rien de trop' were received with applause, which increased to a storm of enthusiasm when, in 1812, the first of the composer's two most charming operas, 'Jean de Paris,' saw the light. The second,

[1] According to L. Angé de Lassus, Boieldieu's début in Paris took place with 'La Dot de Suzette' (Théâtre Feydeau, Sept. 5, 1795). He considers 'Les Deux Lettres' to have been the work of Jadin.

'La Dame blanche,' came out in 1825 following a succession of lesser works (see list), many of which were composed in collaboration with Cherubini, Catel, Isouard and others; 'Le Nouveau Seigneur de village' (1813) and 'Le Petit Chaperon rouge' (1818), both by Boieldieu alone, may be mentioned here. After the successful production of the last-named opera, Boieldieu was appointed, in 1817, to succeed Méhul as professor of composition in the Conservatoire. The success of 'La Dame blanche' was unprecedented. Boieldieu modestly ascribes part of this success to the national reaction against the Rossini-worship of the preceding years. It kept its place in the repertory for many years and ranks high in the French school of comic opera.

Peculiar to Boieldieu is a certain homely sweetness of melody, which proves its kinship to that source of all truly national music, the popular song. 'La Dame blanche' might indeed be considered as the artistic continuation of the chanson, in the same sense as Weber's 'Der Freischütz' has been called a dramatised Volkslied. In it Boieldieu made use of some Scottish airs—the plot is a compound of two of Scott's novels, *The Monastery* and *Guy Mannering*.

The remainder of Boieldieu's life is sad to relate. He produced another opera, called 'Les Deux Nuits,' in 1829, but it proved a failure, owing chiefly to the dull libretto by Bouilly, which the composer had accepted out of good nature. Pecuniary difficulties increased the discomforts of his failing health, due to pulmonary disease apparently first contracted in Russia. The bankruptcy of the Opéra-Comique and the expulsion of Charles X., from whom he had received a pension, deprived Boieldieu of his chief sources of income. At last M. Thiers, the minister of Louis Philippe, relieved the master's anxieties by a Government pension of 6000 francs. For some time about 1833, Boieldieu lived at Geneva (see an interesting article in the *R.M.I.* vii. 269). The troubles of his last years were shared and softened by his second wife, the singer Philis Desoyres, whom the composer married, Jan. 22, 1827, after a long and tender attachment.

By her he had a son, Adrien Louis Victor (*b.* Nov. 3, 1815; *d.* Quincy, July 9, 1883), educated at the Conservatoire under his father. He wrote several comic operas, some of which have been successfully performed at the Opéra-Comique and other theatres. It was perhaps chiefly the burden of his name which prevented him from taking a more distinguished position amongst contemporary French composers. At the centenary celebration of his father's birthday at Rouen in 1875, a Mass, and a comic opera by the younger Boieldieu, called 'La Halte du Roi,' were performed with great success.

The following list summarises Boieldieu's chief theatrical works:

La Fille coupable, 1793.
Rosalie et Myrza, 1795.
Les Deux Lettres, 1796.
La Famille suisse; L'Heureuse Nouvelle; Le Pari, ou Mombreuil et Merville, 1797.
La Dot de Suzette; Zoraïme et Zulnare, 1798.
Les Méprises espagnoles; Emma, ou La Prisonnière (with Cherubini), 1799.
Beniowski; Le Calife de Bagdad, 1800.
Ma tante Aurore; Le Baiser et la quittance (with Méhul, Kreutzer and Nicolo), 1803.

Produced at St. Petersburg—

Aline, Reine de Golconde, 1804.
Amour et Mystère; Abderkhan; Un Tour de soubrette; La Jeune Femme colère, 1805.
Télémaque, 1806.
La Dame invisible, 1808.
Les Voitures versées, 1808, and choral portions of Racine's Athalie.
Rien de trop, 1810.

After his return to Paris—

Jean de Paris, 1812.
Le Nouveau Seigneur de village, 1813.
Bayard à Mézières (with Cherubini, Catel and Nicolo); Les Béarnais, ou Henri IV en voyage (with Kreutzer); Angéla, ou l'Atelier de Jean Cousin (with Mme. Gail), 1814.
La Fête du village voisin; Charles de France, ou Amour et gloire (with Hérold), 1816.
Le Petit Chaperon rouge, 1818.
Blanche de Provence, ou La Cour des fées (with Berton, Cherubini, Kreutzer and Paër), 1821.
La France et l'Espagne, 1823.
Les Trois Genres (with Auber), 1824.
La Dame blanche; Pharamond (with Berton and Kreutzer), 1825.
Les Deux Nuits, 1829.
La Marquise de Brinvilliers (with Auber, Batton, Berton, Blangini, Carafa, Cherubini, Hérold and Paër), 1831. (Pougin's Supplement to Fétis's Dictionary.)

Marguerite was produced after Boieldieu's death in 1838; and L'Aïeule, another posthumous work, in 1841. (*Q.-L.*)

F. H.

BOISDEFFRE, Charles Henri René Le Mouton de (*b.* Vesoul, Apr. 3, 1838; *d.* Vézelise, Meurthe et Moselle, Nov. 25, 1906), a composer who, in 1883, gained the Prix Chartier with his chamber compositions among which may be mentioned, PF. sonatas, 2 trios, a PF. quartet, 2 PF. quintets, and a PF. sestet, op. 43. He wrote 'Scènes champêtres,' a symphony in A minor, and other works for orchestra, a 'Messe solennelle,' and a cantata-setting of the 'Cantique des Cantiques.' Boisdeffre wrote with great elegance of style, but lacked the qualities of invention required in composers of the highest rank. (See the sketch by Hugues Imbert in *Nouveaux Profils de musiciens*, 1892.)

G. F.

BOISMORTIER, Joseph Bodin de (*b.* Perpignan, *c.*1691; *d.* Paris, *c.*1765), composer. He composed four ballet operas, of which three met with great success, the fourth was not performed; a number of cantatas, and over 50 opus numbers of instrumental works, including a large number of pieces for musette and vielle (hurdy-gurdy) which (*c.* 1725–35) were in the height of fashion, especially at the French court. He was a gifted composer, but writing at high pressure for gain detracted from the value of his work. In spite of this, however, it contains here and there a distinct gem.

E. v. d. S.

BOITO, Arrigo (the baptismal name was Enrico) (*b.* Padua, Feb. 24, 1842; *d.* Milan, June 10, 1918), was both poet and composer. His fame as a composer rests mainly on his opera 'Mefistofele,' which, first produced in 1868, is still amongst the most popular works of the Italian repertory. His poetical works include the libretti of 'Otello' and 'Falstaff' written for Verdi—by far the best libretti ever written for Italian operas.

Arrigo Boito was the son of an Italian miniature painter, Silvestro Boito, and of a Polish lady, Countess Josephine Radolinska. The marriage was not a happy one, for Silvestro Boito appears to have been unable to curb an inborn taste for adventure, and a few years after the birth of the second son, Arrigo, the unfortunate mother was left alone and almost penniless to provide for herself and for the education of her children. To this task she devoted herself with courage and devotion above praise. It was her intention to make musicians of both her sons, Camillo and Arrigo, and the first news we have of them at their studies (1851) describes Camillo (he later made a name as a writer and architect) as more proficient in his work than the younger brother. But Arrigo showed, even at this early age, an extraordinary interest in composition. During a visit to her native Poland, Mme. Boito was informed by her correspondent in Venice that Arrigo 'is always writing tunes and sonatinas. His teacher [Giovanni Buzzolla] wants me to assure you that he has in him the making of a capital composer.'

After a final break with her husband, Mme. Boito left the elder son in charge of friends at Venice and took Arrigo to Milan, where she meant him to follow his musical studies at the Conservatoire. In applying for her son's admission to that institution she set forth her tragic circumstances, and the appeal was favourably received. At first, however, Arrigo did not seem likely to distinguish himself in the school. His sense of rhythm was found to be undeveloped, and he was only saved from dismissal by the keen interest he showed in his work, his eagerness for knowledge of all kind and the pity inspired by his mother's condition. He was admitted finally to the composition class of Alberto Mazzucato and to the study of violin and pianoforte. As a corrective for his wanting rhythmical sense he was made to compose dance music. Whether the remedy had the desired effect or not, it was not long before his wider range of interests and unusual mental calibre asserted itself. The Brera library was the storehouse from which he fed his eager intellect. He mastered the rules of Italian prosody and could soon write neat verse with uncommon ease; he also mastered the classical and foreign languages. When the time came for the final examination he was already marked as one of the most promising students the famous music school had ever prepared. In 1860 his cantata, 'Il 5 giugno' was performed with considerable success at the Conservatoire, and in the following year he wrote the words and one half the music of a still more successful work, 'Le Sorelle d' Italia.' The other half of the score had been written by a fellow-student, Boito's senior by two years, who later became famous as conductor, Franco Faccio. The 'Sorelle d' Italia' attracted so much attention at the time that the Italian Government, in deference to public opinion, granted the young composers a travelling scholarship, and the two went to Paris, then the literary and artistic as well as the political Mecca of all Italians. There they met Victor Hugo, Verdi, Berlioz and Rossini, the last of whom requited the young men's homage with some kindness and hospitality. After Paris, Boito left Faccio to go to Mystki, in Poland, in order to become acquainted with his mother's relatives. While in Poland he first conceived the idea of an opera on Nero, but this scheme, which occupied him all his life and was unfinished at his death, was not pursued then very far. From Poland Boito went to Germany, then to Belgium, concluding his travels with a visit to England, where so many of his greatest countrymen had found a welcome.

On his return to Milan, Boito, young and ardent, threw himself whole-heartedly on the side of those who advocated musical reforms. The natural bias of the Italian for opera had brought about a neglect of the classics, and especially of the great Germans, which alarmed the more intelligent Milanese and was particularly galling to Boito, whose admiration for Beethoven went to the length of imitation. With these needed and urgent reforms the young writer advocated ideals which must have appeared revolutionary at the time, although, in part at least, he only foretold what has come to pass. The years from 1861–68 were the most active of his life. He had a large share in the publication of a combative weekly paper, *Figaro*; he collaborated with Emilio Praga in a comedy, 'Le Madri galanti,' which was unsuccessfully performed at Turin; he wrote words and music of an opera, 'Ero e Leandro,' of which later he destroyed the music and handed the text to Luigi Mancinelli; he wrote the text of a 'Hamlet' for his friend Franco Faccio; he contributed actively to the *Giornale della Società del Quartetto*, a musical paper edited by Alberto Mazzucato, to excite an interest in the study of classical music. He came hence to be identified with the most advanced reformers, and the legend was thus circulated that he was a follower and an imitator of Wagner. As a matter of fact, Boito's hero at the time was not Wagner but Beethoven. His understanding and admiration for Wagner

came much later, and oddly as it may seem at first, followed upon the study of Bach. Some of his articles gave offence, for he attacked both Italian music and musicians violently, and one particular essay led to a duel, in consequence of which Boito had to carry his right arm in a sling for several weeks.

The outbreak of war with Austria in 1866 found him engaged in the first sketches for his opera 'Mefistofele.' All thought of the opera was set aside, and Boito with Faccio and Praga joined the Garibaldian volunteers. After seeing active service he returned to Milan, and for a time he appears to have been undecided whether to devote his whole attention to writing and accept an offer to join the Parisian press, or to continue in the old way—a first indication of that divided allegiance mainly responsible for the lack of determination, the indecision which later prevented him from bringing sooner to a satisfactory conclusion the opera 'Nerone.' During another visit to Poland the subject of Faust again attracted his attention. But 'Mefistofele' was written rapidly in Milan in a few months, and at the beginning of 1868 the score was ready. Fortunately for Boito, the managers of the La Scala theatre were on the look-out for a new *opera d' obbligo* to complete their programme, and, well aware of the reputation the young musician had already earned amongst the more thoughtful musicians of the Lombard capital, they decided to put 'Mefistofele' to the test. The announcement revived all the antagonism between the partisans of the old and the new music, the upholders of a narrow nationalism, and the advocates of a more liberal and comprehensive criterion. The long process of rehearsal at La Scala added fuel to the flame by the enthusiasm some of the interpreters felt for Boito's music which exasperated his opponents. Long before the first performance, 'Mefistofele' had assumed the importance of a great national event. Contrary to all customs, the composer was allowed to conduct his own work, and the libretto was published and sold to the public some days before the production. On Mar. 5, 1868, the actual performance took place before an audience so deeply steeped in prejudice—either in favour or against Boito—that its verdict was bound to be worthless. That performance remains memorable in the annals of the Italian theatre on account of the extraordinary scenes witnessed, and the violence, the passions, aroused in the audience by the work of a young artist of twenty-six. Boito's appearance at the conductor's desk was the signal for a warm demonstration of sympathy, and the conclusion of the prologue was again received with the greatest enthusiasm. Strangely enough, the least traditional and most original part of the opera had apparently won over even the partisans of tradition and routine. During the other acts, however, the opposition began to assert itself, and the unusual length of the opera played into their hands. The behaviour of the audience towards the end can only be compared to that of an exasperated crowd. There was no longer a desire to understand and discriminate between faults of interpretation and the faults of the composition. For instance, deep offence was given by the singing of the plainsong of the Tantum Ergo at the coronation of 'Mefistofele' by the infernal crews. The truth is that the first act had failed to make an impression, and the enthusiasm excited by the prologue had consequently cooled down. The section of the audience which held the balance between Boito's friends and his opponents was determined that the occasion should mark either a great triumph or a great fiasco. Doubly disappointed by the first act, after the success of the prologue, it refused to listen patiently, and the evening ended in a riot which continued in the piazza outside the theatre after the doors of La Scala had been closed. Two more performances of 'Mefistofele' were given during the week, but the demonstrations continued, and the opera was finally withdrawn by order of the chief of the police.

The failure of 'Mefistofele' was a great grief to its author. But the performance had shown him certain obvious weaknesses, and these he determined to remedy, curtailing its excessive length, retouching the orchestration, adding where additions seemed advisable. The andante 'Spunta l' Aurora pallida,' and the duet 'Lontano, lontano, lontano' (the latter originally written for 'Ero e Leandro'), belong to these interpolations of the second version. Seven years had to pass, however, before 'Mefistofele' was produced again. Even then the memory of its first failure caused many to doubt the advisability of such an experiment. Bologna, however, wholly reversed the verdict of the Milanese. The prologue, imperfectly sung, did not make a deep impression; the second and third acts were only moderately well received; but the 'Sabba classico' and the epilogue were rapturously applauded, and thus the opera was saved. Since then 'Mefistofele' has had, in various Italian theatres, more than 5000 performances. Outside Italy it has been less fortunate. In Latin countries, with the exception of France, it has been quite popular. It has never been very successful in London nor in Germany or Austria.

Boito's second opera, 'Nerone,' occupied him almost his whole lifetime. He first thought of it on his first visit to Poland in 1862. On Oct. 12, 1916, he wrote the word 'end' at the close of the fourth act, signing 'Arrigo Boito and Kronos.' At his death, however, the score still needed retouching here and there, and the opera was given on May 2, 1924, after the score

had been revised by Signor Toscanini. Great interest was aroused by the performance of the opera, which all Italy had awaited for almost half a century. Indeed, the first performance had been definitely promised for the Milanese season of 1902. But at the last moment Boito withdrew it, saying that he had discovered that he did not know harmony, and had retired to Sirmione to study.

Great preparations were made in 1924 to secure an adequate performance. The rehearsals under Signor Toscanini had been many and thorough. Special attention had been paid to the spectacular side of the entertainment. Nevertheless, the production, admirable as it was, did not quite realise the expectation it had aroused. It showed but too clearly how much thought, how much anxious consideration, Boito had given to the subject of opera and to the arts of which opera consists. The result was a work in which the deepest impression was made by the grandeur of the conception and the splendour of the setting. The contrast between the Roman decadence embodied in the figure of Nero for whom 'the monstrous is beautiful' and the great purity and simplicity of the early Christians is effectively portrayed on the stage. But the most important element of all operas, the music, exquisitely tender as it often is, lacks the unifying force of character and personality. It is the music of a poet rather than of a master musician. The lyrical impulse so evident in 'Mefistofele' has been curbed, perhaps in obedience to a theory, until it has lost the power to carry the listener in its swing. The omission of the fifth act—which exists in the text but not in the opera—is also regrettable, for it robs the action of its logical conclusion.

Of his poetical works, the notable poems contained in *Il Libro dei versi* do not come within our field of survey. But he wrote also libretti for operas, all of which are of rare poetic excellence. Besides those already mentioned, he provided the text-books for 'Gioconda' (Ponchielli), 'Alessandro Farnese' (Palambo) and 'Tram' (Dominiceto). The finest work, however, is found in the two libretti he wrote for Verdi—'Otello' and especially 'Falstaff,' which must rank as his, as well as Verdi's, masterpiece. The story of the relations between the poet and the composer of 'Falstaff' has never been told in all its details. To us it seems almost inevitable that the vast knowledge and critical experience of Boito should exercise a certain influence on Verdi. What is certain, however, is that their friendship had to stand more than one serious test. The two had known one another since 1862, when Boito wrote the words of 'The Hymn of the Nations' for Verdi's music. But in his early years the opinions openly expressed by Boito about Italian music and musicians could not but estrange Verdi. A toast in which Boito expressed the hope that Italian art may escape from the clutches of the old, the senseless and the vulgar (1863) considerably annoyed Verdi, who, it is said, retaliated by excluding Boito from those who were to contribute a number to the Mass to be written by Italian composers in memory of Rossini. Ten years later Tito Ricordi, the publisher, tried to bring the two together, but it was only in 1879 that the idea of 'Otello' was first discussed, an idea suggested in the first place by Faccio and Giulio Ricordi. Another unfortunate toast very nearly defeated all their plans; for, in a speech made at a banquet in Naples, Boito was reported to have regretted the fact that he was himself unable to write the music for 'Jago'—the first title of the libretto of 'Otello.' Verdi understood this to mean that Boito did not believe him capable of writing music worthy of such a theme, and decided to return the text. Boito, however, convinced him that the words attributed to him were nothing more than the opinion of an irresponsible reporter, and the work was resumed.

The project of 'Falstaff' again appealed at first more to Boito than to Verdi, who, writing in 1889, adduced many reasons for not undertaking such a labour at his age, remarking, not without a slight touch of malice, that the public would never forgive him if the writing of the libretto of 'Falstaff' were to distract Boito's mind from the composition of 'Nerone.' As time went on, however, differences of opinion were forgotten in the deep and sincere admiration the poet felt for the other's genius, and friendship ripened into intimacy. On his part, Verdi was ready to admit the value of his collaborator. 'I have known "The Merry Wives of Windsor" fifty years,' he writes, 'and I have wished to write a comic opera for the last forty years. The usual ever-present "buts" stood in the way of my wish being fulfilled. Now Boito has answered all "buts" and has given me a lyrical comedy unlike any other.' Boito declared that of all the great musicians he had known, Verdi was the one whose society he found most stimulating and interesting. When Verdi died no one felt the loss more acutely than Boito (see Boito's letter, *Mus. T.*, 1918, p. 571).

It must be recalled here that Boito came to England in 1893, when he conducted the Prologue to 'Mefistofele' at the Jubilee Concert of the Cambridge University Musical Society (June 12), and on the following day received the degree of Doctor of Music '*honoris causa*' in the University. At a later date Oxford bestowed a similar honour.

The closing years of Boito's life were uneventful on the whole, although he took to the end an active interest in the political as well as in the artistic life of his country. Elected a Senator in 1912, he never failed to be present

in the Senate whenever an important subject was debated. In deference to the nationality of his mother he also took active part in the creation of the Polish museum in Zürich. When the war (1914) broke out he paid a visit to the front, but the discomfort and the strain of the journey told on him, and on his return to Milan he began to feel unwell. In Nov. 1917 he was present at a religious ceremony held in the church of Sant' Ambrogio. There he caught a chill from which he never recovered. Taken to a nursing-home to be operated on, he appeared to improve. On June 10 he woke up feeling much better and in excellent spirits. He was last heard singing to himself. A short time later the nurse entered his room and found him dead.

Although Boito wrote but two operas, it is not easy to form a correct or even an approximately correct estimate of his place amongst Italian composers. 'Mefistofele,' in spite of its continued popularity, begins to show unmistakable signs of age and discrepancies. The literary work—the verses, the libretti, the translations of 'Tristan,' 'Rienzi'—give us but an imperfect idea of the vastness of his mind. There was something besides taste and scholarship in the young composer who startled all Italy in 1868, something which was irretrievably lost, perhaps, during the seven years of doubts and misgivings dividing the first from the second version of 'Mefistofele,' in which the critical faculty was developed at the expense of the creative. Before the first production a friend of the composer described 'Mefistofele' as 'a second "William Tell."' The phrase was ridiculed by the admirers of Rossini, to whom it seemed incredible that a first work should equal the Rossinian masterpiece. 'Mefistofele,' as a matter of fact, bears in almost every page the stamp of a comprehensive and elastic mind. There is in the first place its remarkable literary quality. 'Mefistofele' is not like Gounod's opera, an episode, or like 'La Damnation de Faust,' a distortion of the German poet's conception. The central theme is still the antagonism between good and evil. And the musical climax is faithful to the poetic idea, for the most salient scenes are those which represent the contrast between the powers of heaven and hell. Boito, moreover, realised, as Rossini never did, the importance of the orchestra in the music drama. He is thoroughly Italian in his belief in the power of melody. But his study of Beethoven taught him to discriminate between the facile tunes which were the current coin in Italy at the time and the poignant beauty of the slow movements of the great German classics. Unfortunately, he modelled his technique on Beethoven's at a time when the world was to be converted to the new technique of Wagner.

In 'Nerone' the skill in handling harmony marks certainly an advance on the methods of 'Mefistofele.' But the opera came far too late to interest the technician. If 'Mefistofele' was given in the same year which saw the first production of 'Die Meistersinger,' 'Nerone' came after Debussy, and the Russian had revolutionised the technique of musical composition. It is said of Arrigo Boito's brother, Camillo, that he could argue a question so convincingly from opposite points of view that a final decision became impossible. Perhaps Arrigo came in time to share this ability to see problems from opposite sides and discovering that there may be something to be said for apparently irreconcilable ideals. This quality, however enviable in itself, is a doubtful boon to the composer. At any rate, ripeness and experience brought in their train irresolution and indecision, which contrast strangely with the fertility of his mind during the days of dogmatic partisanship and robust aversions.

BOLERO, a brisk Spanish dance in 3-4 time. The earliest form of its rhythm was

which later became

while to the longer notes of the accompaniment shorter melody notes were given, and *vice versâ*. Gradually the rhythm of the castanets, which were used as an accompaniment to the dance by the dancers themselves, was introduced into the music, which now assumed this form:

The bolero usually consists of two chief parts, each repeated, and a trio. The castanet rhythm above referred to mostly begins at least one bar before the melody. Good

examples of the bolero in classical music may be found in Méhul's 'Les Deux Aveugles,' Weber's 'Preciosa' (gipsy-ballet), and Auber's 'Masaniello,' as well as Chopin's bolero for piano solo, op. 19. E. P.

BOLLA, Signora, an Italian prima buffa, who sang in London at the opera in 1794.

She was a very pretty woman, and a 'pleasing, genteel actress,' who with a better voice would have been an excellent singer. She was very successful in Paisiello's 'Zingari' and in 'Nina,' which latter she chose for her benefit, with spoken dialogue instead of recitative; but this was considered an infringement of the rights of the English theatres, and after a few nights it was stopped 'by authority.' In 1802 she was singing at Paris in opera buffa with Lazzarini and Strinasacchi. J. M.

BOLOGNA. Bologna has long been known as an important centre of music. Musical studies flourished from the 16th to the 19th century, and in his study on Padre Martini, Busi affirms that already in the 13th century the cult of musical art had many and devoted followers. Of the old composers known to us some works are still to be found. Songs for 2 and 3 voices by Jacopo da Bologna (15th century) are found in the National Library, Paris, and in the Laurenziana, Florence (*Q.-L.*). Vocal compositions exist by a Benedictine friar, Bartolomeo de Bononia. Later on Pope Nicholas V. founded a chair of music in connexion with the 'Studio.' But a real school of music was established only towards the end of the 15th century.

The first impulse came from Bartolomeo Ramis da Pareja, a daring theorist and critic whose opinions were widely debated by his contemporaries, amongst whom are Nicola Burzio of Parma and an English Carmelite monk, John Hotby. The real founder of the Bologna school was Ramis's follower, Giovanni Spataro.

In the 16th century ecclesiastical music also flourished. Amongst the most ancient of the 'Cappelle Musicali' is the one attached to the Church of S. Francesco which existed already in 1537, and was first under the direction of the Franciscan, Bartolomeo da Tricarico, and later rose to European fame, thanks to the work of Padre Martini (1706–84), who was its director for over half a century.

Opera was first performed in 1608 when Girolamo Giacobbi, the maestro di cappella of the Cathedral, caused to be performed an opera entitled 'Dramatodia, or L'Aurora ingannata,' and two years later 'Andromeda'; the text of both these works was written by Count Ridolfo Campeggi. In 1616 Peri's 'Euridice' was produced under the direction of the composer and of the poet Rinuccini. Amongst the better known composers of the time are G. A. Perti, Ariosti, Sibelli, Buini; in a general way, the Bologna school of the latter half of the century reveals the influence of the Roman school of Rossi, Carissimi, and Cesti.

The most flourishing era of music in Bologna was the 18th century (De Brosses in a letter written in 1739 speaks of Bologna as 'Le grand Séminaire de la musique de l'Italie'), when Padre Martini lived and taught, admired by his contemporaries and by visitors his fame drew to Bologna from all parts of Europe. Burney visited him in 1770 (v. *Journal*), and was deeply impressed by Martini and by the singer Farinello. Academies were then fashionable, and Bologna had some forty of them, of which four were devoted to music—Accademia dei Concordi (1615); Accademia dei Filomusi (1622); Accademia dei Filaschisi (1633), and Accademia dei Filarmonici. Of these, most important by far is the last (later called Accademia Filarmonica) which still exists. It was founded in 1666 by Marchese Vincenzo Maria Carrati, and admission was gained after a difficult examination in counterpoint. Mozart was admitted in 1770 when he was only 14 years old, after astounding his examiners—including Padre Martini—by his wonderful skill.

Amongst the notable musicians living in Bologna at the time mention must be made of Antonio Bernacchi, who taught some of the most celebrated singers of the day, including Anton Raaff of Gelsdorf, later considered the best living interpreter of German music. (See L. Frati, *Antonio Bernacchi e la sua scuola* in *R.M.I.* xxix. 473.) Theatres were also flourishing, and the Teatro Comunale, built on the plans of Bibbiena, was opened in 1763 with 'Il Trionfo di Clelia' of Gluck.

At the beginning of the 19th century the musical life began to decay, owing to the political situation. New impetus, however, was given to the study of music by the foundation in 1804 of the Liceo Musicale, established by the municipality with six classes, including the composition class entrusted to a pupil of Martini, Padre Stanislas Mattei. The Liceo still resides in the Convento di S. Giacomo where its activities first began. Soon, however, the general apathy overtook the new institution, and a remedy was sought with the appointment of Rossini as 'councillor' to the institution in 1839.

Rossini, however, left Bologna in 1861, and the direction of the studies was given sometimes to an individual, sometimes to a committee until Luigi Mancinelli was appointed in 1886. But it was his successor Giuseppe Martucci who during his years of office (1886–1909) raised the importance of the school and the musical life of the city to an eminent position. Martucci was followed by Enrico Bossi (1902–11), and Bossi by Busoni (1914–1915). In 1915 the post was given to Gino

Marinuzzi who relinquished it two years later, and was succeeded by Franco Alfano (1918–1923).

Two musical events of considerable importance stand out in the recent history of Bologna, the first is the reversal of the unfavourable verdict of the Milanese on Boito's 'Mefistofele' (1885), and the second the first successful production of 'Lohengrin' on an Italian stage in Nov. 1871.

An important season of opera is given every year in the autumn at the Teatro Comunale. Two societies—the 'Società del Quartetto' and the 'Società del Risveglio' are mainly responsible for concert performances. The first of these has old and high traditions. Other societies exist which cultivate modern music. (See also LIBRARIES and COLLECTIONS OF MUSIC.) G. M. G.; trans. F. B.

BOLT, JOHN (*b.* 1564; *d.* Aug. 3, 1640), a famous player on the virginals, who lived at the English court for three years.

He joined the Roman Church in 1588, and was organist to Sir John Petre. He was arrested as a papist in 1594, and went to Brussels, where he was organist 1608–11, and thence to Louvain, where he was organist of St. Monica's convent, 1611 till his death. He became a secular priest at Douai, 1605. Queen Elizabeth thought highly of him for his voice and skill in music. W. H. G. F.

BOMBARDON, BOMBARD, BASS-POMMER or BRUMMER, were originally names of the deeper varieties of the oboe or bassoon family; the bombardon, or contra-bass pommer, the largest instrument, reaching to F. These large instruments differed from the bassoon in being in one length without bend (the crook only excepted), and in having a much more limited compass. There are examples of 16th-century date in the Hochschule für Musik at Berlin, and in the Conservatoire Royal de Musique, Brussels (see OBOE). From these the name was transferred to a bass reed stop on the organ, with 16-foot tone. In the *Traité de l'orgue*, by Dom Bédos, it appears that the stop was sometimes carried down to 32-foot F. It was mainly employed in accompanying plain-chant.

The name is now applied to the lowest pitched of the brass valved instruments, as made with large calibre and broad quality of tone. As valves were applied to instruments of this type before the date of Sax's improvements, the bombardons may be considered as a group by themselves and apart from the SAXHORNS (*q.v.*), which are more particularly a series of instruments of the bugle type, ranging from soprano to baritone in compass. (See TUBA.) D. J. B.

BOMTEMPO, JOÃO DOMINGOS (*b.* Lisbon, Dec. 28, 1775; *d.* there, Aug. 18, 1842), an important Portuguese musician and composer who settled in Paris 1795, visited London, returned to Paris, and finally went back to Lisbon in 1820 and founded a philharmonic society which lasted till 1823. In 1833 he became head of the Conservatoire.

The following published works deserve mention: 'Varições sobre o fandango'; Capriccio and God Save the King with variations; 'Messe de Requiem à la mémoire de Camoëns' (4 v., and orch.); quintet for PF. and strings; 4 PF. concertos and a 'Methodo de piano' (London, 1816). Among those left unpublished are Responsorii for Queen Carlotta Joaquina (1822); Missa solenne for the promulgation of the Constitution (1821); Requiems for Maria I. and Pedro IV.; 'Alessandro in Efeso,' opera seria. His style is clear and dignified, obviously formed on Handel and Haydn. F. G.; addns. J. B. T.

BONA, FRA VALERIO (*b.* Brescia, *c.* 1560 *d.* ? Verona, after 1619), a Franciscan friar and maestro di cappella successively at San Francesco, Vercelli (1591); then Mondovi; San Francesco, Milan, 1596; the cathedral, Monti Regali, 1601. He was musician at St. Francesco, Brescia, in 1611, and prefect at St. Fermo Maggiore, Verona, in 1614. Bona composed a considerable number of masses in 6 and 8 parts; and for 2 and 4 choirs; also litanies, Lamentations, motets, canzonets, madrigals, etc., all in polyphonic style, and often for 2 choirs; also a work on counterpoint and one on harmony. (For list see *Q.-L.* and *Fétis.*) E. V. d. S.

BONAVENTURA, ANTERUS MARIA DE S., a 15th/16th century Minorite friar of S. Francesco, Brescia, was the author of *Regula musicae planae*, which appeared in many editions between 1500 and 1545. In MS. his *Compendium Musice* (1511) and *Brevis collectio artis musice* (1489) exist still. E. V. d. S.

BONAVIA, FERUCCIO (*b.* Trieste, 1877), music critic on the staff of the *Daily Telegraph*: studied music in Milan. Bonavia played the violin in Richter's orchestra for ten years, during which time he contributed articles on musical subjects to the *Manchester Guardian*, for which he was musical correspondent. About 1920 he gave up this post to join the staff of the *Daily Telegraph*. He has written compositions for the violin (Schott), and a quartet and octet for strings by him have been played by Brodsky at Manchester and elsewhere. He also wrote the music for the Manchester University performance of Aeschylus' 'Choephori,' which he conducted. C.

BONCI, ALESSANDRO (*b.* Cesena, near Bologna, 1870), one of the best of living Italian tenors. He received his musical education at the Pesaro Lyceum, then under the direction of Carlo Pedrotti, his vocal teacher being Professor Coen. His studies extended over 5 years, and to the care with which his

voice was placed before he attempted to sing in public he attributes much of his success. For a time he was principal tenor in the Loreto choir, but the stage claimed him, and in due course he made his début at Parma, appearing as Fenton in 'Falstaff.' His charming voice won him immediate recognition, and in a few years he took a high position. He came to London in 1900, his first part at Covent Garden being Rodolfo in 'La Bohème.' His success was beyond question, but Caruso's appearance, two years afterwards, told against him, and it cannot be said that he reached in England quite the place that under other circumstances might have been his. He took part in the disastrous season at the Waldorf Theatre in 1905, singing with great charm in some operas of the old repertory, and was back at Covent Garden in 1908 when, for the first time in England, he sang Faust and also sang in 'Il Barbiere' with Madame Luisa Tetrazzini. Always a favourite in America, Bonci toured in the States in the winter of 1920–21, and repeated his visit a year later. During these tours he appeared occasionally on the stage, but was chiefly occupied in giving song recitals. It is worthy of notice that his enunciation of English was warmly praised. During the winter 1922–23 he was at the Costanzi Theatre in Rome, and in addition to his stage work took part in some memorable performances of Verdi's Requiem. Bonci is essentially a lyric tenor; he does not attempt the strongly dramatic parts, restricting himself to the music that suits his voice and style. He has been described, not inaptly, as the Giuglini of his day. S. H. P.

BOND, Capel (*d.* 1790), a mid-18th-century composer and organist, conductor and organist of the first Birmingham musical festival in 1768. He composed '6 Anthems in score, one of which is for Christmas Day' (1769). This work had at least 6 editions, as the copy in the R.C.M. shows. In 1766 appeared 'six concertos in 7 parts.' E. v. d. S.

BOND, Hugh (*d.* 1792), appointed lay-vicar of Exeter Cathedral in 1762, was also organist of the church of St. Mary Arches in that city. He published 'Twelve Hymns and Four Anthems for four voices' of his composition. W. H. H.

BONI, Guillaume[1] (*b.* St. Flour, 1st half of 16th cent.), master of the children in the choir of St. Étienne at Toulouse. He composed the sonnets of Pierre Ronsard (Paris, 1579), several editions to 1624, also 2nd book; 'Les Quatrains (21) du sieur de Pibrac a 3-6 voc.' (1582); 'Lib. 1 Modulorum a 5-7 voc.' (1573); 'Psalmi Davidici' (1582) (*Q.-L.*).

BONINI, Severo (*b.* Florence), pupil of Giulio Caccini, entered the Benedictine monastery of Vallombrosa, Toscana, was organist at S. Mercuriale at Forli, in 1615, or possibly 1613. He was one of the first composers in the monodic style, and wrote: 'Madrigali et canzonette spirituali a una voce sola sopra il chitarrone o spineta' (lib. 1-2, 1607–9); 'Motetti a 3 voc. e B. cont.' (1609); 'Affetti spirituali a 2 voc. parte in istilo Firenze o recitativo' (1615); also a setting of Rinuccini's 'Lamento d' Arianna,' in the recitative style (1613). He also wrote a treatise, *Prima parte de' discorsi e regole sovra la musica* (MS.), which is preserved in the Bibl. Riccardiana, Florence. This treatise, which is of great historical interest, has been republished by Solerti, *Origini*, p. 129. E. v. d. S.

[1] Fétis and Labat erroneously call him 'Gabriel.'

BONMARCHÉ, Jean (*b.* Ypres or Valenciennes, 1520), Belgian composer. He was canon and master of the children at the church at Cambrai. In 1565, having acquired a reputation as one of the best musicians in the Low Countries, he entered the service of Philip II. of Spain, as master of the Royal Chapel. He appears to have retired to Valenciennes late in life. Many of his masses and motets exist in MS., but the only work of his known to have been published is an 8-part motet which appeared in the collection of Clemens Stephani, 'Cantiones triginta selectissimae, quinque, sex, septem, octo, duodecim et plurimum vocum . . . .' Nuremberg, 1568. The name here appears as 'Bonmarchié' (*Fétis*). J. Mk.

BONNET, Joseph (*b.* Bordeaux, Mar. 17, 1884). At 14 years of age he became organist at St. Nicholas, Bordeaux, going shortly after to Paris, where he became a pupil of Guilmant at the Conservatoire. He was appointed to St. Eustache, Paris, in 1906, and soon established himself as a player of the first rank. Later he made successful tours as a recitalist in England and America. His organ compositions comprise 3 sets of Twelve Pieces, and a few works for concert use. H. G.

BONNO (Bono), Giuseppe (*b.* Vienna, 1710; *d.* there, Apr. 15, 1788), son of one of the imperial running footmen. He studied composition at Naples at the Emperor's cost, and in 1738 was taken into the imperial Hofkapelle as Hofscholar, from which he rose to be Hofcompositeur (1739), and, on Gassmann's death, Hofkapellmeister (1774). He was essentially a court musician.

His oratorios were performed after Lent at the court chapel, and his 'festi teatrali,' or occasional cantatas, were mostly performed by archduchesses before their imperial parents. Bonno was for many years vice-president of the Tonkünstler Societät, and the society performed his oratorio of 'Il Giuseppe riconosciuto' (1774). The scores of 25 other pieces, serenatas, pastorales, oratorios, masses and hymns, are preserved in the Imperial Library and the Musik-Verein at Vienna, and they show a very moderate amount of invention, sufficient to meet the wants of the time and the

society in which he lived, but no more. He must, however, have had some qualities to make up for these defects, for Mozart (writing Apr. 11, 1781, of the performances of one of his symphonies under Bonno's direction) calls him 'der alte ehrliche brave Mann.' A fine Amen by him, in the grand Italian style, is engraved in the Fitzwilliam music from an unfinished Mass in the collection at Cambridge.

C. F. P.

BONNY BOOTS, the nickname of a man who appears to have been both a singer and dancer of unequalled ability at the court of Elizabeth, a devoted adherent of the Queen, and—as may be inferred from the style in which he is mentioned in verses published during her lifetime—a personal favourite of hers. He is mentioned in the 9th and 25th Madrigals of the 'Triumphes of Oriana,' published in 1601, also in the 1st and 9th of Morley's Canzonets published in 1607 (see Fellowes, *English Madrigal School*, vol. iii.).

BONOMETTI, Giovanni Battista, published in 1615 'Parnassus Musicus Ferdinandaeus,' which contains one of the richest and most representative collections of motets, etc., by 16th-century Italian composers.

E. v. d. S.

BONONCINI (Buononcini), a family of musicians in the 17th and 18th centuries.

The father, (1) Giovanni Maria (*b.* Modena, *c.* 1640; *d.* there, Nov. 19, 1678), was chief musician to the Duke, maestro di cappella of the church of San Giovanni in Monte there, afterwards (*c.* 1675) of the cathedral, and a member of the Accademia dei Filarmonici of Bologna.

He was a competent and productive artist, who left compositions in many classes, vocal and instrumental, and a treatise on *Musico prattico* (Bologna, 1673, 1688), which was translated into German, and is a clear and sensible work, still of use to the student. Five MS. operas are in the State collection at Dresden, and many masses, cantatas, sonatas, etc. (see *Q.-L.*).

His son, (2) Marc Antonio (*b.* Modena, 1675; *d.* Rome, July 8, 1726), appears to have travelled much, and to have been for some years in Germany—though this may be merely a confusion with his brother. In 1714 he was at Rome, in 1721 maestro di cappella to the Duke of Modena. Six operas of his are mentioned as remaining in MS. His 'Camilla,' which has been published, had an extraordinary popularity abroad, and in England ran 64 nights in 4 years (Burney, *Hist.* iv. 210). (See *Q.-L.*)

He was apparently the best of the family, though his light is considerably obscured by his brother, (3) Giovanni Battista (*b.* Modena, 1672), who for the most part spelt his name 'Buononcini,' and on whom, rightly or wrongly, the fame of the family rests. He was instructed by his father and by Colonna, and according to Eitner his op. 2 appeared in 1678.

He was a musician of undoubted merit, though not of marked originality, who suffered from too close comparison with Handel and from a proud and difficult disposition very damaging to his interests. His first entrance into the musical world was as his father's successor at San Giovanni in Monte; afterwards he was attached to the court of Vienna at or about 1692. His earliest operas, 'Tullo Ostilio' and 'Serse,' were given at Rome 1694. In 1696 we find him and Ariosti at the court of Berlin, when Handel, then a lad of 12, was there too for a time (Chrysander's *Händel*, i. 52). At Vienna he was court composer from 1700–11, and a very prominent personage; but from 1706–20 his time seems to have been divided between Vienna and Italy. In the latter year he received a call to London.

A great impulse had been given to Italian opera by the establishment of the Royal Academy of Music. Handel was director, and Bononcini and Ariosti were invited over to place the new institution on the broadest possible basis. Bononcini was received with extraordinary favour, and there are perhaps few subscription-lists so remarkable as that to his 'Cantate e duetti' (1721), for the large number of copies taken by individuals of rank. In England at that time everything was more or less political, and while Handel was supported by the Hanoverian King, Bononcini was taken up by the great houses of Rutland, Queensberry, Sunderland and Marlborough. From the Marlborough family he enjoyed for many years an income of £500, and a home and an agreeable position in their house. His connexion with the Academy continued for 7 or 8 years, during which he produced the operas of 'Astarto' (originally given in Rome, 1714, revived in 1720), 'Crispo' (1722), 'Erminia' (1723), 'Farnace' (1723), 'Calfurnia' (1724), 'Astyanax' (1727) and 'Griselda' (1722)—though that was suspected to be really his brother's (see Burney's *Hist.* iv. 284). All these pieces were well received, and 'Astarto' ran for 30 nights. An episode of his operatic career was the joint composition of the 3 acts of 'Muzio Scevola,' in 1721, by Filippo Mattei, or Pippo (Chrysander, ii. 56)—Bononcini, and Handel. Bononcini's act was superior to Mattei's, but the judgment of the public was so unmistakably in favour of Handel's as to allow of no appeal. On the death of Marlborough, June 16, 1722, Bononcini was commissioned to write the anthem for his funeral in Henry VII.'s Chapel (Aug. 9), to the words 'When Saul was king over us.' It was afterwards published in score, and has fine portions, though it is very unequal. About the year 1731 the discovery that a madrigal to the words 'In una siepe ombrosa,' which had been submitted to

the Academy of Ancient Music (see also Greene, Dr. Maurice) some years previously as his composition, was a mere transcript of one by Lotti, led to a long correspondence, and caused a great deal of excitement and much irritation against Bononcini, and was the first step in his fall. It is difficult to understand why a man of his abilities, whose own madrigals were well known and highly thought of (see Hawkins's testimony), should have borrowed from another composer, if indeed he did borrow Lotti's music at all—which is by no means certain (Hawkins, ch. 185). The pride and haughty temper of the man, which closed his lips during the whole contest, was probably a chief reason for the feeling against him. It is certain that it led to the severance of his connexion with the Marlborough family, which took place shortly after this affair. He produced a pastoral play or 'Serenata' at the King's Theatre in 1732, which followed on the production of Handel's 'Acis,' and this seems to have been his last important venture in London. He then attached himself to a certain Count Ughi, who professed to have the secret of making gold, went to France, and remained there for some years. There we catch sight of him once more, playing the violoncello to a motet of his own in the Chapel of Louis XV. In 1748 he was sent for to Vienna to compose the music for the Peace of Aix-la-Chapelle (Oct. 7), and soon after left Vienna to be composer to the Opera at Venice.

Besides the operas ascribed to him—22 in all—and the other works mentioned above, before leaving Bologna he published 4 masses for 8 voices each, duetti di camera, and an oratorio, 'Il Giosuè.' Four other oratorios, a Te Deum, etc. etc., remain in MS. at Vienna and elsewhere. 'S. Nicola di Bari,' and a Psalm, 'Laudate pueri,' are in the R.C.M.; the Fitzwilliam Collection, Cambridge, contains an act of the opera 'Etearco,' madrigals and motets, a Mass, and many cantatas, duets and divertimenti. Novello, in his 'Fitzwilliam Music,' published 4 movements, of which the Sanctus and Pleni sunt, from a Mass, are the finest, and they are very fine. (See *Q.-L.*) G.

BONPORTI (Buonporti), Antonio Francesco (*b.* Trent, 1660[1]), composer. As he was Aulic Counsellor to the Emperor of Austria, it is possible that he belonged to the Imperial private chapel during the first half of the 18th century and that he died in Vienna. Some of his compositions being dedicated to the Grand Duke Karl Leopold of Mecklemburg-Schwerin, it is also possible that his death occurred at Schwerin. The number of his works amounts to twelve; the first, sonatas for two violins and bass, appeared at Venice in 1696. 'Le Triomphe de la Grande Alliance,' op. 8, consisting of 100 minuets for violin and bass, and his 'Concertini e serenate con arie variate . . .,' op. 12, were printed at Augsburg in 1741. His op. 10, entitled 'La Pace,' containing 10 'Invenzioni' for violin and bass (Trient, 1714; Amsterdam, 1715), is very remarkable. Four of these were published in the *B.-G.* (vol. xlv. pp. 172, 189) after an autograph MS. from Bach; they were recognised as being the compositions of Bonporti by Dr. Werner Wolffheim (*Zeitschrift* of the I.M.G., Jan. 1912), then by Charles Bouvet (*Bulletin* of the Société Française de Musicologie, No. 2 (May 1918), and reprinted through the latter's care (Durand, Paris). M. L. P.

[1] *Fétis*; *Q.-L.*; but 1672 according to other sources.

BONTEMPI, Giovanni Andrea Angelini (*b.* Perugia, *c.* 1630; *d.* there, June 1, 1705), the son of a citizen of Perugia named Angelini, adopted the name of Bontempi from a rich citizen, Cesare Bontempi, who was, according to one account, his godfather. He is said to have been an artificial soprano, and sang in the choir of St. Mark's, Venice, from 1643 to the middle of the century, when he went to Dresden, either in 1647 or 1650 (Fürstenau, in various books on the music at Dresden, gives contradictory information, and in one, *Beiträge*, says that he was at the court of Brandenburg in 1644).

At Dresden he was befriended by Heinrich Schütz, and in 1666 was appointed Kapellmeister as coadjutor to Schütz. After a year he gave this up, and devoted himself to science, architecture, etc. He went in 1669 to Italy, and after a final visit to Dresden in 1671, settled down in his native city. He wrote 3 theoretical works: *Nova quatuor vocibus componendi methodus* (Dresden, 1660, dedicated to Schütz); *Tractatus in quo demonstrantur convenientiae sonorum systematis participati* (1690); and *Historia musica*, etc. (Perugia, 1695). His operas were 'Paride' (1662), published in Dresden with Italian and German words; 'Dafne,' written with Peranda (1672); and 'Jupiter and Io' (1673). (See *Q.-L.*; *Riemann.*) M.

BOOM, (1) Jan van (*b.* Rotterdam, Apr. 17, 1783), a flautist who belonged to the band of King Louis Bonaparte, settled at Utrecht, and made many successful tours in Germany. His works chiefly consist of bravura pieces for the flute.

His son, (2) Jan (*b.* Utrecht, Oct. 15, 1807; *d.* Apr. 1872), was brought up as a pianist, and after a tour in Sweden and Denmark in 1825 settled at Stockholm, where in 1849 he became professor in the Academy and Music School. In 1862 he visited the chief capitals of Europe to examine the systems of musical education. He gave up his post in 1865. He composed symphonies, quartets, trios and pianoforte pieces of every description.

Another son, (3) Hermann (*b.* Feb. 9, 1809;

JOHN BEARD

From a mezzotint by J. Faber after J. M. Williams

G. B. BONONCINI

From a painting attributed to Hogarth at the Royal College of Music

d. Amsterdam, Jan. 6, 1883), was an excellent flautist, a pupil of Tulou, settled in Amsterdam in 1830. F. G.

BOOSEY & CO., music publishers and musical instrument manufacturers, established in 1816 by Thomas Boosey.

He began business as an importer of foreign music, and was one of the very few persons then engaged in that trade. Subsequently he became the English publisher for Hummel, Romberg, De Beriot, Rossini, Vaccaj, Mercadante and other well-known composers. The house was afterwards identified with the Italian operas of Bellini, Donizetti and Verdi, until 1854, when a decision of the House of Lords deprived it of all its foreign copyrights. This judgment caused the firm to lose 'La Sonnambula,' 'La Traviata,' 'Il Trovatore' and 'Rigoletto,' four of the most valuable properties that have existed in the music trade. G.

The firm's modern catalogue includes a number of important English choral works which are given at the concerts of the Westminster Choral Society as well as songs of the type propagated by the London Ballad Concerts (Albert Hall). C.

In addition to their original business of music publishing, Boosey & Co. carry on an important business in the manufacture of wind instruments. This originated about the middle of last century, and has been gradually developed and extended. The first extension was in 1856, when the firm entered into arrangements with the late R. S. Pratten, the flautist, to work out his ideas in flutes, and to manufacture the instruments. In 1868 they purchased the business of Henry Distin, the acquisition of whose factory and plant enabled them to develop their brass instrument manufacture. In 1874, when the firm removed from Holles Street, Cavendish Square, to their present premises in 295 Regent Street, the name of Distin & Co., which had been used in connexion with the section of the business formerly Henry Distin's, was given up, and the whole has been carried on since that date under the name of Boosey & Co. only. In 1876 their factory was installed at Stanhope Place, Marble Arch, but these premises were totally destroyed by fire in 1913, and have since been rebuilt and largely extended on the most complete modern lines. In 1879 the manufacture of clarinets and other reed instruments, including saxophones, was added to the brass and flute departments. In addition to the Clinton clarinets the firm have several specialities, notably the compensating pistons for brass instruments, designed to correct the error in ordinary pistons due to the sharpening effect of valves used in combination (see VALVE).

D. J. B.

BORD, (1) ANTOINE JEAN DENIS (*b.* Toulouse, Oct. 13, 1814; *d.* Mar. 5, 1888), a piano-maker in Paris. He learned his craft in Marseilles, then at Lyons, and when 19 years old settled in Paris. He started business in 1843, and exhibited at the Exhibition of 1844 (Paris).

His claims to special notice as a piano-maker are founded upon his invention, in 1843, of the pressure, or Capo Tasto, bar; his introduction in 1857 of the 'Bibi'—the French name of the ungrammatical English 'Pianette'—a very small upright piano, and of a spiral hopper spring first employed in those instruments.

A. J. H.; rev. M. L. P.

His nephew, (2) ANTONIN (*b.* Toulouse, 1853), succeeded him. The firm still exists, but passed into other hands, under the name of A. Bord, on the death of Antonin.

BIBL.—CONSTANT PIERRE, *Les Facteurs d'instruments de musique, les luthiers et la facture instrumentale.* Paris, 1893.

M. L. P.

BORDE, JEAN BENJAMIN DE LA (*b.* Paris, Sept. 5, 1734; *d.* July 22, 1794), became a pupil of D'Auvergne for the violin, and of Rameau for composition, and ultimately attained great eminence as an amateur composer. He wrote nearly 50 operas of a more or less trifling kind, many songs for single voice, and several works on music, among which the *Essai sur la musique ancienne et moderne* (1780) is the most important. The 4 volumes of his *Choix de chansons mises en musique* (1773), with their charming illustrations, have become a bibliographical rarity. Some of the contents were edited separately by Miss L. E. Broadwood. De la Borde was guillotined July 22, 1794.

M.

BORDES, CHARLES (*b.* la Roche-Corbon, near Vouvray, Indre-et-Loire, May 12, 1863; *d.* Toulon, Var, Nov. 8, 1909), studied piano with Marmontel and composition under César Franck. He devoted all his short life to the revival of polyphonic, sacred and secular music and, generally speaking, to the musical art of the past, from the time of his appointment, in 1887, as maître de chapelle and organist at Nogent-sur-Marne. In Mar. 1890 he went to Paris to act in the first-mentioned capacity at St. Gervais, where his performances attracted an immense amount of attention. He gave César Franck's 3-part Mass with the co-operation of the composer (June 1890); Schumann's Mass, op. 147 (Feb. 8, 1891); Palestrina's Stabat Mater, Allegri's Miserere (Mar. 26, 1891). In 1892 he grouped his singers in an association, under the name of 'Chanteurs de St. Gervais,' for the performance of church music of the 15th, 16th and 17th centuries, and of Gregorian chant. On Jan. 28, 1892, they executed works of Victoria, Josquin des Prés, Palestrina, etc.; a series of musical services was arranged, the 'Semaines saintes de St. Gervais,' the first of which took place with the assistance of V. d'Indy. From 1893 a large number of concerts was given by

this society, notably a series during the Paris Exhibition of 1900 : its success and popularity did not decrease after its rupture with the church from which it took its name. For the society's use Bordes published an *Anthologie des maîtres religieux primitifs*; this, and a remarkable work, *Archives de la tradition basque*, undertaken under the authority of the Minister of Education in 1889 and 1890, made his name widely known. He was the founder of the Schola Cantorum, in Oct. 6, 1894, as a society of sacred music, transformed into a school for the restoration of church music, Oct. 15, 1896, when Bordes was professor. In 1899 Bordes founded the 'Schola' of Avignon, and in 1905 that of Montpellier. Bordes also wrote orchestral and PF. works, given at the Société Nationale in Paris, a Fantasie on a Basque theme for piano and orchestra, an orchestral Fantasie with trumpet obbligato, motets, choruses, spiritual dialogues, of which 'Domine, puer meus jacet' is of great interest, and 33 songs (1883–1908), perhaps the most original and characteristic part of his production, with pianoforte accompaniment. His 3-act musical drama 'Les Trois Vagues' (1892–98) was left unfinished, and is preserved at the Bibliothèque de l'Opéra, Paris.

Bibl.—Octave Séré, *Musiciens français d'aujourd'hui* (1921); *Revue musicale*, 1924, No. 10; Paul Dukas, *Charles Bordes*; G. Samazeuilh, *Un Drame basque de Charles Bordes. Catalogue of Bordes' Works.* G. F.; addns. M. L. P.

BORDES-PÈNE, Mme. Léontine Marie (*née* Pène), sister-in-law to Charles Bordes (*b.* Lorient, Finistère, Nov. 25, 1858; *d.* Rouen, Jan. 24, 1924), a remarkable pianist and great interpreter of the French pianoforte works belonging to the end of the 19th century. She obtained the first pianoforte prize at the Conservatoire in 1872 and was the first performer, with E. Ysaÿe, of Franck's violin sonata, at Brussels. To her he dedicated 'Prélude, aria et finale,' and Vincent d'Indy, his 'Symphonie sur un thème montagnard' for orchestra and piano, which she played for the first time (Paris, 1886). She was active in propagating the music of Franck, Chabrier, Duparc, Chausson, Bordes, de Bréville, Fauré and others. Struck with paralysis in 1890, she retired to Rouen, where she died after a successful teaching career.

Bibl.—V. d'Indy, *Madame Bordes-Pène* (*Tablettes de la Schola*, 1924, No. 4); G. Samazeuilh, *Madame Bordes-Pène* (*Revue musicale*, 1924, No. 10). M. L. P.

BORDOGNI, Giulio Marco (*b.* Gazzaniga, near Bergamo, 1788; *d.* Paris, July 31, 1856), pupil of Simone Mayr, appeared with great success as tenor at Milan from 1813–15, and was engaged at the Théâtre Italiens, Paris, 1819–33.

His chief claim to remembrance is based on his great renown as a teacher of singing; he was engaged from 1820–23 at the Paris Conservatoire, and after an interval again appointed, retaining his place for many years. He wrote a large number of 'vocalises' of great practical use (*Riemann*).

BORDONI, Faustina, see Hasse (1).

BORECKY, Jaromir, D.Ph. (*b.* Budějovice, southern Bohemia, 1869), director of the University Library of Prague; musical critic of the *Narodni Listy* and from 1893–1910 chief editor of the musical journal *Dalibor*. His *Brief Summary of the History of Czech Music* (in Czech), described also as a supplement to Riemann's *Catechism of Musical History*, is an invaluable guide to the student as far as the beginning of the present century. R. N.

BORETTI, (1) Giovanni Antonio (*b.* Rome, *c.* 1640), composed a number of operas between 1662 and 1672, 8 whereof are enumerated by Fétis and 6 in *Q.-L.*; also an oratorio, a cantata and a vocal duet. Fétis calls him Jean André, but (2) Giov. Andrea was a late 17th-century composer, two of whose madrigals appear in Playford's 'Scelta di canzonette,' 1679. E. v. d. S.

BORGHI, (1) Adelaide (*b.* Bologna, Aug. 9, 1829; *d.* there, Sept. 29, 1901), was a favourite mezzo-soprano opera singer.

After vocal instruction from Pasta she made her début in 1846 at Urbino in Mercadante's 'Il Giuramento.' She sang next at Messina, where she married Sig. Mamo, and later in other Italian towns, and at Vienna. From 1856–60 Mme. Borghi-Mamo was singing in Paris both in Italian and French opera. In 1860 she sang with approval for a season in England, making her début Apr. 12, as Leonora ('La Favorita') at Her Majesty's Theatre. She also sang in concerts, and at the Norwich Festival, after which she returned to Italy. Her daughter,

(2) Erminia, also an opera singer in Italy and Paris, sang the soprano parts in Boito's 'Mefistofele' on its very successful revival at Bologna. A. C.

BORGHI, Giovanni Battista (*b.* Orvieto, *c.* 1740; *d.* Italy, after 1800), composer and singer. His first opera, 'Alessandro in Armenia' (1768), he looked upon as a study and never had it performed. In 1770 he became organist at the cathedral of Loreto, and in 1771 his 'Ciro' was performed at Venice, but proved a failure, with the result that he did not succeed in having any of the four operas performed which he wrote between 1773–80. In 1783 his opera 'Piramo e Tisbe' was given at Florence and pleased so much that it became a repertory opera in all Italian theatres, which then produced also his previously composed operas as well as new ones. In 1798 he had his 'Semiramide' performed at Vienna, and from there he visited Russia, returning to Italy in 1800. Fétis and Clément mention 9 of his operas. E. v. d. S.

BORGHI, Luigi, a violinist and composer;

pupil of Pugnani; appeared in London as a violinist in 1774, as a viola-player in 1777, and settled there in about 1780; he was leader of the second violins at the Handel Commemoration in 1784, and second violin in Cramer's quartet at the professional concerts. He composed with others the opera 'Dames' in 1783, was manager of the Italian Opera at the Pantheon (1790), and married the prima donna Cassentini. He published 'Litanies de la Vierge à 4 voix' in Paris; vln. soli; duos for vlns., vln. and alto, vln. and v'cl.; vln. concertos symphonies for orch., and a set of Italian canzonets. P. D.; addns. E. v. d. S.

BORGO (Borgho, Borghi), Cesare, a 16th-century Milanese composer. Fétis mentions 2 books of 8-part masses and 2 books of canzonets. Eitner has only been able to trace one book of masses (1602) and one book of canzonets, published in 1584 and again in 1591; also some motets, hymns, etc., in collective volumes. E. v. d. S.

BORIS GODOUNOV, opera by Moussorgsky; the text founded on Poushkin's poem. Produced Maryinsky Theatre, St. Petersburg, Jan. 24 (Feb. 6), 1874; a revised version by Rimsky-Korsakov, St. Petersburg, 1876; Paris, 1908; New York, Metropolitan Opera House, Mar. 19, 1913; Drury Lane, June 24, 1913; in English (Beecham), Birmingham, Feb. 1917.

BORJA (Borgia), S. Francisco de, Duke of Gandía (*b.* Gandía, Oct. 28, 1510; *d.* Rome, 1572), Saint, and General of the Company of Jesus, who also wrote music. His works, the authenticity of which has never been doubted, consist of music for a mystery play on the Resurrection, a Mass for 4 voices, and various motets, preserved in the Collegiate Church of Gandía. He was also a great designer of processions and ceremonies accompanied by trumpets, hautboys, bassoons and organ.

J. B. T.

BORJON, Charles Emmanuel (incorrectly Bourgeon) de Scellery (*b.* Pont-de-Vaux, Bresse, 1633; *d.* Paris, May 4, 1691), advocate in the Parlement of Paris, author of many law books, and an eminent amateur.

He was a remarkable performer on the musette, and author of a *Traité de la musette avec une nouvelle méthode pour apprendre de soy-même â jouer de cet instrument facilement et en peu de temps* (Lyons, 1672), which contains a method of instruction, plates and airs collected by him in various parts of France. It is a work of interest concerning wind instruments and their makers at that time.

M. C. C.; addns. M. L. P.

BORLASCA, Bernardino (*b.* Gavio, near Genoa, late 16th cent.). He came of a noble family. In 1610 he was a musician in the Munich court chapel; in 1612 vice-Kapellmeister; and in 1617 court Kapellmeister. In 1621–23 he was again vice-Kapellmeister at that court, and in 1624 only Konzertmeister. Borlasca composed music of most varied nature: 'Scherzi musicali ecclesiastici sopra la cantica a 3 voci,' 1609; 'Canzonette a 3 voci,' 1611. E. v. d. S.

BORNE, Fernand le (*b.* Charleroi, Mar. 10, 1862), of Belgian origin, ranks as a French composer, having been a pupil of Massenet, Saint-Saëns and César Franck, so that he has passed under varied influences. He has brought out the following works for orchestra:

'Scènes de ballet,' 'Suite intime,' 'Symphonie dramatique,' 'Aquarelles,' 'Temps de guerre' (Concerts de l'Opéra, 1896), 'Fête bretonne,' 'Marche solennelle,' 'Ouverture guerrière,' 'Ouverture symphonique,' and a 'Symphonie-concerto,' for PF., vln., and orch.

His chamber music includes a string quartet, a trio, and a vln. sonata.

A Mass in A and some motets represent his work for the Church. He has also written numerous songs ('L'Amour de Myrto,' 'L'Amour trahi,' etc.), PF. pieces, etc.

Le Borne's dramatic works are as follows: 'Daphnis et Chloé,' a pastoral drama (Brussels, May 10, 1885); 'Hedda,' symphonic legend in 3 acts (Milan, 1898); 'Mudarra,' lyric drama in 4 acts (Berlin, Apr. 18, 1899); incidental music for G. Mitchell's 'L'Absent' (Odéon, 1903); 'Les Girondins,' lyric drama in 4 acts (Lyons, Mar. 25, 1905). Another 3-act opera, 'Le Maître,' has not yet been performed.

In 1901 Le Borne obtained the Chartier prize of the Institut for his chamber music. He contributes musical criticisms to the *Monde artiste*; *Le Soir*, Brussels; and is musical critic of *Le Petit Parisien*. G. F.

BORODIN, Alexander Porphyrievich (*b.* St. Petersburg, Nov. 12, 1834; *d.* there, Feb. 28, 1887), a distinguished composer.

The illegitimate son of a prince of Imeretia, he was brought up by his mother, who gave him every educational advantage. In boyhood he showed great love of music, and still more marked aptitude for science. He chose the medical profession, and served two years in a military hospital. From 1859–62 he studied abroad at the Government's expense, and soon after his return, at the early age of 28, was appointed assistant professor of chemistry at the Academy of Medicine, St. Petersburg. In 1862 Borodin met Balakirev (*q.v.*), whose enthusiasm rekindled his own former love of music and gave it a more serious intention. He now became one of Balakirev's most fervent disciples, and devoted all his leisure to the study of harmony and composition. Henceforward he engaged in that strenuous endeavour to serve two masters which probably accounted for his comparatively early death. He made his mark in the world of science no less clearly than in that of art, leaving not only numerous important treatises on chemistry, but taking an active part in founding the School of Medicine for Women, where he lectured from 1872 until the day of his death. In 1877 Borodin, with two of his pupils, made a kind of scientific and musical pilgrimage across Germany, with Weimar for its final goal. Liszt was once more there, and his court and school are described by Borodin in the series of delightful letters to his wife, afterwards published by his friend and biographer

Vladimir Stassov. These letters present an incomparable portrait of the great virtuoso, and reveal his intimate views upon the music of the new Russian school. Between 1885 and 1886 Borodin and Cui, at the suggestion of Countess Mercy Argenteau, paid two visits to Belgium. In Brussels, Liège and Antwerp, Borodin's two symphonies and his symphonic sketch 'In the Steppes of Central Asia' were most cordially received. Borodin married in 1863 Mlle. Catharine Protopopova, an accomplished amateur, who initiated him into the styles of Chopin and Schumann. In winter Madame Borodin's health compelled her to seek the drier climate of Moscow, and it was during one of these enforced separations that Borodin died suddenly. On the previous day he wrote to his wife: 'To-morrow we have a musical party here. It will be very grand—"il y aura de la bougie," as Mürger says in *La Vie de Bohême* . . . I must not unveil the mysteries!' The party took place. Borodin, who was strikingly handsome, after the Oriental type inherited from his father, wore the Russian national dress. While conversing gaily with his guests, he was seen to stagger, and succumbed instantaneously to a ruptured aneurism. He was sincerely regretted by his friends and students, for his modesty, benevolence and single-heartedness left an ineffaceable impression on all who came in contact with him.

Compositions.—Borodin joined Balakirev's circle with a purely amateur equipment. He played the piano and violoncello tolerably well; adored Mendelssohn's chamber music; knew little of Beethoven; nothing of Schumann; and—having spent his life in the capital—was not versed in the folk-music as were Rimsky-Korsakov and Moussorgsky. Intercourse with Balakirev revolutionised his views and aims. Like Glinka, he realised his powers and his nationality simultaneously. 'Borodin,' says Stassov, 'is a national poet in the highest sense of the word.' His first symphony, in E flat major, begun in 1862, is conventional as regards form, and shows a wonderful command of technical resources for the work of a mere amateur. The national element is already discernible, especially in the trio of the scherzo and the adagio. But it was not until he undertook, at Stassov's suggestion, to compose an opera on the subject of 'The Epic of the Army of Igor,' that he began to feel his way to complete independence. This rhapsody, or prose-poem, is the most interesting of all the mediæval Russian chronicles. Its historical significance may, perhaps, be compared with that of the Arthurian legends. It was an inspiring theme for a composer of patriotic proclivities; moreover, it offered an Oriental element which, contrasted with the Russian style, gave scope for great variety of musical colouring. 'Prince Igor' is rather a melodic than a declamatory opera. Borodin had more gift for cantilena than for recitative, and clung to the old operatic divisions; therefore 'Prince Igor' approaches more closely in form and style to Glinka's 'Rousslan and Lioudmilla' than to Dargomijsky's 'Stone Guest'; while in its racy humour and robust realism it claims some affinity with Moussorgsky's national music-dramas. Since this article was first written, 'Prince Igor,' with indeed all Borodin's more important works, has been acclaimed in Western Europe, and the orgy in the Polovtsi camp now needs no defence against the charge of barbarism. Its barbaric energy as interpreted by the Diaghilev troupe has popularised it beyond all else in the opera. Apart from the Polovtsi dances there are in 'Prince Igor' a wealth of contrasting character, skilful combination of tragedy and comedy and impassioned love-music, which entitle it to rank as one of the finest of national operas. The spirit of pessimism which overshadows Russian poetry and fiction has also found its way into opera: the cheerful major colouring and healthy popular optimism of 'Prince Igor' form an agreeable exception to the rule. 'Borodin,' says Cheshikhin in his *Russian Opera*, 'is an admirable foil to Tchaikovsky.' This opera, left unfinished at Borodin's death, was completed by Rimsky-Korsakov and Glazounov, and published by Belaiev in 1889. The second symphony, in B minor, and the symphonic sketch 'In the Steppes,' both owe their origin to patriotic sentiment. Borodin was not strongly attracted to the innovating principles of the then new school, but the second symphony has something like a definite programme. Speaking of this work, Stassov says: 'It owes its strength chiefly to the national character of its subject. The old heroic Russian sentiment predominates as in "Prince Igor."' 'In the Steppes,' composed for a representation of *tableaux vivants* in honour of the twenty-fifth anniversary of the reign of Alexander II., is the most generally popular of all the composer's works. Borodin left a few beautiful songs—about 12 in all—to some of which he wrote his own words. In these we find the same distinction of style and poetical feeling which characterise his orchestral and operatic music. From the technical side, his songs are remarkable for certain peculiarities of harmony, such as the frequent use of the augmented second and sequences of whole tones. They are like the folk-songs in their characteristic changes of rhythm.

The following is a complete list of Borodin's works:

1. First Symphony in E flat major. (1862–67.)
2. Four Songs. (Jurgenson, Moscow.)
3. Four Songs. (Bessel & Co., St. Petersburg.)
4. First String Quartet, in A major, on a theme from the finale of Beethoven's quartet, p. 130. (Finished 1878.)
5. Second Symphony in B minor. (1871–77.)
6. The Paraphrases, twenty-four variations and fourteen pieces for piano, 'on a favourite theme' (*i.e.* the childish tune known

in Germany as the 'Coteletten Polka,' and in England as the 'Chopsticks Waltz'). The Polka, Marche Funèbre and Requiem are by Borodin, the other members of the new Russian school, and Liszt, being among the contributors.
7. In the Steppes of Central Asia. Symphonic Sketch. (1880.)
8. Petite Suite for pianoforte, dedicated to Countess Mercy Argenteau. (1885.)
9. Scherzo in A flat major, for orchestra.
10. Septains: verses for voice and pianoforte, dedicated to Countess Mercy Argenteau. (1886.)
11. Quartet on the name B-la-f, by Borodin, Rimsky-Korsakov, Liadov and Glazounov.
12. Serenata espagnola, for the pianoforte (four hands).

POSTHUMOUS WORKS

13. Second Quartet, in D major.
14. Prince Igor: opera in four acts with a prologue.
15. Arab Melody, for voice and piano.
16. Song to words by Poushkin. (Composed in 1881 on the death of Moussorgsky.)
17. Sérénade de quatre galants à une dame. Humorous quartet for male voices.
18. Song, words translated from Count A. Tolstoi: 'La Vanité marche en se gonflant.'
19. 'Chez ceux-là et chez nous.' Song with orchestral accompaniment. Words translated from Nekrassov.
20. Two movements of a Third Symphony in A minor, orchestrated by A. Glazounov.
21. Finale of 'Mlada,' an unfinished opera-ballet, orchestrated by Rimsky-Korsakov.

R. N.

BORONI (BURONI, BORRONI), ANTONIO (*b.* Rome, 1738; *d.* there, Dec. 1792), studied under Padre Martini, and at Naples Conservatorio under G. Abos. He became court composer at Dresden, 1766; court Kapellmeister, Stuttgart, June 18, 1771–77; maestro di cappella at St. Peter's in the Vatican, Rome, 1778 to Sept. 21, 1792, where Reichard, who formed a high opinion of him, met him in 1792. He composed 21 operas, the last one for Rome in 1778, masses and other church music, arias, duets, etc. He contributed with J. Christian Bach and others to a book of 6 odes, published in London *c.* 1775. E. v. d. s.

BOROSINI, (1) FRANCESCO (*b.* Bologna, *c.* 1695), an admirable tenor singer, and in 1723 one of the principal singers at the Opera at Prague.

Very little more of his history is known; but we have evidence that he came, with his wife, to London in 1724, and sang in operas; as in 'Artaserse' by Ariosti, and Handel's 'Tamerlane.' In 1725 he appeared in 'Rodelinda' and 'Giulio Cesare' by Handel, in Ariosti's 'Dario,' and the pasticcio 'Elpidia' given by the former master, with recitatives of his own. The names of Borosini and his wife are not found again in England after 1725.

His wife, (2) LEONORA (*née* D'AMBREVILLE), was originally French, and was a very remarkable contralto singer. In 1714, according to Fétis, she sang at the Palatine court, and was engaged in 1723 for the Opera at Prague, with her husband. When they were married is not known, but that they came to England together in 1724 is certain, for her name is found in the casts of the same operas in which he also performed. In 'Dario' and 'Elpidia' she is called Signora Sorosini, but this is a mere misprint. It is only curious that it should occur in two different works. J. M.

BOROWSKI, FELIX (*b.* Burton, England, Mar. 10, 1872), an Anglo-American composer, critic and teacher. He studied at the Cologne Conservatory and in London. In 1897 he was made professor of theory and counterpoint at the Chicago Musical College, later becoming its head. He was also at different times musical critic of the *Chicago Evening Post* and the *Chicago Herald*; and has been the writer of the programme notes of the Chicago Orchestra since 1908. His compositions include the following:

Eugene Onegin, symphonic poem.
Allegro de concert, for organ and orchestra.
Élégie symphonique, for orchestra.
Trois Peintures, for orchestra.
Youth, symphonic poem.
Boudour, pantomime ballet.
String Quartet, A minor.
Pieces for organ, piano, violin and songs.

R. A.

BORREN, CHARLES JEAN EUGÈNE VAN DEN (*b.* Ixelles, near Brussels, Nov. 17, 1874), has done important work as an historian of music, particularly with regard to the polyphonic schools of the Netherlands.

Van den Borren studied the law, and took his doctorate at Brussels in 1897. He practised as a barrister for eight years, when he gave up his legal work in favour of musical studies. He contributed criticism to many journals, lectured at the Institut des Hautes Études Musicales et Dramatiques on the beginning of polyphony and the history of music in Belgium, and at the New University of Brussels on the history of pianoforte music. He succeeded Wotquenne as librarian to the Conservatoire of BRUSSELS (*q.v.*) in 1920. He has gained a high position as historian and critic, and his researches into English music, contemporary with the field of his Belgian studies, are particularly interesting. In this connexion *Les Origines de la musique de clavecin en Angleterre*, Brussels, 1912, an analytical study of the English writers for the virginal, and *Les Musiciens belges en Angleterre à l'époque de la Renaissance*, Brussels, 1913, deserve particular attention. On Feb. 2, 1926, van den Borren read a paper before the Musical Association of London, *De la valeur esthétique du madrigal anglais*, in which the breadth of his study of the English school of polyphonists was fully demonstrated. His works on Belgian music include: *Les Origines de la musique de clavecin dans les Pays-Bas jusque vers 1630*, Brussels, 1914; *Les Débuts de la musique à Venise*, Brussels, 1904; *Orlando di Lassus*, 1920; *La Musique belge*, 1920; *Origines et développement de l'art polyphonique vocal du XVI^e siècle*, 1920. A small work on Dufay was succeeded by a larger one in 1926, *Guillaume Dufay, son importance dans l'évolution de la musique du XV^e siècle*; and he has further written on subjects outside his special province, such as the dramatic music of César Franck, the opera of Alessandro Scarlatti and modern Belgian music. C.

BORRI, GIOVANNI BATTISTA, a 17th-century composer of Bologna, composed 1 oratorio, 'La Susanna,' 1 mass and other church music; a

'Cantata morale,' 12 'Sinfonie a 3 : 2 violini e violoncello coll' organo,' Modena, 1687; 'Sinfonie a tre,' etc., op. 1, Bologna, 1688, etc. (*Q.-L.*).

BORSDORF, Friedrich Adolph (*b.* Dittmansdorf, Saxony, Dec. 23, 1854; *d.* London, Apr. 15, 1923), a distinguished horn-player who studied his art at Dresden under Lorenz and settled in England. Engaged first at Covent Garden, he became third and then first horn in Richter's orchestra, and held a leading position in this country playing with the Scottish Orchestra, the Queen's Hall Orchestra and the London Symphony Orchestra in turn. The beauty of his sensitive phrasing made him a wonderful chamber-music player, and his performance in Brahms's horn trio was his masterpiece. As a teacher he achieved work of lasting value, for he was professor of the horn at the R.C.M. from its foundation and of the R.A.M. from 1897. Most of his successors in the London orchestras, therefore, have been his pupils, including his own son, Oscar, who has taken a place not only as a leading orchestral player but as a fine performer of concertos and chamber music. C.

BORTKIEVICZ, Sergei Edourdovitch (*b.* Charkov, Russia, Feb. 22, 1877), studied law in St. Petersburg from 1896–99 and music under van Ark and Liadov. He journeyed to Leipzig, where he continued his musical training under Reisenauer, Jadassohn and Piutti. From 1904–14 he was in Berlin, where he made a home. At the outbreak of the war he joined the Russian army. Since 1921 he has resided in Constantinople. His compositions (for the greater part pianoforte works) are partly Russian, partly Oriental, and with a slight inclination towards the new German style, recalling on occasions, especially in his preludes, the fine craftsmanship of Liszt and the dreamy expression of Chopin. His music is based on sane principles, melodic invention, sincere feeling and romantic poetry.

His works include:

Concerto in B maj. for PF. and orch. (op. 16); 'Othello' symphonic poem for large orch. (op. 19); Concerto for v'cl. and orch. in one movement (op. 20); Concerto in D maj. for vln. and orch. (op. 22); Concerto in E♭ maj. for the left hand for PF. and orch. (op. 28); 'Per aspera ad astra,' PF. concerto No. 3 (op. 32). In MS. two concertos for PF. and vln. and many songs and PF. pieces, including sonatas. H. J. K.

BORTNIANSKY, Dimitri Stepanovich (*b.* Gloukoff in the Ukraine, 1752; *d.* Sept. 28 (Oct. 9), 1825), a composer who studied in Moscow and in St. Petersburg under Galuppi, at that time Kapellmeister there. Galuppi soon left Russia, but the Empress Catherine supplied Bortniansky with funds to follow him to Venice (1768). He afterwards studied in Bologna, Rome and Naples. The motets he composed at this period are not remarkable except for richness of harmony. Pälschlich counts him among the opera-composers then in Italy. His 'Creonte' was given in Venice in 1776, and his 'Quinto Fabio' at Modena in 1778. In 1779 he returned to Russia, and became director of the Empress's church choir (later—1796—called the 'Imperial Kapelle'), which he thoroughly reformed, and for which he composed 35 sacred concertos in 4 parts, 10 concertos for double choir, and a Mass for 3 v. It was this choir which was placed at the disposal of Boieldieu (*q.v.*) when, at St. Petersburg, he was commissioned to compose the music for Racine's 'Athalie.' Bortniansky's works were edited by Tchaikovsky and published at St. Petersburg in 10 volumes. F. G.

BORWICK, Leonard (*b.* Walthamstow, Feb. 26, 1868; *d.* Le Mans, France, Sept. 15, 1925), a distinguished pianist, studied under Mme. Schumann at Frankfort, 1883–89.

He made his début at Frankfort in 1889, playing Beethoven's concerto in E flat, and in the following year appeared first in England, playing Schumann's concerto at the Philharmonic Society's concert (London) on May 8. His success was emphatic, and he was soon accepted as an able performer of the classics, and particularly as an exponent of the interpretative methods of the Schumann school. His performance of Brahms's D minor concerto with Richter in Vienna (1891) helped to establish his reputation abroad, and at home he was in request for the 'Popular' concerts of St. James's Hall, for chamber concerts in association with the Joachim quartet, and indeed wherever in England the ideal of the classics was paramount. For some years he gave numerous recitals with Plunket Greene (*q.v.*) in London and the provinces, in which he played a very large repertory of music from Bach to Brahms. Borwick was first and foremost a refined and scholarly player of these composers; but he did not stand still. He played in Germany and in Paris and elsewhere in Europe, notably in Scandinavia. In 1911 he undertook a considerable concert tour in America and Australia, and returned to London in 1912, playing with a freedom and vigour which gave to his art a new force. From this time onward, too, his growing interest in the modern French school of piano music widened his powers of expression, and his playing of Debussy and Ravel was specially admired. C.

BOSCH, Pieter Joseph van den (*b.* Hoboken, *c.* 1736; *d.* Antwerp, Feb. 19, 1803), organist at Antwerp Cathedral *c.* 1764. One J. B. van den Bosch is mentioned by Gregoir (*Panth.* vi. 27) as giving concerts at Antwerp Theatre in 1785–87. In 1772 he was organist at St. Gudule, Brussels, where Burney made his acquaintance. Van den Bosch composed: op. 2, '6 divertissements pour le clavecin avec 2 vs. et B. ad lib.'; op. 3, '4 concerts pour le clavecin et l'orgue' (with orchestra); op. 4, '6 suites pour le clav. avec

vn. ad lib.'; op. 5, '4 sonates pour le clav. avec vn. et B. ad lib.' (as Burney's name appears in Subscribers' list, this must have been published *c.* 1772); œuvre 6, '6 sonates dans le goût de symphonies pour pfte.' (with orchestra). Five MS. pianoforte sonatas, Nos. 7-11, are in the Amsterdam Library. E. v. d. s.

BOSCHI, Giuseppe, said to have been a native of Viterbo, was the most celebrated basso of the 18th century, and was a member of the choir of St. Mark's, Venice. Chrysander (*Händel*, i. 244) believes him to be the singer of the extraordinary part of Polifeme in Handel's early cantata at Naples in 1709, a portion of which was transferred to 'Rinaldo.' It is at any rate certain that on Feb. 24, 1711, he sang for the first time in London the part of Argante in that opera (Handel's first in London) at the Haymarket Theatre. In 1720 we find him again supporting with his magnificent voice the 'Radamisto' of Handel, and Bononcini's 'Astarto.' In 1721 he was in the cast of 'Muzio Scevola,' the 3rd act of which was Handel's, as also in those of 'Arsace' by Orlandini and Amadei, 'L' odio e l' amore' (anonymous), and Bononcini's 'Crispo.' On Dec. 9, 1721, he took part in the first representation of Handel's 'Floridante,' and on Jan. 12, 1723, in that of 'Ottone,' and of 'Flavio' on May 14; besides which he sang in the 'Coriolano' of Ariosti and 'Farnace' of Bononcini, and in 1724 in Handel's 'Giulio Cesare' and 'Tamerlane,' Ariosti's 'Artaserse' and 'Vespasiano,' and Bononcini's 'Calfurnia.' From this date he sang for Handel in all the operas during 1725, 1726, 1727 and 1728. In 1728 he sang in 'Siroe,' 'Tolomeo' and a revival of 'Radamisto.' Then came the break-up of the company, and Boschi's name appears no more. In a satire called 'Harlequin Horace, or the Art of Modern Poetry,' 1735, this line occurs—

'And Boschi-like be always in a rage,'

to which the following note is appended:

'A useful performer for several years in the *Italian* operas, for if any of the audience chanced unhappily to be lulled to sleep by these soothing entertainments, he never failed of rousing them up again, and by the extraordinary fury both of his voice and action, made it manifest that, though only a tailor by profession, he was *nine* times more a *man* than any of his fellow-warblers.

His wife, Francesca Vanini, a contralto, had been a great singer, but came to London when much past her prime and with her voice failing. She sang in 1711 as Goffredo in Handel's 'Rinaldo'; but in 1712 this part was given to Margarita de l'Epine, and Boschi's wife appeared no more. J. M.

BOSIO, Angiolina (*b.* Turin, Aug. 22, 1830; *d.* St. Petersburg, Apr. 12, 1859), a famous singer, educated at Milan under Cataneo. She made her first appearance, July 1846, in 'I due Foscari' at Milan.

After a short time she went to Verona, and thence to Copenhagen and Madrid, where she was enthusiastically applauded. In 1848 she appeared in Paris in 'I due Foscari,' but this time without effect. She went immediately to the Havana, and thence to New York, Philadelphia and Boston. At all these places she was much admired. In 1851 she returned to Europe and married a Greek gentleman named Xindavelonis. She was engaged for the next season by Gye at Covent Garden, and made her début in 'L' elisir d'amore,' July 15, 1852, with, however, doubtful success. She made her first hit in 'I Puritani,' taking the place of Grisi, who had declined to sing. This was the turning-point of Bosio's fortune. During the winter she was the prima donna at Paris, and reappeared in the next spring in London in 'Matilda di Shabran,' 'Jessonda' and 'Rigoletto.' From this date Bosio met with nothing but most brilliant success. In 'I Puritani' she was, with the exception of course of Grisi, the best Elvira that had been seen. That same year she accepted an engagement at St. Petersburg, the terms being 100,000 francs for four months, with a guaranteed benefit of 15,000 francs and a permission to sing at private concerts. Her success was extraordinary. Thence she went to Moscow. In 1856 she returned to Covent Garden. Her most remarkable performance was in 'La Traviata,' in which she presented a very different reading of the character from that of Mlle. Piccolomini at the other house. She paid a second visit to Russia in 1858, and she died while on her third visit. J. M.

BOSSI, (1) Marco Enrico (*b.* Salò, Lake Garda, Apr. 25, 1861; *d.* at sea, Feb. 24, 1925), the son of the organist of Morbegno, best known by his organ pieces—about 50 in number, and of considerable variety in scope and character. He was at the Liceo Musicale, Bologna, in 1871–73, and from the latter year to 1881 at the Conservatorio of Milan under Ponchielli for composition and Fumagalli for organ. On leaving the school he became organist and maestro di cappella at Como Cathedral, and from 1891, when he gave up that post, until 1895 was professor of the organ and theory at the Conservatorio of Naples. On Jan. 1, 1896, he was appointed director of the Liceo Benedetto Marcello, Venice. He was also professor of composition in the same school, and conductor of the 'Benedetto Marcello' concerts in Venice. In 1902 he became director of the Liceo Musicale, Bologna. This he held till 1912, and after temporary retirement from scholastic work he became director of the Academy of St. Cecilia at Rome in 1916. As an organist he maintained the highest and best traditions of the Italian school of the past, and his *Metodo di studio per l' organo moderno*,

written in conjunction with G. Tebaldini (Milan, 1893), is a standard work. His compositions are marked by great boldness of harmonic treatment, much originality of design and a certain severity of style. It was no doubt this last quality (well illustrated in a suite, inscribed 'Res severa magnum gaudium,' op. 54) which induced him to give up operatic composition, in which he made three attempts in early life ('Paquita,' 1 act, Milan, 1881; 'Il veggente,' 1 act, Milan, 1890; and 'L'angelo della notte,' 4 acts, Como). A great number of motets, cantatas, masses and other sacred works were composed and performed at Como; a symphonic poem, 'Il cieco,' for tenor solo, choir and orchestra, was written in 1897; an 'Inno di gloria,' for choir and organ, has been performed twice by the Riedel'sche Verein, Leipzig, a society which brought out his 'Cantico dei Cantici,' on Mar. 14, 1900 (see the *Rivista musicale*, vol. vii. p. 780). In instrumental music, an orchestral overture is numbered op. 1, and an impromptu for orchestra, op. 55. An organ concerto is op. 100, and a great number of organ pieces of different kinds are in his list; in chamber music, a very fine violin sonata in E minor, 2 trios for PF. and strings, in D min. and D maj. respectively, are to be mentioned, and many PF. pieces and songs testify to the fertility of his genius. Two works for voices and orchestra are of outstanding importance: 'Il Paradiso perduto' (op. 125), on a poem after Milton by L. A. Villanis, performed at Augsburg, Dec. 6, 1903, and 'Giovanna d'Arco' for solo voices, choir and orchestra, produced at Cologne, 1914. Bossi died at sea, between New York and Le Havre, on his return from a very successful concert tour in the United States. M., with addns.

(2) Renzo (*b.* Como, 1883), composer, son of Marco Enrico, under whom he began his musical studies at the Liceo Marcello in Venice, where he took a prize for composition in 1902. He went to Leipzig in that year, continuing there his studies of the pianoforte and the organ, and making his first appearance in public as an exponent of both instruments. His last two years of study were devoted to a course of conducting under Arthur Nikisch.

In 1906 he was engaged as sub-conductor at the Court Theatre of Altenburg, Saxony. Here and elsewhere in Germany he was soon entrusted with the direction of some important operatic performances and symphony concerts. On his return to Italy he was for a time attached to La Scala at Milan.

Bossi was appointed professor of composition at the Regio Conservatorio of Parma in 1913, and in 1916 he was transferred to a similar post at the Conservatorio Giuseppe Verdi in Milan.

Renzo Bossi's orchestral works include: 'Fantasia Sinfonica,' performed at Venice, Leipzig, Halle, Altenburg, Magdeburg and Dortmund; Symphony in 5 movements, played in Germany and at Milan; 'Sinfoniale'; 'Bianco e Nero'; and a Violin Concerto. He has written a good deal of chamber music, including a Quintet and 3 'Canti' for v'cl. and harp, also a large number of songs and works for PF. and organ.

For the stage, Bossi has written 'L'usignuolo e la rosa' (after Oscar Wilde), 'Passa la ronda!' (R. Francheville) and 'La Notte del Mille' (G. Pascoli and L. Orsini). E. B.

BOSSLER, Heinrich Philipp (*d.* Leipzig, Dec. 9, 1812), Brandenburg-Onolzbach Councillor at Speyer. In 1780 he lived at Heilbroun and invented a new music-printing machine. He must also have known a kind of transfer printing which enabled him to produce facsimiles of ancient MSS. In 1781 he set up as music printer and publisher at Speyer, removed his business in 1792 to Darmstadt, and 1799 to Golis, near Leipzig. He wrote a book on the elements of music, harmony, thorough-bass and composition to be used in conjunction with pianoforte teaching, which appeared in serial form in 1782–83. From 1788–90 he published and edited the *Musikalische Realzeitung*, continued 1790–91 as the *Musikalische Correspondenz*, with the collaboration of Christmann and the Abbé Vogler. He also published a large number of weekly and monthly magazines of pieces for pianoforte, and songs which are of historical value. (See *Q.-L.*) E. v. d. S.

BOSTON (Mass.). The Apollo Club, formed in July 1871, and incorporated in Mar. 1873, is composed of male voices and is supported by assessments levied on associate members, among whom the tickets for the concerts are divided, a few being sold to the public. B. J. Lang was conductor from the beginning until 1902, when he was succeeded by Emil Mollenhauer, the present conductor (1926).

The Boston Flute Players' Club, organised in 1921, has for its avowed purpose the fostering of music for the flute and of chamber music in which the flute has a part, as well as the encouragement of American composers of chamber music. Its concerts, open to members and their guests, are given monthly throughout the musical season. From the beginning Georges Laurent, first flute of the Boston Symphony Orchestra, has been the Club's musical director.

The Boston Symphony Orchestra was founded and for 37 years sustained by the late Henry Lee Higginson, prominent citizen of Boston, whose generosity affords a good instance of the munificent way in which Americans apply their riches for the public benefit in the service of education and art.

Higginson had for long cherished the idea of having 'an orchestra which should play the best music in the best way, and give concerts to all who could pay a small price.' At length, on Mar. 30, 1881, he made his intention public in the Boston newspapers as follows:

'The orchestra to number sixty, and their remuneration to include the concerts and "careful training." Concerts to be twenty in number, on Saturday evenings, in the Music Hall, from middle of October

to middle of March. Single tickets from 75 to 25 cents (3s. to 1s.); season tickets (concerts only) 10 to 5 dollars; one public rehearsal, 1s. entrance.'

Georg Henschel was appointed conductor, a full musical library was purchased, and the first concert took place on Oct. 22, 1881.

Henschel remained as conductor for three years. He was succeeded, at the beginning of the season of 1884–85, by Wilhelm Gericke of Vienna, whose advent led to important changes in the personnel of the Orchestra through the importation of young and ambitious musicians from Europe, and especially from Vienna. After five years, during which Gericke had raised the standard of the Orchestra to a plane approximating the founder's ideal, he was succeeded by Arthur Nikisch, who remained conductor for four years. After him came Emil Paur for five years; then, in the autumn of 1898, Gericke was recalled. He continued as conductor until the end of the season of 1905–06, when Karl Muck of Berlin was engaged for two years. Max Fiedler next filled the post for the four years (1908–12) that intervened before Muck's return for his second term of service. In the spring of 1918 Muck's connexion with the Orchestra was abruptly ended, and the following autumn he was succeeded, for a single season, by Henri Rabaud of Paris. The next year Pierre Monteux began his five years of conductorship, a five years that included the period of readjustment following the war, and that, at its close, found the Orchestra restored to its full efficiency and to all its former prestige when, in the autumn of 1924, Sergei Kussevitzky took over the baton.

The Orchestra, much enlarged since its establishment, now (1926) numbers 108, and the support given it in Boston is loyal and enthusiastic. Only in one season, however, have the receipts equalled the expenditures. During the first 37 years of the Orchestra's existence the deficits were met by Higginson. On May 7, 1918, the Orchestra was incorporated, with Judge Frederick P. Cabot of Boston as president of a board of ten trustees; deficits are now met through the income from the endowment fund and through numerous individual gifts.

The two regular series of 'subscription concerts,' each numbering 24, are given on Friday afternoons (succeeding the one-time 'public rehearsals') and on Saturday evenings; a supplementary series of five Monday evening concerts, inaugurated in the season of 1922–23, and another of five Tuesday afternoon concerts, first established in the autumn of 1925, are now a permanent feature of the Orchestra's regime, as are the two or three Young People's Concerts yearly given for the school children of Greater Boston. As supplement to the regular season comes a series of summer concerts, known as the 'Pops,' extending over a period of ten weeks and given by a slightly reduced orchestra under a special conductor.

An important part of the Orchestra's work is that accomplished outside of Boston. In addition to frequent concerts in the cities of New England, the Orchestra makes five trips a year to Brooklyn and New York, where the concerts have been given uninterruptedly since 1887, and one trip to Canada.

For almost twenty years the Boston concerts of the Orchestra were given in the old Music Hall. In the autumn of 1900, however, possession was taken of the fine new Symphony Hall, built especially for the Orchestra's accommodation.

As a non-union organisation, at present the only one among the orchestras of the United States, the Boston Symphony has its own pension fund, established in 1903 and maintained by the self-assessment of the Orchestra's members and by two special annual concerts, as well as by the contributions of individuals.

The Cecilia Society was formed in 1874, under the patronage of the Harvard Musical Association, for the purpose of presenting choral works for mixed voices at the symphony concerts. In 1876 it became an independent organisation and has been supported on the associate system. The membership is (1926) about 200.

In the matter of repertory the Cecilia has long been identified with musical progress, and its concerts have introduced to Boston many of the more important choral compositions of the last half-century. B. J. Lang, the Society's first conductor, continued to fill that post until 1907. His successors have been: Wallace Goodrich, 1907–10; Max Fiedler, 1910–11 (by arrangement with the Boston Symphony Orchestra); Arthur Mees, 1911–15; Chalmers Clifton, 1915–17; Arthur Shepherd, 1917–18; Georges Longy, 1918–19; Ernest Mitchell, 1919–20; Agide Jacchia, 1920–24; Malcolm Lang, 1924 to the present time (1926).

The Handel and Haydn Society, one of the largest and, with a single exception,[1] the oldest living musical organisation in the United States, dates from Mar. 30, 1815, when sixteen gentlemen met, in answer to an invitation signed by Gottlieb Graupner, Thomas Smith Webb and Asa Peabody, to consider 'the expediency of forming a society for cultivating and improving a correct taste in the performance of sacred music, and also to introduce into more general practice the works of Handel, Haydn and other eminent composers.' By Apr. 20 of the same year the first board of government was duly completed and Thomas Smith Webb became the first president.

Music in Boston was then at a low estate,

[1] The Stoughton Musical Society, formed Nov. 7, 1786. Stoughton is an inland town about 20 miles from Boston.

and of professional musicians there were probably not a score in the town. The Society's first musical utterances were from the 'Lock Hospital' and other collections of hymn tunes, but by degrees and as its numbers grew, music of a higher order was rehearsed, and on Christmas night of 1815, at the Stone Chapel, the first public concert took place. An enthusiastic journalist of the day declared that there was 'nothing to compare with it' and that the Society was 'now the wonder of the nation.'

The records of the Society's first decade furnish abundant evidence of the poverty of Boston's musical resources in those years; on one occasion there was fear that a certain concert must be postponed 'in consequence of the want of an organist.' In the early concerts the solos were sung by members of the Society; not until Apr. 1818 was a professional singer engaged.

At the seventeenth concert, which took place Dec. 25, 1818, the Society gave its first performance of the 'Messiah,' since become an annual rite in Boston, and incidentally its first performance of a complete oratorio. During the subsequent century and more of its existence the Society's repertory has included most of the standard choral works of Handel, Haydn and Mendelssohn, and occasional attention has been accorded those of Bach and Mozart. The list of works performed by the Society for the first time in Boston is a long and impressive one and includes the names of most of the better known composers of the 19th century, among them the Americans Horatio Parker, George W. Chadwick and Mrs. H. H. A. Beach.

In its earlier years festivals, modelled on those of Birmingham, England, were held by the Society; between 1868 and 1883 triennial festivals were regularly held, and the 50th, the 75th and the 100th anniversaries of the Society's founding were so celebrated. Another feature of the Society's activities in its younger days was the publishing of anthems, hymn tunes and even oratorios, and the establishment of singing classes and of lectures on musical topics. Through these means and through the generally high standard of its concerts the Society contributed largely to the elevation of musical taste in Boston during the 19th century, and prompted the formation of similar organisations throughout the country.

The number of concerts given during a season has varied, in the course of the Society's history, from one to 23; of late years four has been the usual number, two of them the Christmas-time performances of the 'Messiah.' The number of members, active and retired, is about 300; the actual active choral force is at present some 600, but the female choristers have never been members, technically speaking, the system of annually 'inviting the aid of their voices' having obtained *ab initio*. The support of the Society is derived chiefly from the proceeds of its concerts; there is also a permanent trust fund and new members pay a moderate initiation fee.

The first regularly appointed musical director was Charles E. Horn, 1847–50; until then the president had performed the duties of conductor. In 1850 Charles C. Perkins, then president, assumed the baton for a single season; since then the conductors have been: J. E. Goodson, 1851; G. J. Webb, 1852; Carl Bergmann, 1852; Carl Zerrahn, 1854–95; B. J. Lang, 1895–97; Carl Zerrahn, 1897–98; Reinhold L. Herman, 1898–99; Emil Mollenhauer, 1899 to the present time (1926).

The Harvard Musical Association sprang, in 1837, from the Pierian Sodality, a club formed in 1808 among the undergraduates of Harvard University. The hopes of the founders —the raising of the standard of musical taste in the University, the preparing of the way for a musical professorship there, and the collecting of a library which should contain music and musical literature in all its branches— were all realised, and furthermore, the Association's public orchestral concerts, given, mostly under the direction of Carl Zerrahn, from 1865–1882, contributed in no small degree to the musical life of Boston during those years. At present bi-weekly recitals and concerts of chamber music are given for members of the Association and their guests, and additions are continually being made to the large and valuable library.

The People's Symphony Orchestra, organised in 1920, is a body of 80 professional musicians giving some 20 concerts each season, at a merely nominal admission charge. Thus the Orchestra is largely dependent, for its existence and the continuation of its excellent and worthy work, upon outside subscription. Its repertory has included most of the standard orchestral music and numerous pieces by American composers; from time to time distinguished virtuosi have given their services as soloists. For the first five seasons Emil Mollenhauer was the conductor; he was succeeded in 1925 by Stuart Mason. The list of guest conductors includes the names of George W. Chadwick, Wallace Goodrich, Henry Hadley and Pierre Monteux.

The Harvard University Glee Club, now known as one of the outstanding men's choruses of the United States if not of the world, was long an organisation no more deserving of musical recognition than the similar ones in other American colleges and universities, until, in 1919, it abandoned the singing of college songs and music of a trivial nature to devote itself solely to the best choral music. This action, then unique in the history of American college glee clubs, although others have since

followed suit, was the result of the work and influence of Dr. Archibald T. Davison, under whose leadership the Club had come some years previously, and who had been gradually investing its programmes with certain works of musical value. The decisive step was, however, the Club's own. Its wisdom, actually questioned by some at the time, has been more than justified.

The Club has gradually increased in membership from about 60 to 300; students of all departments of the University, both graduate and undergraduate, are eligible for membership. In addition to an annual series of concerts in Boston, the Club each year makes a tour of the United States; it has sung with the Cleveland Symphony Orchestra and has several times assisted at concerts of the Boston Symphony Orchestra. During the summer of 1921, at the invitation of the French Government, the Club gave a number of concerts in France, and sang also in cities of Germany, Switzerland and Italy.

Dr. Davison, to whom is due so great a measure of the Club's achievement, remains its director (1926). He has arranged and edited a considerable library of pieces for men's voices, drawn from the music of composers of all periods, from Palestrina to Brahms.

The New England Conservatory of Music, one of the oldest and most influential of American music schools, was founded in 1867 by Dr. Eben Tourjée, the originator of the class system of music instruction in the United States. The school, which at first occupied a few rooms in Music Hall, was inaugurated with a 'Grand Concert, Vocal and Orchestral,' under the direction of Carl Zerrahn, Feb. 26, 1867. Dr. Tourjée's faculty was composed of several of the most eminent of New England musicians and a considerable number of pupils were enrolled during the first season. In 1882 the fast-growing school was removed to a building on Franklin Square; in 1902, through the initiative and generosity of Eben D. Jordan, long a member of the board of trustees, the Conservatory was provided with its present sightly and commodious building, near to Symphony Hall.

After several unsettled years following Dr. Tourjée's death in 1891, George W. Chadwick was appointed director of the Conservatory, a post that he still fills (1926). Under Chadwick the Conservatory has grown greatly in scope, in enrolment and in influence. Not the least of his achievements was the establishment, in 1901, of the Conservatory Orchestra, a student organisation of full symphonic proportions, conducted jointly by Chadwick and by Wallace Goodrich, dean of the faculty, which each year gives numerous concerts.

The school's present curriculum offers, in addition to practical and theoretical instruction in all branches of music, a department of languages and 'collegiate studies' and a dramatic department. The faculty, which includes musicians of national and international repute, numbers more than 70; the enrolment of pupils in 1924 was in excess of 3600.

W. S. S.

BOTE & BOCK, a firm of music publishers in Berlin, founded by Eduard Bote and Gustav Bock (*d.* Apr. 27, 1863) in Jan. 27, 1838. The former retired at the beginning of 1847, leaving Gustav Bock alone in the business until his death. His widow became the proprietress, and his brother, Emil (*d.* Mar. 31, 1871), undertook to direct the affairs of the firm. On his death, Gustav's son, Hugo (*b.* Berlin, July 25, 1848), became the possessor of the business.

Among the music issued by the house, the works of Neithardt, Hoffmann, Rebeling, von Hertzberg, etc., and in particular the collection of *Musica sacra* edited for the use of the Domchor, deserve mention. The latter is a compilation of the most prominent compositions *a cappella*, by Italian, Netherlandish and especially German masters of past time. The firm did much to disseminate a knowledge of the masterpieces of Handel, Gluck, Bach, Haydn, Mozart and Beethoven, by the publication of cheap editions. In 1908 the works of Max Reger were acquired (*Riemann*). Attention has also been given to modern operatic music.

Gustav Bock established the *Neue Berliner Musikzeitung*, and succeeded in obtaining the help of many eminent writers on music.

A. D.

BOTTÉE DE TOULMON, Auguste (*b.* Paris, May 15, 1797; *d.* there, Mar. 22, 1850), musical historian and member of the Société des Antiquaires de France. First intended by his father for the study of science and mathematics, he left these on his father's death, and became a lawyer. His fondness for music soon asserted itself, however (he was a performer on the violoncello), and in 1827 the publication of *La Revue musicale* induced him to devote himself to the history of music. In 1831, with this end in view, he offered his services free as librarian to the Conservatoire. He was accepted, and held this post until 1848, when his mind became disordered. Below are some of his writings (for a fuller list see *Fétis*):

. . . *L'Art musical depuis l'ère chrêtienne jusqu'à nos jours* (Paris, 1836). *De la chanson en France au moyen âge* (*L'Annuaire historique*, 1836). *Notice biographique sur les travaux de Guido d' Arezzo* (*Mémoires de la Société des Antiquaires de France*, 1837). *Des instruments de musique en usage au moyen âge* (*L'Annuaire historique*, 1838). *Observations sur les moyens de restaurer la musique religieuse dans les églises de Paris* (Paris, Paul Dupont, 1841). *Notice des manuscrits autographes de . . . Cherubini* (Paris, 1843).

A year after his death, M. Vincent, a member of the Institut de France, issued a notice of his life and works.

J. Mᴷ.

BOTTESINI, Giovanni (*b.* Crema, Lombardy, Dec. 24, 1822; *d.* Parma, July 7, 1889),

a celebrated virtuoso on the double bass, also conductor and composer.

He was the son of a good musician and clarinet-player of his native town, and as a boy sang in the chapel choir. He early displayed such a remarkable talent for music that at the age of 11 application was made for him to be admitted into the Conservatorio at Milan. It so happened that there was only one vacant place, and that for a contrabassist. Bottesini accordingly began the study of the double bass, was admitted at the Conservatorio, and, it is said, before long played almost as well as he did afterwards, when his marvellous command over this unwieldy instrument excited the admiration of the whole musical world of Europe. His masters were Rossi for the double bass, Basili and Vaccaj for harmony and composition. On leaving the Conservatorio he travelled with his fellow-pupil Arditi (then a violin-player), and afterwards went to America. Eventually he accepted a lucrative engagement at the Havana as principal double bass in the orchestra, which he retained for many years. Here his first opera, 'Christophe Colombe,' was given in 1847.

His first appearance in England was on June 26, 1849, at the Musical Union, where he played the violoncello part of one of Onslow's quintets, which, it will be remembered, contain prominent solo passages for that instrument. By his performance of this and of a solo he astonished all present. Those alone who have heard him play can realise the beauty of the performance. Extraordinary agility and strength of hand, dexterous use of the harmonics, purity of tone and intonation, perfect taste in phrasing—in fact all the requisites of a great solo player—were exhibited by Bottesini on this cumbrous instrument. It may be mentioned that Bottesini played upon a 3-stringed bass, which he preferred as being more sonorous, and with a bow made and held somewhat like that of the violoncello (see Bow). The instrument, which was the work of Carlo Giuseppe Testore of Milan, was of somewhat smaller size than the ordinary orchestral double bass, being of the type called *basso da camera*. Bottesini was also distinguished as a conductor. He presided over the orchestra of the Italian Opera in Paris from 1855–57. From 1861–63 he was director of the Teatro Bellini at Palermo, and in 1863 went for a time to Barcelona in a similar capacity, becoming afterwards director of the Italian Opera at Cairo. He conducted a season of opera at the Lyceum Theatre in London in 1871. He composed many pieces for his instrument, among them his fantasia on 'Sonnambula,' the Carnival of Venice, and duets which he played with Sivori and Piatti. His operas include 'L' Assedio di Firenze,' produced in Paris in 1856, 'Il Diavolo della notte' (1858), 'Marion Delorme' (1862), 'Vinciguerra' (1870), 'Ali Baba,' written for and performed in London with considerable success in 1871, 'Ero e Leandro' (produced successfully at Turin in 1879), 'La Regina di Nepal' (Turin, 1880). For some time he paid, with more or less regularity, an annual visit to England. At the Norwich Festival of 1887 an oratorio by him, to words by Joseph Bennett, entitled 'The Garden of Olivet,' was performed. T. P. H.

Bibl. — Antonio Carniti, *In memoria di Giovanni Bottesini*, Crema, 1922.

BOUCHE FERMÉE, À—'with shut mouth'—vocalisation without words, with the teeth closed and the lips nearly so. It has been extensively used by recent composers as a means of adding variety of vocal tone to their works, producing quasi-instrumental effects by means of different vowel sounds inducing different positions of lips and teeth often described as 'vocal orchestration.' C.

BOUCHER, Alexandre Jean (*b.* Paris, Apr. 11, 1778; *d.* there, Dec. 29, 1861), a well-known violinist.

It is related that he played at the court when only 6 and at the Concert Spirituel when 8 years of age. In 1787 he went to Madrid, where he was appointed solo-violinist to the King, and associated as a quartet-player with Boccherini. In 1806 he returned to Paris, and in 1820 began to travel over Europe, exciting everywhere, if not the unconditional approbation of artists and critics, at any rate the admiration and curiosity of the general public by his extraordinary performances. In 1844 he returned to France and settled at Orleans.

Possessed undoubtedly of an exceptional talent for execution, Boucher was not a little of a musical charlatan. Spohr made his personal acquaintance at Brussels in 1819, and speaks of him as follows:

> 'His face bore a remarkable likeness to Napoleon Bonaparte's, and he had evidently carefully studied the banished emperor's way of bearing himself, lifting his hat, taking snuff,'

etc. (*Selbstbiog.* ii. 73). As soon as he came to a town where he intended giving a concert, he practised these tricks on the public walks and in the theatre, in order to attract the curiosity of the public; he even managed to spread a rumour that he was persecuted by existing governments on account of his likeness to Napoleon, because his appearance was likely to revive the sympathies of the masses for that great man. He certainly advertised a concert at Lille in these terms: 'Une malheureuse ressemblance me force de m'expatrier; je donnerai donc, avant de quitter ma belle patrie, un concert d'adieu,' etc. He also styled himself 'L'Alexandre des Violons.'

In his proficiency in the execution of double stops, the staccato and other technical difficulties, he appears to have been only surpassed by Paganini, and we are assured by competent contemporary critics that he now and then

played a slow movement with ravishing, if somewhat extravagant, expression. But whatever powers of execution his performances may have shown, if, as Spohr states, he altogether spoiled a quartet of Haydn by tasteless additions, we must conclude that he was but an indifferent musician. After what we know of his general character as an artist, it is not surprising to learn that he not infrequently wound up a furious passage by intentionally upsetting the bridge of his violin as a climax, and that he used to perform quite as much by the action of the face and legs as of the bow.

Boucher's wife was a clever player on the harp, but seems to have adopted her husband's doubtful means of winning the applause of the public. She used to play duets for piano and harp, with one hand on each instrument.

P. D.

Bibl.—Gustave Vallat, *Études d'histoire de mœurs et d'art musical* (1890).

BOUCHERIT, Jules (*b.* Morlaix, Mar. 29, 1878), violinist. He was taught first by his mother, a well-known artist; then admitted to the Paris Conservatoire, where he finished his studies under J. Lefort. He gained, in 1892, a first prize, after which he began a career as a soloist which took him all over Europe. Unfortunately this was interrupted several times by bad health. He has been a professor at the Paris Conservatoire since Oct. 1919.

For a long time he made his reputation chiefly by the delicacy, finish and grace of his style (he was considered one of the best interpreters of Mozart); but for some years past he has enlarged his manner and given, sometimes as a solo player, sometimes in concerted music, fine and broad interpretations of classical and romantic music, especially of Schumann. M. P.

BOUFFONS (Guerre des Bouffons), a name given to the historical quarrel dividing Paris society into two camps, as partisans of French and Italian music, during the performances given by the Italian *buffi* (Fr. *bouffons*) from 1752–54. They consisted in the revival of Pergolese's 'Serva padrona' on Aug. 1, 1752 (previously given Oct. 4, 1746), followed by his 'Maestro di musica,' 'Intermezzi' by G. Latilla, Rinaldo di Capua, Ciampi, etc.

A contemporary document on the subject is furnished by J. J. Rousseau's *Lettre sur la musique française* (1753), the contents of which is described under the name of its author. The controversy was carried on in a series of pamphlets, and, by Rousseau, Diderot and others, was made the pretext for attack on the music of Rameau (*q.v.*).

Bibl.—L. de La Laurencie, *Les Bouffons* (*S.I.M.*, 1912); G. Cucuel, *Les Créateurs de l'Opéra-Comique français* (1914).

M. L. P.

BOUFFONS, LES, see Matassins.

BOUGHTON, Rutland (*b.* Aylesbury, Jan. 23, 1878), one of the most prominent English composers of his generation, who has devoted himself with remarkable assiduity to the problems of opera, its composition and production.

Boughton's career began in 1900, when he became a student of composition under Stanford at the R.C.M., and learnt counterpoint there under Walford Davies. He seems to have reached the College at an unpropitious age. Already too advanced in his art to accept academic restraint easily, he was not old enough to profit fully by the discipline of such a training. He left after a year, but he acknowledged his indebtedness to both these masters later in the dedication of his works. In the following years some early works for orchestra made public appearances. These included[1] a symphonic poem, 'The Chilterns,' given under Allen Gill at the Hotel Cecil (Dec. 31, 1901), an 'Imperial Elegy' commemorating the death of Queen Victoria, played under Wood at Queen's Hall (1902), and a symphonic poem, 'A Summer Night,' introduced at the Halford Concert at Birmingham (Nov. 25, 1902). Boughton was engaged for a time in the orchestra of the Haymarket Theatre, London, but he went through many difficulties until, in 1904, Granville Bantock provided him with a teaching post on the staff of the Midland Institute School of Music at Birmingham. This he retained till 1911. He composed much, and the production at the Birmingham Festival (1909) of an important work for choir and orchestra, 'Midnight' (words from Edward Carpenter's *Towards Democracy*), was an outstanding event. (See Birmingham.) He also lectured, and conducted the New Choral Society at Birmingham.

Meantime the process of self-education was going forward. The commission to write a little book on Bach, in Messrs. Dent's series *The Music of the Masters*, produced from him (1907) a monograph which showed serious study of Bach's music. The disadvantage of self-education is that it is apt to come late. Boughton discovered and swallowed whole the Wagnerian theory of music-drama as well as Wagner's philosophy on other aspects of life, just at the time when the lacunae in the Wagnerian theory were being realised and the reaction from Wagnerism was becoming potent in music. When, therefore, in collaboration with Reginald Buckley, he determined to carve out a place for himself, his ideal was to found an English Bayreuth. With Buckley he conceived the idea of establishing such a theatre at Glastonbury, where a series of music-dramas on the Arthurian legends connected with the place (with Buckley as poet and Boughton as musician) should be given periodically. The original project was not fulfilled, but the two friends made a serious start in that direction.[2]

[1] See *The Self-Advertisement of Rutland Boughton*, a pamphlet published without date about 1909.

[2] See *The Music Drama of the Future*, two essays, and a dramatic poem (*Uther and Igraine*) by Rutland Boughton and Reginald Buckley, published by William Reeves, 1908.

Boughton settled in Glastonbury with Christina Walshe, who devotedly seconded every project and joined her life with his. In 1914 was begun there in the small assembly-room a series of performances of musical and dramatic works by a company, half professional, half amateur, which came to be known as the Glastonbury Festival Players. Some well-known opera singers gave their services; others now well known on the London stage gained experience there. Boughton's opera 'The Immortal Hour' (words by Fiona Macleod) was first performed there in 1914 and repeated by the Glastonbury company at the Winter Gardens, Bournemouth, in Jan. 1915. Fragments of his choral music-drama 'The Birth of Arthur' (poem by Buckley) were tried at about the same time, and in the following year (1916) a repertory, which included Purcell's 'Dido,' scenes from Wagner's works, Gluck's 'Iphigenia in Tauris,' together with Boughton's own works, 'Bethlehem' and 'The Round Table' (poem originally by Buckley, but largely rewritten by Boughton), and some by his contemporaries, was developed. The conditions were of the simplest; a piano took the place of the orchestra, but a spirit of artistic co-operation was developed under Boughton's leadership, and the skill of Christina Walshe in devising stage decorations and dresses combined with Boughton's original ideas on production, gave these performances a unique character. There was an enforced cessation during the later years of the war, but the work was revived in 1919. The movement had gathered considerable support, and in 1920 it looked as though the permanent theatre at Glastonbury might be established. In the summer of that year Boughton brought his Glastonbury Players to London, and 'The Immortal Hour,' with other works, was given at the 'Old Vic.' In August the first complete performance of 'The Birth of Arthur' with 'The Round Table' (these were intended to be the first sections of a cycle of Arthurian music-dramas) was given at Glastonbury, and a vigorous campaign to establish the scheme permanently was pursued. A site for the theatre had even been secured through the generosity of a friend, but the project was not successful, and the site had to be disposed of. Since 1920 Boughton has continued his personal work at Glastonbury; he produced his 'Alkestis' (Gilbert Murray's translation from Euripides) in 1922, and returning again to Arthurian legend, produced 'The Queen of Cornwall' (play by Thomas Hardy) in Aug. 1924. At the close of its performances a new project for establishing the Glastonbury Festival Players as a limited company was announced.

Meantime Boughton's work had become familiar, and in the case of three operas has been successful in the regular theatre. The Birmingham Repertory Company staged 'The Immortal Hour' and brought its production to London at the Regent Theatre in Oct. 1922, where it was given a long run. 'Bethlehem' (an adaptation as a music-drama of the mediæval Coventry play) was given there at Christmas 1923, and 'Alkestis' was brought to Covent Garden by the British National Opera Company in Jan. 1924 and played frequently by them throughout the year.

It is too early to estimate the permanence of Boughton's work. He writes voluminously, perhaps too fast, but with a conspicuous directness of purpose. Unlike many of his contemporaries, he has realised, through his work as composer, teacher and stage producer in Glastonbury, that art is for the many, not for the few; he has never forgotten that tunes go further than chords, and (since the use of an orchestra was generally denied him) that outlines matter more than colours. In all his stage works he has relied much on the chorus and the dance as the expression of that principle of artistic co-operation which he first imbibed from Wagner and put into practice at Glastonbury. Probably 'The Immortal Hour' is the most completely spontaneous of his works; the beauty of its melody is beyond question, and some of his later ones, notably 'Alkestis' and 'The Queen of Cornwall,' show a marked tendency to repeat its idiom. But what gives his work a power which few English operatic composers possess, is that whether he is dealing with the shadows of Celtic legend, the poignant emotions of Greek tragedy, or the familiar story of the Mother and Child at Bethlehem, he writes music which searches out the core of the human situation. Though he has written in a diversity of forms, particularly choral works and chamber music, it is the stage which brings out this distinctive quality.

The following is a list of Boughton's principal works which have received public performance. The dates are those of composition.

STAGE WORKS

'The Birth of Arthur.' Choral drama (text by Buckley and Boughton). 1908–09.
'The Immortal Hour.' Opera, 2 acts (Fiona Macleod). 1913–14.
Choral Dances. 1914.
'Snow White.' Ballet (with Margaret Morris). 1914.
'Bethlehem.' Choral drama on the Coventry play. 1915.
'The Round Table.' Music-drama (Buckley and Boughton). 1916.
'Agincourt.' Dramatic scene from Henry V. 1918.
'The Moon Maiden' Choral ballet for girls. 1919.
'Alkestis.' Music-drama, 3 acts (Murray's trans. of Euripides). 1920–22.
'The Queen of Cornwall.' Music-drama (Hardy). 1924.

CHORUS AND ORCHESTRA

'The Skeleton in Armour.' Symphonic poem (Longfellow). 1898.
'The Invincible Armada.' Symphonic poem (Schiller, trans. Lytton). 1901.
'Midnight.' Symphonic poem (Carpenter). 1907.
'Song of Liberty' (H. Bantock). 1911.

CHORUS UNACCOMPANIED

Choral Variations on Folk-Songs (5 sets). 1905.
'The City.' Motet. 1909.
Six Spiritual Songs. 1910.
Four Festival Choruses (Drinkwater). 1911.
Six Celtic Choruses 1914.
Four Partsongs. Male choir. 1923.

SONGS, ETC.

'The Chapel in Lyonnesse.' 3 male voices, string quartet and PF. 1904.
Four Songs (Carpenter). 1906–07.

Celtic Love Songs (Macleod). With string quartet. 1910.
Five Songs of Womanhood (Christina Walshe). 1911.
Symbol Songs (M. Richardson). With string quartet. 1920.

INSTRUMENTS

Three Folk Dances, for strings. 1912.
Sonata, violin and PF. 1921.
2 String Quartets. 1923.

C.

BOUHY, Jacques Joseph André (*b.* Pepinster, Belgium, June 18, 1848), distinguished baritone singer and teacher, at first pupil at the Conservatoire of Liège, and subsequently at that of Paris.

He appeared at the Paris Opéra in 1871, and won great success as Mephistopheles in 'Faust,' afterwards in Reyer's 'Érostrate,' when that work was revived for two performances. In 1872 he went to the Opéra-Comique, and created the part of Don César de Bazan in Massenet's opera of that name on Nov. 30; he was the first Escamillo in 'Carmen,' and soon afterwards joined the company of the Théâtre lyrique de la Gaieté, where he sang in important works, such as Massé's 'Paul et Virginie.' On Apr. 22, 1882, he appeared at Covent Garden as Mephistopheles, and made a decided success. In 1885 he was appointed director of the Conservatorium at New York; he remained there till 1889, when he returned to Paris and sang, for the first time in Paris, the part of the high priest in Saint-Saëns s 'Samson et Dalila' at the Théâtre Eden, of a part of which he had sung the first act at a Colonne concert, Mar. 26, 1875. After a new engagement at the Paris Opéra, and a second sojourn in America, Bouhy finally settled in Paris, where he devoted himself to teaching; he won a distinguished position as a voice-trainer.

G. F.

BOULANGER, Mme. Marie Julie (*née* Halligner) (*b.* 1786; *d.* July 23, 1850), a dramatic singer. She studied in the Conservatoire under Plantade and Garat, and made her début with immense success at the Opéra-Comique in 1811. Her voice was fine, her execution brilliant, and her acting full of character and intelligence. Her most successful rôles were those of soubrettes and maid-servants. She remained on the stage till 1845, but her voice had failed some time previously.

M. C. C.

BOULANGER, (1) Nadia (Juliette) (*b.* Paris, Sept. 16, 1887), was educated at the Conservatoire, where she obtained first prizes in harmony, counterpoint, fugue, organ, accompaniment and, lastly, in 1908, the 2nd Grand Prix de Rome (cantata, 'La Sirène'). A distinguished teacher, she occupies posts at the Conservatoire, the École Normale de Musique of Paris, and the American Conservatory at Fontainebleau. Her compositions consist of orchestral and instrumental pieces, songs, music to d' Annunzio's 'Città morte,' in co-operation with R. Pugno, etc. (2) Lili (Juliette-Marie-Olga) (*b.* Paris, Aug. 21, 1893; *d.* Mézy, Seine-et-Oise, Mar. 15, 1918), sister and pupil of the former. Despite irregular studies owing to ill-health, she worked with G. Caussade and P. Vidal (composition) at the Conservatoire in 1912. There she won the 1st Grand Prix de Rome with the cantata 'Faust et Hélène' (1913), being the first woman to whom it had ever been given in music. In her short but active career she achieved a certain number of compositions which bear the mark of her exceptionally high musical gifts and artistic nature: psalms with orchestra, 2 orchestral poems, songs, music to Maeterlinck's 'Princesse Maleine,' violin and flute pieces, choir and orchestra works, etc.

M. L. P.

BOULT, Adrian Cedric (*b.* Chester, Apr. 8, 1889), orchestral conductor, was educated at Westminster School and Christ Church, Oxford.

He took full advantage of the very varied opportunities for musical experience which Allen (*q.v.*) as Professor of Music at Oxford afforded to undergraduates. Boult was president of the Oxford University Musical Club. After taking his degree he continued his musical education at the Leipzig Conservatorium (1912–13), where he came into personal touch with Nikisch, whose methods as a conductor he studied closely. He gave some orchestral concerts in Liverpool and elsewhere, but may be said to have made his name by conducting certain of the Royal Philharmonic Society's concerts in London in the season 1918–19. He joined the staff of the R.C.M. (1919), and organised there a class in conducting and score-reading. A little later he succeeded Stanford as conductor of the R.C.M. orchestra, and also undertook the direction of the Patrons' Fund rehearsals. He conducted the British Symphony Orchestra in an enterprising series of symphonic programmes at Kingsway Hall (1920), and gave concerts with the same orchestra at the People's Palace. He also took charge of a season of Diaghilev's Russian Ballet at the Empire Theatre, and conducted Sunday concerts of the London Symphony Orchestra.

In the following years Boult conducted programmes in various Continental tours—Munich, Prague, Vienna—primarily with the object of introducing important English works to foreign audiences. He accepted the invitation of Casals to conduct some English works at Barcelona (1923). Some of these works owed their first performances to him. He produced the greater part of Holst's 'Planets' at one of his Royal Philharmonic concerts, and Vaughan Williams's 'Pastoral Symphony' at a later one. He gave the first London performance of Bliss's 'Colour Symphony' at the R.C.M. He has also taken an active part in the English Competitive Festival movement, judging the competitions, training conductors and introducing important choral and orchestral works into their performances, more especially at Petersfield and

Winchester. In 1923 he succeeded Sir Henry Wood as conductor of the Birmingham Festival Choral Society, and in 1924 was appointed conductor of the Birmingham City Orchestra. He has written a short *Handbook on the Technique of Conducting*, primarily for the use of his R.C.M. students (see CONDUCTING).

C.

BOURDELOT, (1) PIERRE (real name MICHON) (*b.* Sens, 1610; *d.* Abbey of Macé, Feb. 9, 1685), Royal Physician, collected material for a history of music which was elaborated by his nephew, (2) PIERRE BONNET-BOURDELOT (*b.* Paris, 1638; *d.* there, Dec. 19, 1708), and finished by the latter's brother, (3) JACQUES (*d.* 1724), who published it in 1715 as *Histoire de la musique et de ses effets.* A new edition with a *Comparaison de la musique italienne et la musique française*, Parts 2-4, by Lecerf de Vionville, appeared in 1726, and again in 1743. E. V. d. S.

BOURDON, a pedal or manual stop of wood, of the stopped diapason family, and of 16 ft. *tone.* The insertion of the stopper causes the pipes to speak the octave below; consequently they are only of half the true speaking length as compared with open pipes of the same pitch; it is therefore usual, in speaking of the pitch of all kinds of stopped pipes, to make use of the term *tone* as referring to pipes of only half true speaking length.

As a manual stop of 16 ft. *tone* it is met with under the names of bourdon, lieblich bourdon and double diapason, and as a pedal stop of 16 ft. *tone* it is sometimes called sub-bass.

By extension of the 16 ft. compass upwards and downwards the pedal stop is now frequently made to be available as a bass flute or octave of 8 ft. *tone*, and as a sub-bourdon, contra-bass or sub-bass of 32 ft. *tone.* In connexion with this latter capacity the tone of these pipes appears to deteriorate rapidly below the G of 24 ft. *tone*; therefore, for this and pressing economical reasons (both of cost and space), the lower notes of the 32 ft. *tone* or pitch are now generally obtained acoustically, *i.e.* by coupling notes a fifth apart. The speech of bourdons is apparently much improved by the addition of octave flue-work, or other combination. Occasionally they are made in metal or zinc, but some difficulty is experienced by reason of the tompions or stoppers dropping down and upsetting the speech, tone and pitch; this, however, could be remedied by mitreing the tops of the pipes to a right angle, which would not apparently affect the tone, and would allow the stoppers to rest upon their edges.

Occasionally the bourdon is made to speak in two powers, but the variation of the pressure of wind required to accomplish this necessitates some compensating device to keep the pitch constant at both powers. T. E.

BOURGAULT-DUCOUDRAY, LOUIS ALBERT (*b.* Nantes, Feb. 2, 1840; *d.* Vernouillet, Seine-et-Oise, July 4, 1910), French composer, was a nephew of Billault, the famous minister of the Second Empire. Having entered the legal profession in 1859, he was received into Ambroise Thomas's class at the Conservatoire, and in 1862 he carried off the first prize for composition with a cantata, 'Louise de Mézières.' A comic opera, 'L'Atelier de Prague,' had been represented at Nantes in 1858.

He further composed a Stabat Mater, performed at St. Eustache, Apr. 5, 1868, and at the Concerts Populaires, Good Friday, Apr. 3, 1874, a work written in an archaic style, having in it something of the manner and the vague tonality of plain chant without being restricted to its rules; an orchestral suite in 4 movements, entitled 'Fantaisie en Ut mineur' (Concerts Populaires, Dec. 27, 1874), and a little 'satiric' drama, 'La Conjuration des fleurs,' of which he also wrote the words, and which was produced under his own direction at the Salle Herz, Jan. 27, 1883. Mention must also be made of his operas: 'Michel Colomb' (Paris, 1887), 'Bretagne' (1887), 'Thamara,' a 3-act opera (Opéra, Dec. 28, 1891), and 'Myrdhin' (written 1905, produced at Nantes 1912). He also wrote a 'Carnaval d'Athènes'; a 'Rhapsodie cambodgienne' in 2 movements; and 'L'Enterrement d'Ophélie' for orchestra, a work full of originality and life; a 'Symphonie religieuse' in 5 movements for mixed chorus without accompaniment, and other choral works. In 1869 Bourgault-Ducoudray founded in Paris an amateur choral society, and gave in a most excellent manner such works as Handel's 'Alexander's Feast' and 'Acis and Galatea,' cantatas by Bach, Clément Janequin's 'Bataille de Marignan,' selections from Rameau, choruses by Palestrina, Orlando Lasso, etc. He went to Greece on a kind of musical mission, and brought back some interesting notes on the music of that country, which he published in a pamphlet entitled *Souvenirs d'une mission musicale en Grèce et en Orient* (1876). He published an important collection of songs, 'Trente mélodies populaires de la Grèce et de l'Orient,' collected and harmonised with Greek, Italian and French words. To the number of his writings must be added *Conférence sur la modalité dans la musique grecque, Études sur la musique ecclésiastique grecque*, etc. etc. After 1878 he lectured on the history of music at the Conservatoire. He undertook a musical journey into Brittany, and published on his return 'Trente mélodies populaires de la Basse Bretagne,' collected and harmonised with a French translation in verse by F. Coppée (1885). A. J.; corr. M. L. P.

BOURGEOIS, JEANNE (*b.* Belgium), operatic contralto, studied first at the Brussels Con-

servatoire, afterwards in Paris with Rose Caron. She made her début at the Théâtre de la Monnaie in 1905, and remained there for four years. During her first season at Covent Garden, in 1909, she took part in two fresh productions, namely, 'Pelléas et Mélisande' (singing the rôle of Geneviève) and Frederic d'Erlanger's 'Tess' (Dark-Carr). The rich timbre of her voice and her artistic method earned favourable notice, and she was re-engaged for the following season, when she appeared as Mallika in a revival of 'Lakmé.' Again, 1912, she sang in the first performances here of 'I Giojelli della Madonna' and 'Conchita.'

Bibl.—Northcott, *Covent Garden and the Royal Opera.*

H. K.

BOURGEOIS, Louis (*b.* Paris, *c.* 1510; still living in 1561), the son of Guillaume Bourgeois, was an important figure in the evolution of the Genevan Psalter.

In 1541 he was invited to Geneva, about the time of Calvin's return from Strassburg. On the removal of Guillaume Franc (*q.v.*) to Lausanne in 1545 his place was given to Bourgeois, jointly with a Genevan named Guillaume Fabri, the former receiving 60, the latter, 40 of the salary of 100 florins which had been paid to Franc. Of the personal history of Bourgeois we know nothing beyond what may be gathered from some notices of him in the registers of the Council of Geneva. These are curious as illustrative of the place and the time. In 1547 the Council admitted him gratuitously to the rights of citizenship 'in consideration of his being a respectable man and willing to teach children.' Shortly afterwards, to enable him the better to pursue his studies, they exempted him from duties connected with the town guard and the works of the fortifications, and presented him with a small china stove for his apartment. Before long his salary was for some reason reduced to 50 florins. On his petitioning that it should be restored to its former amount, or even slightly increased in consequence of his poverty, the parsimonious Council gave him two measures of corn 'for that once, and in consideration of an expected addition to his family.' To a second petition, even though supported by Calvin, they turned a deaf ear. On Dec. 3, 1551, Bourgeois was thrown into prison for having 'without leave' altered the tunes of some of the psalms, but through the intervention of Calvin obtained his release on the following day. The alterations, however, were sanctioned and adopted. Another innovation proposed by Bourgeois fared better with the Council. His recommendation to suspend a printed table in the churches to show what psalm was to be sung was approved of, and rewarded by a donation of 60 sols. In 1557 he returned to Paris.

Bourgeois's chief claim to notice at the present day arises from his connexion with the Genevan Psalter. The authorship of the melodies in this remarkable collection has been long a subject of controversy. It has been attributed, wholly or in part, to several musicians of the time, to Bourgeois, Franc, Goudimel, Claudin Le Jeune and others. The claims set up for Goudimel and Le Jeune are easily disposed of. Neither of these composers ever visited Geneva or had any direct relations with Calvin. In 1557, when the greater part of the Genevan Psalter had been already published, Goudimel was still a member of the Church of Rome. The Genevan Psalter was completed in 1562, and it was not until that year that Goudimel published his 'Seize Pseaumes mis en musique à quatre parties, en forme de motets.' This was followed by the entire Psalter, first in 1564 harmonised in double counterpoint, then in 1565 in simple counterpoint (generally note against note), and lastly in 1565–66, when Goudimel produced another arrangement of the psalms for 3, 4 or more voices in the form of motets.

Le Jeune was but 12 years of age in 1542, when the first edition of the Genevan Psalter was published, and not above 21 in 1551, when the whole of Marot's and the first portion of Beza's translations had already appeared. In 1564 he published 'Dix Pseaumes de Dauid nouuellement composés à quatre parties, en forme de motets . . .' reprinted in 1580. The psalms are Marot's, but the music is entirely original. Le Jeune died in 1600, and his harmonised arrangements in 4 and 5 parts of the Genevan melodies were not printed until the following year, nor that in 3 parts (Book I.) until 1602.[1] But long before the psalms of Goudimel and Le Jeune appeared, Bourgeois had himself harmonised the tunes up to that time included in the Genevan Psalter. In 1547 he published

'Pseaulmes cinquante de Dauid . . . traduictz . . . par Clement Marot, et mis en musique par Loys Bovrgeoys, à quatre parties, à voix de contrepoinct egal consonnante au verbe. Lyon, 1547.'

In the same year he also published

'Le premier liure des Pseaulmes de Dauid, contenant xxiv. pseaulmes.[2] Composé par Loys Bovrgeois. En diuersité de Musique: à scauoir familiere ou vaudeuille; aultres plus musicales . . . Lyon.'

In the latter the words of the psalms are those of Marot, but the melodies are original and wholly different from those of the former work. All these harmonised psalters were intended only for private use. Down to the 19th century nothing beyond the melody of the psalms was tolerated in the worship of the Reformed Churches, and it was not improbably the aversion of Calvin to the use of harmony that compelled Bourgeois to print his psalters at Lyons instead of Geneva.[3]

Before we consider more particularly the authorship of the melodies in the Genevan

[1] Book I. was reprinted in 1607, and was followed by the Second and Third Books in 1608. The latter books apparently had not been published in 1601.

[2] In four parts.

[3] Specimens of the psalms, as harmonised by Bourgeois, Goudimel, Le Jeune and others, are given by Douen in his work cited below.

Psalter, a brief account of the origin and development of that important collection must be given.

When Calvin, expelled from Geneva, went to Strassburg in 1538 he resolved, after the example of the Lutherans in Germany, to compile a psalter for the use of his own church. This, of which the only known copy was discovered in the State Library at Munich, contains 18 psalms, the Song of Simeon, the Decalogue and the Creed, to each of which a melody is prefixed. Of the psalms the words of twelve are by Marot (1, 2, 3, 15, 19, 32, 51,[1] 103, 114, 130, 137 and 143); of five (25, 36, 46, 91 and 138), with the Song of Simeon and the Decalogue, by Calvin himself, and of one (113) in prose. These psalms of Marot exhibit variations from the text first published by the author three years later, and must therefore have been obtained by Calvin in MS. from some private source. Calvin and Marot certainly met in 1536 at the court of Ferrara, but there is no evidence that any intimacy was then formed, or that any communication passed between them, until Marot fled to Geneva in 1542. The first translation made by Marot was Psalm 6, written and published in 1533 in 'Le Miroir de très chrétienne Princesse Marguerite.' By 1539 he had completed his first instalment of thirty psalms, but up to that time they circulated in manuscript only. They are all found in a psalter published at Antwerp in 1541, and their text is there the same as that published by Calvin. Douen thinks that the varied readings are due to Pierre Alexandre, editor of the Antwerp Psalter, but it seems equally if not more probable that they represent, largely or wholly, the original text of Marot's manuscripts, revised by him when he published the 'Trente Pseaulmes' about the beginning of 1542. The tunes to Calvin's own translations are German, four by M. Greiter and one by W. Dachstein. Calvin returned to Geneva in Sept. 1541, and shortly afterwards, in Feb. 1542, a psalter (professedly printed at Rome by the command of the Pope [2]) was published at Strassburg, containing, besides the psalms and other pieces of the collection of 1539, together with 4 psalms by other writers, the 18 remaining psalms of those which Marot had translated up to that time (4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 22, 24, 37, 38, 104, 113 and 115) and his Paternoster. To the Paternoster and to eight of the psalms (4, 6, 9, 22, 24, 38, 104 and 113) new melodies were added. On these two collections the first edition of the Genevan Psalter was based, and was published at Geneva in 1542. It contains the 30 psalms of Marot, with his Pater and Credo (a different one from that in the Strassburg edition of 1539, which is in prose), the 5 psalms of Calvin, and his Song of Simeon and Decalogue. Of the tunes, 17 (1, 2, 3, 15, 25, 36, 46, 91, 103, 104, 114, 130, 137, 138, 143, the Song of Simeon and the Paternoster) are taken from the preceding psalters, but all except three (36, 103 and 137) are more or less modified; 22 tunes are new, 13 of them (4, 6, 8, 9, 13, 19, 22, 24, 32, 38, 51, 113 and the Decalogue) are substituted for the former melodies, 8 (5, 7, 10, 11, 12, 14, 37 and 115) are set to the psalms left with music in the pseudo-Roman Psalter, and one is adapted to Marot's Credo. In Nov. 1542 Marot arrived at Geneva, and there translated 19 other psalms (18, 23, 25, 33, 36, 43, 45, 46, 50, 72, 79, 86, 91, 101, 107, 110, 118, 128 and 138) and the Song of Simeon, which, with the 30 previously published, make up what are commonly spoken of as the 'Cinquante Pseaumes.' These, with Marot's Decalogue, Ave and Graces before and after meat, all with music, were added to the Psalter in a new edition published at the end of 1543.

In this edition the text of Marot's earlier psalms was corrected by the author, and Calvin's Song of Simeon and 5 psalms were replaced by Marot's new versions of the same.

In 1544 Marot died at Turin, and the Psalter remained unfinished until the work was resumed by the publication in 1551 of 34 additional translations by Beza, which were united in the following year to the 49 by Marot already in use. In 1554 six more psalms appeared, soon followed by another, and the Psalter was completed in 1562.

The following lists show the order in which the psalms were published in successive editions of the Genevan Psalter:

1542. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 19, 22, 24, 32, 37, 38, 51, 103, 104, 113, 114, 115, 130, 137, 143, the Pater and Credo, by Marot. 25, 36, 46, 91, 138, Song of Simeon and Decalogue, by Calvin.

1543. The seven versions by Calvin were omitted, and the following by Marot added—18, 23, 25, 33, 36, 43, 45, 46, 50, 72, 79, 86, 91, 101, 107, 110, 118, 128, 138, Song of Simeon, Decalogue, Ave and Graces.

1551.[3] 16, 17, 20, 21, 26, 27, 28, 29, 30, 31, 34, 35, 39, 40, 41, 42, 44, 47, 73, 90, 119, 120, 121, 122, 123, 124, 125, 126, 127, 129, 131, 132, 133, 134,[4] all by Beza.

To these psalms the tunes were almost certainly adapted at the same time, but no copy of the Psalter containing them is known of a date anterior to 1554.

1554. The six appendix psalms of this year (52, 57, 63, 64, 65 and 111), and the additional one of 1555 (67), appeared without tunes.

In 1562 the Psalter was completed by the addition of the remaining 60 psalms; proper tunes were assigned to 38 of these, as also to

[1] Numbered L. after the numeration of the Vulgate.
[2] Hence known as the pseudo-Roman Psalter.

[3] A copy of the 1551 edition is in the State Library at Dresden. *Mus. T.*, July 1909.
[4] The tune to this psalm is that known in England as the 'Old Hundredth.'

psalms 52 and 57, while the others, as well as the remaining appendix psalms of 1554–55 (63, 64, 65, 67 and 111), were sung to the melodies of other psalms.

The psalms thus added in 1562, with tunes, were—48, 49, 54, 55, 56, 58, 59, 60, 61, 74, 75, 80, 81, 83, 84, 85, 87, 88, 89, 92, 93, 94, 96, 97, 99, 102, 105, 106, 112, 135, 136, 141, 145, 146, 147, 148, 149, 150. Without tunes—53, 62, 66, 68, 69, 70, 71, 76, 77, 78, 82, 95, 98, 100, 108, 109, 116, 117, 139, 140, 142, 144. Including, therefore, the Song of Simeon and the Decalogue, the Genevan Psalter contains in all 125 tunes, of which 85 were selected or adapted between 1542 and 1554, the rest in 1562.

The story which ascribes to Franc the editorship of the Genevan Psalter will be noticed later (see FRANC and PSALTER), but investigations in the archives of Geneva have clearly shown that the task of selecting and arranging the tunes was entrusted to Bourgeois, and an entry in the registers of the Council, dated July 28, 1552, which will be found quoted at length in the notice of FRANC, distinctly states that Bourgeois had set to music the psalms of Beza, published the year before, and had arranged those already published in the earlier editions of the Psalter.

A minute collation which Douen has made of these earlier editions enables us to see what Bourgeois did. In 1542 he adopted, with modifications, 17 tunes from the Strassburg psalters and added 22 new ones. In or before 1549 seventeen tunes were more or less altered and 8 replaced by others. In 1551 four were altered and 12 new melodies substituted, some for earlier ones of Bourgeois himself. In several instances, therefore, the tune is of later date than the psalm.

These last changes were final, and mark the time since which the tunes adopted before 1562 have remained unaltered. The old Strassburg tunes of 1539 which still survived were those to Psalms 1, 2, 15, 36, 91, 103, 104, 114, 130, 137 and 143, two of which (36 and 137) retained almost their primitive form, and one, 103, remained unaltered. Douen considers these Strassburg melodies to possess more of a German than a French character, and according to Riggenbach 36 and 91 are by Matthäus Greiter, a member of the choir of Strassburg Cathedral.

How far the other tunes adapted by Bourgeois are original it is impossible to determine. A few can be traced to a German origin, some are constructed out of fragments of earlier melody, while others are adapted from secular songs popular at the time. It is not improbable that every tune in the Genevan Psalter belongs to one or other of the above categories.[1]

Bourgeois left Geneva in 1557, and undoubtedly had no connexion with the Genevan Psalter after that time. The 40 tunes of 1562 were added by another and a less skilful hand. In June 1561 an entry in the 'Comptes des recettes et depenses pour les pauvres' records the payment of 10 florins to 'Maître Pierre' for having set the psalms to music. This person is conjectured by Becker to be Pierre Dubuisson, a singer who in 1565 was admitted gratuitously to the rights of citizenship at Geneva, but nothing certain is known on the subject.

It only remains to add that in 1550 Bourgeois published

'Le droict chemin de musique, composé par Loys Bourgeois, auec la manière de chanter les pseaumes par vsage ou par ruse, comme on cognoistra, au xxxiv,[2] de nouveau mis en chant, et aussi, le cantique de Siméon. Genève 1550.'

This treatise, in twelve chapters, is the first in which a proposal is made to abandon the method of the Guidonian hand and to teach music by the employment of the solfeggio. An analysis of it will be found in Fétis, *Biogr. des musiciens*, ii. 42. The last known work of Bourgeois shows him still employed in working on the Genevan melodies. It is entitled:

'Quatre-vingt-trois Psalmes de Dauid en musique . . . à quatre, cinq, et six parties, tant à voix pareilles qu'autrement, etc. Paris 1561.'

For full details respecting Bourgeois and the history of the Genevan Psalter see the exhaustive work of Douen, entitled *Clément Marot et le Psautier huguenot*, 2 vols., Paris, 1878–79. The following works may also be consulted:

BOVET, *Histoire du Psautier des églises réformées*, Neuchâtel et Paris, 1872; G. BECKER, *La Musique en Suisse*, Geneva and Paris, 1874; RIGGENBACH, *Der Kirchengesang in Basel*; and six articles in the *Mus. T.* (June to Nov. 1881) by the present writer. Also an article in the *Rivista musicale italiana*, vi. 496.

G. A. C.

BOURGEOIS, LOUIS THOMAS (*b.* Fontaine l'Évêque, Hainault, Oct. 24, 1676; *d.* Jan. 1750[3]), composer. He was counter-tenor at the Opéra, Paris, in 1708, but left in 1711 to devote himself to composing. He became maître de chapelle at Toul, 1716, afterwards at Strassburg, and died in great poverty.[4] He made a reputation as a composer of cantatas which appeared after 1708. They were so popular that his name was linked with that of Rameau on the copies of certain cantatas of the latter. He composed 2 books of French cantatas, 'Cantates anacréontiques,' and a motet, 'Beatus vir' (Ballard). For the court entertainments he wrote ballets and cantatas, 'Les Amours déguisés' (1713), 'Les Plaisirs de la paix' (1715), etc. (See list in *Fétis.*)

M. L. P.

BOURGES, (1) CLEMENTINE DE (*d.* Sept. 30, 1561 or 1562), eminent composer and poetess at Lyons *c.* 1555. Her husband was killed fighting against the Huguenots in 1560 and she died of grief in the following year. A 4-part chorus, 'Da bei rami,' signed 'Clem. de Bourges,' is included in Paix's 'Orgel-tabulatur-Buch' (1583).

F. G.

[1] A composer of that day employed his talents on harmony rather than on melody, and used for his subjects any material that suited his purpose. A difference in style between sacred and secular music hardly existed, and 'composing' was often literally 'compounding.'

[2] A misprint for xxiv.

[3] According to Eiton du Tillet he was born at Dijon *c.* 1676, and died in Paris in 1750 or 1751.

[4] Fétis.

Fétis and *Q.-L.*, however, indicate a French organist of the middle of the 16th century, (2) CLEMENT DE BOURGES, thus called after his native town of Bourges, who, being at Lyons in 1538, frequented the house of the music printer Jacques Moderne. Both authorities confirm the existence of the above-named composition. Gerber, Schilling and Mendel attribute it to Clementine. Fétis does not mention her in his *Biographie universelle des musiciens.*

M. L. P.

BOURGES, JEAN MAURICE (*b.* Bordeaux, Dec. 2, 1812; *d.* Paris, Mar. 1881), a distinguished musical critic, came early to Paris, and studied composition under Barbereau.

In 1839 he became joint editor of the *Revue et gazette musicale.* As a composer he produced chamber and pianoforte music, and songs. On Sept. 16, 1846, his opera 'Sultana' was successfully produced at the Opéra-Comique. He made an excellent translation of the words of Mendelssohn's 'Elijah.' F. G.

BOURNEMOUTH. The Bournemouth Municipal Orchestra was founded in 1893 by Dan GODFREY (*q.v.*) at the instigation of the corporation. The successful engagement of a small Italian band the previous year by way of adding to the amenities of the town had shown the way, and warranted the taking over of the Winter Gardens and the establishment of something of a more permanent nature. In fact this orchestra can claim to be the first municipal permanent orchestra in the country. In two years' time its personnel was large enough to enable Godfrey to begin a series of symphony concerts, which have continued uninterruptedly ever since. But what has given the Orchestra its special significance has been the fact that Godfrey introduced British music into his programmes as, so to speak, a matter of course. By 1923 over 600 native compositions had been performed, many of these for the first time. Practically the whole of the familiar classical repertory has been heard, together with numerous later symphonies, symphonic poems, overtures and concertos of foreign origin. The occasional conjunction of the local choral society with the Orchestra led to the formation in 1911 of a Municipal Choir, many performances of important choral works being given, both British and foreign. In 1922 a musical festival was given, consisting of a series of special concerts, one of the features of which was the invitation accorded to composers to conduct their own works. Similar festivals, but on a larger scale, have been held at Easter in subsequent years, and on these occasions the Choir took part. A detailed account of this unique chapter in English musical history is given in Godfrey's *Memories and Music*, London, 1924. N. C. G.

BOURNONVILLE, (1) JEAN-VALENTIN DE (*b.* Noyon, 16th cent.), maître de chapelle at Rouen, then at Évreux. In 1615 he was at the collegiate church at St. Quentin; in 1618 at Abbéville; and in 1620 at Amiens Cathedral. Fétis mentions 13 masses *a* 4 v. printed by Ballard between 1613–30; 8 'cantica Beat. Mar. Virg.' (Paris). Bournonville was one of the best organists and French composers in the reign of Louis XIII. He was the founder of a school of music from which some remarkable artists went forth, not the least being Arthur AUXCOUSTEAUX (*q.v.*). His son followed him as organist of Amiens Cathedral, and his grandson, (2) JACQUES (*b.* Amiens, *c.* 1676; *d.* 1758), a pupil of Bernier, was highly esteemed by Rameau. His '1er livre de motets' was published by Ballard in 1711. (See *Q.-L.*)

E. V. d. S.

BOURRÉE, a dance of French origin which is said to have come from the province of Auvergne (see Rousseau's *Dictionary of Music*). According to other authorities, however, it is a Spanish dance from Biscay, where it is said to be still practised. It was unknown to Thoinot Arbeau, though introduced into the feasts of Paris about 1590. It is cited by Praetorius, but is not mentioned by Mersenne. The 'Suites for 2 musettes' by Anet (1725) contain a 'Bourrée de Jean des Vignes,' but the French composers of harpsichord music did not adopt it as readily as composers of other nations. The bourrée is often to be found in the older suites, especially in those of Bach, and is of a rapid tempo, in common (*allabreve*) time. In its general character it presents some features of analogy with the GAVOTTE, from which, however, it may readily be distinguished; first, because it is in *allabreve* time, that is, with only 2 beat in the bar, whereas the gavotte has 4; and secondly, because the latter begins on the 3rd crotchet in the bar, while the bourrée always starts on the 4th. Like most of the older dance movements, it consists of two parts, each of which is repeated. In Bach's suites a second bourrée frequently follows the first, in the same way as in a symphony or sonata a trio follows a minuet, after which the first bourrée is repeated.

E. P.; addns. M. L. P.

BOUSQUET, GEORGES (*b.* Perpignan, Mar. 12, 1818; *d.* St. Cloud, June 15, 1854), composer and critic, entered the Conservatoire as violin pupil, and won the Grand Prix de Rome in 1838. His compositions while he held the prize, particularly two Masses (Rome, 1839–1840), excited hopes of a brilliant career. But his first operas, 'L'Hôtesse de Lyon' and 'Le Mousquetaire,' both produced in 1844, were failures. 'Tabarin' (1852) met with better success. For three seasons Bousquet conducted the orchestra at the Théâtre Italien. He contributed articles to the *Revue et gazette musicale.* M. C. C.

BOUVARD, FRANÇOIS (*b.* Paris, 1670; still living *circa* 1758). As a boy he appeared at the

Opéra in high soprano parts, having a beautiful voice of very large compass. At the age of 16 he lost his voice, and went to Rome to study composition. On his return at the beginning of the 18th century he received a Government pension, and in 1702 his 'Méduse' was performed at the Opéra. Four years later he produced 'Cassandra' in company with Bertin. For the French court he wrote 4 operas between 1729 and 1733. He composed besides: 'Cantates françaises,' 4 books of airs, some with flute accompaniment, and other vocal compositions; also a book of violin sonatas. Bouvard had travelled a great deal, lived for a considerable period in Rome, and was made a chevalier of the Order of Christ by the King of Portugal (*Fétis*; *Q.-L.*). E. v. d. s.

BOVICELLI, Giovanni Battista, of Assisi, near Spoletta, a singer at Milan Cathedral, published in 1594 a work on vocal figuration and ornamentation, as practised in his time, which is of great historical interest, as he gives examples from the works of Palestrina, Rore, Victoria and Claudio Merulo thus treated. A description with examples is given in *Monatshefte für Musikgeschichte* 23, p. 113, *et seq.*; also in Eitner's *Bibliographie*, p. 945.

BOVY, Charles Samuel, see Lysberg.

BOW. The strings of the various instruments of the violin tribe are made to vibrate by friction with the hair of the bow. Like the violin, the bow went through many progressive phases, till, at the end of the 18th century, it acquired its present shape, which seems to leave no room for improvement. The bow with which the Rebec (the oldest stringed instrument played with the bow with which we are acquainted) was played, had the form of the weapon from which it derived its name. The stick was much bent, and a cord or string was tied from one end to the other (Fig. 1).

In pictures of the 13th century (see *PLATE XLVI.*) we notice something like a nut and head, and hair was possibly used in place of the cord. The bow now gradually loses more and more the actual bow-shape (Figs. 2, 3, 4); the head is distinct from the stick, and the nut is no longer a portion of the stick, but is attached to it by a wire. On the top of the stick a narrow piece of indented iron is fixed, on which the wire is hooked, and thus the hair made tighter or looser at pleasure (Fig. 5). The next step consisted in the substitution of a screw for the wire and indented iron, by which the tension of the hair could be perfectly regulated. This was Corelli's bow (Fig. 6). It was made of light wood, the stick perfectly straight, hardly if at all elastic, and very short. Tartini's bow (Fig. 7) was considerably longer, the wood thinner and more elastic. (See also *PLATE LXXXVII.*)

Towards the end of the 18th century François Tourte (*q.v.*) brought the art of bow-making to perfection, and created a model on which no

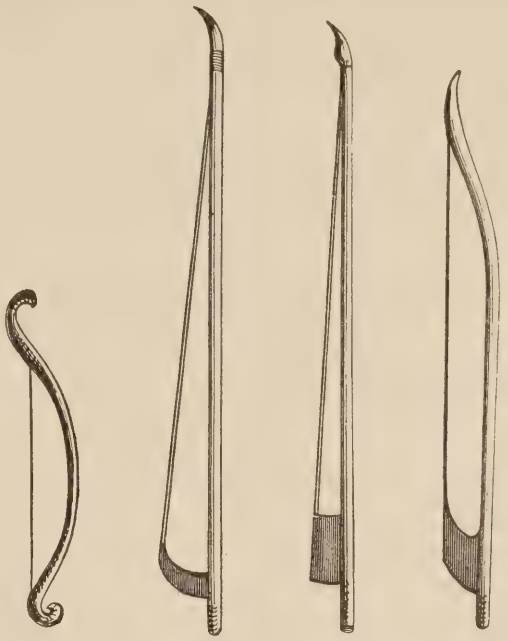

Fig. 1. Fig. 2. (1620.) Fig. 3. (1640.) Fig. 4. (1660.)

improvement has been yet made. In fact his bow combines all the qualities required to enable the player to follow out every conceivable

Fig. 5. Fig. 6. (1700.) Fig. 7. (1740.) Fig. 8.

nuance of tone and movement—lightness, firmness and elasticity. The stick of the modern violin bow (Fig. 8) is made of Brazilian lance-

wood (*Duguetia quitarensis*) or of snake-wood (*Brosimum aubletii*) ; it is cut straight, following the grain of the wood, and afterwards slightly bent by exposure to heat. Although many trials have been made, no wood has been found to possess the necessary qualities in the same degree as those mentioned.

The nut (*c*, Fig. 9) is made of ebony, ivory or tortoise-shell. For violin, tenor and violoncello bows white horse-hair is used ; for double-bass bows, black. The hair (*b*) is inserted

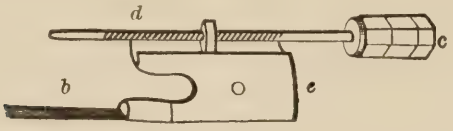

FIG. 9.

in the head (*e*) and the nut of the bow, and can be made tighter or looser by turning the screw (*d*). P. D.

The violoncello bow is a trifle shorter than those used for the violin and tenor, which are of the same length or nearly so, the tenor bow being rather heavier, and the nut and top of the bow slightly deeper. The top and nut of the violoncello bow are deeper still.

The old double-bass bow was of a rude pattern, made of beech or other common wood, and having the primitive arched form. The tone was elicited less by pressure, as in the case of the smaller instruments, than by a sort of ' ripping ' or sweeping touch, partaking of the nature of the pizzicato, the bow being held under-hand, *i.e.* with the wrist depressed and the hair inclined towards the nut, a survival of the method common to all instruments of the viol family. Concurrently with the change from the old three-stringed double bass, tuned by fifths, to the modern orchestral one tuned by fourths, the Paris double-bass players resolved about 1830 on the adoption of a double-bass bow of the ordinary length, but made on the principle of the violoncello bow, though larger, and having a similar nut. This bow, which was employed by Dragonetti, is used over-hand, the hair being inclined towards the bridge, in the same way as a violoncello bow. It produces its effect by pressure rather than by ' ripping,' and is now universally used.

The bow is strung with horse-hair, which is specially adapted to this purpose by its numerous dentiform protuberances ; these, aided by resin, act upon the string like the teeth of a saw. After much playing they wear away ; the hair then becomes useless, and must be renewed. A bow used for four hours daily would require rehairing at least once a month. The task should only be entrusted to a competent workman, as no other is able to get a sufficient number of hairs into the bow (there ought to be about 120), or to wedge them evenly in the top and nut. Bow-making is now a manufacture rather than an art, as the bows of Tourte are everywhere more or less accurately copied. Bows are now made either cylindrical or octagonal in section ; the old fluted bow may be seen in museums, but has entirely gone out of fashion. E. J. P.

BOWEN, YORK (*b.* Crouch Hill, London, Feb. 22, 1884), pianist and composer.

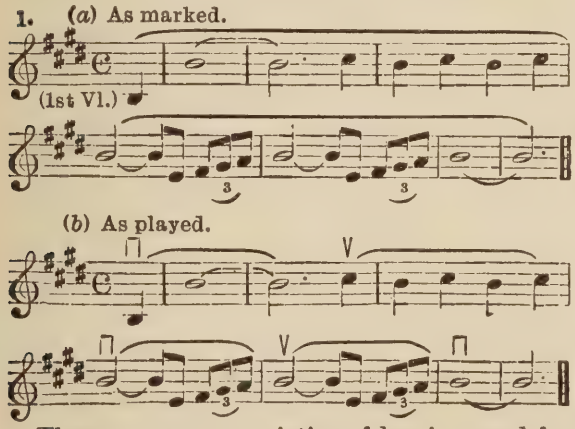
He received his musical education chiefly at the R.A.M., where he spent 7 years (1898–1905) in studying composition and the pianoforte. Since then he has won distinction as a composer of decided originality and a pianist of remarkable brilliance.

He has written many works for the piano, including 3 concertos, of which the first and third were produced at Queen's Hall Promenade Concerts in 1904 and 1908 respectively, and the second at a Philharmonic Concert in 1906. His ' Symphonic Fantasia ' for orchestra was played under Dr. Richter in London and at Manchester in 1906. A symphony in E minor made a considerable impression when it was produced at Queen's Hall by Landon Ronald (1912), and a strikingly effective violin concerto given at the Promenade Concerts (1920) must also be reckoned among his major achievements. Bowen has also written for the viola as a solo instrument, prominent among such works being his concerto in C minor and his sonata for piano and viola. But his smaller piano works, including several suites, and pieces bearing such titles as ' Miniature,' ' Humoresque,' ' Romance,' are, besides being his best-known works, those in which his skill and fancy most happily display themselves. (For list see *B. M. S. Ann.*, 1920.)

G. S. K. B., with addns.

BOWING. This term is used in two senses corresponding to the two German terms (1) *Bogenführung* and (2) *Strichart.* (1) Designates in a general way the action of the bow on stringed instruments, and in that sense we speak of a style and method of bowing, or of the bowing of a player. (2) The particular manner in which a phrase and passage is to be executed, and the signs by which such a manner is usually marked.

Each is here briefly considered. (1) The act of moving the bow to and fro across the string, or strings, in such a way as to draw tone from the instrument—in this sense we speak of a ' style and method of bowing.'



The great masters of the 18th century, Corelli and Vivaldi, were the first to recognise the possibilities of the art of bowing, and their successor, Tartini, persuaded the bow-makers of his time to improve upon the shape and elasticity of the bow itself. From the time of Tartini onwards a gradual and continual improvement took place, until finally the modern bow was evolved by the great bow-maker of Paris, TOURTE (*q.v.*). This invention enabled

Paganini, the famous violinist, to open a new era in the art of bowing; he developed the method of holding the bow, and by using freely every imaginable movement in connexion with it he was able to produce all the different shades of tone and expression.

(2) In order that a player may execute correctly a musical phrase, it is necessary that there should be a settled method of marking which will show the wishes of the composer—in this sense we speak of the 'bowing of a phrase or passage.'

If the passage is to be played legato, a slur, or bind, is placed over the notes (⁀), but if it is left without marks, it is taken by the performer to mean that each note is to be played with a separate bow.

It is not necessary, however, for the composer to mark every change of bow in a legato passage, and so one slur is sometimes used to cover an entire theme, in spite of the fact that it is obviously impossible, at a slow tempo, to play the whole passage in one bow. In such a case the player changes the bow when necessary, but in such a manner as to disguise the change and not to interfere with the continuity of the phrase. It may even be essential to introduce two or three changes of bow into a passage marked by the composer with only one slur, the necessity arising from the marks of expression which indicate that more, or less, tone is desired. (To play forte or to make a crescendo requires a quicker movement of the bow across the string than if the tone is to remain a level piano—see the opening passage of Wagner's 'Siegfried Idyll').

There are many varieties of bowing used for the execution of detached notes. The *saltato*, *spiccato* and similar styles are produced by making use of the natural vibration of the stick of the bow and the tension of the hair in various different ways, the player, by keeping the exact balance with his wrist and the poise of his right hand, being able to make the bow ricochet on the string at any speed desired. In the *martelé* and *détaché* bowings, however, the hair of the bow remains upon the string the whole time, the hammered effect, or attack, being produced by the sudden release of pressure. The fingers of the right hand allow the bow to bound forward lightly upon the string, and the pressure is exerted only between the actual sounds. For rapid passages requiring a moderate amount of tone it is usual to play more or less in the middle of the bow, that being the natural place of balance for a rapid movement.

Though many modern stylists differ as to the exact position of the hand on the bow and the various movements of wrist, fore and upper arm muscles, etc., the broad fact emerges that to obtain a fine and singing tone from the instrument the most essential thing is that every movement of every portion of the arm should be absolutely free, and the bow itself must in all circumstances be kept parallel with the bridge of the violin.

A few examples will serve to show the vital importance of bowing as a means of interpretation.

It will be seen that the same passage bowed differently entirely changes its character.

The bowing of No. 5 is known as the Viotti bowing and is productive of very powerful accents. W. H. R.

BOWMAN, Henry, published at Oxford in 1678 a thin folio volume bearing the title of

'Songs for one, two and three voyces to the Thorow-Bass. With some Short Simphonies. Collected out of some of the Select Poems of the incomparable Mr. Cowley, and others, and composed by Henry Bowman, Philo-Musicus.'

A second edition appeared at Oxford in 1679. A MS. Miserere is in B.M. Add. MSS. 33,234 and in Ch. Ch.; also the MS. of 'I'll sing of heroes,' one of the songs above mentioned.

W. H. H.

BOXBERG, Christian Ludwig (*b.* Sondershausen, Apr. 24, 1670), studied at the school of

St. Thomas and at the university, Leipzig. In 1692 he was organist at Grossenhain, and in 1702 in the same capacity at SS. Peter and Paul, Görlitz. Between 1694 and 1700 several operas of his were performed at Leipzig, Wolfenbüttel, Cassel and Onolzbach. Gerber possessed the MS. of an 'Easter concerto' for chorus and instruments, of which he speaks very highly. Boxberg published also a description of the organ of SS. Peter and Paul at Görlitz in 1704 (*Mendel*; *Riemann*).

E. v. d. S.

BOYCE, WILLIAM, Mus.D. (*b.* London, Feb. 7, 1710; *d.* Kensington, Feb. 7, 1779), was famous as organist, composer of church music, and editor of a collection of cathedral music which served as the basis of the English cathedral repertory for a century or so after its publication.

Boyce was born at Joiners' Hall, Upper Thames Street (of which company his father, a cabinet-maker, was afterwards beadle). He became a chorister of St. Paul's Cathedral under Charles King, and, on quitting the choir, an articled pupil of Maurice Greene, then organist of the cathedral. On the expiration of his articles in 1734 he became organist of Oxford Chapel, Vere Street, Cavendish Square, and pursued his studies under Dr. Pepusch. While yet a young man Boyce's hearing became much impaired, a calamity the greatest that can befall a musician, but one which, in his case, did not lessen the ardour with which he pursued his studies. In 1734 he set Lord Lansdowne's masque of 'Peleus and Thetis,' and in 1736 composed the music for John Lockman's oratorio 'David's Lamentation over Saul and Jonathan,' which was first given by the Apollo Society, and subsequently, in 1740, at Covent Garden Theatre. About 1740 he set two odes for St. Cecilia's Day, one written by Lockman, the other by Vidal, undermaster of Westminster School. In 1736 he had given up his appointment at Oxford Chapel upon obtaining the post of organist at St. Michael's, Cornhill, which had become vacant by the removal of Joseph Kelway to St. Martin's-in-the-Fields. On June 21 in the same year he was sworn into the place of composer to the Chapel Royal in the room of John Weldon, then lately deceased. He most ably discharged the duties of this office by the composition of many fine anthems and services. In 1737 he was appointed conductor of the meetings of the Three Choirs of Gloucester, Worcester and Hereford, which office he held for several years. (See THREE CHOIRS FESTIVAL.) In 1743 he produced the serenata of 'Solomon,' written by Edward Moore, which was eminently successful, one song in which ('Softly rise, O southern breeze,' for tenor voice with bassoon obbligato) retained its popularity for upwards of a century. In 1749, on the erection of an organ in the church of Allhallows the Great and Less, Thames Street, Boyce was chosen organist. In the same year he was selected to compose the music for the ode written by William MASON for the installation of Henry Pelham, Duke of Newcastle, as Chancellor of the University of Cambridge. The ode, with Boyce's music, was performed in the Senate House, July 1, 1749, and on the following day, being Commencement Sunday, an anthem with orchestral accompaniments, by Boyce, was performed in Great St. Mary's Church, as an exercise for the degree of Doctor of Music, which the University then conferred on him. Both these compositions were soon afterwards published together. In the same year Boyce appeared as a composer for the theatre by reviving the masque of 'Peleus and Thetis' (introduced into the author's alteration of 'The Merchant of Venice,' entitled 'The Jew of Venice'), added songs to another revived masque called 'Lethe,' and set Moses Mendez's musical entertainment, 'The Chaplet,' the last of which met with great success. In 1750 he added songs to Dryden's 'Secular Masque,' and in 1751 he set another piece by Mendez, called 'The Shepherd's Lottery.' On the death of Dr. Greene in 1755, Dr. Boyce was nominated his successor as master of the King's band of music, and conductor of the annual festivals of the SONS OF THE CLERGY (*q.v.*) at St. Paul's Cathedral. He was not sworn in till June 1757. In the former capacity he was required to compose music for the new year and birthday odes of the poet-laureate, and wrote about 43 compositions, now among the Music School MSS., Oxford; in the latter he voluntarily composed two fine anthems with orchestral accompaniments, besides additional accompaniments and choruses for Purcell's Te Deum and Jubilate, written for St. Cecilia's Day, 1694. In 1758, on the death of John Travers, Boyce was appointed one of the organists of the Chapel Royal. He resigned his place at St. Michael's, Cornhill, in 1768, and was dismissed from that at Allhallows, Thames Street, in 1769; as his deafness still increased, he gave up teaching and removed to Kensington, where he employed himself principally in the collection and editing of the materials for the work by which he is best known—

'Cathedral Music, being a collection in score of the most valuable and useful compositions for that service by the several English masters of the last two hundred years.'

This work was projected by Dr. Greene, who had begun collections for it, but, finding his health failing, bequeathed all his materials to Dr. Boyce, with a request that he would complete the work. The 'Cathedral Music' was published in three volumes, the first of which appeared in 1760 and the last in 1778.

Boyce died of gout and was buried on Feb. 16, 1779, in the vault under the centre of the

dome of St. Paul's Cathedral. In the year following his death his widow published a volume containing 'Fifteen Anthems and a Te Deum and Jubilate' of her husband's composition, and in 1790 another volume containing twelve anthems and a service was published under the editorship of Dr. Philip Hayes. These anthems and services (with others, to the extent in all of 46 anthems and 5 services) were afterwards published in four volumes under the editorship of Vincent Novello. In 1788 John Ashley, who had purchased the plates of the 'Cathedral Music,' issued a reprint of it, with a memoir (by Sir John Hawkins) and a portrait (finely engraved by Sherwin) of Boyce prefixed. In 1849 a new edition, with additional services and anthems and new lives of the composers, was issued under the care of Joseph Warren. Besides the compositions above mentioned, Boyce produced the following:

Dryden's 'Secular Masque,' 1745; twelve sonatas for two violins and bass, 1747; a concerto; eight symphonies; 'Ode to Charity,' composed for the Leicester Infirmary, containing the duet for tenor and bass 'Here shall soft Charity repair'; Rev. Walter Harte's paraphrase of part of Pindar's first Pythian ode, 1749; Masque in 'The Tempest'; dirge in 'Cymbeline'; dirge in 'Romeo and Juliet'; trio in 'The Winter's Tale'; two odes in Home's tragedy, 'Agis,' 1758; 'Harlequin's Invasion,' 1759, in which occurs the fine song 'Heart of Oak'; 'Noah,' an oratorio, seems to be no longer in existence. Many songs appeared in *The British Orpheus*, *The Vocal Musical Mask*, etc. A collection of his songs, duets, etc., entitled *Lyra Britannica*, appeared in several books.

(See *D.N.B.* and *Mus. T.*, 1901, p. 441 f., in which a complete list of the MS. compositions at Oxford and in the British Museum is given.) Boyce's portrait by Hudson is in the Music School, Oxford. His only son (*b.* Mar. 25, 1764) was long known as a double-bass player in London orchestras.

The following are the contents of the 'Cathedral Music':

VOL. I.

TALLIS. Preces, M. and E. Serv.
MORLEY. Burial Serv. G minor.

ROGERS. Sanctus. 4 v. in D.
CREYGHTON. Sanctus. 4 v. in E flat.

W. H. H.

BOYER, PASCAL (*b.* Tarascon, *c.* 1743), succeeded Abbé Ganzargues as maître de chapelle at Nîmes Cathedral. He was in Paris about 1765, where the following works of his appeared: *Lettre à Mons. Diderot sur le projet de l'unité de clef dans la musique et la réforme des mesures*, etc. (1767); *La Soirée perdue à l'Opéra* (1776), dealing with the war between Gluckists and Piccinnists (2nd ed., 1781); *Notice sur la vie et les ouvrages de Pergolesi* (1772, July number of the *Mercure de France*). Gaveaux, Paris, published 3 sonatas for pianoforte with accompaniment of a flute or violin and violoncello by P. Boyer, which probably is the above. Gerber (2) states that he founded a music engraving and publishing business in 1787, and Schilling gives 1790; but, as Bruni's 9th book of quartets was published by M. (? Monsieur) Boyer *c.* 1785, these dates are evidently too late. The publishing house of Boyer, Paris, was one of importance. E. v. d. S.

BOYES, THOMAS, an English church composer who graduated Mus.B. at Oxford in 1603. Wood (*Fasti Oxoniensis*) says that he 'composed certain Church Services.' One of these, in the Dorian mode, is at Ely Cathedral. The partbooks at Durham Cathedral and Peterhouse, Cambridge, contain a short service by him (including T.D., B., K., C., M., N.D.). There is also a Latin Te Deum at Peterhouse, and an anthem (4 v.) in short score, 'If ye love me,' at Ch. Ch. J. MK.

BOYLE, GEORGE FREDERICK (*b.* Sydney, N.S.W., June 29, 1886), Australian pianist, composer and teacher. After concert tours in Australia he studied in Berlin with Busoni. He came to America in 1910 to become professor of the pianoforte at the Peabody Conservatory in Baltimore, and has played in concerts in America. His compositions include the following:

Concerto, pianoforte, D minor.
Symphonic Fantasia.
Concerto, violoncello.
Sonata, pianoforte and violoncello.
Sonata, pianoforte, B.
The Pied Piper of Hamelin, cantata.
Don Ramiro, cantata.

R. A.

BRABANÇONNE, LA, the national air of the Belgians, dating from the revolution of 1830, when Belgium became an independent country. Both words and music were composed during the struggle; the former by a certain Jenneval, who was killed in one of the actions near Antwerp, the latter by CAMPENHOUT (*q.v.*).

BRACE (Fr. *accolade*; Ger. *Klammer*; Ital. *accolada*), a vertical line, usually with a double curve, used to couple together two or more staves, thus indicating either that the music written therein is to be performed simultaneously by various instruments or voices, or in orchestral scores that the parts so braced belong to one class of instrument, such as woodwind, horns or strings. F. T.

BRADBURY, WILLIAM BATCHELDER (*b.* York, Maine, Oct. 6, 1816; *d.* Montclair, New Jersey, Jan. 7, 1868), an American composer and editor. He was active in organising singing societies and festivals, then known in America as 'conventions,' in different parts of the United States. In 1841 he published his first collection of choir music, followed by many others which had an enormous popularity, as did his Sunday School cantata 'Esther' (1856). Many of his simple religious tunes, which do not share the trashy character of some composed later for the same purposes, are still sung. R. A.

BRADE, (1) WILLIAM (*b. circa* 1560; *d.* Hamburg, Feb. 26, 1630[1]), an English musician who held various continental court appointments.

The order of his appointments, mainly deduced from dedications, is as follows: he was at the court of Christian IV. of Denmark from 1594–96, from 1599–1606 and 1620–22; it seems probable that before the first date, and it is certain that in the intervals, he was in the service of the Margraves of Brandenburg. From 1609–14 he was director of the Rathsmusik at Hamburg, being appointed in 1614 violist to the Duke Johann Adolph of Schleswig-Gottorp. He was Kapellmeister at Halle in 1618,[2] and in 1619 he went to Berlin as Kapellmeister to the Elector of Brandenburg, and was again at Gottorp, as Kapellmeister, from 1622. His works are:

Musikalische Concerten, Hamburg, 1609; *Newe ausserlesene Paduanen, Galliarden, Cantzonen, Allmand vnd Coranten*, etc., Hamburg, 1609; *Newe ausserlesene Paduanen vnd Galliarden*, mit 6 Stim . . . etc., Hamburg, 1614; *Newe ausserlesene liebliche Branden, Intraden, Mascharaden, Balletten* . . . mit 5 Stim . . . Lübeck, 1617; *Melodiensis Paduanis* . . . a 5 Part . . . Antwerp, 1619; *Newe lustige Volten, Couranten, Balletten*, etc., mit 5 Stim . . . Berlin, 1621. A MS. 'Fancy' is in the R.C.M.

His son, (2) CHRISTIAN, was in the Elector's band from 1619 (*Q.-L.*; *D.N.B.*).

BRADFORD (YORKSHIRE). The story of music in Bradford is largely bound up with that of its chief concert hall, St. George's Hall, which was completed in 1853. In 1926 it became a picture-house. One of the choral societies has, however, a much longer record, having been founded in 1821.

The BRADFORD OLD CHORAL SOCIETY has had a chequered career, marked by a good many events of interest, such as the first Bradford performance of 'Elijah' in 1848 and the début of J. T. Carrodus as a boy of 11 in 1846. In an Anglo-French competition in Paris in 1912 the chorus won two prizes, and in 1921 the Society celebrated its centenary, and has renewed its youth under its present conductor, Wilfrid Knight.

The opening of St. George's Hall was marked by a festival in 1853, which was succeeded by two others, in 1856 and 1859, both under Costa. In addition to the staple oratorios and symphonies, there were a few unfamiliar things in the programmes, such as a MS. Credo by Mendelssohn, the score of which is still in the Festival Choral Society's library, but has never since been heard, and is presumably only a curiosity. Hatton's 'Robin Hood,' G. A. Macfarren's 'May Day,' and two works by William Jackson of Masham were the novelties. The success of the festivals was not such as to warrant their continuance, but their work was taken up by two institutions, the Bradford Festival Choral Society and the Bradford Subscription Concerts.

The BRADFORD FESTIVAL CHORAL SOCIETY was established in 1856, and Jackson, the festival chorus-master, was its first conductor. He was followed by a succession of very able musicians: John Burton (1866), James Broughton (1870), R. S. Burton (1878), J. C. Bridge (1887), R. H. Wilson (1890), W. H. Garland (1893), F. Cowen (1897), H. A. Fricker, E. C. Bairstow and Malcolm Sargent, under whom the chorus may be said to have achieved as high a state of efficiency as at any period of its existence. The Society's repertory is far too extensive to be even summarised; a full account will be found in the history by its Hon. Sec. the late G. F. Sewell, published in 1907. Among the out-of-the-way works may be mentioned Bach's Mass in B minor, Beethoven's Mass in D, Benoît's 'Lucifer,' Berlioz's 'Troyens,' Franck's 'Béatitudes,' Parker's 'Hora novissima,' Rossini's 'Mose in Egitto,' Schumann's 'Paradise and the Peri,' and Tinel's 'St. Francis.'

The BRADFORD SUBSCRIPTION CONCERTS were founded in 1865 by a committee of music lovers, who enlisted the co-operation of Sir Charles Hallé and his Manchester Orchestra, and of the Festival Choral Society. Hallé remained conductor till his death in 1896, and was followed by the successive conductors of the Hallé Concerts. The programmes include orchestral and choral concerts, together with a certain amount of chamber music (an attempt

[1] Date given by *Riemann*.
[2] Opel, *Zeitschr. für allgem. Geschichte*, 1885, p. 68.

to organise a separate series of chamber concerts in a smaller hall failed through lack of support) and miscellaneous concerts in which the best artists of the day have been heard. The Concerts have from the beginning sustained a very high artistic standard, and for some years before the war (1914) became a social event which attracted supporters for other reasons than love of music. Since then their financial course has not been so easy, but they retain their supremacy among the concert institutions of Yorkshire.

The establishment of a permanent orchestra of professional musicians dates from 1892, when the BRADFORD PERMANENT ORCHESTRA was formed, and has carried on an excellent work ever since in popularising the best music at its Saturday concerts, generally five in number. Its first conductor was a Bradford musician, W. B. Sewell; its present one is Julius Harrison, under whom a very respectable standard of efficiency has been attained, and, after the usual fluctuations, the concerts, which attract very large audiences, have been made to pay their way, in spite of the very modest prices of admission.

A ground untouched by any of the above-mentioned organisations has been that covered by Samuel Midgley, a Bradford musician who for many years gave chamber concerts at which he introduced important works by native composers. In 1911 he enlisted the help of friends, through whose generosity he was able to organise an annual series of six chamber concerts, admission to which was entirely free, the only public source of income being through the sale of programmes. The performers have been all local professionals, paid a uniform fee, and the programmes have covered not only the great classics, but a considerable proportion of works by living British composers. The promoter has, after 13 years' arduous work, had to retire from the management of the concerts, and how much they owe to his individual initiative is suggested by the fact that at present no one has been found to take up the work. H. T.

BRAHAM, JOHN (*b.* London, Mar. 20, 1777; *d.* there, Feb. 17, 1856), tenor singer, held a distinguished place among English singers.

He was of Jewish parentage, but was left an orphan at an early age, and in such humble circumstances that he is said to have sold pencils about the streets for a living. He was still very young when he became the pupil of Leoni, a Jewish singer of celebrity. His first appearance in public was at Covent Garden Theatre, Apr. 21, 1787, for the benefit of his master. In the bill it is announced:

'At the end of Act i., "The soldier tired of war's alarms," by Master Braham, being his first appearance on any stage.'

After the first act of the farce, he sang the favourite song of 'Ma chère amie.' At the opening of the Royalty Theatre in Wellclose Square, on June 20 in the same year, 'The soldier tired of war's alarms' 'was sung with great success by a little boy, Master *Abram*, the pupil of Leoni'; and another paper said:

'Yesterday evening we were surprised by a Master *Abraham*, a young pupil of Mr. Leoni. He promises fair to attain perfection; possessing every requisite necessary to form a capital singer.'

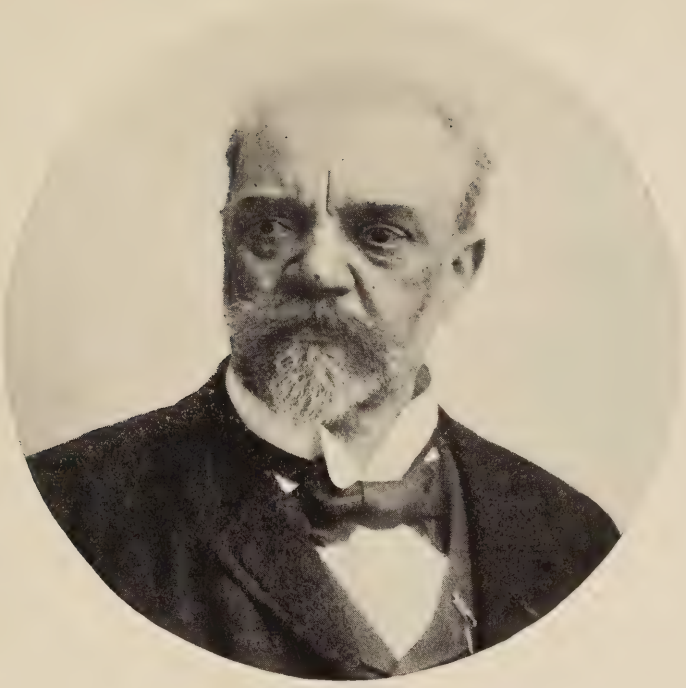
He sang at this theatre for about two years, being particularly successful as Cupid in Carter's 'Birthday,' and Hymen in Reeves's 'Hero and Leander.' He sang at Covent Garden in 'Poor Vulcan,' June 2, 1788. When he lost his boyish voice the future prospects of young Braham appeared doubtful; Leoni had fallen into difficulties, and about that time left England; but he found a generous patron in Abraham Goldsmid, and became a professor of the piano. On his voice regaining its power he went to Bath, and in 1794 made his appearance at some concerts there under the direction of Rauzzini, who, appreciating his talent, gave him musical instruction for three years. In 1796 he was engaged by Storace for Drury Lane, and his début (in an opera called 'Mahmoud,' left unfinished by Storace, and finished by his sister Nancy Storace) was so successful that in the year following he was engaged for the Italian opera-house, where he appeared in Grétry's 'Azor et Zémire,' Sept. 26, 1796. He also sang in the Oratorios, and at the Three Choirs Festival at Gloucester. He and Nancy Storace, who shared his fortunes for some time, next gave concerts in Paris, and visited Italy in 1798, Braham making his first appearance at La Pergola, Florence, in operas by Basili and Moneta, and also singing with Nancy Storace at La Scala, Milan (1799), in an opera by Nasolini. After an episode of rivalry and reconciliation with Mrs. Billington at Milan, where he stayed two years, Braham sang at Genoa, Leghorn and Venice. Cimarosa wrote a part for him in an opera, 'Artemisia,' which he did not live to complete. After engagements at Trieste and Hamburg he returned to England.

He reappeared at Covent Garden in 1801. From this point may be dated that triumphant career during which he created a constant furore. The opera in which he made his first appearance, on Dec. 9, was a work by Mazzinghi and Reeve entitled 'The Chains of the Heart.' The music, however, was so feeble in the serious, and so commonplace and vulgar in the comic parts, that it lived only a few nights, and was succeeded by 'The Cabinet' on Feb. 9, 1802. In this opera Braham was the composer of all the music of his own part, a custom to which he continued for several years to adhere. He sang at the King's Theatre in Italian opera, however, 1804–06. Among the operas with which he was thus connected we may name—

'The Siege of Belgrade' and 'Family Quarrels,' 1802; 'The English Fleet in 1342,' 1803 (with the famous duet 'All's Well'

in it); 'Thirty Thousand,' 1804; 'Out of Place,' 1805; 'False Alarms,' 1807; 'Kais, or Love in a Desert,' 1808; 'The Devil's Bridge,' 1812; 'Narensky,' 1814, and 'Zuma' (with Bishop), 1818

He wrote also for the Lyceum portions of other operas: 'The American' (containing the famous 'Death of Nelson'), 1811; 'Isidore de Merida,' 1827; and 'The Taming of a Shrew,' 1828. In the theatre, concert-room or church Braham had scarcely a rival. *Non c' è in Italia tenore come Braham* was the frequent exclamation of foreigners. He sang the part of Max in the English version of 'Der Freischütz' in 1824, and when Weber composed his 'Oberon' for the English stage (1826), Braham was the original Sir Huon.



In 1831, however, the tide of fortune changed. In that year he purchased, jointly with Yates, the Colosseum in the Regent's Park for the large sum of £40,000. Five years afterwards he opened the St. James's Theatre, which he had erected at a cost of £26,000. The large fortune which his genius and energy had gained him was lost by these unfortunate speculations. He sang the part of William Tell at Drury Lane, Dec. 2, 1838, and of Don Giovanni in the following year, his voice having suffered and become lower. An American tour undertaken with his son Charles in 1840 was unsuccessful; his last appearance was at one of the Wednesday Concerts in Mar. 1852. (*Dramatic Biography*; *Gentleman's Magazine*; etc. Addns. *D.N.B.*) E. F. R.

BRAHMS, Johannes (*b.* Hamburg, May 7, 1833; *d.* Vienna, Apr. 3, 1897), last in the great line of German symphonists, lived a quiet uneventful life unlike that of many of his predecessors.

He affords an instance of the occurrence of musical genius in the second generation, for his father, Johann Jakob Brahms (1806–72), had on two occasions run away from home to devote himself to music; his grandfather, Johann (1769–1839), was an innkeeper at Heide in Holstein, where various descendants, through an eldest son, Peter Hoeft Heinrich (*b.* 1793), are to be found. As several varieties of the name occur in the church registers, such as Brams, Bramst and Brahmst, it will be seen that an assumption that Brahms was of Jewish origin is extremely unlikely. The runaway, Johann Jakob, was at length permitted by his father to adopt the musical profession, and in due course he became contrabassist in the theatre orchestra at Hamburg, where he married in 1830 a lady no less than seventeen years older than himself, Johanna Henrika Christiane (*b.* 1789; *d.* 1865), whose maiden name was Nissen. She left three children, (1) Elisabeth Wilhelmine Louise (1831–92), (2) Johannes and (3) Friedrich (1835–86), who was for many years a successful music teacher in Hamburg. A year after the death of his wife, the double-bass player married again a widow who was as much his junior as his first wife had been his senior. At Hamburg, in a fine old six-storied house now called No. 60 Speckstrasse, Johannes Brahms was born. Luckily there lived at Hamburg a pupil of the famous Marxsen of Altona, named O. Cossel, with whom the boy studied music until his tenth year, when his teacher asked Marxsen to undertake his musical education. For a time Marxsen's lessons went on simultaneously with Cossel's, and the boy's diligence and earnestness were soon abundantly evident, as well as his possession of a great creative gift. At this time his chief study was the pianoforte, and it was only by stealth that he composed, although the theoretical side of his studies was duly superintended by Marxsen. In after life the composer paid a graceful tribute to his teacher, by dedicating to him the second pianoforte concerto in B flat, op. 83.

On Sept. 21, 1848, he gave a concert, and played two movements from a concerto by Rosenhain, a fugue of Bach, and other pieces. He appeared at a concert given by Theodor Wachtel, Mar. 1, 1849, and in the following April gave a concert on his own account, at which he played the 'Waldstein' sonata of Beethoven and a 'Phantasie über einen beliebten Walzer' of his own. The next two or three years must have been spent in diligent study and in the composition of some of the early pianoforte works, the first set of songs, and a sonata for piano and violin. The good fortune which had guided him to Marxsen followed him throughout his life, and never was more conspicuous than when he consented to accompany the gipsy violinist, Eduard Remenyi, on a tour through North Germany in 1853. While they were at Hanover, Remenyi took his young friend to visit Joachim, who had lately been appointed Konzertmeister there. Joachim saw that a great future lay before the youth, and felt that the association with one who was little more than a virtuoso would not long satisfy the artistic cravings of such a nature; he suggested that if at any time Brahms should wish for more congenial work he should come to see him. Soon afterwards things fell out as had been expected, and Brahms paid Joachim a visit of some weeks' duration at Göttingen, at the end of which Joachim gave him two letters of introduction.[1] One was to Liszt, and it had the strange result that on the strength of the scherzo, op. 4, Liszt adopted Brahms as an adherent of the most advanced school of modern music. The second introduction was to Schumann, in Düsseldorf, and was an event of the utmost importance in the life of Brahms and in the history of music. Schumann was

[1] The accounts of this episode differ considerably; compare Ehrlich's *Künstlerleben*, and an article by Schubring in the *Allgem. Mus. Zeitung*, with Moser's *Joseph Joachim*, and Riemann's biography of Brahms. The above account is from Dr. Joachim himself.

BRAHMS

so strongly impressed with the works that were then completed (apparently those now known as opp. 1-6, together with a violin sonata, a trio and a string quartet), that he not only wrote in the most enthusiastic terms to Dr. Härtel recommending the new compositions to his notice with a view to publication, but inserted in the *Neue Zeitschrift für Musik* a memorable article entitled 'Neue Bahnen.' It is impossible to overestimate this emphatic recognition of the younger by the older composer, or to gauge its importance in Brahms's career. As a natural result of the article there was a paper war over Brahms apropos of a performance of his sonata in C and the scherzo, which he played at Leipzig, Dec. 17, 1853. The publication of the music already referred to, which was soon followed by the appearance of op. 8, the B major trio, and opp. 9 and 10, piano pieces, was a more satisfactory consequence of the incident. From this time until the master's death every new composition of his was the subject of immediate discussion, of course not always friendly; and the history of Brahms's life is henceforth little but a chronicle of his works. Probably there was never a career less eventful than his, and the 'dunkle Stille,' of which Schumann spoke in his article, shrouded him, more or less closely, all his life.

Happier circumstances it would be difficult to imagine for a creative artist; just at the time when it was most desirable for him to have opportunities of obtaining experience in connexion with orchestral and choral music, he was offered two official appointments, one from the Cologne Conservatorium, which he refused, and one from the Prince of Lippe-Detmold, which he accepted. He held for four years (1854–58) the post of director of the court concerts and of the choral society, and, as the court was a very quiet one and its ceremonies unexacting, he had plenty of time to devote to composition and to the development of his artistic nature. On his resignation of this post he returned to Hamburg for a time. His public appearances at this period were very few; he played at Cologne in 1856 and appeared twice at the Leipzig Gewandhaus in Dec. 1857, but on neither occasion did he bring forward anything of his own. On Jan. 27, 1859, at the Gewandhaus, he introduced his piano concerto in D minor (op. 15), a work which immediately aroused a storm of opposition by the independence of its structure, and the absence of the usual traditional characteristics of concertos, such as bravura passages, etc. The performance itself was an indubitable failure, and it was not till 1878, when he played it again, that the Leipzig public received it with anything like enthusiasm; yet, in the interval, it had been played by Clara Schumann and others, and had enjoyed favour all over Germany. It is perhaps not altogether surprising that this work should have been longer than most of Brahms's music in finding general acceptance; it is uncompromising in its earnestness, and occasionally there occur passages which must have seemed uncouth when it was first heard. In spite of Brahms's close study of the piano, his playing was scarcely of a kind to produce a great effect upon the general public independently of the composition; Schumann described it as turning the piano into a full orchestra, and the testimony of those who heard him most frequently shows that it was far more energetic than technically accurate, and that the grandeur of the conception impressed the hearers far more than any exhibitions of merely manual skill.

The next important works were the two serenades for orchestra, opp. 11 and 16, the latter of which employs no violins; both were written soon after the concerto, and as it is most unlikely that their easily apprehended style was adopted in deference to the opinions of the critics who were unfavourable to the concerto, we are probably justified in supposing that the change was a perfectly natural and normal one. In 1860, the year of their publication, Brahms went to stay at Winterthur, in order to be near Theodor Kirchner, and this was his headquarters until he finally took up his residence in Vienna in 1862. To the Austrian capital he was undoubtedly attracted by his increasing interest in Hungarian music, an interest probably awakened by Remenyi, and manifested not only in some early pianoforte variations but in the adoption of distinctly Hungarian characteristics in the finale of his G minor quartet for piano and strings, one of the many fine compositions produced during the residence in Switzerland. Throughout the composer's career there is no more striking peculiarity than his fondness for using the same form in two (or sometimes more) works composed about the same time. The two serenades have been already referred to; two quartets for piano and strings follow one another immediately in the list, as opp. 25 and 26; two string quartets make up op. 51, and there are numerous other instances in his later life, such as the two pairs of symphonies, the 'Academic' and 'Tragic' overtures, etc.

Hanslick has reprinted the programmes of the concerts at which Brahms made his first appearances in Vienna (see *Aus dem Concertsaal*, p. 287 f., and *Aus meinem Leben*, p. 14). His greatest successes were, as pianist, his interpretation of Schumann's fantasia op. 17, and as composer, his variations on a theme of Handel and the B flat sextet. The only orchestral work of his given was the D major serenade, op. 11. He was soon afterwards appointed conductor of the Singakademie, and threw himself with characteristic devotion into the congenial work of giving fine performances

of the choral works of Bach, Beethoven, Schumann and others. Considering the opportunities of the position, we might have expected many choral compositions to date from this time, but there are only a very few, beside the two five-part motets, op. 29, and some arrangements of old German Volkslieder; it may be assumed, however, that the experience of choral conducting must have been of great value to him, although he gave up the post in the year after his appointment, and after that held no official appointment for the rest of his life, excepting only that of conductor to the Gesellschaft der Musikfreunde from 1872 to 1875. As regards the outward conditions of his life there is little or nothing more to be said, for, beyond some occasional musical tours, such as a memorable series of concerts in German Switzerland with Joachim, the record is one of peaceful, honoured work, in his apartment at Karlsgasse, No. 4 (third floor), varied by holiday journeys often to Italy, and in later years to such resorts as Thun, Ischl, Baden-Baden or Carlsbad. At the German watering-places he spent much time with Mme. Schumann, whom he regarded with almost filial affection, while his compositions found in her an admirer gifted with rarest insight and a most sympathetic interpreter. A chill caught at Mme. Schumann's funeral is supposed to have aggravated the disease (cancer of the liver) of which Brahms died. He was buried in the same cemetery as Beethoven and Schubert, and not far from them. A Brahms Museum was opened at Gmunden in 1901. A bust of the composer, by Fräulein Ilse Conrat, was unveiled at the Central Cemetery on May 7, 1903, when the master's beautiful partsong 'Fahr' wohl,' from op. 93*a*, was sung. An account of Brahms's last moments was published, in connexion with the ceremony, by Frau Celestina Truxa, the composer's faithful landlady, in the *Neue Presse* of May 7, 1903. For a list of the various memorials and monuments see Kalbeck, iv. p. 535.

Choral Compositions

Two of Brahms's compositions, and two only, were prompted by the events of outer life, the 'Deutsches Requiem' and the 'Triumphlied.' The former was suggested primarily by the death of his mother in 1865; at its first performance at a concert of the Gesellschaft der Musikfreunde in Vienna in 1867 it consisted of the first three numbers only, the consolatory 'Selig sind,' the impressive march 'Denn alles Fleisch,' and the dramatic number which rises from the anxious mood of the opening baritone solo to the majesty of the pedal-fugue 'Der gerechten Seelen,' which strikes the hearer as forming a natural climax and close. For the second performance of the work, in Bremen Cathedral, Apr. 10, 1868, three more movements were added, the work being virtually in its present shape, with the exception of the number with soprano solo 'Ihr habt nun Traurigkeit.' The splendid 'Triumphlied' was composed to celebrate the German victories, and was written in 1871 and performed at Vienna in 1872. These two works, with the expressive 'Schicksalslied' set to Hölderlin's words and the 'Rhapsodie' for alto solo and male chorus (to a fragment from Goethe's *Harzreise*), mark the culmination of Brahms's art as a choral writer. In one and all he touches a point of sublimity that had not been reached since Beethoven. Written within a comparatively short period, they throw a strong light on the master's religious convictions. The dogmatism of the churches did not appeal to him, and he was a stranger to the devotional mysticism that was so characteristic of Bach; his mind dwelt willingly upon the mysterious problems of human destiny (he returned to the same subject in his last composition, the 'Vier ernste Gesänge'), and his knowledge of scripture suggested the choice of words which were not likely to occur to the ordinary purveyor of oratorio-books, and which gain a new meaning and beauty from his music. He was no pessimist, even if his hopes for the future life seem at times to be a little indefinite; in the 'Schicksalslied,' which is considered by many authorities to be his crowning achievement in choral music, he cannot rest contented to leave the mind of his hearers occupied with the brevity and uncertainty of human life, as contrasted with the serenity of the heavenly state, described in the opening words; he must bring back our thoughts to the tranquil mood again, by means of a long orchestral version of the lovely music of the beginning. To this period of the great choral works belongs also 'Rinaldo,' a cantata to Goethe's words for tenor solo and male chorus, a work of far less striking quality than the others, and the only specimen we have of what Brahms's operatic style might have been like had he chosen to attempt composition for the stage. The composer's famous epigram in answer to a query of Hanslick's to the effect that it would be as hard for him (Brahms) to marry as to write an opera, but that after the first experience he would probably perpetrate a second, is of course not to be taken seriously, but Brahms may well have considered that opera lay outside the direct course of his own purely musical nature; he saw Germany divided into two classes by the music of Wagner, and while he no doubt felt that he could not bring his own creative powers into line with the new methods, he was fully conscious of the complete sterility which had fallen upon the stage-music of the ultra-conservative party.[1]

[1] On the whole question of Brahms's attitude to opera, see the *Recollections of Johannes Brahms*, by Dietrich and Widmann.

In some of the shorter choral works Brahms adopts the simple manner of a partsong; in the early 'Marienlieder,' the songs for male chorus, op. 41, the set for mixed chorus, op. 93, and many of the rest the structure is simply that of a harmonised melody; but in such things as the two motets, op. 29, the greater choral compositions already mentioned, or the 'Fest- und Gedenksprüche,' op. 109, he shows himself as the legitimate follower of Sebastian Bach in his manner of attaining great effects by polyphonic means; of course the modern resources of harmony are freely used in all cases, whether partsongs or motets. In 'Nänie,' op. 82, and the 'Gesang der Parzen,' op. 89, he returns to the form of the short choral ballad, of which the 'Schicksalslied' set the pattern; and the subjects are markedly akin to those of the works already mentioned.

In the exquisite six-part 'Vineta,' from op. 42, the two solemn and suggestive compositions called 'Nachtwache,' from op. 104, and other songs for chorus, Brahms gets strange new effects, now by the use of wonderful changes of harmony, such as are only possible with unaccompanied voices, and now by means of a certain quiet sonority which is peculiar to him in this comparatively unknown branch of his work.

Orchestral Works

Brahms's compositions for orchestra alone bear but a small proportion to his other works in mere extent; he seems to have been conscious of the serious responsibility undertaken in approaching orchestral composition, for after the two serenades he waited for a good many years before the composition of the beautiful variations on a theme of Haydn,[1] op. 56*a*. These were conceived in a twofold form, first for orchestra, and second as a duet for two pianofortes, neither being properly described as an arrangement of the other. Apart from this, there are a good many instances of his arranging compositions of his own for other combinations than that for which he originally intended them. As there can at no time have been any difficulty in finding publishers ready to issue his works in their proper form, we are entitled to assume that these arrangements, and the issue of such things as the horn trio and the clarinet trio and quintet with alternative string parts as substitutes for the wind instrument, were undertaken with complete satisfaction to the composer; and we may see here a sign of how very much more important the matter of his ideas was to him than the manner of their presentation: what he had to say was always far more important than how it was to be said. In other words, he was, as has often been said, a draughtsman rather than a colourist in his treatment of the orchestra. Symmetry of form, originality of design, the logical development of his themes, these appealed to him far more strongly than the desire to elicit from the orchestra new combinations of tones. To the orchestral virtuoso who is nothing more, his symphonies can never be as eloquent as they are to the musician who is capable of appreciating the process by which a theme which at first seems, perhaps, to possess no special eloquence, is made to speak things of unutterable beauty. The art which can extract from Haydn's charming little theme a means of playing on the deepest feelings of the hearer's nature, has no need of glaring contrasts of orchestral colour, or of subtle instrumental effects, to convey its message. Yet it would be misleading to allow it to be supposed that Brahms was deaf to the charm of orchestral colour effects; the exquisite and individual 'colouring' of the early choruses for female voices accompanied by two horns and harp (op. 17), the famous horn passage in the first symphony, the close of the first movement of the second, a well-known passage in the 'Tragic' overture, the humorous use of the various instruments in the 'Academic' overture, are quite enough to point the fatuity of such an assumption. No one, whether of the classical or modern masters, understood more perfectly than he the value of tone quality as a means of arresting attention; and that he is not continually forcing his hearers to realise his skill in contrasts or transitions of tone, is simply because he wishes to fix their attention upon the actual material of the music, upon the themes and their transformations. By the time the first symphony was given at Carlsruhe (Nov. 6, 1876), Brahms had established his position in the eyes of the more conservative party among German musicians, and never can a first symphony have been awaited with such eager expectations. From Brahms's chamber music it was abundantly clear that while he was no despiser of the classical forms, yet he was no slave to them, and that from no one might legitimate innovations in regard to form and structure be more confidently expected. The theme of the finale of the symphony aroused an opposition and suggested a line of defence that afford a counterpart to the war over the piano concerto. It is beyond all question that it reminds the hearer of the great theme in the finale of the ninth symphony of Beethoven; this fact was pounced upon by one party as a proof of Brahms's lack of originality, while his defenders made matters worse by calling the new work the 'tenth symphony,' and declaring that Brahms began at the point where Beethoven left off. In the present day such an

[1] The theme comes from a divertimento for wind instruments still in MS. The divertimento is in B flat, the first of a set of six which were in the possession of C. F. Pohl, to whose MS. collection Brahms had access. The statement of the theme in the orchestral version of Brahms's work seems to be an exact quotation from Haydn. The theme is called 'Chorale St. Antoni,' from what cause is not clear. See Kalbeck, *Johannes Brahms*, II. ii. p. 464.

observation seems not so very wide of the mark, but in 1876 it was both daring and impolitic. When in the following March the symphony was given for the first time in England by the Cambridge University Musical Society, another section of the work made the most profound impression, for the mysterious horn-call which is so marked a feature of the introduction to the last movement, seemed to contain an allusion to the familiar chimes which are known as the 'Cambridge Quarters.' Of course the resemblance was entirely fortuitous, but it was none the less striking on that account. Emotionally and artistically, this point, with the subsequent transition to the frank joy of the C major theme, is one for a parallel to which we have to look back to Beethoven. The coda of the first movement of the second symphony, in D, op. 73, is another of the passages that are rightly described as magical in their effect. In this symphony occurs one of the rare instances in which a theme is presented in two contrasting aspects, and the change from the suave 'allegretto grazioso' to the 'presto ma non assai,' a change not only of speed but of rhythm, is one of the most beguiling things in the whole of music. The symphonic form was laid aside after these two symphonies, and the next work for orchestra was a pair of overtures, the 'Academic Festival - Overture' and the 'Tragic' overture, the first a work full of amusing quotations from the beautiful traditional students' songs of Germany, and the second weighty with some motive of deep tragedy into the secret of which the audience is happily not taken. The entrance of the trombones and tuba cannot fail to have a powerful effect upon the emotions, even though we may not be able to guess what exact form of tragedy suggested the idea. The other overture was first played at Breslau, when the degree of Doctor of Philosophy was conferred upon Brahms.

Like so many of the other works, the symphonies were produced in pairs; the third and fourth have only two years between them, dating respectively from 1884 and 1886. Op. 90, in F, has a touch of wonderful beauty at the end, in a tranquil coda to the finale, which has been well compared to a calm sunset after a stormy day; at the very end, the descending passage of the opening theme of the first movement reappears in a kind of delicate allusion above a swaying figure in the violins. The 'poco allegretto' which takes the place of scherzo is a fine specimen of a mood that occurs frequently in Brahms, a gently elegiac mood conveying the idea of something evanescent, elusive, the smile of a tearful fairy or the sunshine of an April day. The tender melancholy of the Romantics seems to find its ultimate expression in this and other movements in Brahms's work, and the slow movement of the fourth symphony has the same feeling, though not to such a marked extent. In the fourth symphony the master made his boldest experiment in the matter of form, by reviving for the finale the passacaglia structure of old time and applying it to modern ideas. Whether a form requiring such keen attention on the part of the hearer is the ideal form for the end of a long symphony may be doubted; it is very far from easy to thread the mazes of the *basso ostinato* through all the varieties of working-out to which it is subjected, and even students who are fairly familiar with the movement find themselves in danger of losing the theme, and thus becoming for a time unable to grasp the purport of the movement. When this is admitted, however, it has to be added that only two other symphonies, Mozart's 'Jupiter' symphony and the ninth of Beethoven, have last movements of such monumental grandeur. This movement is Brahms's last word for the orchestra alone, and a wonderful culmination of his work in this line. (See SYMPHONY.)

There are four concertos, and in all of them we feel that Brahms inherited Schumann's horror of display for display's sake. The second pianoforte concerto in B flat, op. 83, has many of the uncompromising characteristics of the first, with a greatly increased amount of obvious beauty in the themes themselves and in their development; the violin concerto in D, op. 77, yields so far to convention that the cadenza is not written out, but left to the player's choice; the masterly cadenza by Joachim has been generally associated with the work in England and Germany. Although the violin is not the only centre of interest in the composition, this concerto affords rare opportunities to a player who can cope with its difficulties. In the last concerto, for violin and violoncello, op. 102, Brahms reverts to something like the older type of concerto, in which several instruments forming what was called the *concertino* were opposed to the full orchestra. The two solo instruments are used for the most part in this way, and the frequent use of double-stopping on both produces an effect as if a string quartet were alternating with the orchestra. The lovely slow movement is a worthy counterpart to that of the violin concerto, and affords a happy contrast to the extremely intricate character of the other movements.

CHAMBER MUSIC

In the region of concerted chamber music, even those who may not wholly admire his orchestral compositions are bound to admit that he is without a rival in the manipulation of the instruments, and that he knows how to give to each and every one of them passages that seem to be suggested by the instrument itself. In the very first, the trio, op. 8, in B

major, the opening themes in all four movements seem to have been so characteristic of the violoncello that the piece might well be the work of a player of that instrument. In the A major quartet for piano and strings, op. 26, the leading feature of the beautiful slow movement, the sweeping arpeggios, could not have produced exactly the effect they do on any instrument but the piano, and over and over again a kindred impression is produced by such means. Compare the finale of the violin sonata, op. 100, the intermezzo in E flat from op. 117, that in E flat minor, op. 118, No. 6, and numbers of other instances, in all of which there is a sense of some threatening doom, something portentous, conveyed by the arpeggio figure, a figure which surely was never before turned to such account since it was invented. How fully the horn is understood and its characteristics considered in the trio, op. 40, is obvious to every one who hears it first as originally written, and then with the horn part transferred to viola or violoncello. Finally, in the last instances of Brahms's creative power in chamber music, with what wonderful eloquence is the clarinet employed in the four works in which it appears, opp. 114, 115 and 120. It is well known that the suggestion for the special use of the instrument in these works was due to the exquisite clarinet-playing of Mühlfeld, the eminent clarinettist of the Meiningen orchestra, who was to his instrument what Joachim was to the violin. The string quartets, op. 51, belong to those compositions of Brahms which are comparatively slow in their appeal to the generality of musical people; but their vogue, and that of the beautiful work in B flat, op. 67, has steadily increased, and all three are now considered among the most valuable contributions to quartet literature. The third contains one of the experiments in designing his finales, of which mention has before been made. For the last of the variations on a beautiful theme apparently quite unconnected with the subject of the opening movement, that subject is worked in, thus unifying the whole work.

The trio, op. 8, is an interesting example of a self-criticism characteristic of the very greatest minds, and very rare amongst musicians. In the last years of the composer's life, he revised this, his first chamber composition, and a comparison of the two versions (the second was published in 1891) is in the highest degree instructive to students of his methods. One subject was evidently discarded for too close a resemblance to Schubert's song, 'Am Meer'; a new development of the finale is substituted for the old; and in the other movements many details are to be noticed, all of which are improvements in the direction of breadth and simplicity. Several of the best known of Brahms's compositions, of the earlier period, were not finally settled as to their outward form for some little time after their creation. The fact that the variations on a theme of Haydn were conceived in two different aspects, as a duet for two pianos, and as set for full orchestra, the guise in which they are more often heard, has been already mentioned; the splendid quintet in F minor seems to have undergone a double alteration, for it was first laid out as a quintet for strings alone (two violoncellos), and its present shape, for piano and strings, was an afterthought; it was also arranged as a duet for two pianos, the arrangement being promoted to the dignity of a separate opus-number in the list. The first of the sonatas for piano and violin, in G, op. 78, the work which heralded the mature productions of his later life, and showed Brahms in his most genial mood, received a suggestion from a song, or rather from two songs, 'Regenlied' and 'Nachklang,' a pair of lyrics meant to be sung together. The theme—that of the finale of the sonata—is one of the very rare instances in which Brahms took suggestions from external phenomena; the musical picture of dropping rain would not be clear to any one who did not know that it came from a song of which rain is the theme. It is difficult to call to mind any other instance beyond the far more vivid picture of waves breaking on a stormy beach, in the accompaniment to the song, 'Verzagen.' In the second of the violin sonatas, op. 100, there is another interesting experiment in form, where the slow movement and scherzo are fused into one, or rather are made to alternate in one and the same movement. Finely as it succeeds in this instance, it evidently did not commend itself as an innovation of very general practical value, or it would surely have been used again. The third of the sonatas, op. 108, is distinguished by a wonderful treatment of a long pedal point in the first movement, and by a fairy-like intermezzo full of the tender melancholy already referred to. In the beautiful string quintet in G, op. 111, the prominence given to the first viola part will not escape attention; it may be almost considered as the leader of the party throughout the work, not merely in one movement, as is the case in Mozart's quintet in C for the same combination. The quintet for clarinet and strings, op. 115, is full of instances of the happy use of dialogue between the wind-instrument and the first violin, and the rhapsodical slow movement is perhaps the most effective thing ever written for the clarinet.

Piano Music

The first of the master's published works were for piano alone, and in his later days he wrote an abundance of solos for that instrument; the fact that between op. 39, the waltzes for four hands, and op. 76, the group of eight pieces, there is a long interval in the list, is not

altogether easy to account for, but it seems possible to guess at the reason. In the beginnings of composition, the piano is the medium most generally and easily accessible; its practical utility makes young composers apt to ignore its essential characteristics; and, for all the skill with which Brahms treated it in combination with other instruments, we may doubt if the individual charm that belongs to it was fully realised by him until a comparatively late date. He was greatly interested in its technique throughout his life; but his chief anxiety, if we may judge from his works, was to get from it the utmost fullness of effect, to make it, as far as possible, represent an orchestra, rather than to allow its gentler characteristics full play. The several sets of variations, for two hands and four, are almost all polyphonal in design; upon the groundwork of a theme from one of Paganini's caprices he constructs a series of wonderful studies which have scarcely been surpassed in technical difficulty, and in which, as a rule, the main features are the interweaving of many parts, sometimes actually, sometimes in a kind of suggested polyphony, and the development of new and beautiful melodic ideas from the germ borrowed from Paganini. In all this earlier piano music it was felt that there were few effects that would not have been as well, or better, realised upon other instruments than the piano; on this account it was often said that this class of Brahms's work had one fault, that it was 'not piano music.' His love of Bach, and his marvellous power of interpreting that master, may have led him to attach the highest importance to the attainment of complete independence of finger, not the mere independence and flexibility for which the older writers for the pianoforte had striven, but the practical grasp, in which the brain rather than the hand is concerned, of two or three conflicting rhythms at once. The series of 51 'Übungen' which were published not long before the master's death show how very prominent a place the higher development of this kind of independence held in his esteem throughout his life; and it is as often required in his later works as in his earlier. But in the later piano pieces, although many of the capriccios are polyphonic, we meet, for the first time, with things such as no instrument except the piano could attempt to convey. The capriccio in B minor and the intermezzo in A flat, from op. 76, are as purely piano music as anything of Chopin's. The second of these depends for its special charm upon the transient quality of the pianoforte tone, and technically upon a very judicious use of the pedal. Both the rhapsodies, op. 79, are grateful to the pianist as well as intensely interesting to the musician, and it is in the violin sonata, which came between these two publications for piano solo, that we find, almost for the first time in the concerted works, that feeling for special pianoforte effect which was afterwards so fully revealed in the splendid series of solos opp. 116-119, which are called, for the most part, 'capricci' if fast, and 'intermezzi' if slow, with what seems like indifference to ordinary nomenclature. In these a new world is revealed to the pianist; the intermezzo in E major (op. 116, no. 4) is not only intensely expressive, but it exhausts the possibilities of special piano effect in its own direction, and there is in it one point which shows the master's insight into the characteristics of the two hands. A very short introductory phrase is expanded, as the piece goes on, into short interludes, which are of course to have less emotional prominence than the exquisite principal melody; in order to ensure this Brahms makes the right hand, during these passages, cross over to play the bass notes, leaving the upper part to the left hand, in which there is usually less tendency to play with strong expression. The three intermezzi, op. 117, seem like chosen illustrations of three specially characteristic moods of the composer; the first, suggested by a German version of the Scottish 'Lady Anne Bothwell's Lament,' has his favourite device of a melody in an inner part, shrouded as it were by harmonies above as well as below, and its middle part contains instances of his use of an arpeggio with the suggestion of something ominous; the second piece, in B flat minor, has something of the tender, fairy-like melancholy of the slow movement of the third symphony; and the third intermezzo is clearly suggested by the form of an old ballad, a branch of musical art in which Brahms took an ardent interest throughout his life. The G minor 'Ballade' in op. 118 is another example of the same quality, and the same book contains a wonderful instance, before alluded to, of condensed tragedy in the piece in E flat minor, No. 6, where the arpeggio figure is again used with unmistakable emotional purpose. The last three of the pieces, Brahms's last published works for the piano alone, illustrate three very different characteristics: the intermezzo in E minor, with its surprising change of thematic aspect, tells of Brahms's well-known love of the waltz-form as treated by Strauss; the exquisitely dainty little piece in C is as characteristic of the master's tenderness as the final 'Rhapsodie' is of his vigour.

Songs

If the pianoforte pieces were formerly asserted to lack some of the essential features of genuine piano music, still more often were Brahms's songs pronounced to be 'unvocal,' and it is within the memory of many that the average English singer would not attempt to sing anything by him. As the accusation that the songs are unvocal has been practically disproved by the fact that there is hardly a singer in the

present day who does not include some songs of Brahms in his or her repertory, it cannot be necessary to point out its absurd falsity further. The song-writing of Brahms is based, more closely than that of any other composer, on the folk-songs of Germany ; his ardent love of these beautiful melodies was one of the most permanent characteristics of his nature, and it is significant that while one of his first publications was a set of ' Volkskinderlieder ' arranged for the children of Robert and Clara Schumann (published without the arranger's name), one of his last productions in vocal music was a set of seven books of Volkslieder, published without opus-number in 1894. Apart from these arrangements, the songs number very nearly 200, and the proportion borne by lyrics either based on actual folk-songs, or in a style imitated from national music, is very large. Many of the sets of songs that were published at frequent intervals during Brahms's life contain one or more specimens labelled ' Volkslied,' sometimes implying that the words are taken from a traditional song, and sometimes that the style of writing is closely assimilated to that of the folk-song. Such things as ' Sonntag ' or ' Wiegenlied ' are so strongly akin to the popular songs of Germany that they might easily be mistaken for genuine specimens, and the beautiful 'Geistliches Wiegenlied ' is based upon a traditional tune, expanded and developed with consummate art.

In some few instances Brahms set to music narrative poems dealing with exciting events, but as compared with Schubert's or Löwe's productions in this class, his are very few and unimportant. ' Entführung ' has the peculiarity, rare in his narrative songs, of being set to the same music for each stanza, not *durchcomponirt* ; another, ' Verrath,' is almost the only instance of a ballad dealing with active dramatic action, and it is a superbly successful one. For the most part, the musical portrayal of a landscape appealed far more strongly to Brahms—of landscape, that is to say, as influencing, or apparently influenced by, the mood of the individual. The early ' Mondnacht,' a song published by itself and without opus-number, ' Die Mainacht,' ' An die Nachtigall,' ' O komme, holde Sommernacht ' and ' Feldeinsamkeit ' are all typical specimens of this mental attitude towards nature, which tempts one to call Brahms the Wordsworth of music, were there not a warmer passion, a higher ecstasy and a deeper insight than Wordsworth ever could attain. In such songs as ' Gestillte Sehnsucht,' ' Verzagen ' and ' Auf dem Kirchhofe,' the human emotion is more prominent.

As with all the greatest lyrical writers, love-songs form by far the largest and most important section of Brahms's vocal works, and here his finest qualities come constantly into view. The set of fifteen romances from Tieck's *Magelone* exhaust every mood of the lover's emotion, and no one has ever given more sincere, sustained, or truly passionate expression to the rapture of crowned love than is to be found in these songs. It may be held that, for a song-cycle, some of them are too much alike in general structure, and they certainly are in many cases longer than the average of the songs which make up the great series of Schubert's or Schumann's masterpieces in this form. But, whatever difficulty there may be about the conditions under which they should be presented to the public, the fact remains that they are a monument of emotional eloquence such as has not been equalled in music. Before their date, only one song, ' Wie bist du, meine Königin,' reaches the same level of ardour ; but after them, there come a large number of lyrics worthy of praise no less unqualified. ' Botschaft,' ' Von waldbekränzter Höhe,' the serenade from op. 58, ' Minnelied,' ' Wir wandelten ' and ' Ständchen ' are perfect love-songs, exquisite in melodic invention, intense in expression, deeply emotional and admirably written for the voice. In ' Steig' auf, geliebter Schatten ' there is the concentrated desire for a loved one departed ; and ' Willst du, dass ich geh' ' touches on a more physical aspect of emotion than Brahms generally prefers. A similar situation, viewed from a more humorous standpoint, is in ' Vergebliches Ständchen,' and a kindred mood of feminine nature is illustrated in the same way in ' Des Liebsten Schwur ' and ' Mädchenfluch.' Not Schumann himself had the secret of giving expression to the most intimate emotions of woman's love with so certain a hand as Brahms, in whose first-issued book of songs there occurs the wonderful ' Liebestreu,' with its climax of passionate utterance to music that is repeated, almost identically, but with ever-increasing force and speed, for each verse. ' Der Schmied ' paints the pride of a girl in her lover's strength, and ' Von ewiger Liebe ' stands alone as a picture of a constancy that endures unimpaired even into the pathetic situation given so beautifully in ' Immer leiser wird mein Schlummer.'

In a loftier mood than that to which love-songs are appropriate are the series of ' Vier ernste Gesänge ' which make up Brahms's last-published composition. Again, as in the early choral works, the vanity and transitoriness of human life are taken as the starting-point for what may be called a series of meditations, in which the composer is led, as it were, by the authors of Ecclesiastes and Ecclesiasticus, to the conclusion that death is better than life, and to a wonderfully touching apostrophe to death; a climax is provided to the whole at the end in words taken from the First Epistle to the Corinthians, the famous definition of love. This is the most beautiful of the four songs, and

the spiritual and emotional value of the set cannot be over-estimated. Kalbeck gives reasons for supposing that the last of the 'Ernste Gesänge' was at first meant to form part of a choral cantata or short oratorio.

Of the concerted vocal works, such as the many series of quartets and the duets, there is not much need to speak at length. The type set in the first 'Liebeslieder-Walzer,' op. 52, had been foreshadowed in a quartet, 'Wechsellied zum Tanz,' from op. 31, and the idea of letting solo voices accompany waltzes played by two performers on the piano yielded such good results that a second set, 'Neue Liebeslieder,' op. 65, was not very long in following the first. These two sets of vocal quartets were among the first things that made for Brahms's real popularity with the English public, and since the date of the second set it has never declined. The 'Zigeunerlieder,' op. 103, and some of the six quartets, op. 112, are in similar mood, and in one and all, the use of the four voices must constantly remind musicians of the 'Liebeslieder.' One of the most beautiful of all the quartets not in waltz-rhythm is the epilogue to the second set of 'Neue Liebeslieder,' a true lyric for four voices, with a gentler style of accompaniment than is provided for the rest.

It remains to speak of the single composition published after Brahms's death, a set of eleven 'Choral-Vorspiele' for organ. They were composed at Ischl in May and June 1896, so that they represent the master's style in its fullest maturity. Some of them, such as 'Mein Jesu,' 'Schmücke dich, o liebe Seele' and 'Herzlich thut mich verlangen' (No. 9), carry us back to Bach by their exquisite mastery of contrapuntal effect; some, like 'Herzliebster Jesu,' 'O Gott, du frommer Gott' and 'Herzlich thut mich verlangen' (No. 10), have the poignant emotional intensity that is the supreme quality in Bach's work; 'Herzlich thut mich erfreuen,' with its occasional displacement of accent, may remind us of Brahms's own early days, and 'O wie selig' is as characteristic of the composer as any of his songs. The exquisite 'Es ist ein' Ros' entsprungen' has some of the artless charm of the folk-songs which were so near Brahms's heart; and his love for making more than one experiment in the same form is again illustrated in two instances of double settings of the same chorale. The last of the collection, 'O Welt, ich muss dich lassen,' has an effect of a double echo, not a literal repetition, but a gradual fading away, as it were, of the last notes of each line; if it is safe to regard it as Brahms's last actual composition, it must be admitted that none of the great composers has given the world a final utterance of more exquisite and touching beauty. The last few bars have a cadence of such fresh and expressive beauty as even Brahms himself never surpassed, and once again we are reminded of Bach, whose last composition was a chorale-prelude on 'Vor deinen Thron tret' ich hiemit.'

General Characteristics

It may not be altogether vain to attempt to sum up a few of Brahms's more notable characteristics, those qualities which make his music what it is, and which distinguish him most conspicuously from all others. That he was fond of conflicting rhythms, and themes akin in style to folk-songs or national dance-tunes, is obvious to the most superficial hearer; in the first peculiarity he had been to some extent anticipated by Schumann and others, and in the second by Schubert. One of his most individual qualities is seen in his manner of handling his themes, for while adhering to the classical structure far more strictly than any of the great composers since Beethoven, he gave it new life by the ingenuity with which he presents his material in new aspects, and in particular by the kind of modulations he prefers. Instead of moving by gradual and definite steps to a remote key, he often leaves out one, or even more, of the sequence of steps by which the distant key would naturally be reached; and certain key-relationships, well known of course before his time, are used with evident affection, such as the transition to the mediant or sub-mediant of the key. In general his treatment of his subject is so instructive to the student and so delightful to the intelligent hearer, that Brahms must be considered supreme among the great masters in this respect.

Another peculiarity of his work is his fondness for themes built, not on the successive notes of the diatonic scale, but on the notes of the tonic chord. It is well known that Beethoven's most individual melodies are 'diatonic,' and while instances of this kind are to be found in great numbers in Brahms, so many of his most characteristic ideas are presented in the other form that we are justified in assuming his preference for it. It would be easy to multiply instances, but such phrases as those which begin the second symphony, the slow movements of the violin concerto and the double concerto, the 'Wiegenlied,' the 'Sapphische Ode,' will occur to every student of Brahms's works; while it would be a matter of some difficulty to adduce examples of diatonic melodies to equal the others in number or importance. The great exception is the theme of the finale of the first symphony, but that, as has often been said, is so closely akin to the finale of the Choral Symphony (one of Beethoven's most typical diatonic tunes) that it hardly counts; the first and third of the intermezzi, op. 117, are two exceptions, and here it may be noticed that in both there is a deliberate assumption of the style of an old ballad.

It is even yet early to attempt to define Brahms's position among the great masters; but as years go on, it is more and more generally realised that he is not only among them, but that he must be assigned a place with the very greatest of them all. In him the illustrious line of German composers of the first rank seems to have come to an end; and, whatever may be the future history of that nation's music, the last of her great masters is in no way unworthy of association with her most illustrious names.

The following is a list of Brahms's works:

Op. 1. Sonata for PF. in C.
2. Do. do. F♯ minor.
3. Six Songs.
4. Scherzo for PF. in E♭ minor.
5. Sonata for PF. in F minor.
6. Six Songs.
7. Six Songs.
8. Trio in B, PF., Violin and Violoncello.
9. Variations for PF. on a theme of Schumann, F♯ minor.
10. Four Ballads for PF.
11. Serenade for Full Orchestra in D.
12. Ave Maria for female voices, Orch. and Organ.
13. Funeral hymn for Chorus and Wind.
14. Eight Songs and Romances.
15. Concerto in D for PF. and Orch.
16. Serenade for small orchestra in A.
17. Four songs for female Chorus, 2 Horns and Harp.
18. Sextet in B♭ for Strings.
19. Five songs.
20. Three duets for S. and A. with PF.
21. Variations for PF.:
(1) On an original theme;
(2) On a Hungarian melody.
22. Seven 'Marienlieder' for mixed choir.
23. Variations for PF., 4 hands, on a theme of Schumann, E♭.
24. Variations and Fugue for PF. on a theme of Handel.
25. Quartet in G minor for PF. and Strings.
26. Quartet in A for ditto.
27. Psalm xiii. for women's voices, with Organ or PF.
28. Four Duets for Alto and Baritone with PF.
29. Two Motets for five voices, a cappella.
30. Sacred Song by Paul Flemming. Mixed Choir and Organ.
31. Three Quartets for S.A.T.B.
32. Nine Songs.
33. Fifteen Romances from Tieck's 'Magelone' for voice and PF.
34. Quintet for PF. and Strings in F minor.
34*. Sonata for two PFs. from the foregoing.
35. Twenty-eight Variations (Studien) for PF. solo on a theme of Paganini.
36. Sextet in G for Strings.
37. Three Sacred Choruses for female voices.
38. Sonata in E minor for PF. and Violoncello.
39. Sixteen Waltzes for PF.; four hands.
40. Trio in E flat for PF., Violin and Horn (or Viola, or Violoncello).
41. Five Part Songs for four men's voices.
42. Three Songs for Chorus, a cappella, six voices.
Op. 43. Four Songs.
44. Twelve Songs and Romances for female Chorus, a cappella.
45. German Requiem, Soli, Chorus and Orch.
46. Four Songs.
47. Five Songs.
48. Seven Songs.
49. Five Songs.
50. Rinaldo; Cantata by Goethe, for Tenor Solo, Male Chorus and Orch.
51. Two Quartets for Strings, C minor and A minor.
52. Liebeslieder-Walzer for PF., four hands, and four solo-voices.
53. Rhapsodie; fragments from Goethe's 'Harzreise' for Alto Solo, Male Chorus and Orch.
54. Schicksalslied (Song of Destiny) for Chorus and Orch.
55. Triumphlied (Rev., chap. xix.) for 8-part Chorus and Orch.
56*a*. Variations on a theme of Haydn's for Orchestra.
56*b*. Ditto. ditto. for 2 Pianos.
57. Eight Songs.
58. Eight Songs.
59. Eight Songs.
60. Quartet (No. 3) in C minor for PF. and Strings.
61. Four Duets for Sopr. and Alto.
62. Seven Songs for mixed Choir.
63. Nine Songs.
64. Three Quartets for four solo voices and PF.
65. Neue Liebeslieder.
66. Five Duets. S. and A.
67. String Quartet, B♭.
68. Symphony, No. 1, C minor.
69. Nine Songs.
70. Four Songs.
71. Five Songs.
72. Five Songs.
73. Symphony, No. 2, in D.
74. Two Motets.
75. Two Ballads for two voices.
76. Eight Piano pieces (Capricci and Intermezzi).
77. Concerto in D for Violin.
78. Sonata in G for PF. and Violin.
79. Two Rhapsodies for PF.
80. Academic Festival Overture.
81. Tragic Overture.
82. 'Naenie,' for Chorus and Orchestra.
83. PF. Concerto in B♭.
84. Five Songs for one or two voices.
85. Six Songs.
86. Six Songs for low voice.
87. Trio in C for PF. and Strings.
88. Quintet in F for Strings.
89. Gesang der Parzen, for 6-part Chorus and Orch.
90. Symphony in F, No. 3.
91. Two Songs for Alto with violin obbligato.
92. Four Vocal Quartets with PF.
93*a*. Songs and Romances for 4-part Chorus.
93*b*. Tafellied (Eichendorff).
94. Five Songs for low voice.
95. Seven Songs
Op. 96. Four Songs.
97. Six Songs.
98. Symphony in E minor, No. 4.
99. Sonata in F for Violoncello and PF.
100. Sonata in A for Violin and PF.
101. Trio in C minor for PF. and Strings.
102. Concerto in C for Violin and Violoncello.
103. Zigeunerlieder, for vocal quartet and PF.
104. Five Songs for Chorus.
105. Five Songs for low voice.
106. Five Songs.
107. Five Songs.
108. Sonata in D minor for PF. and Violin.
109. Fest- und Gedenksprüche for 8-part Chorus, *a cappella*.
110. Three Motets, for 4- and 8-part Chorus.
111. Quintet in G for Strings.
Op. 112. Six Vocal Quartets with PF.
113. Thirteen Canons for female Chorus.
114. Trio in A minor for PF., Clarinet (or Viola) and Violoncello.
115. Quintet in B minor for Clarinet (or Viola) and Strings.
116. Seven Fantasias (Intermezzi and Capricci) for PF.
117. Three Intermezzi PF.
118. Six Clavierstücke (Intermezzi, Ballade and Romance) for PF.
119. Four Clavierstücke (Intermezzi and Rhapsodie) for PF.
120. Two Sonatas for PF. and Clarinet, F minor and E flat.
121. Four Serious Songs (Vier ernste Gesänge) for bass.

POSTHUMOUS WORK

122. Eleven Choral-Vorspiele for Organ.

WORKS WITHOUT OPUS-NUMBER

Fourteen Volkskinderlieder.
Mondnacht, Song.
Ungarische Tänze for PF., four hands. Four books.
Studien for PF. (No. 1, Chopin's F minor étude, arranged in sixths; No. 2, Weber's Moto perpetuo in C, with the prominent part in the left hand; Nos. 3 and 4, two arrangements of a presto by Bach; No. 5, Bach's chaconne, for left hand alone).
A fugue for organ in A flat minor was published as a *Beilage* to the *Allgem. Mus. Zeitung* in 1864; and a 'Choral-Vorspiel' and fugue in A minor for organ on 'O Traurigkeit, O Herzelied' as a *Beilage* to the 13th year of the *Musik. Wochenblatt* about 1883.
Deutsche Volkslieder, seven books. Fifty-one Übungen for PF.
Revised version of the trio, op. 8.
Gluck's Gavotte in A, arranged for PF.
Joachim's overture 'Henry IV.' arranged for two PFs.
Sonata movement in C minor for violin and PF.
Brahms found time amidst his more important pursuits to edit the fine edition of Couperin's harpsichord pieces in four volumes, subsequently issued in two volumes. It is rumoured also that he it was who filled up the figured basses of two sonatas for PF. and violin by C. P. E. Bach, published by Rieter-Biedermann.

BIBLIOGRAPHY

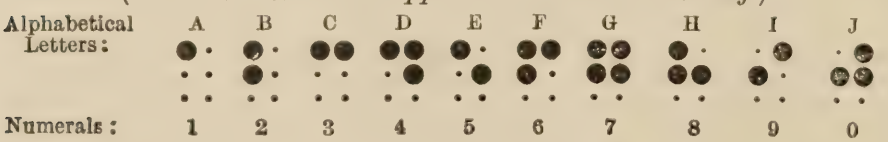
The following is a selection from an extensive Brahms literature:
1. *Johannes Brahms* (4 vols.), by Max Kalbeck. The most authoritative German life, contains vol. iv. p 543 *et seq.*) a full list of Brahms literature.
2. *A Biography of Dr. Johannes Brahms*, a Biographical Sketch, by Hermann Deiters (translated by Rosa Newmarch and published by T. Fisher Unwin in 1888). A second edition of the original, continued up to the composer's death, appeared in 1898.
3. *Johannes Brahms*, by Heinrich Reimann, one of a series of 'Berühmte Musiker,' published by *Harmonie*, Berlin.
4. *Recollections of Johannes Brahms*, by Albert Dietrich and J. V. Widmann. Translated by Dora E. Hecht (Seeley & Co., 1899).
5. *Letters of Dr. Billroth.*
6. '*Zum Gedächtnis des Meisters J. B.*' Oration at the dedication of the Brahms Monument at Meiningen, delivered on Oct. 7, 1899, by Joseph Joachim.
7. A special number of *Die Musik*, for May 1903, was devoted to Brahms; it contains contributions by Prof. G. Jenner, Dr. R. Hohenemser, Prof. Anton Door, A. Egidi and Ludwig Kerpath, as well as five portraits and eight other illustrations.
8. *Briefwechsel.* Fifteen volumes of letters have been published by the Brahms-Gesellschaft. Vols. i. and ii., containing letters from and to Herr and Frau von Herzogenberg, have been translated into English by Hannah Bryant (1909).
9. *The Life of Johannes Brahms* (2 vols.), by Florence May (1905). The most important life in the English language.
10. *Brahms*, by J. A. Fuller Maitland (1911). A study of the music, treating at length many points touched on in the above article.
11. Historical, descriptive and analytical account of the entire works of Johannes Brahms. Vol. i., The vocal works by Edwin Evans, senr. (1912).
12 *Étude sur Johannes Brahms avec le catalogue de ses œuvres*, by Hugues Imbert (1894).
13. *Johannes Brahms, sa vie et son œuvre*, by Hugues Imbert (1906).
14. *Brahms* ('Maîtres de la Musique' series), by Paul Landormy (1920).
For special studies on Brahms see the following: *Studies in Modern Music*, by W. H. Hadow, second series, 1895. *Studies in Music* (reprinted from the *Musician*), 1901, a long and interesting study by Philipp Spitta; James Huneker, *The Music of the Future*, in *Mezzotints in Modern Music* (W. Reeves); Daniel Gregory Mason, *From Grieg to Brahms* (New York, The Outlook Company, 1902).

M.

BRAILLE MUSIC-NOTATION. Louis Braille (1809–52), blind from the age of 3, entered L'Institution Nationale des Jeunes Aveugles, Paris, in 1819. From 1828 to the time of his death he held a professorship there.

He was also organist of a church in Paris. In 1829 he devised a system of expressing the sounds of music, speech and numerals, by means of dots embossed into thick, stiff paper, to be deciphered by touch. After five years of experiment and improvement the new method was a practicable proposition, and thus the year 1834 marked the dawn of a new era in the world of the blind.

The actual originator of the idea of embossed dots was a French officer, Charles Barbier, who between 1819 and 1825 had already invented an ingenious embossed-dot system whereby speech sounds could be recorded. He also invented a frame and embossing awl which enabled the blind to write in that system, but although his method undoubtedly introduced (in rudimentary form) certain new and scientific principles destined to be the basis of what is now known as 'Braille,' his embossed characters were elaborate and difficult to decipher and understand. Each sign was derived from a series of twelve dots arranged in two vertical rows of six, and the outline was too extended to range itself under the finger-tip. Louis Braille overcame this disadvantage by cutting the column in half, *e.g.*  , and by applying the method to musical notation as well, he became the first to render it possible for the blind to record music for themselves.



It will be convenient to number these dots thus :  .

Braille did not live to see the general acceptance of the principles of his system : indeed his method was not officially adopted at the Paris Institution till about the time of his death, after which its adoption in Europe and America followed rapidly.

In 1868 the British and Foreign Blind Association, London (now the National Institute for the Blind), was founded by Dr. T. R. Armitage (1824–91), himself blind, who, with his blind colleagues on the Council, set to work to investigate the various methods of embossing literature, etc., for the blind, ultimately deciding to adopt the Braille system. In 1871 a short 'Key' to Braille music-notation was printed by the British and Foreign Blind Association, said to be the first printed explanation in any language.

The System described. — The Braille method is founded on ten basic signs derived from the four upper dots of the complete cluster of six :

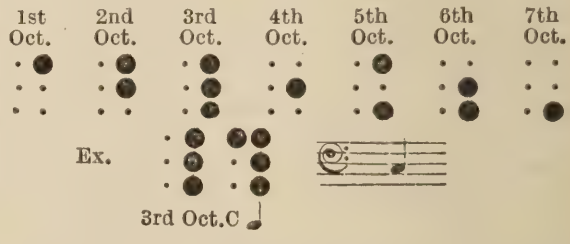
(*The small dots do not appear in the actual embossing.*)

Crotchets (dot No. 6 added):  etc.

Minims (dot No. 5 added):  etc.

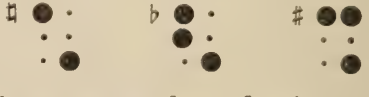
Semibreves (dots Nos. 5 & 6 added):  etc.

The corresponding rests are : 



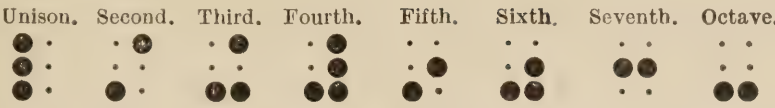
While only four actual time-values of notes and rests are represented, yet each sign also stands for a note, or rest, of $\frac{1}{16}$th its original duration, *i.e.* :

A moment's reflection will suffice to convince any musician that the possibility of ambiguity is very remote.



Pitch is indicated by seven 'Octave Signs,' which indicate the particular octave in which a note appears. All notes from middle C to B above, for instance, are said to belong to the fourth octave, and so on.

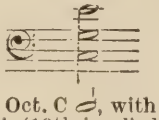
These pitch or 'octave' signs are :



Pitch signs precede the notes, but in order to reduce the signs to a minimum, it is unnecessary to restate the pitch for melodic steps of a second ; nor do thirds require them : fourths and fifths only when the melodic leaps are into adjacent octaves ; while skips of sixths and wider leaps always necessitate fresh pitch signs.

Accidentals are formed by adding dot No. 6 to the ordinary alphabetical characters for A, B and C, *e.g.* :

Key signatures are shown by simply quoting the number of flats or sharps. The key of C major (and its relative minor) is implied by the absence of any statement as to key.



Intervals are thus written :

Compound intervals are thus described :

'2nd Oct. G, with 4th Oct. 5th.'

'3rd Oct. C, with 5th and 3rd' (10th implied because stated *after* the 5th).

From the foregoing brief outline of the general principles of the notation, it will be observed that no attempt is made to copy any detail of the highly pictorial symbols of the staff notation system. Any appeal to a non-existent physical sense of vision is obviously illogical, and failure to apprehend this sufficiently has led many sighted enthusiasts to propose all manner of impracticable approximations to ' sighted ' methods.

The Braille method, however, would seem to bear some slight resemblance to that of figured bass, inasmuch as (in modern Braille) it describes the progress of superimposed parts over a given bass, as intervals, *i.e.* either as ' perpendicular chords ' or as free parts. But the momentary analogy must not be pressed, for, amongst the many differences of method, figured bass renders no account of phrasing, nuance directions, etc. ; while in Braille every detail is incorporated in the description of the music as it proceeds.

An essential characteristic of Braille notation is its resolute condensation of a musical score to its lowest possible terms of statement. A good Braille transcript of an ink-print score will frequently reduce the actual notation to something approximating to précis by means of special devices of contraction and abbreviation.

In staff notation, Abbreviations (*q.v.*) are necessarily limited to those which do not interfere with the regular procession of the notes before the eye so as to prejudice the success of a performance at first sight, the following being amongst the few :

D.C., D.S. ; and the signs representing orthodox ' ornaments ' ; whereas, in Braille, where ' sight-reading ' performance is manifestly impossible, many additional abbreviation devices, inadmissible in the staff system, are assiduously applied in order to assist ready memorisation by a deliberate process of abridgment. To this end there should be a systematic reduction of mere detail. The setting out in full of reiterated notes, bars, groups of bars, sections of a movement, and indeed anything which could be described as a ' verbatim ' repeat, is (within certain limitations imposed by rule) contrary to the genius of the system. Examples in which such contractions could be employed so as to reduce the Braille transcripts to mere skeleton outlines as compared with the engraved copies are to be found in such works as Mozart's ' Rondo alla Turca ' ; Cramer's Pianoforte Study in C (No. 1) ; the accompaniment of Schubert's ' Erl King ' ; Bertini's first study (in C) from his opus 29, and Haydn's ' Gipsy Rondo.'

Treatises.—Louis Braille did not write a text-book ; indeed it was not until nearly 70 years after his death that his method attained to anything like the perfection of the staff system of music notation : consequently there has hitherto been much difficulty in compiling a treatise which should thoroughly explain a scheme which was under constant revision. From 1871 and onwards a number of short pamphlets, or ' Keys,' have appeared in various countries, recording in brief terms fundamental principles and certain periodic developments ; but the absence of a definite, printed course of instruction, together with the fact that there was very little international co-ordination, was unfortunate, and resulted in considerable divergence of practice. To remedy this an international Congress was held at Cologne in 1888, and the Braille use in England, France, Germany and Denmark became more or less standardised. In America new features had already been introduced, and while certain advantages were claimed for these developments, the effect was disastrous to the interchange of Braille music between the continents, because of the dissimilarity of style.

In 1900 the British and Foreign Blind Association, London (now the National Institute for the Blind), published in Braille type a Text-book, or ' Tutor,' in which the system, as then practised, was explained in the form of a series of graduated lessons. This work was entitled *Braille Music Notation*, and was compiled by Edward Watson, whose experience had been gained as director of music at the Liverpool School for the Blind. In 1902 Messrs. Novello published an ink-print edition. In 1922, however, this was temporarily withdrawn for revision, and ultimate republication as a companion volume to a monumental work issued in that year by the National Institute entitled *Key to Braille Music Notation, 1922*. This new English ' Key ' is on the lines of an encyclopædia rather than a ' Tutor,' and, as such, it is by far the most exhaustive exposition in existence of the revised Braille method. It was compiled by a special committee of Braille-

music experts commissioned by the National Institute to prosecute the most careful inquiry into the best practice of all countries, and their researches and compilation work extended over a period of ten years. During this period (in 1919) an important work entitled *Key to Braille Musical Notation, a Dictionary of signs in tactile notation giving a complete presentation of standard and modern methods*, was issued by the Illinois School for the Blind, Jacksonville, under the editorship of L. W. Rodenberg. In this work the principal revisions set out in the 1917 pamphlet of the National Institute, entitled *Additions to Braille Music Notation, together with some account of the methods known as 'Bar by Bar' and 'Vertical Score,'* were described.

Old and New Style Braille Music.—Amongst the many differences between the old and new style, perhaps the most important is that which now assembles all the notes of a bar at once, instead of dividing them into separate 'M.D.' and 'M.G.' sections. In the old style the treble and alto were written together in paragraphs of so many bars, while the tenor and bass followed in corresponding sections. The reader could not, therefore, ascertain the full contents of any bar until he had pieced the 'M.D.' and 'M.G.' portions together, an obviously clumsy plan. Another difference is that in modern Braille all intervals are read upwards from the bass, while in the old style intervals in the 'M.D.' were counted downwards from the treble, and upwards from the bass in the 'M.G.'

American Braillists have invented a method by which the 'M.D.' is written on the line above the 'M.G.,' much after the staff notation system, but this has not been adopted in Europe. The American system thus described is called 'Bar over Bar,' while the new method used in England, which assembles all the contents of a bar, is the 'Bar by Bar' system.

Braille Music Publication.—The costliness of production is such that Braille music cannot be put on the market at a price which any but the wealthy could afford to pay. Some schools in various countries have established small stereotyping plants, mostly for local use, but publication on a large scale can only be undertaken by specially equipped institutions, and which are either State-aided, or have funds available for that specific purpose. The principal Braille publishing house in the world is the National Institute for the Blind, London, which has published some 3000 selected musical works in Braille type (and an infinitely larger catalogue of general literature), and which employs a permanent staff of trained transcribers who are constantly adding new musical works to the list.

In America the principal presses are those of the American Printing House for the Blind, Louisville; the Howe Memorial Press at Watertown, Mass. (in connexion with the Perkins Institution), and the Illinois School for the Blind, Jacksonville.

Amongst the European presses, that of the Paris Institution may be specially mentioned for its excellent music catalogue.

The great desideratum now is international uniformity of practice. Duplication of the same music could then be avoided by mutual arrangement between the publishing establishments. A combined catalogue (with its correspondingly increased range) would thus be placed at the service of the blind, who would then, in some measure, have the freedom of choice enjoyed by the seeing. Happily, tentative proposals already indicate that this much-to-be-desired collaboration is already favoured by those who direct the policy of the principal Braille publishing institutions. E. W[N].

BRAMBILLA, Marietta (*b.* Cassano d' Adda, *c.* 1807; *d.* Milan, Nov. 6, 1875), the eldest of five sisters, all distinguished singers, made her début in London as Arsace in 'Semiramide' in 1827.

She was a pupil of the Conservatorio at Milan, and had never appeared on any stage; but, though her acting was indifferent, her lovely contralto voice, her excellent style, youth and great beauty ensured her success. 'She has the finest eyes, the sweetest voice and the best disposition in the world,' said a certain cardinal; 'if she is discovered to possess any other merits, the safety of the Catholic Church will require her excommunication.' She sang in London for several years, as well as in Italy; at Vienna during four consecutive seasons, 1837–41; and at Paris, where she chose again Arsace for her début, and achieved a great success. Brambilla was distinguished as a teacher, and published (Ricordi) exercises and vocalizzi, beside other pieces. J. M.

BRAMELD, Thomas (*b.* Rawmarsh, Nov. 7, 1848; *d.* there, Nov. 4, 1915), chorus-master and conductor, was by means of his enthusiasm and ability the inspirer of and leader in a remarkable revival of choral singing and general musical activity in the Don Valley of Yorkshire. After five years' elementary education at the local schools he entered, at the age of 10, one of the large steel works in Rotherham and remained in the trade as workman, clerk and foreman for the rest of his life. He found time, however, to study tonic-sol-fa, harmony and counterpoint, violin, violoncello, piano and organ, as well as Latin, Greek, mathematics and history. His general information, too, was extraordinarily wide, as well as very thorough and precise.

Always an enthusiast for the music of Bach, he would rise at 4 A.M. and on one of the local church organs would practise the pedal fugues

for an hour and a half before going to his work at 6 A.M.

His first appointment as conductor was in 1873 to the Rawmarsh and Parkgate Sacred Harmonic Society, which he held for many years, though it was not until 1892 that he ventured to introduce a Bach work, the Magnificat. In 1891 he took over similar duties with the Rotherham Choral Society, in the repertory of which society the B minor Mass and the Christmas Oratorio later took permanent places. For over thirty years he was organist and choirmaster first at a Wesleyan chapel and then at the Parish Church of Ecclesfield, in which capacity he introduced Bach's church cantatas to the district. In this town of some 20,000 inhabitants he formed choral and instrumental societies, whose studies and performances were devoted chiefly to the shorter works of Bach, Handel, Mozart and the moderns. He was also conductor of the Rotherham Orchestral Society, and in 1900 was elected conductor of the Doncaster Musical Society. Latterly the Rotherham and Doncaster choral societies joined forces on several occasions for performances of Elgar's 'The Dream of Gerontius' and other big works.

Besides all his public work he was a regular member of a string quartet playing only privately, which, nevertheless, he insisted should play only the best music in the best possible way. H. A.

BRAMSTON, Richard (first half of 16th cent.), organist and church composer. West (*Cath. Org.*) mentions a Richard Bramston who was deputy organist at Wells Cathedral in 1507. He was also admitted on probation as a vicar-choral and resigned his position as deputy-organist in 1508. He was succeeded, in his capacity as Master of the Choristers, by John Smith, jun., in 1536. The Chapter Records are, unfortunately, incomplete for the years 1513 – 34, so that there is no means of verifying Davey's statement (*Hist. Eng. Music*, p. 107), that a Richard Smyth, *alias* Bramston, was a vicar-choral at Wells in 1531. Add. MSS. 17,802-5 (B.M.), a collection of mid-16th-century motets, includes a 'Recordare Domine' by Bramston. There are also imperfectly preserved parts of another motet by him, 'Mariae virginis fecunda viscera,' in the Library at Peterhouse. (See article by Dr. Grattan Flood, *Mus. T.*, Jan. 1921.) J. MK.

BRANBERGER, Jan (*b.* Prague, Nov. 18, 1877), completed his studies at the Conservatoire at Prague in 1902. In 1915 he took the degree of doctor of philosophy (musical science). From 1906 he filled the posts of Professor of Musical History and Secretary to the Direction of the Prague Conservatoire. With the change of political régime and the establishment of the Czechoslovak republic he entered the service of the Ministry of Public Instruction, in which his aptitude for organisation and musical pedagogy have found a useful outlet as a kind of secretary of state for music. In journalism he is known as the editor of two important musical publications, *Dalibor* and *Smetana*, and as musical critic of the daily *Čas* (Times).

Dr. Branberger's chief contributions to musical literature are :

An abridged general History of Music (German and Czech); *Rhythm and Sound—How to hear Music; Studies in Old Czech Musical History* (German, 1906); an important book, the continuation of Ambros's work, *The Prague Conservatoire*, 1811–1911 (Czech and German); there is also a volume still in manuscript, *Musical Problems in the work of R. Descartes*. He has edited some of the works of Christopher Harant of Polžic, and the first *Almanach of Czechoslovak Music* which appeared in 1922. R. N.

BRANDES, Emma (*b.* near Schwerin, Jan. 20, 1854), was taught music by Aloys Schmitt, court Kapellmeister at Schwerin, and by Goltermann, and in 1866 made her first public appearance there, in Mendelssohn's G minor concerto. In 1871–72 she visited England, and showed herself a pianist of considerable performance and of still greater promise, viz. Mar. 20, 1871, at the Monday Popular Concert, when she played with Joachim ; at the Saturday Popular Concert with Mme. Schumann in Bach's G minor concerto for two pianos ; at the Philharmonic, etc. She played with great success in Germany and Austria until her marriage with Herr Engelmann, Professor of Physiology at Utrecht, when she retired from public life. A. C.

BRANDL, Johann (*b.* Rohr, near Ratisbon, Nov. 14, 1760 ; *d.* Carlsruhe, May 26, 1837), studied violin and piano as a child in the monastery at Rohr, and at 10 was sent by Canon Gelasius to the seminary at Munich.

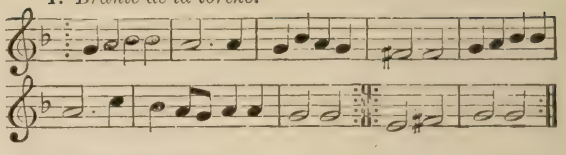
He learnt singing from Valesi ; and at the Jesuit school at Neuburg received a thorough musical education from a certain Feldmaier. He began his career in the convent of Trutpert, Freiburg-im-Breisgau, as teacher of the violin and piano. In 1784 he was appointed Kapellmeister to Prince Hohenlohe Bartenstein ; in 1789 Musikdirector to the Bishop of Bruchsal ; and in 1806 the same to the archduke of Baden at Carlsruhe, where he stayed till his death. He composed an opera, 'Hermann' ; a monodrama, 'Hero' ; and many symphonies, serenades, quartets, etc. His melodies are beautiful, and were highly esteemed, as may be seen by some articles in the Leipzig *A.M.Z.* for 1828. F. G.

BRANDT, Marianne (Marie Bischof) (*b.* Vienna, Sept. 12, 1842 ; *d.* there, July 9, 1921), contralto singer, was taught singing at Vienna by Frau Marschner and (1869–70) by Mme. Viardôt. In 1867 she was engaged at Gratz, where she made her début on Jan. 4 as Rachel ('La Juive'). She next sang at Hamburg, and on Apr. 21, 1868, first appeared at Berlin as Azucena. In 1872, on leave of absence, she was engaged in London for the season at the

Royal Italian Opera, her engagement being due to the intended production of 'Lohengrin,' in which she was to sing Ortrud. 'Lohengrin' was withheld, but she sang once as Fidelio, May 2, in which she made her début, and several times as Donna Elvira, with indifferent success. In 1882 she sang in German opera at Drury Lane as Brangäne on the production in England of 'Tristan und Isolde,' and as Fidelio, when her efforts were heartily appreciated. She played Kundry in the second performance of 'Parsifal' at Bayreuth, on which occasion, according to the Paris *Figaro*, she generously gave her services. From 1886 she was for several seasons a member of the German Opera Company at New York; about 1890 she settled in Vienna as a teacher of singing. Her extensive compass enabled her to play both soprano and mezzosoprano parts, as Fidelio, Eglantine ('Euryanthe'), Orpheus, Spirit of Hate ('Armida'), Ortrud, Margarethe ('Genoveva'), Elvira, Selica, Amneris ('Aïda').

A. C.

BRANDTS-BUYS, Jan (*b.* Zutphen, Sept. 12, 1868), Dutch composer, the son of Marius Andrianus and nephew of Henry Brandts-Buys, the well-known Dutch conductor; was educated at the Raff Conservatorium of Frankfort, having been awarded a State Prize in his native land. In his twenty-ninth year he attracted public attention by his first piano concerto in F major, for which work he received the 'Boesendorferpreis.' Worthy of special remembrance is his orchestral piece 'Oberon Romancero,' op. 27, a work of some genius. He composed several operas, notably 'Das Veilchenfest,' performed under Gregor at the Comic Opera in Berlin in 1910. Dresden witnessed the first performance of 'Le Carillon' in 1913. In quick succession followed 'Die Schneider von Schoenau' (Dresden, 1916), 'Der Eroberer' (Dresden, 1918), 'Mi-carême' (Vienna, 1919), and 'Der Mann im Mond' (Dresden, 1922). His other works include three concertos (PF. and orch.), a suite (for strings, harp and horn), a quartet, a quintet (for strings and flute), trios and numerous songs (with PF. and orch.) and several pianoforte pieces.



H. J. K.

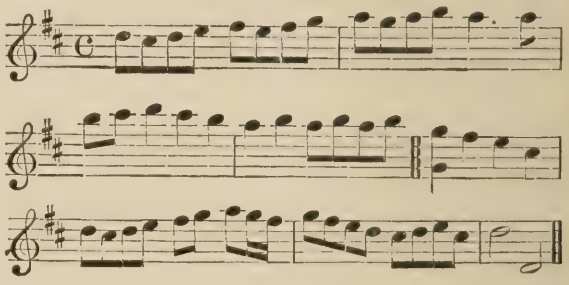
BRANLE (Fr.), (1) A step in the Basse Danse, in which the body was swayed from side to side (*branlé*).

(2) A round dance in duple measure, one of the oldest, which was in vogue from the 15th to the 18th century, between the time of the *basses danses* and the *contre danse*, which was very popular in France in the 16th century. The music of a great variety of Branles is given in Arbeau's *Orchésographie* (Langres, 1588), with indications as to the way of dancing them (see Arbeau).[1] A copy is in the British Museum. We quote two:

[1] See *Mus. T.*, Nov. 1916.

1. *Branle de la torche.*

2. *Branle des Sabots.*



tappement du pied droit.

(See Form and Sonata.)

J. F. R. S.; addns. M. L. P.

(3) A French dance popular in England during the 16th century. Its figure is now doubtful, but it has been stated to have been a 'ring' or a 'round' dance in which the dancers join hands as round a maypole. It is identical with the Bransle or 'Brangill,' and probably also with the 'Brawl.' Shakespeare plays upon the word in a dance sense in 'Love's Labour Lost,' Act iii. Scene 1. A description of the measure is given in Morley's *Plaine and Easie Introd.*, 1597, p. 181.

That the 'Brangill' was a round dance may be inferred from the fact that 'The Brangill of Poictu,' as here transcribed from the Skene MS.

(compare Arbeau's description of the 'Branle de Poitou'), is the tune of 'We be three poor Mariners,' a song in which the sentence occurs,

'Shall we go dance the round, the round.'

It is also curious that a traditional remembrance of these words is sung to a round dance by street children to-day.

F. K.; addns. M. L. P.

BRANT, Jobst (Jodocus) vom, an early 16th-century German composer. G. Forster, in the 3rd and 5th part of his collection of German songs (1549 and 1556), calls him Jobst vom Brand the younger, Captain of Waldtsachsen and Administrator of Liebenstein; and in the dedication to him of Part III. of the songs (1549) he tells us that they had grown up together at the court of the Elector Palatine at Heidelberg. In the matriculation-book of Heidelberg University he is entered as 'Jodocus de Branth ex Waltershofen nobili prosapia, dioce. Ratisb.' (Ratisbon). In the dedication of Part V. (1556) Forster calls him 'Pfleger zu Liebenstein' (administrator = constable). His German songs contain much that is full

of grace and beauty. One song, 'Wer sich allein auf Glück verlat,' appears under his name in Forster's book, while Ott, in his collection of 1534, attributes it to Senfl. Brant wrote (apart from 55 German songs contained in various collective volumes) a book of Psalms and German sacred songs in 4 to 9 parts, published at Eger, 1572/73. Some of his songs have been republished (*Q.-L.*).

BRASSART (Brasart, Brascatoris), (1) Johannes, 'Presbyter de Leodio,' *i.e.* priest of Liège, a composer of repute in the first half of the 15th century, was a singer in the Papal Choir in 1431. Many sacred compositions by him, in 3 and 4 parts, are preserved in the Trent manuscripts, reprint, *D.T.Ö.*, Trienter Codices, in Cod. Mus. 37 of the Liceo Musicale at Bologna, and in the Canonici MS. at Oxford. Franchinus cites Brassart, together with Dunstable, Dufay and Binchois, as an authority for the use of a certain discord. He is probably to be identified with Johannes de Ludo, whose 4-part composition 'Fortis cum quevis actio' in the Oxford MS. is ascribed to Brassart in the Trent Codex 87, *Ludo* being a mistake or variant for *Leodio*. Compositions of Brassart have been published in the reprint of the *Trienter Codices, Denkmäler der Tonkunst in Österreich.* J. F. R. S.

(2) Oliviero (Olivier), Belgian composer of the 16th century, known by his 'Il primo libro delli suoi madrigali a quattro voci' (Rome, 1564, Ant. Barre). *Fétis*; *Q.-L.*

M. L. P.

BRASS BAND (Fr. *fanfare*), the smaller variety of the full military band, employed by a cavalry regiment when on mounted duty, on account of the greater ease with which brass instruments can be played on horseback. It ordinarily consists of two or more cornets in B♭, two tenor saxhorns in E♭, one or more baritones and euphoniums, with bombardons, trumpets and kettle-drums. This small cavalry band is, however, often augmented by other instruments, and the instrumentation of a well-known one so increased is as follows, viz.:

1 E♭ Piccolo.	1 B♭ Baritone.
1 E♭ Clarinet.	2 B♭ Trombones.
3 B♭ Clarinets.	1 G Trombone.
4 or 5 B♭ Cornets.	2 B♭ Euphoniums.
2 F Trumpets.	3 Basses.
3 E♭ Saxhorns.	2 Kettle-drums.

This form of band has not the variety of quality and richness of tone possessed by the full reed band, but is competent to produce very smooth and agreeable harmony. On account of the greater facility with which brass instruments of the saxhorn species are learned, as compared with clarinets and other reeds, a brass band is much more easy to establish and maintain in efficiency than a full military band. (See Wind Band.) D. J. B.

BRASSICANUS (Brassianus), Johannes, cantor of the school at Linz *c.* 1615, did much for the advancement of Protestant church music. He wrote 'Similia Davidica,' etc., 4 v., 1615; some songs in Dan. Hizler's 'Musikalisch figurirte Melodien,' etc. (1634); in 'Harmonisches Chor- und Figuralgesangbuch,' etc., Frankfort (1650); and in Erhardi's Songbook (1659); 5 four-part songs; and 'Gleich wie der Hirsch schreyt,' in the Proske library (*Q.-L.*; *Mendel*).

BRASSIN, (1) Louis (*b.* Aix-la-Chapelle, June 24, 1840; *d.* St. Petersburg, May 17, 1884), a Belgian pianist and composer. His father was a baritone singer of some renown, whose real name was de Brassine, and an uncle of his was Drouet, the famous flautist. To the fact that in 1847 his father was engaged at the opera in Leipzig, young Brassin owed the most important part of his education, for he entered the Conservatorium of that town, and became a pupil of Moscheles, having some years previously appeared in public at Hamburg. After five years there he undertook several concert tours with his two brothers, and in 1866 was appointed first pianoforte teacher in the Stern Conservatorium at Berlin. After a year's tenure of this post he resumed a more or less wandering life, and ultimately settled in Brussels (1869–78) as professor in the Conservatoire. In 1878 he accepted a similar post at St. Petersburg, where he died. A transcription of the 'Feuerzauber' from 'Die Walküre' was long a favourite, and his works include, beside many excellent pianoforte pieces, two German operettas, 'Der Thronfolger' (Brussels, 1865) and 'Der Missionär.' Of his two younger brothers, one, (2) Leopold (*b.* Strassburg, May 28, 1843; *d.* Constantinople, May 1890), who made his first appearance as a pianist at the age of 5 under Louis Brassin's auspices, was pianist to the Duke of Saxe Coburg, and professor at Berne. The other, (3) Gerhard (*b.* Aix, June 10, 1844), a violinist of repute, was teacher at Berne (from 1863), Konzertmeister at Gottenburg in Sweden and teacher at the Stern Conservatorium from 1874–75, when he was appointed to the direction of a musical society at Breslau. After 1880 he lived successively in St. Petersburg and Constantinople.

M.

BRATSCHE (*viola da braccia*), the German name for viola.

BRAUN, Johann (*b.* Cassel, Aug. 28, 1753; *d.* Berlin, 1795), eldest son of Anton Braun, the father of a numerous family of clever musicians. Johann studied at Brunswick under Posch and Schwanenberg (theory); toured as violin virtuoso and returned to Cassel as member of the Ducal chapel. In 1788 the chapel was dissolved and Braun went to Berlin as Konzertmeister of the Queen of Prussia. In that capacity he instituted concerts at the

Hotel 'Stadt Paris,' which were far famed for their excellence. His compositions were also much esteemed, comprising 30 violin concertos, concertos for the horn, the bassoon, the violoncello and the flute, 13 double concertos for 2 horns, symphonies, trios, duets, ballet music, songs, etc. (*Mendel*; *Q.-L.*).

BRAUNFELS, Walter (*b.* Frankfort-on-Main, Dec. 19, 1882), received his musical training in the Hochs Conservatorium in his native town; proceeding later to Vienna, where he studied under Leschetitzky and Navratil, and completing his education under Ludwig Thuille in Munich. A distinguished pianist, he excels in Bach and Beethoven. At an early age he began to write musical works of all kinds, ranging from piano pieces and songs to choral works and operas, wherein he achieved some success, especially with his latest opera 'Don Gil von den grünen Hosen.' His compositions reveal a real artistry and are influenced by the classical forms of Brahms, the grotesque and polyphonic melodies of Berlioz, and a touch of the post-romanticism of Pfitzner.

LIST OF WORKS

Op. 1, Songs; op. 2, Songs; op. 3, Opera 'Falada' (MS.); op. 4, Songs; op. 5, Ten Études (PF.); op. 6, Opera 'Der goldene Topf' (MS.); op. 7, 'Fragmente eines Federspieles'; op. 8, 'Hexensabbath' (PF. and orch.); op. 9, Rondo (PF.); op. 10, Pieces (PF.); op. 11, Incidental music to 'Twelfth Night'; op. 12, Opera 'Princess Brambilla' (1st perf., Stuttgart, 1909); op. 13, Echoes of Beethoven's Music; op. 14, Incidental music to 'Macbeth'; op. 15, Variations on Children's Songs; op. 16, Pieces (PF.); op. 17, Revelation of St. John, Chapter VI. (orch.); op. 18 Ariel's Song; op. 19, Pieces (PF.); op. 20, Serenade (PF.); op. 21, Variations (for 2 PF.); op. 22, Carnival Overture (orch.); op. 23, Opera 'Till Eulenspiegel' (1st perf., Stuttgart, 1913); op. 24, Songs (to Poems after Goethe and Eichendorff); op. 25, Fantasy (on theme by Berlioz); op. 26, Songs (with orch.); op. 27, Songs (with orch.); op. 28, 'Neues Federspiel' (for v. and orch.); op. 29, 'Die Armenuhr (for boy chor. and orch.); op. 30, Opera 'Die Vögel' (1st perf., Munich, 1920); 31, Pieces (PF.); op. 32, Te Deum; Opera 'Don Gil von den grünen Hosen'; op. 33, Preludes.

H. J. K.

BRAVO, 'well done,' an Italian term of applause which has gone from Italy to other countries, though never taking very firm root in England. It was the custom in Italy to applaud, not only at the end of a piece or passage, but during the performance, and the *bravo* was addressed to composer, singer or instrument—'Bravo Mozart!' 'Bravo Lablache!' 'Bravo il fagotto!' The word was there naturally inflected, and the applause to a female singer would be 'Brava Grisi!' Beethoven when satisfied with the orchestra used to give a 'thundering "Bravi tutti."'

G.

BRAVURA (Ital.), 'courage,' 'bravery,' a style of both music and execution involving the display of unusual brilliancy and technical power; music written to task ability and test the courage of the artist. Thus 'Rejoice' from the 'Messiah' is an *aria di bravura* according to the old convention of the Handelian period (see Aria).

G.

BRAWL, see Branle.

BREDENIERS (Bredemers, Bredemersche, Bredenierch), Henri (*b.* Namur, 2nd half of 15th cent.). In 1488 he appears among the choir-boys of Antwerp Cathedral. In 1501 he was organist of the great chapel of Notre-Dame and court organist of the Archduke Philip le Bel. In 1504 he became a canon of St. Aubain, Namur; in 1508 teacher of the archduke's children (the future Charles V. and his 3 sisters); and in 1522 provost of St. Aubain, which he renounced soon after. In 1512 he visited Germany; in 1520 he went to England with Charles V.; and in 1521 to Mayence. A 'Missa super Ave Regina' of his exists in MS. at Brussels. (See *Q.-L.*; *Fétis*; van der Straeten, *La Musique aux Pays-bas.*)

BREE, Johann Bernhard, Van (*b.* Amsterdam, Jan. 29, 1801; *d.* Feb. 14, 1857), son of a musician. He was taught chiefly by his father, and first came before the public as a player of the violin, on which he was much renowned in Holland. In 1829 he was appointed conductor of the Felix Meritis Society of Amsterdam, and held the post with great distinction till his death. Van Bree was an industrious composer, and left behind him a mass of works in all the regular departments of music. An opera, 'Sapho,' was produced in 1834. In England he is known to Choral Societies by three masses for men's voices, and a cantata for St. Cecilia's Day, all published by Novello. Van Bree was the founder (1840) of the Cecilien-Vereen of Amsterdam, which he conducted till his death, and was also head of the music school of the Society for encouragement of music (Maatschappij tot bevordering der Toonkunst).

G.

BREITKOPF & HÄRTEL. The foundation of this firm of music publishers in Leipzig was laid in 1719, when (1) Bernhardt Christoph Breitkopf (*b.* Clausthal, Mar. 2, 1695; *d.* Mar. 26, 1777), member of a mining family of the Hartz, set up a printing-press at Leipzig. His first publication was a Hebrew Bible, and was quickly followed by a number of theological and historical works, in which Breitkopf's friendly relations with the poet Gottsched were of much use to him. In 1732 a printing office was built with the sign, 'zum goldnen Bär,' which in 1765 was increased by the addition of the 'silberne Bär.'

In 1745 Breitkopf gave up the printing business to his only son, and in 1765 the firm became B. C. Breitkopf & Son. The son, (2) Johann Gottlob Immanuel (*b.* Nov. 23, 1719; *d.* Jan. 29, 1794), devoted himself with ardour, while a lad, to the acquirement of learning, developed by intercourse with such scholars as Lessing and Winkelmann. He laboured to improve the practice of printing, and with that view wrote several papers. By the introduction of separate movable music type he produced, as early as 1750, a revolution in the music trade. In 1756 the first fruits of his

innovations appeared in the shape of a splendid edition of an opera in full score, and in three vols., entitled *Il trionfo della fedeltà, dramma per musica di E. T. P. A.* (the initials of Ermelinda Talia Pastorella Arcada, a name assumed for the occasion by Antonia Amalia Walburga, Princess of Saxony). After this Breitkopf published a long series of important compositions by C. P. E. Bach, Graun, Hiller, Leopold Mozart, etc. During the Seven Years' War (1756–63) he had organised on a large scale a warehouse of German, English, French and Italian music, both MS. and printed, and had started a special trade in music, through the publication of systematic descriptive catalogues referring to his stock, and embracing the whole field of musical literature. Between 1760 and 1780 he issued catalogues of printed music, both theoretical and practical, in 6 parts; of MS. music, in 4 parts; and a third (especially important for the history of music) —a thematic catalogue of MS. music only, in 5 parts, with 16 supplements (1762–87). In 1770 he founded a manufactory of playing cards (which he sold in 1782), a coloured paper manufactory, a book-selling business in Dresden and another in Bautzen. He wrote treatises *Über die Geschichte . . . der Buchdruckerkunst* (1779), *Versuch den Ursprung der Spielkarten . . . zu erforschen* (1784), *Über Schriftgiesserei* and *Über Bibliographie* (1793).

Immanuel had two sons, who learned the printer's craft from their father. (3) Bernhard Theodor (*b.* 1749) was musician enough to compose some pretty music to Goethe's 'Jugendlieder' in 1769. He went in 1777 to Russia, and founded a printing office and book-selling business in St. Petersburg—was teacher in an institution for the education of girls, and died at a great age as Russian 'Staatsrath.' His second son, (4) Christoph Gottlob (*b.* Sept. 22, 1750; *d.* Apr. 4, 1800), remained with his father. He was an amiable dilettante, to whom the burden of his vast business was intolerable; after carrying it on therefore for a year he gave it up to his friend G. C. Härtel, at the same time making him his heir. Since then the business, though entirely in Härtel's hands, has been conducted under the well-known title of Breitkopf & Härtel.

(1) Gottfried Christoph Härtel (*b.* Schneeberg, Jan. 27, 1763; *d.* July 25, 1827) was son of Dr. Christoph Härtel, Burgomaster of Schneeberg. He applied himself with vigour to improve the business by undertaking the publication of musical works of the highest order. Thus he brought out the works of Mozart in 17 vols. (1798–1816); of Haydn in 12 vols. (1800–1806); of Clementi in 13 vols. (1800–18); and of Dussek in 12 (1814–18)—an undertaking which was the forerunner of many popular and critical collected editions. Härtel also started the *Allgemeine musikalische Zeitung* (1798–1848) (see Periodicals, Musical); he further published a literary paper, the *Leipziger Literatur-Zeitung* (1812–34), enlarged his stock of music and books and made various practical improvements in printing. Amongst other things he introduced the system of engraving music on pewter plates, to which in 1805 he added a lithographic establishment, with the personal co-operation of Sennefelder, the inventor. Procuring workmen from Vienna, he next started the first factory of pianos in central Germany.

Up to 1835 the business was carried on by his nephew (2) Florenz Härtel. But at that date (3) Hermann Härtel (*b.* Apr. 27, 1803; *d.* Aug. 4, 1875), the eldest son of Gottfried, entered the house as head, in partnership with his younger brother (4) Raymund (*b.* June 9, 1810; *d.* Nov. 9, 1888), who had joined in 1832. Hermann's fine character had been improved by an excellent education; he read law, and took his doctor's degree in 1828, and his love of art had been cultivated by a two years' residence in Italy. The brothers lived to see a remarkable spread of taste, and to publish many works of eminent modern composers. Their catalogue up to 1874 included over 14,000 works, extending over the whole range of music. In 1866 they began the issue of a series of cheap editions of classical works which are now widely known. They assisted in the formation of the Bach Gesellschaft (*q.v.*), which, like the companion Handel Society, owes much to their energy, taste and accuracy. In 1862 they projected a complete critical edition in score and parts of the works of Beethoven, which was completed by a supplementary volume in 1887. Similar editions of Mendelssohn, Mozart, Chopin, Schumann, Schubert, Gluck, Berlioz, Liszt, Wagner, have been issued, as well as complete critical editions of older masters such as Palestrina and Heinrich Schütz, Orlando di Lasso, Sweelinck, Victoria.

The business increased so much that the Goldene Bär was in 1867 exchanged for a much larger building. By 1871 the printing had developed to such an extent that it became necessary to use the space formerly occupied by the pianoforte manufactory. After the death of Hermann, and the retirement of Raymund in 1880, the business was in the hands of two grandsons of Gottfried — Wilhelm Volkmann (*b.* June 12, 1837; *d.* Dec. 24, 1896) and Dr. Georg Oscar Immanuel von Hase (*b.* Sept. 15, 1846; *d.* Leipzig, Jan. 26, 1921). C. F. P.

Dr. Ludwig Volkmann, whose personal interest in art has appeared in the publication of various books on Æsthetics, succeeded to his father's position in the firm, and a son of von Hase, Dr. Hermann von Hase, was a

partner from 1910–14. Dr. Hellmuth von Hase, his younger brother, joined the firm after the war. (*Riemann.*)

Bibl. — Hermann von Hase, *Beiträge zur Breitkopfschen Geschäftsgeschichte*, *Z.M.W.*, May 1920; *Breitkopf und Haertel* (1917). A detailed history.

BREMA, Marie, the professional name of Minny Fehrman (*b.* Liverpool, Feb. 28, 1856; *d.* Manchester, Mar. 22, 1925), her father being of German origin, and her mother a native of Richmond, Virginia. Her natural proclivities were always strong for music and the drama, but it was not until after her marriage with Arthur Braun of Liverpool, in 1874, that she determined to embrace the musical career.

She began studying seriously with Henschel in 1890, and made her début at the Popular Concert of Feb. 21, 1891, in Schubert's 'Ganymed,' under the name Bremer, in allusion to her father's native place, Bremen. After some further instruction from Bessie Cox and Blume, she continued to sing only in concerts, but a performance of 'Adrienne Lecouvreur' which she consented to give at Oxford in 1891 proved to the public that she had dramatic gifts which ought not to be wasted, and on Oct. 19 she made her first appearance on the London stage, at the Shaftesbury Theatre, in the part of Lola, on the production of 'Cavalleria' for the first time in England. On Nov. 27 she appeared in the more important part of Orfeo, and for some little time afterwards her work was chiefly in concerts; she sang at the Philharmonic, Apr. 20, 1893, and enacted the part of the Evil Spirit in Parry's 'King Saul' at the Birmingham Festival of 1894. In that year, having been introduced to Mme. Wagner by Hermann Levi, she was engaged for the part of Ortrud at Bayreuth, which she sang at each performance of 'Lohengrin,' appearing also on a few occasions as Kundry in 'Parsifal.' The former part, with Brangäne, and Brünnhilde in 'Die Walküre,' was sung by her during a tour in America in the latter part of 1894, with the Damrosch company, and after that year she was chiefly identified with these Wagnerian parts, appearing again at Bayreuth in 1896 and 1897, as Fricka and Kundry. Meanwhile she had appeared with very great success at Brussels as Orphée, Dalila and Amneris; and her impersonation of Orpheus was received with enthusiasm in Paris in 1898. Her performance of Marcelline, on the revival of Bruneau's 'L'Attaque du moulin' (May 29, 1897), placed her on a level with the original exponent of the part, Mme. Delna. After 1900, in which year she sang the part of Brangäne in Lamoureux's concert-performance of 'Tristan,' she was a great favourite with the Parisian public, and in 1902 she took the part of Brünnhilde in 'Die Götterdämmerung' in the German performances at the Château d'Eau theatre under Richter. On May 30, 1901, she created the part of Beatrice in Stanford's 'Much Ado about Nothing,' and besides these important operatic engagements she appeared at all the most important English festivals. She sang the part of the Angel in Elgar's 'Dream of Gerontius,' in its production at the Birmingham Festival of 1900. In 1910 she gave two seasons of opera at the Savoy Theatre, London, in which her own performance of Gluck's 'Orpheus' (in English) was outstanding, and she was also responsible for the whole stage production. Her gifts as a teacher appeared in her direction of an operatic class at the Manchester Royal College of Music, to which she devoted herself in later years. M., with addns.

BREMNER, Robert (*b.* Edinburgh, 1720; *d.* London, May 12, 1789), an Edinburgh and London music publisher, author of an excellent little treatise, *The Rudiments of Music*, which ran through three editions (1756, 1762 and 1763). Bremner began business in Edinburgh shortly before July 11, 1754, on which date he advertises in an Edinburgh newspaper. He was then 'at the Golden Harp opposite the head of Blackfriars Wynd,' but before 1761 had removed to a shop higher up the High Street 'at the back of the Cross Well': he had already (in 1755) changed his sign to the 'Harp and Hautboy.' Having published many now very interesting collections of Scots music, he removed in 1762 to London, still keeping on his Edinburgh shop under a manager. His address in London was opposite Somerset House in the Strand, and he retained his Edinburgh sign, the 'Harp and Hautboy.' His London business rapidly developed, and he published all varieties of the best music of the period, as well as republications and additions to his Scots collections. His music is particularly neatly engraved and printed, and always on good strong paper. He was the purchaser, in 1763, of the famous 'Fitzwilliam Virginal Book,' which he bought at the sale of Dr. Pepusch's library for ten guineas and presented to Lord Fitzwilliam. Bremner died at Kensington Gore, and the whole of his stock, plates and copyrights, was bought by John Preston, who issued a lengthy catalogue of his purchase in 1790. F. K.

BRENDEL, Dr. Karl Franz (*b.* Stollberg, Nov. 26, 1811; *d.* Leipzig, Nov. 25, 1868), an eminent German critic, was educated at the Gymnasium of Freiberg in Saxony, where his father was Berg-Rath, and at the universities of Leipzig and Berlin.

In 1844 he settled in Leipzig as proprietor of Schumann's *Neue Zeitschrift*, which he edited from Jan. 1, 1845, at the same time teaching musical history and æsthetics in Mendelssohn's newly established Conservatorium. He wrote at this time *Grundzüge der Geschichte der Musik* (1848); and delivered the public lectures on

which he founded his most comprehensive work, *Geschichte der Musik in Italien, Frankreich, und Deutschland* (1852; 7th edition 1888), an attempt to treat the various historical developments of the art from one practical point of view. More important, however, were his articles in the *Neue Zeitschrift*, written as a strenuous advocate of modern ideas in music. His first efforts were devoted to the recognition of Schumann; but in time the paper became the organ of Wagner and Liszt.

In 1856 he began to issue another periodical entitled *Anregungen für Kunst, Leben, und Wissenschaft*, which until 1860 supported the propaganda of the *Zeitung* in favour of Liszt and Wagner. Further exposition of these views is to be found in his *Musik der Gegenwart und die Gesammtkunst der Zukunft* (1854), which must be regarded as a completion of his History. With the year 1859 Brendel began to labour for the reconciliation of the contending parties, on the basis of the general progress of modern times. The field for this effort was the Allgemeine deutsche Musik-Verein, or German Musical Union, which arose out of a festival of musicians held on the occasion of the twenty-fifth anniversary of the *Neue Zeitschrift*, and was founded in 1861. Brendel was not only one of the chief founders of the Verein, but as its president he worked for it with restless energy to the time of his death, and his *Zeitung* was its official organ. Besides the works already mentioned, Brendel issued—*Liszt als Symphoniker* (1858), *Organisation der Musik durch den Staat* (1866), and *Geist und Technik in Klavierunterricht* (1867). A. M.

BRENET, Michel (properly Mlle. Antoinette-Christine-Marie Bobillier) (*b.* Lunéville, Meurthe et Moselle, Apr. 12, 1858; *d.* Paris, Nov. 4, 1918), eminent 'musicologist,' was resident in Paris from 1871. She published an *Histoire de la symphonie à orchestre* (1882), a competition on that subject, which was crowned. From that time she devoted her life to the study of the history of music, and musical research of every kind. She attained the first rank amongst French 'musicologists,' and has acquired abroad a just reputation. She gathered an immense amount of information from the most reliable sources, her working methods being extremely precise and her views of the broadest. She wrote: *Grétry: sa vie, ses œuvres* (1884); *Deux pages de la vie de Berlioz* (1889); *Jean de Ockeghem . . .* (1893), a study of remarkable value and original research; *Sébastien de Brossard* (1896), etc.; also biographies of Palestrina, Handel and Haydn. Her last issued book was *La Musique militaire*, (Paris, 1917). Her *Notes sur l'histoire du luth en France* (1899) opened the way to investigators in that branch; her main works, *Les Musiciens de la Sainte Chapelle du Palais* (1910), *Les Concerts en France sous l'ancien régime*, *La Librairie musicale en France de 1685 à 1780* (*I.M.G.*, 1907), etc., give evidence of her great erudition and of her competence as an historian of music. She wrote numerous articles, historical and critical, in the *Ménestrel*, the *Archives historiques, artistiques, littéraires* (1889–91), etc., and contributed to the *Guide musical*, *Tribune de St. Gervais*, *Grande Encyclopédie*, *Revue musicale*, *Encyclopédie de la Musique et Dictionnaire du Conservatoire*, *L'Année musicale*, 1911 (of which she was a founder), and many others. M. L. P.

Bibl.—*Bulletin de la Société Française de Musicologie*, 1919, No. 4; L. de La Laurencie, *Michel Brenet.*

BRENT, Charlotte (*d.* Apr. 10, 1802), soprano singer, was the daughter of a fencing-master and alto singer, who was the original Hamor in Handel's 'Jephtha' in 1752. Handel's notes pencilled in the scores of his 'Ode on St. Cecilia's Day' and 'Alexander's Feast' show that she also sang in these works. On the production at Ranelagh in 1759 of Bonnell Thornton's burlesque 'Ode on St. Cecilia's Day,' with Burney's music, she accompanied Beard in the Salt-box song 'on that instrument.'

Miss Brent was a pupil of Arne and first appeared in Dublin, singing in Arne's opera 'Eliza' (Nov. 29, 1755). She sang in London in 1758, notably in a concert performance of 'Eliza' given at Drury Lane, Mar. 3. She was engaged by Beard for Covent Garden, where she appeared successfully as Polly in 'The Beggar's Opera,' and where she continued until the close of her theatrical career. In 1762 she reached the summit of her reputation by singing the part of Mandane in Arne's 'Artaxerxes' (produced Feb. 2), which had been written expressly for her. In 1764 and 1765 she sang with Tenducci in Handelian selections at Ranelagh. In 1765 she sang at the Hereford Festival, in 1766 at that of Gloucester, and in 1767 at Worcester. In Nov. 1766 she became the second wife of Thomas Pinto (*q.v.*), the violinist. She continued to sing at Covent Garden until about 1770, when she took to touring with her husband. She sang in Dublin in 1773, as Urganda in Michael Arne's 'Cymon,' and in 'Artaxerxes,' but made no impression. On Apr. 22, 1785, she appeared for one night in 'Comus' at Covent Garden for the benefit of Hull, the stage-manager. She outlived her powers, died poor at 6 Vauxhall Walk and was buried in St. Margaret's Church, Westminster (*D.N.B.*). W. H. H., with addns.

BRETON, Tomas (*b.* Salamanca, Dec. 29, 1850; *d.* Madrid, Dec. 2, 1923), one of the most eminent of modern Spanish composers; his fame is mainly based upon a series of operettas (*zarzuelas*), of which he produced ten between 1875 and 1896.

Among the best of them are 'Los Amantes de Teruel' (Madrid, 1889), 'La Dolores' (Madrid, 1895), and the popular and enjoyable 'La Verbena de la Paloma.' An oratorio, 'Apocalipsia,' was given in Madrid in 1882. Breton's chamber music is masterly in design, and, for its period, bold in harmonic treatment; his trio in E is a work of considerable originality. He also composed 3 string quartets, a pianoforte quintet, and a sextet for wind instruments. His symphonic works include 'Las Escenas andaluzas,' 'Salamanca,' 'En la Alhambra,' and a violin-concerto dedicated to the memory of Sarasate. The brilliance of these has somewhat faded.

M.; addns. J. B. T.

BREUNING, a family mainly interesting for its connexion with Beethoven.

(1) Emmanuel Joseph (*b.* 1741; *d.* Jan. 15, 1777), fourth son of Christoph von Breuning, who in 1761 was Chancellor of the Commandery of the Teutonic Order at Mergentheim, became at 20 a 'Conseiller actuel' at the court in Bonn, and, Jan. 3, 1750, married Hélène, daughter of Hofrath Stephan von Kerich. The good influence of this excellent woman upon the young Beethoven renders pertinent a word upon her character. She was brought into close relations with the literary and scientific circles of the little capital, and was a woman of singular good sense, culture and refinement.

On Jan. 15, 1777, a fire in the Electoral Palace caused the death of thirteen persons, including Emmanuel Joseph Breuning, in the 36th year of his age. His widow, who had just entered her 28th year, was left with three children — Christoph (*b.* May 13, 1771), Eleonore Brigitta and Stephan; to whom a fourth was added a few months later—Lorenz (Lenz).

She remained in the house where her husband died, which is still standing, across the square from the Minster Church. Immediately after the death of Emmanuel, his brother, Canon Lorenz, came from Neuss to reside with her as guardian.

Into this family, in his 18th year, Beethoven came first as music-teacher of Eleonore and Lenz, and soon almost as a member of it. (See *ante*, p. 260). The good influence upon his intellectual development and moral character of this intercourse with the Breunings cannot be overrated, and a short notice of the members of that household more closely connected with him will not be out of place.

(2) Eleonore Brigitta (*b.* Apr. 23, 1772; *d.* Coblenz, June 13, 1841), married Franz Gerhard Wegeler, Beethoven's biographer, at Beuel, Mar. 28, 1802. (See *ante*, p. 263).

(3) Stephan (Lorenz Joseph Judas Thaddeus) (*b.* Aug. 17, 1774; *d.* June 4, 1827), the well-known friend of Beethoven in later years, also studied jurisprudence at Bonn and Göttingen. Shortly before the fall of the Electorate, Max Franz, Elector of Cologne and Grand Master of the Teutonic Order, gave him a position in the Order at Mergentheim. A grand chapter held in Vienna in the summer of 1801 brought Stephan Breuning thither in the spring of that year, where he renewed his intimacy with Beethoven, begun in their boyhood, when both were pupils of Franz Ries for the violin. As the Teutonic Order no longer afforded the opportunity of a career, Stephan obtained a place in the Austrian War Office, and in 1818 advanced to the dignity of Hofrath. (See Beethoven.) He was twice married, first to the daughter of Ritter von Vering, head of the Austrian military medical administration. She was a pupil of Schenk the composer, a fine pianist, and author of divers little compositions. Beethoven—who had often played duets with her—dedicated the interesting pianoforte arrangement of the violin concerto to her. She was born Nov. 26, 1791, and died, says the epitaph composed by her husband, 'On the 21 Mar. 1809, in the eleventh month of happy wedded life, at the moment of the entrance of spring.' The second wife was Marie Constanze Ruschowitz (*b.* Dec. 1, 1784; *d.* Oct. 5, 1856), who left one son and two daughters.

(4) Lorenz (Lenz) (*b.* 1777; *d.* Apr. 10, 1798), studied medicine at Bonn and Vienna—whither he came in 1794 and renewed his musical studies with Beethoven. At parting the then young composer wrote in his album to this effect:

'Truth exists for the wise,
Beauty for the feeling heart!
They belong to each other.

Dear good Breuning!

Never shall I forget the time which in Bonn as well as here I have spent with thee. Retain thy friendship for me, so as thou wilt find me ever the same. Vienna 1797 on the 1st October.

Thy true friend
L. v. Beethoven.'

Their separation was final, for next April young Breuning died.

(5) Moritz Gerhard (*b.* Vienna, Aug. 28, 1813), son of Stephan and Constanze (Ruschowitz), was 'k.k. Medicinalrath,' and for many years was one of the most eminent physicians of the Austrian capital. He is known in musical literature by his extremely interesting and valuable little book, *Das Schwarzspanierhaus*, a collection of reminiscences of Beethoven and the Breunings. (See *ante*, p. 310.) He was for many years an active and influential member of the governing body of the great Gesellschaft der Musikfreunde. (See Vienna.)

Letters from Beethoven to various Breunings —the widow, Christoph, Eleonore, Stephan, Lenz and Gerhard—are given in Nohl's *Briefe Beethovens* and in *Neue Briefe Beethovens*.

Beethoven dedicated the following works to members of this family:

To Fräulein Eleonore the variations on 'Se vuol ballare' for PF. and violin (July 1793), and the easy sonata for PF. solo in C major (1796). Nottebohm's Catalogue, p. 148.

To Stephan the violin concerto, op. 61 (Mar. 1809); and to Frau v. B. the adaptation of the same for piano. An allegro for violin and orchestra was dedicated to Dr. G. von Breuning. See catalogue of Beethoven's works, No. 148. (See Thayer's *Beethoven*, i. 162, etc.) A. W. T.

BRÉVAL, Lucienne (*b.* Berlin, Nov. 4, 1869) (real name Berthe Agnes Lisette Schilling), dramatic singer, of Swiss nationality, naturalised French, a pupil at the Geneva Conservatoire (1st piano prize) before entering that of Paris. Having there studied singing with Warot, and lyrical declamation with Obin and Giraudet, she obtained the 2nd prize for singing and 1st for opera, both in 1890. She belonged to the Paris Opéra for nearly 30 years; her début was particularly brilliant in Meyerbeer's 'Africaine' (Jan. 20, 1892), but her name is more particularly connected with the production of the Wagner repertory in Paris ('Tannhäuser,' 'Meistersinger,' 'Parsifal'), and above all with her performance as Brünnhilde in 'Der Ring des Nibelungen' ('Walküre,' May 12, 1893). This was the memorable foundation of her career. Her other rôles included works of Reyer ('Sigurd,' 'Salammbô'), Massenet ('Le Cid,' 'Ariane,' 'Griselidis'), Février ('Monna Vanna'), V. d'Indy ('Fervaal,' 'L'Étranger'), G. Fauré ('Pénélope'), etc. Of 'Carmen' she gave a picturesque interpretation, and she excelled in classical music such as Gluck's 'Armide,' 'Iphigénie en Aulide' and Rameau's 'Hippolyte et Aricie.' In London she sang the 'Africaine' and 'Huguenots' (1899), and toured in America (1901). Her voice was powerful, rich in tone and colour, of the real dramatic kind. By her sense of style, her intelligence and her imposing figure, she was an admirable interpreter of opera.

Bibl.—*Nouvelle Revue* (July 15, 1920); H. de Curzon, *Croquis d'artistes, Lucienne Bréval.* M. L. P.

BREVE (Fr. *carrée*; Ital. *breve*), a note of the value of two semibreves, written ||𝅜|| or 𝅜. In modern music the duration of the sound of any note varies with the *tempo* of the composition in which it occurs, but formerly attempts were frequently made to define the duration of a breve. Franco of Cologne described it as 'illud quod est minimum in plenitudine vocis,' and Marchettus of Padua rather more fully as 'id minimum tempus in quo potest formari plenitudo vocis.' In an old Psalm Book of 1688 a breve is said to be 'about the duration of eight pulses at the wrist of a person in good health and temper.' The breve is now seldom used, and the old sign is being superseded by two tied semibreves: 𝅜𝅜 (see Notation).

F. T.; rev. S. T. W.

BREVI, Giovanni Battista (2nd half of 17th cent.), maestro di cappella at S. Francesco, S. Fedele, and at the church of del Carmine at Milan. In 1673 he was organist, and afterwards maestro di cappella at Bergamo Cathedral, according to his motets, published 1699 (*Fétis*). Eitner gives the dates from title-pages as: 1691, maestro ed organista del duomo di Bergamo; 1695 and after, maestro di cappella at the basilica of S. Francesco and at del Carmine, Milan. Brevi composed motets and several books of cantatas and ariettas for solo voice, published between 1693–1725 (*Q.-L.*).

BRÉVILLE, Pierre Onfroy de (*b.* Bar-le-Duc, Meuse, Feb. 21, 1861), French composer, was at first intended for the diplomatic career, but was allowed to enter upon a course of musical instruction (harmony) in the class of Th. Dubois at the Paris Conservatoire. Having determined to devote himself to art alone, he became pupil of César Franck, whose whole-hearted admirer and faithful disciple he remained. He took part, with V. d'Indy, A. Coquard, S. Rousseau and E. Chausson, in the work of completing the opera 'Ghisèle,' left unfinished at the master's death. He belonged to the teaching-staff at the Schola Cantorum, directed a chamber-music class at the Conservatoire during the war period, 1914–18; was music critic for a time to the *Mercure de France*, and held, and still holds, an active post as member of the committee of the Société Nationale de Musique. A composer of essentially lyrical temperament, he would appear to have inherited something of Franck's architectural sense. His music has an originality of its own; delicately ornamented, extremely refined in tone and colour, exquisitely finished, it is marked by real poetic feeling and a melodic inspiration, particularly adapted to the composition of vocal pieces. His remarkable songs: 'Poèmes,' two other volumes, 'Prières' (Rouart et Lerolle, Paris), 'Sainte,' 'L'Ondine,' performed at the Société Nationale, Mar. 22, 1924, are representative of the tradition illustrated by A. de Castillon, Duparc and Chausson in that style. His works include: A Mass, motets, a few organ pieces. For the PF., 'Portraits des maîtres,' 'Stamboul' (also in orchestral form), 'Prélude et Fugue,' 'Fantaisie'; violin sonata (1920); PF. sonata (1923), performed Mar. 20, 1920, Apr. 5, 1924, at the Société Nationale de Musique. He has written a flute piece, vocal compositions with female chorus, 'Ste. Rose de Lima,' 'Hymne à Vénus' and 'Prière' for violin, viola (or v'cl.) and PF. etc.; incidental music to Maeterlinck's *Sept Princesses*, etc.; overture for 'La Princesse Maleine,' 'La Nuit de Décembre' (orchestra). His *conte lyrique* (3 acts, 4 scenes), 'Eros vainqueur,' libretto by J. Lorrain, was first performed at Brussels, Mar. 7, 1910 (Rouart et Lerolle); a concert

performance of it was given by the Schola Cantorum, Paris, in 1922. It may be considered as one of the important French dramatic works at the beginning of the 20th century. His compositions of 1924 are: a sonatina in 3 parts (oboe and PF.) and a 'poème dramatique' for violoncello and PF.; those of 1925 include 'Messe brève pour 1 voix'; 'Sept esquisses for the piano'; and 'La Cloche fêlée' (Baudelaire), for orchestra; some songs (poems by Ronsard and F. Jammes).

M. L. P.; incorporating material from G. F.

BREWER, Sir Alfred Herbert, Mus.D. (*b.* Gloucester, June 21, 1865), has been organist of Gloucester Cathedral since 1896 and conductor of the Three Choirs Festivals held there.

He held a choristership at Gloucester Cathedral from Jan. 1877 to Dec. 1880, and studied under Dr. C. H. Lloyd, organist of the cathedral.

After holding organ appointments in succession at two Gloucester churches — St. Catherine's and St. Mary de Crypt, 1881–82—he succeeded Parratt as organist of St. Giles's Church, Oxford, in Sept. 1882. In Dec. 1883 he obtained the organ scholarship of Exeter College, Oxford, which he held concurrently with the organistship at St. Giles. In the meantime (Apr. 1883) he had gained the first open organ scholarship at the R.C.M., where he studied under Parratt.

Brewer was elected organist of Bristol Cathedral in Sept. 1885, and a year later he became organist of St. Michael's Church, Coventry. In Sept. 1892 he was appointed organist and music-master to Tunbridge School; this post he held till Dec. 1896, when he succeeded C. Lee Williams as organist and choir-master of Gloucester Cathedral. F. G. E.

Brewer's most important public work has been in his direction of the triennial festivals held at Gloucester. He has shown constant enterprise in the framing of its programmes, and amongst many new works has introduced to these festivals the choral works of Verdi and oratorios of Elgar. Apart from the festivals he has used his position for the furtherance of musical activity outside the regular services of the cathedral. His organ recitals have been a definite source of musical education and the Gloucester Orchestral Society has provided symphonic music periodically under his direction.

Brewer has been an assiduous composer and his long list of works ranges from festival cantatas to songs of a popular type. Among the former, 'Emmaus' (Gloucester, 1901) and 'The Holy Innocents' (Gloucester, 1904) represent his serious aspirations, but such slight works as 'Three Elizabethan Pastorals' for voice and orchestra (Hereford, 1906), 'Summer Sports,' a suite for choir and orchestra (Gloucester, 1910), and 'Jillian of Berry' pastorals (Hereford, 1921), which allow of light handling and show a pleasant orchestral fancy, represent him more favourably. As a composer indeed he seems happier in the concerts of the Shire Hall than in the cathedral. He received knighthood in 1926. C.

BREWER, Thomas (*b.* 1611), the son of a poulterer, was educated at Christ's Hospital, being admitted at the age of 3 years; he remained there until 1626, when he was apprenticed to Thos. Warner.

He was the composer of several excellent fantasias for the viol, and of the pretty 3-part song 'Turn Amaryllis,' inserted by Playford in his *Musical Companion*; and many rounds and catches of his are printed in Hilton's 'Catch that Catch can.' In Harl. 6395, entitled 'Merry Passages and Jests,' compiled by Sir Nicholas Lestrange, is the following anecdote respecting him:

> 'Thom: Brewer, my Mus: seruant, through his Pronenesse to good-Fellowshippe, hauing attaind to a very Rich and Rubicund Nose; being reproued by a Friend for his too frequent vse of strong Drinkes and Sacke; as very Pernicious to that Distemper and Inflammation in his Nose—"Nay, faith," says he, "if it will not endure sacke, it's no Nose for me."'

Three instrumental pieces by him are in the Bodl. Mus. Sch. and two in Elizabeth Rogers's Virginal Book (B.M. Add. MS. 10,337). (*D.N.B.*)

E. F. R.

BRIAN, Havergal (*b.* Staffordshire, 1877), composer, studied the violin, violoncello and organ at his native place, but, although evincing considerable talent, found no opportunity of devoting himself permanently to music until he had reached the age of 23. He then came into contact with G. J. Halford, conductor of the Halford Orchestra at Birmingham, who gave him access to the orchestra library for the purpose of studying scores, and he gained a good deal of orchestral experience by attending the rehearsals and concerts.

The *Musical World* being revived as a weekly paper at Manchester in 1905, Brian was offered the post of special critic for the Hallé Concerts. Mainly self-taught, he had by this time developed into an accomplished musician. Soon the first 'English Suite' for orchestra was finished, and produced by Henry J. Wood at Queen's Hall in 1907. To this succeeded the overture, 'For Valor,' and 'Hero and Leander,' performed by Thomas Beecham at Hanley in 1908. In 1909 two choral works appeared: 'By the Waters of Babylon,' at the Musical League Festival in Liverpool, and 'The Vision of Cleopatra,' at the Southport Triennial Festival. In 1913 Julius Harrison introduced the Comedy Overture, 'Doctor Merryheart,' to Birmingham, and the following year Granville Bantock gave the first performance of the 'Festal Dance' at the same place. In 1921 were included three first performances of orchestral works: 'Fantastic Variations on Old Rhymes' at Brighton (Lyell Tayler), the

symphonic poem, 'In Memoriam,' at Edinburgh (Landon Ronald), and the third 'English Suite' at Bournemouth (Dan Godfrey). The first London performance of the 'Festal Dance' was given by Thomas Beecham in June 1915, and this work and 'Doctor Merryheart' were included in Henry J. Wood's repertory at Queen's Hall.

A number of songs and short choral works by Havergal Brian have been published, and the following are among his MSS. :

Opera, 'The Grotesques'; Psalm for chorus and orchestra; Ballad for chorus and orchestra, 'Die Wallfahrt nach Kevlaar' (Heine); a Symphony; two Symphonic Dances, 'Lacryma' and 'Green Pastures'; works for small orchestra; songs and part-songs.

E. B.

BRIARD, ÉTIENNE (*b.* Bar-le-Duc towards end of 15th cent.), an engraver of music who settled at Avignon in 1530.

He replaced the square characters hitherto in use by round ones, and devised a simple means of expressing the duration of a note, instead of the complicated system of ligatures. Peignot, in his *Diction. de la bibliologie*, supp. p. 140, claims priority in these inventions for Granjon, also a printer; but Briard's characters are certainly better formed and easier to read. A facsimile of them may be seen in Schmidt's *Ottaviano Petrucci*. He furnished the printer, Jean de Channey, with the types used in the printing of the works of Eleazar Genêt called 'Il Carpentrasso.' The *Liber primum missarum Carpentras* appeared in 1532. It is in the library of the Conservatoire, Paris. A descendant of his was Jean Baptiste Briard (*b.* Paris, May 15, 1823), a violinist and composer.

F. G.; rev. M. L. P.

BRIDGE, the wooden support on the table of stringed instruments across which the strings are extended. The bridge was first used on the Greek MONOCHORD (*q.v.*), on which it was moved as might be required for changing the pitch; and the bridge remains in most instruments a movable fitting, though those of the guitar and lute are fixed. (See CRWTH and TROMBA MARINA for the peculiarities of the bridges of these instruments.)

In bowed instruments the bridge is an essential part of the tone-producing apparatus, its complement being furnished by the sound-post placed within the instrument.

Uniform in design as the bridge of modern stringed instruments appears outwardly, its two halves, each terminating in a foot resting on the table, perform two entirely different functions. The treble or fixed foot rests firmly upon the table, a fraction of an inch above the sound-post, a cylinder of resonant wood inserted between the back and table of the instrument. The bass, or freely vibrating foot, agitates the elastic table of the instrument, and through it the internal air. The point of maximum vibration of the table of a violin is near the bass foot of the bridge under the G string; that of minimum vibration is exactly over the top of the sound-post, behind the treble foot. It is easy to trace the development of the violin bridge, the most advanced type, the oldest form, which is also the simplest, having been preserved in the common double-bass bridge. The wings were extended, the heart or central hole was cut

Double-bass. ½ actual size. Violoncello. ⅛ actual size. Violin. ⅓ actual size.

out, and these features were fixed by experiment so as to favour as much as possible the transmission to the table, through the feet, of such vibrations as are efficient in producing musical tone, and to exclude useless vibrations —those, for example, which would tend to give a rocking motion to the bridge being counteracted by the greater elasticity given to the upper part of the bridge as compared with the lower. The violin bridge was reduced to nearly its present form in the time, and probably by the ingenuity, of the brothers Antonio and Geronimo Amati.

The height of the bridge differs in the various instruments, being proportionate to the depth of the ribs and the length of the sound-post. Thus the bridge of the violin and tenor is mounted on feet not surmounted by legs, the body of the bridge being very slightly elevated above the table of the instrument. The viol model, in all its sizes, like the violoncello, requires a bridge having not only feet but legs of variable length, the body of the bridge being thus elevated on a well-defined arch. Bridges are usually made of maple, and in order to bring out the tone in different instruments the thickness and the amount of cutting out require careful examination and expert judgment. It is a mistake to cut the heart or central hole too large, and the feet or legs of the bridge too thin; but repairers often do this to save themselves trouble, as by a liberal use of the knife in these respects almost any instrument can be made to yield a more or less liquid tone. Some instruments require broader and others narrower bridges. The feet must exactly fit the table of the instrument, the centre of the bass foot should be over the centre of the bass-bar, and the centre of the treble foot over those fibres of the table which pass over the top of the sound-post (the sound-post itself standing a little in the rear). The width of the bridge, as a rule, should not exceed the width between the sound-holes, and it should stand on a line exactly bisecting the superficial area of the table, and precisely at right angles to the axis of the violin. Violin makers make two nicks in the middle of each sound-hole which are supposed to indicate

such a line, but these are not always to be relied on. E. J. P.

BRIDGE, Frank (*b.* Brighton, Feb. 26, 1879), composer, conductor and viola-player, entered the R.C.M. as a violin student, won a composition scholarship in 1899, and studied four years with Stanford. His first engagement was as violinist in the Grimson Quartet; subsequently he became known as a viola-player, in which capacity he took the place of Wirth in the Joachim Quartet during an illness in 1906 and subsequently joined the English String Quartet, with which he remained associated until 1915. Meanwhile he had gained experience as a conductor with the New Symphony Orchestra at its foundation, taking charge of the repertory rehearsals. He conducted opera at the Savoy Theatre in 1910–11, when Marie Brema produced 'Orfeo' with Viola Tree as Eurydice, and was one of Raymond Roze's conductors in the season of opera he gave at Covent Garden in 1913. He has regularly conducted the Audrey Chapman Orchestra, and has frequently conducted at Queen's Hall the Philharmonic, London Symphony and other principal orchestras, generally through being called upon in an emergency. In 1923 he visited the United States, conducting his own compositions with the New York, Boston, Cleveland and Detroit Symphony Orchestras.

As a composer it is chiefly in the field of chamber music that Frank Bridge has made his reputation. Under the conditions prevailing in England an orchestral work, however well received, may not have more than two or three performances in a dozen years, whereas chamber works are constantly played in private if not in public. Most of Bridge's orchestral works have met with the former fate, with the exception of the 'Sea' Suite, published under the auspices of the Carnegie Trust, and the 'Lament' for strings in memory of a child victim of the Lusitania tragedy. Four of his chamber works appeared under various schemes initiated by W. W. Cobbett (*q.v.*): Fantasy string quartet (2nd prize, 1905), Fantasy-Trio (1st prize, 1908), Fantasy Quartet, piano and strings (commissioned in 1910), and the second string quartet in G minor (prize-work, 1915). It should, however, be noted that the last-named work was not specially written for the occasion, but was nearing completion when the competition was announced. The first string quartet (in E minor) won a *mention d'honneur* at Bologna in 1906. Other important works are the piano quintet composed in 1905, and afterwards revised, and the string sextet of 1915. Bridge has also written a violoncello sonata, and one for piano solo (produced by Myra Hess, 1926). Of his numerous piano pieces some represent an earlier technical stage, and some, such as the 'Four Characteristic Pieces' and 'Three Poems,' later developments. In the same manner some earlier songs, written when Bridge's ideas were comparatively simple, benefited by their belated publication, which caused them to appear when the time was ripe for them, thus giving the impression that the maturer Bridge was making concessions to his public, which he had no intention of doing. Bridge remains faithful to the logic of the exceptionally fine technique he acquired early in his career, and does not find his orthodoxy an impediment to originality of thought. He also has a more scrupulous regard than most of his contemporaries for the performers who, especially in chamber music, invariably enjoy playing his works. These characteristic qualities, which doubtless derive to some extent from Bridge's own experience as an executant, are the basis of a style that nevertheless has much freedom combined with its classic breadth and formal coherence. E. E.

ORCHESTRAL

1907. Symphonic Poem, 'Isabella.'
1908. Dance Rhapsody.
1909–10. Suite for string orchestra.
1910. Five Entr'actes, 'The Hunchback.'
1910–11. Suite, 'The Sea' (Carnegie Trust).
1913. Dance Poem.
1914. Tone-Poem, 'Summer.'
1915. Lament for string orchestra (also arranged for pianoforte solo).
1915. Two Poems (Richard Jefferies).
1922. Sir Roger de Coverley (orchestral version).

CHAMBER MUSIC

1904. Three Novelettes (string quartet).
1905. Phantasy String Quartet.
1905. Quintet (pianoforte and strings).
1906. Three Idylls (string quartet).
1906. String Quartet in E minor (Bologna).
1906. Miniatures (easy) for pianoforte, violin and v'cl.
1908. Phantasy Trio (pianoforte, violin and v'cl.).
1908. An Irish Melody (Londonderry air) for string quartet.
1910. Phantasy Quartet (pianoforte, violin, viola and v'cl.).
1912. Sextet (2 violins, 2 violas and 2 v'cls.).
1913–17. Sonata for violoncello.
1915. String Quartet in G minor.
1916. 'Sally in our Alley,' 'Cherry Ripe' (string quartet).
1921–24. Pianoforte sonata.
1922. Sir Roger de Coverley (string quartet).

'Blow out, you Bugles.' 1918.

BRIDGE, (1) Sir John Frederick, Mus.D. (*b.* Oldbury, near Birmingham, Dec. 5, 1844; *d.* Westminster, Mar. 18, 1924), was for 36 years organist of Westminster Abbey and held many important appointments in London.

When Bridge was 6 years old his father, John Bridge (*d.* Chester, Sept. 1, 1893) obtained a lay clerkship at Rochester Cathedral. Here the child entered the Cathedral choir as a 'practising boy' (*i.e.* a probationer) under J. L. Hopkins. At 14 he was articled to John Hopkins, who had succeeded his cousin in the organistship of the Cathedral. His first organist appointment was at Shorne Church, a village between Rochester and Gravesend. A year later (in 1862) he became organist of Strood Parish Church; in 1865 he removed to Holy Trinity Church, Windsor, and became a pupil of John Goss. During his Windsor period he qualified for the Fellowship of the Royal College of Organists (1867), and took the degree of Mus.B. at Oxford (1868).

In 1869 Bridge was appointed organist of Manchester Cathedral, a post he held with distinction for six years. At Manchester he held the Professorship of Harmony at Owens College from 1872–75, and took his doctor's degree at Oxford in 1874; for his exercise he composed the oratorio 'Mount Moriah.'

Upon the retirement of James Turle from the active duties appertaining to the organistship of Westminster Abbey, Bridge was appointed Permanent Deputy-Organist in the autumn of 1875; on the death of Turle (June 28, 1882) he succeeded to the full title. He took part in many important services held within those historical walls. Chief among these were Queen Victoria's jubilee service (June 21, 1887), the coronation of King Edward VII. (Aug. 9, 1902), and that of King George V. (June 22, 1911); for each of these events he arranged all the music that was performed, and composed an anthem. Of greater musical interest were the special services commemorative of the great masters of English church music which Bridge organised and conducted, and for which he edited the music. These included the bicentenary of Henry Purcell's death (1895), the centenary of S. S. Wesley's birth (1910) and the Orlando Gibbons celebration (1907).

In 1876 Bridge was appointed to the teaching staff of the National Training School of Music and joined the Board of its successor, the R.C.M., on its formation (1883), as professor of harmony and counterpoint. In May 1890 he was elected Gresham Professor of Music; in 1896 he succeeded Barnby as conductor of the Royal Choral Society; and in 1903 he was appointed first King Edward Professor of Music in the University of London. He conducted the Highbury Philharmonic Society from 1878–86, the Western Madrigal Society and the Madrigal Society. He was a prominent member of the Musicians' Company and chairman of TRINITY COLLEGE OF MUSIC (*q.v.*). He retired from active service in the Abbey with the title of 'emeritus organist' in 1918, and from the conductorship of the Royal Choral Society in 1922.

On the occasion of Queen Victoria's Diamond Jubilee (1897) he received at her hands the honour of knighthood, and the clasp to the Jubilee medal; at the coronation of 1902, King Edward VII. made him a member of the Victorian Order, to which King George V. added (1911) the Companionship of the Order.

The list of Bridge's activities, by no means a complete one, shows his career to have been one of untiring energy. That, combined with personal characteristics, an impulsive temperament, a ready wit, a warm-hearted generosity towards his friends and a healthy determination to baffle his foes, earned him the high reputation he enjoyed. His compositions are numerous, but amongst them none has had so great a vogue as his humorous partsong 'Bold Turpin.' Some of his larger works, however, such as 'The Flag of England' and the 'Forging of the Anchor' have been popular, and his church music is widely used. His primers on technical subjects have been valuable to students, but his more discursive writings, especially his autobiography *A Westminster Pilgrim* (1918), have been enjoyed by many outside the musical profession.

The following is a list of Bridge's major publications:

'Mount Moriah,' oratorio, 1874; 'Boadicea,' cantata, Highbury Philharmonic Society, May 31, 1880; 'Hymn to the Creator,' motet for soprano solo and chorus, Highbury Philharmonic Society, May 7, 1883; 'Rock of Ages,' Gladstone's Latin translation of Toplady's hymn, Birmingham Festival, Aug. 27, 1885; concert overture for orchestra, 'Morte d'Arthur,' Stockley's concert, Birmingham, May 6, 1886; 'Callirrhoë,' cantata, libretto by W. Barclay Squire, Birmingham Festival, Aug. 30, 1888; 'Repentance of Nineveh,' dramatic oratorio, libretto by Joseph Bennett, Worcester Festival, Sept. 11, 1890; 'The Lord's Prayer,' Gloucester Festival, Sept. 7, 1892; 'The Cradle of Christ' (Stabat Mater Speciosa), Hereford Festival, Sept. 12, 1894; 'The Flag of England,' a setting of Rudyard Kipling's poem, Royal Choral Society, May 6, 1897; 'The Ballad of the Camperdown,' Rudyard Kipling's words, Royal Choral Society, Dec. 7, 1899; and 'The Forging of the Anchor,' dramatic scene for baritone solo and chorus, Gloucester Festival, Sept. 11, 1901; two choral ballads, 'The Festival' (men's voices) and the 'Inchcape Rock.'

LITERARY WORKS

Counterpoint (Novello's Primers); *Double Counterpoint* (Novello's Primers); *Organ Accompaniment* (Novello's Primers); *Musical Gestures* (Novello's Primers); *A Course of Harmony* (with Sawyer) (1899); *Samuel Pepys, Lover of Music* (1903); *A Westminster Pilgrim* (1918); *Twelve Good Musicians* (1920).

F. G. E.; with addns. C.

(2) JOSEPH COX, Mus.D. (*b.* Rochester, Aug. 16, 1853), brother of the foregoing, and youngest son of John Bridge, became a chorister in Rochester Cathedral, and subsequently assistant organist to his master, John Hopkins. He was afterwards a pupil of and assistant to his brother John Frederick at Manchester Cathedral.

In 1871 he obtained the post of organist of Exeter College, Oxford; he graduated there B.A. 1875; Mus.B. 1876; M.A. 1878; Mus.D. 1885. He became a Fellow of the Royal College of Organists in 1879, and is an Hon. Member of the R.A.M.

In 1877, on the resignation of Frederick Gunton, Bridge was appointed organist of Chester Cathedral, the duties of which office he

discharged with marked success and efficiency until his retirement in 1925. In 1879 he resuscitated the Chester Musical Festivals, which had been dormant for 50 years. These music-meetings were held triennially (in June or July) from 1879–1900. Dr. Bridge not only conducted these festivals with undoubted skill, but as hon. secretary he showed organising zeal and the possession of business capacity in a high degree. He has written an interesting historical pamphlet on the festivals. For many years he gave free organ recitals in the Cathedral on Sunday evenings, which were much appreciated, and his influence on the music of the city has been for its good. He founded the Chester Musical Society, and conducted and financed it successfully for twenty years. From 1886–1889 he conducted the Bradford Festival Choral Society, and he officiated in a similar capacity for Hallé at Bristol and other places. In 1908 he was appointed Professor of Music in Durham University, and he only left his cathedral appointment to undertake the direction of Trinity College of Music (*q.v.*).

Bridge's compositions include :

'Evening Service in C,' with orchestral accompaniment, Chester Festival, July 23, 1879; 'Daniel,' an oratorio, composed for his doctor's degree (1884), and performed at the Chester Festival, July 23, 1885; 'Rudel,' a cantata, Chester Festival, July 22, 1891; 'Symphony in F,' Chester Festival, July 26, 1894; 'Resurgam,' cantata, Chester Festival, July 23, 1897; 'Requiem Mass,' Chester Festival, July 26, 1900; an operetta, 'The Belle of the Area,' anthems, organ and pianoforte music, songs, etc.

Dr. Bridge read a paper on *Ludlow and the Masque of Comus* before the Chester Archæological Society, Jan. 31, 1902. (See Chester Musical Festival.) F. G. E.

BRIDGE, or BRIDGES, Richard (*d.* before 1776), enjoyed some celebrity as an organ-builder, but little is known of his biography. He is supposed to have been trained in the factory of the younger Harris, and to have been living in Hand Court, Holborn, in 1784. His first organ seems to have been that of St. Bartholomew the Great, in 1729, and his best instrument was that for Christ Church, Spitalfields, London, 1730. (See also Organ, and Byfield, Jordan & Bridge.) V. de P.

BRIDGETOWER, George Augustus [1] Polgreen (*b.* 1779 or 1780 [2]; *d.* Peckham, Feb. 29, 1860), violinist, a mulatto, son of an African father (known in London by the sobriquet of 'the Abyssinian Prince') and a European mother, made his first appearance as a violinist at the Concert Spirituel, Paris, Apr. 13, 1789; he appeared several times in England; and at Drury Lane on Feb. 19, 1790, he played a violin solo between the parts of the 'Messiah.'

This probably attracted the notice of the Prince of Wales, since on June 2 following he and Franz Clement (*q.v.*) gave a concert under the patronage of H.R.H. In the same year he also played at the 'Professional Concerts.' Bridgetower became a pupil of Barthélemon, Giornovichi and Attwood, and was attached to the Prince's establishment at Brighton as a first violin-player. His name is found among the performers at the Haydn-Salomon Concerts of 1791, and at concerts of Barthélemon's in 1792 and 1794, where he played a concerto of Viotti. At the Handel Commemoration of 1791, Bridgetower and Hummel sat on each side of Joah Bates at the organ, clad in scarlet coats, and pulled out the stops for him. On Oct. 31, 1793, he played at Clagget's concert at the King's Arms, Cornhill.[3] In 1802 he obtained permission to visit his mother at Dresden, where she was living with another son, a violoncello-player. In Dresden he gave concerts on July 24, 1802, and Mar. 18, 1803; and from thence went to Vienna, where his reputation preceded him, and where he played the sonata op. 47—known as the 'Kreutzer Sonata'—with Beethoven, on the 17th or 24th May. After this he returned to England, and in June 1811 took the degree of Mus.B. at Cambridge, his exercise, an anthem, being performed at Great St. Mary's on June 30. He played at the Philharmonic in the first season, 1813. He lived abroad, at Rome, Paris, etc., for many years, and visited England in 1843.

Bridgetower has left a memorandum of the performance of the sonata which, if it can be believed, is interesting. He introduced an alteration of one passage which so pleased Beethoven that he jumped up from his seat, threw his arms round Bridgetower, and cried, '*Noch einmal, mein lieber Bursch*'—'Once more, my dear fellow.' Czerny has left on record that Bridgetower's gestures in playing were so extravagant and absurd that no one could help laughing. The memorandum just mentioned is given by Thayer (*Beethoven*, ii. 229); and further details will be found at pp. 227-31 and 385-91. See also Pohl's *Haydn in London*, pp. 18, 28, 38, etc. — Beethoven writes 'Brischdower.' G.

BRIDLINGTON acquired a fleeting importance in music by reason of its festivals, which took place in consecutive years from 1894–1901, with a ninth and last in 1903. They owed their inception and their carrying into effect entirely to an enthusiastic amateur, A. W. M. Bosville (now Sir Alexander Macdonald of the Isles, Bart.), who was his own conductor, programme-analyst, and, not the least important, chancellor of the exchequer.

[1] The name Augustus rests upon a document printed by Thayer, who also gives various forms of signature, as 'George Bridgetower' and 'George Polgreen Bridgetower.' Some compositions in the British Museum are signed 'G. H. P. Bridgetower,' and these initials are confirmed in the account in the *Gentleman's Magazine*. It is not absolutely certain, but very probable, that the Cambridge Mus.B. was the same person as the mulatto violinist. (See *Mus. T.*, May 1908, p. 302.)

[2] Biala, Poland, has been given as Bridgetower's birthplace, but Dr. Grattan Flood calls attention to the announcement of his début at the Concert Spirituel on Apr. 13, 1789, as follows: 'Né aux colonies anglaises, âgé de 9 ans.' (See also *Mus. T.*, May 1908.)

[3] Clagget's *Discourse on Musick*, p. 14.

They were so far a one-man show, that when he was unable to carry them on they lapsed. With a local chorus and an orchestra of Yorkshire players many important choral and orchestral works were given. The principals came from a wider field, and Miss Agnes Nicholls made some of her very earliest appearances at the festivals. Mrs. Bosville—as she then was—a well-trained amateur vocalist, frequently appeared as a soloist, and Mr. Bosville found an invaluable ally in John Camidge of Beverley, who contributed several compositions to the programmes. The unique feature of the festival was, however, the conductor's own programme analyses, which presented some very sound comments under a vein of airy persiflage that was in strong contrast to the dry-as-dust character of most such compilations. H. T.

BRIEGEL, Wolfgang Karl (*b.* Nuremberg, May 21, 1626; *d.* Darmstadt, Nov. 19, 1712), church composer.

He was at first a choir-boy at Nuremberg; then organist at Stettin, and afterwards (see the title-page of his then published works) music-director to Prince Friedenstein in Gotha, and in 1660 Kapellmeister to the Duke of Saxe-Gotha.

In 1670 he was called to Darmstadt as Kapellmeister to the Landgrave of Darmstadt, where he remained till his death. Among the effects of Emanuel Bach was a portrait of Briegel, engraved by Nessenthaler; it represents a man of about 65, of healthy and jovial aspect. Schneider (*Das musik. Lied*, iii. 155) says, that

'perceiving the fashion of solo songs like those of Ad. Krieger and the two Ahles to be on the wane, he returned to the composition of songs for several voices; he wrote, in fact, incessantly in all sorts of styles with much fluency but no originality, and with no adequate return for his labours.'

His principal compositions consisted of sacred songs for several voices, mostly to his own words. One of his works alone, for 3 and 4 instruments (Erfurt, 1652), contains 10 Paduanen, 10 Gagliarden, 10 Ballette, and 10 Couranten. His one secular work, 'Musikalisches Tafel-Confect' (Frankfort, 1672), consists, according to its quaint title, of 'pleasant Conversations and Concertos.' His Hymn-book for Darmstadt appeared in 1677. His published works, 31 in number (see *Q.-L.*), end with 'Letzter Schwanen-Gesang,' consisting of 20 Trauergesänge for 4 or 5 voices (Giessen, 1709). C. F. P.

Bibl. — Friedrich Noack, *Wolfgang Carl Briegel als Liederkomponist*, *Z.M.W.*, June 1919, pp. 523-6.

BRIGGS, Rawdon Christopher (*b.* Wakefield, Yorks., 1869), English violinist. As a boy he travelled a good deal and acquired the elements of a musical education in Geneva and Florence. Serious study began in 1882, when he was accepted as a pupil by Edmund Singer in Stuttgart. In 1897 he entered the Berlin Hochschule, where he studied at first under professor de Ahna and later under Joachim. He returned to England in 1891 and in the following year was appointed professor of the violin at the Manchester College of Music. He joined the Hallé orchestra shortly after and became its leader in 1904. Briggs has also led the Liverpool Philharmonic orchestra (1905) and was for many years second violin of the Brodsky Quartet. His own quartet was well known in the North of England and has also been heard in London. All these activities left little time for solo playing, but wherever Briggs has appeared as soloist he has invariably won the applause of his listeners by a style which is at once warm and of impeccable purity. F. B.

BRIGHENTI (Brighetti), Mme. Maria (*née* Giorgi) (*b.* Bologna, 1792), a celebrated singer, first appeared at Bologna in 1814. She created the part of Rosina at the first performance of 'Il Barbiere di Siviglia' (Rome, 1816); and for her Rossini wrote 'La Cenerentola.' She sang in the principal towns of Italy, and retired in 1836. Mme. Brighenti embodied her recollections of Rossini, whom she had known from childhood, in an interesting book, *Cenni . . . sopra il Maestro Rossini* (Bologna, 1823). M. C. C.

BRILLANTE (Ital., Fr.), 'brilliant,' a word used in titles, particularly of piano music of the romantic period, as an indication of style in composition and interpretation. Examples are: Weber's 'Rondo brillante,' op. 62; Chopin's 'Variations brillantes,' op. 12.

BRIMLEY (Brimlei), (1) John (*b.* 1502; *d.* 1576), Master of the Choristers and organist of Durham Cathedral during the latter part of his life. There is an epitaph to him in the 'Galilee' chapel at the Cathedral. An account of his conduct during an insurrection in 1569 may be read in West's *Cath. Org.* In MS. there are still preserved in the cathedral library (C 13/189) parts of a Te Deum and Benedictus, and a second composition described as a 'Kyrie to Mr. Shepherd's Creed' (E 4-11).

(Brimle), (2) William, contributed harmonisations to John Day's Psalter, 1563. J. M^{K}.

BRIND, Richard (*d.* Mar. 1717–18), was brought up as a chorister in St. Paul's Cathedral. On the death in 1707 of Jeremiah Clarke, organist of the cathedral, Brind was appointed his successor, and held the place until his death. He composed for occasions of thanksgiving two anthems now wholly forgotten. Dr. Maurice Greene was Brind's articled pupil. W. H. H.

BRINDISI (Ital. *far brindisi*; Span. *brindar*), 'to drink one's health,' a drinking or toasting song. Well-known and popular examples are 'Il segreto' in 'Lucrezia Borgia,' 'Libiamo' in the 'Traviata,' and, in more

modern operas, there are famous instances in 'Otello' and 'Cavalleria Rusticana.'

W. H. C.

BRINSMEAD, (1) JOHN (*b.* Wear Giffard, Devon, Oct. 13, 1814; *d.* Feb. 17, 1908), founder of the firm of pianoforte-makers, John Brinsmead & Sons, of London. He began business at 35 Windmill Street, Tottenham Court Road, in 1836, removing to the neighbouring Charlotte Street in 1841. The next removal was to 18 and 20 Wigmore Street, in 1863, when the present style of the firm was adopted. In recognition of meritorious exhibits in the Paris Exhibition of 1878, John Brinsmead was decorated by the French Government with the cross of the Legion of Honour.

(2) EDGAR (*d.* Nov. 28, 1907), his younger son, has claims to special reference for his *History of the Pianoforte*, with prefatory historical introduction, published by Cassell, Petter & Galpin in 1868, and, partly rewritten, republished by Novello, Ewer & Co. in 1879. The firm became a private limited company in Jan. 1900, John and Edgar Brinsmead being on the board of directors. A. J. H.

On the death of John Brinsmead the controlling interest in the company was purchased by W. Savile, a director of J. B. Cramer & Co., and in 1923 new premises were opened at 17 Cavendish Square, W. C.

BRISTOL MADRIGAL SOCIETY. The establishment of this society in 1837 was one of the fruits of a series of lectures on 'English Vocal Harmony,' given at Bristol by Edward TAYLOR (*q.v.*) between Jan. 5 and 17 of that year. The society was limited to thirty members, who were to meet on alternate Wednesdays at the Montague Inn, to sing such madrigals as had been previously agreed upon by the committee; J. D. Corfe, organist of the Cathedral, was the director, and among the first members was R. L. Pearsall, the eminent madrigal writer. At the first annual dinner in 1838 Sir John Rogers and Thomas Oliphant, president and secretary of the Madrigal Society (London), were present. The custom of holding annual dinners was discontinued after the second, but on each occasion a programme of 21 madrigals was performed. In the same year it was resolved to give a 'Ladies' Night,' and in 1839 the number of these open performances was increased. In Feb. 1841 the Ladies' Nights were suspended, but at the end of 1842 they were begun again at the Victoria Rooms, with an audience of 1200, and have since been continued annually. The number of members was increased to forty-two, and the meetings were held at the Montague till May 1922, since when they have been held at the Bristol Musical Club. The choir consists exclusively of male voices; the boys were for long selected from the cathedral choirs of Bristol, Oxford, Exeter, and other places. Recently outside help has not been sought. Corfe continued to direct the society till March 1865, when he resigned, and was succeeded by D. W. ROOTHAM, who resigned only after conducting his 50th Ladies' Night on Jan. 14, 1915. His successor, Hubert W. Hunt, was appointed on Feb. 10, 1915, and still (1927) holds office. The music sung during the first fourteen years of the society's existence was almost exclusively confined to madrigals. In a repertory of 224 works, 173 belonged to the madrigalian era; of these 126 were English. Thirty-four later works of the type included 19 by Pearsall, and 17 sacred works were sung. At about the time of the centenary of Bach's death his unaccompanied motets, including 'Sing ye to the Lord' (8 v.) were given. The tendency to digress from the true madrigalian repertory to other works, sacred and secular, was opposed by PEARSALL (*q.v.*), but without effect. In 1915, however, a reversion was made to the earlier practice. The following have held the office of president:

Alfred Bleech, 1837; John Hare, 1867; Sir George Edwards, 1882; E. A. Harvey, 1899; P. Napier Miles, 1910; Basil Harwood, 1914; E. Hugo Mallet, 1920.

C. M.; addns. H. W. H.

BRISTOL MUSICAL FESTIVAL. Inaugurated in 1873, this important music-meeting was held triennally till 1888. Thirteen festivals (up to that of 1912) have been held in the Colston Hall, since when the festival has been in abeyance. The following is a list of the principal works that have been performed, in addition to the 'Messiah' and 'Elijah,' both of them constant features:

1873. Oct. 21-24. The 'Creation,' Macfarren's 'John the Baptist' (composed for the occasion), Rossini's 'Stabat Mater,' and Mendelssohn's 'Hymn of Praise.' Conductor, Charles Hallé.

1876. Oct. 17-20. Verdi's 'Requiem,' 'Israel in Egypt,' Spohr's 'Fall of Babylon,' 'The Mount of Olives,' 'The Hymn of Praise.' Conductor, Hallé.

1879. Oct. 14-17. 'Samson,' 'Walpurgisnacht,' Brahms's 'Rinaldo,' Mozart's 'Requiem,' Rossini's 'Stabat Mater,' 'Choral Symphony.' Conductor, Hallé.

1882. Oct. 17-20. Beethoven's 'Mass in D,' Gounod's 'Redemption,' 'Spring' (from Haydn's 'Seasons'), Rossini's 'Moses in Egypt,' and Mackenzie's 'Jason' (composed for the occasion). Conductor, Hallé.

1885. Oct. 20-23. 'Belshazzar,' Brahms's 'Triumphlied,' C. H. Lloyd's 'Hero and Leander,' Berlioz's 'Faust.' Conductor, Hallé.

1888. Oct. 16-19. Gluck's 'Iphigenia in Tauris' (Act 1), Cherubini's 'Fourth Mass,' Mackenzie's 'Rose of Sharon,' Berlioz's 'Romeo and Juliet' symphony, Sullivan's 'Golden Legend,' 'First Walpurgisnacht.' Conductor, Hallé.

(Two years separated the sixth and seventh Festivals.)

1890. Oct. 22-25. 'Redemption,' Parry's 'Judith,' 'The Golden Legend.' Conductor, Hallé.

1893. Oct. 25-28. 'Samson,' Berlioz's 'Faust,' 'Hymn of Praise, Rossini's 'Stabat Mater,' S. S. Wesley's 'Wilderness' (with orchestra), Schumann's 'Paradise and the Peri.' Conductor, Hallé.

1896. Oct. 14-17. Parry's 'Blest pair of Sirens' and 'Job,' Gounod's 'Requiem Mass,' the 'Creation,' Brahms's 'German Requiem,' 'The Golden Legend,' and a new cantata, 'Hymn before Sunrise,' by P. Napier Miles. Conductor, George Riseley.

The burning of the Colston Hall—on Sept. 1, 1898—caused a break of six years between the ninth and tenth festivals. The latter was held in the re-erected building in

1902. Oct. 8-11. 'Antigone,' Elgar's 'Coronation Ode,' Horatio Parker's 'The Legend of St. Christopher,' Coleridge-Taylor's 'Hiawatha' trilogy, Berlioz's 'Requiem.' Conductor, George Riseley.

1905. Oct. 11-14. Berlioz's 'Lelio,' Mendelssohn's 'Œdipus at Colonos,' Elgar's 'Dream of Gerontius,' Strauss's 'Taillefere,' Mozart's Mass in C, 'Engedi,' 'Lohengrin.' Conductor, G. Riseley.

1908. Oct. 14-17. Stanford's 'Ode on the Death of Wellington,' Bruch's 'Lay of the Bell,' Bach's 'Watch ye, pray ye,' Kalinnikov's symphony in G minor, No. 1, Woyrsch's 'Passion,' the Choral Symphony, C. B. Rootham's 'Andromeda,' Elgar's 'King Olaf,' 'Die Walküre.' Conductor, G. Riseley.

1912. Oct. 23-26. Elgar's 'Caractacus,' Pitt's 'English Rhapsody,' 'Samson and Delilah,' 'Rheingold,' 'Walküre,' 'Siegfried' and 'Götterdämmerung.' Conductor, G. Riseley.

Concerts of miscellaneous music have been given on each occasion. The chorus-masters have been the late Alfred Stone (1873 and 1876), D. W. Rootham (1879–1896), and George Riseley (1902–12). Walter J. Kidner, who has been associated with the festival since its initiation in 1873, became secretary in 1878. F. G. E.; addns. H. W. H.

BRITISH CHAMBER MUSIC CONCERTS, a series of concerts inaugurated at the Queen's (Small) Hall in 1894 under the direction of Ernest Fowler for the encouragement of native work, vocal and instrumental. The concerts were discontinued in 1899, and although the exclusive character of the programmes was not maintained after the second series, they were the means, during their six seasons, of introducing twenty new works, besides reviving many others of acknowledged interest.

N. C. G.

BRITISH CONCERTS. When the VOCAL CONCERTS (*q.v.*) were discontinued at the close of the year 1822 the British Concerts were established to supply their place, and, according to the prospectus, 'to meet the wishes of a numerous class of persons who are anxious to see native talent encouraged.' The programmes were to consist 'entirely of works of British composers, or of foreigners who have been naturalised and resident in these realms for at least ten years.' The managers of the concerts were the following members of the CONCENTORES SODALES (*q.v.*): Attwood, Bishop, Elliot, Goss, Hawes, Horsley, Jolly, Linley and Walmisley, and Sir G. Smart. Three concerts were given in 1823, under the immediate patronage of the King, including instrumental chamber music, vocal solos and glees. Among the new works given were string quartets by J. Calkin and G. Griffin, a quartet for piano and strings by Griffin, Horsley's 'Address to Hope' for double choir, and his glee 'The Crier,' Linley's glee 'Now the blue-fly's gone to bed,' Elliott's 'A choir of bright beauties,' Hawes's 'Love, like a bird,' Attwood's 'In this fair vale.' The instrumental performers were Mori, W. Griesbach, H. Smart and Linley, and the chief vocalists Mrs. Salmon, Miss Stephens and Messrs. Vaughan, Sale and Bellamy. The concerts took place in the ball-room of the Argyll Rooms, Regent Street, and a list of 200 subscribers was published, but the support accorded to the scheme was insufficient for the continuance of the concerts, and the season of 1823 was the first and last.

C. M.

BRITISH MUSIC SOCIETY. This Society owes its existence to the imagination and practical energy of Dr. Eaglefield Hull. Thanks to his labours a Committee of Management, with himself as Honorary Director, was first constituted in June 1918; Lord Howard de Walden was elected President in August of the same year, and on Nov. 21, 1919, the Society was incorporated. At the end of 1920 and the beginning of 1921 the Society found itself in considerable financial difficulties, to which it would probably have succumbed but for the generosity of its President. The whole office staff and system were reorganised and Mrs. Balkwill (who later became Secretary of the Society) was put in charge. Reorganisation proceeded during 1921, and in November Dr. Hull resigned the post of Honorary Director (which was then abolished), on the grounds that the pressure of private work made his continuance in it increasingly difficult and that the work of the Society had so developed that to carry it on along the old lines was an impossibility. From that time the Committee of Management became the body solely responsible for direction, and at the beginning of 1922 the Society was once more in an independent and solvent position, which it has increasingly consolidated ever since.

The object of the British Music Society is and has always been to further the interests not only of British music but of all music in Great Britain. Primarily it is an organising and educative, not a concert-giving institution, intended to co-ordinate the often overlapping activities of musicians and music-lovers throughout the country. It has achieved a considerable measure of success. At the time of writing (May 1923) it can boast of 39 'Centres' and 10 school 'branches' in Great Britain; 3 foreign 'Centres' in India and Australia, as well as foreign correspondents in most European capitals. Four provincial musical societies are affiliated with it and the Society itself enjoys affiliation with the Federation of Music Clubs of America. Most important of all, perhaps, the offices of the Society at 3 Berners Street, W., were chosen as the headquarters of the INTERNATIONAL SOCIETY FOR CONTEMPORARY MUSIC (*q.v.*), founded at Salzburg in Aug. 1922—a striking tribute to the enhanced prestige of British music on the Continent—and the Contemporary Music Centre (which is the concert-giving association of the Society in London) has been constituted the British Section of the International Society. There are about 3500 full members registered at the headquarters of the Society and at least as many more associates are carried on the books of the various centres and branches.

The Society publishes a monthly bulletin and holds annual congresses at which there are concerts, social gatherings, a banquet, and a debate on some subject of musical importance. In alliance with the Federation of British Music Industries the Society has also promoted Summer Courses in Music Teaching at Oxford. Probably, however, the work of greatest practical utility hitherto accomplished has been the compilation of a catalogue of British

compositions. This was first issued in 1920 and again in a revised and improved form in 1922. Though not yet perfect in every detail this is the only publication of the kind in existence and has proved of undoubted service to the musical community at large. F. TYE.

BRITISH NATIONAL OPERA COMPANY, THE, was founded in 1922 by some of the leading singers and instrumentalists who had previously been under the management of Sir Thomas BEECHAM (*q.v.*). It began work at Bradford, giving its first performance, 'Aïda,' on Feb. 6, 1923, and coming to Covent Garden later in the year. As in the case of other English companies, the main work is done in the provinces, but this is on a larger scale, since the policy of Denhof and Beecham has been followed in the maintaining of a higher standard of orchestral playing, and in the inclusion in the repertory of the more elaborate operas, such as the 'Ring,' 'Parsifal' and 'Pelleas and Melisande' (see DENHOF OPERA COMPANY). London seasons have been given at Covent Garden and His Majesty's Theatre, and the following English operas have been produced for the first time: Holst's 'Perfect Fool' and Mackenzie's 'Eve of St. John.' Boughton's 'Alkestis' and Vaughan Williams's 'Hugh the Drover' are among other native works taken up which had previously had their first hearing elsewhere. The first artistic director was Percy Pitt. He was succeeded in 1924 by Frederic Austin.

N. C. G.

BRITISH ORCHESTRAL SOCIETY. This society existed from 1872–75 for the purpose of giving an annual series of concerts by British artists, the soloists, vocal and instrumental, together with the band of 75 performers, being drawn from the ranks of native musicians. The scheme of each concert included a symphony, a concerto, two overtures and vocal music. George Mount was the conductor, and while the performers were exclusively English, the music was drawn from composers of all nations, but several new works by native writers were given for the first time, including Macfarren's overture to 'St. John the Baptist' (1873); J. F. Barnett's overture to Shakespeare's 'Winter Tale' (1873), written for the society; J. Hamilton Clarke's 'Saltarello' (1874); Alfred Holmes's overture to 'Inez de Castro' (1874); Gadsby's overture 'The Witches' Frolic' (1874); Wingham's symphony in B flat (1875).

C. M.

BRITISH WOMEN'S SYMPHONY ORCHESTRA. This organisation was formed in 1924, so that professional women musicians might be represented by their own complete orchestra. It is on a co-operative basis and is managed by a direction committee of the members. The first concert was given at the Queen's Hall in June of that year and a first series of symphony concerts followed in the winter. The conductor was Miss Gwynne Kimpton, under whom a system of weekly rehearsals was established to enable the orchestra to become acquainted with all the best music and to maintain the standard of proficiency. In 1925 Dr. Malcolm SARGENT (*q.v.*) conducted.

BRITO (BRITTO), ESTEVÃO DE (beginning of 17th cent.), a Portuguese composer of church music. A pupil of FELIPPE DE MAGALHÃES (*q.v.*), he became choir-master first at Badajoz and then at Málaga, where a number of his works are preserved in MS. Others were lost in the Lisbon earthquake of 1755.

J. B. T.

BRITTON, THOMAS (*b.* at Rushden, near Higham Ferrars, Jan. 14, 1643/44; *d.* London, Sept. 27, 1714), was famous in the history of Handel's day as the 'Musical Small-Coal Man.'

He was apprenticed in London to a coal-dealer, and afterwards started business in Aylesbury Street, Clerkenwell, as a dealer in 'small-coal' (charcoal ?), which he carried through the streets on his back. He obtained an extensive knowledge of chemistry, of old books, chiefly on the occult sciences, and of both the theoretical and practical part of music. In 1678 he established weekly concerts, and formed a sort of club for the practice of music. These concerts were held in a long narrow room over his shop at the north-east corner of Jerusalem Passage, the entrance to which is described as being by a stair outside the house. Notwithstanding the modesty of the attempt these gatherings are said to have been attractive and very genteel. The performers were Handel (who presided at the harpsichord), Pepusch, John Banister, Henry Needler, John Hughes (the poet), Philip Hart, Henry Symonds, Abel Whichello, Obadiah Shuttleworth, Woolaston (the painter) and many other professors and amateurs. The concerts were at first free to all comers; subsequently the visitors paid ten shillings a year each. Britton provided his guests with coffee at a penny a dish. The small-coal man was acknowledged by the Earls of Oxford, Pembroke, Sunderland and Winchilsea (the great book-collectors of the day), who appreciated his conversation and book-learning. He had a hand in the formation of the celebrated Harleian Library; and the Somers tracts were entirely his collecting. His reception by these noblemen led many persons to imagine that Britton was not the character he seemed to be, and that his musical assemblies were only a cover for seditious purposes. Indeed he was severally suspected of being a magician, an atheist, a Presbyterian and a Jesuit. These conjectures were all ill-grounded. Britton was a plain, simple, honest man, perfectly inoffensive, and with tastes above his condition in life.

His death was brought about by a ventriloquist, who so frightened him that he never recovered. He was buried in the vault in St. James's Church, Clerkenwell, on Oct. 1, 1714, his funeral being attended by the members of his musical club. His portrait by Woolaston is in the National Portrait Gallery. E. F. R.

BRIVIO, Carlo Francesco. In English publications he appears generally as 'Sigr. Brivio,' without his Christian name. He was a 17th-18th century opera singer of high repute who retired from the stage *c.* 1720, and settled in Milan as teacher, where he formed many famous pupils, among others Appiani and Salimbeni. He composed several operas, an overture, sonatas for flute and for violin, etc. Some dictionaries give his Christian name as Giuseppe Fernando, with the same biographical particulars; as, however, the opera 'Demofoönte' (1738), in the library of the Musikfreunde in Vienna, is signed Carlo Francesco Brivio, and the textbook of 'La Merope,' by Zeno (1740) gives 'Giuseppe Ferdinando Brivio' as the composer's name, it seems evident that they were two distinct people. It was, however, undoubtedly Giuseppe Fernando who was in London *c.* 1745 and wrote, together with the famous Count St. Germain, some songs for the opera, 'L' Inconstanza delusa.' E. v. d. S.

BRIXI, (1) Franz Xaver (*b.* Prague, 1732; *d.* there, Oct. 14, 1771), studied music under Peter Simon Brixi, a relative, and philosophy at the university. On the recommendation of Joh. Zach he was appointed organist at the church of St. Galli, Prague. The excellence of his organ-playing and of his church compositions gained for him similar posts successively at St. Nicholas and St. Martin. Finding the taste for true church music waning in Bohemia and the neighbouring countries, Brixi, recognising the true cause, tried to lead it into new channels, and Mendel regards him as the reformer of Catholic church music, as Bach was that of Protestant church music. In 1756 he became Sehling's successor at Prague Cathedral, after passing successfully the prescribed examination, for which he wrote his 'Probatik-Mass,' regarded as his finest work. He wrote 52 grand and 24 short masses, oratorios, several requiems, including one for Maria Theresa; vespers, litanies, and even operas and operettas; a great deal of organ music, including a concerto with orchestra, harpsichord pieces, etc.

(2) Victorin (*b.* Pilsen, 1717; *d.* Podjebrad, Apr. 1, 1803), a cousin of Franz Xaver, was organist at Kosmonos and Podjebrad, and in 1747 he became rector of the school there. The Emperor Francis I. offered him a place as clavecinist at his court in Vienna, and about the same time he received a letter from his relative, Franz Benda, who offered him a very advantageous position in the Berlin court chapel; but he refused both, as he would not leave his beloved Bohemia. He left a large number of masses and other church works, as well as harpsichord (also pianoforte ?) sonatas, which all remained in MS. Eitner thinks that many MS. works attributed to Xaver belong in reality to Victorin. E. v. d. S.

BRIZEÑO, Luis (17th cent.), one of the earliest performers on the Spanish guitar. In 1622 he published

'Metodo mui facilissimo para aprender a tañer la guitarra a lo español . . . en el qual se hallaran cosas curiosas de romances y esguidillas . . .' (Paris, P. Ballard).

Mitjana (*La Musique en Espagne*) gives a facsimile and transcription of a song with Spanish words composed for the marriage of Louis XIII. and Anne of Austria. The tablature employed is that in which numbers and other signs were placed above the words to represent arpeggio chords. J. B. T.

BROADWOOD. The house of John Broadwood & Sons, the oldest firm of keyboard instrument makers in existence, was founded by the harpsichord maker, Burkat Shudi (*q.v.*), properly Burkhard Tschudi, of Swiss origin. He would appear to have begun business in the parish of St. James's, London, about the year 1728; to have removed to Meard Street, Soho, where he found Royal patronage; and finally to have settled in 1742 in Great Pulteney Street, St. James's (*Daily Advertiser*, Oct. 5, 1742), in the house numbered 33 (now demolished), the seat of the business till 1904.

(1) John Broadwood (*b.* Cockburnspath, Scotland, 1732; *d.* 1812), by trade a joiner or cabinet-maker, as Shudi had also been, was employed by the latter as a harpsichord maker in 1761 (*Gazetteer* and *Daily Advertiser*, Jan. 14, 1767). In 1769 he married Barbara, Shudi's daughter, and in the following year became Shudi's partner, an arrangement that lasted until the death of the senior in 1773. John Broadwood then became associated, for a period of nine years, with Burkat Shudi, his brother-in-law. From 1782 he remained sole proprietor of Shudi & Broadwood. A fine mezzotint portrait of him in his 80th year was engraved by W. Say and published Aug. 1, 1812, the original painting being by John Harrison. In 1795, by the admission of his son, (2) James Shudi (*b.* 1772; *d.* 1851), to partnership, the firm became John Broadwood & Son; ultimately, by taking in another son, Thomas, in 1807, John Broadwood & Sons.

The introduction of piano-making in the business dates from 1773, when John Broadwood began to make square pianos on the model of Zumpe. But in 1780 he produced a square piano of his own, which he patented in 1783, discarding the old clavichord disposition of the wrest-plank and tuning-pins. The earliest known date for a Broadwood grand

piano is 1781. The patent of 1783 includes the damper and piano pedals, making use of the harpsichord pedals for the grand piano, which had served for the machine stop and swell. In 1788 he divided the long bridge, which until then had been continuous as in the harpsichord, in order to carry the bass strings upon a bridge of their own. These inventions became universally adopted. (See PIANOFORTE.)

As constructive piano-makers among his descendants have been the above-mentioned son James, and his son (3) HENRY FOWLER (1811–93). The great-grandson (4) HENRY JOHN TSCHUDI (*d.* Feb. 8, 1911), the patentee of the 'Barless' grand piano, became a director of John Broadwood & Sons, Limited, a private company established Oct. 1901, with Mr. W. H. Leslie as chairman. In 1904 the old premises in Pulteney Street were given up for larger premises at the corner of Conduit Street and George Street, Hanover Square (formerly Limmer's Hotel). In 1925 a further move was made to 158 New Bond Street. The chairman (1926) is Mr. C. E. Heath; among the directors are three great-great-grandsons of John Broadwood (1) bearing the name.

A. J. H.

BROADWOOD, (1) REV. JOHN, a brother of HENRY FOWLER BROADWOOD (*supra*), may be claimed to be one of the earliest collectors of English folk-song in the modern spirit. He noted down the songs and tunes traditionally sung by farm hands and others at Harvest Homes and similar rustic festivities in Sussex and Surrey. In 1843 he published sixteen of these, harmonised, in a folio book privately issued.

This collection was reissued in 1889 with fresh harmonies by H. F. Birch Reynardson, and additional songs, collected by his niece, (2) Miss Lucy E. BROADWOOD, under the title 'Sussex Songs.' This lady, the daughter of Henry Fowler Broadwood, has been one of the most ardent workers in the cause of English folk-music. She has noted traditional melodies in Surrey, Sussex and other parts of the south of England, as well as largely in the Highlands, and in Ireland.

It was much owing to her efforts that the FOLK-SONG SOCIETY (*q.v.*) was founded, and after a period of languishment she, becoming honorary secretary, gave great impetus to it. Besides some arrangements of old songs, she published, in collaboration with J. A. Fuller Maitland, in 1893 'English County Songs,' now a classic among collections of English folk-music. In Sept. 1908 she issued 'English Traditional Songs and Carols' (Boosey), while the journals of the Folk-Song Society contain much of great value from her, in research, and in contributed tunes. Miss Broadwood resigned the honorary secretaryship of the Folk-Song Society in 1908.

F. K.

BROCKLAND (BLOQUELAND), CORNELIUS (CORNEILLE DE MONTFORD, called DE BROCKLAND) (*b.* Montford, Holland, 1st half of 16th cent.), practised medicine at Amour in Bourgogne, but gave up his practice and probably settled at Lyons to devote himself entirely to music. He fought for the abolition of the Guidonian hand in favour of solmisation, and also wrote a number of chansons. His *Instruction facile pour apprendre la musique pratique sans gamme . . .* has an appendix of French chansons. On the title-page of this work (published Lyons, 1573) he calls himself Bloqueland; a second edition of the *Instruction méthodique . . . par Corneille de Montford, dit de Brockland*, appeared in 1587, and *Le second jardinet de musique, contenant plusieurs belles chansons françaises à quatre parties*, in 1579.

E. v. d. S.

BROCKWAY, HOWARD A. (*b.* Brooklyn, N.Y., Nov. 22, 1870), American composer, pianist and teacher. He studied in Berlin with Barth (pianoforte) and Boise (composition), In 1895 he returned to New York; for six years (from 1903) he was professor in the Peabody Conservatory in Baltimore, after which he returned to New York. He has collected, with Lorraine Wyman, folk-songs in the Southern Appalachian Mountains of the United States, published in two volumes as 'Lonesome Tunes.' His compositions include the following:

Symphony, D.
Ballade, G minor, orchestra.
Sylvan Suite, orchestra.
Sonata, G minor, pianoforte and violin.
Suite, E minor, violoncello and orchestra.
Sir Oluf, cantata.
Quintet, strings and pianoforte.
Concerto, pianoforte and orchestra.
Romanze, violin and orchestra, 'Des Sängers Fluch,' 8-part chorus a cappella.

R. A.

BROD, HENRI (*b.* Paris, Aug. 4, 1801; *d.* Apr. 6, 1839), a famous oboe-player.

He was taught the oboe at the Conservatoire by Vogt. 'His tone,' says Fétis, 'was weaker than that of his master, but it was softer and sweeter; his phrasing was graceful and elegant, and his execution clear and brilliant.' He shared the desk of first oboe with Vogt both at the opera and the concerts of the Conservatoire, and was extremely successful both in Paris and the provinces. He made considerable improvements in the instrument itself and in the cor anglais, though these have been superseded by the system of Boehm. Brod's 'Method' is well known, but his pieces, of which Fétis gives a list of twelve, are obsolete. His death gave occasion to one of Cherubini's cruellest *mots*: 'Brod est mort, maître.' 'Qui?' 'Brod.' 'Ah! petit son' (poor tone).

G.

BRODE, MAX (*b.* Berlin, Feb. 25, 1850; *d.* Dec. 29-30, 1917), widely known and esteemed in Germany as violinist and conductor. He accomplished much for music in Königsberg, where he conducted the symphony concerts.

W. W. C.

BRODERIP, a family of English organists. (1) William (*b.* 1683; *d.* Jan. 31, 1726) became a vicar-choral of Wells Cathedral on Apr. 1, 1701, and in 1713 succeeded John George as cathedral organist. He left a widow and nine children. An anthem of his, 'God is our hope and strength,' written in 1713 to commemorate the Peace of Utrecht, is in the Tudway collection.

(2) William (*b.* 1744; *d.* 1770), grandson of the above, was organist of Leominster, Hereford, and is buried at Canterbury (Cathedral Registers).

(3) John Broderip (*b.* 1719; *d.* 1770), a son of William (1), became a vicar-choral (on probation) of the same cathedral, Dec. 2, 1740, and on Apr. 1, 1741, was appointed organist. He was succeeded by R. Parry in 1774. Between 1766 and his death he published a volume of 'Psalms, Hymns and Spiritual Songs,' dedicated to Lord Francis Seymour, the then Dean of Wells. In later life he became organist of Shepton Mallet in Somerset.

(4) Robert Broderip (*d.* May 14, 1807), who lived at Bristol, wrote a considerable number of works, such as an ode on the King's recovery, a concerto for harpsichord and strings, voluntaries, duets, glees, etc. Some psalms by him are included in a similar volume to that above mentioned, published by John Broderip.

W. B. S., with addns. supplied by a member of the family.

BRODERIP & WILKINSON. A bygone firm of London music publishers. It has been supposed, but without proof, that the first-named partner was Robert Broderip (*supra*). (See also Longman & Broderip.) In 1811 Thomas Preston of the Strand purchased the entire stock and plates of the business.

F. K.

BRODSKY, Adolf (*b.* Taganrog, Russia, Mar. 21, 1851), violinist.

As a child he gave evidence of exceptional musical gifts, receiving home instruction up to the age of 9; he was then sent, at the cost of a wealthy citizen of Odessa, to receive tuition from J. Hellmesberger in Vienna, and in 1860–1863 was a pupil of the Conservatorium. On leaving the school he became a member of Hellmesberger's quartet, and played in the opera orchestra from 1868–70. While on a long concert tour, he visited Moscow in 1873, where he studied for a time still further under Ferdinand Laub, at whose death in 1875 he accepted an appointment in the local Conservatorium. In 1879 he was appointed conductor of the symphony concerts at Kiev, remaining there for two years. After a very successful concert tour, during which he visited Vienna, Paris, London, etc., he succeeded Schradieck as professor in the Leipzig Conservatorium, and was a frequent performer at the Gewandhaus concerts. At this period he formed, in conjunction with Hans Becker, Hans Sitt, and Julius Klengel, a string quartet which became favourably known throughout Germany. An offer from the United States tempted him to cross the Atlantic in 1890, and he became leader of Damrosch's Symphony Society in New York, but returned to Europe in 1894, accepting in 1895 the post of leader of Sir Charles Hallé's orchestra in Manchester. After the death of Hallé he held the temporary post of conductor of the orchestra; and as principal of the Royal (Manchester) College of Music and organiser of quartet concerts (with Rawdon Briggs, S. Spechman and Carl Fuchs) his influence in Manchester has been very great. In 1902 he received the honorary degree of Mus.D. from the Victoria University. Among contemporary violinists more polished executants are to be found, but few possess to the same extent his qualities of sound musicianship.

W. W. C.

BRÖNNEMULLER (Brunnemullerus), Elias (early 18th cent.), music master at Amsterdam, wrote 'Fasciculus musicus,' etc., Leovardiae (Leeuwarden), 1710; 6 sonatas for 2 violins, violoncello and organ, op. 1, Amsterdam, 1709; suite for violin, MS.; aria for mezzo-soprano, with PF. and oboe, MS.

BRONSART, Hans von, the professional name of H. Bronsart von Schellendorff, (*b.* Berlin, Feb. 11, 1830; *d.* Munich, Nov. 3, 1913), pianist and composer. Bronsart was educated at Danzig and at Berlin University, 1849–52. He studied harmony and composition under Dehn, and the piano, first under Kullak, and (1854–57) under Liszt at Weimar. In 1862 he married Ingeberg Starck (*q.v.*), also a pupil of Liszt. After several years devoted to concert tours, Bronsart (1860–62) conducted the Euterpe concerts at Leipzig; in 1865 succeeded Bülow as Director of the Gesellschaft der Musikfreunde at Berlin, and in 1867 was made Intendant of the court theatre at Hanover; in 1887 he was appointed General-Intendant at Weimar. In 1895 he retired with the rank of a Privy Councillor.

His chief works are a pianoforte trio in G minor, and a pianoforte concerto in F♯ minor —both much and successfully played by von Bülow, Sgambati and others; Polonaise in C minor (Liszt's 'Das Klavier'); 'Frühlings-Fantasie' for orchestra, often performed; 'Christnacht,' a cantata for double choir and orchestra; 'Der Corsair' (MS.), an opera, text from Byron; also an interesting pamphlet, *Musikalische Pflichten*. In England Bronsart is known by his pianoforte concerto, which was first played at the Crystal Palace, Sept. 30, 1876, by Fritz Hartvigson, and has been heard occasionally in London since.

E. D., with addns.

BRONWEN, opera, words by T. E. Ellis (Lord Howard de Walden), music by Holbrooke. The third part of a trilogy, of which the first is THE CHILDREN OF DON and the second DYLAN.

BROOKLYN INSTITUTE'S DEPARTMENT OF MUSIC, see NEW YORK.

BROOKLYN PHILHARMONIC SOCIETY, see NEW YORK.

BROS, JUAN, (*b.* Tortosa, 1776; *d.* Oviedo, 1852), successively musical director at the cathedrals of Malaga, León and Oviedo, and composer of much church music, still performed in many churches in Spain. Three Misereres written at León are cited as his best works. Specimens of his music are given by ESLAVA in the 'Lira sacro-Hispana.' M. C. C.

BROSCHI DETTO FARINELLI, see FARINELLI.

BROSSARD, SÉBASTIEN DE (*b. circa* 1654[1]; *d.* Meaux, Aug. 10, 1730), studied philosophy and theology at Caen, Normandy, *c.* 1670. There (from 1672) he composed his 'Pièces de luth,' and in 1678 a vocal composition of his appeared in the *Mercure galant*, under the anagram of Robsard des Fontaines. Resident in Paris (1683–84), he occupied a post at Notre-Dame. Prebendary in 1687 at Strassburg, he succeeded Mathieu Fournaux as maître de chapelle of the cathedral (May 21, 1689). In Dec. 1698 he became grand chaplain and music-director—afterwards canon—of the cathedral at Meaux, where he died. An intense worker, self-taught with the help of Kircher's 'Musurgia,' he wrote 6 books of 'Airs sérieux et à boire' (1691, 1698), 2 volumes of 'Élévations et motets' (1695, 1698), and other sacred music (see *Fétis*; *Q.-L.*). He also left French cantatas, two 'sonates à deux violons, basse de violon et basse continue' (1695), two other sonatas for violin and a bass, all MS., which are visibly influenced by Lully's music and violin technique; further, a 'chaconne,' a 'menuet,' a 'symphonie pour la nuit de Noël,' an Italian air and fragments of a violin Method. His Dictionary, published under the title of *Dictionnaire de musique contenant une explication des termes grecs et latins, italiens et français les plus usités dans la musique*, etc. (Ballard, 1703; 2nd ed. 1705; 3rd ed. without date, Roger, Amsterdam—six editions according to *Q.-L.*), was the first one of its kind. Although preceded by Janowka's *Clavis ad thesaurum magnae artis musicae* (1701), it rendered important service to musical knowledge by its enormous amount of information and by its being written in French (Engl. transl. by J. Grassineau, 1740). Brossard also wrote: *Lettre en forme de dissertation à M. Demotz sur sa nouvelle méthode d'écrire le plain-chant et la musique* (Ballard, 1729). In 1725 he gave his valuable collection to Louis XIV., the catalogue of which he made, in consideration of an annuity for himself and his niece. It consists of MSS. and notes for an universal history of music, now kept in the National Library at Paris, as well as his own books and music.

[1] According to Michel Brenet, and not 1660 as has been stated.

BIBL.—MICHEL BRENET, *Sébastien de Brossard prêtre, compositeur et bibliophile* (1896, *Mémoires de la Société de l'histoire de Paris et de l'Île de France*); L. DE LA LAURENCIE, *L'École française de violon de Lully à Viotti* (vol. i., 1922). M. L. P.

BROWN, JAMES DUFF (*b.* Edinburgh, Nov. 6, 1862), was an assistant librarian in the Mitchell Library, Glasgow, from 1878–88, when he became librarian to the Clerkenwell Public Library. His claim to notice rests on three works: *Biographical Dictionary of Musicians* (Paisley, 1886), a book of considerable value as far as facts are concerned; *Guide to the Formation of a Music Library* (1893), of greater value; and his best work, *British Musical Biography* (with Stephen S. Stratton, 1897). M.

BROWN, JOHN, Mus.D. (*b.* Rothbury, Northumberland, Nov. 5, 1715; *d.* Sept. 23, 1766), English divine, poet and writer on musical subjects.

He studied at Cambridge, but took his Mus.D. degree at Oxford. In the '45 rebellion, he distinguished himself at the siege of Carlisle. In 1746 he was chaplain to the Bishop of Carlisle; in 1754, vicar of Great Horkesley, Essex; and, in 1758, vicar of St. Nicholas, Newcastle. He committed suicide in 1766. His famous publication (1763) was *A Dissertation on the union and power, the progressions, separations, and corruptions of poetry and music.* This was a very original treatise, and *Fétis* speaks highly of it. Reissued the next year as *The history of the rise and progress of poetry, through its several species*, it was translated into French (Paris, 1768), German (Leipzig, 1769), and Italian (Florence, 1772). J. MK.

BROWN, JOHN (*b. circa* 1426), an English composer who studied in 1445 at King's College, Cambridge. In the early 16th century (Fairfax MS. in the British Museum, as well as in a MS. of the same period at Eton College), he is represented with polyphonic sacred compositions (*Q.-L.*).

BROWNE, JOHN (*d.* 1498), an English composer who was at the height of his activity during the reign of Henry VII. No details of his life are certain, but it was suggested by the late W. Barclay Squire that he may be the John Browne (of Bucks) who was admitted at King's College, Cambridge, in 1445. As he was 19 years old at that time, this would put the date of his birth at 1426. Grattan Flood identifies him with a rector of the parish church of West Tilbury from 1480 to 1490. (*Mus. T.*, Aug. 1920.)

In the British Museum (Add. MSS. 5465) is a madrigal by Browne ('Margarit meke') in 4 separate portions, described as being written 'in regular rondo form' (Ernest Walker, *Hist.*

Mus. Eng. p. 28). This same MS. also contains two anthems, both in several parts, 'Jhesu, mercy! how may this be' and 'Woffully arayd,' both by 'Browne.' The *Eton College Anthem Book* contains the following hymns by him to the Virgin: 'O mater venerabilis' (*a* 5), 'Salve Regina' (*a* 5), 'O Maria plena gracie' (*a* 6), 'O Regina mundi clara' (*a* 6), and 'O Maria salvatoris mater' (*a* 8). J. MK.

BROWNE, RICHARD (*d.* Worcester, 1664), vicar, organist and master of the choristers at Wells Cathedral from 1614–19. A man of this name was also organist of Worcester Cathedral from 1662–64; he was buried in the north aisle of the cathedral nave (West's *Cath. Org.*). The following compositions by a Richard Browne are preserved in the Library of the R.C.M.:

First Evening Service (M. and N.D. only). 1051/44 (Bassus cantoris part only).

ANTHEMS

'Christ rising.' 1051/44 (Bassus cantoris part only).
'I have declared.' 1051/44 (Bassus cantoris part only).
'My God, my God!' 1051/43 (Bassus cantoris part only).
'O Lord, rebuke me not' (verse anthem). 1051/42 (Bassus cantoris part only).

There is also an organ score of this last anthem in the 'Batten Organ Book.' (See BATTEN.) J. MK.

BROWNSMITH, JOHN LEMAN (*b.* Westminster, 1809; *d.* Sept. 14, 1866), a chorister of Westminster Abbey who became a lay clerk there, Mar. 1838. He held appointments as organist at several London churches in succession, and was also organist to the Sacred Harmonic Society, in which capacity he officiated at the Handel Festivals at the Crystal Palace in 1857, 1859, 1862 and 1865. W. H. H.

BRUCH, MAX (*b.* Cologne, Jan. 6, 1838; *d.* Friedenau, Oct. 2, 1920), an eminent composer.

His father was in Government employ, his mother came of a well-known and gifted musical family of the Lower Rhine. Herself a distinguished singer, she carefully watched the early developments of her son's musical talents. He received his theoretical instruction from Professor K. Breidenstein at Bonn, and soon began to give extraordinary promise. In 1852 Bruch gained the scholarship of the Mozart foundation at Frankfort-on-Main for four years, during which time he continued his studies under Hiller, Reinecke and Breuning at Cologne, at the same time making himself gradually known by his compositions. His further development was promoted by long visits to Leipzig, Munich and other musical towns; from 1858–61 he was a teacher in his native town, where his operetta 'Scherz, List und Rache,' to Goethe's words, was performed in 1858. His stay at Munich was of special importance through the personal acquaintance of the poet Geibel, whose 'Loreley,' written for Mendelssohn, Bruch had composed while at Cologne. He at length obtained the poet's consent for the performance of the opera, and proceeded to Mannheim, where it was first given in 1863, and where he occupied himself with studying the requirements of the stage. He then produced many of those choral works which contributed to his fame in his own country, among them the 'Frithjof-Scenen,' for male voices and orchestra, op. 23. In 1865 he accepted the post of musical director of the Concert-Institution at Coblenz, and in 1867 became Kapellmeister to the Prince of Schwarzburg-Sondershausen. This post he resigned in 1870, after which he lived independently, first at Berlin and afterwards (1873–78) at Bonn, devoting himself exclusively to composition. The opera 'Hermione,' based on Shakespeare's 'A Winter's Tale,' was produced at Berlin in 1872, but met only with moderate success. In 1878 he became director of the Stern Singing Society in Berlin, succeeding Stockhausen. In 1880 he was offered the direction of the Liverpool Philharmonic Society, and for three years England became his home. In 1881 he married the singer Clara Tuczek (*d.* Aug. 1919). In 1883 he undertook the direction of the Orchesterverein at Breslau, remaining there until 1890; in 1892 he succeeded Herzogenberg as director in the branch of composition in the Hochschule of Berlin. He received honorary degrees from the universities of Cambridge (1893), Breslau (1896) and Berlin (1918), and was a corresponding member of the French Académie des Beaux-Arts. In 1908 he received the Prussian order 'Pour le mérite.' After 1910 he lived in retirement at Friedenau, near Berlin, till his death. A. M.

In attempting to estimate Bruch as a composer we are at once aware that popular opinion has reversed the verdict of musicians. *Riemann* (1922) still maintains the view put forward in earlier editions of this Dictionary, that the essence of his art (*Schwerpunkt*) lies in his works for choir with orchestra. Yet to name Bruch to any concert-goer outside Germany to-day is to recall the violin concerto in G minor, the Romance for violin and orchestra, the Kol Nidrei variations for violoncello and orchestra, with a few other works of the same type, the latest of which was the Conzertstück (op. 84) for violin and orchestra, produced at the Norfolk (Conn.) Festival (1911). As far as England is concerned this is not due to ignorance of his choral works. Bruch lived here for three years, himself introduced his works to the choirs of the north, and conducted one of the two performances of 'Odysseus' given by the Bach Choir in London. 'Odysseus' and certain others have been given in many parts of the country. Moreover, his output includes a quantity of important works for male choirs, yet, in spite of the high level of male-voiced choirs and the barrenness of their repertory, it cannot be said

that Bruch's works of this class have taken hold of the popular imagination. It is significant that one of the best known of his vocal compositions is the 'Ave Maria' for soprano solo, which is often given apart from the cantata, 'Das Feuerkreuz,' to which it belongs, because of its effectiveness as a concert piece. It is in fact the virtuoso, whether of the voice or of the violin, who keeps Bruch's music alive, while to Bruch himself and his immediate circle the essence of his art seemed to lie in his skilful *ensemble*. Bruch was one of the most finished technicians of his generation. His works of whatever class show complete understanding of the medium chosen. His melody takes its stand on folk-song, but not on a native folk-song. His race precludes that. German Volkslieder, Hebrew traditional melodies, Scottish and Welsh tunes all make their appeal to him; he gleans something from the idiom of each in turn, produces from the one the typical German partsong, from the others such brilliant instrumental work as 'Kol Nidrei' and the Scottish Fantasia, in which the simple germs of folk-melody are developed into what may be called a cosmopolitan *cantilena*. The solemn sentiment of the German is held in check by the keen-sightedness of the Jew. His facility is controlled by a sense of fitness. He scores for an orchestra of established constitution and uses an harmonic system based on classical precedent. His music gives little to discuss and nothing to quarrel about. It is its lack of adventure which has limited its fame. The virtuoso performer himself brings the sense of adventure into the concert room and supplies in his own interpretation what is absent from the music itself. Consequently, while Bruch's cantatas and symphonies are left on the shelf, the violin concertos everywhere continue to hold their own. C.

The list of Bruch's works is as follows:

Op.
1. 'Scherz, List und Rache,' comic opera, in one act.
2. Capriccio, PF. 4 hands.
3. 'Jubilate, Amen,' sop., choir and orch. 'Neath the Throne of Mercy.'
4. Three Duets, S. and A.
5. Trio, PF. and str. in C minor.
6. Seven partsongs, female choir.
7. Six Songs.
8. 'Die Birken und die Erlen,' sop., choir and orch.
9. Str. Quartet, C minor.
10. Str. Quartet, E.
11. Fantasia for 2 PFs.
12. Six PF. pieces.
13. Hymn for soprano.
14. Two PF. pieces.
15. Four Songs.
16. 'Die Loreley,' grand opera, 3 acts.
17. Ten Songs.
18. Four Songs.
19. Two sets of male choruses.
20. 'Die Flucht der heiligen Familie,' choir and orch.
21. 'Gesang der heiligen drei Könige,' trio, male voices and orch.
22 *deest*. Printed 1871, but not published, by the composer's desire.
23. 'Frithjof-Scenen,' soli, male choir and orch.
24. 'Schön Ellen,' soli, choir and orch.
25. 'Salamis,' soli, male choir and orch.
26. Violin Concerto, G minor.
27. 'Frithjof auf seines Vaters Grabhügel,' baritone solo, female choir and orch.
28. Symphony, E flat.
29. 'Rorate Coeli,' choir, orch. and organ, *ad lib.*
30. 'Die Priesterin der Isis in Rom,' alto solo and orch.
31. 'Flucht nach Ägypten,' and 'Morgenstunde,' sop., female choir and orch.
32. 'Normannenzug,' baritone, male choir and orch.

Op.
33. Four Songs.
34. 'Römische Leichenfeier,' choir and orch.
35. Portions of the Mass, for 2 sopr., double choir, orch. and organ.
36. Symphony, F minor.
37. 'Das Lied vom Deutschen Kaiser,' chorus.
38. Five Songs for choir, *a cappella*.
39. 'Dithyrambe,' tenor, 6-part choir and orch.
40. 'Hermione,' opera in 4 acts.
41. 'Odysseus,' soli, choir and orch.
42. Romance, violin and orch.
43. 'Arminius,' oratorio.
44. Violin Concerto, D minor
45. 'Das Lied von der Glocke,' soli, choir and orch.
46. Scottish Fantasia, violin and orch.
47. 'Kol Nidrei,' violoncello and orch.
48. Four Male Choruses.
49. Seven Songs.
50. 'Achilleus,' soli, choir and orch.
51. Symphony in E.
52. 'Das Feuerkreuz,' soli, choir and orch. (The best-known number is a soprano solo, 'Ave Maria,' frequently sung.)
53. Two Male Choruses.
54. Songs.
55. Canzone, violoncello and orch.
56. Adagio, violoncello and orch. (on Celtic themes).
57. Adagio appassionato, violin and orch.
58. Violin Concerto, D minor.
59. Five Songs.
60. Nine Choruses.
61. 'Ave Maria,' violoncello and orch.
62. 'Gruss an die heilige Nacht,' alto, choir and orch.
63. Swedish Dances, violin and PF.
64. Scottish Fantasia, violin, harp and orch.
65. 'In Memoriam,' adagio, for violin and orch.
66. 'Leonidas,' male choir.
67. 'Moses,' oratorio.
68. 'Neue Männerchöre,' with orch.
69. Five-part chorus with organ.
70. Four pieces for violoncello.
71. Seven songs for mixed choir.
72. Chorus for male voices.
73. 'Gustav Adolf,' secular oratorio.
74. 'Herzog Moritz,' for male choir.
75. Serenade for violin and orch.
76. 'Der letzte Abschied des Volkes,' male choir, orch. and organ.
77.
78. 'Damajanti,' sopr. solo, choir and orch.
79. Songs and Dances, on Russian and Swedish folk-tunes, for violin and PF.
80. 'Szene der Marfa' (Schiller), mezzo-sop. and orch.
81. Easter Cantata, sop., choir, orch., organ.
82. 'Das Wessobrunner Gebet' (arr. from op. 19), choir, orch., organ.
83. Eight trios, violin, violoncello, PF. (or 3 clarinets).
84. Conzertstück, violin and orch.
85. Romanza in F, violin and orch.
86. Six songs, mixed choir.
87. 'Die Macht des Gesanges' (Schiller), baritone, choir, orch., organ.
88. Concerto, 2 PF. and orch.
89. 'Heldenfeier,' choir (6 v.) and orch.
90. Song-cycle.
91. 'Die Stimme der Mutter Erde,' choir and orch.
92. 'Christkinder Lieder,' soli, female choir, PF.
93. 'Trauenfeier für Mignon,' soli, double choir, organ.

WITHOUT OPUS NUMBERS

Hebräische Gesänge, arrangements.
Scottish Songs, arrangements.
Welsh and Scottish Folk-songs, arr. male choir.
'Dem Kaiser,' male choir.
'Vom Rhein,' male choir.

BIBL.—FRITZ GYSI, *Max Bruch*, Zürich, 1922.

BRUCK, ARNOLD VON (ARNOLDUS BRUGENSIS; ARNOLDUS DE BRUCK OR DE PRUGKH; ARNOLDO FIAMENGO; ARNOLDO DE PONTE; sometimes signs himself only A. B.), an important composer of the first half of the 16th century, is not to be confounded with Arnoldus Flandrus. Ott, who dedicates to him his first song-book (121 'newe Lieder,' 1. Teil, published 1534), calls him His Majesty's first Kapellmeister and Dean of the Abbey of Laibach, and Köchel shows him still in that position in 1545. A commemorative medal was struck at Vienna in his honour in 1536. He showed a great preference for the German Lied, of which he wrote a considerable number. Collective volumes of the 16th century contain sacred and secular songs, motets, miserere and other church compositions. No separate volume of his works is known to exist.

E. v. d. S.

BRUCKNER, Anton (*b.* Ansfelden, Upper Austria, Sept. 4, 1824; *d.* Vienna, Oct. 11, 1896), composer.

Bruckner's grandfather (*d.* 1831) was a village schoolmaster in Ansfelden, where he was followed by his son Anton, the composer's father (*d.* 1837). Bruckner himself was originally destined for the career of a schoolmaster, whose duties would include the practice of church and school music. After his father's death Bruckner went to the Volkschule, in the little village St. Florian, where he was taught music by Kattinger, the organist of the Institute (Stift), and by the principal choirmaster, Schäffler, and by Gruber. In 1840 he went to Linz, to a so-called 'Präparandenschule': he became a pupil teacher first at Windhaag on the Malsch (1841), then, 1843, at Kronsdorf, Enns and Steyr. In 1845 he became assistant teacher in St. Florian, where he remained until 1848. In that year he succeeded Kattinger as organist of the Institute. He hovered continually between music and teaching, but in 1856 he became organist of the cathedral at Linz, and thus decided finally to work only as a musician. Whilst he was at Linz he spent several weeks every year in Vienna, to study further (till 1861) under the well-known master of theory, Simon Sechter (1788–1867). This education in theory was followed by study in modern composition under Otto Kitzler (*b.* 1834), theatre Kapellmeister at Linz, who introduced him to Wagner's scores of 'The Flying Dutchman' and 'Tannhäuser.' In 1868 Bruckner himself conducted a concert performance of part of the 'Meistersinger' before the first production in Munich.

At this time, too, Bruckner wrote his first big independent works; an F minor symphony in three movements, of which the andante is published, an overture in G minor, a mass in D minor (1864), and a symphony in C minor (1865–66), published as the First Symphony.

In 1860 he became choirmaster of a Male Voice Choir, for which he composed several works ('Funeral Song' (1861), 'Autumn Song' for men's voices, two soprano soli with piano accompaniment (1864), 'Wedding Song' (1865), 'National Drinking Song,' 'The Evening Sky,' 'National Song' and others). At the same time he was active in composing appropriate music for the church festivals.

His provincial period ended with the first performances of his C minor symphony in Linz, May 9, 1868, and with the composition of his Masses in F minor and E minor.

Through the influence of Johann Herbeck, Hofkapellmeister and director of the 'Gesellschaft der Musikfreunde,' Bruckner was appointed teacher of theory and of the organ at the Conservatoire, Vienna. In the autumn of 1868, therefore, he moved to Vienna and took up his new post. He became a professor in 1871, and in 1875 he undertook in addition a lectureship in theory at the University of Vienna. From 1868 he took service in the court chapel; from 1875 he was vice-librarian and second singing teacher to the choristers.

Bruckner's work in Vienna was only interrupted by visits to Bayreuth and other German towns where his works were performed; and especially by a journey to Nancy and Paris (1869) for a series of organ recitals; to the Exhibition in London (1871), where his remarkable organ-playing excited a great deal of attention. He also gave five concerts at the Crystal Palace.

For the rest, his life in Vienna was given up to creative work. He passed as a disciple of Wagner, and on this account was treated as an enemy by a section of the Viennese press, with Ed. Hanslick at its head. But he found enthusiastic supporters in Joh. Herbeck, Josef Hellmesberger, Hugo Wolf, Ferdinand Löwe, Josef and Franz Schalk, and others. In Germany notable success was gained for his works by Hermann Levi, Arthur Nikisch and Siegfried Ochs. In 1891 he resigned his post at the Conservatoire and went to live in apartments in a wing of the Belvedere, granted to him by the Emperor Franz Josef.

Belonging to his Vienna period are the—

Te Deum (1883–84).
Psalm 150 (1892).
Symphony 2 (1871–72).
Symphony 3 (finished Dec. 31, 1873).
Symphony 4 (score completed June 5, 1880).
Symphony 5 (1875–80).
Symphony 6 (1879–81).
Symphony 7 (1881–83).
Symphony 8 (1885–86, and revised in 1889–90).
Symphony 9 (begun at the end of Apr. 1891, was never finished but was cut short at the Adagio, Oct. 31, 1894).

Between the symphonies comes the single chamber music work, the string quintet in F major (composed in 1879).

As a composer Bruckner can only be fully understood through his own country, Upper Austria (much as Schubert can only be completely understood through his country, Lower Austria), and through his attributes as a devout Catholic. His patriotism led him to mirth and to love of the world; his Catholicism to a deep mysticism. If one studies his church works, the masses in D minor, E minor (with wind accompaniment), F minor, the Te Deum, and Psalm 150, one must recognise his greatness.

His style grew out of the *baroc* concert masses and motets of the 17th and 18th centuries, and is linked to the works of Haydn and Schubert. It is religious music, but at the same time free and daring in its individual outlook and modern in its idiom.

His strongest works are certainly the greatly planned Mass in F minor and the concise but mighty Te Deum in C major.

The human outlook of Bruckner's symphonic idea also grew from a religious root; all his symphonies are definitely explicable through a religious principle; in almost all of them the chorale plays an important thematic part. Above all else Bruckner's symphonic idea is pure music, quite untouched by the poetic or 'programme' influences of his time. Although the influence of Beethoven, of Schubert, of Wagner, may be detected, the music is individual. Bruckner adhered to the classical 4-movement form. In the type of his scherzo also, he followed the classical 'song form,' A, B, A. In the type of his slow movement he followed the example of Beethoven's Ninth Symphony; the first and second subjects both in variation form becoming more and more richly figured.

A peculiarity of his first and last movements, which in general are built up upon the sonata form, is the wealth of thematic material which Bruckner commands; for example, in the Ninth Symphony, in order to fuse the development and reprise. Further, the use of pauses, to make the movements articulate, increases the comprehension of the unity of the subjects, without, however, undermining the logic of the structure. Other characteristics are Bruckner's instrumentation after the manner of organ registration; the brilliant employment of the wind (particularly in Symphony 5); the simple 8-beat climax and the frank use of the sequence. His art is very German; it expresses a creed won after hard fighting. Therefore, in the course of years, Bruckner's music has been honoured increasingly by his compatriots, especially in Southern Germany.

The following is a list of Bruckner's published works in chronological order:

1843. Tantum Ergo in D, for mixed choir.
1846. Five settings of Tantum Ergo, E flat, C, B, A flat, D flat, for mixed choir; 5 v. with organ.
1854. Libera, F minor, for mixed choir and instruments.
1856. Ave Maria, for mixed choir and organ.
1858. 'Amaranths Waldeslieder,' for voice and PF.
1860. 'Im April,' for voice and PF.
1861. Ave Maria, for mixed choir, 7 v.
1861. Graduale 'Afferentur,' for mixed choir and 3 trombones.
1862. Fugue in D minor, for organ.
1863. Overture in G minor, for orchestra (edited, 1921, by A. Orel).
1863. 'Germanenzug,' for male choir, with wind accompaniment.
1864. 'Herbstlied,' for male choir, with 2 soprano soli and PF.
1864. Mass in D minor, for soli, chorus and orchestra (revised 1881–82).
1864. 'Um Mitternacht,' for male choir, alto solo and PF.
1865–66. Symphony No. 1 in C minor (revised 1890–91: first performances, Linz, May 9, 1866; Vienna, Dec. 13, 1891).
1866. 'Vaterlandsliebe,' for male choir with soli.
1866. 'Der Abendhimmel,' for male choir.
1866. Mass No. 2 in E minor, for mixed choir, 8 v. and wind.
1867–68. Mass No. 3 in F minor, for soli, mixed choir and orchestra.
1868. 'Jam Lucis.'
1868. Pange Lingua and Tantum Ergo.
1869. Graduale 'Locus iste,' for mixed choir.
1869. Graduale 'Christus factus est,' for mixed choir.
1870. 'Mitternacht,' for male choir, solo quartet and PF.
1873. Symphony No. 2 in C minor (first performed, Oct. 26, 1873, under Bruckner).
1873. Symphony No. 3 in D minor (2nd version, 1876/7; first performed, Vienna, Dec. 16, 1877, under Bruckner; 3rd version, 1889; first performed, Vienna, Dec. 21, 1890, under Richter).
1874. Symphony No. 4 in E flat (2nd version, 1878–80; first performed, Feb. 20, 1881, under Richter).
1875–76. Symphony No. 5 in B flat (revised 1881; performed Apr. 8, 1894, under Schalk. Bruckner himself never heard this symphony).
1876. 'Das Hoher Lied,' for 3 solo v. and male choir.
1877. 'Nachruf,' for male choir with organ.
1878. 'Abendzauber,' for male choir, with solo, horn quartet, etc.
1879. Graduale 'Os Justi,' for mixed choir.
1879. String quintet in F (the autograph version edited by von Wöss, 1922).
1879–81. Symphony No. 6 in A (incomplete first performance, Vienna, Feb. 11, 1883, under W. Jahn; first complete performance, Dec. 13, 1901, under Göllerich).
1880. Ave Regina (harmonised choral).
1880. Symphony No. 7 in E (first performance, Leipzig, Dec. 30, 1884, under Nikisch).
1881–84. Te Deum, for soli, mixed choir, organ and orchestra (first performance, Vienna, May 2, 1885, under Schalk).
1882. 'Sängerbund,' for male choir.
1882. Antiphon: 'Tota pulchra,' for tenor, mixed choir and organ.
1882. Ave Maria, for voice and organ.
1884. Graduale: 'Virga Jesse,' for mixed choir.
1884–90. Symphony No. 8 in C minor (first performance, Vienna, Dec. 18, 1892, under Richter).
1885. 'Ecce Sacerdos,' for mixed choir, 3 trombones and organ.
1886. 'Um Mitternacht,' for male choir with tenor solo.
1889–94. Symphony No. 9 in D minor (first performance, Vienna, Feb. 11, 1903, under F. Löwe).
1890. 'Träumen und Wachen,' for male choir with tenor solo.
1892. Psalm 150, for mixed choir, soprano solo and orchestra.
1892. 'Das deutsche Lied,' for male choir with wind accompaniment.
1893. 'Vexilla Regis,' for mixed choir.
1893. 'Helgoland,' for male choir with orchestra.

Amongst unpublished compositions, two choral Masses, a Requiem in D minor, a Magnificat for chorus and orchestra, a Missa Solemnis in B (1854), a Symphony in F minor (1862–63), a suppressed Symphony in D minor (1869) are the most important.

A. E.

BRUCKSHAW, KATHLEEN (*b.* Islington, Jan. 5, 1877; *d.* London, Oct. 10, 1921), an able pianist who also made some mark in composition. Her public career began with the performance of Rubinstein's concerto in D minor at the Crystal Palace, with August Manns. She was then 12 years old. Bernhardt Stavenhagen, who heard the performance, invited her to study with him at Weimar, where she worked for three years. During her time in Germany she played with the Berlin Philharmonic and at Munich. Later, she studied with Busoni. She played in orchestral concerts at most of the principal towns of England, and on Sept. 10, 1914, produced her own pianoforte concerto with Sir Henry Wood at Queen's Hall in one of the Promenade programmes, which was generally well received. The greater part of her compositions are for the pianoforte, and in writing for her own instrument she displayed an imaginative talent and a sound technical style.

The following is a list of her principal works:

CONCERTED MUSIC

Concerto for PF. and Orch. in C.
Sonata for PF. and vln. in 4 movements.
Quintet for PF. and strings.

PIANOFORTE

'In Remembrance' (Ed. MacDowell, Jan. 23, 1908).
'Romance' No. 1.
'Romance' No. 2.
'Moods.'
'Wind over a moorland track.'
Five 'Impressions.'

C.

BRUDIEU, JOAN (*b.* near Limoges; *d.* Urgell, Catalonia, 1591), a composer of French origin who spent the greater part of his life in Catalonia, and is known through his set of madrigals, published in 1585. He is first heard of in 1538–39 as a 'French singer,' who came to Urgell in the Pyrenees with four other French singers to take part in the Christmas festivities, for which he received 100 ducats. He seems to have been choirmaster at Urgell for nearly 40 years, during which time he revised the choir books in conformity with the recommendations of the Council of Trent. In 1578 his signature appears on a receipt in the archives of Santa Maria del Mar at Barcelona; in that year he returned to the mountains of Urgell for reasons of health. After passing through the times when a Huguenot invasion was expected, and the cathedral staff were issued with swords and firearms for the defence of their houses, he appeared in Barcelona in 1585 to arrange for the printing of his madrigals. They are dedicated to the Duke of Savoy, who passed through Barcelona after his marriage to Katharine of Austria at Saragossa; and there is little doubt that they were written to be sung during torchlight processions and by minstrels seated on platforms. The Duke, of course, like other noblemen of the time, was travelling with his own singers. The collection (Escurial Library) is entitled '*De los madrigales del [m]uy reverendo Ioan Brudieu, Maestro de Capilla de la Sancta Yglesia de la Seo de Urgell a quatro bozes.*' They were printed in Barcelona in 4 oblong partbooks, and include 16 madrigals, 5 of which have Catalan words, and the remainder Castilian, or ordinary Spanish. Those in Catalan include 'The Seven Joys of Mary,' and two poems by the celebrated Catalan poet, Auzías March. Amongst the others is a pæan in celebration of the Battle of Lepanto (1571), and an arrangement of the singing-game (*Las Cañas*) well known in Catalonia from ancient times, and suggestive of Jannequin in style. The edition by Pedrell and Anglès (Barcelona, 1921) is a faithful reproduction of the only known copy in the Escurial; it also includes a 'Missa defunctorum' (*a* 4) from the cathedral archives at Urgell.

J. B. T.

BRÜCKLER, HUGO (*b.* Dresden, Feb. 18, 1845; *d.* there, Oct. 4, 1871), in the course of a short career achieved something as a song writer.

Educated first at the Evangelical Choristers' Institution in Dresden, then at the Conservatorium, his many teachers included Haase of Dessau, Franz Schubert (violin), Carl Krebs (pianoforte), Julius Rietz (composition) and Thiele (singing). Brückler's published songs are:

Op. 1, 5 songs from Scheffel's 'Trompeter von Säkkingen' (Leipzig, Kahnt); op. 2, 9 songs from the same poem; 7 songs from his posthumous works, selected and edited by Adolf Jensen (Dresden, Hoffarth); and the ballad 'Der Vogt von Tenneberg,' edited by Reinhold Becker.

W. B. S.

BRÜLL, IGNAZ (*b.* Prossnitz, Moravia, Nov. 7, 1846; *d.* Vienna, Sept. 17, 1907), pianist and composer, received instruction from Epstein, Rufinatscha and Dessoff. The first of these played a concerto by his young pupil in 1861, which brought the composer into notice. In the following year Brüll wrote an orchestral serenade which was performed at Stuttgart in 1864. He appeared as a pianist in Vienna (where his parents had lived since 1849) and undertook several concert tours, performing, among other things, his own compositions with the greatest success. From 1872–78 he was engaged in teaching at one of the smaller institutions at Vienna, and was concerned in its direction from 1881. In 1878 he came to London, and played at no fewer than 20 concerts. By this time his opera 'Das goldene Kreuz' (produced Dec. 22, 1875, at Berlin) had obtained such success in different parts of Germany that Carl Rosa was warranted in producing it in London during the composer's stay. It failed to produce any remarkable effect. His compositions include:

OPERAS

'Die Bettler von Samarkand' (1864), 'Das goldene Kreuz' (1875), 'Der Landfriede' (1877), 'Bianca' (1879), 'Königin Mariette' (1883), 'Das steinerne Herz' (1888), 'Gringoire' (1892), 'Schach dem König' (1893), 'Gloria' (1896), 'Der Husar' (1898), and a ballet 'Champagnermärchen.

INSTRUMENTAL

Symphony op. 31, overture 'Macbeth' op. 46, 2 PF. concertos, a vln. concerto op. 41, a sonata for two pianos, a trio, and other works for PF. and strings, besides PF. pieces and songs.

BIBL.—HERMINE SCHWARZ, *Ignaz Brüll und sein Freundeskreis. Erinnerung an Brüll, Goldmark und Brahms.* (Vienna, 1922.)

BRUGIER (BRUHIER), ANTOINE, was, *c.* 1514–17, a singer at the Papal Chapel; composed a Mass, 'Mediatrix nostra,' 4 v. MS. *c.* 1494, and a number of chansons in various collective volumes; modern edition (*Eitner*).

BRUGUERA Y MORRERAS, JUAN BAUTISTA (18th cent.), a learned Spanish contrapuntist and maestro de capilla at Figueras, Catalonia, who in 1765 won the prize offered by the Catch Club for the most remarkable canon, for artifice and melody. This was a 'Beatus Vir' for 3 voices (canon 9 in 1), printed by Thomas Warren, Secretary of the Club, in:

'A fourth collection of catches, canons and glees . . . inscribed to the noblemen and gentlemen of the Catch Club at St. Albans' Tavern,' p. 13.

J. B. T.

BRUHNS, NIKOLAUS (*b.* Schwabstädt, Schleswig, *c.* 1665; *d.* Husum, 1697), organist, a pupil of his father, Paul Bruhns, and of his brother Peter (1641–98), who was a 'Rathsmusikus' at Lübeck, for the violin and the viola da gamba; he was afterwards a pupil of Buxtehude for the organ, and through his

influence got a post at Copenhagen; later on he was town organist at Husum. He was the greatest organist of his time, next to Buxtehude; three organ pieces are printed in Commer's *Musica sacra*, vol. i., and the State Library at Berlin contains a book of 13 cantatas and motets for choir and orchestra (*Q.-L.*).

M.

BRUMEL, Antoine (*b. circa* 1480; *d. circa* 1520), Flemish contrapuntist. A contemporary of Josquin, pupil of Okeghem,[1] he enjoyed a high reputation as a scientific musician. Of his life little is known beyond the fact that he survived Okeghem, and that in 1505 he was engaged at the court of Alfonso, Duke of Ferrara, where it is possible he lived till his death. The correspondence which passed and the terms of the proposed engagement are preserved in the State Archives at Modena, and have been printed by van der Straeten, *La Musique aux Pays-Bas*, vol. vi.

Brumel's compositions are almost exclusively sacred. He wrote at least 15 masses, 5 of which, including the inevitable Missa 'L'homme armé,' were printed by Petrucci as early as 1503. Others were published at Rome in 1519, and at Nuremberg in 1538 and 1539. Petrucci also printed several motets by him. Glareanus, who gave some extracts from Brumel's masses in the *Dodecachordon* (1547), thought that he excelled rather by industry and mastery of his art than by any natural aptitude for music. A curious example of his skill is given in Faber's *Institutiones musicae* (1553), namely, a composition in 8 parts, each of which is in a different ecclesiastical mode. Franchinus and Hermann Finck both speak of Brumel in terms of high praise. Some French 'chansons' of his are found in the following MSS.: Bologna, 148; Brussels, 11,239; Florence (2 MSS. in Instituto Musicale).[2]

Reprints of Brumel's works are given by Ambros and Expert.[3]

Bibl.—*Fétis*; *Q.-L.*; *Grande Encylopédie*: art. by Michel Brenet.

BRUNEAU, Louis Charles Bonaventure Alfred (*b.* Paris, Mar. 3, 1857), a composer whose chief claim to distinction is that he applied Wagnerian principles to French Opera, without being influenced by Wagner's musical style.

As his father and mother were devoted to music (the latter was a painter), playing the violin and piano respectively, it was natural that their son should be a musician; he learned the violoncello in order to be associated with them in chamber music. At 19 years of age he carried off the first prize at the Conservatoire, as a pupil of Franchomme, the eminent master of the violoncello. Bruneau was subsequently in the composition class of Massenet, and at the same time was a member of Pasdeloup's orchestra, when the works of Wagner were first making their way in Paris. A cantata, 'Geneviève de Paris,' with which the young composer competed for the prix de Rome, was rewarded only with the second prize, as the judges considered its tendencies too advanced for their entire approval. From the date of this work onwards Bruneau adhered with extraordinary steadfastness to the commands of his artistic convictions; he obeyed them absolutely, and never swerved from the path for the sake of popularity or profit. As a result of this his work is marked by a rare degree of unity of style.

In 1884 Pasdeloup performed his 'Ouverture héroïque' and 'Léda,' a choral symphony; the latter was followed in time by two others, 'La Belle au bois dormant' (1886) and 'Penthésilée.' These compositions, with a few chamber duets on a small scale and some half-dozen groups of songs, of which the most important are 'Dix lieds de France' (op. 21), 'Six chansons à danser' (op. 23) and 'Trois lieds de France' (op. 24), all set to words by Catulle Mendès, constitute, with the Requiem Mass (op. 19), his complete output apart from the numerous works which he wrote for the stage.

His first essay in dramatic music was a three-act opera, 'Kérim,' set to a libretto by Paul Milliet and Henri Lavedan, and given during a temporary season of 'opéra populaire' at the Théâtre du Château d'Eau in May 1887. The pretty, fantastic story is perhaps a little too slight in texture for an opera, and the Emir's search for the genuine tears which are to win the hand of his beloved is accomplished in rather too short a time; the oriental colouring is admirably given, and the love-music is remarkably sincere and unaffected, although here and there the influence of Massenet is to be perceived. The individuality and boldness of its harmonic design attracted the attention of musicians at the time of its production, and Bruneau, whose taste in literature is well illustrated by his choice of admirable poems of Catulle Mendès for the collections of songs already mentioned, desired to write an opera upon the subject of Zola's *Faute de l'abbé Mouret*. A libretto written on this novel had, however, been acquired by Massenet, but Bruneau became the happy possessor of a book written by Louis Gallet on Zola's *Rêve*, and his four-act opera was produced at the Opéra-Comique on June 18, 1891, with such success that it was given by the same singers at Covent Garden on Oct. 29 of the same year. At the time of its production, the structure of its melodies, its extraordinary harmonies, and the whole style of the piece, spread consternation among the more conservative of the French critics and the great majority of their English

colleagues. Nevertheless it was felt by the more open-minded hearers that a new dramatic style had been created, and that whether beautiful or the reverse, as mere music, the play was presented with a delicacy and charm of atmosphere that subtly conveyed its poetic beauty and fragrance. The characterisation of the ecclesiastic, M. de Hautecœur, of the girl Angélique, and of the other parts, is altogether admirable, and of this, as of all Bruneau's maturer works, it may be said that each has a definite atmosphere of its own which gives the dominant note to the opera as a whole.

For Bruneau's next opera, the same librettist prepared a book from Zola's *Soirées de Médan*, ' L'Attaque du moulin,' again in four acts, produced at the Opéra-Comique, Nov. 23, 1893, when the action of the story was transferred from the date of the Franco-German war to 1792 for political reasons. When it was given at Covent Garden, the original period was represented, and the piece gained greatly in interest and in what is called ' actuality.' It was presented here on July 4, 1894, with Mme. Delna in the part of the old housekeeper, Marcelline, a character invented for the opera, and one on which most of the charm of the work depends. In the light of his later works, the style of this piece is seen to be no such violent contrast with that of ' Le Rêve ' as was at first imagined ; the vocal parts are far more grateful to the singers, and there is less that is startling in the harmonic treatment ; it is simply maturer than the former opera, and must rank with the masterpieces of the modern stage, so vivid is its presentment of the circumstances of war, as they affect a peaceful household. It may be guessed that critics on both sides of the Channel had got used to Bruneau's ways of expressing himself, and that the change of front which they thought they discerned in him was in reality only a change in their own attitude towards a new style. The success of the opera was very remarkable, alike in Paris, the French provinces, and London.

In this work, Bruneau used for the last time the services of a librettist ; henceforward, he set the *ipsissima verba* of his favourite author, and in writing for music, Zola seemed to discover new and delightful qualities. He threw himself with such enthusiasm into the task of providing subjects for Bruneau, that the composer declared that he was supplied with libretti by Zola which would last his lifetime. In the natural course of events, the production of his next work, ' Messidor,' at the Opéra, would have set the crown of national and official recognition upon Bruneau's career ; but at the time of its production there, Feb. 19, 1897, the ' affaire Dreyfus ' was engaging the attention and heating the passions of the French people to such an extent that any work with which Zola's name was in any way connected was repudiated by the great majority of the people ; Bruneau had actively supported Zola in his championship of Dreyfus, and his sins were visited upon him in the practical banishment of his opera from the Parisian stage, notwithstanding the brilliant success of its first performances. It had an important revival at the Hoftheater of Munich, Jan. 15, 1903. It has been objected that the supernatural element and the whole episode of the Legend of the Gold is not entirely harmonious in style with the rest of the piece, which deals with humble men and women of the present day, and the want that is caused by the selfishness of a plutocrat who diverts the water of the river in order to get gold from it. Musically, however, the conjunction is perfectly intelligible, and the two warring motives of the gold, with its malefic influence, and the water, with the abundance it brings, are splendidly worked out ; the ballet music is most brilliant and entirely original, and the sowing song, ' Semence auguste,' with which the tenor concludes the second act, is built on a tune of such vigour and beauty that it must appeal to every hearer at once.

In ' Le Rêve ' the influence of the Church is felt throughout, in ' L'Attaque du moulin ' the presence of war dominates everything, and in ' Messidor ' the opposition of the gold and the water typifies in a fantastic form the war between capital and labour ; so in ' L'Ouragan,' too, there is one dominating influence, for the hurricane brings about the whole of the drama, from its opening to the final catastrophe. This work, like the others in four acts, was produced at the Opéra-Comique, Apr. 29, 1901, and was at once recognised as one of the finest of modern French operas. The rival sisters are admirably characterised, and the third female part, that of a girl foreign to the island where the action takes place, is finely contrasted with them. The idea of using prose as the medium of an operatic text, as Bruneau used it in ' Messidor ' and ' L'Ouragan,' though undoubtedly an innovation in its day, had already occurred to Gounod, who set part of Molière's *George Dandin*, and was approved by Berlioz, who did not, however, put his views into practice in his own works. Since then Charpentier in ' Louise,' Erlanger in ' Le Juif polonais,' and others have followed Bruneau's example, which could hardly be considered nowadays to require justification unless treated as a subject of academic debate. ' L'Enfant-Roi,' which succeeded ' Messidor ' and was produced at the Opéra-Comique, Mar. 3, 1905, was in a lighter vein than the preceding operas, and in spite of having a thesis (this time Zola was stressing the importance played by the child in a happy married life) remained fresh and lyrical not only in the scenes of the flower market and of the pastrycook's shop, in which two of the five acts are laid, but also in the moments of pathos and

deep sentiment such as the dialogue between husband and wife in the first act and the reconciliation of the three protagonists in the last. The consistent melodiousness of the music, the modernity and topical appeal of the story, which, like 'Louise' (produced two years before it), is dominated by the spirit of Paris, and to some extent, no doubt, its happy ending, all contribute to the success it scored with the public, and the purely musical qualities of the work found warm champions in Gabriel Fauré and other contemporary composers and critics.

Though Zola had written the libretto of 'L'Enfant-Roi,' he died three years before the production of the opera. Bruneau, who had been moved by the loss of so old and close a friend to compose 'Lazare,' an intimate work in one act, now had to depend on himself for his texts, and for his next opera, 'Naïs Micoulin,' in two acts, which was produced at Monte Carlo, Feb. 2, 1907. He himself adapted with certain radical alterations a short story by Zola which dealt in tragic, not to say melodramatic, fashion with the love of a young fishergirl for a worthless young man, and the revenge her father attempts to take upon discovering his faithlessness. Bruneau resisted all temptations to treat the theme in the spirit of conventional opera, approaching it in a mood of high seriousness and with a musical equipment that was equal to the fullest demands of pity and passion. Exactly a month later his dramatic version of Zola's story, *La Faute de l'abbé Mouret*, to which he had composed incidental music, consisting, besides a 'full dress' overture, mainly of interludes between the scenes, was produced at the Odéon. In 1912 an early ballet, 'Les Bacchantes,' founded on Euripides' play, appeared at the Opéra, and another opera, to a text by Zola, 'Les Quatre Journées,' was produced at the Opéra-Comique in 1917. Later came the comic opera 'Le Roi Canduale' (Opéra-Comique, 1920) and 'Le Jardin du Paradis' (Opéra, 1921).

Uncompromisingly sincere in all that he touched, Bruneau employed in his operas a type of melody that fitted the natural declamation of the words, and was essentially appropriate to the character and scene rather than readily quotable out of its setting; his harmony was individual and often crude, especially in the earlier works, his orchestration generally monotonous in colouring. Perhaps his most striking gift was his power of building up a scene to a climax, and seeing its theatrical possibilities, as here he was helped by his undoubted sense of drama, which enabled him to co-operate as a dramatist as well as a musician with the friend with whom he was so closely associated—Émile Zola.

It remains to speak of the non-operatic works of the composer. The 'Requiem,' the most important of these, was given in London by the Bach Choir on Feb. 25, 1896, and it was acknowledged as a work of great power, though not entirely free from *bizarrerie*. The way in which the plain-song of the 'Dies irae' is used is most impressive; it is delayed until just before the words 'Tuba mirum,' when it appears, flung, as it were, from side to side of the auditorium by trumpets that take the alternate notes; soon afterwards it is played in semiquavers instead of semibreves, with surprising effect, and finally is heard sung quietly by choristers in the organ-loft. The 'Lieds de France,' to words by Catulle Mendès, are mostly modelled on the traditional songs of the French peasantry, such as are gathered into the collections of Weckerlin and Bourgault-Ducoudray. 'Noces dans l'Or' might well be a genuine folk-song, 'L'Heureux Vagabond' is characteristic in no ordinary degree, and 'Le Sabot de frêne' has a brilliant and original accompaniment to a tune of rare charm. The six 'chansons à danser' are of a still higher order of lyrics, the suggestion being taken from the form of the old French dances.

Bruneau was decorated with the Légion d'Honneur in 1895, and at one time was a regular contributor to the *Gil-Blas* and *Figaro*, which he quitted in later years for *Le Matin*. Three volumes of criticisms, entitled *Musiques d'hier et de demain*, *La Musique française* and *Musique de Russie, et musiciens de France*, showed great critical insight, fine literary taste, and a trenchant style.

M.; addns. L. W. H.

Bibl.—Octave Séré, *Musiciens français d'aujourd'hui*, 1911; Arthur Hervey, *Alfred Bruneau* (*Living Masters of Music*), 1907.

BRUNELLI, Antonio (*b.* Bagnarea, late 16th cent.), studied at Rome, was organist and maestro di cappella at San Miniato, Florence, in 1606; at Prato Cathedral in 1610; and at the court of Toscana, 1614–16. He was one of the greatest contrapuntists of his time, and wrote *Regole utilissime per li scolari che desiderano imparare a cantare, sopra la pratica della musica . . .* (1606); *Regole e dichiarazioni di alcuni contrappunti doppii . . .* (1610). In the latter work he deals with the different species of double counterpoint and the improvised counterpoint used by singers in the church, called 'contrapunto alla mente'; in France, 'Chant sur le livre.' A book of exercises, 'Varij esercizij . . .' (1605 and 1617), is for 1 and 2 voices or for cornetts, German flutes, violins, etc. He composed several books of madrigals, motets, canzonets, etc.; 2 books of sacred songs, 1-5 v.; 1 book of Requiems (Venice, 1619); 12 psalms in MS., and a ballet which has been republished by Eitner (*Q.-L.*; *Fétis*).

BRUNETTE is defined by Diderot and d'Alembert, in the *Encyclopédie*, to be a kind of chanson, with an easy and simple air, and

written in a style which is gallant, but without affectation, and often tender and playful. The term is generally believed to have come from the young girls, 'petites brunes' or 'brunettes,' to whom these songs were so frequently addressed. The Brunettes were generally anonymous; they were very much in vogue in France at the end of the 17th century and the greater part of the 18th. The publisher, Christophe Ballard (*q.v.*), issued 3 books of 'Brunettes, ou petits airs tendres avec les doubles et la basse continue mêlés de chansons à danser' (1703–4–11). He maintains that the term was derived from the great popularity of a particular song in which the word was used. About 1740 the flautist Blavet published 2 books of Brunettes. A well-known specimen is 'Dans notre village,' called in some collections 'Nous étions trois filles à marier,' and attributed to Lefèvre. M. L. P.

Bibl.—*La Grande Encyclopédie*, vol. viii.: article *Brunette* by Michel Brenet. Paul Marie Masson, *Les Brunettes* (*S.I.M.* iii. 1911).

BRUNETTI, Domenico (*b.* Bologna, late 16th cent.), organist in 1609 and maestro di cappella in 1620 at Bologna Cathedral. In 1633 he founded the Academy of the Filaschisi. He composed 'L'Euterpe,' a book of madrigals, canzonets, etc. (1606); 'Varij concentus,' vocal pieces for the church, 1609; 'Canticum deiparae virginis,' etc., op. 3, 1621. E. v. d. S.

BRUNETTI, (1) Gaetano (*b.* Pisa, *c.* 1753; *d.* Madrid, 1808), violin-player and composer.

He was a pupil first of his father, Antonio Brunetti (*b. circa* 1726), maestro of the cathedral at Pisa from 1752, an able musician, and afterwards of the celebrated Nardini at Florence, whose style of playing and composing he adopted with considerable success. The greater part of his life he spent at Madrid, attached to the court of the Prince of Asturias, afterwards Charles IV. Here he came into close connexion with Boccherini, then at the height of his fame as a performer and composer, and appears gradually to have superseded that artist in the favour of the court and the public. With the symphonies, serenades and other instrumental works which he wrote for the King and the Duke of Alba he was eminently successful. They appear to be very much in the style of Boccherini; but on the whole inferior to the works of that master. His numerous compositions—published at Paris—consist of symphonies, serenades, sextets, quintets and violin duets. Six symphonies, six quintets and six sextets are mentioned in the *Q.-L.* Over 200 works of his remain in MS. P. D.

(2) Giovanni Gualberto (*b.* Pisa, *c.* 1760), another son of Antonio Brunetti of Arezzo, followed his father as maestro di cappella at Pisa Cathedral. He composed numerous works for church music. Many being only signed with the family name, their identification is difficult and doubtful. Between 1786 and 1790 he composed 6 operas, enumerated by Fétis (*Q.-L.*).

BRUNETTI, Giovanni, a 16th-17th century church composer of Urbino; 3 books of motets and 2 books of psalms were published by Aless. Vincenti, Venice, 1625–26. E. v. d. S.

BRUNI, Antonio Bartolommeo (*b.* Coni, Piedmont, Feb. 2, 1759; *d.* there, 1823), violinist and composer; a pupil of Pugnani; lived from 1781 at Paris, first as orchestral player at the Italian Opera, and afterwards as conductor of the Opéra-Comique.

He wrote operas, some of which achieved considerable success, although all are now forgotten (see *Q.-L.*). For the violin he wrote 4 sets of sonatas, several concertos, 9 books of quartets, 5 books of trios, and 28 sets of violin duets, the latter well known to professors as useful pieces for teaching purposes; also a *Méthode de violon* and a *Méthode pour l'alto-viola.* P. D.

BRUSSELS. The city of Brussels, with its seven 'faubourgs,' contains almost a million inhabitants. Its musical life may be summarised as follows:

(1) Scholastic.—The town is the seat of one of the five 'Royal' Conservatoires of Belgium. This title is given to state institutions helped by subsidies from the province and the town. Founded in 1832 the Conservatoire took the place of 'L'École Royale de Chant,' founded in 1823. Its former directors have been Fr. Fétis (1833–71), F.-A. Gevaert (1871–1908), Edg. Tinel (1908–12), Léon Du Bois (1912–25). The present (1927) director is Joseph Jongen. The director is assisted by an 'Administrateur - Trésorier.' The institution works under the auspices of a committee, on which the state, the province and the town are represented. The teaching comprises all branches of the theory and technique of music. The professional staff numbers 87 and the pupils 650 (1927). Instruction is free except for an entrance fee, which is 40 francs for Belgians and 400 francs for foreigners. The Conservatoire possesses a library and a museum of instruments. The library (Charles van den Borren, librarian) contains 32,100 catalogue-numbers, and is one of the most valuable musical libraries in the world. (It must be remembered that Fétis's celebrated library acquired by the state is not at the Conservatoire but in the Royal Library of Belgium.) (See Libraries.) The museum (curator, Ernest Closson) is also very valuable and contains 3300 exhibits, many of which are unique or rare. The collection is not adequately housed.

In addition to the Royal Conservatoires Belgium has many schools of music, sometimes called Academies of Music or 'Conservatoires' ('non-royal'). These schools (at which only the rudiments of musical theory and the

principal instruments are taught) belong to the communes, and receive subsidies from the state and the province. Several of the Brussels 'faubourgs' have their schools of music—the principal are: that of St. Josse-ten-Noode and Schaerbeek (belonging to these two communes), directed in succession by H. Warnots, Gustave Huberti and now (1927) by Alfred Mahy (32 professors and 770 pupils); that of Ixelles (called the 'Institut des Hautes Études musicales et dramatiques'), founded and directed by H. Thiébaut (33 professors and 430 pupils); that of St. Gilles, directed formerly by L. Soubre and now by Raymond Moulaert (16 professors and 500 pupils).

(2) Theatrical.—The principal theatre of Brussels is the 'Théâtre royal de la Monnaie,' so called from an 'atelier monétaire' which occupied the site in the 17th century. The theatre was founded in 1700, but has been rebuilt three times. The present building dates from 1856 and belongs to the town, which chooses the directors. The latter are (1927) Corneil de Thoran, Van Glabbeke, Spaak. The Théâtre de la Monnaie is subsidised by the town, the state and the province; opéra, opéra-comique and ballet are given there. The repertory is based on the modern French school with the addition of a few foreign or classical works, and each year a new Belgian work. Before the war the season used to conclude with a cycle of Wagner, given in German by German artists.

Formerly the smaller Brussels theatres were devoted to light opera, but this has been abandoned gradually in favour of 'revues' and cinemas.

(3) Concerts.—Orchestral concerts are few because of their great expense. There are about 15 each season (or 30 counting public rehearsals). The Conservatoire gives 4 annually, each preceded by 2 rehearsals. Except for specially engaged soloists the orchestra and choirs are composed of professors, selected pupils and former professors and pupils. The concerts were conducted by the director of the Conservatoire, but in 1926 Defauw took charge of them. These concerts are subscribed for, the profit received being divided amongst the performers. Under Fétis the programmes were exclusively classical. Gevaert added some modern composers, such as Wagner and Franck, but excluded the works of living composers. Under Tinel and Du Bois the programmes have become more and more modern, but the above exclusion is still maintained.

Next to the Conservatoire concerts the most important institution consists of the Popular Concerts of classical music (Concerts populaires de Musique classique), undertaken by a committee which chooses an administrator. Founded in 1865, they were directed successively by Vieuxtemps, Adolph Samuel, Joseph Dupont, Sylvain Dupuis, Edouard Brahy and, to-day (1927), by Franz Rühlmann. These concerts cannot strictly be described as 'popular,' because they appeal to the same public as the Conservatoire concerts, nor are they strictly classical; they keep the public *au courant* with all the movements of contemporary music. Before the war there were 4 of these Popular Concerts yearly. To-day, under the energetic administration of Le Bœuf, the number has been raised to 8, in addition to several performances with small orchestra.

In 1895 Eugène Ysaÿe founded the symphony concerts given under his baton, which held an important place in the artistic development of Brussels. They were started again for a short time after the war, and have since been transformed into concerts of chamber music and recitals. When Ysaÿe's connexion with these concerts ceased they still kept his name. To the Conservatoire concerts and the Popular Concerts have been added during the last six years the 'Concerts spirituels,' at first directed by Bouderenghien and later by Joseph Jongen. There are 3 each season, presenting religious music for solo voices, choir and orchestra (oratorios, etc.). In addition to the Conservatoire concerts, Defauw also organises each year some symphony concerts under his own direction.

In addition to the symphony orchestras, Brussels possesses some notable wind bands, such as 'La Phalange artistique' and 'Le Cercle instrumental' (composed of amateurs), and specially the band of the 'premier Régiment des Guides' (the Royal Band), under Lieut. Prévost, which perform the most modern and difficult works (Stravinsky, etc.), original or transcribed. Amongst the amateur male voice choirs the most important is that of 'Les Artisans réunis.' There is only one ladies' choir in Brussels, 'La Chorale César Franck,' whose activity is confined to the 'Concerts populaires' mentioned above. The only mixed choir of any importance is that of the 'Concert spirituel,' a fact which explains the rarity in Brussels of those performances with choir and orchestra so frequent in Anglo-Saxon and Teutonic countries. Minor mixed choirs are the 'Schola Cantorum' (director, E. Vandevelde) and the 'Concerts anciens' (L. Baroen), which make a speciality of the polyphonic works of the 16th century.

Amongst the chamber music societies must be specially mentioned the 'Pro Arte' quartet (Onnou, Halleux, Prévost, Maas), which organises each year in collaboration with Paul Collaer concerts devoted to the most advanced music of all countries. On the other hand, the Zimmer quartet (Zimmer, Baroen, Ghigo, Gaillard) devotes itself to classical music. Varied programmes (chamber music, songs, piano) are organised by 'La Société Nationale des Compositeurs Belges,' by the pianist, A. van

Dooren ('Heures de musique'), and by the violinist, L. Guller ('Concerts classiques'). In addition to these more or less regular performances, a great number of concerts and recitals are given in Brussels during the season, sometimes as many as 3 concerts being given in one evening. Finally should be mentioned the numerous meetings organised by the 'Cercle artistique et littéraire' and by the 'Cercle musical,' important private associations, as well as the lectures and concerts organised specially at the 'Institut des Hautes Études de Belgique.' E. C.

BRYNE (BRYAN, BRIAN), ALBERTUS (*b. circa* 1621), organist, received his musical education from John Tomkins, organist of St. Paul's.

It was probably on the death of his master in 1638 that Bryne obtained the same post, which he held until the Commonwealth. At the Restoration he was reappointed, a petition for the post of organist at Whitehall Chapel having been presented to the King on his behalf. After the great fire he became organist of Westminster (1666), a post which he probably retained until the appointment of Blow in 1668. He is said to have died in that year. One of his name (possibly a son) was organist and fourth fellow of Dulwich College from 1671–77. A 'Mr. Bryan,' who was appointed organist of Allhallows', Barking, in 1676, till his death in 1713, with a salary of £18 per annum, may possibly have been the same person. In *The Virgin's Pattern* (Life of Susanna Perwick), 1661, among the famous musicians of the time, mention is made of 'Albertus Bryne, that famous velvet-fingered organist.' A Morning and Evening Service by him are in many collections, and he wrote besides many sets of words for anthems, as well as dances, 'grounds,' etc. (*D.N.B.*, etc.)

The following compositions also exist in MS. :

Whole Service in C. Yk., Add. MSS. 31,443/41 (score).
Service in G (*a* 4). (T.D., J., K., C., M., N.D.). Ch. Ch. 1002 (score) (printed in Arnold's *Cath. Mus.*, 1842).
'I heard a voice.' Yk., Add. MSS. 30,931/162 (score)
'How long.' Yk.

W. B. S., with addns.

BRYSON, ROBERT ERNEST (*b.* Mar. 31, 1867), composer, made his living as a member of the Liverpool Cotton Association, but devoted much of his spare time to the study of music. His master for composition was Dr. W. H. Hunt of Birkenhead.

The fact that Bryson never followed a professional musician's career may account for the comparative neglect which his work by no means deserves, for it is in no sense that of an amateur, being distinguished by great earnestness of purpose and finish of technique. His forms are classical in outline and his texture is elaborately contrapuntal, but all his resources are moulded to the expression of his own very definite personality and his essentially modern outlook.

The following is a list of Bryson's chief works:

Symphony No. 1 in D (produced by Prof. Granville Bantock at Liverpool, 1908); Symphony No. 2 in C (Carnegie Trust); Idylls of a Summer Day, for orchestra (produced at the Musical League Festival, 1909); 'Voices,' a study for orchestra (produced by Sir Henry J. Wood at the Promenade Concerts, 1910); 'Vaila,' Fantasy for string orchestra; 'A Last Harvest,' song-cycle with orchestra to poems by Philip Bourke Marston; Opera in four acts, 'The Leper's Flute,' founded on a play by Jan Colvin (produced by the B.N.O.C., Glasgow, Theatre Royal, Oct. 15, 1926); choral works: 'The Stranger,' with orchestra (produced by the Liverpool Philharmonic Society), 'The Cloak, the Boat, and the Shoes' (Yeats), 'Easter Hymn' (Spencer), and 'Drum Taps' (Walt Whitman). Bryson has also written 2 string quartets, Sonatas for piano, organ and violin, a number of songs, and shorter pieces for piano and organ.

E. B.

BUCCINA, an instrument of the bugle type of bore. It was curved to nearly a circle, and the bell rested on the shoulder of the player. A specimen found at Pompeii and now preserved at the National Museum at Naples is pitched in G; its proper tones therefore correspond with those of the modern French horn when crooked in G. (*PLATE LXXXIII.* 8.) D. J. B.

It is from the term Buccina that the German POSAUNE is derived, *e.g.* Bucina, buccine, bocine, buxine, buisine, bosine, buze, buzune, pusine, puzine, although the trombone and buccina are quite distinct. All these spellings are found in the old MSS. F. W. G.

BUCENUS (BUCAENUS), PAULUS. In 1578 he calls himself 'Philorodus Rigensis Cantore.' He composed Passion music for the church at Riga. The 'Musikfreunde' in Vienna has a St. Matthew Passion *a* 6 v. in MS. by him, which Eitner thinks to be the same as the preceding one. Of his many masses and other important church compositions many are unfortunately incomplete, including his 55 motets and 'Sacrae cantiones' 5 and 4 v. E. v. d. S.

BUCHNER (BUCHER, PUCHNER), JOHANN (*b.* Ravensburg, Würtemberg, Oct. 26, 1483; *d.* before 1541). In his contract with the chapter of Constanz Cathedral of 1512, he calls himself 'Buchner the Younger.' According to Luscinius (*Musurgia*, 1536), he was a pupil of Paulus Hofhaimer. In a document of 1544 he is spoken of as deceased. As organist and composer he stood in high repute among his contemporaries. In 1526 he left Constanz in company with the whole Catholic clergy on account of the growing Protestantism. Apparently he went to Zürich, where his daughter was living, in 1544, and an autograph theoretical treatise is preserved in the town library. Various collective volumes contain sacred and secular songs and organ pieces, 35 of the latter having been republished in the 'Vierteljahrsschrift für Musikwissenschaft,' vol. v. 1.

E. v. d. S.

BUCHNER, PHILIPP FRIEDERICH (*b.* Wertheim, Franken, Sept. 10, 1614; *d.* Würzburg, Mar. 23, 1669), studied at Frankfort-on-M., visited France and Italy, and was Kapellmeister successively of the Elector of Mayence and the Prince of Würtemberg. From 1642–1644 he was musician of the 'Palatino e generale di Cracovia.' He composed two books of 'Concerti ecclesiastici' (vocal); 'Sacrarum cantionum . . . op. 3'; 'Plectrum musicum . . .'

(containing 24 sonatas), op. 4; 'Harmonia instrumentalis.' The church library of the Liebfrauenkirche at Würzburg contained at one time 12 masses, 41 offertories and about 21 sonatas by him. E. v. d. s.

BUCK, Dudley (*b.* Hartford, Connecticut, Mar. 10, 1839; *d.* Orange, New Jersey, Oct. 6, 1909), an American composer and organist. Intended for business, he showed at an early age a taste for music. He was organist in Hartford, having studied three years in Trinity College, in that city, until his departure for Europe in 1858. There he studied at Leipzig under Hauptmann, Richter, Plaidy and Moscheles. Later he was a pupil of Schneider at Dresden, and spent a year in Paris. On his return to America in 1862 he was church organist in Hartford and Chicago successively, where his reputation as an organist steadily increased. In 1875 Theodore Thomas invited him to New York to be assistant conductor of his orchestral concerts in Central Park Garden. In 1877 Buck became conductor of the Apollo Club in New York, continuing his work as a church organist there till his retirement in 1903.

In 1876 Buck was invited to write 'The Centennial Meditation of Columbus' for the Centennial Exposition at Philadelphia. In 1880 his cantata, 'The Golden Legend,' won the prize offered by the Musical Festival Association of Cincinnati, where it was performed at the Musical Festival of that year. In 1885 his 'Light of Asia' was performed at Novello's oratorio concerts in London. Both of these cantatas had a considerable popularity in the United States.

Besides composing in all the musical forms, Buck was the author of *Illustrations in Choir Accompaniment*; *The Influence of the Organ in History*; and a *Dictionary of Musical Terms*. His principal compositions are:

Deseret, comic opera.
Marmion, symphonic overture.
Chorus of Spirits and Hours, male chorus.
King Olaf's Christmas, male chorus.
The Nun of Nidaros, male chorus.
Voyage of Columbus, male chorus.
Paul Revere's Ride, male chorus.
Centennial Meditation of Columbus, mixed chorus.
Legend of Don Munio, mixed chorus.
The Golden Legend, mixed chorus.
Easter Morning, mixed chorus.
The Light of Asia, mixed chorus.
The 46th Psalm, mixed chorus.
The Christmas Year (a series of five cantatas), mixed chorus.
Anthems, offertories and other church music.

R. A.

BUCK, Percy Carter, Mus.D. (*b.* West Ham, Essex, Mar. 25, 1871), was educated at the Merchant Taylors' School in 1881–88, and in the latter year entered the R.C.M., studying under Parratt, Lloyd, Parry and others, and winning an organ scholarship. He was at the R.C.M. until 1892, and before leaving, had been appointed in 1891 organist of Worcester College, Oxford, 1891–94. In 1891 he took the Mus.B. degree, in 1893 that of Mus.D., and that of M.A. in 1897. In 1896–99 he was organist of Wells Cathedral, and of Bristol Cathedral in 1899–1901, in which year he was appointed director of music at Harrow School, a post in which he has won great distinction. He has acted as examiner in music for the Universities of Oxford and London, and in 1910 was chosen to succeed Professor Prout as professor of music in the University of Dublin, and occupied the chair until 1920. In 1925 he was appointed King Edward Professor of Music in the University of London. His compositions include:

A MS. overture, 'Cœur de Lion,' op. 18; a fine quintet for piano and strings, op. 17; a string quintet in G, op. 19; a sonata for violin and piano, op. 21; and a quartet for piano and strings, op. 22.

Pianoforte pieces, organ pieces, anthems and songs have been published.

Besides his personal work at Harrow, Buck has accomplished much in English musical education. As a member of the Board of Professors of the R.C.M. he has taken a foremost part in the establishment of a Teachers' Course since 1919, and his lectures on psychology have been an important factor in the success of that course. He has exerted a consistent influence in favour of the more liberal treatment of examinations in musical theory at the various universities and colleges with which he has been connected, particularly the Royal College of Organists, of which he has been president. As a member of the Editorial Committee for the publication of 'Tudor Church Music' (Carnegie Trust), his careful studentship has found scope, and his skill as a contrapuntist has been invaluable in the supply of missing parts. Besides the educational books mentioned below, Buck has contributed important articles to many periodicals, and he is a contributor to the present edition of this Dictionary.

EDUCATIONAL BOOKS

Unfigured Harmony (1911); *Organ Playing* (1912); *The First Year at the Organ* (1912); *Acoustics for Musicians.*

M.; with addns. C.

BUCKMAN, Rosina (*b.* Blenheim, New Zealand), soprano, came to England at the age of 16 and studied for a time at the Birmingham School of Music, but had to return home on account of ill-health. She made her début in Australia with the Melba Grand Opera Co. in 1911, was in England again two years later, and was heard at Covent Garden in 1914. In 1915 she joined the company of singers soon taken over by Sir Thomas Beecham, and became a leading soprano in the Beecham Opera Company, her best parts being Aïda and Isolde. She sang in the grand seasons at Covent Garden in 1919 and 1920, and in 1922–23 she went on a concert tour round the world with her husband, Maurice d'Oisly.

S. H. P.

BÜHLER (Biehler), Pater (also Abt, Abbé) Franz (with monastic name Gregorius) (*b.* Schneidheim, Apr. 12, 1760; *d.* Augsburg,

Feb. 4, 1824), entered the monastery of the Holy Cross, Donauwörth, in 1778, and was ordained priest, 1785. He forsook monastic life in 1794 and became organist at the collegiate church of Bozen, Tyrol. In 1801 he was Kapellmeister at Augsburg Cathedral. He was a prolific church composer and wrote with great facility. A long list of masses and other church music, songs, instrumental duets, trios, sonatas, fantasias and variations, for different instruments, 12 allemandes for PF. and some theoretical works are given in *Q.-L.* Many of his works have been republished in the course of last century. E. v. d. S.

BÜHLIG, Richard (*b.* Chicago, Dec. 21, 1880), pianist, studied under Leschetizky in Vienna. He gave a series of four piano recitals in London in Nov. 1906, devoting his first programme to Bach and Brahms, and subsequently made a special reputation as a player of Brahms. He made his début in America with the Philadelphia Symphony Orchestra in Nov. 1907, and has since toured much both in Europe and America. From 1918–20 he taught at the Institute of Musical Art in New York. C.

BÜLOW, Hans Guido, Freiherr von (*b.* Dresden, Jan. 8, 1830; *d.* Cairo, Feb. 12, 1894), the foremost pianist of that most advanced school of pianoforte-playing founded by Chopin and developed by Liszt. He was a first-rate conductor, and a musician whose technical attainments and complete knowledge of the art from its germs to its very latest development were rivalled by few contemporaries and surpassed by none.

In early youth von Bülow seems to have shown neither talent for music nor delight in it. Both gifts first made their appearance after a long illness, but then in a supreme degree. After his 9th year he was placed under Friedrich Wieck, the father of Clara Schumann, who laid the solid foundations for his future technical achievements. From about 1841–45 he studied with Hesse, Hauptmann, Plaidy and M. K. Eberwein. His parents were at Stuttgart from 1846–48, and here Hans made the acquaintance of Raff, Molique and others. In 1848 he entered the University of Leipzig to begin the study of jurisprudence, his parents having always looked upon music as a mere pastime. At Leipzig he continued his studies in counterpoint under Hauptmann. He met Liszt for the first time in June 1849 at Weimar. In Oct. 1849 we find him a member of the University of Berlin, absorbed in the political movements of the time, and contributor to a democratic journal *Die Abendpost.* In this paper he first began to announce and defend the musical doctrines of the new German school led by Liszt and Wagner. A performance of 'Lohengrin' at Weimar in 1850 under Liszt moved him so intensely that he threw over his career as a lawyer, went to Zürich, and entrusted himself to the guidance of Wagner. After some more or less tentative experiments in theatrical conducting at Zürich and St. Gall (1850–51), he went, in June 1851, to Weimar to study pianoforte-playing under Liszt, and in 1853 made his first concert tour, playing at Vienna, Pest, Dresden, Carlsruhe, Bremen, Hamburg and Berlin. From 1855–1864 he occupied the post of principal master of pianoforte-playing at the conservatorium of Professors Stern and A. B. Marx, at Berlin. Here we find him organising trio soirées, orchestral concerts and pianoforte recitals, with programmes of the most varied character, though with a decided leaning towards the works of the new German school, writing articles for various political and musical papers, making journeys through Germany and the Netherlands, and Russia, and reaping laurels everywhere as player and conductor. In 1857 he married Liszt's daughter Cosima (afterwards the wife of Wagner). In 1864 he was called to Munich as principal conductor at the royal opera, and he became in 1867 director of the Conservatorium. It was there that he succeeded in organising model performances of Wagner's 'Tristan und Isolde' and 'Die Meistersinger von Nürnberg.' In 1869 von Bülow's wife left him for Wagner; a divorce followed and he left Munich, taking up his residence in Florence for some years; concert tours in different parts of the world filled up the chief part of his time; he appeared for the first time in England at the Philharmonic Concert of Apr. 28, 1873; in America in 1875–76 he gave 139 concerts. On Jan. 1, 1878, he was appointed Kapellmeister of the Hoftheater at Hanover, and in Oct. 1880 became Hofmusikintendant to the Duke of Meiningen. During the five years of his tenure of this post he did wonders with the orchestra, forming it into an unrivalled body of players. In 1882 von Bülow married Marie Schanzer, an actress of the Meiningen theatre. After his resignation of the Meiningen appointment, in Oct. 1885, he directed various sets of concerts in Berlin, St. Petersburg, etc., and employed his exceptional talents as a teacher in the Raff Conservatorium at Frankfort, and in Klindworth's establishment in Berlin. He also conducted a Musical Festival at Glasgow in 1878. He took up his residence in Hamburg in 1888, in which year he appeared for the last time in London. Ill-health compelled him to undertake a journey to Egypt, where he died.

As a pianist von Bülow's repertory embraced the master works of all styles and schools; it would in fact be difficult to mention a work of any importance by any composer for the pianoforte which he did not play in public, and by heart. His prodigious musical memory enabled him

also as a conductor to perform feats which had never before been attempted, and will in all likelihood not be imitated. The distinctive peculiarity of both his playing and conducting may be set down as a passionate intellectuality. All details were thought out and mastered down to the minutest particle ; all effects were analysed and calculated with the utmost subtlety, and yet the whole left an impression of warm spontaneity. This is the highest praise which can be awarded to an executant. It does not, perhaps, apply to all of Bülow's appearances in public, but it applies strictly to his performances at their best ; and it is but bare justice to measure the achievements of a great artist as one measures a mountain chain, by the peaks rather than by the valleys. The analytical and reconstructive powers just emphasised render his editions of classical pianoforte works, such as those of Beethoven's sonatas, variations and bagatelles, from op. 53 onwards, of Cramer's studies, of selections from Sebastian and Emanuel Bach, from Handel, Scarlatti, etc.—in which he has indicated the most refined phrasing and fingering, as well as the most minute nuances of tempo and expression, and has corrected presumable misprints and inaccuracies—unique and invaluable to the student.

In addition to these his admirable pianoforte arrangement of Wagner's 'Tristan und Isolde,' together with that of the overture to 'Die Meistersinger' and 'Eine Faust-Ouvertüre,' as well as the arrangements of Weber's two concertos and the Concertstück for pianoforte solo, should be mentioned. Among his more important compositions the following have been published:

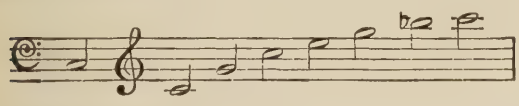
Op. 20, 'Nirwana, symphonisches Stimmungsbild'; op. 10, Music to Shakespeare's 'Julius Cæsar'; op. 16, Ballade for Orchestra, 'Des Sängers Fluch'; op. 23, 'Vier Charakterstücke für Orchester, (1) Allegro risoluto, (2) Notturno, (3) Intermezzo guerriero, (4) Funerale.'

Among his pianoforte pieces especial attention should be called to his op. 21, 'Il Carnovale di Milano.' E. D., with addns.

BIBLIOGRAPHY

Briefe Bülows und ausgewählte Schriften. Vols. I. and II., *Briefe*, 1841–55; Vol. III., *Schriften*; Vols. IV.-VIII., *Briefe*, after 1855.
Letters (Vols. I. and II. of the above) translated into English by Constance Bache. There have been many German biographies, amongst which those by H. Riemann (1908) and R. du Moulin-Eckart (1921) are the more important.

BÜRDE-NEY, Jenny (*b.* Gratz, Dec. 21, 1826; *d.* Dresden, May 17, 1886), soprano singer. Her maiden name was Ney and she was said by Pougin to be a relative of Marshal Ney. She first appeared in opera at Olmütz (1847), afterwards at Prague, Lemberg and Vienna (1850–53), and finally at Dresden.



In the last-named city, where she first appeared Dec. 1853, as Valentine, she attained a great reputation as the successor of Schroeder-Devrient, and was engaged there until her retirement from the stage in 1867, having in the meanwhile married, Jan. 31, 1855, Paul Bürde, an actor at the same theatre. In 1855–56 she was engaged at the Royal Italian Opera, Covent Garden, and Lyceum. She first appeared Apr. 19, 1855, as Leonora ('Fidelio'), on the occasion of the state visit of Queen Victoria and the Emperor and Empress of the French, on whose account no attention was paid to the singer. She repeated this part twice, but was very coolly received. Professor Morley remarked her performance with favour in his *Journal of a London Playgoer.* On May 10, 1855, she was better received as Leonora on the production in England of 'Trovatore,' the only other part she played during her engagement. A. C.

BÜSSER, Paul Henri (*b.* Toulouse, Haute Garonne, Jan. 16, 1872), French composer and conductor. He was trained at the Paris Conservatoire, obtained the Grand Prix de Rome (1893), as pupil of E. Guiraud, for the cantata 'Antigone.' He has been organist at St. Cloud, and since Dec. 10, 1904, has conducted the Conservatoire choral class, replacing G. Marty. He is director of the École Niedermeyer. He acted as chorus-master at the Opéra-Comique, and occupies with distinction a post as one of the conductors at the Opéra. His musical activity has displayed itself in works of varying styles, in which he appears wholly at ease. He has written masses, motets, orchestral pieces, 'Hercule au jardin des Hespérides,' 'Suite funambulesque,' songs, choruses for female voices, etc., and revised Marc Antoine Charpentier's 'La Couronne de fleurs' (pastoral by Molière). His dramatic works are: 'Jane Grey' (1891), 'Daphnis et Chloe' (Opéra-Comique, 1897), 'La Ronde des saisons,' a ballet (Opéra, Dec. 23, 1905), 'Colomba' (Nice, Feb. 4, 1921), 'Les Noces corinthiennes' (Opéra-Comique, May 10, 1922), 'Les Trois Sultanes,' incidental music (Deauville, Sept. 8, 1923). M. L. P.

BUFFARDIN, Pierre Gabriel (*b.* Provence, 1690; *d.* Dresden, Dec. 1739), a famous French flautist, educated at Marseilles. In 1713 he was at Constantinople, where Joh. Jac. Bach was his pupil. On Nov. 25, 1715, he was engaged for the court chapel at Dresden, where, in 1741, his original salary had been doubled (to 1000 thaler per ann.). In 1749 he was pensioned with 700 thaler per annum. Buffardin was one of the first to raise the technique of the flute to the level of modern virtuosity, and for some time he was the master of the famous Quantz. A MS. concerto of his for 5 flutes, 2 violins, a viola and basso, is in the Schwerin court library.

BUGLE (Eng. and Fr.) (Ger. *Flügelhorn*; Ital. *tromba*), a treble instrument of brass or copper, differing from the trumpet in having a shorter and more widely conical tube, with a less expanded bell. It is played with a cupped mouthpiece. In its original form the bugle is the signal horn for the infantry, as the trumpet

is for the cavalry (see MILITARY SOUNDS AND SIGNALS); formerly it was usually tuned in C, with an extra B♭ crook. The regulation bugle of the British Army is now in B♭ only, and, as it is treated as a transposing instrument, the calls are still written in the key of C. Only five sounds are required for the various calls and signals. These are the intermediate open notes of the tube, from C below the treble stave to G above it. Eight sounds, however, can in all be obtained, by the addition of the B♭ and C above high G, and the octave of the lowest C, which is the real fundamental note. With these additions the entire compass is as follows :

Two methods have been adopted for bridging over the gaps between the open notes of this instrument, viz. keys and valves. See *PLATE LXXIV.* 9. W. H. S.

In 1810 Joseph Halliday, the bandmaster of the Cavan Militia, patented an invention by which keys controlling side-holes were added to the bugle, so that the chromatic degrees between the second and third harmonics, *c′* to *g′*, were obtained. A similar application of keys to the trumpet was known fifty years earlier; but the bugle, by its proportions, was more suited for key-work than the trumpet. The KEY-BUGLE (*q.v.*), called also the 'Kent bugle' and 'Regent's bugle,' said to have been so named in consequence of a performance upon it before the Duke of Kent by Halliday in Dublin, became extremely popular, and from about 1820 to 1835 was, next to the clarinet, the principal solo instrument in military bands. At about the latter date it began to be superseded by the cornet-à-pistons as a solo instrument, but the valve-bugle or modern flügelhorn might well take a more prominent part in our bands than it does. As in the valve instrument every note speaks from the bell, it possesses more uniform quality than the key-bugle, yet the latter had perhaps some advantage of clearness in shakes and rapid passages. (See FLÜGELHORN; SAXHORN.)

To the ordinary bugle as made in C a valve attachment is sometimes added, converting it into a valve instrument pitched either in B♭ or in E♭ a fifth lower. This contrivance was patented by Henry Distin, and is useful for bugle bands. D. J. B.

BUHL, JOSEPH DAVID (*b.* near Amboise, 1781), trumpeter, son of a musician in the service of the Duc de Choiseul.

He was successively a member of the band of the 'Garde parisienne,' organised 1792, and of the Consuls' 'Grenadiers de la Garde.' He was also professor at the cavalry school of trumpeters at Versailles, from its foundation in 1805 to its abolition in 1811. In 1814 he was appointed by Louis XVIII. conductor of the band of the Gardes du Corps, and received the Legion of Honour. In 1816 he became first trumpeter at the Opéra, and at the Théâtre Italien; but owing to an accident at the coronation of Charles X. was compelled to relinquish both appointments in 1825. In 1823 Buhl introduced into France the slide-trumpet (à coulisse), invented by Haltenhoff of Hanau. He published a *Method for Trumpet* (Paris, Janet), and was editor of the *Ordonnance des trompettes.* M. C. C.

BULL, JOHN, Mus.D. (*b. circa* 1562[1]; *d.* Antwerp, Mar. 12 or 13, 1628), famous organist and composer. He was, according to Anthony Wood, 'of the same family, as it seems, with those of his name in Somersetshire.' There was a family of Bulls settled at Peglinch or Peylinch in the parish of Wellow, in the 16th century, but it is uncertain whether the composer belonged to this branch.

He was educated in Queen Elizabeth's Chapel under William Blitheman. On Dec. 24, 1582, he was appointed organist of Hereford Cathedral and afterwards master of the children. In Jan. 1585 he was admitted a member of the Chapel Royal, and in 1591, on the death of his master, succeeded him as organist. The office of organist as a separate appointment did not then exist, but that Bull acted as organist within a year of Blitheman's death is proved by entries in the Chapel Royal Cheque Book on May 29, 1592, recording the appointment as gentleman-extraordinary of William Phelps of Tewksbury 'for his care [and] kindnes to Mr. Bull, Organiste in her . . . Majesties Chappell,' 'Mr. Doctor Bull . . . beinge robbed in those parts.' On July 9, 1586, he was admitted Mus.B. at Oxford, 'having practised in that faculty fourteen years,' and on July 7, 1592, was incorporated Mus.D. in the same university, having previously taken the degree at Cambridge. On Apr. 20, 1591, he petitioned Queen Elizabeth for a lease in reversion of the yearly value of £30, 'to relieve his great poverty which altogether hinders his studies.' This document is preserved at Hatfield, and an endorsement on it shows that he obtained a lease of the yearly value of 20 marks. In 1596, upon the recommendation of the Queen, Bull was the first appointed music professor in Gresham College, and, although unable to compose and read his lectures in Latin, according to the founder's original intention, such was his favour with the Queen and the public, that the executors of Sir Thomas Gresham, by the ordinances bearing date 1597, dispensed with his knowledge of the Latin language and ordered

'The solemn music lecture twice every week, in manner following, viz. the theoretique part for one

[1] According to the date on his portrait at Oxford. See *PLATE XII.*

half-hour, or thereabouts, and the practique, by concert of voice or instruments, for the rest of the hour, whereof the first lecture should be in the Latin tongue and the second in English; but because at this time Mr. Dr. Bull, who is recommended to the place by the Queen's Most Excellent Majesty, being not able to speak Latin, his lectures are permitted to be altogether in English, so long as he shall continue in the place of music lecturer there.'

His inaugural address was delivered on Oct. 6, 1597, and was printed by T. East; no complete copy of it is known to exist, but the title-page has been preserved in the Bagford Collection (Harl. 5936, fol. 118b). It reads as follows:

'The oration of Maister | Iohn Bull, Doctor of Musicke, and one of the Gentle- | men of hir Maiesties Royall | Chappell. | *As hee pronounced the same, bee-* | fore diuers Worshipfull persons, *Th'Aldermen & commoners of the Citie* | Of London, with a great Multitude of | *other people, the 6. day of October.* | 1597. | In the New erected Colledge of Sir *Thomas Gresham* Knight, deceased: Made in the Commenda- | *tion of the saide worthy Founder, and the* | excellent Science of Musicke. | *Imprinted at London by* | Thomas Easte.'

In 1601 Bull went abroad for the recovery of his health, and during his absence was permitted to substitute as his deputy, Thomas, son of William Byrd. He travelled into France and Germany, and Anthony Wood tells a story of a feat performed by him at St. Omer, where, to a composition originally in forty parts, he added forty more in a few hours. After the death of Elizabeth, Bull retained his post in the Chapel Royal, and his fame as an organist was widely spread. On Dec. 15, 1606, Bull was admitted into the freedom of the Merchant Taylors' Company by service, having been bound apprentice to Thomas, Earl of Sussex, who was free of the Company. His name occurs in a list (dated Dec. 31, 1606) of persons to whom James I. ordered 'gold chains, plates or medals' to be given. On July 16, 1607, when the King and Prince Henry dined at Merchant Taylors' Hall, the royal guests were entertained with music, both vocal and instrumental. And while His Majesty was at table, according to Stowe,

'John Bull, Doctor of Musique, one of the organists of His Majesties Chappell-royall, and free of the Merchant-taylors, being in a citizen's gowne, cappe, and hood, played most excellent melodie upon a small payre of Organes, placed there for that purpose onley.' (*Chronicles*, edit. 1631, p. 891.)

On the day after this feast Bull and Nathaniel Giles (the master of the children) were admitted into the livery of the Company. On Dec. 20 in the same year Bull resigned the Gresham Professorship (which was only tenable by unmarried men), and two days later he obtained from the Bishop of London a marriage licence for himself and

'Elizabeth Walter of the Strand, maiden, aged about 24, daughter of —— Walter, citizen of London, deceased, she attending upon the Rt. Hon. the Lady Marchioness of Winchester.'

They were to marry at 'Christ Church, London.' In 1611 he was in the service of Prince Henry,[1] and his name stands first on the roll of the Prince's musicians, with a salary of £40 per annum. For the marriage of Princess Elizabeth and the Prince Palatine (Feb. 14, 1612/13) he wrote an anthem to the words of the Benediction, beginning 'God the Father, God the Son.' The old Cheque Book of the Chapel Royal records under date of 1613 that

'John Bull, Doctor of Musicke, went beyond the seas without license, and was admitted into the Archduke's service, and entered into paie there about Michaelmas.'

It seems that he had been preparing for this step some months previously, for in B.M. Add. MSS. No. 6194 is preserved a letter from Dr. Bull to Sir M. Hicks, wishing his son's name to be inserted instead of his own in some patent dated Apr. 26, 1612. According to Ward, Bull left England owing to his 'being possess'd with crotchets as many musicians are,' but in a letter (dated May 30, 1614, Add. MSS. 6194) from Trumbull, the British minister at Brussels, to James I., the writer says that he had informed the Archduke

'that it was notorious to all the world, the said Bull did not leave your Majesties service for any wrong done unto him, or for matter of religion, under which fained pretext he now sought to wrong the reputation of your Majesties justice but did in that dishonest manner steal out of England through the guilt of a corrupt conscience, to escape the punishment, which notoriously he had deserved, and was designed to have been inflicted on him by the hand of justice, for his incontinence, fornication, adultery, and other grievous crimes.'

On leaving England Bull went to Brussels, where he became one of the organists in the Archduke's chapel, under Géry de Ghersem. In 1617 he was appointed organist of Antwerp Cathedral in succession to Rumold Waelrent. The Chapter Act-Books record payments to him in Feb. 1619/20, and again in the same month of 1622/23 of sums of 12 *livres d'Artois* (florins). In 1620 he was living in a house adjoining the south door of the Cathedral. He was buried on the south side of Notre Dame at Antwerp, Mar. 15, 1628.

A portrait of Bull, reproduced *PLATE XII.*, is preserved in the Music School Collection at Oxford. It is painted on panel, and represents him in the habit of a bachelor of music. On the left side of the head are the words, 'An. Ætatis svæ 27, 1589,' and on the right side an hour-glass, upon which is placed a human skull, with a bone across the mouth. Round the four sides of the frame is written the following homely distich:

'The bull by force
In field doth raigne:
But Bull by skill
Good will doth gayne.'

Another portrait of him, a half-length taken in later life, is in the possession of Mr. Arthur Hill.

[1] In Prince Henry's accounts (Oct. 1610–Nov. 1612) there is an entry of £35 paid to John Bull 'for sundry sortes of musicke bookes' (Shakespeare Soc. Publications).

JOHN BULL

From the painting in the Music School Collection, Oxford

PRINTED IN GREAT BRITAIN.

A list of MSS. containing compositions by Bull will be found in Ward's *Lives of the Gresham Professors* (1740). Some of these can be traced at the present day, but two important volumes seem to have disappeared. They are (1) No. 16 in Pepusch's Catalogue. A large quarto written by Gulielmus a Messaus, organist of St. Walpurga, Antwerp, between Apr. 6 and Oct. 20, 1628, containing (*inter alia*) 38 organ and virginal pieces by Bull; (2) The first volume of Pepusch's No. 18. The second volume is now in the British Museum (Add. MSS. 23,623). The missing volume contains 24 pieces by Bull. It was formerly in the possession of Richard Clark, and contains the composition upon which was based the claim made on behalf of Bull to the authorship of GOD SAVE THE KING (*q.v.*).[1] Amongst the other works mentioned by Ward, Pepusch's No. 13 ('Deus omnipotens') is to be found in a MS. written by John Baldwin, now in the Royal Library Collection at the British Museum; it is an arrangement of the 'Star' anthem. As far as can be ascertained, the following is a list of Bull's vocal compositions now extant:

1. 'Almighty God.' The 'Star' Anthem, for voices and viols. (Printed by Boyce as 'O Lord my God.')
2 and 3. 'Attend unto my Tears.' (Two settings, for 4 voices and lute and for 5 voices respectively. In Leighton's 'Teares or Lamentacions of a sorrowful Soule,' 1614.)
4. 'Fraile man despise the treasures of this life.' (B.M. Add. MSS. 29,372-5. Pepusch's No. 5 in Ward's List.)
5. 'How joyful and how good.' (Ch. Ch. MSS.)
6. 'Deliver me, O God.' (Barnard.)
7. 'Den lustelijcken Mey.' ('Laudes Vespertinæ B. Mariæ Virginis.' Phalèse, Antwerp, 1629.)
8. 'In the departure of the Lord.' (Leighton's 'Teares,' 1614.)
9. 'In Thee, O Lord.' (Barnard.)

Of Bull's instrumental pieces (mostly for organ or virginals, but including a few compositions for viols) nearly 150 are in existence. They are to be found in

'Parthenia' (a collection of pieces for virginals by Bull, Byrd, and Gibbons, printed early in the 17th century); in the 'Fitzwilliam Virginal Book' (published by Breitkopf & Härtel, Leipzig, 1899, 2 vols.); in the following MSS. in the British Museum: Additional MSS. 10,444, 11,586, 23,623, 29,401, 30,485, 31,403, 31,723, and 36,661. Also in the Imperial Library, Vienna (No. 17,771); at Berlin (State Library, MS. 191); the Public Library, New York; in the Library of the R.C.M.; at Ch. Ch., and the Roy. Lib. B.M. In the last-named collection there is a volume of unsolved Canons by Bull. A copy of Holborne's 'Cittharne School,' which formerly belonged to him, is in the University Library, Cambridge.

Bull's merits as a composer have been dealt with by Dr. Willibald Nagel[2] and Dr. Seiffert.[3] His music is very unequal, and generally is more ingenious than beautiful. The most striking examples of his innovations, both rhythmic and harmonic, are to be found in an 'Ut, re, mi' ('Fitz. Virg. Book,' vol. i. p. 183). But as an executant he occupied a place in the first rank. He has been aptly termed 'the Liszt of his age,' and he belongs to the group of composers who did much to develop harpsichord music. In this respect his connexion with Sweelinck is of interest, and the fact that the great Amsterdam organist included a Canon of Bull in his work on composition, and that Bull wrote a fantasia on a fugue of Sweelinck within a few months of the death of the latter, seems to show that the two men were on terms of personal friendship. E. F. R. and W. B. S.

BULL, OLE BORNEMAN (*b.* Bergen, Norway, Feb. 5, 1810, ; *d.* Lysö, near Bergen, Aug. 17, 1880), a remarkable violin virtuoso.

His first teacher was Paulsen, a Dane, and later on he received some instruction from a pupil of Baillot, a Swede named Lundholm, who had settled at Bergen. In the main, however, he was a self-taught player. His individuality was so strongly marked as to leave but little room for the direct influence of a teacher. His father, a physician, did not approve of a musical career, and, after having gone through the grammar school at Bergen, Ole Bull was sent to the University of Christiania to study theology. Very soon, however, we find him the conductor of a musical and dramatic society in that town. At this time political feeling ran high in Norway, and he appears to have taken some part in the agitation. At all events he suddenly left the country in 1829 and went to Cassel to satisfy an ardent desire to see and hear Spohr, for whose violin compositions he had a sincere admiration. Spohr appears to have behaved somewhat coldly to the rather eccentric and, to him, utterly unknown young enthusiast, but an interesting criticism of Ole Bull's violin-playing is contained in Spohr's autobiography. Bull left Cassel, made a short stay at Göttingen, where his boisterous manner involved him in a duel, and then returned to Norway, where he played with much success at public concerts in Bergen and Trondhjem. But it was not till he went to Paris in 1831 that his powers as an executant were fully developed. He failed to gain admittance to the Conservatoire, but it was then that he first heard Paganini, and this constituted, as he himself used to declare, the turning-point of his life. Paganini's playing made an immense impression on him, and he threw himself with the utmost vigour into the pursuit of technical studies in order to emulate the feats performed by the great Italian virtuoso. After a severe illness in Paris Bull came under the motherly care of a benevolent Parisian lady, who nursed him, and whose daughter he afterwards married. After his recovery he made his first appearance in Paris (Apr. 18, 1832), assisted by Chopin and Ernst, and then started for Italy, where he created a perfect furore. From this time to the end of his life he continued travelling all over Europe and North America, taking now and then a summer's rest in his native country. He played first in London, May 21, 1836; at the Philharmonic, June 6, and during the next sixteen months be gave 274 concerts in England, Scotland and Ireland. In 1843 he went to America for the first, and in 1879 for the fifth and last time. His success and popularity in the States were unbounded, and he began to

1 Also *Mus. T.*, 1878.
2 *Geschichte der Musik in England*, ii. (1897), p. 155, etc.
3 *Geschichte der Klaviermusik* (1899), p. 54, etc.

amass a considerable fortune. On his return to Norway in 1845, he formed a scheme for the establishment of a Norse theatre at Bergen, and brought it to actual fulfilment in 1850. To the end of his life he retained a passionate love for the North and his countrymen; and, touched by the abject poverty of many of them, he conceived the idea of founding a Norwegian colony in the States. For this he acquired a large tract of land (125,000 acres), but, though he was not without natural shrewdness in business matters, he unfortunately fell into the hands of swindlers, who sold to him what was really the property of a third party. Bull was in consequence involved in a troublesome and expensive lawsuit, by which he lost a great part of his capital. But, nothing daunted, he resumed travelling and playing to replace what was lost. He tried to found an academy of music in Christiania, but it had no lasting result. In 1870 he married an American lady, and on Feb. 5, 1880, he celebrated his 70th birthday in America. His death was deplored as a national loss.

Ole Bull was a man of remarkable character and an artist of undoubted genius. His technical proficiency was such as very few violinists have ever attained to. His playing in double-stoppings was perfect; his staccato, upwards and downwards, of the utmost brilliancy; and although he can hardly be considered a serious musician in the highest sense of the term, yet he played with warm and poetical, if somewhat sentimental, feeling. Bull's power of conveying a highly poetical charm—a power which is absolutely beyond any mere trickster or ordinary performer—redeemed him from the reproach of charlatanism. His rendering of Scandinavian airs never failed to charm and move, and his *tours de force*, if they raised the smile of the musician, invariably carried away his audience. He appears to have been conscious of his inability to do justice to serious music—at least, with the exception of one or two movements of Paganini, he played in public only his own compositions. His private rendering of quartets is said to have proved the wisdom of this self-imposed restraint.

He used on his violin an almost flat bridge, an arrangement which enabled him to produce beautiful effects by the playing of chords and passages in four parts, but which had the obvious disadvantages already mentioned. His bow was of unusual length and weight, such as no man of smaller stature and strength could effectively or comfortably wield.

Three only of his numerous compositions appear to have been published:

A set of 'Variazioni di bravura,' 'La Preghiera d' una madre,' and a 'Notturno.' The rest consisted of two concertos and other solo pieces, of which a 'Polacca guerriera' appears to have been his *cheval de bataille*. The titles of others, such as 'The Niagara,' 'Solitude of the Prairies,' 'To the memory of Washington,' betray their American origin.

The dates and main facts contained in this article are taken from the biography of Ole Bull by his second wife, Sara C. Bull (1886). P. D.

BUMPUS, twin brothers who were well-known ecclesiologists, students of Cathedral architecture, and historians of Cathedral music. (1) John Skelton (*b.* London, Aug. 6, 1861; *d.* Newington, Apr. 10, 1913) was honorary librarian of St. Michael's, Tenbury. His works include the valuable *Dictionary of Ecclesiological Terms, The Organists and Composers of St. Paul's Cathedral*, and, with his brother, *A History of English Cathedral Music.*

(2) Thomas Francis (*b.* London, Aug. 6, 1861; *d.* Stoke Newington, Nov. 11, 1916), besides collaborating in the *History* above named, published *The Cathedrals of England and Wales* (3 vols.) and similar works on the cathedrals of Northern Germany (1 vol.), Norway, Sweden and Denmark (1 vol.), Northern Italy (1 vol.), Belgium (1 vol.) and London Churches, etc. C.

BUNGERT, August (*b.* Mülheim a/d Ruhr, Mar. 14, 1846; *d.* Leutesdorf, Oct. 26, 1915), a prolific composer whose fame outside his own country rests principally on a few slight songs. He was at first a pupil of Ferdinand Kufferath, and studied at the Cologne Conservatorium, 1860–62. In 1869 he was music-director at Kreuznach, but in 1873–81 applied himself anew to the study of counterpoint under Kiel. A quartet for piano and strings gained a prize offered by the Florentine Quartet in 1878. The composition of piano pieces, songs and several orchestral works ('Tasso,' 'Hohes Lied der Liebe,' and 'Auf der Wartburg') occupied him until in 1884 a comic opera, 'Die Studenten von Salamanka,' was produced at Leipzig. His most important undertaking was a tetralogy of operas, 'Die homerische Welt,' of which he was both author and composer. These, called 'Kirke' (1898), 'Nausicaa' (1901), 'Odysseus' Heimkehr' (1896) and 'Odysseus' Tod' (1903), have all been given on the stages of Germany. 'Odysseus' Heimkehr,' the first to appear at Dresden, stirred a considerable amount of dispute as to its musical, poetic and dramatic merits; but the next section to be made public, 'Kirke' (Dresden, Jan. 29, 1898), seems to have been conspicuously less successful than the other, which was given a good many times and attracted much attention. A later opera described as 'a mystery,' 'Warum? Woher? Wohin?' was produced at Neuwied in 1908 and given elsewhere in Germany. A symphony with the title 'Zeppelins erste grosse Fahrt' and music to Max Gruber's version of 'Faust' belong also to his later years. Bungert's methods were definitely based upon those of Wagner, and his work shows understanding of stage effect. M., with addns.

BUNN, Alfred (*b.* Apr. 8, 1796 or 1797;

d. Boulogne, Dec. 20, 1860), manager and dramatic author, was for a quarter of a century director, and during the greater part of that time lessee, of Drury Lane Theatre.

Elliston gave him his first appointment as stage-manager of Drury Lane in 1823, when he was quite a young man; in 1826 he was manager of the Birmingham Theatre, and in 1833 held the same post at Drury Lane and Covent Garden. He first obtained a certain celebrity as a manager by endeavouring in about 1835 to establish an English Opera. 'The Maid of Artois,' and a few years later 'The Bohemian Girl,' 'The Daughter of St. Mark,' and other operas by Balfe, were produced at Drury Lane under Bunn's management; and for the first of these works Mme. Malibran was engaged at the then unprecedented rate of £125 a night. Bunn also brought out Benedict's 'Brides of Venice' and Vincent Wallace's 'Maritana.' For most of these operas Bunn himself furnished the libretto, which, however, was in every case of French origin. He was the author or adapter of a good many dramas and farces, including 'The Minister and the Mercer,' a translation of Scribe's 'Bertrand et Raton,' which, on its first production, obtained remarkable success. He was notorious, not only for his remarkably poor poetry, but for various literary and theatrical squabbles. He received damages in 1836 for an assault committed by Macready, and his *Word with Punch*, a bitter satire, obtained something like fame; it is a bibliographical rarity. On Dec. 17, 1840, he was declared a bankrupt. In the latter year he published a volume of memoirs, under the title of *The Stage*. (*D.N.B.*) (See DRURY LANE.) H. S. E.

BUNNETT, EDWARD, D.Mus. (*b.* Norwich, 1835; *d.* there, Jan. 5, 1923), from 1880 City Organist (St. Andrew's Hall), for many years assistant organist of the Cathedral, and from 1908 organist of St. Peter Mancroft, Norwich; is remembered by the Magnificat and Nunc Dimittis in F which he wrote in 1867 and which became one of the most popular pieces of church music in the smaller parish churches of England. C.

BUNNING, HERBERT (*b.* London, May 2, 1863), composer and conductor, the son of a shipowner, was educated at Harrow, and Brasenose College, Oxford, and entered the army through the Royal Military College, Sandhurst, as a university candidate, obtaining a commission in the 4th Queen's Own Hussars in 1884.

His musical studies began in London with Bruno Schurig, continued at Hanover under Engel (Director of the Conservatorium), and at Harrow under John Farmer. He subsequently studied in France, and in Italy (Milan) under Cavaliere Cesare Dominicetti, and at his death, under Cavaliere Vincenzo Ferroni, both holding the chair of 'Alta Composizione' at the Milan Conservatorio.

Bunning was appointed musical director of the Lyric Theatre in 1892. During 1892–93, Charles Lecocq's 'Incognita,' I. Albeniz's 'Magic Opal' and Goring Thomas's 'Golden Web' were produced under his direction. He subsequently conducted at the Prince of Wales's Theatre during the years 1894–96. The chief event of his career was the production of his opera 'Princess Osra' at Covent Garden (July 14, 1902). It was published by Enoch.

His compositions include:

'Lodovico il Moro,' a scena for baritone and orchestra (Crystal Palace, 1892); a prelude for orchestra written for the third act of 'Incognita' (Lyric Theatre); a 'Village Suite,' for orchestra (Crystal Palace) (published by Oertel & Co.); two overtures for orchestra, 'Mistral' (Crystal Palace, 1897) and 'Spring and Youth' (Philharmonic, 1897); the 'Shepherd's Call,' an intermezzo for horn and strings (Lyric Theatre, 1893). W. W. C.

BUNTING, EDWARD (*b.* Armagh, Feb. 1773; *d.* Dublin, Dec. 21, 1843), distinguished as a collector of Irish folk melody, was educated as an organ and pianoforte player, studying the former instrument under William Ware, of St. Anne's Church, Belfast. He acted occasionally as deputy, up to 1820, when he went to live in Dublin. His official position in Belfast was organist to the Second Congregation, Rosemary Street, from 1806 to 1817. He conducted a musical festival at Belfast in 1813.

Bunting published three collections of Irish music. The first, *A General Collection of the Ancient Irish Music*, etc., containing Irish airs 'never before published,' came out in 1796, published by Preston in London, and pirated by Lee in Dublin. A second volume, containing 75 additional airs (words by Campbell and others), and a dissertation on the Egyptian, British and Irish Harps, appeared in 1809. A third collection, containing upwards of 150 airs, of which more than 120 were then for the first time given to the public, was published in 1840. This last collection is remarkable for a dissertation of 100 pages upon the history and practice of music in Ireland. According to this dissertation,

'the occasion which first confirmed him in his partiality for the airs of his native country was the great meeting of the Harpers at Belfast in 1792. Before this time there had been several similar meetings at Granard, in the county of Longford, which had excited a surprising degree of interest in Irish music throughout that part of the country. The meeting at Belfast was however better attended than any that had yet taken place, and its effects were more permanent, for it kindled an enthusiasm throughout the north which burns bright in some warm and honest hearts to this day. All the best of the old class of Harpers—a race of men then nearly extinct, and now gone for ever—Dennis Hempson, Arthur O'Neill, Charles Fanning, and seven others, the least able of whom has not left his like behind, were present.'

Aided by O'Neill and the other harpers, Bunting immediately began to form his first collection. He travelled into Derry, Tyrone and Connaught, where, especially in the last, he obtained a great number of

excellent airs. His first and second collections contain the best Irish airs, although in his third there are several very good ones, and some very curious. Among these last are the 'caoinans or dirges, and airs to which Ossianic and other old poems are sung,' and which the editor gives as 'very ancient'—many hundred years old. He afterwards endeavours to analyse the structure of Irish airs, and to point out their characteristics.

Bunting was buried at Mount Jerome. His death was absolutely unnoticed. 'He was of no party, and therefore honoured of none, and yet this unhonoured man was the preserver of his country's music.' (*Dub. Univ. Mag.*, Jan. 1847; *D.N.B.*) E. F. R.; addns. W. H. G. F.

BUONAMENTE, Giovanni Battista (Cavaliere), was Imperial court-musician from 1626–1629; maestro di cappella at the Franciscan monastery of Assisi, in 1636, and was one of the first composers of sonatas who did much to advance the technique of violin-playing. Seven books of his sonatas, symphonies and dances were published by Al. Vincenti, Venice, who, in the dedication of the fifth book (1629), confesses that he stole the compositions but was now returning them. The 4th (1626) and 5th books are for 2 violins and basso di viola, the 6th (1636) for violin, cornett, dolzaina, viola and basso da brazzo, bassoon and trombone, the 7th (1637) for 2 violins and 'basso di viola, ò da brazzo.' At this early period Buonamente's sonatas are remarkable for their simple grandeur and conciseness of form and conception. E. v. d. S.

BUONAMICI, Giuseppe (*b.* Florence, Feb. 12, 1846; *d.* there, Mar. 18, 1914), was taught the piano at first by his uncle, Giuseppe Ceccherini, and entered the Munich Conservatorium at the late age of 22 years, where he became pupil of von Bülow for piano, and Rheinberger for composition; after a little more than two years' study he was appointed professor in the institution.

In 1873 he returned to Florence as director of the choral society 'Cherubini,' and professor of the piano at the 'Istituto Musicale.' He founded a famous trio-party there. He wrote some chamber compositions during his residence in Munich, but his most important work is his admirable editions of pianoforte literature, and more particularly a set of studies on special difficulties in Beethoven (published by Venturini, Florence, and dedicated to the students at the English R.A.M.), also an edition of Beethoven's sonatas. These, as well as *The Art of Scale Study*, are published by Augener & Co. On rare occasions he appeared as a pianist in London; the first time was at a concert of the London Musical Society on May 24, 1887, and the second at the Philharmonic concert of June 5, 1890. In 1892 and 1893 he gave single recitals in London, and his playing created a wholly favourable impression. M.

BUONONCINI, see Bononcini.

BURANELLO, IL, see Galuppi, Baldassare.

BURBURE, Léon Philippe Marie Chevalier de B. de Wesembeck (*b.* Termonde, East Flanders, Aug. 16, 1812; *d.* Antwerp, Dec. 8, 1889), composer and musical historian. A wealthy Belgian nobleman, he was at one time a Benedictine monk. He was a connoisseur of all the arts (particularly those of music and architecture), being a member of the Saint Cecilia Society at Rome, the Brussels Academy, and many other societies at Bruges, Ghent, Mons, Antwerp and other places. He studied at the University of Ghent. He did valuable work in arranging and cataloguing the MSS. in the archives of the Church of Our Lady at Termonde (from 1842), Saint Lambert's Church at Liège (1845) and Antwerp Cathedral (from 1846–53). He was thus able to get together much unique information about early Belgian painters, sculptors and architects, as well as about such musicians as Okeghem, Obrecht, de Lassus, Gossec and John Bull: many of his monographs are of great value. Burbure was also interested in Belgian choral societies, and wrote many cantatas and choruses for them. (For further details and a list of 51 compositions, see *Fétis.*) J. Mk.

BURCK (Burgk), Joachim À (real name Joachim Moller von Burck) (*b.* Burg, 1541; *d.* Mühlhausen, May 24, 1610). His music-master was Hermann Noricus, who lived in the county of Schwartzbergen, Blankenburg. On Nov. 26, 1566, he was organist at St. Blasien and musicus at Mühlhausen. In 1583 he became a senator of that town without relinquishing his musical career. His reputation as an organist was so great that he was chosen as one of the 53 judges for the organ of Gröningen in 1596. On the title pages of his works he is often called 'symphonista.' He composed a Passion music according to St. John (1568), and another according to the 22nd Psalm of David. Both have been republished, together with 20 of his German sacred songs, by Eitner. There is a third Passion, 'L. III. Cap. Esaiae, von dem Leiden und Auferstehen Jesu Christi,' composed in 1573, but only a Discantus of this, in the Königsberg library, is known to exist. A list of his numerous psalms, odes and songs is given in *Q.-L.* E. v. d. S.

BURDEN (Burthen). (1) Old songs and ballads frequently had a chorus or motto to each verse, which in the language of the time was called a Burden or Bob. One of the most ancient and most popular was 'Hey troly loly lo,' quoted in *Piers Plowman*, 1362, and other early songs. It occurs after every line of a song of the time of Edward IV. (Sloane MS. No. 1584); and in Izaak Walton's

Compleat Angler is the burden of 'O the sweet contentment the countryman doth find.' In the ballad of 'Sir Eglamore,' which was very popular in the 17th century, the burden is 'Fa la, lanky down dilly.'

It is probable that the burdens were accompanied by motion or dancing. (See *Much Ado about Nothing*, III. iv. 38; and BALLAD.) (2) BURDEN also means the drone or bass of a bagpipe (see FAUX-BOURDON). W. H. C.

BURETTE, (1) CLAUDE, the father of the following, a well-known harpist, left some MS. 'Pièces,' of which we have information through the *Catalogue de la bibliothèque de P. J. Burette* (Paris, 1748. I. No. 409); '*Pièces de clavecin et de harpe composées par Cl. Burette, musicien du Roi, natif de Nuys en Bourgogne, recueillies et notées par P. J. Burette, son fils.*' In fol. obl. 2 vols., 1695.

(2) PIERRE JEAN (*b.* Paris, Nov. 21, 1665; *d.* there, May 19, 1747), medical man and eminent writer on musical subjects, wrote *La Musique et la danse des anciens*, particularly of the Greeks, a series of fourteen monographs which were all published in the *Mémoires de l'Académie des Inscriptions*, vols. i.-xvii. These works, very remarkable both for sound judgment and for the amount of learning which they represent, have long been regarded as authoritative. M. P.

BURGMÜLLER, (1) NORBERT (*b.* Düsseldorf, Feb. 8, 1810; *d.* Aix-la-Chapelle, May 7, 1836), composer, and son of the then music-director at Düsseldorf, who died in 1824, well known and honoured as one of the founders and conductors of the Lower Rhine festivals.

Norbert very early showed extraordinary musical talent. After leaving his father he studied at Cassel under Spohr and Hauptmann. But a sickly constitution prevented his full development. He left much music behind him, of which two symphonies, an overture and some other pieces were published by Kistner, all, notwithstanding their natural immaturity, manifesting great ability. Schumann valued him greatly: he begins a memorial notice of him by saying that since the early death of Schubert nothing more deplorable had happened than that of Burgmüller (*Ges. Schriften*, iii. 145).

His elder brother, (2) JOH. FRIEDRICH (*b.* Regensburg, 1806; *d.* Beaulieu, Seine-et-Oise, Feb. 13, 1874), wrote many pianoforte pieces, mainly intended for children. A. M.

BURIAN, KAREL (*b.* Rousinov, Rakovník, 1870; *d.* Prague, Sept. 26, 1924), a Czech tenor who made his first appearance at the National Theatre, Brno (Brünn), in 1891. He was engaged at the Dresden Opera for a considerable time, and, having made a reputation as a Wagnerian interpreter, was invited to sing Parsifal at Bayreuth. He became a favourite in the chief Continental opera-houses, and took the part of Herod in the first performance of Richard Strauss's 'Salome' in Paris. R. N.

BURKE, EDMUND ARBRICKLE (*b.* Toronto, July 12, 1876), operatic basso-cantante. Intended for the law, he graduated at the McGill University; came to London, studied singing at the R.C.M. from 1902–03; and later finished his training in Paris. He first appeared in opera at Montpellier, France, in 1906, and soon afterwards at Nice, where his powerful voice and artistic intelligence as singer and actor won high praise. Having gained further experience at various opera-houses, he was engaged in 1910 for Covent Garden, and sang with acceptance in Italian and English seasons both before and after the war (1914–18). His rôles there comprised Abimelech ('Samson et Dalila'), Nilakantha ('Lakmé'), Mephistopheles, Prince Igor, Amfortas and Pogner. H. K.

BURLA (BURLESCA), a musical joke or playful composition; J. S. Bach's Partita 3, in A minor, contains a Burlesca as the fifth piece. Schumann has a Burla in op. 124, No. 12. There are modern instances, such as Richard Strauss's 'Burleske' for pianoforte and orchestra.

BURLEIGH, CECIL (*b.* Wyoming, N.Y. State, Apr. 17, 1866), violinist, composer and teacher. He studied in Berlin and Chicago; has appeared in many concerts in the United States, and has occupied positions as teacher in several Western institutions. His compositions are chiefly short pieces for violin and for piano, besides a concerto for violin and orchestra in E minor, which won a prize in Chicago in 1916. R. A.

BURLEIGH, HENRY THACKER (*b.* Erie, Pennsylvania, 1866), singer and composer. He studied at the National Conservatory in New York, for a time with Dvořák there. He has written songs and made numerous transcriptions of the folk-songs of his race—for Burleigh is a negro. In 1917 he received a prize for conspicuous achievement as representing that race. R. A.

BURLETTA, a form of musical comedy that may be described as bridging the gap between BALLAD OPERA and COMIC OPERA. It came from Italy, through France, but as a fact, English burletta was really created by Kane O'Hara, of Dublin, who, in 1760, determined to produce a genre that would rival the Italian burletta. No sooner did the Italian burletta season begin at Smock Alley Theatre, Dublin, Dec. 1761, than O'Hara got ready his 'Midas' (previously given for some amateur friends), and launched it at Crow Street Theatre, Jan. 22, 1762. It at once caught the public taste, and was a standing dish for fully 70 years in Great Britain and Ireland. A French version of it was also given at the close of the 18th century. Not only did 'Midas' contain

old folk-tunes (like the ballad operas), but it had numerous concerted pieces, and the recitatives were given in rhymed couplets.

W. H. G. F.

BURMESTER, Willy (*b.* Hamburg, Mar. 16, 1869), violinist, was in the first instance a pupil of Joachim, but after four years of study in Berlin seceded in 1885 from the Joachim school and developed his technique upon 'virtuoso' lines. His programmes include all the styles, but he is best known as a Paganini player. On his first visit to London (1895) his marvellous technical feats were admired, especially his left-hand pizzicato and rapid runs in thirds and tenths, but his intonation was pronounced uncertain; and on his second visit (1903) he played to very scanty audiences. But those present at the more recent performances were made aware that he had ripened into a consummate master of the violin. He has been a considerable sufferer through having worn the end of his first finger down to the nerve. He has composed a Serenade for strings and double bass, and several arrangements for violin solo. W. W. C.

BURNEY, Charles, Mus.D. (*b.* Shrewsbury, Apr. 12, 1726; *d.* Chelsea, Apr. 12, 1814), one of the most famous of musical historians, was educated at the free school at Shrewsbury. He was subsequently removed to the free school at Chester, where he began his musical studies under Edmund Baker, the organist of the Cathedral.

When about 15 years of age he returned to his native town, and for three years pursued the study of music, as a future profession, under his eldest half-brother James Burney, organist of St. Mary's, Shrewsbury. He was next sent to London, and for three years studied under Dr. Arne. He contributed some music to Thomson's 'Alfred,' produced at Drury Lane Mar. 30, 1745. In 1747 he published 6 sonatas for two violins and bass. Shortly afterwards Fulke Greville paid Arne £300 to cancel his articles, and took Burney to live with him. In 1749 he was elected organist of St. Dionis-Backchurch, Fenchurch Street, and in the winter of the same year engaged to take the harpsichord in the 'New Concerts,' then recently established at the King's Arms in Cornhill. In 1749 he married Miss Esther Sleepe, who died in 1761. Seven years after her death he married Mrs. Stephen Allen of Lynn. In 1750 he composed the music of two dramas—Mendez's 'Robin Hood,' and 'Queen Mab'—for Drury Lane. Being threatened with consumption, however, he could not continue these exertions, and, in 1751, accepted the situation of organist of Lynn-Regis, Norfolk, where he remained for the succeeding nine years. In this retreat he formed the design, and laid the foundation, of his future *History of Music.* In 1759 he wrote an Ode for St. Cecilia's Day, which was performed at Ranelagh Gardens. In 1760, his health being completely restored, he returned to London and again entered upon the duties of his profession.

Soon after his arrival in London, Burney published several concertos for the harpsichord which were much admired; and on Dec. 30, 1765, he brought out at Drury Lane, with moderate success, both words and music of a piece entitled 'The Cunning Man,' founded upon and adapted to the music of J. J. Rousseau's 'Devin du village.' On June 23, 1769, the University of Oxford conferred upon him the degrees of Bachelor and Doctor of Music, on which occasion his exercise consisted of an anthem of considerable length, with overture, solos, recitatives and choruses, which continued long to be a favourite at the Oxford Music Meetings, and was several times performed in Germany under the direction of Emanuel Bach. In the meantime, neither the assiduous pursuit of his profession nor his many other engagements had interrupted his collections for his *History of Music.* He had exhausted all the information that books could afford him, and was far from what he desired. The present state of music could only be ascertained by personal investigation and converse with the most celebrated musicians of foreign countries, as well as his own. He resolved to make the tour of Italy, France and Germany, and furnished with powerful letters of introduction from the Earl of Sandwich (a nobleman devoted to music) quitted London in June 1770. He spent several days in Paris, and then went by Lyons and Geneva (where he had an accidental interview with Voltaire) to Turin, Milan, Padua, Venice, Bologna, Florence, Rome and Naples, consulting everywhere the libraries and the learned; hearing the best music, sacred and secular, and receiving the most cheerful and liberal assistance towards the accomplishment of his object. On his return to England, Dr. Burney published an account of his tour, in one volume, which was exceedingly well received, and deemed so good a model that Dr. Johnson professedly imitated it in his own *Tour to the Hebrides,* saying, 'I had that clever dog Burney's *Musical Tour* in my eye.' In July 1772 Dr. Burney again embarked for the Continent to make the tour of Germany and the Netherlands, of which he published an account in two volumes. At Vienna he had the good fortune to make the intimate acquaintance of the celebrated poet Metastasio. Here he also found two of the greatest musicians of that age, Hasse and Gluck. From Vienna he proceeded through Prague, Dresden and Berlin to Hamburg, and thence by Holland to England, where he immediately devoted himself to arranging the mass of materials thus collected.

In 1773 Dr. Burney was elected an F.R.S.; and in 1776 the first volume of his *General History of Music* appeared in 4to. In the same year the complete work of Sir John Hawkins was published. Burney's subsequent volumes were published at unequal intervals, the fourth and last appearing in 1789. Between the two rival histories, the public decision was loud and immediate in favour of Dr. Burney. Time has modified this opinion, and brought the merits of each work to their fair and proper level—adjudging to Burney the palm of style, arrangement and amusing narrative, and to Hawkins the credit of minuter accuracy and deeper research, more particularly in parts interesting to the antiquary and the literary world in general. Burney's first volume treats of the music and poetry of the ancient Greeks, the music of the Hebrews, Egyptians, etc. The second and third volumes comprise all that was then known of the biographies of the great musicians of the 15th, 16th and 17th centuries. The fourth volume is perhaps less entitled to praise. Whole pages are given to long-forgotten and worthless Italian operas, whilst the great works of Handel and J. S. Bach remain unchronicled; the latter indeed is almost ignored.

When the extraordinary musical precocity of the infant Crotch first excited the attention of the musical profession and the scientific world, Burney drew up an account of the infant phenomenon, which was read at a meeting of the Royal Society in 1779, and published in the *Philosophical Transactions*. The commemoration of Handel in 1784 again called forth his literary talents; his account of these performances, published in 4to for the benefit of the musical fund, is well known to every musical reader. Dr. Burney also wrote *An Essay towards the History of Comets*, 1769; *A Plan for a Music School*, 1774; and the *Life and Letters of Metastasio*, 3 vols. 8vo, 1796. His last labour was on Rees's *Cyclopedia*, for which work he furnished all the musical articles, except those of a philosophical and mathematical kind. His remuneration for this was £1000, and as most of the matter was extracted without alteration from his *History*, the price was large.

During a long life Dr. Burney enjoyed the intimate acquaintance of almost every contemporary who was distinguished either in literature or the arts; with Johnson he was on terms of friendship; and it is known that, soon after Johnson's death, he had serious thoughts of becoming his biographer. For many years Dr. Burney lived in St. Martin's Street, Leicester Square, in a house once the residence of Newton, demolished early in the present (20th) century; but in 1783, on being appointed organist of Chelsea College, he removed to a suite of apartments in that building, where he spent the last twenty-five years of his life in the enjoyment of independence, and of a family, each individual of which (thanks to their parents' early care and example) had attained high distinction in some walk of literature or science.

'In all the relations of private life,' says one of his biographers, 'his character was exemplary, and his happiness such as that character deserved and honoured. His manners were peculiarly easy, spirited and gentlemanlike; he possessed all the suavity of the Chesterfield school without its stiffness—all its graces, unalloyed by its laxity of moral principle.'

At length, full of years, and rich in all that should accompany old age, he breathed his last at Chelsea College. His remains were deposited, on the 20th of April 1814, in the burial-ground of that institution, attended by his own family (of which he lived to see the fourth generation), the chief officers of the college, and many others of rank and talent. A tablet to his memory was erected in Westminster Abbey. Since 1806 he had been in receipt of a pension of £300, granted by Fox. In 1810 he was made a foreign member of the Institut de France.

His intelligent and expressive face has been preserved by Reynolds, in a fine portrait, engraved by Bartolozzi (given as frontispiece to vol. ii. of his *General History of Music*); Barry has introduced him in his large picture at the Society of Arts. A drawing by G. Dance is here reproduced, *PLATE XXXIII.* His bust was executed by Nollekens in 1805.

Dr. Burney's principal compositions, in addition to those already mentioned, are:

'Sonatas for two Violins and a Base,' two sets; 'Six Cornet Pieces with Introduction and Fugue for the organ'; Twelve 'Canzonetti a due voci in canone, poesie dell' Abate Metastasio'; 'Six Duets for German Flutes'; 'Six Concertos for Violin, etc., in eight parts'; 'Two Sonatas for Pianoforte, Violin and Violoncello'; and 'Six Harpsichord Lessons.'

E. F. R.; addns. and corr. from *D.N.B.*

The following is a catalogue of the musical extracts in his *History of Music*:

Vol. I. contains no musical example of consequence.

VOL. II.

	PAGE
Romance on the death of Richard I., from the Provençal	242
Prologue to the Paraphrase of the Epistle for St. Stephen's Day	252
Plain-Song for the Feast of St. John the Evangelist	255
Song for New Year's Day	256
Chanson de Roland	276
Two Chansons du Châtelain de Coucy	283
Chansons du roman d'Alexandre	290
Song of Thibaut of Navarre	296
Chanson 'L'Autrier par la matinée'	300
Old French Song (fragment) 'Faux semblant'	306
Hymn 'Alla Trinità beata'	328
Song on the victory obtained at Agincourt	384
'Sumer is icumen in'	407
Cantilena of Guido	415
Canon in epidiapente by Okenheim	474
La Déploration de Jehan Okenheim, par Josquin des Prés	481

'An heart that's broken.' Dowland	139
'I shame, I shame.' Do.	140
Airs, 'Like Hermit poore' and 'Sing we then.' A. Ferrabosco	141
Canon, 'Veni Creator.' Zarlino	169
'Deposuit' from Magnificat in Second Tone. Palestrina	170
'Sicut erat' from Do. Pietro Pontio	177
Miserere. Animuccia	184
Motet, 'Exaltabo te Domine.' Palestrina	191
Madrigal, 'Ahi tu mel neghi.' Marenzio	205
Villota alla Napolitana. Perissone Cambio	214
Canzone villanesche alla Napolitana. Baldassare Donato	216
Madrigal, 'Moro lasso.' Gesualdo, Prince of Venosa	223
Fugue, 'Diffusa est gratia.' Costanzo Porta	227
Balleto, 'Il bell' humore.' Gastoldi	231
Do. 'L' Innamorato'	232
Monteverdi's New Discords	235
Madrigal, 'Straccia mi pur.' Monteverdi	237
Motet, 'Quam pulcra.' Festa	245
Madrigal, 'Madonna, io v' amo.' Do.	246
Motet, 'Domine, quid multiplicati.' Goudimel	267
Chanson, 'Bonjour.' Claudin le Jeune	271
Extracts from 'Le Ballet comique de la royne.' Baltazarini	279
Noel. Caurroy	285
Madrigal, 'Il bianco e dolce cigno.' Arcadelt	303
Chanson, 'Ta bonne grâce.' Cornelius Canis	309
Madrigal, 'Alma Nemus.' Orlando Lasso	317
Do. 'Calami sonum.' Cipriano de Rore	319
Catch and Canons from 'Pammelia'	349
Rounds and Canons	350
Anthem in 8 parts, exercise for an Oxford degree	351
Song, 'Come, my Celia.' A. Ferrabosco	354
Whitelocke's Coranto	378
Air in Comus. Henry Lawes	383
Song, 'A lover once.' Do.	397
'Sing to the King of Kings.' William Lawes	405
'Lord, judge my cause.' Do.	406
'Who trusts in thee.' Do.	406
Five Bells Consort. John Jenkin	411
Canon, 'I am so weary.' Thomas Ford	415
Do. 'Lift up your heads.' Simon Ives	415
Do. 'Non nobis Domine.' Hilton	416
Do. 'Look down, O Lord.' T. Ford	416
Do. 'Hold thy peace'	416
Examples of Blow's crudities	449
Anthem, 'The ways of Zion.' Michael Wise	455
'Gloria Patri.' Deering	479
Glee, 'Ne'er trouble thyself.' Matthew Locke	480
Three-part song, 'Sweet Tyrannies,' by the father of Henry Purcell	486
Chant. Thomas Purcell	487
Canon. Turini	521
Divisions, specimens of. Seracini	528
Fragments of Italian melody from Pallavicini, Cifra, Rovetta, Merula and Facho	544
'Tinna Nonna,' lullaby. Barbella	571
Aria dal Tasso. Tartini	572
Aria alla Lecese. Leo	572

VOL. IV.

Licences in Monteverdi	27
Fragments of Peri, Caccini and Monteverdi	31
Rec. and Air from Cesti's 'Orontea'	67
Fragment of Cavalli's 'Erismena'	69
Scena from Bontempi's 'Paride'	71
Scene from the first Oratorio. Emilio del Cavaliere	91
Rec. from Mazzochi's 'Tears of Mary Magdalen'	96
Air from Federici's 'Santa Caterina da Siena'	117
Duet from Stradella's 'John the Baptist'	118
Air from Pistocchi's 'Maddalena'	121
Air, 'Il mio figlio.' Scarlatti	121
Extract from Vecchi's 'Amfiparnasso'	127
Extract from Caccini	137
Fragments and Air from Cantata by Carissimi	143
Beauties of his cantatas	147
Duet from 'Musurgia.' Kircher	150
Fragments of cantatas and motet by Cesti	151
Fragments of cantatas by Luigi Rossi	157
Air, 'Dolce amor.' Cavalli	158
Fragment of Bandini	158
Specimens of Salvator Rosa	165
Fragments of Bassani	168
Fragments from Scarlatti's Cantatas	171
Divisions by various singers	216
Fragment from Handel's 'Teseo'	241
Divisions by Nicolai and others	243
Air from Ariosti's 'Vespasiano'	293
Divisions by Farinelli	437
Air sung by Farinelli in Broschi's 'Artaxerxes'	439
Divisions (1740 and 1755)	461

BURRIAN, Carl, see Burian.

BURROWES, John Freckleton (*b.* London, Apr. 23, 1787; *d.* there, Mar. 31, 1852), composer and organist, was a pupil of William Horsley. His works include an overture produced at the concerts of the Philharmonic Society, of which he was one of the original members, songs and pianoforte pieces. Burrowes was the author of *The Thorough-Bass Primer* and *The Pianoforte Primer*, both which have passed through many editions. For nearly forty years he held the post of organist of St. James's Church, Piccadilly. W. H. H.

BURTON, Avery, English pre-Reformation composer. A 5-part Mass by him ('Ut Re Mi Fa Sol La') is in the Oxford Music School Collection (MS. *Mus. Sch. E.* 376-381). On Nov. 29, 1494, one pound was paid to 'Burton' for making a Mass (*Privy Purse expenses of Henry VII.*). He may be identified with the Auerie whom Morley names in his list of authorities (*Plaine and Easie Introduction*, 1597), whose name appears as composer of a piece for the organ, in B.M. Add. MS. 29,996. The name of 'Davy' Burton appears in the List of Henry VIII.'s Chapel, 1520. G. E. P. A.

Dr. Grattan Flood (*Mus. T.*, 1919, p. 607) has made search of the State Papers, and collected the references to Burton under the several Christian names of Avery, Davy and David. He considers these to refer to one individual, and also notes Avery Burnett as a variant of the name. He notes that David Burton was appointed Gentleman of the Chapel Royal in 1509, finds the name Avery Burnett in the list of salaries for the King's Household (1526), and while the same name 'Avery Burnet of the household' is granted a lease of land, Mar. 16, 1541, in the following year a reversionary interest in what may be the same lease is granted to Henry Byrd. 'In this grant,' he says, 'the composer is correctly described as "David Burton, Gentleman of the Chapel Royal."' C.

BURTON, John (*b.* Yorkshire, 1730; *d.* London, 1785), harpsichordist, was a pupil of John Keeble (*q.v.*). He became one of the first harpsichord-players and organists of his time, and gave concerts in Germany in 1754 with great success. He composed 3 concertos for harpsichord, one for organ or harpsichord; 10 sonatas for a keyboard instrument, and 6 more with accompaniment for the violin (op. 2); 12 Italian canzonets, op. 3. E. v. d. s.

BURTON, Robert Senior (*b.* Dewsbury,

Sept. 1, 1820; *d.* Harrogate, Aug. 2, 1892), organist and conductor, studied under Cipriani Potter, and succeeded S. S. Wesley in 1849 as organist of Leeds Parish Church, a post he occupied till 1880.

His claim to notice rests chiefly on the important share he took in directing and improving the choral music for which the West Riding of Yorkshire is famous. He was conductor and chorus-master of many Yorkshire societies, in York, Leeds, Bradford, Huddersfield, Halifax, Barnsley, Harrogate, Holmfirth, Malton and elsewhere. He was also chorus-master to the first Leeds Festival, in 1858, and received the same appointment for the abortive festival of 1861, and again when the festivals were resumed in 1874, but soon resigned the position, in consequence of differences of opinion with the committee. His most important work was perhaps in connexion with the Bradford Festival Choral Society, which he trained and conducted from 1878–87, an office which included the preparation of works for the Bradford subscription concerts founded and conducted for many years by Hallé. The essential feature of his method was his careful attention to vocal phrasing, by which he added greatly to the artistic refinement of Yorkshire choruses.

H. T.

BUSAUNE, an old name for trombone.

BUSBY, Thomas (*b.* Westminster, Dec. 1755; *d.* Pentonville, May 28, 1838), organist and composer, the son of a coach-painter.

After an unsuccessful attempt to get him into the Westminster Abbey choir, he was placed under Champness for singing and Knyvett for harpsichord. In the summer of 1769 he sang at Vauxhall at a weekly salary of ten guineas. On the breaking of his voice in the same year, he was articled for three years to Battishill, and for some time after the expiration of his articles devoted himself to composition and musical literature, acting as parliamentary reporter to the *London Courant*, and contributing musical criticisms to the *European Review* and other periodicals. He worked at a setting of Pope's 'Messiah' for some years, and it was produced in 1799 with considerable success as 'The Prophecy.' About 1786 he was appointed organist of St. Mary's, Newington, and in the same year collaborated with Arnold in bringing out a *Musical Dictionary*. In 1798 he was elected organist of St. Mary Woolnoth. After the performance of his oratorio, he set to work on various odes by Pope and Gray, and Ossian's 'Comala'; in 1800 he wrote music for a version of Kotzebue's 'Joanna,' and a so-called secular oratorio, 'Britannia,' was sung at Covent Garden, with Mara in the principal part. In June 1801 he took the degree of Mus.D. at Cambridge. In 1802 he wrote music to Holcroft's 'Tale of Mystery,' and in the following year to Miss Porter's 'Fair Fugitives.' His last dramatic work was the music to Lewis's 'Rugantino,' 1805. He was a man of great industry, and, besides the works enumerated, wrote and published the following:

The Age of Genius, a satirical poem, 1785; *Dictionary of Music*, 1786, etc.; *The Divine Harmonist*, 1788; *Melodia Britannica*, 1790; *The Monthly Musical Journal* (four numbers), 1801; a translation of *Lucretius*, 1813; *A Grammar of Music*, 1818; *A History of Music* (compiled from Burney and Hawkins), 2 vols. 8vo, 1819; *Concert-Room and Orchestra Anecdotes*, 3 vols. 12mo, 1825; *A Musical Manual, or Technical Directory*, 1828. (*Dict. of Living Authors*, 1816; Busby, *Hist. of Music*; *Private Sources.*)

E. F. R.; addns. and corr. from *D.N.B.*

BUSCH, (1) Fritz (*b.* Siegen, Westphalia, Mar. 13, 1890), eldest son of the violin-maker Wilhelm Busch, conductor.

At 5 years old Busch received his first piano lessons, and at 7 he began to appear at concerts. He attended the gymnasium at Siegen and at Siegburg (Rhineland), to which place his parents moved in 1902. At the same time he became efficient upon most of the orchestral instruments. In 1906 he went to the Conservatoire at Cologne, where he was a pupil of Fritz Steinbach for conducting, of Karl Boettcher and L. Uzielli for piano, of Otto Klauwell for theory and composition. In 1909 he went to Riga as conductor and chorus director of the 'Stadttheater'; in the summer months of 1910–12 he was director of the concerts at Bad Pyrmont (where he conducted in 1911 the Blüthner orchestra from Berlin); in the winter of 1911–12 he conducted the choir of the Musikverein in Gotha. He made winter concert tours as a pianist. In 1912 Busch succeeded Eberhard Schwickerath as director of music at Aachen, and in that position he directed the Aachen Gesangverein, the town orchestra, and the people's concerts. After a short period of war service he again took up his post at Aachen. Busch has a close sympathy for Reger's art, and he conducted the Berlin Philharmonic orchestra at the Reger Festival at Jena in June 1918. In the same month he succeeded Max Schillings first as conductor, then as general musical director of the Stuttgart opera. In 1922 he succeeded Fritz Reiner as general musical director of the State opera in Dresden. Busch ranks as one of the most distinguished of living German opera and concert conductors.

(2) Adolf Georg Wilhelm (*b.* Siegen, Westphalia, Aug. 8, 1891), younger brother of Fritz, is an excellent violinist, leader of his own string quartet, and a composer.

In 1902 he entered the Conservatoire in Cologne, where his teachers were Willy Hess and Bram Eldering, and where Fritz Steinbach took special notice of him. In 1908 he became a composition pupil of Hugo Grüters in Bonn, whose son-in-law he became in 1913.

Max Reger and Busch were associated together from 1907 onwards; Reger liked to produce his chamber music with Busch. In

1912 Busch became leader of the orchestra of the Konzertverein in Vienna, under Ferdinand Löwe. In 1918 he succeeded Henri Marteau as teacher in the Hochschule, Berlin.

He has made lengthy concert tours in which his fine and sympathetic playing has shown him to be one of the first of living German violinists. Since 1919 he has been leader of a string quartet, which consisted at its foundation of Busch, Karl Reitz, Emil Bohnke, Paul Grümmer; and now of Busch, Gösta Andreasson, Karl Doktor and Paul Grümmer. Rudolf Serkin, the young Viennese pianist, is the accompanist.

As a composer Busch was at first closely allied to Reger, but later he achieved a freer and more personal style.

LIST OF WORKS

Choral work, 'Darthulas Grabgesang,' op. 1; Symphonic Fantasy, for orch., org. and choir, op. 17; Fantasy for v'cl. and orch., op. 10; Overtures, *König Ödipus*, op. 13, *Lustspiel*, op. 28; Variations on the Radezky March, orch., op. 9; Variations on a theme of Mozart, small orch.; Concerto for vln., A min., op. 20; Concerto for PF., C maj., op. 31 (Dresden, 1925); Variations on a theme of Schubert, 2 PF., op. 2; Variations on an original theme, PF., etc., op. 5; PF. Sonata, C min., op. 25; Passacaglia, PF. and 2 vlns., op. 4; Trio, 2 vlns. and vla., op. 6*a*; Duet, vln. and v'cello, op. 6*b*; Piano Trio, A min., op. 15; String Trio, A min., op. 24; Deutsche Tänze, clar., vln. and v'cello, op. 26*a*; Duet, clar. and vln., op. 26*b*; Introduction, Tema con variazioni and Rondo, clar. and vln., op. 36*c*; Suite, vla. alone, op. 23*a*; Introduzione, Scherzo, Romanze and Tarantella, v'cello alone, op. 23*b*; Serenadef or str. quartet, G maj., op. 14; Fantasy for organ, op. 19; Violin Sonata, G maj., op. 21; Improvisation on a waltz theme, orch., op. 22; Passacaglia and Fugue for org., op. 27; Suite, org. and vln., op. 33; String Quartet, B min., op. 29; Divertimento for 13 solo instr., A maj., op. 30; Solo Sonata for vln., op. 7*a*; Suite in the old style, v'cello alone, op. 7*b*; Prelude and Fugue for vln. alone, op. 8*a*; ditto for v'cello alone, op. 8*b*; Duo for vln. and vla., op. 8*c*; Sonata for v'cello and PF., A min., op. 18; Songs, op. 3, with PF. and str. accpt.; Songs with orch., op. 12; Songs with PF., op. 11*a*; Songs with orch., op. 11*b*; Kinderlieder for children's choir and orch., op. 32; Duet for soprano and alto with PF., op. 16*a*; Two songs for soprano, gamba and org., op. 16*b*; An edition of J. S. Bach's Solo Sonatas and Partitas (1919).

A. E.

BUSI, Leonida (*b.* Bologna; *d.* there, 1901), was for many years secretary of the Philharmonic Academy of Bologna. Busi is chiefly remembered for his valuable studies of Marcello (*Benedetto Marcello, sua vita e opere*) and Martini (*Il Padre Giov. Batt. Martini, musicista letterato del secolo XVIII*).

F. B.

BUSNOIS (de Busne), Anthoine (*d.* Bruges, Nov. 6, 1492),[1] a distinguished musician of the latter part of the 15th century, probably a native of Picardy. In a composition of his written between 1461 and 1467, and printed at p. 105 of the first volume of Dr. Adler's *Sechs Trienter Codices* (*D.T.Ö.*), he describes himself as a pupil of Okeghem [2] and as 'illustris comitis de Chaulois indignum musicum.' The person referred to is clearly the Comte de Charolais, who in 1467 became Duke of Burgundy and is known to history as Charles the Bold. Busnois continued in the service of the court of Burgundy under Charles and his successor Mary down to 1481, and a musician of his name was afterwards director of the choir at the church of St. Sauveur, Bruges. The identity, however, has been questioned.[3]

[1] Fétis dates the death of Busnois between Oct. 26, 1480, and Feb. 2, 1481, at which period his name disappears from the lists of the ducal chapel.

[2] See also G. Crétin's lament over the death of Okeghem.

[3] Van der Straeten, *La Musique aux Pays-Bas*.

Busnois is frequently cited as an authority by the theorists of the period. In 1476 Tinctor dedicated his treatise *De natura et proprietate tonorum* to

'praestantissimis ac celeberrimis artis musicae professoribus Domino Johanni Okeghem, christianissimi regis Francorum protho-capellano, ac Magistro Antonio Busnois, illustrissimi Burgundorum ducis cantori.'

Two Magnificats, a Mass 'Ecce Ancilla' and four motets by Busnois are extant in a manuscript of the Royal Library at Brussels. Many of his secular pieces are contained in the Dijon MS. 517 (formerly 295) and in Cod. Magliabech. 59 of the National Library of Florence in MS. Casanatense O.V. 208 (now 2856). Other compositions are found in the following MSS.: Riccardiana 2794, Bologna 148, Paris (National Lib.) nouv. acq. f. 4379.[4] Some of his songs are included in Petrucci's early publications, the *Odhecaton* (1501), *Canti cinquanta* (1501), and *Canti centocinquanta* (1503), from the latter of which Kiesewetter transcribed three songs in the appendix to *Verhandelingen*, etc., Amsterdam, 1829. Two more have been printed by Dr. Adler from the Trent manuscripts.

J. F. R. S.; addns. M. L. P.

BUSONI, Ferruccio Benvenuto (*b.* Empoli, Tuscany, Apr. 1, 1866; *d.* Berlin, July 27, 1924), eminent pianist and composer, was the son of a clarinet-player, Ferdinando Busoni, and his wife Anna Weiss-Busoni, a pianist of German parentage.

His childhood was spent chiefly at Trieste and in other parts of Austria; taught music by his mother, he appeared in public at Vienna at the age of 9 and excited the admiration of Hanslick. He played in various towns as a child prodigy, though he never had pianoforte lessons from any well-known master. For a few years he studied composition with Wilhelm Meyer-Remy at Graz. At the age of 15 he made a successful concert tour in Italy; he became a member of the Philharmonic Academy of Bologna (the youngest since Mozart), and at Florence a gold medal was struck in his honour. To this period there belong a number of unimportant pianoforte compositions and a cantata, 'Il Sabato del villaggio' (poem by Leopardi), which was performed at Bologna. He went to Leipzig in 1886 to study composition, and while there was a fellow-pupil of Frederick Delius. In 1889 he became professor of the pianoforte at the Conservatoire of Helsingfors, and after winning the Rubinstein prize at St. Petersburg with a 'Konzertstück' for pianoforte and orchestra in 1890, he taught at the Moscow Conservatoire. From 1891–94 he was in America, giving concerts and also teaching the pianoforte at the New England Conservatory, Boston. He returned to Europe in 1894 and took up his residence in Berlin, where he remained until 1914,

[4] See E. Droz and G. Thibault, *Bibliographie des recueils de chansons du XVe siècle*.

though frequently making extended concert tours in various countries, including England. In 1901–02 he was invited to give advanced classes for pianists at Weimar, carrying on the tradition of Liszt, for whom he always had the deepest admiration, although he never heard Liszt play and never even saw him.

During this period Busoni established his fame as a pianist. His style was somewhat criticised by those who had been brought up in the austere traditions of Clara Schumann, and he was regarded as belonging to the ultra-romantic party. Particular exception was taken to his transcriptions after the manner of Liszt. In Berlin he not only appeared as a virtuoso but conducted orchestral concerts as well. He brought out many new works and works that were new and strange to Berlin audiences, such as the two symphonies of Vincent D'Indy. Needless to say, Liszt figured frequently in his programmes ; in 1911 he celebrated the centenary of Liszt's birth by a remarkable series of 6 Liszt recitals. He visited America again in 1910–11, and in 1913 was made director of the Liceo Musicale of Bologna. Always intensely conscious of his Italian nationality, he had hoped to develop the teaching at this historic seat of musical learning on the advanced lines which he had followed himself ; but he soon found that the duties of director involved him in a mass of irksome administrative detail, and after a year he resigned the post. His chief interest lay more and more in composition and less in pianoforte-playing, although for a long time he found it very difficult to obtain recognition as a composer. The violin sonata in E, op. 36*a*, which belongs to his Berlin period, is the first work which he himself regarded as fully mature, though it is preceded by the huge pianoforte concerto, op. 34, a work in five long movements with a chorus of male voices at the end.

After the outbreak of war in 1914, Busoni went to America on a concert tour, and in the autumn of 1915 settled at Zürich, where he remained until 1920, refusing to play in any of the belligerent countries. He returned to Berlin in the autumn of 1920 and very soon established for himself a position of honour hardly accorded to him before. A younger generation had grown up which was prepared to accept him not merely as a pianist but also as a composer, and he was also appointed by the new government to a chair of composition at the (formerly Royal) Academy of Arts. He played several times in England after the war was over, but in recent years his health seldom allowed him to appear in public, though he never ceased devoting himself to composition. An opera on a story of E. T. A. Hoffmann, ' Die Brautwahl,' was produced at Hamburg in 1912 ; in 1918 ' Arlecchino,' a one-act comic opera, was produced at Zürich, and a few years later he converted his incidental music to Gozzi's ' Turandot ' (composed for Max Reinhardt's production at the Deutsches Theater in Berlin, 1913) into a little opera with spoken dialogue. During his last years he was at work on an operatic treatment of the Faust legend. He published the libretto, which is written in German by himself ; it is a drama of remarkable originality and force, owing little or nothing to previous treatments of the subject.

Busoni's devotion to Liszt, which was constant throughout his career, is not to be dismissed as the admiration of a virtuoso pianist for his famous predecessor. Although Busoni's extraordinary technical powers made him the founder of a new school of pianoforte-playing, virtuosity was for him always subsidiary to interpretation, and his interpretations, whether of Liszt or of other composers, were always predominantly intellectual in character. What appealed to Busoni in the music of Liszt was obviously its Italian aspect, coupled with its German romanticism, and more especially Liszt's conception of the monumental possibilities of the pianoforte and of music in general ; a further source of inspiration was that latest period of Liszt's music in which he looks forward towards the music of our own day with a singularly prophetic insight. For small forms, for music of delicate and intimate character, Busoni seems to have had little interest ; even such things as Chopin's Preludes he played in a monumental manner. It is natural that his interpretations of Beethoven and Bach should have been on the same magnificent scale ; but latterly he paid more attention to Mozart, whose concertos he played in a style entirely his own, with cadenzas of startling originality, though developed logically out of Mozart's own materials and style.

The influence of Liszt is very apparent in the great Pianoforte Concerto, but it has an Italian brilliance, an Italian dignity and solemnity which place it in a category by itself. In later works the influence of Bach becomes more dominant, reaching its climax in the ' Fantasia contrappuntistica ' on an unfinished fugue of Bach, which leads us gradually by strictly contrapuntal methods from the simplicity of the 18th century to the most daring conceptions of our own time. In the operas, the composer to whom Busoni shows most affinity is the Verdi of ' Falstaff.'

Busoni died before finishing the opera ' Doktor Faust,' but the concluding scene was completed by his pupil Philipp Jarnach, and the work was produced at Dresden, May 21, 1925. It is hardly likely that the opera will ever be popular with the general public, owing to its severely intellectual character and to the fact that the chief female part is little more than a mere episode ; but, considered as a whole, ' Doktor Faust ' is a work

of extraordinary nobility and beauty. The ballet music, in which Busoni's admiration for Bizet is manifest, is brilliantly scored and extremely attractive. The prologue, which is of great length and divided into various sections, is deeply impressive, especially in its treatment of the chorus, which sings large portions of the Latin Mass behind the scenes as a background to the compact of Faust with Mephistopheles. Jarnach's final scene, though founded on Busoni's own materials, hardly achieves his luminous contrapuntal texture in the orchestra, but is perhaps more dramatic in style than most of the opera; in any case, it is a worthy and dignified conclusion, and it can safely be said that there was no other composer living who could have undertaken the difficult task with equal success. 'Doktor Faust' is undoubtedly Busoni's greatest work and the one which expresses his own personality in the fullest way.

A number of smaller works both for pianoforte and for orchestra are of interest as showing various phases of Busoni's personality; they are often studies towards the solution of some particular problem of composition, especially to that most pressing problem—the development of new musical forms on classical principles. For Busoni, notwithstanding his open contempt for 'academic' music, was a complete master of all technical device in composition and no revolutionary, although he was for ever striving after new methods of expression. What he sought to achieve was a neo-classicism in which form and expression may find their perfect balance. A man of wide reading and powerful intellect, his prose writings about music are in the form of short essays and sketches (even the *Neue Ästhetik der Tonkunst* is a collection of aphorisms rather than a treatise), but they contain a number of new and suggestive ideas.

Busoni was often supposed by those who did not know him to be an eccentric character; but this hardly represents the truth. He was very happily married and his domestic life was unclouded. He was always guided by the motto of Liszt—'Génie oblige'; jealousy and intrigue were entirely alien to his nature. To younger musicians he always extended a cordial welcome and a generous appreciation. He was a copious and vivid letter-writer, with a strong sense of humour, which often found expression in spirited pen-drawings. His two sons are both painters. Though he disliked going into society, he was in his own house a most genial host, and his talk was remarkably witty and stimulating. E. J. D.

The following is a summary of Busoni's chief works:

OPERAS

Die Brautwahl, op. 45. (Hamburg, 1912.)
Turandot. (Berlin, 1921.)
Arlecchino, op. 50. (Zürich, 1918.)

ORCHESTRA

Symphonic Suite, op. 25. (1888.)
Symphonic Tone-poem, op. 32*a*.
Violin Concerto, op. 35*a*.
Lustspiel Overture, op. 38.
Geharnischte Suite, op. 34*a*.
Turandot Suite, op. 41.
Berceuse élégiaque, op. 42.
Nocturne symphonique, op. 43.
Brautwahl Suite, op. 45.
Rondo arlecchinesco, op. 46.
Gesang vom Reigen der Geister, op. 47.
Concertino, clarinet and small orch., op. 48.
Sarabande and cortège (from Faust music), op. 51.
Divertimento, flute and orchestra, op. 52.
Tanzwalzer, op. 53.

PIANO

Four Ballet scenes, opp. 6, 20, 30, 30*a*.
Variations and Fugue on Chopin's Prelude in C minor, op. 22. (1885.)
Six Elegies. (1908.)
Six Sonatinas (with various titles; see SONATINA). (1910–21.)
'An die Jugend.' (4 books, 1909.)
Indianisches Tagebuch. (1915.)
Fantasia contrappuntistica (on themes from Bach's 'Art of Fugue').
Toccata. (1921.)
Studies. (5 books, 1921.)
Cadenzas to various Concertos (see CADENZA).
A revised version of 'Fantasia contrappuntistica,' an Improvisation on a Bach Choral, and 'Duettino concertante' on a theme of Mozart, are for 2 pianos.
Konzertstück (with orch.), op. 31*a*.
Concerto (with orch. and choral finale), op. 39.
Indian Fantasy (with orch.), op. 44. (1914.)

SONGS

Collected under the following operas, numbers 1, 2, 15, 18, 24, 31, 32 (Italian), 35, 'Ave Maria,' with orch.

CHAMBER MUSIC

2 String Quartets, opp. 19, 26.
Suite V'cl. and PF., op. 23.
4 Bagatelles Vln. and PF., op. 28.
2 Sonatas Vln. and PF., opp. 29, 36*a*.
Serenata V'cl. and PF., op. 34.

ARRANGEMENTS AND EDITIONS

Bach Studies (7 vols.), transcriptions together with an edition of 'Das wohltemperirte Klavier.' An Idomeneo Suite (Mozart), overtures to 'Die Entführung' and 'Don Giovanni' with concert endings.

LITERARY WORKS

Entwurf einer neuen Ästhetik der Tonkunst (Trieste, a revised and enlarged edition by Insel-Verlag, Leipzig, n.d., 1907), translated by T. Baker, *The New Aesthetic of Music* (New York, 1911).
Versuch einer organischen Klaviernotenschrift. (1910.)
Von der Einheit der Musik, verstreute Aufzeichnungen, Collected Essays. (Berlin, 1923.)
Poems of Operas in addition to those already produced: 'Das Wandbild' (1918), 'Doktor Faust' (1920), 'Die Götterbraut' (1921).

G. SELDEN-GOTH: *F. Busoni.* (Vienna, 1922.)

BUTHS, JULIUS (*b.* Wiesbaden, May 7, 1851; *d.* Düsseldorf, Mar. 12, 1920), pianist and conductor, was the son of an oboe-player, and studied music at Cologne and Berlin, and later in Italy and at Paris. From 1875–79 Buths was settled at Breslau, where he conducted the Gesangverein, and he then moved to Elberfeld (1879–90). But his most important opportunity came to him with the appointment of musical director to the city of Düsseldorf (1890–1908), where he took charge of the famous Lower Rhine Festivals (see NIEDERRHEINISCHE MUSIKFESTE). There from 1893 onward he gave a number of outstanding performances of great works both classical and modern. He made the German translation of Elgar's 'The Dream of Gerontius' and produced it at the festival of 1902 (see ELGAR). In that year he became director of the newly formed Conservatorium at Düsseldorf. (*Riemann.*) C.

BUTLER, THOMAS HAMLY (*b.* London, 1762; *d.* Edinburgh, 1823), son of John Butler, professor of music.

He received his early musical education as a

chorister of the Chapel Royal under Dr. Nares. On the breaking of his voice he was sent to Italy to study composition under Piccinni, where he remained three years. On his return to England he was engaged by Sheridan to compose for Drury Lane Theatre. Differences, however, arising, he quitted England at the expiration of his engagement and settled in Edinburgh, where he established himself as a teacher. Butler composed the music for 'The Widow of Delphi,' a musical comedy by Richard Cumberland, 1780, besides many pieces for the pianoforte. W. H. H.

BUTT, Dame Clara (*b.* Southwick, Sussex, Feb. 1, 1873), contralto singer, studied with Daniel Rootham at Bristol, and in 1889 gained a scholarship at the R.C.M., where she was a pupil of J. H. Blower. She made her début at the Albert Hall as Ursula in 'The Golden Legend' on Dec. 7, 1892, and three days afterwards sang the part of Orpheus at the pupils' performance of Gluck's opera at the Lyceum Theatre. Her commanding stature and fine stage presence greatly assisted the effect of her beautiful voice, and from that time her success has been unqualified. It has been almost entirely a success of the concert platform and latterly of her own platform, that is, in her own concerts, more or less of the ballad type, given all over the British Empire. She has, however, been much in request for other concerts, and particularly for the English Festivals. Her first festival engagements were at Hanley and Bristol in Oct. 1893. In 1895 she went to Paris to study with M. Bouhy, and at the same time had a few lessons from Mme. Etelka Gerster. Elgar's 'Sea Pictures' were written for her and produced with conspicuous success at the Norwich Festival of 1899. She married Kennerley Rumford (*q.v.*) in 1900, since when their careers have been pursued together. In 1920 she was created D.B.E. in acknowledgment of services during the war. In the same year she made a reappearance on the operatic stage, singing several times in Gluck's 'Orfeo' at Covent Garden. M. and C.

BUTTERWORTH, George Sainton Kaye- (*b.* London, July 12, 1885; *d.* in action, Pozières, Aug. 5, 1916), had in a few years of activity made his mark as a composer and as a collector and student of folk-song and dance.

Butterworth, whose father, Sir Alexander Butterworth, was solicitor to and later general manager of the North-Eastern Railway, was brought up in Yorkshire. He won a foundation scholarship at Eton (1899), and entered Trinity College, Oxford, in 1904. It was there that his musical character was developed, largely by contact with H. P. Allen (*q.v.*), and during his Oxford days his interest in folk-song and in the influences of nationality on art generally was aroused by friendships with Vaughan Williams and Cecil Sharp. After leaving Oxford his activities included some essays in musical criticism, with some contributions to the second edition of this Dictionary, an assistant mastership at Radley and a year of study at the R.C.M. He helped Vaughan Williams in the preparation of the score of his 'London Symphony' and wrote notes for its first performance. He took part in the summer schools of folk-dancing and was himself an excellent dancer. He collected and arranged a set of 'Eleven Folk-songs from Sussex.' His own songs, especially those from *A Shropshire Lad* (Housman), have the clean simplicity of folk-melody. An orchestral rhapsody on a theme from one of them was produced by Nikisch at the Leeds Festival (1913), and has been much played since. An orchestral Idyll, 'The Banks of Green Willows,' on folk-themes was produced at Queen's Hall (Mar. 20, 1914), at a concert given by F. B. Ellis. The war cut short these pursuits. Butterworth promptly enlisted, won a commission in the Durham Light Infantry, was awarded the Military Cross for his gallant defence of a trench which was subsequently named after him, and was killed in action before he could hear of the award.

His compositions include:

Cycle of Six Songs from *A Shropshire Lad.*
'Bredon Hill,' and other songs from the same.
Eleven Folk-songs from Sussex collected and arranged.
Two Songs for baritone.
'On Christmas night' (S.A.T.B.), a traditional carol.
'We get up in the morning' (T.T.B.B.), a traditional carol.
'In the Highlands,' female voices and PF.
'Love blows as the wind blows,' baritone and strings 4tet or PF.
'The Cherry Tree,' Rhapsody for orchestra.
'The Banks of Green Willows,' Idyll for orchestra.

C.

BUTTING, Max (*b.* Berlin, Oct. 6, 1888), a pupil of Dreyer, Prill, Klose, and Courvoisier in Munich. He is essentially a composer of chamber music though on entirely independent lines. Quite uninfluenced, he has nothing in common with any of the various schools of musical composition.

Works.—Op. 1, 5 songs with small orch.; op. 6, unfinished Mass; opp. 8, 16, 18, 20, str. quartets; op. 10, str. quintet; op. 11, solo sonata for vln. in five movements; op. 14, PF. quartet; op. 15, str. trio; op. 19, v'cl. concerto; op. 21, chamber symphony; op. 22, quintet for oboe, clar., vln., vla. and v'cl.

H. J. K.

BUTTON & WHITAKER, a notable music-publishing house, the business of which was founded upon that of Messrs. Thompson and carried on in their old premises, 75 St. Paul's Churchyard—the north-west side. S. J. Button, a bookseller of 24 Paternoster Row, at first became junior partner with Purday, and they directly succeeded Henry Thompson; this was about 1804–05. In 1807 the names were transposed into Button & Purday, and the following year the firm became Button & Whitaker, the latter being John Whitaker, the composer (*q.v.*). Button & Whitaker, besides republishing works originally issued by the Thompson family, put forth great quantities of the popular songs of the day, books of sacred

music, small volumes of flute music, collections of glees and of country-dances, etc.

Before 1816 the partnership existed under the titles 'Button, Whitaker & Beadnell' or 'Button & Company,' and in 1820 as 'Whitaker & Co.' The business ceased about 1830.

F. K.

BUTTSTETT, JOHANN HEINRICH (*b.* Bindersleben, near Erfurt, Apr. 25, 1666; *d.* Erfurt, Dec. 1, 1727), a pupil of Pachelbel, organist at two churches at Erfurt from 1684, and at the cathedral from 1691. His controversy with Mattheson about the solmisation which he championed, brought him into public notice, though it was also a source of much annoyance to him. He wrote: 'Ut re mi fa sol la tota musica . . .,' 2 vols. (1717); 'Musikalische Klavierkunst . . .,' preface, preludes, fugues, etc. (1716); 4 masses (1720), and a canzonet, as well as a number of organ pieces in MS. E. v. d. S.

BUUS, JACQUES DE, see JACHET.

BUXTEHUDE, DIETRICH (*b.* Helsingborg, Sweden, 1637; *d.* Lübeck, May 9, 1707), a famous organist and composer who exerted an important influence on J. S. BACH (*q.v.*).

His father, JOHANN BUXTEHUDE (*b. circa* 1603; *d.* Jan. 22, 1674), was for thirty-two years organist of the Olai-church at Helsingör (Denmark), hence the former attribution of Dietrich's birth to that place. Pirro, however, has established his birthplace at the Swedish town across the strait. In Apr. 1668 he obtained the post of organist at the Marienkirche of Lübeck—one of the best and most lucrative in Germany—where his admirable playing and promising abilities excited much attention. Here, not content with discharging his duties at the organ, he conceived the idea of instituting great musical performances in connexion with the church services, and in 1673 started the 'Abendmusiken,' or evening performances, on which Lübeck peculiarly prided itself. They took place annually, on the five Sundays before Christmas, beginning between four and five o'clock, after the afternoon service, and consisted of concerted pieces of sacred music for orchestra and chorus—the former improved and the latter formed by Buxtehude — and organ performances. In such efforts Buxtehude was well seconded by his fellow-citizens. The musical evenings continued throughout the 18th century and into the 19th. Further particulars concerning them are given by Spitta in his *Life of J. S. Bach* (i. 258, from Möller's *Cimbria Litterati*, and Conrad von Höveln's *Beglückte und geschmückte Lübeck*); Mattheson also mentions them in his *Vollkommene Kapellmeister*, where he also speaks of a collection of seven Klaviersuiten 'in which the nature and character of the planets are agreeably expressed.' The best testimony to Buxtehude's greatness is contained in the fact of Johann Sebastian Bach having made a journey of 200 miles on foot that he might become personally acquainted with the Lübeck concerts. In fact, Buxtehude became the great musical centre for the North of Europe, and the young musicians flocked around him. Amongst these was Nicolas BRUHNS (*q.v.*). Buxtehude's strength lay in his free organ compositions (*i.e.* pieces not founded on Chorals), and generally in instrumental music, pure and simple. These are remarkable as an assertion of principles of pure instrumental music, afterwards fully developed by Bach. In treatment of Chorals on the organ Buxtehude was not equal to the school of Pachelbel; but he must not be judged from his weaker side.

Spitta edited two volumes of Buxtehude's organ works (1876), including the 'Abendmusiken' from 1678 to 1687, and occasional pieces, many of them published at Lübeck during his lifetime. A complete edition followed. Other instrumental music, including sonatas for strings, has been edited by H. Stiehl and published in *D.D.T.* vol. xi. 'Abendmusiken' and church cantatas edited by Max Seiffert are published in *D.D.T.* vol. xiv. Fourteen 'Choral-Bearbeitungen' were edited by Dehn (Peters). A French reprint of the organ works was edited by Ch. Tournemire. Commer (*Musica sacra*, i. No. 8), G. W. Körner, Busby (*Hist. of Music*) and A. G. Ritter (*Kunst des Orgelspiels*) have also published separate pieces of his.

C. F. P., rev. with addns.

BYFIELD, JOHN. There were two English organ-builders of this name. Their works pass current under one head; but Dr. Rimbault is able to quote 18 instruments (from 1750–71) as made by the younger Byfield (*d.* 1774). The last six of these were built conjointly with GREEN (*q.v.*). See also HARRIS; and BYFIELD, JORDAN & BRIDGE. V. de P.

BYFIELD, JORDAN & BRIDGE. Many new organs were required for the new churches built at the beginning of the 18th century, and many incompetent persons were induced to become organ-builders. To prevent the ill-consequences likely to follow, these three eminent artists formed a coalition to build organs at a very moderate charge, amongst which may be cited those of Great Yarmouth Church (1733) and of St. George's Chapel in the same town (1740). V. de P.

BYRD (BYRDE), WILLIAM (*b.* probably Lincoln, 1542/43; *d.* probably Stondon, Essex, July 4, 1623), is generally said to have been the son of Thomas Byrd, a member of the Chapels Royal of Edward VI. and Mary; but this statement is purely conjectural, the only evidence upon which it rested—viz. that Byrd's second son was named Thomas, as it was supposed, after his grandfather—having been disproved by the discovery that he was named after his godfather, Thomas Tallis. The date (1538) formerly given as that of William Byrd's birth was conjectured from a statement that he was the senior chorister in St. Paul's Cathedral in 1554, when his name was alleged to appear in a petition of the choristers for the restoration of certain benefactions to which they were entitled. This petition cannot be found among the public records of the year, though documents relating to the restoration of the payments in question are in existence, and in these William Byrd's name does not occur, though two other choristers, named John and Simon Byrd, are mentioned. That he was born in 1542 or 1543 is proved by his will, made in Nov. 1622, in which he describes himself as 'nowe in the eightieth year of myne age.' It seems most likely that the composer was a native of Lincoln, where a Henry Byrde, formerly mayor of Newcastle, died on July 13, 1512, and was buried in the Cathedral. Families of the same name were also settled in the 16th century at Spalding, Epworth, Moulton and Pinchbeck, in Lincolnshire, and also at Saffron Walden in Essex.

According to Anthony Wood, Byrd was 'bred up to musick under Thomas Tallis,' and it has been assumed that a fine 5-part madrigal, 'Crowned with flowers and lilies,' the words of which refer to Queen Mary as one 'whom Fate refuses a sacred tomb to give of fame immortal,' was written by Byrd as an elegy on the Queen's death (Nov. 17, 1558), when he was only sixteen. Two copies of the madrigal are preserved in the British Museum (*e.g.* 2009-12 and Add. MSS. 29,401-5), but the composer's name is only given in the Medius part of the first. Both copies are in sets of partbooks, the contents of which are mostly anonymous, though several can be identified as by Byrd. Amongst those which are yet unidentified are madrigals referring to events connected with Henry VI., Queen Elizabeth Woodville, Thomas Cromwell, and the deaths of Mary Queen of Scots, Queen Elizabeth, and Prince Henry. It is impossible that the earlier of these compositions should be contemporaneous with the events to which they refer, and it is therefore probable that the whole set—including Byrd's madrigal—belong to the reign of James I. The first authentic fact in Byrd's biography is his appointment as organist of Lincoln Cathedral, which took place on Feb. 27, 1563. On Sept. 14, 1568, he was married at St. Margaret in the Close to Ellen or Julian Birley, and his eldest son, Christopher, was baptized at the same church on Nov. 18, 1569. On Feb. 22, 1569/70, he was sworn in as a member of the Chapel Royal, but he does not seem to have left Lincoln immediately, for his eldest daughter, Elizabeth, was baptized there on Jan. 20, 1571/72, and on Dec. 7, 1572, Thomas Butler was elected master of the choristers and organist 'on y^e^ nomination and commendation of Mr. William Byrd.' In the Chapel Royal he shared with Tallis the honorary post of organist, and on Jan. 22, 1575, the two composers obtained a patent from Elizabeth for printing and selling music and music paper, English and foreign, for 21 years, the penalty for the infringement of which was 40 shillings. This monopoly does not seem to have been very valuable, as a petition preserved in the Stationers' Registers, in which a list of restrictions upon printing is given, records that 'Bird and Tallys . . . haue musike bokes with note, which the complainantes confesse they wold not print nor be furnished to print though there were no priuilege.' In 1575 Byrd and Tallis published a collection of motets: 'Cantiones, quae ab argumento sacrae vocantur, quinque et sex partium,' of which 18 were the composition of Byrd. The work was printed by Thomas Vautrollier, and was dedicated to the Queen. It contains eulogistic Latin verses by Richard Mulcaster and Ferdinando Richardson, an anonymous Latin poem 'De Anglorum musica,' a short Latin poem by the composers,[1] and an epitome of their patent. On June 27, 1577, Byrd and Tallis petitioned the Queen for a lease in reversion for 21 years of the yearly value of £40. In this document (*Calendar of MSS. at Hatfield, Hist. MSS. Commission*, ii. p. 155), it is stated that Byrd

'being called to Her Majesty's service from Lincoln Cathedral, where he was well settled, is now, through great charge of wife and children, fallen into debt and great necessity. By reason of his daily attendance in the Queen's service he is letted from reaping such commodity by teaching as heretofore he did. Her grant two years ago of a licence for printing music has fallen out to their loss and hindrance to the value of 200 marks at least.'

From the endorsement of this document it would seem that the petition was granted. About 1574 Byrd had obtained a lease from the Earl of Oxford for thirty-one years of the Manor of Battles Hall in Stapleford, Essex, to take effect from the death of one Aubrey Ware or his wife. This led (about 1582, but the records are undated) to litigation, in which Byrd seems to have been worsted (*Cal. Dom. Eliz.* clvii. No. 26). In Nov. 1577, a return (*Calendar Dom. Eliz.* cxviii. No. 73) from the Bishop of London 'of all such as refuse to come to their parish churches within the diocese of London' includes the name of

[1] See TALLIS.

Mrs. Byrd, as living at Harlington in Middlesex, and he probably remained there until his removal to Stondon, in Essex, about 1593. A glimpse of Byrd is obtained in 1579 in a letter preserved in the British Museum (*Lansd.* 29, No. 38) from the Earl of Northumberland to Lord Burghley, which runs as follows :

'My dere good lorde I amme ernestly required to be a suiter to your l[ordship] for this berer, Mr. berde, that your l[ordshi]p wyll have hime in remẽbrance w̃h your fauer towardes hime seinge he cane not inioye that wyche was his firste sutte [suit] and granted vnto hime. I am̃e the more importenat to your l[ordship] for that he is my frend and cheffly that he is scollemaster to my daughter in his artte. The mane is honeste and one whom I knowe your l[ordship] may comãnde.'

The letter is dated Feb. 28, 1579, and endorsed 'Bird of ye Chappell,' but what the suit was to which it refers is not known. For the performance of Thomas Legge's Latin play 'Ricardus III.,' at St. John's College, Cambridge, in 1579–80, Byrd set a short 3-part chorus (printed in Stafford Smith's *Musica antiqua*). Three years later there is a record (Cooper, *Annals of Cambridge*, v. p. 314) of another connexion of Byrd with Cambridge. Dr. Bell, the Vice-Chancellor, by an instrument dated Sept. 7, 1583, after reciting that 'time out of minde it hath been a custome and always used within this fair' (*i.e.* Sturbridge Fair) 'that some musitian whome they have usually called the Lord of the Tappes should . . . after sunset and likewise before the sunne rising by sounde of some instrument give notice to shut and open the shops,' and that the post being vacant by the death of John Pattyn, 'many of the worshipfull Citizens of London and other places have . . . commended unto us William Byrde . . . being a Musitian and now servant and wayht of the . . . University,' appointed Byrd to the 'roome and place of the Lord of Tappes.' This document raises several difficult questions. It would seem that at this period the university and the town were in the midst of one of their frequent quarrels about Stŭrbridge Fair. The Lord of Taps, an office which, in later days, at least, was of a notoriously Bacchanalian character, was appointed by the town. Moreover, the waits were never servants of the university, but solely of the town. It is therefore probable that the Vice-Chancellor's proclamation, which is vaguely addressed to 'merchants' and to no official body, was an arrogant assumption of a claim that could not have been maintained legally. Dr. Bell, like Dr. Legge (the author of 'Ricardus III.'), was suspected of Romanism, and voted against 'proposals for a more thorough reformation' in 1562–63, though he afterwards went with the tide and became Dean of Ely in 1589. He may therefore have intended, by claiming the right of appointing Byrd to the office of Lord of Taps, to give annoyance to the strong Protestant party in the town. The whole incident seems obscure, but it is highly improbable that a musician of Byrd's eminence should ever have been either a Cambridge wait or have occupied an undignified post at Sturbridge Fair.[1]

On the death of Tallis in 1585 the benefit of the monopoly in music-printing became the sole property of Byrd, who during the next few years was unusually active in composition. In a list of houses of Catholics to be searched, dated Aug. 21, 1586 (*Cal. Dom. Eliz.* cxcii. 48), is 'Mr. Byrd's house at Harmousworth or Craneford,' both villages near Harlington. At about the same date may be placed a list (*Cal. Dom. Eliz.* cxlvi. 137) of 'the names of . . . suche as are relievers of papistes and conveyers of money and other thinges unto them beyonde the Seas.' This document (which is undated) was evidently drawn up for hunting out recusants, and contains, in another hand, directions, etc., as to where they may be found. Among the names is that of 'Mr. Byrde, at Mr. Listers his house, over against St. Dunstans, or at the Lord Padgettes house at Drayton.' The annotator has added : 'the messenger is to tell him things which he will well like.' In 1588 Byrd published

'Psalmes, Sonets, and Songs of Sadnes and Pietie, made into Musicke of flue parts : whereof, some of them going abroade among diuers, in vntrue coppies, are heere truely corrected, and th' other being Songs very rare and newly composed, are heere published, for the recreation of all such as delight in Musicke.'

This work was published by Thomas East, 'the assigne of W. Byrd,' in 1588. In Rimbault's untrustworthy *Bibliotheca madrigaliana* an undated edition is mentioned, which may be the same as the one mentioned in the Stationers' Register as being in print on Nov. 6, 1687. The 'Songs of Sadnes' are dedicated to Sir Christopher Hatton : prefixed are the following quaint 'Reasons briefely set downe by th' auctor to perswade euery one to learne to singe' :

First, it is a knowledge easely taught, and quickly learned, where there is a good Master, and an apt Scoller.

2. The exercise of singing is delightfull to Nature, and good to preserue the health of Man.

3. It doth strengthen all parts of the brest, and doth open the pipes.

4. It is a singuler good remedie for a stutting and stamering in the speech.

5. It is the best meanes to procure a perfect pronunciation, and to make a good Orator.

6. It is the onely way to know where Nature hath bestowed the benefit of a good voyce ; which guift is so rare, as there is not one among a thousand, that hath it : and in many, that excellent guift is lost, because they want Art to expresse Nature.

7. There is not any Musicke of Instruments whatsoeuer, comparable to that which is made of the voyces of Men, where the voyces are good, and the same well sorted and ordered.

8. The better the voyce is, the meeter it is to honour and serue God there-with : and the voyce of man is chiefely to be imployed to that ende.

Since singing is so good a thing,
I wish all men would learne to singe.

[1] See *The Times Literary Supplement*, Mar. 13, 1924.

The whole work has been reprinted as vol. xiv. of Fellowes's *English Madrigal School.*

At the end of 1588 Byrd contributed two madrigals to the first book of Nicholas Yonge's *Musica transalpina,* and in the following year published two more works. The first of these,

'Songs of Sundrie Natures, some of grauitie, and others of mirth, fit for all companies and voyces,'

was dedicated to Sir Henry Cary, Lord Hunsdon, and was published by Thomas East; a second edition was issued by East's widow, Lucretia, in 1610; the work forms vols. vi.-ix. of G. E. P. Arkwright's *Old English Edition,* and vol. xv. of Fellowes's *English Madrigal School.* The second, 'Liber primus sacrarum cantionum quinque vocum,' was dedicated to the Earl of Worcester. It was published by East on Oct. 25. In 1590 Byrd contributed two settings of 'This sweet and merry month of May' to Thomas Watson's 'First Sett of Italian Madrigalls Englished'; one of these seems to have been sung before Elizabeth on her visit to Lord Hertford at Elvetham in 1591. On Nov. 4, 1591, he published the 'Liber secundus sacrarum cantionum,' dedicated to Lord Lumley.

During this period of his life Byrd wrote a large amount of Virginal Music (*q.v.*), many manuscript collections of which are still extant. One of the most important of these is the volume transcribed for the use of Lady Nevill by John Baldwin of Windsor, which consists entirely of Byrd's compositions. This manuscript was finished in 1591, and furnishes evidence of the repute which the composer enjoyed at this time, Baldwin quaintly writing against Byrd's name at the end of the seventeenth piece, 'Mr. W. Birde. Homo memorabilis.' The great esteem in which he was held as a musician must have been the reason why he continued to hold his appointment in the Chapel Royal. It is significant that his name is never found among the signatories of the various memoranda in the Chapel Royal Cheque-Book, and it seems probable that the authorities, in view of his great reputation as a musician, were content to ignore his personal religion, so long as he provided services and anthems for the Royal Chapel. In Father Morris's *Life of Father William Weston* ('The Troubles of our Catholic Forefathers,' second series, 1875, pp. 142-5) will be found several allusions to Byrd as a recusant from various lists preserved in the State Papers (*Domestic Series, Elizabeth,* cxlvi. 137, cli. 11, clxvii. 47, cxcii. 48), and in the same work the following interesting passage is given from Father Weston's Autobiography, describing his reception at a house which the editor identifies as being in Berkshire, the residence of a certain Mr. Bold, where

'they had a chapel for the celebration of the Divine Mysteries, an organ likewise and other musical instruments, and, moreover, singers of both sexes belonging to the family, the master of the house being singularly experienced in the art. . . . We met there also Mr. Byrd, the most celebrated musician and organist of the English nation, who had been formerly in the Queen's Chapel, and held in the highest estimation; but for his religion he sacrificed everything, both his office and the Court and all those hopes which are nurtured by such persons as pretend to similar places in the dwellings of princes, as steps towards the increasing of their fortunes.'

This was written in July 1586. The Sessions Rolls of the County of Middlesex show that true bills 'for not going to church, chapel, or any usual place of common prayer' were found against 'Juliana Birde wife of William Byrde' of Harlington on June 28, 1581; Jan. 19, Apr. 2, 1582; Jan. 18, Apr. 15, Dec. 4, 1583; Mar. 27, May 4, Oct. 5, 1584; Mar. 31, July 2, 1585; and Oct. 7, 1586. A servant of Byrd's, one John Reason, was included in all these indictments, and Byrd himself was included in that of Oct. 7, 1586, and (without his wife or his servant) a true bill was found against him on Apr. 7, 1592, at which date he is still described as of Harlington. As there is no mention in the Chapel Royal Cheque-Book of Byrd's giving up his place, Father Weston's information on this point was evidently incorrect. A letter (*Cal. Dom. Eliz. Add.* xxxii. 17) from Lord Admiral Howard, dated June 9, 1591, addressed to the Masters of Requests, refers to a suit between Byrd and Basil Fettiplace, Sheriff of Berks, but nothing is known as to what was its subject.

About 1593 Byrd became possessed of the remainder of a lease (held by Lawrence and William Hollingworth) of Stondon Place, a farm of some 200 acres near Ongar, Essex, belonging to William Shelley, who in 1580 had been committed to the Fleet and in 1583 to the Tower for complicity in an alleged Popish plot. He was attainted in 1586 and condemned to death, though the sentence was never carried out. The property was sequestrated, and on July 15, 1595, Byrd obtained a crown lease of it for the lives of his son Christopher and his daughters Elizabeth and Rachel. Shelley died on Apr. 15, 1597, and his widow pressed for the restoration to her of Stondon Place, by virtue of her marriage jointure, refused to ratify the crown lease, and did all she could to oust Byrd. But he was still under the protection of the court, and Mrs. Shelley was ordered to allow him to enjoy quiet possession of the property. In spite of this, on Oct. 27, 1608, she presented a petition to the Earl of Salisbury, praying for the restoration of Stondon, and setting forth eight grievances against the composer. In this document she alleged that Byrd went to law in order to compel her to ratify the crown lease, but being unsuccessful he combined with the individuals who held her other jointure lands to enter into litigation with her, and when all these disputes had been settled, and finally 'one Petiver' submitted, 'the said Bird did

give him vile and bitter words,' and when told that he had no right to the property, declared 'that yf he could not hould it by right, he would holde it by might'; that he had cut down much timber, and for six years had paid no rent. Mrs. Shelley died in 1610, and the long suit was ended by Byrd's buying (7 James I.) the property from her son, who was created a baronet in 1611. Byrd settled Stondon Place upon himself, in the names of John and Thomas Petre, and 'did set apart certain parcels of the said farm to the value of £20 for himself during his life and after his death for his son Thomas,' a settlement which subsequently led to further litigation. It is a curious fact that while Byrd was actually in the possession, under a crown lease, of lands confiscated from a Catholic recusant, and was a member of the Chapel Royal on the accession of James I., both he and his family were not only regularly presented in the Archidiaconal Court of Essex from 1605–12, and probably later, but since the year 1598 had been excommunicated by the same ecclesiastical body. A *modus vivendi* under these circumstances must have been rather difficult, and Byrd can only have remained secure from more serious consequences by the protection of powerful friends. To this he evidently alludes in the dedication to the Earl of Northampton of the first book of his *Gradualia*, in which he says, 'Te habui . . . in afflictis familiae meae rebus benignissimum patronum.'

Besides the litigation over the lease of Stondon Place, Byrd was involved in a long dispute as to a right-of-way over part of the property, in which his opponent was the Rector, the Rev. John Nobbs. Details of this dispute will be found in the Rev. E. H. L. Reeve's *Stondon Massey* (1914), and it must suffice here to chronicle that it ended in 1604 in favour of Byrd. From 1588–1603 Byrd seems to have published nothing, nor did he contribute to the 'Triumphs of Oriana,' which appeared in the latter year. This long silence may possibly be accounted for by his being so much occupied by his affairs at Stondon and also by the fact that the position of Catholics after 1588 became more and more difficult, and that at this time he was probably occupied with the *Gradualia*, which was essentially a Catholic collection. His silence was broken in 1603, for Morley in his *Introduction* (ed. 1597, p. 115) mentions how Byrd, 'never without reverence to be named of the musicians,' and Alfonso Ferabosco the elder, had a friendly contention, each setting a plain-song forty different ways. This work was published on Oct. 15, 1603, by East, under the following title :

'Medulla Musicke. Sucked out of the sappe of Two [of] the most famous Musitians that euer were in this land, namely Master William Byrd . . . and Master Alfonso Ferabosco . . . either of whom having made 40tie severall waies (without contention), shewing most rare and intricate skill in 2 partes in one vpon the playne songe "Miserere." The which at the request of a friend is most plainly sett in severall distinct partes to be sunge (with moore ease and vnderstanding of the lesse skilfull), by Master Thomas Robinson, etc.'

Unfortunately no copy of this work is known to be extant, and the date of its publication is only known by the entry in the Stationers' Registers. In 1605 appeared the first and in 1607 the second book of *Gradualia*, a complete collection of Latin motets for the ecclesiastical year, including (in the first book) a setting for three voices of the words allotted to the crowd in the Passion according to St. John, a modern edition of which was published by Messrs. Novello in 1899. The first book is dedicated to the Earl of Northampton; the second to Lord Petre. A second edition of both books appeared in 1610. In 1611 was issued

'Psalmes, Songs, and Sonnets: some solemne, others joyfull, framed to the life of the Words: Fit for Voyces or Viols, etc.'

This was dedicated to the Earl of Cumberland, and contains a quaint address 'to all true louers of Musicke,' in which, after commending 'these my last labours,' he proceeds :

'Onely this I desire; that you will be but as carefull to heare them well expressed, as I haue beene both in the Composing and correcting of them. Otherwise the best Song that euer was made will seeme harsh and vnpleasant, for that the well expressing of them, either by Voyces, or Instruments, is the life of our labours, which is seldome or neuer well performed at the first singing or playing. Besides a song that is well and artificially made cannot be well perceiued nor vnderstood at the first hearing, but the oftner you shall heare it, the better cause of liking you will discouer: and commonly that Song is best esteemed with which our eares are best acquainted.'

The work forms vol. xvi. of Fellowes's *English Madrigal School*. Probably in the same year appeared 'Parthenia,' a collection of Virginal music, in which Byrd collaborated with Bull and Orlando Gibbons. In 1614 he contributed four anthems to Sir William Leighton's 'Teares or Lamentacions of a Sorrowfull Soule.' These were his last published compositions. He died, probably at Stondon, on July 4, 1623, his death being recorded in the Chapel Royal Cheque-Book as that of a 'Father of Musicke,' a title which refers both to his great age and to the veneration with which he was regarded by his contemporaries.

His will (Somerset House, Swan, 106) dated Nov. 15, 1622, has been printed in full in *The Musician* for June 2, 1897, and in Fellowes's *William Byrd* (Oxford, 1923). It begins as follows :

'In the name of the moste glorious and undevided Trinitie ffather Sonne Holy Ghoste three distincte persons and Eternall God. Amen. I William Byrde of Stondon Place in the parish of Stondon in the countye of Essex gentleman doe nowe in the eightieth yeare of myne age but (throughe the goodnes of God) beinge of good healthe and perfect memorie make and ordaine this for my last will and Testament ffirste I give and bequeathe my Soule to God Almightye my Creator and Redemr· and Preserver.

And that I may live and dye a true and perfect member of his holy Catholicke Churche (withoute which I beleeve there is noe salvacon for me) my body to be honestlye buryed in that parish and place where it shall please God to take me oute of this live which I humbly desyre (yf soe it shall please God) maye be in the pishe of Stondon where my dwellinge is. And then to be buried neare unto the place where my Wief lyest buryed or ells where as God and the tyme shall permytte and suffer.'

From the same document it seems that Byrd's later years had been embittered by a quarrel about the disposal of the Stondon property, in the settlement of which he had 'bynn letted and hindred'—'by the undutifull obstinacie of one whom I am unwillinge to name.' There can be but little doubt that this was the composer's eldest son, Christopher, who is passed over in the will, though his wife Catherine and her son Thomas are appointed executors. In pursuance of an agreement with this daughter-in-law (whom he calls 'a verye good ffrend to hus both') the property was left to her, subject to certain rent charges and to charges of £20 yearly for his second son Thomas, and £10 to his daughter Rachel, with remainders to his grandson Thomas, his son Thomas, and the sons of his daughters Mary and Rachel. His goods 'in my lodgeinge in the Earle of Woster's house in the Strand' are left to his second son, and an annuity to his eldest daughter. The Stondon property came again before the Court of Chancery in 1635, on Oct. 10, in which year an order was made that Catherine Byrd should pay the annuities due to Thomas and Rachel, none of which had been paid since Byrd's death in 1623. From about 1637 to 1650 Stondon Place was occupied by one John Leigh, who was probably a tenant of the Byrd family, for in 1651 the Committee for Compounding with Delinquents was approached on behalf of Thomas Byrd, who was entitled to £20 annuity on the property, of which one of the Petre family (whose goods had been seized for recusancy) was then tenant. It was then pleaded on behalf of Thomas Byrd that he 'is seventy-five years old and has no other means of subsistence.' Soon afterwards the property was sold to Prosper Nicholas. Stondon Place itself was practically burnt down in 1877, and has since been rebuilt. There is no record of the burial of any of the Byrd family in the parish church.

Byrd's arms, as entered in the Visitation of Essex of 1634 *ex sigillo*, were three stags' heads cabossed, a canton ermine. His children were (1) Christopher, who married Catherine, daughter of Thomas Moore of Bamborough, and had a son, Thomas, who was living at Stondon in 1634; (2) Thomas, a musician, who acted as deputy to John Bull at Gresham College, he was living in 1651; (3) Elizabeth who married (i.) John Jackson, and (ii.) —— Burdett; (4) Rachel, married (i.) —— Hook, by whom she had two children, William, and Catherine married to Michael Walton; between 1623 and 1634 Rachel Hook married (ii.) Edward Biggs; (5) Mary, married (i.) Henry Hawksworth, by whom she had four sons, William, Henry, George, and John: (ii.) Thomas Falconbridge. Anne Byrd, who is mentioned in the Exchequer proceedings, Shelley *v.* Byrd, was probably a fourth daughter who died young. It should be mentioned that the statement frequently made to the effect that Byrd and his family lived 'at the end of the 16th century' in the parish of St. Helen's, Bishopsgate, is inaccurate. The Byrds who lived there belonged to another family, and were probably not even relatives of the composer. No authentic portrait of Byrd is known to exist. An oval (head and shoulders) was engraved by Vandergucht—on the same plate as a similar portrait of Tallis—for a projected *History of Music* by N. Haym which never appeared. The authority for this plate is unknown, and impressions are of extreme rarity.

In addition to the works already mentioned, Byrd wrote three masses for 3, 4 and 5 voices respectively. It used to be assumed that these masses were written during the reign of Queen Mary, but the fact that the composer throughout his life continued to compose music for the Latin Ritual, renders the assumption extremely improbable, especially since all three masses display no traces of immaturity, but rather belong to the composer's best works. They were printed without title-pages, the type being that which East used when he began to print music as Byrd's assignee in 1588, while the initials are the same as those in Yonge's *Musica Transalpina* (1588), but from the fact that the few copies known have generally been found interleaved in the 1610 edition of the *Gradualia* it is possible that they may have first appeared in that year. The Mass for 5 voices was reprinted in 1841 by Dr. Rimbault for the Musical Antiquarian Society; the title-page contains the unfounded tatement that it was 'composed between the years 1553 and 1558 for the old cathedral of St. Paul's.' Another edition was published in 1899 by Messrs. Breitkopf & Härtel. Modern editions of the other masses have also appeared, that for 4 voices, published by Novello in 1890, and that for 3 voices by Messrs. R. & T. Washbourne in 1901, and all three have recently been edited for Stainer & Bell by Fellowes.

The 'Fitzwilliam Virginal Book' contains a long series of interesting pieces by Byrd for the virginal; 'Lady Nevill's Virginal Book' (published 1926, see VIRGINAL MUSIC), contains 42 numbers, all by Byrd, and other contemporary collections remain unpublished.

In mere volume the music of Byrd which has survived far exceeds that of any English composer of his period, and can only be compared to that of Lasso among his contemporaries abroad. But the ground he covered was far wider than that of the Netherlandish master,

for there was hardly any branch of composition which he did not essay. His printed output represents a very small part of his work, and his services, etc., for the English rites, and instrumental fantasias, preludes, and In Nomines for various combinations of viols have been practically unknown until the present day. The recent revival of interest in the music of the Tudor and Jacobean composers may be said to have begun with the attention drawn to Byrd at the end of the last century. The first light on his biography from original sources was thrown by articles in the *Musical Review* in 1883; his masses were revived by Thomas Wingham at the Brompton Oratory in 1890 and later; four movements of the 5-part mass were performed at the Birmingham Festival in 1900, and Sir R. R. Terry — first at Downside and later at Westminster Cathedral — and H. B. Collins at the Edgbaston Oratory, have done inestimable service in making Byrd's music familiar. The way was therefore well prepared for the publications of the Carnegie Trust, which has already (1923) issued a carefully edited volume of the English Sacred Music,[1] the first of a series which it is to be hoped will include all Byrd's work. In July 1923 the awakened interest in the great musician found worthy expression in tercentenary celebrations held all over the United Kingdom, permanent records of which took the form of memorial tablets erected in Lincoln Cathedral and the parish church of Stondon Massey. In view of these celebrations Fellowes published *William Byrd: a Short Account of his Life and Work*, which contains the first attempt at a complete list of his surviving compositions. From this work the following estimate of his position may be quoted:

'If we consider Byrd's versatility alone, and the fact that he produced work of the highest class in every field that he explored, it becomes abundantly clear that he did stand above all his contemporaries. Like Palestrina, he wrote magnificently for the Latin rites of the Church. Nor was he behind any of his contemporaries in his capacity for handling ingenious and complex contrapuntal devices such as were in vogue among the Church musicians of the 16th century. His contrapuntal skill was astonishing. Like Tallis, Tye, and Robert Whyte, he excelled in music for the English Church whether for the Latin or English rites. Like Marenzio, Wilbye and Weelkes, he could write finely in the madrigalian style, not only when treating the severer subjects, where again he stands alone, but also in the lighter vein. . . . Like Bull, Gibbons and Giles Farnaby, he wrote with exceptional fertility of invention for the keyed instruments of his day, yet here again he excelled the others; while for the viols he produced chamber-music which to-day amazes the students of musical form when its date is borne in mind.'

This is high praise, and may in some respects seem excessive. But it only confirms the judgment of Byrd's contemporaries, Morley and Baldwin (which have been already quoted); Peacham, who calls him 'our *Phœnix*,' and says that 'in Motets and Musicke of pietie and devotion . . . I know not whether any may equall. I am sure none excell, even by the judgement of *France* and *Italy*'; and of G. Ga. (probably the recusant George Gage connected with the Gages of Firle and Hengrave), whose epigram prefixed to the second book of *Gradualia*, is addressed to 'D. Gulielmo Byrde, Brittanicae Musicae Parenti.' W. B. S.

[1] This volume including the 'Great' service with other services and anthems showed that Byrd's contribution to English church music was far more substantial than had been supposed (see ANTHEM and SERVICE.) C.

BYZANTINE MUSIC, that is the music of the Eastern Church from primitive times to the present day, is discussed here historically and technically under the following heads: HISTORY, MODES, EXAMPLES OF THE BYZANTINE MODES, RHYTHM, NOTATIONS. A note on FOLK-SONGS is added.

HISTORY.—Byzantine music is undoubtedly of composite origin. The early Church in adopting the Psalms and Canticles from the Old Testament would naturally borrow some of the Hebrew melodies as well. But as Greek music was predominant in most parts of the Roman Empire (the Latin West having adopted Greek musical theory), we can hardly be wrong in thinking that this element entered largely into early Christian hymnody, not, of course, in the complicated style of the classical theorists and the elaborate tone-apparatus of professional players, but in the more popular and simpler forms, such as any gathering of men under the Early Empire might have understood. Singing in the primitive Church was entirely congregational and (so far as is known) unaccompanied. Beside Hebrew and Greek influences there may have been some borrowing from other Oriental sources, such as Syria and, later, Armenia. But as the Greek language and culture held sway all over the Near East, it is probable that none of the neighbouring peoples escaped the influence of Greek music. Most of the early Christian hymn-tunes must have been handed down by oral tradition, as the Greek musical notation was mainly the property of professional musicians. But a Christian hymn has been discovered in a papyrus-fragment with this notation, dating from the 3rd century A.D.[2] This isolated fragment hardly enables us to judge of the general style of composition, still less as the words are of mystical nature, recalling the hymns of Synesius, and by no means suited for public worship. With the downfall of paganism the Greek musical notation fell into disuse and was soon forgotten by all save a few antiquaries. Thus it happens that between this fragment from the 3rd century and the earliest Byzantine musical notation at the end of the 10th we have a complete lack of information.

Is there anything to fill the gap? Some of the Gnostic papyri show traces of a new system of musical notation, by which every note of the

[2] *Oxyr. Papyri*, 1786, trans. of music by Prof. H. Stuart Jones.

octave was distinguished by a Greek vowel—a method obviously far less full and expressive than the classical Greek system, but good enough for simple tunes—and evidence has been found that this form of notation had influence on Byzantine theory and may therefore have been used for a time by Christian hymnodists.[1] Secondly, in the Ecphonetic Notation, *i.e.* the recitation-marks used in the musical reading of Scripture lessons, we have the germ of the later Byzantine notations. The early Ecphonetic manuscripts date from about the 8th century[2]; but the signs are prosodic rather than musical and could not in themselves express melody.

Authorities disagree on the important question whether the Greek neumes were a Byzantine invention and grew out of the Ecphonetic system or whether they were imported from the East.[3] In the Armenian Church similar recitation-marks were in use. But we cannot decide which Church borrowed from her neighbour.

Thirdly, in the Western Church, we find the Gregorian modes frequently called by Greek names—which has led theorists to infer a general likeness between the Eastern and Western tone-systems. (See MODES, ECCLESIASTICAL.)

The earlier Byzantine neumes have not yet been satisfactorily deciphered; and it is quite possible that they gave only a vague indication of the melody, being more an aid to memory than a complete representation of the tune. But in the 12th or 13th century the Round notation was invented, by which all melodic progressions are clearly shown. Apart from some minor difficulties, this system can be read. The famous precentor, John Cucuzeles[4] (A.D. 1300), is the reputed inventor of a more elaborate system, using the interval-signs in the same way as in the Round notation, but adding numerous subsidiary marks. The great difference seems to have been in the rhythm. In the Round system the unit of time (usually given as a quaver) cannot be subdivided. But in the Cucuzelian system we find dotted quavers and semiquavers introduced. It seems clear that the Office Books containing the Round notation were not rendered obsolete by Cucuzeles, but were used all through the Middle Ages, while his innovations were applied chiefly to new compositions. From the 16th century, however, a decline in Byzantine music seems to have set in. The manuscripts become obscure and crowded with masses of subsidiary signs—many of these being intended as aids to singers who could no longer read the interval-signs fluently: the style of composition becomes more and more florid; and meaningless syllables are used for vocalisation. The later musical MSS. usually give very meagre selections of Byzantine hymnody. Oriental influence naturally became stronger after the Fall of Constantinople; and in the 18th century there seems to have been little difference between the music of the Turks and that of the Greeks. In 1821 a new system of notation was invented by Chrysanthus, a Greek archimandrite. His main purpose was to reduce the number of symbols in order that the music might be printed. Although Chrysanthus had studied Western music, he accepted the Oriental character of the hymnody, and added to his notation several symbols to express the chromatic and enharmonic alterations that were required. After some opposition the new method won the day and has been used by the Greek Church ever since. The diffusion of secular European music in Greece during the 19th century led to a revulsion from the Oriental character of Byzantine music and a consequent movement for its 'reform.' One party has introduced European harmonies, which are heard to this day in many of the city churches. Yet another wishes to go back to the earlier mediæval tradition, while even those singers who reject reform tend to ignore the irrational progressions of the Chrysanthine system.

MODES.—The substantial likeness between the Gregorian and the Byzantine Modes is admitted by all the principal theorists at the present time. But when attempts are made to trace the mediæval scale back to the ancient Greek modes, we find much disagreement among Byzantine writers. The fact seems to have been that the hymnody of the early Church, being, as has been said, of composite and largely of popular origin, was evolved without regard to modal characteristics, and the hymns were later fitted into the system of eight mediæval modes, while the ancient Greek names were given to the modes by theorists whose knowledge of ancient music was imperfect. Hence the ascription of a Greek name to any mode does not oblige us to identify the mediæval mode with the Greek *harmonia* whose name it bears.[5] If we start from the identity of the Byzantine first mode with the first Gregorian mode (Protus), we have the scale d, e, f, g, a, b, c', d' as the foundation of the system. The Greek handbooks tell us that the other modes follow upon the first in a regular series, the authentic modes (κύριοι) being built up in ascending order. Thus *e-e'* will be the second mode, *f-f'* the third, *g-g'* the fourth. The plagal modes (πλάγιοι) were ranged theoretically a fifth below the corresponding authentic. But

[1] This significant discovery is due to C. Hoëg (*v.* Bibliography). He notes that in the magical treatise of Zosimus of Panopolis (4th cent. A.D.) an obscure passage dealing with music bears a strong likeness to the Byzantine musical handbook going under the name of Hagiopolites.

[2] A few specimens may be even earlier. A remarkable MS. is described by Gastoué (*v.* Bibliography).

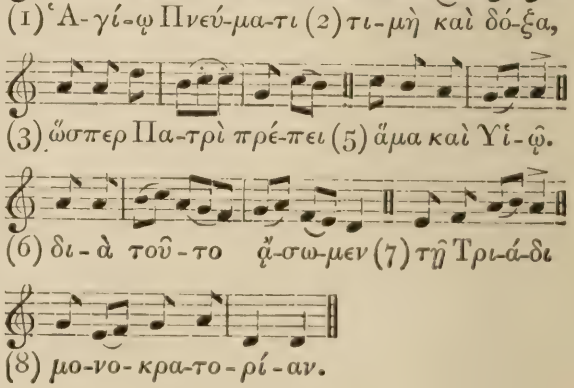
[3] Thibaut is the champion of the Byzantine theory, Wellesz of the Oriental.

[4] Κουκουζέλης.

[5] See article by Hoëg already mentioned and the table in W. Christ and M. Paranikas, *Anthologia*, p. cxx.

as this would bring some of them too low for average voices, a system of transposition was adopted, in which, by the use of *b*-flat, the plagal modes occupied the same region as the authentic. Furthermore, as the third and fourth authentic modes might also have been too high for many voices, some modification of them was frequently admitted. It must be remembered that no mode was restricted to the compass of one octave, but that the proper notes for the beginning and end of the melody were the essential characteristics. Now in the authentic modes the proper Finalis lay in the centre of the scale, *a* for mode I., *b* for mode II., and so on. But in certain cases it was more convenient to use the lowest note of the octave; and in the third and fourth authentic modes this practice was more frequent, as it avoided too many high notes. With the plagal modes, on the other hand, the first and second preferred their central notes as Finalis (*d* and *e*), while the third plagal mode could use low *b*-flat (from which came its name of Barys or Deep), but equally its middle note *f*; and the fourth plagal could use *c* or *g*. When we come to transcribe a long series of melodies in the eight modes, we are forced by practical necessity to allow such modifications of the strict mathematical scheme. Before passing to a series of examples of the Byzantine modes we must briefly mention two theories which conflict with the accepted view.

(1) Dom Ugo Gaisser proposed to take the mediæval names of the modes in the ancient Greek sense and to make by flats in the signature the alterations required in the abovementioned scheme. In this way he claims to reconcile ancient Greek music and mediæval theory with the traditional singing of the outlying Græco-Albanian and South Slavonic religious bodies, and, to some extent, with the later practice of the Greek Church. (For example, if mode I., *d*-*d′*, were given two flats, it would answer to the ancient Dorian mode taken one note lower.) The evidence, however, is hardly strong enough to overthrow the orthodox view.

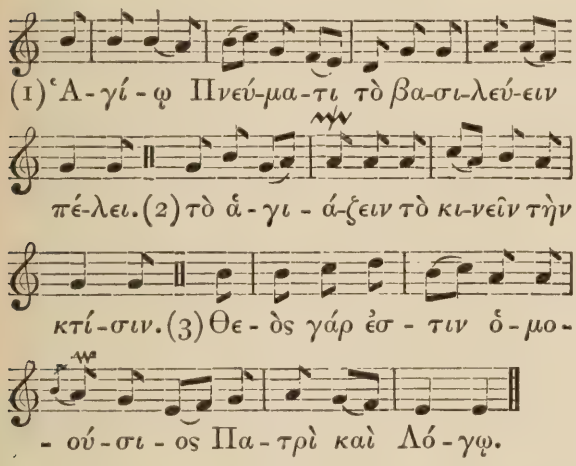


(2) Dr. Hugo Riemann, while accepting the theoretical scheme of the mediæval modes, held that in practice they were all taken at the same pitch, viz. that of the ancient Greek lyre, *e*-*e′*. We have seen that a certain amount of transposition is necessary; but in Christian times the technique of the lyre no longer dominated the musical world as it had done in ancient Athens. The needs of the voice, not of an instrument, were what composers had to consider. Secondly, there is no hint in any Byzantine handbook that all the modes were performed at exactly the same pitch; on the contrary, the idea of a passage from mode to mode by regular steps is frequently insisted on. Thirdly, Riemann's scheme does not altogether get rid of the difficulty of compass: some of his specimens are uncomfortably high.

What has been said above does not complete our survey of the Byzantine modes. In some instances we find that neither the regular Finalis nor the lowest note of the octave is the point of departure, but some other note, determined by a special form of signature. The Mesos[1], or Mediant, was available for this purpose in the second and third authentic modes and probably in others. As the signatures or Martyriae, which indicated the starting-note of every hymn, were of conventional form, their interpretation is often difficult; and further research will be needed before we can give a full list of possible starting-notes.

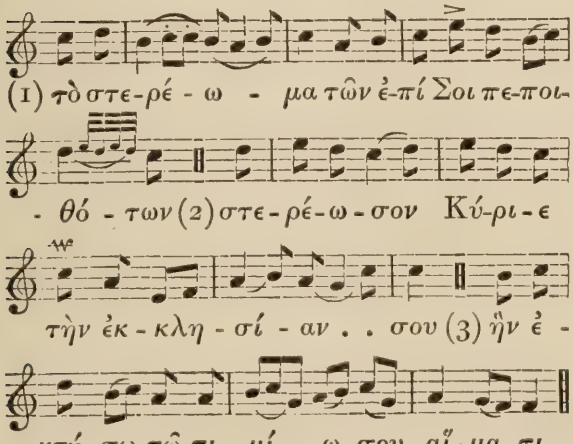
The chromatic species, which is very common in modern Greek music, can be traced in mediæval MSS., although our information about it is incomplete. It had a special symbol or Phthora and was called Nenano. In earlier Byzantine hymns this species was only used for short episodes; but in MSS. of the Cucuzelian notation we find whole melodies written in it. The interval of an augmented tone is often found in Oriental music. But it is quite possible that the Nenano is a survival in a modified form of the ancient Greek chromatic genus. Besides a signature or Martyria (*μαρτυρία*) every mode has a Phthora or Modulant (*φθορά*). These modulants rarely occur and their nature is disputed. Probably they were intended to mark transitions from one mode to another (as they do in the Chrysanthine system), or sometimes were a warning not to modulate, when the normal compass of any mode had been passed. (Another view is that they were by-forms of the modes, known only to theorists. If this were true, the name 'Modulant' for Phthora, derived from *φθείρειν*, 'to destroy,' would have to be given up.)

Examples of the Byzantine Modes



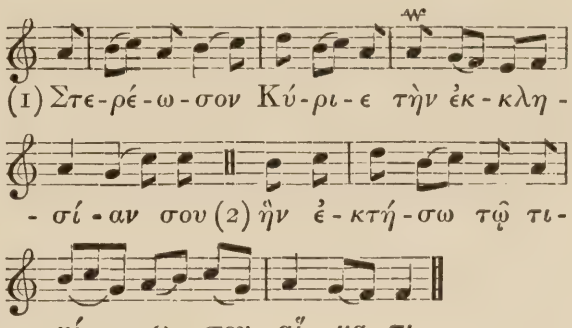
(*a*) *Authentic.*—Mode I. Finalis *a*.—Cadences may be made on *a* or *d*. A few hymns begin from

[1] Μέσος or μέση.



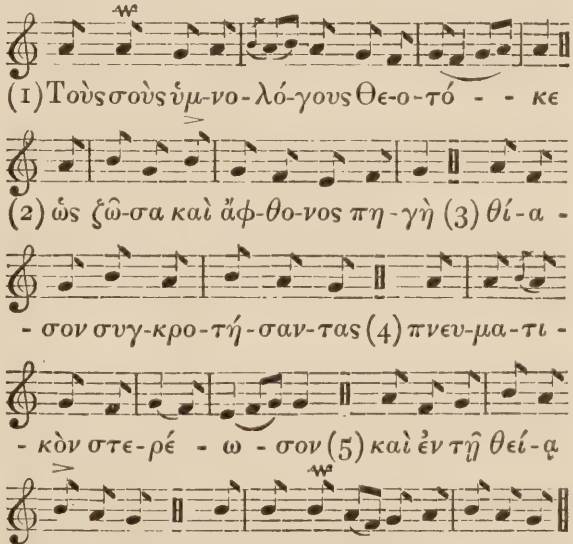
d and end on *a*. In later MSS. of the Cucuzelian system this mode can begin and end on *d*, as it does in the modern system. Our example is a versicle from the *Octoechus* in the Athos MS. Vatopedi 288 f. 367b), which probably dates from the early 14th century. All examples, where not otherwise described, are in the Round notation and are our own versions from the MS. The rhythm depends on the accents in the text and pays no regard to the ancient Greek quantities of the vowels.

Mode II. Finalis *b*.—Cadences may also be made on *e*. A by-form of this mode begins on the Mediant *g* and ends on *e*. In the Round notation of the 13th-15th centuries this variety has a special signature. Example from the same MS.



Mode III. Proper Finalis *c′*.—Cadences are also made on *f*. A by-form starts from the Mediant *a* and usually ends on *f*. (The modern form of this mode has borrowed *b*-flat from the third plagal and is therefore like our scale of *f* major.)

Example: part of a Canon from the MS. *Cryptoferratensis* E. γ. II., f. 65 (Monastery of Grottaferrata near Rome), date 1281.

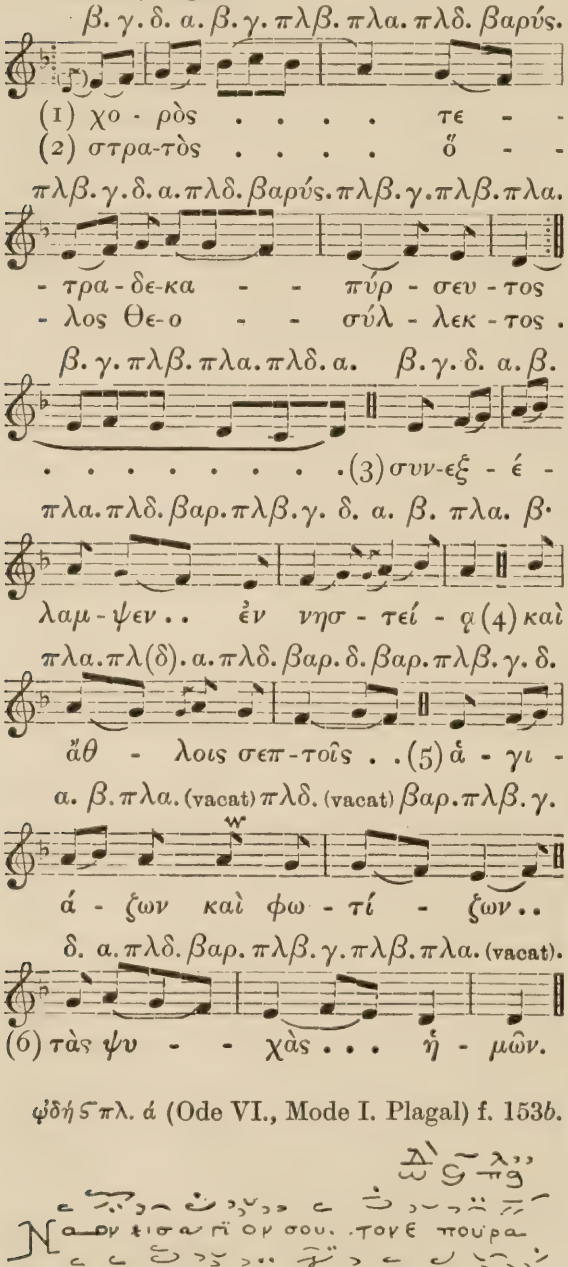


Secondary form from a *μέσος*. *Ibidem* f. 75.

Observe similar endings.

Mode IV. Proper Finalis *d′*; but as this is usually too high, we find that most hymns begin and end on *g*. Occasionally the scale of the fourth plagal mode seems to be borrowed, having *c* for Finalis. We have not so far discovered any other by-form of this mode in the earlier Round system. A later form called Legetos, having *e* for Finalis, would seem to be identical with mode II., the latter having perhaps acquired by the 17th century the chromatic nature which it still has. (At the present day both the Legetos from *e* and the normal form from *g* are in use.) Example from a Trinity College Cambridge MS. (1165, 0.2.61), part of a Canon (date probably 15th century; Round notation).

From *g*.



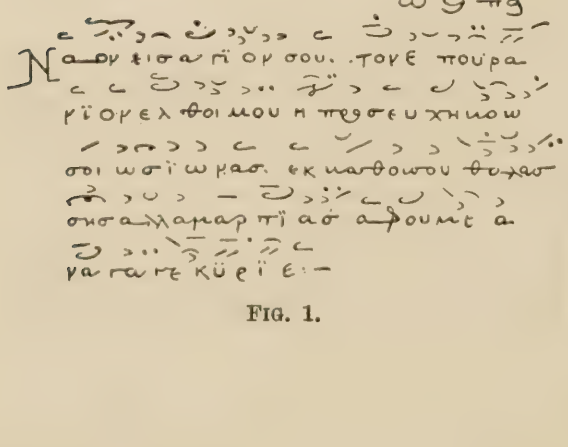
The 'starting-note' or note of origin would of course be intoned at the beginning of the hymn, but it need not be the first note of the tune, if, as here, the first interval-sign should not be that of equality, but of some other progression.

(*b*) *Plagal.*—Mode I. plagal, Finalis *d*. The melody may also begin from *a*. A by-form beginning from *g* is suspected, but not yet established. (At the present day there is very little

difference between this mode and the first authentic.) Our first example is an exercise on the Martyriae or signatures of the modes. The tune is in the first plagal mode, but every note bears the signature of the mode whose Finalis it is. Our second example is from the Grottaferrata Codex already mentioned.

Exercise on the Martyriae; from MS. in Monastery Ἅγιοι Τεσσαράκοντα, near Sparta.

φδή 5 πλ. ά (Ode VI., Mode I. Plagal) f. 153*b*.



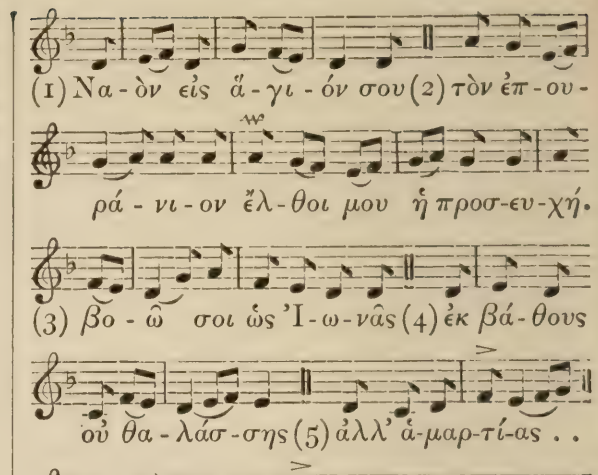


Fig. 1.

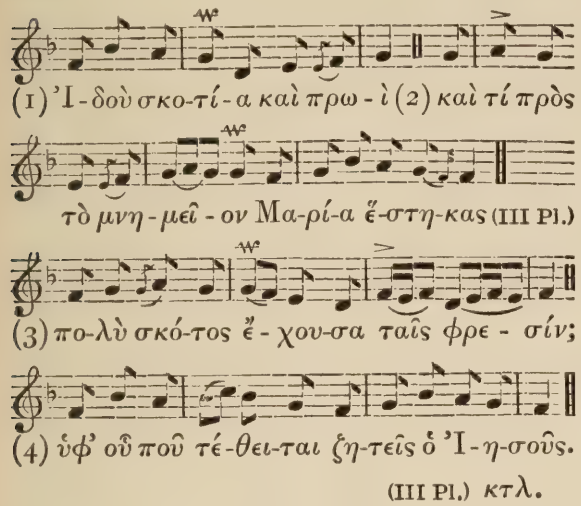
Mode II. plagal, Finalis *e*.—There is at least one by-form, but its nature has not yet been fully explored: we will therefore content ourselves with an example of the normal type from the Vatopedi MS. already mentioned. The words are borrowed from Ps. 124.

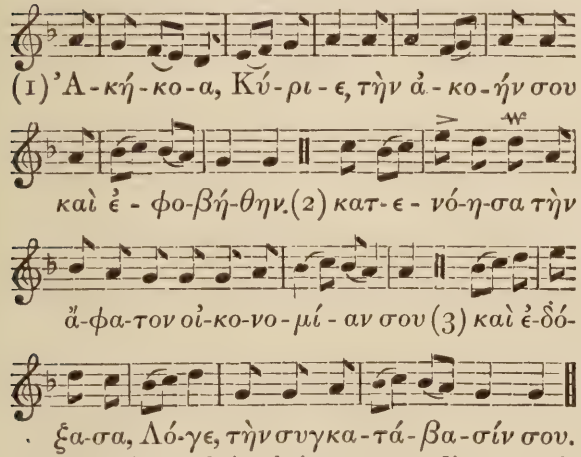


(Modern theory has two distinct forms of this mode, the commonest being chromatic, which will be exemplified below, and the other answering to the mediæval form.)

Vatopedi 288 f. 372.

Mode III. plagal (Barys), Finalis usually *f*.—B-flat, the theoretical Finalis, is sometimes used; and from this comes the name of Grave, as it was the lowest Finalis in use. This mode also had by-forms of doubtful nature. Our example is from the Morning Resurrection Hymns of the Emperor Leo (886–911) in the Cucuzelian system. (At the present day there are two forms of this mode, one from *f*, like the mediæval type, and the other from *b*-natural.

Theorists, however, disagree as to the scale here used in the Chrysanthine system.)

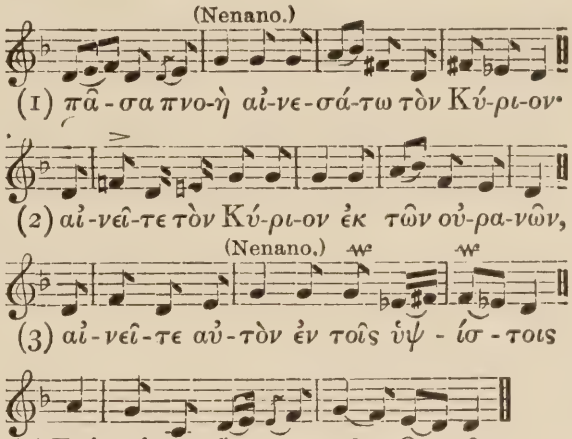


Medial signatures (*μαρτυρίαι*) occur at the end of lines 2 and 4. These are often found in MSS. (especially after the 14th century), and were meant to help the singer by indicating what note had been reached in the chain of interval-signs forming the melody.

Mode IV. plagal, Proper Finalis *c*; but *g* seems to be quite as frequent, while there were several by-forms of obscure nature. (In the modern system *c* is the Finalis; but theorists do not agree as to the use of *b*-flat or *b*-natural.)

We give a simple example from the Grotta-ferrata MS. already mentioned.

Cod. Cryptoferr. E. γ. II., f. 264*b*, Finalis *g*.



The first interval-sign being an ascending second, we must begin one note above the Finalis.

Chromatic Species.—If a modulation was made from the first mode or the first plagal mode into the chromatic species, the scale seems to have been *d*, *e*-flat, *f*-sharp, *g*, *a*, *b*-flat, *c′*, *d′*; but if from the second mode, authentic or plagal, then it began on *e* and used the same intervals. In the Cucuzelian system the chromatic mode becomes a by-form of mode II. plagal, and therefore has the scale *e*, *f*, *g*, *a*-flat, *b*, *c′*, *d′*, *e′*. One example is from the Resurrection Hymns of Leo, already mentioned. (See Fig. 2, second hymn.)

Another example is from a Cambridge MS.

Mode I. plagal (mixed chromatic form). Cantab. Biblioth. Acad. Cod. Ad. 3051, f. 1 (Cucuzelian system). Part of Antiphone = Ps. 150.

Rhythm.—Most authorities agree that the rhythm of Byzantine music was free; that is, it was not divided into bars or measures of fixed length. The unit of metre was the colon or versicle shown in the manuscripts by a dot in the text. For this we put a small double bar in our versions. Our numbering of the lines is purely a matter of convenience and follows the printed books wherever possible. These versicles do not as a rule contain a fixed number of syllables, as the hymns were not composed in metre, but nearly always in rhythmical prose, like the psalms and canticles. A certain correspondence between versicles is often seen and may be accompanied by musical imitation; but this was an artistic device and not a necessary element in the composition. Where a note is prolonged by certain subsidiary signs, called in Greek *ἀργίαι* or slow-marks, we put a crotchet; and the last note of a hymn, being naturally held, is also made into a crotchet. Subdivision of the unit of beat, in the Cucuzelian system, is marked by the *γοργόν* or quick-sign. The hymns were meant as a rule to be sung by a single cantor, who could allow himself much more freedom of time than could be permitted in combined singing. It is not unlikely that in the Middle Ages, as now, some members of the choir held a drone, while others may have joined in certain passages. But we cannot treat Byzantine music as properly choral. The single bars in our versions are put in by us to help the singer: they depend on the accents in the Greek text, but do not necessarily answer to any musical sign. (Dr. Wellesz and some other theorists do not use them; but their transcriptions sound like ours.) Dr. Riemann has tried to prove that all Byzantine music was in strict

4-time. But to do this he has to lengthen or shorten notes without any warrant from the manuscripts. Nor do the mediæval theorists give the slightest hint of a measured time. O. Fleischer also believed in a prevalence of 4-time rhythm in the Cucuzelian system. But these authorities do not seem to have proved their case, and recent writers (such as Dr. Wellesz) have decided against them.

NOTATIONS. (1) *Ecphonetic.*—This was a system of recitation-marks, chiefly applied to lessons from the Gospels, but also to other parts of the Bible. A table of the signs with their names has been found in a MS. fragment in the monastery of Leimon on the island of Lesbos ; and this is the basis of our knowledge. Many of the signs are accents or prosodic marks, such as the acute, grave and circumflex. Others seem to denote pauses, while a third class, which reappear later as neumes, may have indicated the rise or fall of the singing voice. At the present day the lessons in the Greek Church are intoned in a semi-musical fashion.[1] Many Ecphonetic manuscripts are extant, ranging from the 8th to the 12th century ; by the 14th century the signs had become obsolete.[2]

(2) *The Earlier Neumes or Linear Systems.*—These are very difficult to classify owing to the variety of forms and the peculiarities of individual MSS. We may provisionally range them as follows :

(*a*) Archaic or Palæobyzantine.—The best-known example is the Athos codex, Laura B. 32, dating from about A.D. 1000. The neumes are few and mostly simple. There is no Ison or repetition-sign. But a blank space is left over a syllable when the preceding note has to be repeated.[3]

(*b*) Intermediate.—Here we find a straight bar for the Ison. Otherwise there are many differences between the notations. It seems likely that uniformity had not been established and that rival systems were in the field. The most elaborate is exemplified by the famous fragment now at Chartres,[4] which belongs to the Athos MS., Laura Γ, 67. These systems flourished in the 11th century.

(*c*) The Coislin Neumes.—This name is suggested after the MS. at Paris, Coislin 220, a splendid sample of this type of neumes.[5] We now find the Ison with a hook, as it appears in the Round notation; and many other signs bear a likeness to later forms. It seems possible by the aid of parallel versions to gain at least a general notion of the melodies in this system. Several of the signs do not seem to have a fixed musical value ; but a more exact interpretation will probably be found after fuller research. This notation may have been invented in the 12th century and was a rival of the Round system in the 13th. (It has also been called *Notation mixte* or *constantinopolitaine.*)

(3) *The Round Notation* (also called Hagiopolitan).—The best MSS. date from the 13th and 14th centuries. By the aid of the mediæval handbook, called the Papadike, which may be partly the work of John Cucuzeles (A.D. 1300), we can tell the values of the interval-signs and the names and (with few exceptions) the import of the various subsidiaries. The Initial-note of a melody depends on the Martyria or signa-

[1] The fullest discussion of the Ecphonetic System will be found in Thibaut, *Origine Byz.* He also gives a specimen of the modern recitation. Fleischer and Gastoué also have good accounts of the subject.

[2] There are several Ecphonetic MSS. in the British Museum and a fine specimen in the Fitzwilliam at Cambridge

[3] Some poor reproductions are given in Riemann, *op. cit.* One leaf in *B.S.A.* xix. pl. xiv.

[4] Gastoué, *op. cit.* pl. iii. Riemann has also discussed this fragment.

[5] Good facsimile in Riemann, *op. cit.* Specimens of other MSS. of this class will be found in the works of Thibaut and Gastoué. See the writer's reading of these neumes, *Journal of Hellenic Studies*, xli. 29. The likeness of these neumes to the early Russian 'Sematic' notation should be observed,

(1) Canon for Easter; Mode I., Ode III.
(2) From Eothina of Emperor Leo. Mode II., Plagal, Chromatic.

FIG. 2.—1, Round System; 2, Cucuzelian System.

ture, which, of course, varied according to the mode. The rest of the tune consists of a chain of interval-signs, which regains the Finalis at the end of the hymn. We tabulate the interval-signs and the commonest subsidiaries.[1] The Round notation soon ousted its rival; and the numerous extant MSS. show us how far-spread its use must have been. Although precise and highly expressive, it must always have been difficult to learn, far more so than the four-line Gregorian notation. (For examples see Figs. 1 and 2.)

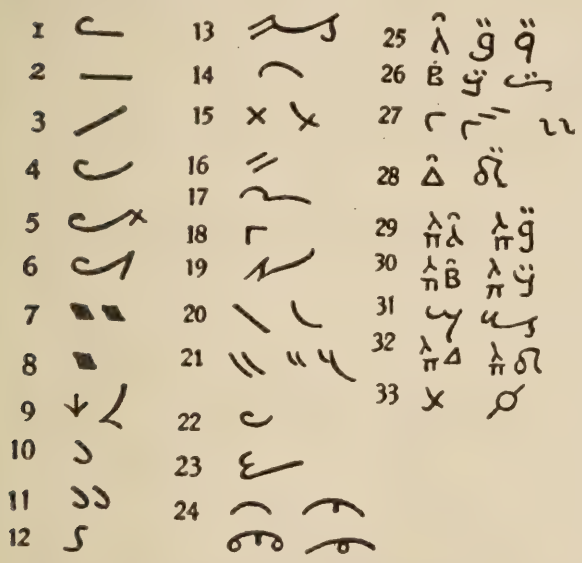


FIG. 3.—Round Notation: 1-15, interval signs; 16-24, subsidiary signs; 25-33, modal signs.

(*a*) *Interval Signs.*—1. Ison, repetition, 2. Oligon, 3. Oxeia, 4. Petaste, 5. Kouphisma, 6. Pelaston, 7. Kentemata (*δύο κεντήματα*) all denote an ascending second. The Oligon is the commonest upon unaccented notes; the Oxeia usually stands on accented syllables; Petaste gives warning of descent (Nos. 5 and 6 are very rarely used). The Kentemata (two dots) add an ascending second to some other progression, but never stand as the first sign over a syllable.

8. Kentema, ascending third.

9. Hypsele, ascending fifth. These two, being 'leaps,' are called Pneumata (spirits) in Greek, while Nos. 1 to 7 are all classed as Somata (bodies), being progressions by step. The Pneumata rarely stand alone, but when placed below a Soma or to the right of it they absorb its sound and interval-value. This is called Hypotaxis or Subordination. On the other hand, if a Pneuma is placed above a Soma, both are counted, and a single large interval results. (Two forms of the Hypsele are given. The shapes vary in the MSS.)

10. Apostrophus, descending second. 11. Double Apostrophus (*ἀπόστροφοι σύνδεσμοι*), descending second with prolongation of note. 12. Hyporrhoe, two descending seconds in succession (cannot be the first sign over a note). 13. Kratemohyporrhoon gives the same sounds as No. 12, but it prolongs the preceding note. 14. Elaphron, descending third, 15. Chamele (two shapes), descending fifth: these are Pneumata and are combined with Nos. 10 and 11 under the same rules as the ascending Pneumata with Nos. 2 to 6.

There is a further subordination by which the Ison or any descending sign can be placed above an ascending sign, whereby the latter loses its interval-value. What happened to it? Dr. Wellesz holds that it only affected the execution of the descending note (*e.g.* the Oxeia gave a stronger accent), while Dr. Riemann believed that the suppressed sign was heard as an ornament or grace-note. I have tried to combine both methods in my versions. (The subordinated Petaste, which is far the commonest, I mark by a passing shake. Earlier theorists ignored the suppressed signs, called in Greek *ἄφωνα*.)

(*b*) *Hypotases or Subsidiary Signs.*—16. Diple prolongs the note. 17. Lygisma, probably a slur. The Kylisma, Synagma and others not figured here were also probably slurs. 18. Gorgon or quick-sign. In the Round notation this is rare and may only have served as a warning against a rallentando. In the Cucuzelian system it seems to have marked the subdivision of notes as it does in the system of Chrysanthus. The latter has a double Gorgon for triplets and a threefold Gorgon for semiquavers (his unit being a crotchet). 19. Kratema prolongs the note. 20. Bareia (two forms). This symbol has a long history. In the Ecphonetic notation it may have indicated a slight fall of the voice. In the earlier neumes it is an interval-sign, probably a second or third downwards. It was usually put just before an accented syllable. In the Round notation it has no interval-value, but kept its position under some other sign and therefore served the same purpose as a modern 'bar.' In the Cucuzelian system it acquires the value of a secondary accent in florid passages. Under Chrysanthus it is mainly a mark of separation, and also serves to indicate a 'rest.' (The view of Riemann that the Bareia had interval-value in the earlier Round notation has not been justified.) 21. Piasma or Double Bareia. This sign also had interval-value in the earlier neumes. In the Round system it has no musical sound, but marks certain combinations of descending notes. 22. Klasma or Tzakisma: in the Round system this seems to be merely a staccato-mark. (Riemann, in calling it the Little Petaste or Epiphonus and giving it interval-value, is

[1] Full accounts of the Round notation will be found in the works of Gastoué and Riemann. O. Fleischer's detailed study of the Cucuzelian system can also be used, as the interval-signs have the same values. For the English reader see H. J. W. Tillyard, *Byzantine Music and Hymnography*.

It is doubtful who has the honour of being the first interpreter of the Round notation. Perhaps Thibaut, Gaisser and Fleischer reached it independently. But the published versions of Thibaut, which, though not free from error, are on right lines, seem to be the oldest. (See Gastoué's bibliography.)

certainly in error.) In the Cucuzelian system it is apparently used in conjunction with the Gorgon to mark a dotted quaver followed by a semiquaver. 23. Parakalesma (for which Enarxis may be another name) often used at the beginning of a phrase, is perhaps a mark of expression (from *παρακαλεῖν*, to entreat or exhort). 24. Apoderma or Apodoma (four forms) prolongs the note.

(*c*) *The Martyriae or Signatures.*—These appear in various forms in different MSS. We have picked out some of the most frequent. 25. Mode I., authentic. 26. Mode II. 27. Mode III. 28. Mode IV. 29. Mode I., plagal. 30. Mode II., plagal. 31. Mode III., plagal, the Barys or Grave Mode. 32. Mode IV., plagal. Most of these (as will be seen) are merely the letters of the alphabet in more or less stylised shapes used as numbers. The last symbol for mode III. is of doubtful origin. Mode III. plagal is a monogram for *βαρύς*, 'grave.' 33. The Legetos (by-form of mode IV.) and the Phthora of the nenano or chromatic species.

(4) The Cucuzelian system was really an amplification of the Round notation with a view to more elaborate rhythm. There was no sharp division between them; and many 15th century MSS. are on the border-line. A student acquainted with the Round system can read any Cucuzelian MSS. if we accept the current view that the numerous subsidiary signs did not add anything to the music, but merely helped the singer by the summary presentation of certain ornamental passages. The decline in musical art after the 16th century is fairly evident. Our examples will give a general notion of the style adopted.

(5) *The Modern or Chrysanthine Notation.*[1]—A student wishing to learn this system thoroughly should take lessons from a Greek precentor. The theory can best be studied in the admirable work of Rebours.[2] We give examples firstly, of the ordinary simple style; secondly, of the elaborate Græco-Oriental music, now out of fashion; thirdly, of some Greek folk-melodies in Byzantine Notation; and fourthly, of the harmonised music used in many churches in Athens and other big towns. Greek church music is usually printed in the Chrysanthine notation.

A measured time (usually four beats) has become more frequent in the last half century; although the free mediæval rhythm survives in many hymns. The cadence of our next hymn is often found.

I. Th. Sakellarides, Ἱερὰ Ὑμνῳδία (1902), p. 316. Doxology, Mode I. Plagal.

Χρ. Γεωργιάδης, Δοκίμιον ἐκκλ. μελῶν (1856), p. 128. ἦχος Β. χρωματικός, Χουζάμ. Largo. Mode II.

In this mode *a* is flattened about ¼ of a tone: *b*-natural is sung. The rhythmical signs are not always very clear, and authorities disagree as to their rendering. Observe that Georgiades is deliberately using a Turkish scale.

Folk-songs.—We give three examples from the *Phorminx* series, with the original notation.

[1] For the life of Chrysanthus (Χρύσανθος) see Papadopoulos, *op. cit.* p. 332. The success of his system was largely due to the Parallage or sol-fa, adapted from the West, consisting of the syllables ni, pa, vou, gha, dhi, ke, zo (=do, re, etc.). These are made up out of the first seven letters of the Greek alphabet, thus: —πΑ, Βου, Γα, Δι, κΕ, Ζω, νΗ, a consonant being added to every vowel, and *vice versa*. The learning of music was greatly aided by this device, as the interval-signs were little understood, to say nothing of the confusion of tonality due to Oriental influence. One of these syllables now forms part of the signature or Martyria in every mode.

[2] *Traité de Psaltique.* Rebours does not always agree with the rules of his master Chrysanthus; but perhaps these rules have partly become obsolete.

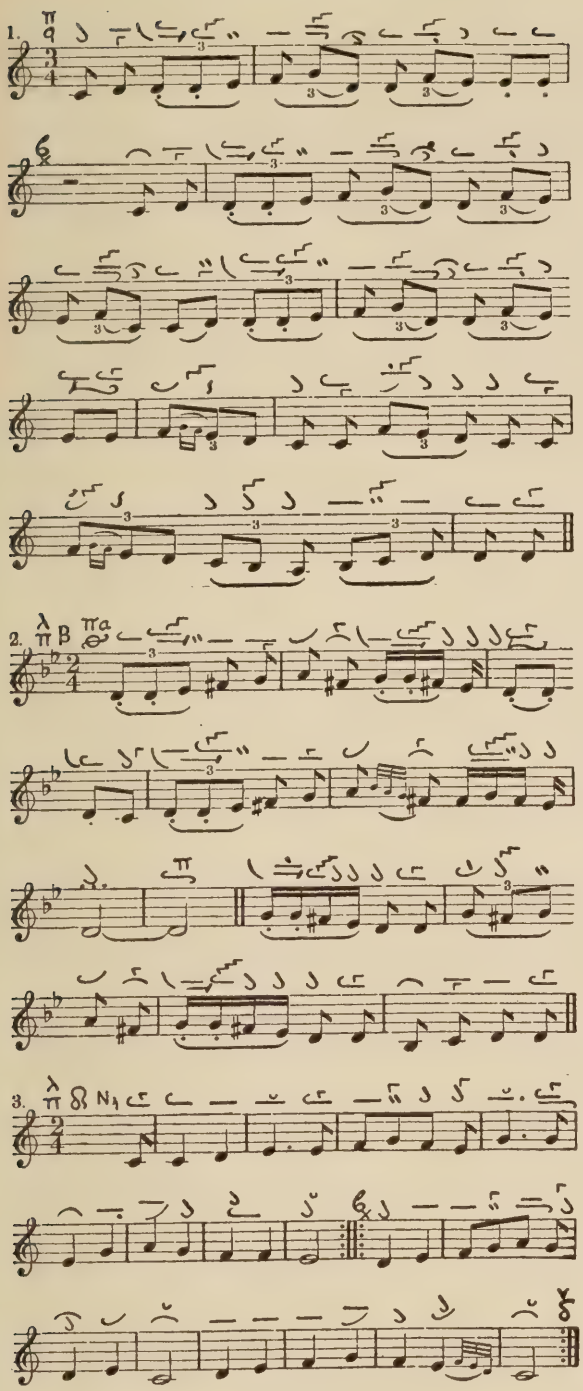

FIG. 4.

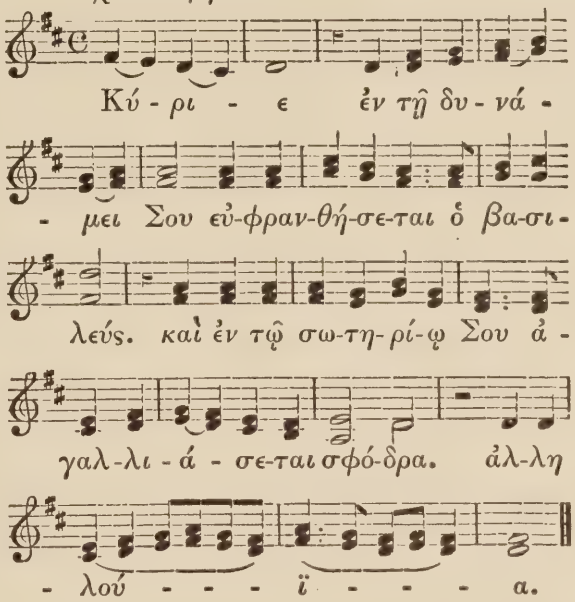
Folk-songs, like church music, have come under Oriental influence, but they do not (in most districts at any rate) use irrational intervals. The voice-part is unisonic. Interludes are sometimes played on a flute (called *Phlogera*); if there is any accompaniment, it may be in unison with the voice, or else consists of percussion or the thrumming of a few plain chords, *e.g.* on a guitar or some form of zither. Serbian and Bulgarian folk-songs have a strong likeness to Greek.

The first song is in mode I. plagal, which at the present day often takes $b\natural$, especially in ascent. The second is in mode II. plagal, chromatic form, and the third in mode IV. plagal.



A movement has arisen in Greece for collecting these songs (many of them of great beauty) and having them taught in the schools.

Greek hymns have been harmonised in two, three, or four parts. It may be assumed that the example of the Russian Church has had some influence on the style. We give a very simple example:

I. Th. Sakellarides, Ἄισματα ἐκκλ. Athens, 1892.

Τὸ παρὸν ψάλλεται ἐπὶ τῇ ἑορτῇ τοῦ βασιλέως.

Σχεδὸν ἀργῶς.

The harmonisation of ecclesiastical melodies seems to most western critics to be a mistake. It entirely destroys the modal character and the freedom of rhythm and progression. Many Greek musicians are also opposed to it; and we may hope that their efforts will lead to a truer appreciation of the traditional Byzantine music.

C

C, the name of the key-note of the 'natural' scale. It represents the same note in German, the French name being Ut or Do and the Italian Do. The further nomenclature is:

English.	French.	German.	Italian.
C flat.	Ut (Do) bémol.	Ces.	Do bemolle.
C double flat.	Ut (Do) double bémol.	Ceses.	Do doppio bemolle.
C sharp.	Ut (Do) dièze.	Cis.	Do diesis.
C double sharp.	Ut (Do) double dièze.	Cisis.	Do doppio diesis.

In the modal system C is the final of the XIIIth and XIVth modes (Ionian and Hypoionian), the dominant of Mode III. (Phrygian), Mode V. (Lydian), Mode VIII. (Hypo-mixolydian), and Mode X. (Hypo-aeolian).

The C clef either as  or  always indicated 'Middle' C, or *c'*, that note on the stave being enclosed by the two cross-lines of the clef. At one time or another this clef has been placed on every line of the stave and at present is commonly used in three different positions.

 Soprano (chiefly in Germany),  Alto, and  Tenor. See Great Stave and Clef.

The key of C was used throughout the classical period for certain transposing instruments of the orchestra, such as horns and trumpets with, of course, the employment of accidentals. Latterly, however, it is becoming more usual to give key signatures to the parts; a part for horns in F when the music is, for example, in A major being written as if in the key of E major with a signature of four sharps.

CABALETTA (Cabbaletta Cavaletta), originally Cavatinetta, from Cavatina, usually signifies the short final quick movement of an air. W. H. C.

CABANILLAS (Cavanillas), José (*d.* 1725), a Catalan organist and prolific composer for his instrument, who held an appointment at the cathedral of Urgell, in the Pyrenees, from 1670 until his death. Compositions by him exist in the Biblioteca de la Diputació at Barcelona; a toccata has been reprinted by Mitjana (*La Musique en Espagne*, p. 2091 ff.). J. B. T.

CABANILLAS, Juan (*d.* Valencia, 1713), an organist, frequently confused with the last-named. In 1665 he was appointed to the cathedral at Valencia. Pedrell prints three compositions by him in *Antología de organistas clásicos españoles*, vol. i.

A Juan Cabanilles is named as having formed part of the choir of the Colegio del Patriarca, Valencia, in 1712, and to have composed a 'Credidi' for 12 voices. J. B. T.

CABEL, (1) Marie Josephe, properly Cabu, *née* Dreulette (*b.* Liége, Jan. 31, 1827; *d.* Maisons Laffitte, May 23, 1885), a favourite light opera singer. She was taught singing by her husband, and later at the Paris Conservatoire, 1848–49; and in the latter year made her début at the Opéra-Comique, with little effect, in 'Val d'Andorre' and 'Les Mousquetaires de la reine.' After singing at Brussels for three years, with great success, and at Lyons and Strassburg, she appeared at the Lyrique, Paris, Oct. 6, 1853, as Toinon, on production of 'Le Bijou perdu' (Adam). She also appeared in new operas, viz. 'La Promise' (Clapisson), Mar. 16, 1854, and 'Jaguarita l'Indienne' (Halévy), May 14, 1855. In 1854 she came to England with the Lyrique company. She first appeared on June 7 in 'Le Bijou,' and made a great success in the 'Promise,' 'Fille du régiment' and 'Sirène.' On Feb. 23, 1856, she reappeared at the Opéra-Comique as the heroine on the production of 'Manon Lescaut' (Auber), became a great favourite there and was the original Dinorah in 1859. In 1860 she played the 'Figlia del reggimento' at Her Majesty's Theatre, July 14, and appeared in the Shadow scene from 'Dinorah,' July 28. From 1861–1863 she was again at the Lyrique, and from 1864–70 at the Opéra-Comique, where she was the original Philine (Mignon) and Hélène in 'Le Premier Jour de bonheur.' In 1871 she sang in concerts in London and in 1872 at the Opéra-Comique, London, in light French opera. She played in the French provinces until 1877, but in 1878 was struck with paralysis, from which she never wholly recovered. Her voice was not large, but sympathetic and of extraordinary flexibility, and she was a very clever actress.

A brother, (2) Edmond Antoine Auguste (*b.* Namur, Nov. 18, 1832; *d.* Brussels, 1888), was a singer at the Opéra-Comique and the Lyrique, and sang the song of Hylas in 'Les Troyens à Carthage.' See Berlioz's *Memoirs*. A. C.

CABEZÓN (Cabeçon), (1) Antonio de (*b.* Castrillo de Matajudíos, near Burgos, 1510; *d.* Madrid, Mar. 26, 1566), a celebrated blind organist and one of the earliest composers for keyed instruments. He seems to have been blind from birth. He studied, it is believed, at Palencia, with Tomás Gómez; and afterwards was appointed organista y clavicordista de cámara to the Emperor Charles V. He maintained his position under Philip II., and is said to have accompanied that monarch on his visit to England in 1554–55.

His works were published after his death by his son Hernando, who succeeded him in his post. They were entitled:

Obras de musica para tecla arpa vihuela, de Antonio de Cabeçon. musico de la camara y capilla del Rey Don Philippe nuestro Senor. Recopiladas y puestas en cifra por Hernando de Cabeçon su hijo. . . . Impressas en Madrid . . . Francisco Sanchez, año de M.D.LXXVII.

Though the greater part of the work consists of liturgical pieces, it includes some admirable variations on well-known tunes of the day, such as 'El Caballero,' the words of which afterwards suggested to Lope de Vega the play of 'El Caballero de Olmedo.' The instrumental style of Cabezón is surprisingly advanced, and in technique and expression his work recalls that of the best of the virginalists. The book, which is to be found in the Brit. Mus., Berlin, Brussels, Madrid, Wolfenbüttel, and in the collection of Sir Percy Wyndham, has been republished in its entirety by Pedrell in *Hispaniæ schola musica sacra.* A short work by Antonio de Cabezón (for 5 v.) is to be found in the MS. 'Tonos Castellanos' (fol. 107) in the Medinaceli Library at Madrid.

(2) Hernando (*d.* Valladolid, 1602), son of the preceding, and his successor in the post of musico de camara y capilla of the King of Spain. An Ave Maris Stella and four other compositions by him are included in his father's works, which he edited. The method of tablature employed is that in which a line is used for each part. Thus a composition in 4 parts is written on what is apparently a 'stave' of 4 lines; a 5-part work on 5 lines, etc. The notes are represented by figures. Thus F is represented by 1, G by 2, F′ by 1′, F² by 1'; the bass notes from F to *e*, by figures with a short line joined to them. Sharps and flats follow the figure they affect instead of preceding it.

(3) Juan, younger brother of Antonio, represented in his brother's collection by a 'Glosado' of considerable merit. J. B. T.

CABO, Francisco (*b.* Náguera, Valencia, 1768; *d.* there, Dec. 21, 1832), a Spanish church-musician, who, after being organist at the parish church of Santa Catarina at Valencia, and the cathedral at Orihuela, in 1810 was appointed cantor in the cathedral choir at Valencia. In 1816 he became senior organist there, and in 1830 succeeded Andreví as maestro de capilla. Cabo was among the best composers of the Valencian school, and a worthy follower of Comes. His compositions, whether for unaccompanied voices, or for voices and organ or orchestra, exhibit an unusual degree of elegance and spontaneity. A list is given by Alcahalí, *Diccionario biográfico de músicos valencianos* (Valencia, 1903). J. B. T.

CACCINI, (1) Giulio, a native of Rome, known also as Giulio Romano (*b.* according to the preface of his own 'Nuove Musiche,' 1558 or 1560; *d. circa* 1615[1]). He learned to sing and play the lute from Scipione della Palla, and in 1578 removed to Florence, where he was in the service of the Grand Duke of Tuscany for many years.

[1] Vogel, *Vierteljahrsschr.* v. 533.

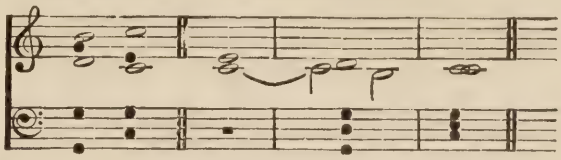
In 1605 he visited Paris with his daughter Francesca (see below). Great as a singer, he was still greater as a reformer in music. Though neither harmonist nor contrapuntist, it was he who, following the lead of V. Galilei, gave increased importance to music for a single voice. (See Song.) The recitatives which he composed and sang to the accompaniment of the theorbo, amid the enthusiastic applause of the musical assemblies meeting at the houses of Bardi and Corsi in Florence, were a novelty of immense significance. From such small beginnings he proceeded to detached scenes written by Bardi, and thence to higher flights. The pastoral drama of 'Dafne,' written by Rinuccini, was set to music by Peri in 1594, and it appears (*Riemann*) that Caccini succeeded in getting certain numbers of his own composition included when it was performed at Florence in 1600. His daughter sang the part of Euridice (see Parry, *Oxf. Hist. Mus.* iii.). He composed Rinuccini's poem again himself, and his setting was printed at the end of the year 1600. A second edition followed in 1615. It is reprinted by Eitner in 'Die Oper.' Other compositions of Caccini were the 'Combattimento d' Apolline col serpente' and 'Il ratto di Cefale' (with Peri). His 'Nuove musiche,' a collection of madrigals and canzone for a single voice with thorough-bass accompaniment, was published at Venice in 1602. Later editions appeared in 1607 and 1615. This has always been regarded as an epoch-making work, the announcement to the world, though not the origin, of the new style of music known as monody. (See Ornaments, Vocal.) Caccini's first wife composed an opera, and his daughter (2) Francesca (*b.* Florence, 1581)was celebrated both as a singer and composer. Her principal works included a book of sacred and secular cantatas (1 and 2 v.) (1618), an opera 'La liberazione di Ruggiero (1625), and the ballets 'Il ballo delle Zigane' (1614) and 'Rinaldo innamorato' (*Riemann*). See *Q.-L.*; Parry's *Music of the 17th Century* (*Oxf. Hist. Mus.*, vol. iii.), pp. 35, 41, etc. and *Rivista musicale*, iii. 714.

CACHUCHA (Spanish), an Andalusian dance, introduced to the theatre by Fanny Elssler in the ballet of 'Le Diable boiteux' (1836), the music of which is in 3-4 time, and closely resembles the Bolero. The dance-tune was originally sung with a guitar accompaniment. E. P.

CADÉAC, Pierre, master of the choristers at Auch, Gascoign, about the middle of the 16th century, church-composer of great merit in his day; composed masses and motets for the most part published in the following collections:

'Quintus liber Motettorum' (Lyons, 1543); Gardano's 'XII Missae' (Venice, 1554); and 'Missarum musicalium' (Paris, 1556). A four-part Mass was published in Paris in 1556, and three others in 1558. M. C. C.

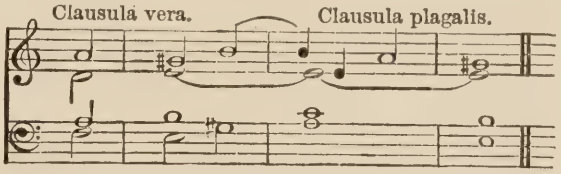
CADENCE. (I.) In mediæval music what is



now called a Cadence or Close [1] was known as *Clausula.*

(1) The most important Close employed in polyphonic music is the *Clausula vera*, or true cadence, terminating on the final of the mode. The *Clausula plagalis*, or plagal cadence, is rarely used, except as an adjunct to this, following it, at the conclusion of a movement, in the form of a peroration. A close, identical in construction with a true cadence, but terminating upon some note other than the final of the mode, is called a *Clausula ficta, subsidiaria*, or *media*; *i.e.* a false, subsidiary or medial cadence. A *Clausula vera*, or *ficta*, when accompanied, in the counterpoint, by a suspended discord, is called a *Clausula diminuta*, or diminished cadence.

Though the *Clausula vera* is the natural homologue of the perfect cadence of later music, and may, in certain cases, correspond with it, note for note, it is not constructed upon the same principles—for the older progression belongs to what has been aptly called the 'horizontal system,' and the later one, to the 'perpendicular, or vertical system.' [2] In the *Clausula vera*, the *Canto fermo* must necessarily descend one degree upon the final of the mode; the counterpoint, if above the *Canto fermo*, exhibiting a major sixth, in the penultimate note; if below it, a minor third. In the *Clausula diminuta*, the sixth is suspended by a seventh, or the third by a second. In either case, the cadence is complete, though any number of parts may be added above, below, or between its two essential factors. The constitution of the perfect cadence is altogether different. It depends for its existence upon the progression of the bass from the dominant to the tonic (see below); each of these notes being accompanied by its own fundamental harmony, either with, or without, the exhibition of the dominant seventh in the penultimate chord. But, by the addition of a sufficient number of free parts, the two cadences may be made to correspond exactly, in outward form, through the joint operation of two dissimilar principles; as in the following example, in which a *Clausula vera*, represented by the semibreves, is brought, by the insertion of a fifth below the penultimate note of the *Canto fermo*, into a form identical with that of the perfect cadence.

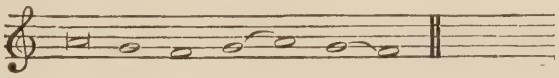


A close, formed exactly like the following, but terminating upon the mediant of the mode, is called a *Clausula media.* In like manner, a *Clausula ficta*, or *subsidiaria*, may terminate upon the dominant, or participant of the mode, or upon either of its conceded modulations.[3]

Clausula vera. Clausula diminuta.

The form of *Clausula plagalis* most frequently employed by the polyphonists was that in which, after a *Clausula vera*, the last note of the *Canto fermo* was prolonged, and treated as an inverted pedal-point. It is used with peculiarly happy effect in mode IV.—the plagal derivative of the phrygian—in which the impression of a final close is not very strongly produced by the *Clausula vera.*

Clausula vera. Clausula plagalis.



The dominant of this mode is the fourth degree above its final, corresponding with the modern subdominant. And, as this forms so important an element in the treatment of the inverted pedal, later composers apply the term plagal to all cadences in which the subdominant precedes the tonic bass. The term serves its purpose well enough; but it rests upon an erroneous basis.

In all the *Clausulae* hitherto described, the two essential parts form together, in the final note, either an octave, or unison. There is yet another class in which the parts form a fifth.

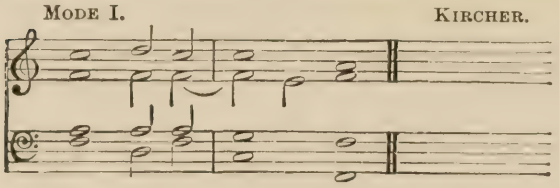
Morley [4] seems inclined to class these among the true closes; but most early writers regard them as *Clausulae fictae, vel irregulares.*

(2) Medial Cadence (*Clausula in medio modi*). In plain chant melodies, the medial cadence sometimes leads to a close so satisfactory that it almost sounds final; as in the first ending of the first tone—

In polyphonic music, it is susceptible of infinite variety of treatment, as may be seen from the following examples.

In the selection of these examples, we have confined ourselves exclusively to true cadences, for the sake of illustrating the subject with the greater clearness: but the old masters constantly employed cadences of other kinds, in this part of the mode, for the purpose of

[1] It is necessary to be very cautious in the use of these two English words, which, in the 16th century, were not interchangeable. Morley, for instance, at pp. 73 and 127 of his *Plaine and Easie Introduction* (2nd edit., 1608) applies the term 'Close' to the descent of the *Canto fermo* upon the Final of the Mode; and 'Cadence' to the dissonance with which this progression is accompanied, in the Counterpoint, when the form employed is that known as the *Clausula diminuta.* In cases like this, it is only by reference to the Latin terms that all danger of misconception can be avoided.



[2] See Modes.

avoiding the monotony consequent upon the too frequent repetition of similar forms.

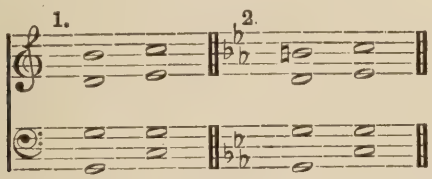
(3) MEDIAL AND RADICAL CADENCE. Besides its use as described above, the term *medial* has been applied to closes in which the leading chord is represented by an inverted instead of a fundamental harmony.

(1 and 2 are inversions derived from *Authentic*, 3 and 4 from *Imperfect*, 5 and 6 from *Plagal* cadences.) (See below.)

Though cadences of this kind are in constant use, they are not now given their old name. Most writers have preferred to describe them as *inverted* cadences, specifying, when necessary, their precise derivation. The opposite term, *radical cadence*, was reserved for closes in which the root of each chord appears in the bass.



W. S. R.

(II.) The decline of modal polyphony, and the gradual evolution of harmonic or homophonic values based on the classical major and minor scales, led to a new orientation of technical devices that had been given precise definition in the older systems. In mediæval polyphony a cadence or close was a polyphonic problem. It involved a harnessing of individual parts, each of which had to be guided to the desired end without loss of distinction and within the defined conventions of the particular mode in use. This was a task of considerable nicety, and hence every discovery that impressed composers as having a peculiar fitness for the purposes of a conventional ending quickly became a common factor in the prevailing technique. The term cadence thus gathered to itself a precise meaning. It represented a method of ending which embodied the composite experience of many minds. The highly

rigid characteristics which gave a mode its artistic values were to a similar degree recognisable in the cadences which were proper to it, and it was therefore not difficult to describe and label a modal cadence with considerable exactitude.

The application of a specialised grammar of this kind to a later and profoundly different system gave rise to many inconsistencies in the use of technical terms, and of these the changed and frequently ambiguous definitions of cadences are typical. Polyphonic significance largely disappeared and cadences became more and more akin to devices of punctuation. The term was thus applied to certain harmonic formulæ which were held to embody the stable elements of a key, and all cadences became technically common to all keys. In a fixed key-system a cadence is logically therefore a kind of musical full-stop, and those cadences which admit of simple harmonic definition are conventions of universal application. It is when the attempt is made to extend the use of this term to less formal devices that the exact definition of it breaks down. The essence of a cadence, traditionally, is finality. Hence a cadence which is not final, at least so far as its immediate context is concerned, is inherently ambiguous and can only be very approximately defined. It will be convenient to discuss the various harmonic formulæ, to which this term has been applied, in order of rigidity.

(1) Perfect Cadence (Authentic).—The leading chord is that of the dominant, and the cadence may be either major or minor.

Of the countless variations of these formulæ the following are typical :

3. Brahms. Symph. I, iii.

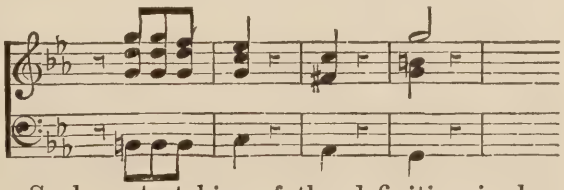
4. Wagner, *Die Walküre*, II.

(2) Perfect Cadence (Plagal).—The leading chord is that of the subdominant.

7. Wagner. *Tristan*, III.

(For a *minor* cadence ending with a *major* chord, see Tierce de Picardie.)

(3) Mixed Cadence.—A final progression which contains within the last three or four chords both dominant and subdominant harmony. In classical usage the final cadence was, of course, *either* Authentic or Plagal. The example from ' Tristan ' above is mixed to this degree. There are later examples of a mixed cadence (see No. 16, from ' Pétrouschka ' below), but the theorists who invented the term had no conception of so uncompromising a combination.

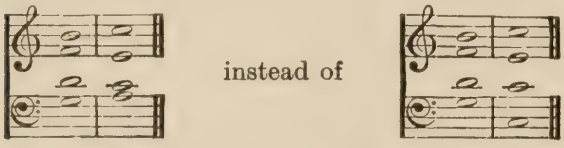


(4) Imperfect Cadence or Half-close.—This formula is a very common feature in the harmonisation of classical melodies, where the end of a phrase may require dominant harmony without involving real modulation. The function of a comma or semicolon in prose is a near analogy. Tonic followed by dominant is the harmonic analysis of this cadence.

8. 9. Mozart. Quartet in G, No. 1.

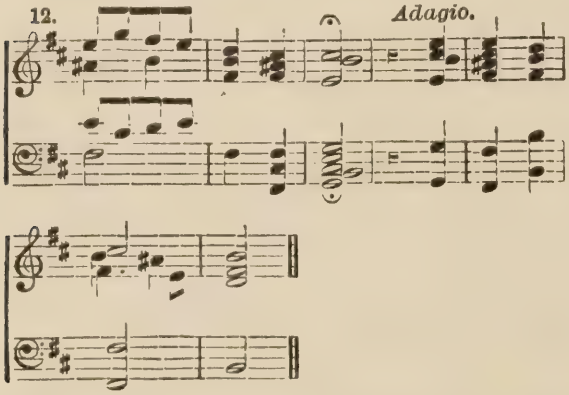
This term has also been applied to temporary modulations into the dominant, thus :

10. Beethoven, Symph. No. 5.



Such a stretching of the definition is characteristic of the new wine in the old bottles. Whether this cadence is inferentially perfect or imperfect depends solely on the key-signature chosen (of G, that is, or of C). It is only when the key-feeling is otherwise well established that the term Imperfect Cadence can have exact meaning, and this fact involves an inherent ambiguity in that the quality to

be defined does not belong essentially to the cadence itself.



(5) Interrupted Cadence.—Under this heading have been grouped innumerable passages in which what might be called a 'leading' chord, in the sense already noted, is resolved irregularly. An interrupted cadence is not a cadence at all, in the strict sense, and though the term will sometimes describe with fair usefulness a harmonic elasticity that may be related to a more rigid tradition, its precise significance is for the most part confined to the element of surprise. The form often given as typical is

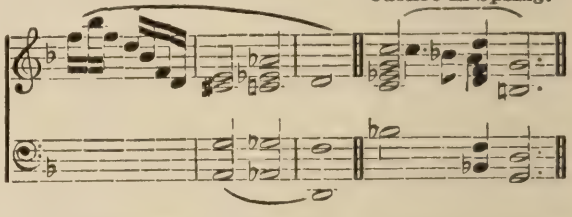
11. Interrupted. Perfect.

But it is obvious that *any* second chord other than that of the tonic may be considered as an interruption, and in the fluid texture of modern harmony such features are the rule rather than the exception. In Handel the old name for this cadence, *Inganno* (deception), is illustrated by the following passage from the organ fugue in B minor:

12. *Adagio.*

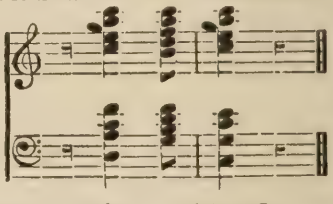
and there are innumerable examples of a like nature in the music of the classical period. To Wagner the device was a most useful means of achieving musical continuity throughout a movement which might contain many sections of varied dramatic character.

13. Wagner. *Tristan.*



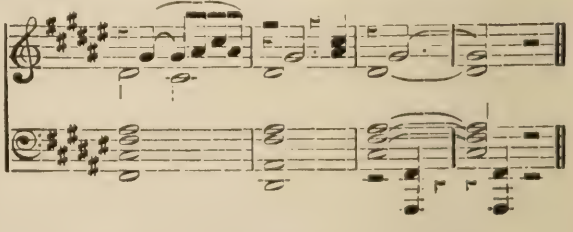
Frequently, however, there is no such stereotyped anticipation of a conventional ending, and the use of the term cadence to describe what is more essentially a connecting link in the chain of keys or of ideas, robs the word of its historical meaning and makes its application arbitrary.

(6) The prevailing tendency of modern technique has been a revolt against classical conventions, of which the orthodox cadences are a type. Since the key-systems of the classics became axiomatic, finality has tended to depend on a feeling of essential balance in the structure of a movement, rather than on the prescribed use of particular formulæ. Given adequate preparation in this sense, the final chord or chords may be approached almost from any angle, and the last statement of key may be attenuated to a single chord, or indeed to a single note.

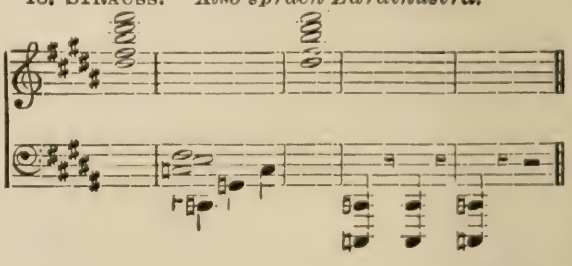


14. Richard Strauss. *Don Quixote.*

15. Fredk. Delius. "On hearing the first cuckoo in Spring."



Contemporary composers have gone further still, in that they have invested with a degree of finality chords which are traditionally complex, and such chords are used as the ultimate statements of tonality. This practice has synchronised with the deliberate choice of ambiguous or unsolved endings. The following examples will make the tendency clear. They represent the complete liquidation of all that has hitherto been implied by the term cadence.



16. Stravinsky. *Pétrouschka.*

17. Debussy. *Pelléas et Mélisande.*

18. Strauss. "*Also sprach Zarathustra.*"

G. D.

CADENCE, the name of an *agrément* of the French school. (See ORNAMENTS.) E. BL.

CADENZA in its simplest acceptation is a flourish of indefinite form, introduced upon a bass note immediately preceding a close of some finality; that is, occupying the position of full stop either to an entire movement, or to an important section of one. The custom was most probably originated by singers, who seized the opportunity afforded by the chord of 6–4 on the dominant immediately preceding the final close of an aria or scena, to show off the flexibility, compass and expressive powers of their voices to the highest advantage; so that the piece coming to an end immediately afterwards, the audience might have the impression of astonishment fresh in their minds to urge them to applause.

The idea thus originated spread widely to all kinds of music, and in course of time its character has changed considerably, though the flourish of which it is composed is still its conspicuous feature. In instrumental music it fulfils a peculiar office, as it is frequently introduced where a pause in the more important matter of the movement is desirable, without breaking off or allowing the minds of the audience to wander. Thus it occurs at points where the enthusiasm of the movement has been worked to such a heat that it is necessary to pause a little before returning to the level of the natural ideas of the themes, as in Liszt's 'Rhapsodie hongroise' in A, and Chopin's 'Nocturnes' in F minor and C♯ minor. Chopin uses them frequently when the main business of the movement is over, in order to prevent the close, which follows immediately, being too abrupt. At other times it occurs as a connecting link between two movements, or between an introduction and the movement following it, where for certain reasons it is expedient to pause a while on some preparatory chord, and not to start serious operations before the minds of the audience have settled to the proper level.

The greater cadenza, which is a development of the vocal flourish at the end of a vocal piece already spoken of, is that which it is customary to insert at the end of a movement of a CONCERTO (*q.v.*) for a solo instrument. Like its vocal predecessors the cadenza usually starts from a pause on a chord of 6–4 on the dominant, preparatory to the final close of the movement, and its object is to show off the skill of the performer. Such cadenzas may occur either in the first or last movement, and even in both, as in Mozart's concerto in D minor and in Beethoven's in G. With regard to their form there is absolutely no rule at all. They should contain manifold allusions to the chief themes of the movement, and to be successful should be either brilliant or very ingenious; containing variety of modulation, but rather avoiding progressions which have been predominant in the movement itself; and the more they have the character of abandonment to impulse the better they are. It was formerly customary to leave the cadenzas for improvisation, and certainly if the frenzy of inspiration could be trusted to come at the right moment, impromptu cadenzas would undoubtedly be most effective in the hands of real masters of the situation. Moreover, it is chiefly in the sense of their being the exposition of the player's special capacities that they are defensible, for as far as the composer is concerned the movement generally offers full opportunities for display of the powers of the executant.

Still custom is generally stronger than reason, and it does not seem likely that cadenzas will yet die out. And as the art of EXTEMPORISATION (*q.v.*) is for various reasons considerably on the wane, it will probably become habitual for composers to write their own cadenzas in full, as Beethoven has done in the E♭ concerto, and Schumann in his A minor concerto.

C. H. H. P.

The following list of published cadenzas to classical concertos does not claim completeness:

PIANOFORTE CONCERTOS

To BEETHOVEN: by the composer (1 vol.); by Reinecke; No. 4, in G, op. 58, by Bülow, Dohnányi Godowsky, Saint-Saëns, D'Albert and Stenhammar; 4 to the 1st movements in C and C minor, and to the 1st and last movements of No. 4 in G, by Busoni; 6 (2 each) to Nos. 1 and 4, and 1 each to Nos. 2 and 3, by Moscheles; 1 each to the 4, by Rubinstein; 1 to C minor and 2 to G major, by Clara Schumann; No. 3 in C minor, by J. Wieniawski.

To MOZART: 36 by the composer (1 vol.); by Beethoven, Hummel and Reinecke (? vols.); by Reinecke (op. 87); in D minor, by Rubinstein; 2 in D minor, by Clara Schumann; 2 in D minor, by Busoni; No. 17 in G, by Dohnányi; No. 22 in E flat, by B. Marx-Goldschmidt and Saint-Saëns.

To J. S. BACH: in D minor, by Reinecke (op. 87).

To WEBER: in E flat, by Reinecke (op. 87).

VIOLIN CONCERTOS

To BEETHOVEN: by Flesch; by A. Hilf (3); by J. Joachim; by H. Leonard; by Saint-Saëns; by A. Sammons; by E. Singer; by H. Vieuxtemps.

To PAGANINI: No. 1, by A. Hilf; No. 1, Book IV. of 'Gradus,' op. 36, by E. Sauret.

To BRAHMS: by Joachim; by A. Hilf.

To MOZART: in A, G, E flat and D, by O. Seeger; by E. Sauret; by Marteau; in B flat, by Sitt.

VIOLONCELLO CONCERTOS

To HAYDN: in D for violoncello and pianoforte, by Gevaert.

BIBL. — HEINRICH KNÖDT, *Zur Entwicklungsgeschichte der Kadenzen im Instrumentalkonzert. Sammelbände* of the I.M.G., 1913–14, pp. 375, etc.

CADMAN, CHARLES WAKEFIELD (*b.* Johnstown, Pennsylvania, U.S.A., Dec. 24, 1881), an American composer who has given much attention to the music of the North American Indians, in which he has made original investigations; and has utilised many Indian themes in his own compositions. His opera, 'Shanewis,' was produced with success at the Metropolitan Opera House in 1918 and was repeated there the next season. His song, 'The Land of the Sky-blue Water,' had for a time great popularity. His compositions also include these:

The Land of the Misty Water, opera.
Thunderbird, orchestral suite.
Trio in D, op. 56, violin, violoncello and pianoforte.
The Vision of Sir Launfal, cantata, for male voices.

R. A.

CÆCILIAN SOCIETY. This society was

instituted in 1785 by a few friends who met weekly at each other's houses for the practice of hymns and anthems, but subsequently, having some instrumentalists among them, they united for the performance of sacred works on a more extended scale, and especially of Handel's oratorios. In 1791 an organ was erected in the society's room in Friday Street, and after meeting at Plasterers' Hall, Painters' Hall, Coachmen's Hall and the Paul's Head, they obtained the use of Albion Hall, London Wall, where they met until the dissolution of the society in 1861. For many years the society gave the only performances of the oratorios of Handel and Haydn which could be heard (except during Lent at the theatres of Covent Garden and Drury Lane), and its work may be said to have been taken up by the Sacred Harmonic Society, which was founded nearly 30 years before the dissolution of the older body. The first conductor of the Society was an amateur named Vincent, who filled the office for upwards of thirty years, when he was succeeded by Thomas Walker, whose place was taken by his son Joseph Walker. James Shoubridge was the last conductor. C. M.

CAEN, Arnold (erroneously called Acaen or Açaen, see *Ambros*, iii 261), apparently a Netherlander, who settled in Italy early in the 16th century. In Petrucci's 'Motetti della corona,' 1519, he figures with three important motets *a* 4 v. under the name of Acaen, the result of an accidental contraction of initial and surname, copied by Aaron, and by Cerone in his *Melopeo*. Seb. Ochsenkuhn's book of lute tablature, 1558, contains some motets by 'A. Caen,' and Montanus and Neuber's 'Magnum opus,' 1559, where he is called Arnoldus Caen, the motet 'Hierusalem luge,' 5 v. (Part II., No. 27) of which MS. copies exist in Brieg and Breslau. A motet 'O Regina Coelorum,' 5 v. is in a MS. choir-book in the Hofburg Library, Vienna. E. v. d. S.

CÆSAR, *alias* William Smegergill, a chorister at Ely under Amner, 1615,[1] was the composer of some songs published in 'Select Musicall Ayres and Dialogues,' 1653, and other collections of the period. Wood (MS. Notes Bodl.) speaks of him as a Roman Catholic and 'a rare lutenist.' W. H. H.

CAETANI, Roffredo, Prince of Bassano (*b.* Rome, Oct. 13, 1871). His musical studies were pursued privately under the tuition of De Sanctis, Tacchinardi and Sgambati. Caetani has devoted himself mainly to the composition of chamber music. His published works include two quartets, a trio, a sonata for violin and pianoforte, a quintet, and various pianoforte pieces. But he has also written an intermezzo, five symphonic preludes, and a suite in B minor for orchestra. In 1915 he wrote the text and music of an opera. F. B.

[1] Gibbons, *Ely Records*, p. 43.

CAFARO, Pasquale (Caffaro; also known by his name of endearment Caffarelli) (*b.* Lecce, near Naples, Feb. 8, 1706; *d.* Oct. 23, 1787), composer. He was destined by his parents for a scientific career, but his bent towards music showed itself too strongly for contradiction, and he was entered at the Conservatorio della Pietà, at that time under the direction of Leonardo Leo.

On the termination of his studies he became maestro at the Chapel Royal of Naples, and in time director of the Conservatorio as well. Grace, purity of style and poverty of invention were the characteristics of his work. The following are among his best-known productions:

Oratorio per l'Invenzione della Croce, Naples, 1747. Ipermnestra, Naples, 1751. La Disfatta di Dario, 1756. Antigono, 1754. L'Incendia di Troia, Naples, 1757. Cantata a tre voci per festeggiare il giorno natalizio di Sua Maestà, Naples, 1764. Arianna e Teseo, 1766. Cantata a tre voci, etc. etc. Naples, 1766. Il Creso, 1768. Giustizia placata, 1769. Cantata a più voci per la Traslazione di sangue di S. Gennaro, Naples, 1769. L'Olimpiade, Naples, 1769. Antigono, reset to fresh music, 1770. Il Natale di Apollo, 1775. Betulia liberata. Il Figluolo prodigo ravveduto, 1745. Oratorio on S. Antonio of Padua. Il Trionfo di Davidde, Oratorio, 1746.

A Stabat Mater was printed at Naples in 1785. In addition to these there are in existence by Cafaro many pieces of church music, consisting of masses, psalms, motets, etc., of acknowledged merit. An 'Amen' for 5 v. by him is included in Novello's 'Fitzwilliam Music.' See *Q.-L.* E. H. P.

CAFFARELLI, Gaetano Majorano, detto (*b.* Bari, Naples, Apr. 16, 1703; *d.* Nov. 30, 1783), was one of the most famous of *evirati*.

He soon attracted the notice and favour of Cafaro (or Caffaro) (*q.v.*). This artist, recognising the genius of the boy, sent him to Norcia to be prepared for the career of an *evirato*, according to the barbarous custom of those days; and, upon his return, gave him in his own house elementary instruction in reading, writing and music. When sent to study at Naples under Porpora, the grateful youth, as was not unusual, called himself Caffarelli, in remembrance of his first protector. It is of this extraordinary singer that the story is told that he was kept by Porpora for five or six years to the uninterrupted and unvaried study of one page of exercises; and that, at the end of this time, he was dismissed with these words, 'Go, my son: I have nothing more to teach you. You are the greatest singer in Europe.' In 1724 he made his début at Rome in a female character, as was usual for sopranists, when his beautiful voice, perfect method and handsome face procured him his first triumph. He now easily obtained engagements, and sang with similar success in the principal cities of Italy until 1728, when he returned to Rome. He left Rome in 1730 and, after singing in other places, arrived in London at the end of 1737. Here he made his first appearance at the King's Theatre on Jan. 7, 1738, in the

principal character in Handel's 'Faramondo,' and in 'Serse' on Apr. 15. He also sang the part of Jason in Pescetti's 'La Conquista del vello d' oro' in the same year. His name does not appear again; and it is said that during all his stay in London he was never in good health or voice. He does not appear to have fulfilled the expectation that his coming had created. He now returned to Italy, and passed through Turin, Genoa, Milan, Florence and Venice in a triumphal progress. At Turin, when the Prince of Savoy told Caffarelli, after praising him greatly, that the princess thought it hardly possible that any singer could please after Farinelli, 'To-night,' he replied, 'she shall hear two Farinellis!' At Naples he excited the wildest enthusiasm. While he was singing there he was told of the arrival of Gizziello, whom, as a possible rival, he was most anxious to hear and estimate for himself. He posted all the way to Rome, arrived in time for the opera, and took a back seat in the pit. After listening attentively to Gizziello's *aria di entrata* he could not master his emotion; but, rising from his seat, exclaimed 'Bravo, bravissimo, Gizziello! È Caffarelli chi te lo dice!' and fled precipitately from the theatre. Throwing himself into his carriage, he posted rapidly back to Naples, and found he had barely time to dress and appear at the opera, where his absence had already been remarked. In 1740 he returned to Venice, where he received a higher salary than any singer had received before,—800 sequins (=£385), and a benefit of 700 sequins (=£335), for a season of three months. He reappeared at Turin in 1746, and then at Florence and Milan. On the invitation of the Dauphine he went to Paris in 1750, and sang at several concerts. At the age of 65 he was still singing; but he had made an enormous fortune, had purchased a dukedom, and built at Santo Dorato a palace, over the gate of which he inscribed, with his usual modesty, 'Amphion Thebas, ego domum.' A commentator added 'Ille cum, sine tu!' He excelled in slow and pathetic airs, as well as in the bravura style; and was unapproached both in beauty of voice and in the perfection of his shake and chromatic scales. He is said to have been the first to introduce the latter embellishment in quick movements. He left his wealth and his dukedom to a nephew. J. M.

CAFFI, Francesco (*b.* Venice, *c.* 1780; *d.* Padua, Feb. 1874), councillor at the Court of Appeal, Milan, until 1827, when he retired to Venice and devoted himself to musical historical research. His principal work is on the sacred music at the Ducal chapel of St. Mark's, Venice, from 1313–1797; *Storia della musica* . . . (1854–55, 2 vols.). He also wrote a number of monographs of famous musicians. A history of the theatre remained incomplete. He composed a cantata 'L' armonia richiamata.' E. v. d. S.

CAFFIAUX, Dom Philippe Joseph (*b.* Valenciennes, *c.* 1722; *d.* Paris, Dec. 26, 1777), a Benedictine monk of St. Maur. He wrote a history of music, advertised for publication in 1756, but which remained in MS. until it was found in the National Library, Paris, by Fétis, who speaks very highly of the work. E. v. d. S.

CAGNONI, Antonio (*b.* Godiasco, Voghera, Feb. 8, 1828; *d.* Bergamo, Apr. 30, 1896), a prolific composer of Italian opera, entered the Milan Conservatorio in 1842, remaining there until 1847.

His first essay before the public was with 'Don Bucefalo,' given at the Teatro Rè in Milan in 1847. This opera buffa, although it has kept the stage in Italy, has never attained success outside its own country; it was given at the Italiens in Paris, but very coldly received. Between 1856 and 1863 he held the post of maestro di cappella at Vigevano, and while there devoted himself entirely to religious music.

In that year he retired to Novara, where he became maestro di cappella in the cathedral, and director of the Instituto musicale. Subsequently he produced nothing but sacred music. Two motets, 'Inveni David' and 'Ave Maria,' were published in 1886. In February of that year Cagnoni was made a commander of the order of the Corona. He was from 1886 maestro di cappella at Santa Maria Maggiore in Bergamo. The following is a complete list of his operas:

Rosalia di San Miniato (1845); I due Savojardi (1846); Don Bucefalo (1847); Il testamento di Figaro (1848); Amori e trappole (1850); Giralda (1852); La valle d' Andorra (1854); La fioraja (1855); La figlia di don Laborio (1856); Il vecchio della montagna (1863); Michele Perrin (1864); Claudia (1866); La tombola (1869); Un capriccio di donna (1870); Papà Martin (1871), produced by Carl Rosa at the Lyceum in 1875 as The Porter of Havre; Il duca di Tapigliano (1874); Francesca da Rimini (1878). M.

CAHEN, Albert (*b.* Paris, Jan. 8, 1846; *d.* Cap d'Ail, Feb. 1903), a composer, who was a pupil of Mme. Szarvady for piano, and of César Franck.

He wrote several works of considerable importance; his 'Jean le Précurseur,' a biblical drama, was performed at the Concert National, Jan. 25, 1874; and 'Endymion,' a 'poème mythologique,' at the Concerts Danbé, Jan. 1875. His début on the stage was made with 'Le Bois,' a one-act piece (Opéra-Comique, 1880); in 1886 'La Belle au bois dormant,' a 'féerie,' came out at the Geneva Theatre; 'Le Vénitien,' a 4-act opera, was given at Rouen in 1890; 'Fleur de neiges,' a ballet, at Brussels 1891; and 'La Femme de Claude' at the Opéra-Comique, June 24, 1896. He also wrote a set of songs called 'Marines,' etc. G. F.

CAHUSAC, the name of an important London firm of music publishers and instrument-makers. (1) Thomas Cahusac, senior (*d.* May

18, 1798), was 'at the sign of the Two Flutes and Violin opposite St. Clement's Church in the Strand' as early as 1755, and from that date to 1798 he carried on an extensive business there. An obituary notice in *The Gentleman's Magazine* describes him as 'the oldest musical instrument-maker in and near London.' His son (2) THOMAS before his father's death had been established in Great Newport Street, but he then joined his brother, (3) W. M. CAHUSAC, at 196 Strand, and for two or three years a partnership existed. In 1802 Thomas, however, set up as a musical instrument-maker at 41 Haymarket, and W. M. Cahusac retained the Strand business until shortly before 1814, when he was established at 79 Holborn; he retired about 1816, living in 1824 at Maida Hill, and in 1829 at Bexley in Kent. The Cahusac firm made flutes, violins and other of the smaller kind of musical instruments, issued numbers of interesting pocket volumes of airs, and much sheet music. F. K.

CAIGNET, DENIS (16th-17th cent.), was in the service of the Duke of Villeroi and gained the prize of the silver lute with a chanson in the competition at Évreux in 1587. In 1624 he was musician-in-ordinary of the King's chamber. He composed 'Airs de court,' in 4, 5, 6 and 8 parts (Paris, 1597), 50 Psalms *a* 3-8 v. (1607); 'Les CL. Pseaumes de David' (1624, 2nd ed., 1626); 3 chansons in a collective volume of 1597 (*Q.-L.*).

CAIMO, GIUSEPPE, a 16th-century Milanese musician, of noble birth; organist at S. Ambroggio, 1564, and at Milan Cathedral, 1580–88. In 1582 he was in treaty with William V. of Bavaria about an appointment which apparently he did not obtain. He composed four books of madrigals *a* 4-5 v. (1564–1585), 1 book of madrigals *a* 5-8 v., and 2 books of 3-4-part canzonets; also some canzonets, etc., in collective volumes (*Riemann, Q.-L.*).

ÇA IRA, one of the earliest of French revolutionary songs, first heard, according to Castil-Blaze, Fétis and others, on the night of Oct. 5-6, 1789, when the Parisians marched to Versailles. It is said, though without documentary support, that the words were suggested to a street-singer called Ladré by General La Fayette, who remembered Franklin's favourite saying at each stage of the American insurrection. Special research on the subject [1] has proved that the words were from Ladré, perhaps the most renowned of popular singers of the day. The burden of the song was then as follows:

'Ah! ça ira, ça ira, ça ira!
Le peuple en ce jour sans cesse répète
Ah! ça ira, ça ira, ça ira!
Malgré les mutins, tout réussira.'

At a later period the burden, though more ferocious, was hardly more metrical:

'Ah! ça ira, ça ira, ça ira!
Les aristocrat' à la lanterne;
Ah! ça ira, ça ira, ça ira!
Les aristocrat' on les pendra.'

Other versions exist.

The tune—the length and compass of which show that it was not composed for the song—is that of a then new contredanse, 'Le Carillon national,' the production of Bécourt, a violinist belonging to the orchestra of the Théâtre des Beaujolais, who composed the dances.

A copy of this contredanse (for 2 violins) in the library of the Conservatoire seems to have been published after Apr. 1, 1790.

G. C.; rev. M. L. P.

The tune quickly became popular in England, and many copies are found in sheet music and in collections of airs. One sheet, published by A. Bland, gives it with the French words as: 'Ah Ça Ira dictum populaire ou carrillon national chanté à Paris à la Fédération de 14 juillet 1790.' This and other copies have a strain following on, and additional to the one printed above. The melody was employed in an opera entitled 'The Picture of Paris,' arranged by Shield and produced at Covent Garden on Dec. 20, 1790. It was adopted (1793) as the quickstep of the 14th Regiment (now West Yorkshire Regiment). For many years afterwards, under the name 'The Downfall of Paris,' or 'The Fall of Paris,' it was used for a pianoforte piece with many variations.

F. K.

CAIX D'HERVELOIS, LOUIS DE (*b.* Paris, *c.* 1670; *d.* there, *c.* 1760),[2] a pupil of Sainte-Colombe, was one of the foremost French viola da gambists, and was in the service of the Duke of Orleans. He composed 5 books of pieces for viola da gamba, 1 book of duets for pardessus de viole, and 3 books of flute sonatas. Many of his charming viole da gamba pieces have appeared in various arrangements within recent years. A son and three daughters of

[2] G. Kinsky. W. Heyer, Cat. ii. 438.

Louis de Caix d'Hervelois are mentioned as viola da gambists in the French royal chamber music in 1749 (E. v. d. Straeten, *Hist. of Violoncello*, i. 106-7).

CAJETAN, Fabrice-Marin, maître de chapelle of the Duc de Guise in 1576, gained the 6th prize in the ' Puy ' competition at Évreux with a chanson, ' C'est mourir mille fois le jour.' Of his compositions are known 2 books of airs, chansons, etc., *a* 4 v. (Paris, 1578) (*Q.-L.*).

CALAH, John (*b.* 1758; *d.* Aug. 5, 1798), organist of St. Mary's Church, and master of the Song School, Newark-on-Trent, 1782.

In 1785 he was appointed organist of Peterborough Cathedral, and held the post till his death. He was buried in the New Building of the cathedral. He composed some cathedral music, songs, and a sonata for piano with violin and violoncello. M.

CALANDO (Ital.), diminishing, *i.e.* in tone; equivalent to *diminuendo* or *decrescendo*, and often associated with *ritardando*. G.

CALASCIONE (Colascione) (Ital.; Fr. *Colachon*), the name of a finger-board instrument of the tambura kind belonging to Lower Italy. The calascione is strung with two catgut strings tuned a fifth apart. The body of it is like that of an ordinary lute, but it is relatively smaller towards the neck. The strings of the calascione are touched with a plectrum, rarely by the fingers. The finger-board has frets of ivory. A. J. H.

The brothers Colle played on it at Hickford's Room, Mar. 17, 1766. W. H. G. F.

CALEGARI, Antonio (*b.* Padua, Feb. 17, 1757; *d.* there, July 22, 1828). After completing his studies at Padua he wrote operas for various Italian theatres until 1789, when he devoted himself to the violoncello, appearing successfully as soloist in public concerts. The war drove him from Italy to Paris, where he met with little success until he dedicated his *L'Art de composer la musique sans en connaître les éléments* (Paris, 1802), to Josephine, the wife of Napoleon, and obtained her patronage. Soon after he returned to Padua as organist of St. Antonio, where in 1814 he was appointed maestro di cappella, remaining there until his death. In addition to his oratorio, masses, Requiem, etc., etc. (see *Q.-L.*), he wrote a treatise on harmony (Padua, 1829, republished by Ricordi) and *A Method for Singing* (Ricordi, 1836). E. v. d. S.

CALEGARI, Francesco Antonio (*b.* Venice; *d.*? after 1740), was educated at the Monastery of Palma, Friuli, and entered the Order of the Minorites (Franciscans). He was maestro di cappella at the Franciscan church of S. Maria gloriosa de Frari, or Cà grande, in 1702. From May 3, 1703, to May 10, 1727, he held the same position at S. Antonio at Padua, returning to the Frari church at Venice, where he still was in 1740. His church music was much praised by the best composers of his time, but he burnt it all to compose henceforth in the enharmonic system of the ancient Greeks, and the music he then produced was little relished by his contemporaries. He wrote a theoretical treatise which was published by M. Balbi, Venice, 1829. A list of his still existing church compositions, harpsichord and organ pieces, is in *Q.-L.* A remarkably fine ' Pange Lingua ' is, according to Mendel, in the Vienna Court library. E. v. d. S.

CALEGARI, Luigi Antonio (*b.* Padua, *c.* 1789; *d.* Venice, 1849), nephew of Antonio. Eight operas of his were given between 1804–1811; also a ballet and a cantata (1832). (*Riemann*). E. v. d. S.

CALEGARI, Maria Caterina (*b.* Bergamo, 1644; *d.* Milan). Her first book of mottetti a voce sola had already appeared at Bergamo in 1659. On Apr. 19, 1661, she joined the Order of S. Benedict at the cloister of S. Margherita, Milan, taking the name of Cornelia. Her beautiful singing and organ playing and her compositions drew crowds of musical amateurs from far and near to the church, and Donato Calvi speaks of her in 1664 as a famous singer and composer of whom masses, motets, madrigals, etc., have appeared in print. E. v. d. S.

CALISTA (Colista), Lelio, a 17th-century Italian composer of sonatas for strings (2 vlns. and bass), whose manuscripts are preserved in English libraries, viz. Ch. Ch. (see Arkwright's Catalogue, Pt. I. p. 20), the Bodleian and the British Museum. One of this name is mentioned in Kircher's *Musurgia*, but it is not known how Calista's works became famous in England. That they were no less rests on the direct statement of Henry Purcell, who quotes from ' the famous Lelio Calista, an Italian ' in his edition (the 12th) of Playford's *Introduction to the Skill of Musick* (1694). The inference is that Calista was one of the ' most fam'd Italian Masters ' whom Purcell took as models for his own sonatas (1683). See Barclay Squire *Sämmelb. Int. Nat. Ges.*, 1904–5, p. 557; *Mus. T.*, Apr. 1917, p. 157.

CALL, Leonard von (*b.* South Germany, 1779; *d.* Vienna, 1815), a guitar-player and composer of harmonious and pretty partsongs, which were greatly in fashion in Germany at the beginning of the 19th century, and contributed much to the formation of the 'Männergesangvereine ' in that country. Some pleasing specimens will be found in *Orpheus*. He is also known for his instruction book for the guitar. G.

CALL CHANGES are changes rung, in which at intervals the ' conductor ' directs the others in what order their bells are to strike. Each change is repeated a number of times until a different order is called by the conductor. W. W. S.

CALLCOTT, John Wall, Mus.D. (*b.* Kensington, Nov. 20, 1766; *d.* Bristol, May 15, 1821), organist and composer, was the son of a bricklayer and builder. He obtained his first knowledge of music while a schoolboy from Henry Whitney, organist of Kensington Church. In 1780 he wrote music for a play performed at Mr. Young's school. He became acquainted, in 1782, with Dr. Arnold and Dr. Cooke, and the elder Sale, from whom he derived much musical knowledge, although he did not receive any regular instruction. In 1783 he became deputy-organist, under Reinhold, of St. George the Martyr, Queen Square, Bloomsbury, which post he held until 1785. About 1782 Dr. Cooke introduced him to the orchestra of the Academy of Ancient Music, and the associations he there formed gave him his first bias towards glee writing; he occasionally played the oboe in the orchestra of the Academy. In 1785 he carried off three of the four prize medals given by the Catch Club (*q.v.*) by his catch 'O beauteous fair'; his canon 'Blessed is he'; and his glee 'Dull repining sons of care.' On July 4 in the same year he took the degree of Bachelor of Music at Oxford, setting as his exercise Dr. Joseph Warton's 'Ode to Fancy.' In 1787 Callcott took an active part with Dr. Arnold and others in the formation of the Glee Club (*q.v.*). In 1788 he was elected a member of the Royal Society of Musicians, and in 1789 was chosen joint organist, with Charles S. Evans, of St. Paul's, Covent Garden, and four years later organist to the Asylum for Female Orphans, which he held till 1802. Although he now ranked as one of the ablest and most popular composers of the day, he had but little skill in orchestral writing. He therefore availed himself of the opportunity afforded by the visit of Haydn to England in 1791 to take lessons in instrumental composition from that master. Whilst studying under Haydn, Callcott composed his fine song 'These as they change' for Bartleman. From 1790–93 he was awarded nine medals by the Catch Club for his compositions; two in 1790 for the canon 'Call to remembrance,' and the glee 'O voi che sospirate'; three in 1791 for the catch 'Tom Metaphysician,' the canon 'I am well pleased,' and the glee 'Triumphant Love'; three in 1792 for the canon 'O Israel,' and the glees 'See, with ivy chaplet bound' and 'Father of heroes,' and one in 1793 for the canon 'Christ being raised.' In the latter year he was appointed organist to the Asylum for Female Orphans. In 1797 he issued a prospectus of a musical dictionary he had planned, having acquired large collections of music for the purpose, including the MSS. of Dr. Boyce. On June 18, 1800, he proceeded Doctor of Music at Oxford. In 1795, upon the formation of a volunteer corps at Kensington, Callcott accepted a commission in it. Aided by a subscription he formed a band for the corps in 1801, for which he not only purchased the instruments and composed and arranged the music, but also instructed the performers. In 1802 he wrote an anthem for Arnold's funeral. The compilation of his dictionary proceeding but slowly, and thinking the public had a right to expect some theoretical work from him, he employed himself in 1804 and 1805 in writing his Musical Grammar, which was published in 1806. In the latter year he wrote for Bartleman a scena upon the death of Lord Nelson, and was appointed in 1807 to lecture on German music at the Royal Institution. Further activity was suddenly interrupted by mental collapse, during which period (in 1809) his professional friends gave a concert on his behalf, and so strong was the desire to show sympathy for him that it was found that the opera-house in the Haymarket was the only building large enough to contain the numbers who thronged to be present.

Dr. Callcott's principal works were his very numerous glees and other pieces of vocal harmony, mostly published singly, but he left in manuscript many anthems, services, odes, etc. His fine scena 'Angel of life' was written for Bartleman. His son-in-law, William Horsley (*q.v.*), edited in 1824 a collection of his best glees, catches and canons, in 2 folio volumes, with a memoir of the composer, and an analysis of his compositions. The work also contains a portrait of Callcott from a painting by his brother Augustus, afterwards Sir Augustus Callcott, R.A. Besides the above-named works Callcott was associated with Dr. Arnold in the selection, adaptation and composition of the tunes for 'The Psalms of David for the use of Parish Churches' (1791). Dr. Callcott left a numerous family. His daughter, Sophia, became eminent as a teacher of the pianoforte, and his younger son, William Hutchins Callcott (*b.* Sept. 28, 1807; *d.* Aug. 5, 1882), attained distinction as a composer and arranger. His son William Robert Stuart Callcott (1852–86) was a skilful organist. W. H. H.

CALLINET, see Daublaine et Callinet.

CALORI, Angiola (*b.* Milan, 1732; *d. circa* 1790), a singer who came to London in 1758.

Here she appeared in 'Issipile,' by Cocchi. In 1759 she sang in 'Ciro riconosciuto,' by the same composer; and in his 'Erginda,' 1760. In the next season she performed the part of Eugenia in Galuppi's 'Filosofo di campagna,' but her name does not occur here again after that. She had a soprano voice of great extent, a profound knowledge of music, and extraordinary rapidity of execution. In 1770 she was singing at Dresden with great success. She returned to her native country in 1774, and

continued to sing at the various operas of Italy till 1783. J. M.

CALVÉ, Emma (*b.* Decazeville, Aveyron, 1864), soprano singer, was a pupil of Mme. Marchesi and of Puget, and made her début at Nice at a charity performance.

Her first important appearance was at the Théâtre de la Monnaie, Brussels, as Marguérite, Sept. 23, 1882. Her first engagement in Paris was at the Théâtre Italien, where she created the part of Bianca in Dubois's 'Aben Hamet,' Dec. 16, 1884. In the following March she sang at the Opéra-Comique; and after some successful tours in Italy she reappeared at the Théâtre Italien as Leila in Bizet's 'Pêcheurs de perles' in 1889. Returning to the Opéra-Comique, she sang the part of Santuzza in 'Cavalleria Rusticana' for the first time in Paris on Jan. 19, 1892; and on May 16 of the same year made her first appearance in the same part at Covent Garden. She was for many years an almost annual visitor to London, and established herself among the first favourites of the operatic public. In Santuzza and Carmen her southern blood enabled her to give impersonations of the utmost vividness and dramatic force. She was considered to be the greatest Carmen of all who have appeared in the part. She created the part of Anita (written for her) in Massenet's 'Navarraise,' in London on June 20, 1894, and sang the same composer's 'Sapho' for the first time in Nov. 1897 at the Opéra-Comique. She gave some special representations of Ophélie in Ambroise Thomas's 'Hamlet' at the Opéra in Paris in May 1899, but the part was not considered to suit her style when she sang it in London. She visited America in 1893, and made her first appearance there as Santuzza on Nov. 29. Her Carmen, first given there on Dec. 20, created 'an indescribable sensation' (*Baker*). Her stage success on both sides of the Atlantic continued till 1910, since when her appearances have been confined to occasional concert performances. Her voice, a soprano of remarkably beautiful timbre, is very emotional, indeed almost luscious in quality, and exquisitely trained. M., with addns.

Bibl.—Emma Calvé, *My Life*, translated by Rosamond Gilder, New York and London, 1922. Sketch by H. de Curzon, *Nouvelle Revue* (July 15, 1922).

CALVISIUS, Seth (*b.* Gorsleben, Thuringia, Feb. 21, 1556; *d.* Leipzig, Nov. 24, 1615), musician, astronomer and chronologer, born of poor parents. The name is a refinement of Kallwitz.

His poverty interfered greatly with his education, but he contrived to attend the Magdeburg Gymnasium in 1572, and the Universities of Helmstedt (1579) and Leipzig (1580), and to avail himself of every opportunity of musical instruction. In 1581 he was made 'repetent' at the Pauliner Church, Leipzig, in 1582 cantor at Schulpforte, and in 1594 cantor and Schulcollege at the Thomasschule, and music director at the Thomaskirche of Leipzig. For music he gave up much—for instance, the chair of mathematics at Wittenberg, offered him in 1611. His treatises are:

Melopoeia . . . (Erfurt, 1592, Magdeburg, 1630), *Compendium musicae practicae* . . . (Leipzig, 1594, 2nd ed. 1602), *Musicae artis praecepta* . . . (Leipzig, 1612; ed. 3 of the *Compendium*), *Exercitationes musicae duae* . . . (*tertiae*) (Leipzig, 1600 and 1611).

His music, original and edited, comprises:

'Hymni sacri latini et germanici,' 1594, 'Harmonia cantionum, a M. Luthero . . . compositarum' (Leipzig, 1597), 'Bicinia 70,' 1599, 'Biciniorum libri duo . . .' (Do. 1590 and 1612), 'Tricinia . . .' (do. 1603), 'Der 150 Psalm für 12 Stimmen . . .' (Do. 1615), 'Schwanengesang' for 8 voices, 1616, 'Der Psalter Davids . . .' (Do. 1617).

Many motets and hymns are in MS. in the Library of the Thomasschule, and his pretty 'Joseph, lieber Joseph mein' is in vol iii. of *Arion*. A full catalogue of MSS. and editions is in *Q.-L.* G.

CALVOCORESSI Michel D. (*b.* Marseilles, Oct. 2, 1877), of Greek parentage, was educated in Paris and has made a considerable reputation as a writer on musical subjects, through numerous articles in French and English periodicals, translations and original books. He is particularly concerned with modern musical developments, and his lectures (1905–1914) in Paris (École des Hautes Études Sociales) brought to notice many new works and served to elucidate the aims of composers then considered obscure. Among several biographical books the most important was that on *Moussorgsky* (1908) written in French and translated into English, Spanish and German. *The Principles and Methods of Musical Criticism* published in English (1923) attempted to lay out a ground plan for consistent criticism. Calvocoressi lives in London and is a regular correspondent on music to several continental papers. He has contributed to the present edition of this Dictionary. C.

CALZABIGI, Raniero da (*b.* Livorno, Dec. 23, 1714; *d.* Naples, July 1795), is famous in musical history as the librettist of Gluck's 'Orfeo,' 'Alceste,' 'Paride ed Elena.' (See Gluck, Libretto and Opera.) After residence in Paris he went to Vienna in 1761 but left it in consequence of a theatrical scandal and returned to Italy. He was the author (1755) of *Dissertazione su le poesie drammatiche del Sig. Abate Pietro Metastario.*

Bibl.—E. Newman, *Gluck and the Opera*; G. Lazzeri, *La vita e l'opera letteraria di R. Calzabigi* (1907); A. Einstein, *Gluck Jahrbuch*, Nos. 2 and 3; J. G. Prod'homme, *Deux collaborateurs italiens de Gluck* (*R.M.I.* xxiii.), 1916.

CAMARGO, Marie Anne de Cupis de (*b.* Brussels, Apr. 15, 1710; *d.* Paris, Apr. 28, 1770), a celebrated dancer. She was descended from an aristocratic family of Roman origin, and her brother was the violinist, François de Cupis. Her début in 'Les Caractères de la danse' (May 5, 1726) was striking. She danced until Mar. 5, 1751, and appeared in 78 operas or ballets. (See Cupis.) M. L. P.

CAMBERT, Robert (*b.* Paris, *c.* 1628; *d.* London, 1677), the originator of French opera. In 1653 he married Marie du Moustiers, daughter of a tailor at Pontoise.

Pupil of Chambonnières for the harpsichord, organist of the church of St. Honoré, probably after his first success in 1659, he became 'surintendant' of the music to Anne d'Autriche. Through Cardinal de la Rovère, Archbishop of Turin, the Pope's Nuncio in Paris, he was brought into contact with Abbé Pierre Perrin (1625 ?–1675), who, though he disdained Italian operas, had nevertheless made some profit from them. He had tried his talents with a comedy in music, 'La Muette ingrate' (1658). From their common efforts, rose 'La Pastorale en musique ou l'Opéra d'Issy,' first performed in the country house of the king's goldsmith, M. de la Haye, at Issy, near Paris, April 1659. Received with great applause, (8 or 10 performances), this first French comedy in music (now lost) was produced again at Vincennes before the court. On June 28, 1669, Perrin, in association with Cambert, obtained a patent securing the right to organise musical performances in the French language on the Italian model. On Mar. 19, 1671, 'Pomone,' pastoral in 5 acts and prologue—the first French opera—made its appearance in the Salle du Jeu de Paume; it was followed by 'Les Peines et les plaisirs de l'amour,' another pastoral (5 acts and prologue), words by Gilbert, played in Nov. 1671,[1] which was as successful as its predecessor. But by Lully's intrigues, Perrin was dispossessed of his privilege (1672), which Lully bought from him, and Cambert took refuge in London. He became bandmaster to a regiment. The statement that he was made master of the music to Charles II. is not supported by documentary evidence. There he died in 1677, assassinated, it was said, by his valet.

Cambert's first printed work was 'Airs à boire' (Ballard, 1665, incomplete copy in the National Library): his 'Trio italien burlesque' for Brécourt's 'Jaloux invisible' (1666), has been reprinted with 'Pomone' and 'Les Peines et les plaisirs de l'amour' (the first act only of each has been preserved in the National Library) in the collection 'Chefs-d'œuvre de l'Opéra Français' (ed. Michaëlis), by J. B. Weckerlin.

Cambert's and Perrin's other operas are not extant; only accounts and reference to them can be found in contemporary memoirs, in the literary works of Perrin, Saint-Évremond, in his 'Comédie des Opéras,' etc. These operas are: 'Ariane ou le Mariage de Bacchus' (1661), considered by the latter as Cambert's *chef-d'œuvre*, and, it is said, performed in London (1673 ?) (as were also 'Pomone' and 'Les Peines et les plaisirs de l'amour'); 'La Mort d'Adonis' (see Boësset), which was composed there; and 'Le Tombeau de Climène.' (See Académie de Musique; Guerre, M. de La.)

M. L. P.

CAMBINI, Giovanni Giuseppe (*b.* Leghorn, Feb. 13, 1746; *d.* Bicêtre, near Paris, *c.* 1825), violinist and composer, studied violin with Pohl and under Padre Martini, at Bologna, between 1763 and 1766.

In the latter year he produced an opera at Naples without success. Having formed an attachment for a girl from his native city, he was returning thither with her to be married when their vessel was captured by corsairs, and they were both sold as slaves in Barbary. Here a rich Venetian merchant bought Cambini and gave him his liberty. In 1770 he went to Paris, and was introduced to Gossec, who performed some of his symphonies at the Concert Spirituel. These works, though very slight, were written with the flowing melody characteristic of Italian music, and created a highly favourable impression. During the ensuing twenty years, Cambini produced an enormous mass of music: 60 symphonies; 144 string quartets; 29 'Symphonies concertantes'; 7 concertos; about 400 pieces for different instruments, including duos, trios, quartets for oboes; organ pieces; solfeggi; methods; 15 patriotic hymns; an oratorio, 'Le Sacrifice d'Abraham' (Concert Spirituel, 1774); 'Joad'; a Miserere (Concert Spirituel, 1775); also operas and ballets (see *Fétis* and *Q.-L.*). He was conductor at the Théâtre des Beaujolais (1788–91), and at the Théâtre Louvois (1791–94). In 1804 he wrote some articles in the Leipzig *Allgem. Musik. Zeitung*, and in 1810 and 1811 was joint-editor of the *Tablettes de Polymnie.* Towards the end of his life Cambini maintained himself by arranging popular airs and other like drudgery, but even this resource failed him, and his last ten years were spent in the hospital of the Bicêtre, where he died. His best works were his quartets. He excelled so much in playing that style of music that Manfredi, Nardini and Boccherini, the three most eminent quartet players of that epoch, each chose him to play the viola with them. Cambini wasted in dissipation abilities which might have placed him in the foremost rank of musicians; and so little was he troubled with a conscience as to undertake to write some quartets and quintets in the style of Boccherini, which were published by Pleyel, indiscriminately with genuine compositions of that master.

M. C. C.

CAMBIO, Perissone (mid-16th cent.). In ancient collective volumes he is often referred to merely as Perisson, Pierreson, etc., and is

probably identical with ' Pyrison, a celebrated composer at Venice,' as Duke Albert of Prussia's agent calls him when sending the Duke one of Cambio's masses to Nuremberg, (probably the Mass ' super de beata Virgine ' by ' Piereson ' in the Berlin Library). He was a singer at St. Mark's, Venice, and Caffi says that he was of French birth and nationality. Burney (*Hist.* iv. 214), who reproduces a villota from his ' Canzone villanesche,' etc., speaks of him as one of the greatest masters of his time. Of his compositions are known, apart from the above Mass, 3 books of madrigals, and one of ' Canzone villanesche alla Napolitana,' *a* 4 v. (2 editions), published 1545–51, besides a considerable number of songs in various collective volumes. (See *Q.-L.*) E. v. d. s.

CAMBRIDGE. The Cambridge University Musical Society (C.U.M.S.), the most important institution for the regular performance of music in Cambridge, apart from College Choirs and Societies, was founded as the ' Peterhouse Musical Society,' by a little body of amateurs in Michaelmas Term 1843. The earliest record which it possesses is the programme [1] of a concert given at the Red Lion in Petty Cury on Friday, Dec. 8.

In its early days the Society was mainly devoted to the practice of instrumental music. The Peterhouse Society had been in existence for about eighteen months, and had held eleven ' Public Performance Meetings,' when the name was changed to that of the Cambridge University Musical Society.

The first concert given by the newly-named Society was held on May 1, 1844; it included Haydn's ' Surprise ' Symphony, and ' Mr. Dykes of St. Catharine's College ' sang John Parry's ' Nice young man ' and (for an encore) the same composer's 'Berlin wool.' the ' Mr. Dykes ' who thus distinguished himself was afterwards well known as the Rev. J. B. Dykes, the composer of hymn-tunes. There is not much variation in the programmes during the early years of the Society's existence. Two or three overtures, an occasional symphony or PF. trio, with songs and glees, formed the staple, but very little attention was given to choral works. The conductors were usually the presidents of the Society. In 1846 Dr. Walmisley's name frequently appears, as in his charming trio for three trebles, ' The Mermaids,' and a duet concertante for piano and oboe. In Dec. 1852 professional conductors began to be engaged. One of the earliest of these (Amps) turned his attention to the practice of choral works. The result was shown in the performance of a short selection from Mendelssohn's ' Elijah ' (Mar. 15, 1853), ' Antigone ' music (May 28, 1855), and ' Œdipus ' (May 26, 1857), when Dr. Donaldson read his translation of the play. Sterndale Bennett, on his election to the professorial chair of music, undertook, whenever time would allow, to conduct one concert a year. In fulfilment of this promise, on Nov. 17, 1856, he conducted a concert and played his own quintet for piano and wind, the quartet being all professionals. In the next few years the Society made steady progress, the most notable performances being Mozart's Requiem; Bach's concerto for three PFs.; Beethoven's ' Ruins of Athens '; the ' Antigone ' again; a selection from Gluck's ' Iphigenia in Aulis '; Beethoven's Mass in C and ' Choral Fantasia '; and a concert in memory of Spohr (Dec. 7, 1859).

In 1860 the Society gave its first chamber concert (Feb. 21). In the following year the Society gave a performance of the ' Œdipus ' in the Hall of King's College, the dialogue being read by the Public Orator, the Rev. W. G. Clark. At a subsequent performance of the 'Antigone ' in the Hall of Caius College (May 20, 1861) the verses were read by the Rev. Charles Kingsley.

In 1870 Charles Villiers Stanford (then an undergraduate at Queen's) made his first appearance at a concert on Nov. 30, when he played a Nachstück of Schumann and a Waltz of Heller. In 1873 he succeeded Hopkins as conductor, and one of his first steps was to admit ladies to the chorus as associates. This was effected by amalgamating the C.U.M.S. with the Fitzwilliam Musical Society, a body which had existed since 1858. The first concert in which the newly-formed chorus took part was given on May 27, 1873, when Sterndale Bennett conducted 'The May Queen.' In the following year the Society performed Schumann's ' Paradise and the Peri ' (June 3, 1874), and on May 2, 1875, his music to ' Faust ' (Part III.) for the first time in England. The custom of engaging an orchestra, consisting mainly of London professionals, now began, and enabled the C.U.M.S. to perform larger works than before. The number of concerts had gradually been diminished, and the whole efforts of the chorus were devoted to the practice of important compositions. By this means the Society acquired a reputation as a pioneer amongst English musical societies, and produced many new and important compositions [2] besides reviving works which, like Handel's 'Semele' and 'Hercules,' or Purcell's ' Yorkshire Feast Song,' had fallen into undeserved oblivion.

In 1876 a series of Wednesday Popular Concerts was started, and continued for some years. These were given in the small room of the Guildhall, and generally consisted of one or two instrumental quartets or trios, one instrumental solo and two or three songs. The performers consisted of both amateur and professional instrumentalists. More important chamber concerts were also given in the Lent

[1] This programme was printed in full in former editions of thi Dictionary.

[2] The first performance in England of Brahms's Symphony in C minor, Mar. 8, 1877, deserves pecial record.

and Easter terms; and to these, Professor Joachim—an honorary member of the Society—often gave his services.

The Wednesday Popular Concerts were developed by Stanford in 1888 into a series of concerts, partly orchestral, partly chamber, which came to an end in 1893, owing to want of financial support. A later series of similar kind, rather less ambitious, started by Dr. GRAY (*q.v.*), came to an end in 1896. Others have followed and the various schemes have been modified from time to time, but the C.U.M.S., under its present (1926) conductor, Dr. C. B. ROOTHAM (*q.v.*), who succeeded Dr. Gray in 1912, has carried on the tradition established by Stanford of performing a wide range of the finest works both choral and orchestral.

A few events in the recent history of music in Cambridge deserve record. In most of them the C.U.M.S., or at any rate its members, have taken an active part. On Mar. 14, 1923, the C.U.M.S. combined with the Oxford Bach Choir (see OXFORD) in giving a concert in London at the Albert Hall when Beethoven's Mass in D, Rootham's 'Brown Earth' and Vaughan Williams's 'Toward the Unknown Region' formed the programme. In the same year (June 2-8) a six-days' festival of British music was given in Cambridge, the programmes of which ranged from Elizabethan music to that of the present day with performances of old English operas, 'The Judgment of Paris' (Congreve and Eccles) and 'Midas' (burletta by O'Hara) in the hall of Trinity College. Vaughan Williams's ballet, 'Old King Cole,' was then heard for the first time.

Dramatic music formerly cultivated in the universities chiefly as part of the academic performances of Greek plays (see GREEK PLAYS, MUSIC TO) has been furthered by certain operatic productions given lately by members of the University. These have included 'The Magic Flute,' Dec. 1 and 2, 1911 (see DENT), 'The Fairy Queen' (Purcell), Feb. 10-14, 1920, the first production of Rootham's 'The Two Sisters,' Feb. 14-18, 1892, and Handel's 'Semele,' Feb. 10-14, 1925. All these have been under the musical direction of Dr. Rootham.

The CAMBRIDGE UNIVERSITY MUSICAL CLUB was founded in 1889 on the lines of the Oxford Musical Union (see OXFORD) and affiliated thereto. It holds weekly meetings for chamber music during term and provides a class in ensemble playing for its members (about 250) under professional direction.

(See also DEGREES IN MUSIC, LIBRARIES and PROFESSOR.)

W. B. S.; rev. with addns. (information from Dr. C. B. ROOTHAM), C.

CAMERA (Ital.), 'chamber,' a sonata or concerto da camera of secular character, written for a room, and so called to distinguish it from the sonata or concerto da chiesa, which was intended for performance in a church. (See CHAMBER MUSIC.) G.

CAMERLOHER (CAMMERLOCHER, CAMMERLOCHNER), PLACIDUS VON (*b.* Murnau; *d.* Freising, 1776), was educated at the academy of the nobility at Ettal, after which he apparently belonged to the court chapel at Munich. In 1748 he entered the Church and became a canon at St. Veit and afterwards at St. Andreas, Freising, where he was simultaneously court Kapellmeister and 'Councillor' of the Prince-Bishop. He composed a Passion music, oratorios, an opera, ballad operas (Singspiele), and a considerable amount of instrumental music, 4-part symphonies, quartets, trio sonatas, solo sonatas, etc. (See *Q.-L.*)

E. v. d. S.

CAMIDGE, the name of a family of Yorkshire musicians. (1) JOHN (*b.* York, 1735: *d.* Apr. 25, 1803), organist, was, on the resignation of his master, James Nares, in 1756, appointed organist of York Minster, which post he held until Nov. 11, 1799.

He went to London before his first appointment to Doncaster Parish Church, and studied under Dr. Greene, taking some lessons from Handel. He published 'Six Easy Lessons for the Harpsichord.'

His son (2) MATTHEW (*b.* York, 1758; *d.* Oct. 23, 1844) received his early musical education in the Chapel Royal under Dr. Nares.

He was at first assistant organist at the Minster, and on the resignation of his father he was appointed his successor as organist. He published a number of sonatas, etc., a collection of tunes adapted to Sandys's version of the Psalms (York, 1789), and *A Method of Instruction in Musick by Questions and Answers.* He resigned Oct. 8, 1842.

His son (3) JOHN (*b.* York, 1790; *d.* Sept. 21, 1859) graduated at Cambridge as Bachelor of Music in 1812, and as Doctor in 1819. About 1828 he published a volume of Cathedral Music of his composition. He received the appointment of organist of York Minster on the resignation of his father in 1842, having for many years previously discharged the duty. In 1848, being stricken with paralysis, his duties were undertaken until his resignation in 1858 by his son,

(4) THOMAS SIMPSON (*b.* Feb. 2, 1828; *d.* Dec. 19, 1912), member of the Leipzig Conservatorium, who was appointed deputy organist, having been organist of Hexham Abbey.

(5) JOHN (*b.* Dec. 8, 1853), son of the above, was educated as a chorister in Christ Church Cathedral, Oxford, 1862, and later was a pupil of Dr. E. G. Monk of York Minster. He was appointed organist of Beverley Minster in 1876. W. H. H., with addns.

CAMPAGNOLI, Bartolomeo (*b.* Cento, near Bologna, Sept. 10, 1751; *d.* Neustrelitz, Nov. 6, 1827), a violinist of great repute.

He learned the violin from Dall' Ocha, a pupil of Lolli from Guastarobba, of the school of Tartini, and afterwards from Nardini. While in the orchestra of the Pergola at Florence he made the friendship of Cherubini. He led the opera bands at Florence and Rome alternately for some years, and in 1776 became Konzertmeister to the Bishop of Freysing. In 1779 he entered the service of the Duke of Courland at Dresden. From 1783–86 he was travelling in north Europe; in 1788 he revisited Italy. In 1797 he was conductor of the Gewandhaus concerts in Leipzig. In 1801 he visited Paris, renewed his acquaintance with Cherubini, and heard R. Kreutzer. He went in 1816 with his daughters, Albertina and Giannetta, two well-known singers, to Italy for a year, and in 1818 settled again in Leipzig. His works comprise concertos, sonatas, duets and smaller pieces for the violin and flute, and a violin-school. His greatest claim to fame lies in his fine 41 'Caprices pour l' alto viola,' op. 22. P. D., with addns.

CAMPANA, Fabio (*b.* Bologna, 1815; *d.* London, Feb. 2, 1882), composer and singing teacher, received his musical education at Bologna at the Liceo.

In early life he produced several operas with more or less ill-success, according to Fétis, viz. 'Caterina di Guise,' Leghorn, 1838; another (name not given by Fétis) at Venice, 1841; 'Jannina d' Ornano,' Florence, 1842; 'Luisa di Francia,' Rome, 1844; and 'Giulio d' Este,' at Milan, in or about 1850. He then settled in London, where he was well known as a teacher of singing, and a composer, principally of Italian songs, some of which were successful. He composed two other operas, viz. 'Almina,' produced at Her Majesty's, Apr. 26, 1860, with Piccolomini (*q.v.*), and 'Esmeralda,' produced at St. Petersburg, Dec. 20, 1869, and at Covent Garden Theatre, June 14, 1870, with Patti as heroine, afterwards produced through her instrumentality at Homburg in 1872. A. C.

CAMPANE, see Bell (2), Orchestral.

CAMPANINI, Cleofonte (*b.* Parma, Sept. 1, 1860; *d.* Chicago, Dec. 19, 1919), operatic conductor, was educated at Parma and Milan, first appeared as a conductor in 'Carmen' at Parma (1883) and in the same year was engaged as assistant conductor at the Metropolitan Opera House in New York. From 1900–12 he directed Italian Opera at Covent Garden and also appeared at La Scala, Milan (1903–06), and toured in Europe and South America. From 1906–09 he was also conductor and artistic director at the Manhattan Opera House, New York (see Hammerstein). His association with the Chicago Opera House began in 1910 and was maintained till his death. He married Eva, the elder sister and teacher of Luisa Tetrazzini (*q.v.*). (*Amer. Supp.*). C.

CAMPANINI, Italo (*b.* Parma, June 29, 1846; *d.* near there, Villa Bigatto, Nov. 22, 1896),[1] a popular opera tenor, received instruction in singing at the Conservatorio at Parma, and later from Lamperti of Milan.

He first attracted public attention in 1871, on the production in Italy of 'Lohengrin' at Bologna under Angelo Mariani. On May 4, 1872, he first appeared in England at Drury Lane as Gennaro in 'Lucrezia,' with great success, and sang there until 1876, notably in 1874 as Kenneth in Balfe's 'Talismano,' and as Lohengrin, a part he was first to sing in New York. From 1878–82 he was at Her Majesty's as Don José ('Carmen'), Rhadames ('Aïda'), and, July 6, 1880, Faust. He had played the same part Oct. 4, 1875, on the occasion of the successful reproduction of that opera at Bologna. He sang also at St. Petersburg, Moscow and several seasons in America, where he resided some time and was very popular. On Nov. 13, 1894, he returned to England and appeared at the Albert Hall in Berlioz's 'Faust' with qualified success. A. C.

CAMPBELL, Alexander (*b.* Tombea, Loch Lubnaig, Feb. 22, 1764; *d.* May 15, 1824), an organist in Edinburgh. He and his brother John were pupils of Tenducci.

He edited and published, in 1792, a collection of 12 Scots songs, with an accompaniment for the violin, and later a similar collection with an accompaniment for the harp. Not long after the publication of his songs, he abandoned music and took to medicine, but subsequently fell into great poverty. (*D.N.B.*) W. H. H.

CAMPBELL, William, a late 18th-century collector of Scottish country dances and reels, for the violin, harp, harpsichord and German flute. R. Birchall published the seventh book in 1785, and in all there appeared at least 25 books, the titles of which were slightly different. E. V. d. S.

CAMPENHOUT, François van (*b.* Brussels, Feb. 5, 1779; *d.* there, Apr. 24, 1848), composer of 'La Brabançonne,' now the national air of Belgium, at the time of the revolution in 1830.

He began his career in the orchestra at the Théâtre de la Monnaie. Having developed a high tenor voice, he appeared on the stage at the same theatre. During the ensuing 30 years he sang in the chief towns of Holland, Belgium and France, and made his farewell appearance at Ghent in 1827. He composed several operas, 'Grotius' (Amsterdam, 1808); 'Le Passe-partout' (Lyons, 1815); 'L'Heureux Mensonage,' and others unpublished, besides songs, choruses and church music. M. C. C.

CAMPIAN (Campion), Thomas, M.D. (*b.* London, Feb. 12, 1567; *d.* there, Mar. 1,

[1] Nov. 23, according to the *Athenæum*.

1619/20), famous song-writer and poet. Both spellings of the name were used in his own time. On the title-pages of all his four books of Airs the name is spelt Campian, and, in its Latin form, the poet himself made it Campianus. That form is therefore adopted here, but Rosseter used the '*o*' in the dedication of the 1601 book.

Campian was a physician by profession, and his fame as a poet is universally recognised even though no complete edition of his works was published before that of A. H. Bullen in 1889. Percival Vivian's edition, which followed this later, has added much to our knowledge of his life; but it is as a musician rather than as a poet that we are chiefly concerned with him in the present notice. Born in London, he was baptized in the church of St. Andrew, Holborn. His father, John Campian, was a member of the Middle Temple, and his mother, Lucy, was a daughter of Laurence Searle, a serjeant-at-arms to Queen Elizabeth. After John Campian's death in 1576, his widow married Augustine Steward and died in 1580. Steward then married a widow named Sisley, whose son, Thomas Sisley, thus became the companion of Steward's other stepson Thomas Campian. In 1581 both the boys went up to Cambridge and resided at Peterhouse for four years, although neither of them seems to have graduated in any faculty. Vivian points out that the study of medicine and the love of travel were much encouraged at Peterhouse at this period, and Campian's career may have been influenced by his experiences at Cambridge. In 1586 he was entered at Gray's Inn, and then a gap occurs in his history. Vivian quotes evidence to suggest that he took part in Lord Essex's expedition which landed at Dieppe in 1591 and laid siege to Rouen. About the year 1602 he first styled himself a Doctor of Physic, though it is not known from what university he received such a degree. It is certain, however, that he had studied medicine meanwhile, and in 1601 Philip Rosseter refers to his music and poetry as being the 'superfluous blossoms of his deeper studies,' meaning medicine. It was Campian's medical qualifications that gained him admission to the Tower of London to visit his friend Sir Thomas Monson, accused of complicity in the murder of Sir Thomas Overbury. Campian died in London and was buried at St. Dunstan's, Fleet Street. By his will (Commissary Court of London, 1619/20 fol. 358) he bequeathed all his property, amounting to about £20, to his friend and fellow-lutenist Philip Rosseter, expressing a wish 'that it had bin farr more.'

The first of Campian's musical publications was 'A Booke of Ayres, Set foorth to be song to the Lute Orpherian, and Base Violl.' This volume appeared in 1601 and differs from all the other books of Airs by the English lutenists in that it really consists of two separate books, one by Campian and one by Rosseter, each of which is as large as those of the rest of the series. The words, as well as the music, of Campian's half of this book, were undoubtedly written by him; but there is nothing whatever beyond internal evidence to prove that Campian wrote the words of Rosseter's songs, although it has been very generally assumed that he did so.

This Book of Airs was followed by four more, issued in pairs, but the dates of their publication are not known. The dates 1610 for the first and second books, and 1612 for the third and fourth, were given by Rimbault in *Bibliotheca madrigaliana*, and these dates were quoted in *D.N.B. sub* Campian. But the first and second books cannot have been published before 1612, seeing that the death of Prince Henry is alluded to in them. The third and fourth books contain a reference to the Overbury Plot, and they cannot therefore have been published before Sir Thomas Monson's innocence was established in 1617. These five books contain altogether more than a hundred solo songs. Of these five books the third and fourth as well as the Rosseter set were written exclusively as solo songs; the first and second books were 'framed at first for one voyce' but later adapted for alternative performance by combined voices. They are reprinted in English School of Lutenist Song-writers (*q.v.*). Campian takes very high rank in this remarkable school of English song-writers which flourished at the beginning of the 17th century. Unlike Dowland he seldom attempted anything in the way of elaborate structure, but was content to work on a simple scheme, treating the verbal phrases of his lyrics line by line; again, his accompaniments have not the importance or independence which Dowland so often gave to them; yet he exhibits first-rate genius in the freedom and beauty, as well as in the aptness, of his musical phrases. This statement will be made clear by reference to two phrases, one of five bars and another of seven, in 'Follow your saint'; and again to the phrasing of 'My sweetest Lesbia.' The setting of 'The cypress curtain of the night is spread' is marked by a very fine poetic imagination.

Campian also wrote several masques, both words and music, for special occasions; among these were a masque performed at Whitehall on Twelfth Night, 1607, in honour of the marriage of Sir James Hay, for two of the songs in which he wrote the music; a masque performed in 1613 at the Banqueting House in Whitehall on the marriage of Frederick, the Elector Palatine, with the Princess Elizabeth, for one song of which he wrote the music. In the same year he wrote a masque for an entertainment in

honour of Queen Anne (wife of James I.), given at Caversham House by Lord Knollys; and another masque by him was performed at Whitehall on St. Stephen's Night on the occasion of the marriage of the Earl of Somerset and Lady Frances Howard. The 'Mask of Flowers' presented in honour of this same marriage by the gentlemen of Gray's Inn has been wrongly attributed to Campian. But Vivian attributes to him the authorship of the words of 'The Ayres that were sung and played at Brougham Castle . . . in the King's Entertainment' in 1618, the music of which was composed by George Mason and John Earsden. Campian also wrote the words for a set of 'Songs of Mourning, Bewailing the untimely death of Prince Henry,' in 1613; but the music for these was written by John Cooper (Coprario). Like Dowland, Campian wrote no madrigals, as far as is known, nor is any church music by him known to exist. He wrote a Latin epigram in praise of Dowland which was printed in Dowland's 'First Book of Airs,' and he paid a similar compliment to Alphonso Ferrabosco the younger in 1609. Several of his lyrics were set to music by contemporary composers of madrigals and lute-songs.

Campian was not only a composer, he also held individual views about the theory of music just as he did about the theory of poetry. The same mind which had expressed itself in *Observations on the Art of English Poesie* (1602), produced in 1613 a treatise entitled *A New Way of making Fowre parts in Counterpoint, by a most familiar, and infallible Rule.* This treatise included discourses on the subject of keys, concords and closes. A second edition of this work, with annotations by Christopher Sympson, was published in 1655 under the title of *The Art of Setting or Composing of Musick in Parts by a most familiar and easie Rule*; and another edition appeared in 1664 in which the word 'Setting' in the title was replaced by 'Descant.' The later editions were appended to the first eight or nine editions of Playford's *Introduction to the Skill of Musick.*

With Campian's exclusively poetical works we are not primarily concerned in this article, but it may be briefly stated that his first poems to appear in print were those included anonymously in the surreptitious edition of Sidney's *Astrophel and Stella* in 1591. In 1595 he produced a volume of Latin epigrams and elegiacs under the title of *Poemata*, which was reprinted in 1619. His *Observations on the Art of English Poesie* (1602) has already been mentioned, but it should be added that in this treatise he condemned 'the vulgar and unartificial custom of riming.' It was fortunate for English literature and music alike that he was forced from this position by the fact that lyric verse was so far better suited to the requirements of musical treatment than lines constructed upon the rules of classical prosody.

List of Campian's musical works:

1. A Book of Airs to be sung to the lute (published in conjunction with Rosseter). 1601.
2. The First and Second Books of Airs. (? 1613.)
3. The Third and Fourth Books of Airs. (? 1617.)
4. Songs for a Mask at the marriage of Sir James Hay. 1607.
5. Songs for a Mask at the marriage of Princess Elizabeth. 1613.
6. Songs for a Mask at Caversham House. 1613.
7. Songs for a Mask at the marriage of Robert, Earl of Somerset. 1613.
8. Three songs, dated 1596. Brit. Mus. Harl. MS. 6910.
9. A new way of making four parts in Counterpoint. 1613.

E. H. F.

CAMPIOLI, Antonio Gualandi, detto, born in Germany, of Italian parents. He learnt to sing in Italy and returned to Germany, where his lovely contralto voice created a great sensation.

He appeared first at Berlin in 1708. In 1720 he was engaged at Wolfenbüttel. Six years later he visited Hamburg; and, after travelling in Germany and Holland, returned to Dresden, where he sang in Hasse's 'Cleofida' in 1731. At the end of that year he appeared in London in Handel's 'Poro.' On Feb. 19, 1732, he sang in the new opera 'Sosarme,' and in revivals of 'Flavio' and 'Acis,' all by the same master. He passed the remainder of his life in Italy. J. M.

CAMPIONI, Carlo Antonio (*b.* Leghorn, *c.* 1720).[1] Burney who visited him in Italy says that about 1764 he was Kapellmeister of the Grand Duke of Tuscany at Florence and had previously lived at Leghorn. On a pirated edition of op. 4, he is called chamber musician of the King of Sardinia, but on op. 7 he appears again in the service of the Grand Duke of Tuscany and Leghorn. On the MS. of the above-mentioned Requiem, dated Feb. 7, 1781, he styles himself, 'Maestro della camera e cappella reale e della Metropolit. e dell' Oratorio di S. Giovanni' (Florence). He wrote a great deal of church music which was greatly praised, but it was his chamber music, mostly published in London, which established his reputation here and in northern Europe. A list of his trio sonatas, duets, violin and harpsichord sonatas is given in *Q.-L.* He possessed one of the richest collections of 16th- and 17th-century vocal compositions. E. v. d. S.

CAMPO, Conrado del (*b.* Madrid, Oct. 28, 1879), Spanish composer, professor of harmony at the Conservatoire of Madrid, where he once obtained the first prize for composition. His compositions include:

Choral works: 'La Dama de Amboto' (1902) and 'La Divina Comedia.' Symphonic poems: 'Ante las ruinas' (1900), 'Granada y Galicia.' Operas: 'Dies Iræ,' 'Los Amantes de Verona,' 'El Final de Don Alvaro,' 'La Flor del agua' (the last two in one act).

'El Avapies' was written in collaboration with Angel Barrios. His chamber music includes a violin sonata and 8 string quartets.

J. B. T.

[1] Fétis gives this date, but gives no authority, neither does *Q.-L.*, where he is called 'da Lorena,' which in conjunction with the fact that he called himself Campion on the MS. of the Requiem Mass dedicated to Maria Teresa, seems to point to his origin from Lorraine.

CAMPORESE, Violante (*b.* Rome, 1785; *d.* there, 1839), a soprano of particular excellence in the singing of Mozart. She belonged to a good family, and it was not until after her marriage to Giustiniani, an Italian nobleman, that she took up singing professionally. During an engagement at the private concerts of Napoleon in Paris she so profited by the lessons of Crescentini as to become an admirable artist. From Paris she went to Milan, where she sang at the Scala to crowded and enthusiastic houses. In 1817 she was engaged for the King's Theatre in London, and made her début on Jan. 11 in Cimarosa's 'Penelope.' She was not accustomed to the stage, and was therefore at first nervous and embarrassed, and made little effect. As Susanna in 'Le nozze di Figaro' she established her reputation, and this success was followed by another when she played Donna Anna in 'Don Giovanni.' In May she appeared as Agnese in Paer's opera of that name, taken from Mrs. Opie's 'Father and Daughter,' in which she delighted the critics by her pure and tasteful singing. In July 'La Clemenza di Tito' was given, Camporese sustaining the principal part of Sesto. Lord Mount-Edgcumbe declares that she gave more effect to it than Braham or Tramezzani. She sang also at the Ancient Music and Philharmonic concerts. After singing at Milan and at other places in Italy, she returned in 1821 to London, with an engagement for the season at a salary of £1550, with extra allowance for costumes, permission to sing at concerts, and her salary paid in advance. She sang, Mar. 10, in 'La Gazza ladra' with the greatest éclat; but, thinking she could succeed in comic parts still more than in tragic, she attempted Zerlina, but had the good sense not to repeat the experiment. In 1822 she was again engaged, and appeared in 'Le nozze di Figaro' and 'Otello'; and she sang also at the concerts at the Argyll Rooms. She appeared again at the King's Theatre in 1823, bringing out at her benefit Rossini's 'Riccardo e Zoraide,' in which opera she took her leave, Aug. 5. In 1824 she again returned; but her voice was worn, and she prudently retired to Rome; though we find her singing in Rossini's 'Aureliano' and other operas at Ancona, 1827. Two years later she came once more to London, and sang in concerts; but her voice was gone, and her performance was not successful. She had a public benefit concert, with guinea tickets, June 12. Ebers, while in Paris in the autumn of 1816, was introduced to Mme. Camporese at the house of Paer, and gives a good account of her voice, style and appearance. She possessed a fine-toned voice of more than two octaves, from *a* to *c‴*; but her best notes were from *c′* to *f″*. She 'cultivated a pure, chaste and expressive style, was a handsome and elegant woman of thirty-one with dark hair, eyes and complexion, a tall, slender figure, a fine Roman countenance full of tragic dignity, and features rather strongly marked.' J. M.

CAMPRA, André (*b.* Aix, Provence, baptized there Dec. 4, 1660; *d.* Versailles, June 29, 1744), famous opera composer, came of a Piedmontese family settled in Provence. He was educated in music through the precentorship of the church of St. Sauveur at Aix, under Guillaume Poitevin. He gave little promise of distinction until his 16th year,[1] when his talent made a sudden stride; and a motet, 5 voices, composed in his 17th year, 'Deus noster refugium et virtus,'[2] was much esteemed. As early as 1679 he is supposed to have filled the place of maître de musique in the cathedral of Toulon[3] though no documentary evidence of this is found. He was in the same position at Arles in 1681, and in 1683 at Toulouse, where he remained until his removal to Paris in 1694. His first post there was not the directorship of the music at the 'Maison professe des Jésuites,' as has been said without proof. He was appointed to the directorship at Notre Dame, replacing Jean Mignon, on June 21, 1694. His reputation as a composer would appear to have been already established, for we are told that crowds went to hear his motets there; but while thus employed, Campra was trying his hand at operatic writing, 'divertissements,' and other music for private fêtes, and discovering where his own special talent lay. In 1697 he produced his first dramatic work, 'L'Europe galante' (opera-ballet), performed Oct. 24, 1697, and this was followed in 1699 by an opera-ballet, 'Le Carnaval de Venise,' performed Feb. 28, 1699, but both these compositions appeared in his brother's name.[4] He was deterred from publishing them in his own name by fear of losing his valuable ecclesiastical appointment. On Oct. 13, 1700, however, he was released[5] from his church duties. 'Hésione,' 'tragédie,' the first dramatic production under his own name, appeared Dec. 21, 1700; and thenceforth for forty years his works held the stage with ever-growing popularity. His last work, 'Les Noces de Vénus,' 'divertissement,' came out in 1740. Honours and emoluments were freely bestowed on him: at a date not yet discovered he was made teacher and director of the pages at the Chapelle Royale, A. Philidor being one of his pupils, an appointment he held until his death; by a patent dated Dec. 15, 1718, the king granted him a pension of 500 livres, 'in

[4] Joseph Campra (baptized Aix, Sept. 10, 1662; *d.* Mar. 31, 1774), a double-bass player at the Opéra in 1699. He received a pension in 1727.—*Fétis.*
[5] A popular rhyme of the day:

Quand notre archevêque saura
L'auteur du nouvel opéra
M. Campra décampera.
Alleluia—

suggests that the true authorship of his operas had ceased to be a secret.

recognition of his merits as a dramatic composer, and as an incentive to continued composition for the Académie Royale de Musique.' In 1722 he was given the title of composer and director of music to the Prince de Conti, and in the same year he was nominated 'maître de la Chapelle Royale.'

Campra's historic place in French opera was between two composers whose eminence transcended his own; following Lully and preceding Rameau,[1] he appears as one of the most remarkable dramatic composers of this period. His works enjoyed a long career. 'L'Europe galante,' which brought him to the front, was performed until 1756. He shows himself there as an innovator; though this type of stage-piece was based on Colasse's 'Ballet des saisons' (1695), he brought it to such perfection that it became the model for all future 'opéras-ballets.' In 'Tancrède,' 'tragédie lyrique,' given Nov. 7, 1702, Campra rises to a very high level; it is a work full of warmth, life and genuine feeling, which was popular from its first appearance until its last performance in 1764.[2] He was, if anything, a too prolific composer, lacking the sobriety, the reserve which is characteristic of the best French music, but he had the pastoral inspiration so much in favour amongst his contemporaries. His music is vigorous, lively, of flexible contours; it is clad in original orchestral colour, whenever he applies the orchestra to dramatic expression. Campra contributed considerably to the progressive development of dramatic music in France. In his time the so-called 'spectacles coupés'—*i.e.* performances in one evening of favourite acts or scenes from different operas—were in special vogue. They attest the marked taste of the 18th-century public for variety, ingenuity and contrasted effects of the theatre. With Antoine Danchet the librettist of 'Hésione' and others, Campra adjusted airs taken from various ballets of Lully, a 'pasticcio' which, under the title of 'Fragments de Lully,' was very successful. The same result was obtained with 'Télémaque,' where he made use of fragments by Colasse, Desmarets, Charpentier, Marais, Rebel *père*.

The following is a list of his 'tragédies-lyriques,' and opéra-ballets[3]:

'L'Europe galante,' 1697 (with some pieces by Destouches); 'Carnaval de Venise,' 1699; 'Hésione,' 1700; 'Aréthuse,' 1701; 'Fragments de Lully,' 1702; 'Tancrède' 1702; 'Les Muses,' 1703; 'Iphigénie en Tauride,' 1704 (with Desmarets); 'Télémaque,' 1704; 'Alcine,' 1705; 'Le Triomphe de l'amour,' 1705; 'Hippodamie,' 1708; 'Les Fêtes vénitiennes,' 1710; an act of 'Laure et Pétrarque,' 1711[4]; 'Idoménée,' 1712; 'Les Amours de Mars et de Vénus,' 1712; 'Téléphe,' 1713; 'Camille,' 1717; 'Les Âges,' 1718; 'Le Jaloux trompé,' 1731; 'Achille et Déidamie,' 1735; an act of 'Silène et Bacchus,' performed Oct. 1722.

Besides these works, he wrote a pastoral 'Amaryllis' and 'divertissements' for court performance, thus:

'Vénus' (fête galante), 1698; 'Le Destin du nouveau siècle,' a divertissement, for the year 1700; 'Les Fêtes de Corinthe,' 1717; 'La Fête de l'Île Adam,' 1722; 'Les Muses rassemblées par l'Amour,' 1723; 'Le Génie de la Bourgogne,' 1732; 'Les Noces de Vénus,' a score written in 1740, at the age of eighty,

as well as 3 books of cantatas, a Mass, 5 books of motets, and 2 books of Psalms. The once celebrated air 'La Furstemberg' was also by him (*Fétis*).

In the preface to the first book of his 'Cantates françoises' (1708) Campra states that he has attempted to combine the characteristics of the French and Italian schools, and the attention paid by him to the latter school is clearly indicated by the use of the orchestra and the more expressive treatment of the words, especially in the later collections, dated 1714 and 1728. Several editions of his motets were issued from 1695 (date of his first book[5]) to 1734. The 4th book was published in 1706, corrected 1734 with addition of instrumental accompaniment; and the 5th came out in 1720. In these compositions he paid special heed to the solo voice, and emancipated it from the declamatory phrases so prevalent in Lully's time. It is noteworthy that Campra was the first composer who introduced stringed instruments with the organ at Notre Dame. Among the more beautiful of his motets is the last of the third book: its brilliant and effective passages for the solo voice, and expression marks, such as *affettuoso*, etc., are tokens of its Italian character. A more solid piece of work is a very fine 'In convertendo' in 6 parts with accompaniment for strings in 5 parts. His Mass (4 voices) was published in 1700: his two books of 'Psaumes mis en musique à grand chœur,' issued 1737 and 1738, dedicated to the king, were performed at the Chapelle Royale and also at the Concert Spirituel. His musical production distinguishes itself, as in his other works, by a melodic strain full of charm and ease, influenced by an Italian current. In that, and also for his skilful instrumentation and knowledge of the concerted style, he may indeed be placed above Lully.

CANALI (Canale), Floriano (*b.* 1575; *d.* 1603). From the title-pages of Canali's printed works it appears that he was organist of San Giovanni Evangelista in Brescia from 1581–1603.

If he was the Florian Canale, Bresciano, who wrote the medical treatise entitled *Dei secreti universali*, Venetia, 1640 (Bodl. Lib.), he was

[1] For Campra's high appreciation of Rameau, see Rameau.

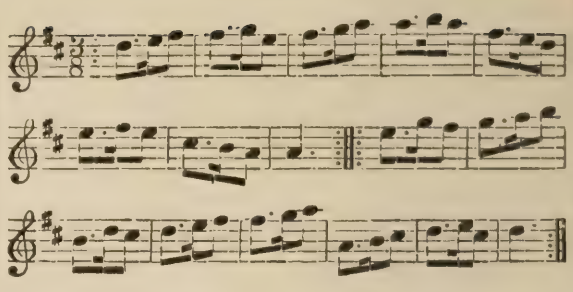
[2] This opera partly owed its great success to the circumstance that the heroine (Clorinde) was taken by a contralto (Mlle. Maupin) for the first time since the foundation of the French opera.

[3] Of these 'L'Europe galante,' 'Les Fêtes vénitiennes,' and 'Tancrède' have been reprinted in *Les Chefs-d'œuvre de l'opéra français* (edition Michaëlis).

[4] According to Fétis.

[5] Dedicated to M. de Lagrange Trianon, Abbé de St. Sever.

still alive in 1612, for the dedication is signed *Da Brescia*, 12 *Decembre* 1612, *Florian Canale.* E. van der Straeten, who holds that Canali came from the Netherlands, says that the literal Flemish translation of the Latin name Canalis is *Pype*; many Flemish families have this name. He suggests that *Buys* (*c.* 1554) has a name that can be translated *Canalis*, although Buys's identity is more probably connected with that of Buus (*c.* 1541–51). List of works:

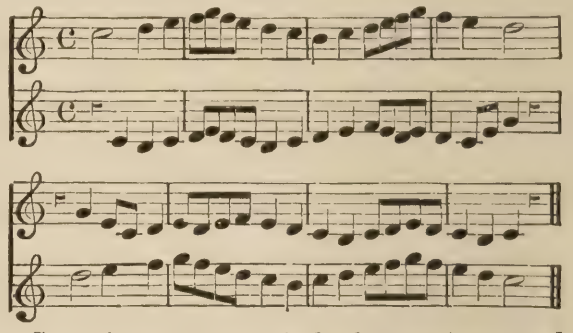


1. Psalmodia, 5 et 4 voc. Venetia. Scotto, 1575. In the Berlin Königl. Bibl. 5 partbooks (Eitner).
2. Sacrae cantiones quae vulgo motecta dicuntur, quatuor vocibus decantandae: nec non quibuscunque Organorum sonis accommodatae, a Floriano Canali Brixiano organa modulante, nunc primum in lucem editae. Brixiae apud Vincentium Sabbium, 1581. In the Bologna Liceo Musicale 4 partbooks 4to. In the Dedication, written from Bologna, Canali calls these compositions his 'first-fruits (Parisini).
3. Missae Introitus, ac motecta quatuor vocibus nec non quibuscunque organorum sonis accommodatae, a D. Floriano Canali Brix. organa modulante, nunc primum in lucem editae. Brixiae, apud Thomam Bozzolam, 1588. In the British Museum, 4 partbooks, 4to, pp. 30.
4. Canzoni da sonare a quattro et otto voci di D. Floriano Canale da Brescia organista. Libro primo. In Venetia appresso Giacomo Vincenti, 1600. In the Augsburg Bibl. 4 partbooks, 4to; 17 canzoni a 4 voci, 2 a 8 voci (Schletterer).
5. Canzonette a tre voci di D. Floriano Canale da Bressa organista. Primo libro. Venetia, Giacomo Vincenti, 1601. In the Cassel Ständisches Landesbibl. 3 partbooks, 8vo, pp. 29 (Israël).
6. Sacrae Cantiones—5 voc. Venetia. Vincenti, 1602. In the Bischöfliches Privatbibl. Regensburg, 22 compositions (Eitner).
7. Sacrae cantiones sex vocibus concinendae, tum viva voce, tum instrumentis cuiusuis generis cantatu accommodissimae, a D. Floriano Canali in ecclesia Divi Joannis Evangelistae de Brixia organista, noviter compositae. Liber primus. Venetiis apud Jacobum Vincentium, 1603. In the Bologna Liceo Musicale, 6 partbooks, 4to (Parisini).

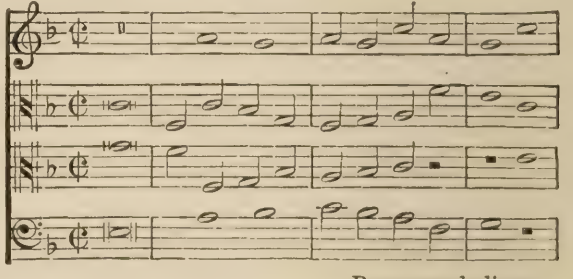
In the collection 'Promptuarii musici, sacras harmonias sive motetas v. vi. vii. et viii. vocum' Abrahamo Schadaeo, 1611, are two compositions, No. 14 'Quem vidistis pastores' 2nd part 'Dicite quidnam vidistis?' and No. 50 'Ego vos elegi de mundo,' each headed 'Floriani Canali a 6.' A MS. of the former in lute tablature is in the Bibl. Rudolfina der Königl. Ritteracademie at Liegnitz (Pfudel and Eitner). A manuscript score ('Cantiones sacrae diversorum auctorum') of 'La Balzana a 8 parti, una canzona da sonare,' in two movements (see Torchi's *Musica instrumentale* for music), is in the Bologna Liceo Mus. Some of the music is given by Torchi in the *Rivista Musicale Italiana* for 1897, p. 601, and in his *Musica istrumentale in Italia*, 1901, p. 22. C. S.

CANARIE (Canaries), a now antiquated dance, probably of Spanish origin. Thoinot Arbeau in his *Orchésographie* gives the origin, and also the tablature of this dance, which was incorporated by Lully into some of his operas.

It is a species of gigue, usually in 3–8 or 6–8 time (sometimes 6–16 time according to J. J. Rousseau, *Dictionary of Music*), the distinctive peculiarity of which is that the first note of the bar is almost always dotted. In this respect it resembles the Loure, but differs from it in its tempo, the Canarie being quick [1] and the Loure somewhat slow. It always begins on the first beat of the bar, and consists of two short periods, each repeated. Specimens occur in a quartet by Arbeau (1589) and one by Negri (1604), and in Purcell's 'Dioclesian,' from which we quote:

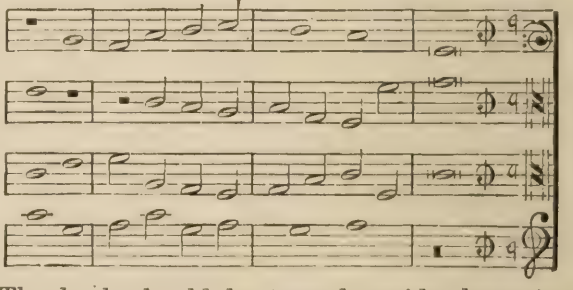


[1] G. Muffat, *Florilegium primum*, 1695.



F. L. Schubert (*Die Tanzmusik*) gives a specimen of the 17th century in 6–8 time. One in 3–4 time is found in the second 'ordre' of the first book of Couperin's 'Pièces de clavecin.' E. P., with addns.

CANCINEO, see Michel Angelo.



CANCRIZANS (Ger. *Krebsweis*). This is a name given to canons by retrogression, on account of their *crab-like* motion—from the Latin word *cancer*, a crab. An example (from A. Andre's *Lehrbuch der Tonsetzkunst*) will best explain their construction.

Sometimes a canon is both cancrizans and by contrary motion—'Rétrograde-inverse,' of which we give an example from Fétis's *Traité du contrepoint et de la fugue.*

Renversez le livre.

The book should be turned upside down to show the retrograde and inverse structure.

F. A. G. O.

CANDEILLE, (1) Pierre Joseph (*b.* Estaires, Dec. 8, 1744; *d.* Chantilly, Apr. 24, 1827),

French opera composer. He went to Paris at an early age, and became a singer at the Royal Academy of Music there. His first work for the theatre was a divertissement which was produced at the Comédie Française in 1778, but his most successful venture was his music for 'Castor and Pollux.' Two choruses and an air from Rameau's music to the same libretto were retained, and the new version received 130 performances between 1791 (the date of its first production) and 1798, and was revived again in 1814. He was also employed writing ballet and pantomime music and incidental numbers for other works, but was very unfortunate with his later operas as the majority of them were accepted for production at the Paris Opéra and elsewhere, but, at various stages in the negotiations, were rejected. (See *Fétis.*) J. MK.

(2) AMÉLIE JULIE (*b.* Paris, July 31, 1767; *d.* there, Feb. 4, 1834), singer, actress, composer, and daughter of the above, was trained by her father, and at the age of 13 appeared in public as singer, harpist, pianist and composer. In 1782 she made a very successful début at the Paris Opéra in Gluck's 'Iphigénie en Aulide,' and the next year in Piccinni's 'Atys.' She then retired, rather unaccountably, from the Opéra, but in 1785 returned to the Théâtre Français, and in 1792 brought out, with much success, 'La Belle Fermière,' in which she was responsible for both the words and the music and sang the principal part herself. The next year her comic opera 'Bathilde' was performed. In 1796 she visited Holland and Belgium, where (1798) she married a carriage-builder named Simons. In 1808 her comic opera 'Ida' was produced at the Théâtre Français. This was a complete failure, but she met with some success as a composer of popular songs, romances and piano pieces. During the Hundred Days she came to London and gave some successful concerts under the direction of Viotti and Cramer. On her return to Paris she received a pension from Louis XVIII., and in 1821 married a mediocre painter called Périé. Besides her songs and operas already mentioned, she also published some instrumental chamber music. (See *Fétis.*) J. MK.

CANDIDO, SERAFINO DA MONTE REALE, a 16th-century Italian composer. 'Delle mascherate musicali . . . parte I. (e II.) a 3, 4, e 5 voc.', Venice 1571; 'Concenti nuovi,' Venice, 1572 (*Q.-L.*).

CANGE, CHARLES DUFRESNE, SIEUR DU (*b.* Amiens, Dec. 18, 1610; *d.* Paris, Oct. 23, 1688), wrote, *Glossarium ad scriptores mediae et infimae latinitatis*, Paris, 1678 (several editions; latest, 1882–87), a standard work on mediæval musical terms and instruments.

CANIS (*alias* DE HOND), CORNEILLE (*b.* probably Antwerp; *d.* Prague, Feb. 15, *c.* 1561), a 16th-century Netherlandish composer. In 1547 he succeeded Gombert as master of the children in the Netherlandish chapel of Charles V., and in 1548 he was master of the chapel. Receiving prebends of St. Bavon, Ghent, and two abbeys, he still held his office as master of the chapel in 1553; according to information given in *Q.-L.* he died on the above date, as chaplain to the Emperor Ferdinand. Burney, iv. 309, gives a masterly chanson in canon by Canis. For a list of his still extant compositions see *Q.-L.* and *Fétis.*

CANNABICH, (1) CHRISTIAN (*b.* Mannheim, 1731; *d.* Frankfort, Feb. 22, 1798), violin-player, composer and renowned orchestral conductor.

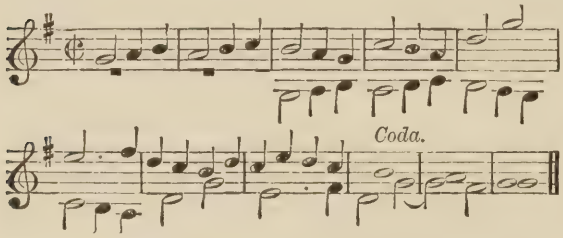
He was a pupil first of his father, Martin Friedrich Cannabich, a flute-player, and afterwards of STAMITZ (*q.v.*). The Elector afterwards sent him to Italy, where he studied composition under Jommelli In 1759 he was appointed leader, in 1775 conductor, of the orchestra at Mannheim: and in 1778 followed the Elector in the same capacity to Munich.

Cannabich was a very good violinist and a fair composer, but all contemporary writers on musical matters lay most stress on his great skill as a leader and conductor. Mozart in many letters to his father praises the perfect ensemble in the orchestral performances at Mannheim, and speaks of Cannabich as the best conductor he ever met with. Burney, in his *Present State*, etc. (*Germany*), is not less hearty in his praise, and Schubart, a German writer of considerable authority, reports upon the Mannheim orchestra in the flowery style of the period as follows:

'Here the *forte* is a thunder, the *crescendo* a cataract, the *diminuendo* a crystal streamlet babbling away into the far distance, the *piano* a breeze of spring.'

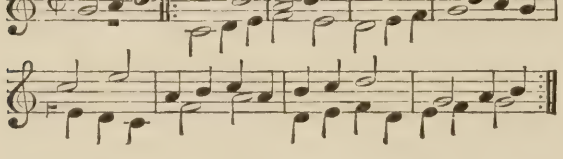
Cannabich composed a number of operas, which were not particularly successful. Some ballets, symphonies and quartets were very popular, and a thematic catalogue of the symphonies is given in *D.D.T.* III. i.

His son (2) CARL (*b.* Mannheim, 1769; *d.* Munich, Mar. 3, 1806) was also a good violinist and composer. After having for some time conducted the opera at Frankfort he succeeded his father in 1800 as conductor at Munich. His compositions are numerous but of no importance Lists of the works of both father and son are given in *Q.-L.* P. D.



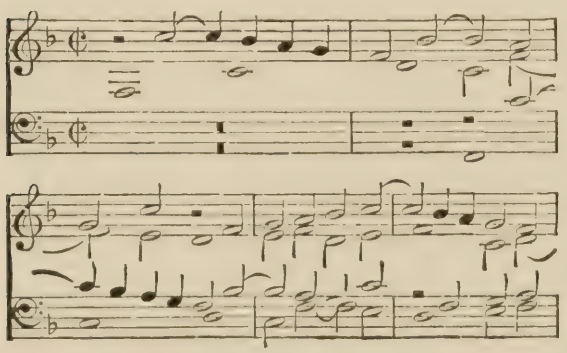
BIBL.—HEINRICH HOFER, *Die Instrumentalwerke von Christian Cannabich*, Munich Dissertation, 1921.

CANNICIARI, DON POMPEO (*d.* Dec. 29, 1744), a composer of the Roman School. He was appointed maestro at S. Maria Maggiore in 1709, and retained that post until his death. He amassed a large musical library, and bequeathed it to the Basilica in the service of which his manhood had been passed. This collection, along with the other contents of

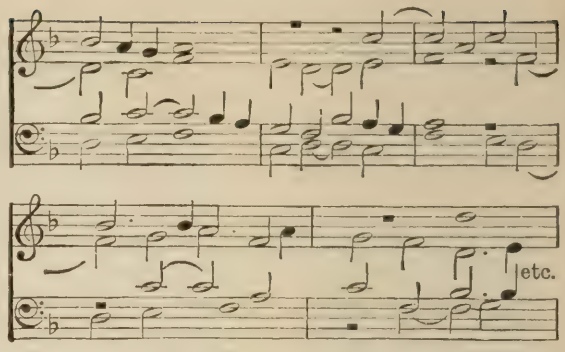


S. Maria, has been dispersed, and much of it has probably been lost. In the Santini library there were various pieces by Canniciari, and a list of the works that still exist is given in *Q.-L.* He wrote music for 2 and for 4 choirs. An Ave Maria for 4 voices is given by Proske, *Musica divina*, ii. No. 10. E. H. P.

CANON. This is the strictest and most regular species of IMITATION (*q.v.*). The word is derived from the Greek *κανών*, a rule or standard. A canon, therefore, is a composition written strictly according to rule. The principle of a canon is that one voice begins a melody, which melody is imitated precisely, note for note, and (generally) interval for interval, by some other voice, either at the same or a different pitch, beginning a few beats later and thus as it were running after the leader. For this reason the parts have been called 'Dux' and 'Comes,' or 'Antecedens' and 'Consequens.'



The following is a simple example of a canon 'two in one at the octave,' *i.e.* for two voices an octave apart, and both singing one and the same melody.



By means of a coda (or tail-piece) this canon is brought to a conclusion. But many canons lead back to the beginning, and thus become 'circular' or 'infinite.' The following is a specimen of this kind, which is 'two in one at the fifth below,' or 'canon ad hypodiapente':

Sometimes two or more canons are simultaneously woven into one composition. The following, for instance (from Travers's Service, 1740), would be called a canon 'four in two.'

Byrd's 'Diliges Dominum,' for 8 v., consists of 4 canons all sung together, each voice singing the melody of its fellow reversed.

Often in a quartet there may be a canon between two of the voices, while the other two are free; or three voices may be in canon and the fourth part free, for example the Gloria Patri to Gibbons's 'Nunc dimittis' in F, in which the treble and alto are in canon while the tenor and bass are free. Again, there are canons by INVERSION, DIMINUTION, AUGMENTATION, or 'PER RECTE ET RETRO,' CANCRIZANS, etc. (*q.v.*).

The old writers often *indicated* canons by monograms, symbols or other devices, instead of writing them out in full (see INSCRIPTION). Indeed they went so far as to write their indications in the form of a cross, a hand or other shape, with enigmatical Latin inscriptions to indicate the solution. Such pieces were called 'enigmatical canons.' As compositions of this nature can only be regarded in the light of ingenious puzzles, bearing the same relation to music that a clever riddle does to poetry, it will be needless to give examples here—let it suffice to refer to those which are to be found in Fétis's admirable *Traité du contrepoint et de la fugue*, and in Marpurg's celebrated work on the same subjects.

The great masters were fond of the relaxation of these plays on notes. They occur often in Beethoven's letters, and the well-known allegretto scherzando of his eighth symphony originated in a canon to be sung at Maelzel's table. Köchel's Catalogue of Mozart's works contains 23 canons; that of Weber by Jähns, 8; and an interesting collection will be found in the Appendix to Spohr's *Autobiography*. The wonderfully expressive canons in Bach's '30 Variations' are far more than examples of mere ingenuity. Every third variation is a canon, and each successive canon is at the distance of an interval by one degree larger than the one before it. Nearly all the canons are in two parts upon a free bass, a few in contrary motion, and they proceed from a canon at the unison (No. 3) to a canon at the ninth (No. 27).

The word 'canon' is also applied, somewhat incorrectly, to a species of vocal composition called a ROUND (*q.v.*). F. A. G. O.

CANON, MINOR, see MINOR CANON.

CANTABILE, *i.e.* singable, a direction

placed against an instrumental phrase when it is to be 'sung.' Hence it becomes equivalent to *Legato*, as when J. S. Bach uses it on the title-page of his Three Part Inventions, offering them to aid the student *eine cantabile Art in spielen zu bekommen.*

CANTATA. The idea of reviving the declamation of tragedies after the manner of the ancients led to the invention of recitative, which is attributed to Caccini and Giacomo Peri about 1600. It was at first confined to the opera, but the desire to adapt it to music for the chamber soon led to the invention of the 'Cantata da camera,' which in its earliest form was simply a musical recitation of a short drama or story in verse by one person, without action, accompanied in the simplest manner by a single instrument.

The first change was the introduction of an air, repeated at different points in the course of the recited narrative; thus producing a primitive kind of rondo.

The cantata in this style was brought to perfection by the Italians of the 17th century, especially Carissimi. Such works are for one or two voices with accompaniment of a single instrument—lute, violoncello, harpsichord, etc. Shortly after his time the accompaniment took a much more elaborate form, and the violoncello parts to some of Alessandro Scarlatti's cantatas were so difficult that it was considered the mark of a very distinguished artist to be able to play them. Carissimi was the first to adopt this form of composition for church purposes. His cantate da chiesa, like those of his contemporaries, are only known by the first few words, so that it would answer no purpose to quote their names. One only is mentioned as having been suggested by a special event—the death of Mary Queen of Scots. Among his contemporaries the most famous cantata composers were Lotti, Astorga, Rossi, Marcello, Gasparini and Alessandro Scarlatti (*q.v.*) whose cantatas were extraordinarily numerous. One by Cesti, 'O cara libertà,' became especially famous. Specimens by most of these composers are quoted in Burney's *History*, and a collection of 26 by Carissimi was published in London at the end of the 18th century, apparently after Burney had finished his work. Twenty-six by Marcello for different voices with accompaniment of different instruments have also been published, and a great number for soprano and contralto with harpsichord accompaniment.

At the beginning of the 18th century cantatas of more extended form and various movements were written by Domenico Scarlatti and by Pergolese. The most famous was the 'Orfeo ed Euridice,' which the latter composed in his last illness. Handel also wrote cantatas after the same fashion, for single voices, both with accompaniments of strings and oboes, and with thorough-bass for clavier, and many of these have been published. But they are not well known; and since his time this form of cantata has quite fallen into disuse. The name Cantata is given to a composition by Mozart for three solo voices, chorus and orchestra in three movements, composed in or about 1783 (Köchel, No. 429).

The Church-Cantata is a much more extended kind of composition, and of these Handel also wrote some, mostly in his younger days, and at present little known (see Chrysander's *Händel*, i.). The greatest and most valuable examples are the Kirchenkantaten of Sebastian Bach (see Bach Gesellschaft).

Among his predecessors, his uncles Michael and Johann Christoph, and the great organist Buxtehude, were composers of cantatas of this kind, and Bach certainly adopted the form of his own from them at first, both as regards the distribution of the numbers and the words. With them as with him the words were sometimes complete religious songs, but they were also frequently taken from promiscuous sources, passages from the Bible and verses from hymns and religious songs being strung together, with an underlying fixed idea to keep them bound into a complete whole. In some cases they are mystical, in others they are of a prayerful character, and of course many are hymns of praise. In many there is a clear dramatic element, and in this form the dialogue between Christ and the soul is not uncommon, as in the well-known 'Ich hatte viel Bekümmerniss,' and in 'Gottes Zeit,' 'Wachet auf,' and 'Selig ist der Mann,' of J. S. Bach. The treatment of the subject is often very beautiful apart from the diction, and expresses a tender, touching kind of poetry of religion which is of the purest and most affecting character, and found in Bach's hands the most perfect possible expression in music.

The dramatic element points to the relationship of the Kirchenkantaten to the Italian Cantate da camera, cultivated in Italy from the beginning of the 17th century. In composing the earlier cantatas, Buxtehude and Bach's uncles do not seem to have had this connexion very clearly in view, neither does it appear obviously in the earlier examples of John Sebastian. But from the year 1712 Bach began writing music to cantatas by a theologian and poet named Neumeister (a man of some importance in relation to church music), who wrote poems called Cantatas for all the great Festivals and Sundays of the year, following avowedly the dramatic manner of the Italians. Of Bach's contemporaries, Telemann preceded him slightly in setting these cantatas, as a collection with his music was published in Gotha in 1711.[1]

As regards the music, the form was extremely

[1] Spitta's *J. S. Bach*, Engl. tr., i. 40, 446; ii. 348, etc.

variable. In a great number of cases the work opened with a chorus, which in Bach's hands assumed gigantic proportions. This was followed by a series of recitatives, airs, ariosos, duets or other kinds of solo music, and in the greatest number of instances ended with a simple Choral. In some cases the work opens with an aria or duet, and in others there are several choruses interspersed in the work, and occasionally they form the bulk of the whole. In one somewhat singular instance (viz. 'Ich will den Kreuzstab gerne tragen') the cantata consists of two long arias, and two recitatives, and an adagio, all for a bass voice, and ends with a chorale for 4 voices. In 'Ich habe genug' the bass voice is alone throughout, and there is no chorale. It is evident that the works were constructed with reference to the particular resources at the disposal of the composer for performance; and in this respect the band varied as much as the musical form of the work. Sometimes the organ was accompanied by strings alone, at others by a considerable orchestra of strings, wood, and brass. With developed resources the cantata occasionally began, both in the older and the later forms, with an instrumental introduction which was called irrespectively a symphony or a sonata or sonatina, and evidently had some relationship to the instrumental Sonate da chiesa which were common in Italian churches. This practice appears to have been more universal before Bach's time than appears from his works, as instrumental introductions to cantatas with him are the exception.

Beside the church cantatas of Bach, both choral and solo, must be placed the secular cantatas, which, especially the Italian 'Amore traditore,' are clearly the lineal descendants of the Cantata da camera. Bach's use of the description, 'Dramma per musica,' to certain of them, of which 'Der Streit zwischen Phöbus und Pan' is the most famous, marks them as his nearest approach to actual opera, and this one has been put on the stage in modern times.

The word Cantata is now used to supply an obvious want. The idea as well as the use of 'Cantate da camera' having quite gone out of fashion, the term is applied to choral works of some dimensions—either sacred and in the manner of an oratorio, but too short to be dignified with that title, or secular, as a lyric drama or story adapted to music, but not intended to be acted.

CANTATE DOMINO is the name by which the 98th Psalm is known in its place as an alternative to the Magnificat in the evening service of the English Church (see Service).

CANTE HONDO (Jondo), the name given to a form of song traditional in the provinces of Andalucía, in Southern Spain. *Hondo* (or in its aspirated, provincial form, *jondo*) signifies deep or profound; it is the song of the tragic sense of life—tragic, because by the beginning of the last century it had come down to being the music made in prisons and *prostíbulos*. Towards the end of the 19th century *cante hondo*, besides having come down in the world, began to undergo a musical change. It had always been a special favourite with gypsies; it was now taken up by those who affected gypsy manners, while about the time of the first production of 'Carmen' (1875) the conditions under which it was sung began to be studied and imitated. It was then called *flamenco* (*lit.* 'flamingo' or 'Flemish'), and was applied to the music made by those who affected gypsy manners or wore brightly coloured 'flamingo' garments. *Cante flamenco* is the modernised, 'gypsified' form of *cante hondo*, still composed and sung all over Andalucía. Entertainments of the kind are common in descriptions of Spanish life in the thirties of the last century, but the word *flamenco* seems not to have been applied to them until later. The earliest mention of *cante flamenco* in print is in 1871: the first published collection of *cantes flamencos* (words only) is dated 1881.

The characteristics of *cante hondo* are as follows: The song usually begins with a long vocalise on the syllables *Ay!* or *Lelí!* There is a deliberate use of intervals unknown to modern Western music, though their use depends on well-established principle or practice—the alteration by less than a semitone of certain notes of the scale, but never the tonic or dominant. The melody is generally restricted to the compass of a sixth; a note is apt to be repeated to the point of becoming an obsession; there are rich and complicated ornamental flourishes which, however, are only employed at certain instants, to underline the emotion of the words; and there are the cries of *Olé, olé*, thrown in by the audience to express their approval and encourage the performers. To these might be added the prevalence of conjunct motion, and the almost invariable suggestion, both in the voice part and the guitar accompaniment, of the Phrygian cadence, A—G—F—E.

It is easy to dismiss these melodies as being 'oriental,' and it is true that modern Arab music has certain features in common with Southern Spanish popular music as it is performed to-day. Yet the 'orientalism' of *cante jondo* is mostly on the surface, and lies in the manner of performance rather than in

the music itself. Moreover, the more modern forms (*flamenco*) sound more 'oriental' than the older, traditional *cante hondo*, the oldest, the *siguiriya gitana*, less so than any.

Many forms of the songs have existed, and are distinguished by the number of lines in the verse, by the run of the melody and by the rhythm and general shape of the introduction and accompaniment played on the guitar. (The singer very rarely accompanies himself or herself.) *Cante hondo* includes *siguiriyas, polos*, and other old forms; *soleares* are on the border line between *hondo* and *flamenco*; while descendants of the FANDANGO such as *granadinas, rondeñas* and *malagueñas* are definitely *flamenco*. The *saetas* and *carceleras*, sung during the halts of a procession, are unaccompanied. The festival of *Cante hondo* held at Granada in 1922 under the direction of MANUEL DE FALLA proved that these songs, if properly performed, are not merely curious and interesting survivals, but living pieces of music, charged with all the emotion which tradition, memory, surroundings and pure musical beauty can give them.

J. B. T.

CANTERBURY PILGRIMS, THE. Opera in 3 acts, words by Gilbert à Beckett; music by Stanford; produced (Carl Rosa Company), Drury Lane, Apr. 28, 1884. M.

CANTICLE (Lat. *canticum*) is the name now generally given to certain hymns taken from the Bible, and sung in the services of the Church, such as the Benedictus, the Benedicite, the Magnificat and the Nunc Dimittis. In the Book of Common Prayer the word is used for the Benedicite only (see SERVICE).

C. H. H. P.

CANTIGA, see ALFONSO EL SABIO.

CANTILENA, etymologically, 'a little song.' This term was formerly applied to the upper or solo part of a concerted song; also to a small cantata or any short piece for one voice. At the present time the term is employed in instrumental music to denote a flowing melodious phrase of a vocal character; or to indicate the smooth rendering of slow expressive passages. It is also sometimes used as a substitute for *Cantabile*. A. H. W.

CANTIONES SACRAE, the name given to numerous collections of Latin motets. Famous English examples are those of TALLIS and BYRD (*q.v.*). See also MOTET.

CANTO (Lat. *cantus*; Fr. *chant*). With the Italians this word has a great variety of acceptations, *e.g.* music, instrumental as well as vocal; the *motif*, subject or leading idea, of a musical composition; the art and practice of singing; a section of a poem, etc. etc. Technically canto is more generally understood to represent that part of a concerted piece to which the melody is assigned. Thence canto (voice as well as part) has become synonymous with soprano. The canto clef is the C clef on the first line. J. H.

CANTOR (Mediæval Lat. *primicerius, cantor*, etc.; Eng. *precentor, chanter*; Fr. *chantre, grand chantre*).

(1) A title given in cathedral, collegiate and monastic churches, to the official in charge of the music. In the Norman constitution of the cathedrals, introduced at the end of the 11th century, the chanter was the second in rank of the four principal dignitaries of the church; and gradually the greater part of the secular cathedrals of the old foundation conformed themselves to this model; the most notable exception was the Church of St. David's, where there was no dean until the middle of the 18th century, and the chanter was the chief dignitary. Normally as second only to the dean, in choir, he had the first return-stall, on the north side of the choir, facing the altar; for which reason the north side is called *Cantoris*, or the chanter's side, as contrasted with *Decani*, the dean's side. In monastic corporations the position was different, for the chanter there was merely one of the officers nominated by the abbot or prior, and had no particular precedence. Consequently in cathedrals that were formerly monastic, but are now governed by new statutes dating back only to the Reformation, the chanter or precentor is not a canon, but a minor canon.

In some few cathedrals in this country the familiar term, chanter, is still retained; and his deputy, the succentor, is called the subchanter. The Latinised form, cantor, is always used in Germany; but in France chantre is frequently exchanged for maître de chapelle.

The duty of the precentor is to direct the performance of the service in general, and particularly to superintend the intoning of the psalms and canticles. It is from the second of these functions that he derived his title. In modern times his duty is to exercise a general supervision over the singing, to select the music, and to take care that it is properly performed. In consequence of the high rank attached to the preferment in cathedrals of the old foundation, it is generally given to one whose qualifications for the position are other than musical, and the duties are entrusted to the succentor. Even where this is not the case, and in the new foundations where the precentor is usually chosen for his musical capacities, the importance of the office is increasingly modified by the growing importance of the organist—an official of more modern origin.

(2) A name given to the principal of a college of church music.

We hear of the foundation of such a college, in Rome, as early as the 4th century; but it was not until the Pontificate of St. Gregory the Great (590–604) that the Roman Schola Cantorum

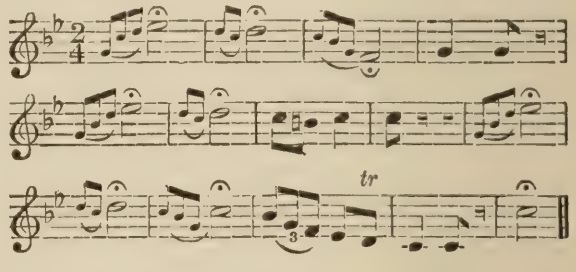
began to exercise any very serious influence upon the development of church music. A sketch of its subsequent history will be found under SISTINE CHOIR. Charlemagne founded singing schools in many parts of his dominions, and watched over them with paternal care. Every such school was governed by its own special primicerius, or cantor; and, as the curriculum was not confined to singing but comprised a complete course of instruction in music, the influence of a learned cantor was very great (see SONG-SCHOOL).

W. S. R.; addns. and corrections by W. H. F.

CANTORIS. In the antiphonal singing in English cathedrals the words *Decani* and *Cantoris* are used to signify respectively the side of the dean's stall (the south side) and that of the cantor or precentor (the north side). Though these positions were not invariably those occupied by these officers in all churches, the names derived from them are used without variation for the south and north sides respectively. In the pre-Reformation times the distinction was not of the same importance, for each side of the choir in turn took precedence; consequently the important thing to know was not which was *Cantoris* and which *Decani*, but which of the two sides was at any given moment 'The Choir Side.' In some cathedrals the custom survives still of giving such precedence to each of the sides in turn, and of putting up a notice to show which side is for the time being 'The Choir Side.' W. H. F.

CANTUS FICTUS, see MUSICA FICTA.

CANTUS FIRMUS (Ital. *canto fermo*), fixed song or melody, is a term commonly used (in England the Italian form is most frequent) of a melody adopted by a composer for contrapuntal treatment. The style dates from the early polyphony of the 12th century (see DESCANT, MOTET), when portions of Liturgical plainsong were thus adopted. The term seems to have been promulgated more by the writers of theoretic treatises than by composers, and thus it became specially associated with the academic exercise in COUNTERPOINT (*q.v.*). C.



CANZONA (Ital.), the name of a particular variety of lyric poetry in the Italian style, and of Provençal origin, which closely resembled the madrigal. Musically, the term is applied (1) to the setting to music of the words of a canzona, whether for one or more voices, the only difference between the canzona and the madrigal being that the former was less strict in style; (2) to an instrumental piece written in more or less strict imitation. Many examples are to be found in Purcell's sonatas of 3 and 4 parts. An example of such a canzona, by Sebastian Bach, may be found in the *B.-G.*, vol. xxxviii. p. 126. (3) It appears to have been used as an equivalent for sonata for a piece of several movements; and also as a mark of time, in place of allegro (Brossard).

E. P.

BIBL.—F. VATIELLI, *Canzonieri musicali del 500.* *R.M.I.*, 1921.

CANZONET (Ital. *canzonetta*) originally meant a smaller form of canzona. Morley in 1597 published 'Canzonets or little short songs to four voices; selected out of the best and approved Italian authors.' Afterwards the word was used for vocal soli of some length in more than one movement; nowadays it is applied to short songs, generally of a light character. W. H. C.

CAOINE (pronounced *Keen*) is the death song as practised in Ireland from prehistoric times till the close of the 19th century, though in remote districts it may still be heard at wakes and funerals. The dead person is addressed, and is reminded of all his (or her) friends, and all his praises are sung: 'Alas! why did you die? Thou who wast noble, learned, charitable, valiant. Oh! why did you die?' etc. Each set of 'Keeners' varied the melody according to their taste and musical knowledge, led by the chief 'Keener.' The cries were raised by the first and second semi-chorus at the conclusion of each verse of the *caoine*. These 'Keeners' were mostly professional mourning women, known as *mna caointe* (alluded to by Stanihurst in 1584), and were generally four in number. It may be of interest to give a traditional *caoine*, known as 'The Wail of the Banshee':

W. H. G. F.

CAPECE, ALESSANDRO (*b.* Terano in the Abruzzi, late 16th cent.), calls himself 'Romano.' He was maestro di cappella at Ferrara Cathedral and held a similar position at Rieti *c.* 1616. He wrote 3 books of motets, 3 books of madrigals, sacri concerti, etc. (*Fétis*; *Q.-L.*).

CAPET, LUCIEN (*b.* Paris, Jan. 8, 1873), is a violinist, a composer and a well-known teacher. He was a pupil at the Paris Conservatoire of J. P. Maurin (himself a disciple of Baillot and of Habeneck), and obtained in 1893 the first prize by unanimous decision.

Nominated in 1896 the solo violin of the Lamoureux Concerts, he left them soon to enter upon a brilliant career as a soloist and quartet player (cf. CAPET QUARTET). He toured Europe with increasing success without giving up his teaching. After a short time at the Bordeaux Conservatoire he was nominated to the Paris

Conservatoire in 1907 (chamber music and violin). His teaching brought him renown, especially in bowing, in which he brought the technique to as great a perfection as Sevčik (*q.v.*) did the technique of the left hand.

As a performer he is distinguished by faithfulness, by the purity of his tone and the fine style of his playing, though this at times interferes with the force of his expression.

As a composer he has published a string quartet, a sonata for violin and piano, studies for the violin, a poem for voice and orchestra, 'Devant la mer.' Numerous compositions are still in manuscript, amongst them a sacred quartet and a psalm for solo, chorus and orchestra, etc.

Bibl.—Lucien Capet, *La Technique supérieure de l'archet* (Paris, Sénart, 1916). Contains a detailed biographical notice of Capet.

M. P.

CAPET QUARTET. Lucien Capet formed his first quartet after leaving the Conservatoire with Giron, Henri Casadesus and Furet, the latter soon replaced by Carcanade. This first party lasted from 1893–99. In 1903 a new quartet was formed with Tourret, H. Casadesus (afterwards Bailly) and Louis Hasselmans. After studying for a year together this group appeared in public for the first time, giving a complete performance of Beethoven's 17 quartets. It repeated them frequently, together with the most beautiful works of the classical and modern repertory until 1910 when the players dispersed. In that year it was reformed with Hewitt, Henri Casadesus and Marcel Casadesus (the latter killed in action Oct. 1914). After the war the Capet Quartet consisted of Hewitt, Benoît and Delobelle. With these various partners Capet has always given performances which are models of technical ability and musical style.

He had the honour, in 1911, of representing the art of French quartet playing at the Beethoven Festival at Bonn; he has won praise in every capital in Europe. M. P.

CAPILUPI, Geminiano (*b.* Modena, late 16th cent.; *d.* there, Aug. 13, 1616), pupil of Orazio Vecchi, whom he succeeded as maestro di cappella at Modena Cathedral, Oct. 7, 1604.

Canzonette *a* 3 v., Venice, 1597 (German ed. 1606); 2 books madrigals, 1599 and 1608; 1 book motets, 1603; concerti eccles., 8, 9, 12, 13 voc., 1621; single songs in various collective volumes (*Q.-L.*; *Fétis*).

CAPLET, André (*b.* Havre, Nov. 23, 1878; *d.* Paris, Apr. 22, 1925), began his musical studies at Havre under M. H. Woolett. In 1896 he went to the Conservatoire, Paris, where he was the pupil successively of Xavier Leroux, Paul Vidal and Lenepveu. Obtaining the Grand Prix de Rome in 1901 he was enabled to visit Italy, and Germany where he followed assiduously the performances at Berlin and Dresden of Mottl and of Nikisch. He early revealed his vocation as a conductor. At 18 he was assistant to Édouard Colonne; at 21 director of music at the Odéon Theatre. But it was especially after he left the Villa Medici that Caplet developed his extraordinary gifts of orchestral comprehension and vitality. Debussy attracted him and they became intimate. The author of 'Pelléas' considered Caplet a born conductor and chose him in 1911 to undertake the performances at the Châtelet, in unforgettable conditions, of 'Le Martyre de St. Sébastien.' From 1910–14 Caplet was director of music and conductor at Boston, where he succeeded in introducing to the public a great number of notable works by modern French composers. In 1912 he conducted 'Pelléas et Mélisande' at Covent Garden. In 1922, at Paris, Caplet conducted several times at the Pasdeloup Concerts; and in 1925 he revived at the Opéra, 'Le Triomphe de l'amour' by Lully, of which he had revised the orchestration.

Amongst contemporary composers Caplet ranked as one who employed modern harmony and instrumental colour with authority and taste. He was a sensitive poet before all else. He understood how to create a dreamlike or magic atmosphere in the most spontaneous way, from the first notes of any of his works. A refined artist, he always succeeded in expressing the most delicate fugitive shades of thought and feeling with an exquisite choice of expression.

The works of Caplet comprise many for voice and piano: 'Prières,' 'Le Vieux Coffret,' 'La Croix douloureuse,' 'Trois Fables de La Fontaine,' 'Cinq Ballades françaises,' 'Hymne à la naissance du matin,' etc.; most of these are orchestrated.

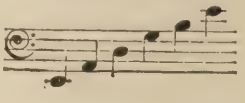
Chamber music is represented by a piano and wind quintet (1898), a 'Suite persane' for ten wind instruments (1900), a 'Conte fantastique' (after Edgar Allen Poe) for harp and string quartet. His latest works are: 'Sonata di chiesa' for violin and organ (1924), and a Suite de Pièces for piano, 4 hands, dedicated 'aux enfants bien sages' (1925).

Orchestral mnsic: 'La Masque de la mort rouge' (symphonic study) (Colonne Concerts, 1909); 'La Marche héroïque de la Ve Division' (1917); 'Épiphanie,' a musical 'fresco' for solo violoncello and orchestra (1923). Transcriptions for orchestra of 'Coin des enfants,' 'Pagodes,' and piano arrangements of 'La Mer' and 'Martyre de St. Sébastien' (Debussy) must also be mentioned. His choral works and religious music, or with a religious tendency, hold a special place in contemporary composition because of their mystical sentiment and dramatic force. 'Le Pie Jésu' (1919) is for solo voice with organ accompaniment; 'Les Inscriptions champêtres' (1914) and the Mass for three voices (1922) are written simply *a cappella*; 'Le Miroir de Jésus' (1923) consists of string quintet, harp and three voices, which alike

accompany the solo voice. It is in these works that Caplet probably reached the summit of his art. He died very suddenly of lung disease, the result of wounds and gas-poisoning during the war, at a time when he was nearing his zenith both as conductor and composer. He left various unfinished works.

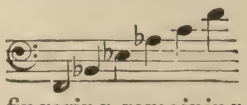
BIBL.—YVES-MARC, *André Caplet* (*Monde musicale*, Paris, 1924).

F. R[L].



CAPOCCI, the name of two distinguished organists of St. John Lateran in Rome. The father, (1) GAETANO (*b.* Rome, Oct. 16, 1811 ; *d.* Jan. 11, 1898), began his musical studies under Sante Pascoli, organist of St. Peter's ; and was afterwards a pupil of Valentino Fioravanti and Francesco Cianciarelli for counterpoint and composition.

In 1831 he received the diploma of organist, and in 1833 that of composer from the academy of St. Cecilia. His first post as organist was in S. Maria in Vallicella ; in 1839 he was appointed to S. Maria Maggiore ; in 1855 he was made maestro direttore of the Cappella Pia of the Lateran, a post which he occupied till his death. His sacred compositions were constantly in use at the Lateran, where his Responsori for Holy Week were universally admired ; seven published volumes, containing 42 compositions such as masses, motets, psalms, etc., represent only a comparatively small proportion of his works, which are remarkable for their faithful adherence to the ecclesiastical style of the great Italian school, and for melodies of a flowing, facile type.



His son, (2) FILIPPO (*b.* Rome, May 11, 1840 ; *d.* there, July 1911), began the study of music at 9 years old, learning the organ and harmony from his father. In 1861 he gained a diploma as a pianist in the academy of St. Cecilia. He was appointed first organist at the Lateran in 1873, and succeeded his father as maestro direttore di cappella in 1898. A visit of Alexandre Guilmant to Rome in 1880 inspired Capocci to devote himself to the highest branch of organ technique, and he shortly became famous for the excellent taste of his arrangement of stops, for the admirable clearness of his playing, and for his musicianly phrasing. A great number of compositions for the organ have been published in London, Leipzig and Paris. They include 5 sonatas and 11 books of original pieces. M.

CAPORALE, ANDREA (*d.* London, *c.* 1756), an Italian violoncello-player who arrived in London in 1734, and excited much attention. In 1740 he joined Handel's opera-band. He was playing in Dublin from Sept. 1754 to June 1755, and again in 1757, when his performance there on Feb. 3 is noted in Faulkner's Journal (No. 3107). He was more famous for tone and expression than for execution. Eighteen solos for his instrument were published in London (*Q.-L.*).

CAPO TASTO (Ital., from *capo*, 'head,' and *tasto*, 'touch,' or 'tie' ; Ger. *Capotaster*, sometimes *capo d' astro*), in Italian the nut of a lute or guitar, but also the general name of a contrivance for shortening the vibratory lengths of strings, thus forming a second nut, expressed in French by 'barre,' to facilitate change of key. The construction of a capo tasto varies according to the stringing and shape of the neck of the instrument it is to be applied to, but it may be described as a narrow rail of hard wood, metal or ivory, clothed with leather or cloth, and often fastened by a screw upon the fret from which it is intended to mark off the new length of the strings. There are other but less simple ways of attaching it. The technical advantage of using a capo tasto is that higher shifts can be more easily obtained ; and the use of open strings, upon which the possibility of chords often depends, is facilitated in a higher compass than that natural to the instrument. How much transposition may be facilitated by it is thus shown by Max Albert in Mendel's *Lexicon*. Take a guitar the strings of which are tuned in real notes

the basis of sharp keys : with a capo tasto on the first semitone fret we have

the basis of flat keys, the fingering remaining the same. With bow instruments the capo tasto is no longer used, but it was formerly with those having frets, as the viol da gamba. The use of the thumb as a bridge to the violoncello serves as a capo tasto, as also, in principle, the pedal action of the harp. A. J. H.

CAPOUL, JOSEPH VICTOR AMÉDÉE (*b.* Toulouse, Feb. 27, 1839 ; *d.* Pujaudran du Gers, Feb. 18, 1924), a popular opera tenor, who entered the Paris Conservatoire in 1859, studied singing there under Révial, and opéra-comique under Mocker, and in 1861 gained the first prize in the latter class. On Aug. 26 of the last-named year he made his début at the Opéra-Comique as Daniel in 'Le Châlet' (Adam), and next played Tonio in 'La Fille du Régiment.' He became a great favourite and remained at that theatre until 1870. His best new parts were, 1868, Gaston in 'Le Premier Jour de bonheur' (Auber) ; 1869, the hero in 'Vert-Vert' (Offenbach). In 1872 he sang in Italian opera at the Ventadour ; in 1876 in French at the Gaieté, as the hero in 'Paul et Virginie' (Massé) ; and in 1878 at the Ventadour as Romeo in 'Les Amants de Vérone' (Marquis D'Ivry), both new operas.

On June 1, 1871, Capoul first appeared in England at the Italian Opera, Drury Lane, as Faust, with success, and sang there every season (except 1874) until 1875. From 1875–79 he sang at Covent Garden as Paul, Romeo, etc. He sang several seasons in North America both

in Italian and French opéra-bouffe. His last new part in Paris (Château d'Eau) was on Oct. 13, 1888, as the hero in Godard's 'Jocelyn,' the libretto by himself and Armand Silvestre. In 1892 he taught singing at the National Conservatory, New York (Pratt and Boyd). From 1897–1905 he was stage manager at the Opéra, Paris. A. C.; addns. M. L. P.

CAPPA, Goffredo (*b. circa* 1647; *d.* Saluzzo, Aug. 6, 1717), a famous luthier, pupil of Nicolo Amati.

CAPRICCIETTO (Ital., dimin. of *capriccio*), a capriccio, on a small scale, and of no great development. E. P.

CAPRICCIO (Ital.; Fr. *caprice*). (1) This name was originally given, according to Marpurg, to pieces written for the harpsichord in a fugued style, though not strict fugues. It was also sometimes applied to actual fugues, when written upon a lively subject; and the composition was consequently for the most part in quick notes. Examples of this kind of capriccio can be found in Handel's 'Third set of Lessons for the Harpsichord' (German Handel Society's edition, part 2), and in the second of Bach's 'Six Partitas.' Bach also uses the word as synonymous with 'fantasia,' *i.e.* a piece in a free form, in his 'Capriccio on the departure of a beloved brother.'

(2) In the middle of the 18th century the term was applied to exercises for stringed instruments, such as would now be called 'études,' in which one definite figure was carried through the composition. (3) Later the name was applied to a piece of music constructed either on original subjects, and frequently in a modified sonata- or rondo-form (as in Mendelssohn's 'Three Caprices,' op. 33, or Sterndale Bennett's Caprice in E), or to a brilliant transcription of one or more subjects by other composers. As examples of the latter kind may be named Heller's 'Caprice brillant sur la Truite de Schubert,' and Saint-Saëns's 'Caprice sur les Airs de ballet d'Alceste de Gluck.' The title 'Capriccio' is applied to many of the short pieces which form an important part of Brahms's later works. His Opp. 76 and 116 consist of 'Capricci' and 'Intermezzi,' the former name being applied to the more rapid movements, the latter to the slower. E. P.

CAPRIOLI (Caproli), Carlo, called 'il Violino,' a 17th-century Italian composer whom Mazarin brought to Paris, where his opera, 'Le nozze di Peleo et Teti,' was performed Apr. 14, 1654. The MS. of his oratorio, 'Davide prevaricante,' words by Orsini, 1683, is in the library of the Hofburg, Vienna, as well as some arias. Two songs of his are in Playford's 'Scelta di canzonette,' 1679. He is one of the originators of the cantata. E. v. d. S.

CAPRON, Nicolas (*b. circa* 1740; *d.* Paris, Sept. 14, 1784), violinist and composer. A pupil of Gaviniès, he made his début at about the age of 16 in the orchestra of the Opéra-Comique, and having appeared as soloist in the Concert Spirituel during 1761 he met with ever-increasing success. He married, June 22, 1769, Anne Soisson, a cousin of Piron the writer. He was a distinguished virtuoso, who was sometimes reproached with delighting in extreme difficulties.

Capron wrote a number of concertos, quartets, duos and sonatas. Only two works, out of all these productions, have been preserved, a 'Premier livre de sonates à violon seul et basse,' op. 1 (1768), and 'Six duos pour deux violons,' op. 3 (1777).

Bibl.—La Laurencie, *L'École française de violon*, ii. (1923), pp. 368-79. M. P.

CAPULETTI ED I MONTECCHI, see Romeo and Juliet.

CAPUZZI, Giuseppe Antonio (*b.* Brescia, 1753; *d.* Mar. 18, 1818), violinist and leader at S. Maria Maggiore, Bergamo; pupil of Tartini and Bertoni. He was violinist at St. Mark's, Venice, and came to London in 1796, where he met with great success and produced his ballet, 'La Villageoise.' He composed operas, cantatas, a considerable amount of chamber music and a sinfonia concertante (*Q.-L.*).

CARA, Marchetto (Marco) (*b.* Verona, late 15th cent.; *d.* Mantua, *c.* 1527). From 1495–1525 he was at the court of Mantua. He was a famous song composer (chiefly frottole) and lutenist. Aaron mentions him in the latter capacity in 1545.

CARACCIO, Giovanni (*b.* Bergamo, *circa* middle of 16th cent.; *d.* Rome, 1626), a church composer, at first a singer in the private choir of the Elector of Bavaria.

Having quitted this service he spent some years at Rome and at Venice, and then returned to his native place, where he was appointed maestro at the cathedral. He held this post for 23 years, when he migrated to Santa Maria Maggiore at Rome, remaining there until his death. He was one of those 14 composers of different nations who showed their appreciation of Palestrina's genius by dedicating to him a volume of Psalms to which each had contributed. His published works are:

Magnificat omnitonum, pars 1; Venice, 1581. Magnificat omnitonum, pars 2, Venice, 1582. Madrigali a 5 voci, lib. 1, Venice, 1583. Musica a 5 voci da sonare; *id.* 1585. Dialogo a 7 voci nel lib. 1 di Madrigali di Claudio da Correggio, Milan, 1588. Madrigali a 5 voci, lib. 2, Venice, 1589. Salmi di compieta con le antifone della Vergine, ed otto falsi bordoni a 5 voci, Venice, 1591. Salmi a cinque per tutti i vesperi dell' anno, con alcuni hymni, mottetti, e falsi bordoni accommodati ancora a voci di donne, Venice, 1593. Madrigali a 5 voci, lib. 4, Venice, 1594. Salmi a cinque; Venice, 1594. Madrigali a 5 voci, lib. 5, Venice, 1597. Canzoni francesi a quattro, Venice, 1597. Canzonette a tre, Venice, 1598. Madrigali a 5 voci, lib. 6, Venice, 1599. Messe per i defonti a quattro e cinque, con motetti, Milan, 1611.

Bergameno inserted some of Caraccio's work in his 'Parnassus musicus Ferdinandaeus,' 2-5 vocum; Venice, 1615. E. H. P.

CARADORI-ALLAN, Maria Caterina Rosalbina, *née* de Munck (*b.* Casa Palatina,

Milan, 1800; *d.* Surbiton, Oct. 15, 1865), the singer who sang the soprano part in the first performance of 'Elijah.'

Her father, the Baron de Munck, was an Alsatian, and had been a colonel in the French army. Mlle. de Munck's musical education was completed entirely by her mother, without assistance. Her father's death obliged her to avail herself of her gifts in order to support herself. Having attempted the stage in the course of a tour through France and part of Germany, she took her mother's family name of Caradori, and accepted an engagement in London in 1822. She made her début on Jan. 12 at the King's Theatre as Cherubino, and sang afterwards in 'La Clemenza di Tito,' 'Elisa e Claudio' and 'Corradino.' She continued engaged through 1823 and 1824; and in the latter year took her benefit in 'Don Giovanni.' In 1825 she sang in 'L' Adelina' of Generali, in Rossini's 'Pietro l' eremita,' and chose 'Così fan tutte' for her benefit; and at Velluti's début in 'Il crociato,' Mme. Caradori sang the first woman's part. On Mar. 21, 1825, she sang in Beethoven's ninth symphony on its production by the Philharmonic Society. In 1826 she sang in the 'Barbiere' and in 'Romeo e Giulietta' and took her benefit in 'Le Nozze,' as Susanna.

In 1834 she again appeared in opera, but it was in concerts that she now achieved her greatest success, and most prominently in the Festival in Westminster Abbey in this same year. During the carnival of 1830 she sang with success at Venice, but after 1835 she remained in England, singing at festivals and concerts. She sang the soprano part in the first performance of 'Elijah' at Birmingham, Aug. 26, 1846, when Mendelssohn's judgment of her performance was not so favourable as Lord Mount-Edgcumbe's (*Letters*, Aug. 31, 1846). There is a good portrait of Caradori in the character of Creusa in Mayr's 'Medea' by J. Hayter, lithographed by Hullmandel. Her voice, though not very powerful, was exceedingly sweet and flexible, and her style almost faultless. She had much knowledge of music, and sang with great delicacy and expression.

J. M.

CARAFA (DI COLOBRANO) MICHELE ENRICO (*b.* Naples, Nov. 17, 1787; *d.* Paris, July 26, 1872), a composer of operas who studied under Fazzi, Fenaroli and Ruggi, and in Paris under Cherubini.

His first opera was 'Il Fantasma.' So little, however, did Carafa feel his vocation that he entered the army, and became an officer in the bodyguard of Murat, then king of Naples. Like Henri Beyle (Stendhal) he made the campaign of Russia in 1812, and was decorated by Napoleon. After the Emperor's fall he left the army and embraced music as his profession. The first opera after this decision, 'Il vascello di occidente,' was produced at Naples in 1814, and was followed by a large number of others. 'Gabriele' (1818), 'Ifigenia,' 'Berenice,' etc. etc., were produced in Italy, but he was equally successful in Vienna and in Paris. In the latter city he made his début with 'Le Solitaire,' Aug. 17, 1822, which long remained extraordinarily popular. In 1827 he took up his residence in Paris, and brought out 'La Violette,' in Oct. 1828. 'La Fiancée de Lammermoor,' 'Masaniello' (Dec. 27, 1827), evidently written in competition with Auber's 'Muette' (Feb. 29, 1828), 'La Prison d'Édimbourg,' etc. These operas, and many others, were very popular, notwithstanding the immense counter attractions of Auber and Rossini. This they owe more to an easy flow of melody and natural unaffected instrumentation than to any original character, and in consequence they have now fallen into oblivion. As a composer for the pianoforte Carafa was almost equally the fashion, and at Cherubini's instance he was made professor of composition in the Conservatoire shortly after his arrival in Paris. In 1837 he was elected a member of the Académie des Beaux Arts.

The *Dictionnaire lyrique* of Félix Clément mentions no less than 35 of his operas. G.

'CARAMBA, LA' (MARIA ANTONIA FERNÁNDEZ) (*b.* Motril, Granada, 1751; *d.* Madrid, 1787), a celebrated Spanish singer, who first appeared in Madrid in comic operas and TONADILLAS in 1776. Her extraordinary success was due mainly to her beauty and spirit, and to her interpretations of the wild gypsy songs of Andalucía; she was especially notable for her manner of singing the prolonged *Ay!* with which most of them begin and end. A 'Tirana' and other songs sung by her are printed by Mitjana (*La Musique en Espagne*). In 1781 she retired from the stage and married a Frenchman. She soon left him, however. Her return to the theatre was made the subject of a *tonadilla*, 'El luto de Garrido por la muerte de la Caramba,' in which, after her death had been bewailed by the tenor (Garrido) in an aria worthy of Gluck, she appears to him wrapped in her mantilla, and convinces him that she is alive by her inimitable singing of a florid Andalucian melody. The nickname of 'La Caramba' was given to her from the enormous bow of brilliant colour which she began to wear in her hair about 1778. The word has been used ever since as a familiar euphemism to express considerable surprise. The best criticism on her art is perhaps that of the obituary sonnet: *Esa que muda fué mas elocuente, i.e.* She was more eloquent in silence than in song.

J. B. T.

CARCELERA, see SONG, subsection SPAIN (4).

CARDIFF MUSICAL FESTIVAL. The first musical festival in Cardiff took place in 1892 and the second in 1895. Both were under the direction of Sir Joseph Barnby. An interval of seven years then elapsed, followed by the festivals of 1902, 1904, 1907 and 1910, all conducted by Sir Frederick Cowen. The one planned for 1913 and postponed till the following year could not be given on account of the war. The programmes of these festivals followed the usual festival repertory, while as regards novelties special attention was given to the works of Welsh composers. Salient features are as follows :

1892. 'Golden Legend' (Sullivan), 'Dream of Jubal' (Mackenzie), 'Faust' (Berlioz), Stabat Mater (Dvořák), 'Blest Pair of Sirens' (Parry), 'Revenge' (Stanford), 'Saul of Tarsus' (Joseph Parry).
1895. Requiem (Verdi), 'Choral Symphony' (Beethoven), 'St. Francis' (E. Tinel), first time in England, 'The Bard' (Stanford), first performance, 'A Psalm of Life' (David Jenkins).
1902. 'Orpheus' (Gluck), 'Song of Destiny' (Brahms), Stabat Mater (Rossini), 'Samson and Delilah' (Saint-Saëns), 'Ruth' (Cowen), 'Flying Dutchman,' Acts 1 and 2, 'Les Béatitudes' (Franck), first time in England.
1904. 'Ève' (Massenet), 'Faust' (Schumann), Requiem (Verdi), 'Dream of Gerontius' (Elgar), 'The Desert' (David), 'Lohengrin,' Act 3, 'John Gilpin' (Cowen), 'Victory of St. Garmon' (Harry Evans).
1907. 'Omar Khayyam,' Part II. (Bantock), 'Phœbus and Pan' (Bach), 'A Vision of Life' (Parry), 'He giveth His Beloved Sleep' (Cowen), Mass in E flat (Schubert), 'Sir Patrick Spens' (Brewer), 'Romeo and Juliet' (Berlioz), 'Coming of Arthur' (David Evans), excerpt from 'Parsifal.'
1910. 'The Veil' (Cowen), 'The Sungod's Return' (Mackenzie), Requiem (Brahms), 'Pied Piper of Hamelin' (Parry), 'The Bard' (David Thomas), excerpts from 'Siegfried' and 'Götterdämmerung.'

N. C. G.

CARDON, (1) Louis (*b.* Paris, 1747 ; *d.* Russia, 1805), of Italian parentage, a harpist of great repute. On the outbreak of the Revolution he migrated to Russia. His *Art de jouer la harpe* (1805) was for long esteemed.

His brother (2) Pierre (*b.* Paris, 1751) was a singer and violoncello player. M. C. C.

CARDOSO, Cyriaco de (*b.* 1846 ; *d.* 1900), a Portuguese composer of comic operas, whose lively and graceful works have continued to hold the stage. J. B. T.

CARDOSO, Fr. Manuel (*b.* Fronteira no Alemtejo, 1569 ; *d.* Lisbon, Nov. 29, 1650), a celebrated Portuguese composer and organist. He took his mother's name, his father being called Francisco Vaz. He studied for the priesthood at the seminary of Evora, and was appointed choir-master of the cathedral there. In 1589 he became a Carmelite monk. His musical abilities procured him the esteem of the kings of both Spain and Portugal ; and John IV. visited him frequently, after his appointment as sub-prior and musical director of the Carmelite Monastery at Lisbon.

A contemporary Portuguese writer mentions Fr. Manuel Cardoso by the side of Morales, Guerrero and Josquin des Prés.

His printed works include :

1. Magnificats, 4 et 5 v. Lisbon : Peter Craesbeck, 1613.
2. Missae, 4, 5 et 6 v. Lisbon : Peter Craesbeck, 1625. (Evora, Cathedral.)
3. Missae, 4 et 6 v. . . . Liber Secundus. Lisbon : Peter Craesbeck, 1636.
4. Missae de Beata Virgine Maria, 4, 5 et 6 v. . . . Liber Tertius. Ad S. C. R. Majestatem Philippi quarti Hispaniarum Regis, ac novi orbis Imperatoris . . . Lisbon: Lawrence Craesbeck, 1636. (Evora, Bibl. Publ.)
5. Livro de varios motetes, Officio da Semana Santa e outras cousas . . . Lisbon : João Rodriques Impressor. Na officina de Lourenço de Anueres (*i.e.* Lawrence Craesbeck), 1648. (Lisbon, Cathedral.)

The MSS. mentioned in the Catalogue of the Library of King John IV. were destroyed in the Lisbon earthquake of 1755. They included two Christmas *villancicos* (with Spanish words), masses, psalms, Te Deum and Magnificat. A few others are preserved in the Cathedral at Lisbon.

Two motets are printed by Proske in Musica Divina ; and eight are mentioned in *Q.-L.* A Mass for 4 v., and an Agnus Dei exist in MS. in the Biblioteca de Coro at Seville. J. B. T.

CARDOSO, Manuel (*d.* before 1595), a Portuguese church musician, Archiprœcentor to John III. and Treasurer of the Cathedral of Leiria. He compiled a work containing the liturgical music sung in Holy Week, one of the earliest books of music printed in Portugal :

Passionarium juxta Capellæ Regis Lusitanæ consuetudinem ; accentos rationem integre observans. Per Emmanuelem Cardosum eiusdem Regis Capellæ Archiprœcentorem, & Leiriensis Ecclesiæ Thesaurarium.
Leiriæ. Excudebat Antonino à Mariz . . . Anno 1575.
(Lisbon, Bibl. Nac. ; Evora, Bibl. Publ.) J. B. T.

CARESANA, Cristoforo (*b.* Verudiano, 1655 ; *d.* Naples, *c.* 1730), an Italian musician of note. He settled in Naples in 1680, when he became organist to the royal chapel. He published motets, hymns and duetti da camera, and left many MSS. in the library at Naples. But his most famous work is his 'Solfeggi' (Naples, 1680), of which Choron published a new edition for use in the Conservatoire. M. C. C.

CARESTINI, Giovanni (*b.* Monte Filatrano, Ancona, *c.* 1705 ; *d.* shortly after 1758), one of the greatest of Italian singers.

At the age of 12 he went to Milan, where he gained the protection of the Cusani family, in gratitude to whom he assumed the name of Cusanino. His voice, at first a powerful clear soprano, afterwards changed to the fullest, finest and deepest contralto ever, perhaps, heard. His first appearance was at Rome, 1721, in the female part of Costanza in Bononcini's 'Griselda.' In 1723 he sang at Prague, at the coronation of Charles VI. as King of Bohemia. The following year he was at Mantua, and in 1725 sang for the first time at Venice in the 'Seleuco' of Zuccari, and in 1726 with Farinelli and Paita. In 1728 and 1730 he visited Rome, singing in Vinci's 'Alessandro nell' Indie' and 'Artaserse.' Owen Swiny, happening to be in Italy with Lord Boyne and Walpole, wrote to Colman from Bologna, on July 12, 1730, mentioning letters which he had received from Handel, and goes on to say :

'I find that Senesino or Carestini are desired at 1200 guineas each, if they are to be had. I am sure that Carestini is engaged at Milan, and has been so for many months past.'

Carestini made his début in London on Dec. 4, 1733, in 'Cajus Fabricius,' a pasticcio ; and his magnificent voice and style enabled

Handel to withstand the opposition, headed by Farinelli, at the other house. In 1734 he sang in 'Ariadne,' 'Pastor Fido,' 'Parnasso in Festa,' 'Otho,' 'Terpsichore,' 'Deborah' and 'Athaliah'; and the next season in 'Ariodante' and 'Alcina.' In the cast of the latter his name is spelt Carestino, as it is also by Colman. In 'Alcina' occurs the beautiful song 'Verdi prati,' which he sent back to the composer as not suited to him. Handel on this became furious, ran to the house of the singer, and addressed to him the following harangue:

'You tog! don't I know petter as yourseluf vaat es pest for you to sing? If you vill not sing all de song vaat I give you, I vill not pay you ein stiver.'[1]

In 1735 Carestini left England for Venice, and for twenty years after continued to enjoy the highest reputation on the Continent, singing at Berlin in 1750, 1754 and 1755. In 1755 ne was engaged at St. Petersburg, where he remained till 1758, when he quitted the stage, to retire to his native country. Quantz says: 'He had one of the strongest and most beautiful contralto voices, which extended from *d* to *g″*.' He was also perfect in passages which he executed with the chest-voice, according to the principles of the school of Bernacchi, and after the manner of Farinelli; in his ornaments he was bold and felicitous. He was also a very good actor; and his person was tall, handsome and commanding. There is a good mezzotint of him by J. Faber, engraved in 1735 from a picture by George Knapton, a fine impression of which is now rare. J. M.

CAREY, Francis Clive Savill (*b.* Sible Hedingham, Essex, May 30, 1883), a baritone singer whose activities have included English folk-song collection, the production of operas at the 'Old Vic,' original composition, and a prominent part in founding the sextet known as the English Singers (*q.v.*).

Carey was educated at Sherborne, Clare College, Cambridge, and the R.C.M. At the last-named his masters were Stanford for composition and James H. Ley for singing. Subsequently he studied singing with Jean de Reszke at Nice in periodic visits taken in intervals of his professional career. Carey made his first London appearance in a recital (June 19, 1907) which he gave at Aeolian Hall, where he made an immediate mark both by his unusual choice of songs and his individual way of singing them. He took charge of the stage production, himself playing Papageno in 'The Magic Flute' at Cambridge (Dec. 1911), (see Dent), and this was the beginning of a considerable amount of work in special operatic performances which in England help to fill the blanks left by the few existing operatic companies of the fully professional kind. The war caused a break in Carey's musical activities. After it he took part in the performances at Glastonbury (see Boughton), produced 'Figaro' (playing the name part) and 'The Magic Flute' (playing Papageno) at the 'Old Vic' (1920), and 'Don Giovanni' (1921). At this time his incidental music to two plays, *The Blue Lagoon* and *The Wonderful Visit*, was heard simultaneously in London theatres. He taught singing at the R.C.M., and toured in England and on the Continent with the English Singers. In 1924 he went to Australia as director of the singing school in the Conservatoire of Adelaide. C.

CAREY, (1) Henry (*b. circa* 1690; *d.* Clerkenwell, Oct. 4, 1743), composer and dramatist, was a reputed natural son of George Savile, Marquis of Halifax.

His first music-master was a German named Olaus Westeinson Linnert, and he subsequently received instruction from Thomas Roseingrave and Geminiani. In 1715 he wrote and composed the music for the farce of 'The Contrivances; or, More Ways than One,' produced at Drury Lane Theatre, Aug. 9 in that year. His next production was a farce, 'Hanging and Marriage; or, The Dead Man's Wedding,' performed Mar. 15, 1722, at Lincoln's Inn Fields Theatre. In 1728 he set to music the songs in Vanbrugh and Cibber's comedy 'The Provoked Husband.' He next wrote the operas of 'Amelia' (the music by Lampe), Haymarket Theatre, 1732, and 'Teraminta,' music by John Christopher Smith, Lincoln's Inn Fields Theatre, Oct. 20, 1732. Each of these pieces was described as 'a New English Opera after the Italian manner.' On Dec. 2, 1732, Carey produced at Drury Lane Theatre a ballad opera called 'Betty; or, The Country Bumpkins.' In 1733 he wrote and composed a musical entertainment called 'Cephalus and Procris,' produced at Drury Lane Theatre with a pantomime interlude entitled 'Harlequin Volgi.' On Feb. 22, 1734, he produced at the Haymarket Theatre 'The most Tragical Tragedy that ever was Tragedized by any Company of Tragedians, called Chrononhotonthologos'; a burlesque of the bombast and fustian prevalent among some of the dramatists of the day, and especially of their partiality for tautological expressions. In 1735 he produced a ballad-opera, 'A Wonder; or, the Honest Yorkshireman,' Lincoln's Inn Fields Theatre, one night only, July 11, 1735, transferred to the Haymarket and Goodman's Fields Theatres later in the same year under its second title. On Oct. 26, 1737, Carey's burlesque-opera 'The Dragon of Wantley,' a satire on the Italian opera of the day, the music by Lampe, was produced at Covent Garden Theatre with great success. In the next year the author and composer produced a sequel, 'Margery; or, A Worse Plague than the Dragon' (a title afterwards changed to 'The Dragoness'), Covent Garden Theatre, Dec. 9, 1738. In

[1] Burney.

1739, on the breaking out of the war with Spain, Carey wrote and composed a musical interlude called 'Nancy; or, The Parting Lovers,' which was brought out at Drury Lane Theatre and revived at Covent Garden Theatre, with alterations in 1755 (on the prospect of a war) under the name of 'The Press Gang; or, Love in Low Life,' and frequently brought forward on similar occasions under the title of 'True Blue.' In the latter part of his life Carey collected his principal dramatic pieces, and published them in 1743 by subscription in a quarto volume.

In 1713 Carey published a small volume of his poems. This he afterwards enlarged and published by subscription in 1729.

The songs and cantatas written and composed by Carey were very numerous. In the early part of his career he issued his songs in half-sheet form, employing Thomas Cross to engrave them with the music. A book of cantatas appeared in 1724, and in 1732 he published 'Six Cantatas'; in 1737, under the title of

'The Musical Century, in One hundred English Ballads on various subjects and occasions, adapted to several characters and incidents in Human Life, and calculated for innocent conversation, mirth and instruction,'

there appeared two folio volumes of songs written and composed by himself, to the first of which his portrait is prefixed. A second edition appeared in 1740, and a third in 1743.

It has been generally said that he died by his own hand, but this seems doubtful. He died at his house in Great Warner Street. Sir John Hawkins thus estimates Carey's abilities:

'As a musician Carey seems to have been one of the first of the lowest rank; and as a poet the last of that class of which D'Urfey was the first, with this difference, that in all the songs and poems written by him on wine, love, and such kinds of subjects, he seems to have manifested an inviolable regard for decency and good manners.'

Carey's posthumous son, (2) GEORGE SAVILE CAREY (1743–1807), inherited much of his father's talent. He became an actor, but not succeeding he contrived, by giving entertainments of singing, recitation and imitations, to earn a precarious living for about forty years. In the latter part of his life he claimed for his father the composition of 'GOD SAVE THE KING' (*q.v.*), and the claim occupied much attention for some time. G. S. Carey's daughter, Anne, was the mother of Edmund Kean, the tragedian. W. H. H.; addns. F. K.

CARILLON (1), a chromatic set of bells, hung 'dead' or 'fixed' in a tower—from three to four octaves in compass—played by means of a clavier (console) arranged like the manuals and pedals of an organ, or automatically by a clockwork mechanism (see CHIMES). Carillon is a French word derived from the mediæval Latin *quadrilionem*, a quaternary, because carillons were, in the first instance, sounded on four bells.

Carillon was originally the melody played, and is connected with the French *clarine*, a little bell. The word is also connected with the Italian *quadriglio* or *quadrille*, a popular dance in the 16th century, the music for which was probably played on bells. Carillons are very ancient. The Chinese seem to have anticipated their possibilities thousands of years ago. From MSS. of the 10th and 12th centuries details are obtained as to the disposition of nine notes to the octave. At first the bells were small, and played by a performer who tapped them with a hammer suited to the purpose. In Europe the perfecting of the art of bell-founding and the making of carillons took place during the 15th, 16th, 17th and 18th centuries. The great bell-founders responsible for this were the brothers HEMONY (*q.v.*), the many members of the VAN DEN GHEYN family (*q.v.*), and later DUMERY (*q.v.*). Dunkerque had a carillon in 1437, Alost 1487, Antwerp 1540, and Bruges 1675.

In Belgium, Holland and Northern France there are some 130 carillons of importance, all made during the past four centuries. This shows the great popularity of the carillon art during that period. (See *PLATE XIII.*).

The carillon is truly the most democratic of all musical instruments. Rich and poor alike share its enjoyment. In many instances a whole city constitutes the audience. The people of the Netherlands probably know their folk-music better than any others, and this is in a great measure due to the fact that the workman at his labour hears the melodies from the carillon almost every hour of the day. On all particular occasions it is the duty of the official carillonneur to play for a stated time, and his programme always includes examples of songs and tunes of local and of national interest. As carillon music is written in two, three or more parts it is obvious that when bells are used in combination they must be absolutely accurate as to tune, both individually and collectively.

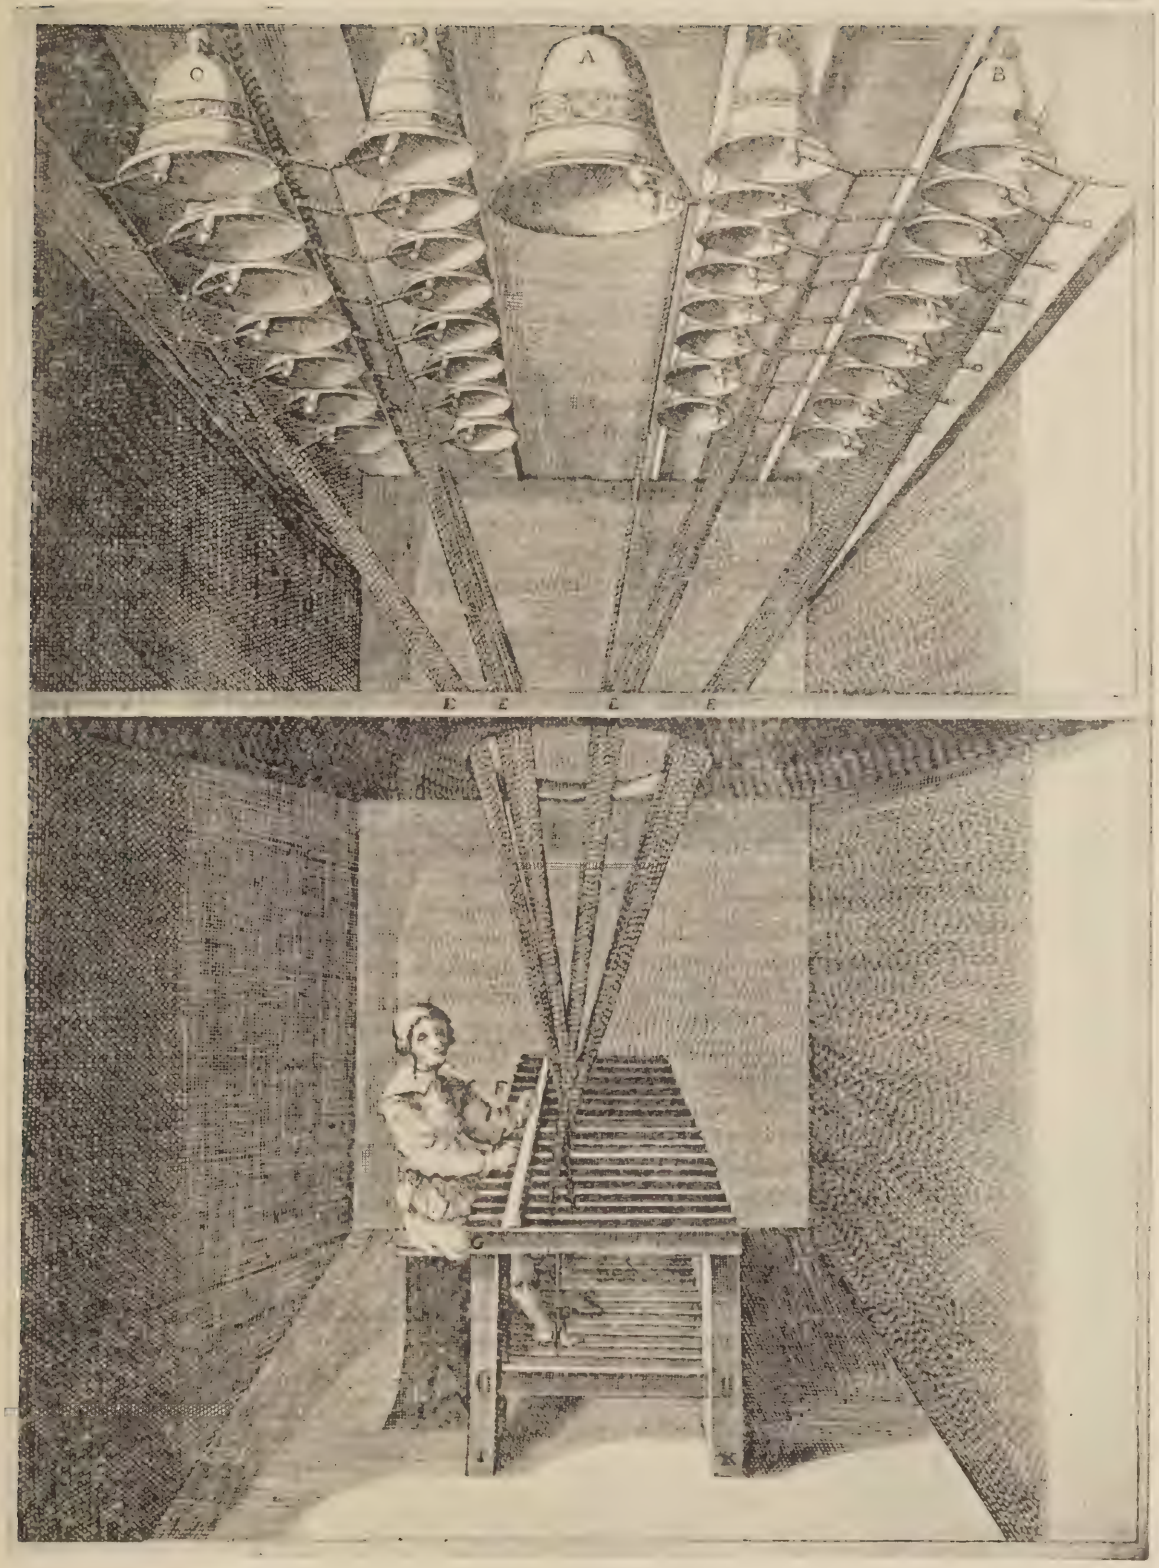
The following table of the comparative weights of bells for ringing and carillon use shows where differences occur on account of the necessary variation of the construction scale.

For Carillons.			For Ringing.		
	Cwt.	Qrs.	Note.	Cwt.	Qrs.
1	1	2	G	6	0
2	2	0	F	6	1
3	2	2	E	6	2
4	3	2	D	7	1
5	5	0	C	8	0
6	6	0	B	9	0
7	8	2	A	11	0
8	11	3	G	13	0
9	16	0	F	17	0
10	20	2	E	20	2
11	28	0	D	28	0
12	40	0	C	40	0

Disposition of the Bells.—It is of the utmost importance that the bells shall be arranged as compactly as possible in the tower —giving the small ones the most advantageous position with reference to the egress of the sound. The large bells easily assert themselves. These considerations are necessary in order to ensure the proper effect of the instrument as a whole and also to facilitate *direct* action work to connect the keys with the bell clappers, thus giving the player the greatest possible control over the amount of tone produced. In general the disposition of the bells in Belgian carillons is much better than that of Dutch carillons, although at Ghent is one of the worst possible, the largest bells being placed at the top of the tower ! In Holland the practice of hanging the bells in the openings of the tower close to the outside is to be deprecated, because the listener only hears satisfactorily the bells nearest to him, and the action work which this method necessitates does not give so much control in the manipulation of the keys.

The Clavier.—The keys are of oak and are round, $\frac{3}{4}$ in. in diameter. The upper row, representing the black notes of the pianoforte keyboard, project $3\frac{1}{2}$ in. ; the lower, corresponding to the white notes, project $6\frac{1}{2}$ in. The keys are far enough apart to allow the player to manipulate each key without fear of touching those next to it. The pedals, $1\frac{1}{2}$ octaves in compass, are connected with the clavier, so that the lower notes in many instances can be played by both manuals and pedals. The pedals add much to the resources of the instrument. The keys are struck with the closed hand (not fist as so frequently stated), the little finger being protected with a leather covering to prevent injury when playing. Sometimes the whole hand or half of it is covered with a kind of glove of leather or other material, but whatever is used is to protect the fingers and hand. As the leverage of the key has to overcome the resistance of the clapper weight, and as the amount of tone produced by the player depends entirely upon the amount of force with which the key is struck, it will be understood that strength as well as celerity and skill are requirements of the carillonneur.

The Dutch writer Fischer (1738) quaintly observes that for carillon playing ' a musician requires nothing more than a thorough knowledge of music, good hands and feet, and no gout ' !



Action Work.—The connexions between the keys and the bell clappers are precisely the same in principle as the tracker action used in organ building—iron levers, squares and wires being used in the place of wooden materials. Springs are used to bring back the clappers of the small bells quickly to their original position after striking. The clappers of the large bells are too heavy for this arrangement. They have a simple device consisting of a balance weight which brings them within the proper striking distance, so that the player has only to upset this balance when using the pedals.

In England recent improvements have been made which entirely do away with this somewhat clumsy and antiquated mechanism. The clapper is suspended in such a manner that the inertia to be overcome is reduced to a minimum, so that very little force is required to play the heaviest bells. This is a great gain, and considerably increases the executive possibilities of the player. The mechanism connected with each key is fitted with a screw plate by which the touch can be adjusted to the greatest nicety. Every good carillonneur exercises the greatest care in this adjustment, as in some instances the clapper, in striking the bell, moves little more than $\frac{1}{16}$th of an inch. The largest bell of the carillon, whatever its pitch may be, is usually the lowest C of the clavier. Frequently the two lowest semitones, C♯ and D♯, are omitted for economical considerations. (See Hemony.)

Method of Playing.—The bulk of the playing is done on the smaller bells, with the occasional use of the larger ones, because the smaller bells are more easily manipulated, and the effect of chords is more satisfactory on them than on the larger bells. This is due to the fact that in the latter the harmonic tones are so prominent that they frequently interfere with each other when sounded together. This is not the case with the smaller bells when used in combination, as their harmonic tones are too high in the scale of sounds to inconvenience the musical ear. Chords generally are most satisfactory when played arpeggiando. Chromatic and diatonic scale passages can be played at almost any speed, and are most effective. When the music is in three or more parts the greatest care is necessary as to the disposition of the notes of chords. The best effect is obtained by keeping the bass distant from the part immediately above it. The most intense crescendos and the most delicate diminuendos are possible. Music in two or three parts is suitable for the carillon. As a rule, the fewer the parts the better the musical effect. Sustained chords are produced by a kind of tremolando. The most beautiful effects of carillon music are only possible when the atmospheric conditions are favourable. This is generally on a calm summer evening between the hours of 9 and 10, the usual time of the recitals given at Malines by the master player Jos. Denyn. The dim light, the absolute calm, and the great height of the bells—these combine to produce indescribably ethereal music.

CARILLON MUSIC.—Most of the music played is in MS. Every carillonneur of note makes his own arrangement of the music he plays. These he considers his own special possessions, and it often requires considerable persuasion before they can be seen by the inquirer. The position is much the same as that of the organist who has to accompany a choral work from a pianoforte score, when he must make his own arrangement to suit the instrument on which he is playing. The carillonneur has to play on instruments of varying size—anything from 35 to 49 bells—a difference of compass which greatly affects the arrangement. The most important published compositions are by VAN DEN GHEYN. 'The Cuckoo Prelude' (Van den Gheyn) is published in England (Chappell).

A SHORT LIST OF SUITABLE MUSIC

Preludes and slow movements of Bach and Handel.
Preludes and fugues. Van den Gheyn.
Sonatas. Steibelt, Nicolai, Richter, Pleyel.
Folk tunes. Folk songs. National melodies.
Fantasias by Benoit.
Songs of Schubert, Grieg, Bizet, Mendelssohn, Mestdagh and Benoit.

CARILLON (2), the French term for GLOCKENSPIEL (*q.v.*).

CARILLONNEUR. A player of the carillon, a bell-player, a carillonist.

CARIO, JOHANN HEINRICH (*b.* Eckernforde, Holstein, 1736; living in 1800), was instructed by Emanuel Bach, Telemann and Schwenke, and became a great trumpet player. He is said to have invented a keyed trumpet which would play in every key, and to have executed a prelude in B♭ minor. G.

CARISSIMI, GIACOMO (*b.* Marino, near Rome, 1604[1]; *d.* there, Jan. 12, 1674), an eminent composer whose works are of peculiar importance in the early history of the oratorio and cantata forms.

His first professional post was that of maestro at Assisi. This he held from about 1624–28, when he went to Rome, and obtained the Mastership at the church of S. Apollinare, attached to the German College. In this office he passed the remainder of his days, without, in all probability, ever having crossed the Papal frontier. That he gained his taste and style, which were admirable, by long residence in Paris, and by writing for French audiences, is one of by no means the least foolish and perverse of the many foolish and perverse assertions of the Seigneur de Fréneuse.[2]

Carissimi has the reputation of having done more than any other Italian of his epoch towards the perfection of recitative. To him Kircher admits that he owes much that is valuable in his 'Musurgia' upon this branch of art. He was, moreover, although not the actual inventor of the sacred cantata, at least its parent by adoption and development, and at his hands it received that elevation of form and accession of beauty which enabled it to supplant the madrigal, and give to sacred music those elements of pathos and dramatic force for which the rise of the opera had created a general appetite. A third contribution by Carissimi to the progress of his art was the lightness and variety of his accompaniments. He had less learning and more imagination than his predecessors in the Roman school. But if his harmonies were less elaborate than theirs, his melodies were freer and more graceful, and his effects more dramatic. There was something essentially modern in his music, and he was the precursor and teacher of a large group of polished artists, among whom Bassani, Cesti, Buononcini and Alessandro Scarlatti were conspicuous. No less prolific than original, Carissimi left a great quantity of finished work behind him. Unhappily too little of it has been published, and too much of it was destroyed at the time of the suppression of the Jesuits, when the collections of S. Apollinare and the Gesù were sold for waste paper. In the library of the Abbé Santini there were two printed collections of motetti by Carissimi for 2, 3 and 4 v., which had been published at Rome in 1664 and 1667, and a Lauda Sion and a Nisi Dominus, both for 8 v., and both in manuscript. In the archives of the Lateran there is a mass by Carissimi for 12 v., written on the famous Provençal melody 'L'homme armé.' This is believed to be the last occasion on which that favourite theme was ever

[1] According to Pitoni, whom both M. Fétis and the Abbé Alfieri follow upon this point; but at Padua in 1582, if Spiridione (*Musica Romana D. D. Foggiae, Carissimi, Gratiani, aliorumque.* Bamberg, 1665) be trusted for the place of his birth, and Mattheson for the date of it.

employed. The National Library in Paris has a rich manuscript collection of oratorios by Carissimi.

The following is a list of their names :

'La Plainte des damnés'; 'Histoire de Job'; 'Ezéchias'; 'Baltazar'; 'David et Jonathas' (authenticity doubtful); 'Abraham et Isaac'; 'Jephte'; 'Le Jugement dernier'; 'Le Mauvais Riche'; 'Job'; 'Jonas.'

Besides these the following are in existence (see *Q.-L.*) :

'Felicitas beatorum,' 'Lucifer,' 'Martyres,' 'Vir frugi et pater familias' and 'Daniele.'

Chief among these ranks the 'Jephte,' of which Hawkins has said that

'for sweetness of melody, artful modulation, and original harmony, it is justly esteemed one of the finest efforts of musical skill and genius that the world knows of.'

Croft imitated his 'Gaudeamus,' and Aldrich adapted his motets to English words for anthems. Hawkins printed a remarkably graceful little duet of Carissimi called 'Dite, o cieli.' It was in emulation of this piece, upon hearing it over-praised by King Charles II., that Dr. Blow composed his celebrated 'Go, perjured man.' The magnificent collection of his works made by Dr. Aldrich at Oxford throws all others into the shade, and forms one of the special ornaments of the library at Christ Church (see Arkwright's Catalogue, Part I., pp. 20-24). A few of his pieces are in the 'Musica Romana' of Spiridione, and a few more, disfigured by French words, in the collection of 'Airs sérieux et à boire,' published by Ballard. There are some motets of his in Stevens's 'Sacred Music,' and Crotch has published one or two examples in his 'Selections of Music.' Five specimens are printed in the 'Fitzwilliam Music.' 'Jephte,' 'Judicium Salomonis,' 'Jonas' and 'Baltazar' have been published by Chrysander from a MS. now at Hamburg (Schott); and 'Jonah' by Henry Leslie (Lamborn Cock). It remains to add that the 'Judicium Salomonis' was in all probability not his, but the production either of Cesti or Samuel Bockshorn. E. H. P.

BIBL.—F. BALILLA PRATELLA, *Giacomo Carissimi ed i suori oratori*, *R.M.I.*, 1920. H. QUITTARD, (1) *Giacomo Carissimi* (*Tribune de St. Gervais*, 1900); (2) *Giacomo Carissimi* (*Histoires sacrées*), ed. at the Schola Cantorum, with an historical and critical study.

CARLO (CARLI), GERONIMO (*b.* Reggio, first half of 16th cent.), author of a collection of 5-part motets by eminent composers, Créquillon, Clemens non Papa, Ciera, etc., entitled 'Motetti del labirinto,' 2 vols. (Venice, 1554 and 1555). M. C. C.

CARL ROSA OPERA COMPANY, THE ROYAL.[1] This company was founded in 1875 by CARL ROSA (*q.v.*) for the production of opera in English, with the immediate intention of improving the standard of both repertory and performance. Rosa's previous experience of operatic management in America, in which he was associated with his first wife Euphrosyne PAREPA-ROSA (*q.v.*), had shown him the possibilities. Her death in 1874 necessitated the postponement of the company's London début at Drury Lane, as had been planned. The Princess's Theatre was taken in 1875, and the first season opened on Sept. 11. Various other theatres were taken in subsequent years, and the quick response of the public led to a very great stimulus being given to the English operatic art, both of performance and of composition. From 1883–87 Rosa was associated with Augustus Harris, and the London seasons took place at Drury Lane. Rosa died in 1889, and Harris remained as managing director till the close of the following year. It was an unlucky thing for opera in English that Rosa's death should have synchronised with the re-establishment of foreign opera at Covent Garden under Harris's management, for the company had not really had time to make its position secure by the acquisition of a complete independence in the character of the representations. Comparison with the established traditions of foreign opera performance necessarily meant a loss of prestige. Also Harris, concerned with, to him, a more important thing, lost interest, and the direction of the company suffered in vigour by his retirement. The London seasons became less regular, although its activities continued in the provinces, where indeed the main work had always been done. T. H. Friend and H. Bruce were the directors till 1898, when the company passed into other hands, and was managed for a short time by Osmond Carr. From Aug. 1899 till May 1900 it was run as a commonwealth by some of the leading singers, with Arthur Winckworth as manager. A syndicate was then formed, with Messrs. Alfred and Walter van Noorden at the head; the latter was one of the company's conductors, and on his death Mrs. Rosa (Rosa's second wife) became co-director. Since 1923 the company has been under the direction of H. B. Phillips. The company has generally worked with a large repertory which has included the popular operas of the day, while among many works produced, which were either heard for the first time in English or were actual novelties, the following may be mentioned :

'Aïda,' 1880; 'André Chénier,' 1903; 'Attaque du moulin,' 1915; 'Bohème,' 1897; 'Carmen,' 1879; 'Cricket on the Hearth' (Goldmark), 1900; 'Faust' (Berlioz, stage version), 1893; 'Flying Dutchman,' 1876; 'Forza del destino,' 1910; 'Hansel und Gretel,' 1895; 'Jewels of the Madonna,' 1912; 'Lohengrin,' 1880; 'Manon,' 1885; 'Mastersingers,' 1896; 'Mefistofele,' 1912; 'Mignon,' 1880; 'Othello,' 1895; 'Queen of Sheba,' 1910; 'Rienzi,' 1879; 'Siegfried,' 1901.

A number of operas by British composers have been produced for the first time by the company, including :

'Canterbury Pilgrims' (Stanford); 'Colomba' (Mackenzie); 'Dante and Beatrice' (Philipott); 'David Garrick' (Somerville); 'Diarmid' (McCunn); 'Esmeralda' (Goring Thomas); 'Jeanie Deans (McCunn); 'Nadeshda' (Goring Thomas); 'Nordisa' (Corder); 'Quentin Durward' (Maclean); 'Thorgrim' (Cowen); 'Troubadour' (Mackenzie).

A school for operatic training was opened in

[1] Permission to prefix 'Royal' to the name of the company was granted by Queen Victoria in 1897.

London by the directors of the company in Sept. 1920, of which Arthur Winckworth became sole director in the following year.

N. C. G.

CARLTON (CARLETON), NICHOLAS, an early 16th-century English composer, known by arrangements of some of his vocal compositions for organ or virginal, and a duet for 4 hands for organ or virginal (B.M. MSS. Cat. for Instrumental Music). The latter is one of the earliest specimens of a duet for keyboard instruments.

E. v. d. S.

CARLTON, RICHARD (*b. circa* 1558; *d. circa* 1638), madrigal composer. Nothing is known of his parentage, but there is no evidence to support the conjecture that he was a son of Nicholas Carlton. He took his degree as B.A. at Clare College, Cambridge, in 1577. After his ordination he became vicar of St. Stephen's Church, Norwich, and was minor canon and master of the choristers at Norwich Cathedral. In Oct. 1612 he was presented by Thomas Thursby to the incumbency of Bawsey cum Glosthorp in Norfolk. It is stated that he died in 1638. Carlton was a contributor to 'The Triumphes of Oriana,' and he published (1601) one set of madrigals, all of which were written for five voices. His madrigals, republished in ENGLISH MADRIGAL SCHOOL, vol. xxvii., as a whole are characterised by a peculiar sense of tonality, and his use of certain chords, and his treatment of the major and minor thirds in close juxtaposition and simultaneously, differentiate his work as regards style and manner from that of all the other English madrigalists. Similar clashes were introduced, as is well known, by Byrd and Kirbye among others, but their treatment of these 'jarrs and dissonances,' as Byrd designated them, was different in character from those of Carlton, who may either have been indulging in experiment, or have come under some special influence in the course of his training in church music.

E. H. F.

CARMEN, opéra-comique in 4 acts; words by Meilhac and Halévy (founded on Prosper Mérimée's story); music by Bizet; produced Opéra Comique, Paris, Mar. 3, 1875; Vienna, Oct. 23, 1875; Brussels, Feb. 8, 1876; St. Petersburg, 1878; in Italian, Her Majesty's, June 22, 1878; in English (Carl Rosa), Her Majesty's, Feb. 5, 1879; New York, Academy of Music, Oct. 23, 1879; in French, Her Majesty's, Nov. 8, 1886.

M.

CARMEN, JOHANNES, a composer of the early part of the 15th century. His nationality is not known, but he is named by Martin le Franc in *Le Champion des dames*, as one of three musicians who achieved popularity in Paris immediately before the rise of Dufay and Binchois. The passage in Le Franc's poem, which seems to have been written about 1440, is as follows:

'Tapissier, Carmen, Cesaris
N'a pas long temps (si) bien chantèrent
Qu'ilz esbahirent tout Paris
Et tous ceulx qui les fréquentèrent:
Mais oncques jour ne deschantèrent
En mélodie de tel chois,
Ce m'ont dit qui les escoutèrent,
Que Guillaume du Fay et Binchois.'

A 4-part motet of his in praise of St. Nicholas of Myra, with the two upper parts in canon, is printed in Stainer's *Dufay and his Contemporaries*, from MS. Canonici Misc. 213 in the Bodleian Library. The statement by Ambros (*Geschichte der Musik*, iii. 18) that two motets by Carmen are included in Cod. Mus. 37 of the Liceo Musicale of Bologna has been shown to be an error.

J. F. R. S.

CARNABY, WILLIAM, Mus.D. (*b.* London, 1772; *d.* there, Nov. 13, 1839), a chorister of the Chapel Royal under Dr. Nares and Dr. Ayrton, became organist at Eye, and subsequently at Huntingdon. In 1805 he graduated at Cambridge as Bachelor of Music, and in 1808 proceeded to Doctor. On the opening of Hanover Chapel, Regent Street, London, in 1823, he was appointed its organist. His compositions, chiefly vocal, were numerous.

W. H. H.

CARNEGIE UNITED KINGDOM TRUST. Music has shared greatly in the activities of this trust since its establishment in 1914. The policy generally is that of making good music accessible to the public by such practical means as grants and guarantees to the Village and Country Towns Concerts Fund (concert tours organised by local bodies, often acting in connexion with the education authorities), and the financial assistance to the Federation of British Musical Competition Festivals, the Arts League of Service, and the English Folk Dance Society. For a few years also valuable help was given to churches in the purchase of organs.

Of equal, if not greater, importance is the musical publication scheme, started in 1917, under which new compositions are brought out annually, works which, either because the composer is unknown, or from their character and scope, are unlikely to be taken up in the usual way. Such works, vocal and instrumental, are published in score; in some cases, as in an opera, the vocal score is printed and sets of band parts provided in manuscript. The terms offered to the composer are of a very favourable nature, and the edition printed is sufficiently large to give the work every opportunity of becoming known. Its renewal when exhausted is a matter for arrangement between the publisher and composer. Of the many works thus in the 'Carnegie Collection' the best known are Bantock's 'Hebridean Symphony,' Boughton's opera 'The Immortal Hour,' Vaughan Williams's 'London Symphony' and Holst's 'Hymn of Jesus.'

Another valuable work has been done in the

publication of a collection of Tudor church music; a standard edition in ten volumes and a cheap octavo edition of separate numbers. The composers represented are Taverner, Byrd, Gibbons, Robert White, Thomas Tallis, Thomas Tomkins, Merbecke, Aston and Parsley. N. C. G.

CARNICER, Ramón (*b.* Tárrega, near Lérida, Oct. 24, 1789; *d.* Madrid, Mar. 17, 1855), a Spanish dramatic composer who largely contributed towards the formation of a national opera in Spain. Having begun life as a treble in the cathedral choir at Urgell, followed by seven years' training in the traditions of ecclesiastical counterpoint, his first encounter with Italian opera at Barcelona, in 1806, was a disappointment. He is said to have learnt to appreciate opera, however, from the works of Mozart, although at that date the only one of Mozart's operas which had been performed in Barcelona was 'Così fan tutte' (1798). The French invasion of 1808 paralysed musical life in Spain. Carnicer fled to the Balearic Isles, and worked as organist and teacher at Mahon in Menorca. There he made friends with a certain Dr. Charles Ernest Cook, described as a German engaged upon an exploration of the Pithyusae Islands. Dr. Cook was said to have had lessons from Mozart himself (he is not mentioned in Abert's edition of Jahn, 1921); at any rate he made Carnicer acquainted with many of Mozart's works which were not to be found at Barcelona.

At the end of the war, Carnicer returned to the mainland, and was commissioned by the Duke of Bailén, a wealthy amateur, to engage Italian singers for the opera at Barcelona. His earliest dramatic compositions were additional arias and sinfonias for inclusion in the operas of other composers. His overture to Rossini's 'Barbiere' brought him into public notice. (It is quoted in part by Mitjana in the *Dictionnaire du Conservatoire : Espagne*, p. 2310.) His first two operas were 'Adele di Lusignano' (1819) and 'Elena e Constantino' (1821; Madrid, 1827). In 1820 he was appointed director of the opera at Barcelona. His 'Don Giovanni Tenorio, ossia Il convitato di pietra : opera semi-seria' (1822) is interesting from the fact that Mozart's 'Don Giovanni' was at that time still unknown (or at least unsung) in Spain; in Madrid it was first performed in 1834, and in Barcelona not until 1849. The story, of course, was well known in Spain, having been given its earliest dramatic form by a Spanish dramatist of the 17th century. Fabrizzi's comic opera, 'Il convitato di pietra : dramma giocoso,' had been given in Barcelona in 1790, three years after the first performance of Mozart's 'Don Giovanni' at Prague; while Gazzaniga's 'Convitato' had been produced in Madrid in 1796.

In 1827 Carnicer was brought to Madrid by the King's command to direct the opera there, in spite of a four-years' engagement by which he was bound at Barcelona. He was faced with the prestige of the Italian school, and by the reputation of Mercadante who had preceded him. His later operas include 'Elena e Malvina' (1829), 'Cristoforo Colombo' (1831), considered to be his best work, 'Eufemia di Messina' (1832), 'Ismalia, ossia Morte ed Amore' (1837); whilst he also composed a 'Missa solemnis' (4 v. and orch., 1828); 2 Requiems (4 v. and orch., 1829 and 1842); Vigilia (1833), and several symphonies. From 1830 to 1854 he taught harmony and composition at the Conservatoire, and Barbieri was among his pupils.

The tragedy of Carnicer was that circumstances compelled him to set Italian words to music, instead of Spanish, or his real mother tongue, which was Catalan. Sometimes, however, he persuaded singers to introduce his own Spanish songs into the middle of Italian operas; they are described as being compositions in a vividly popular style, the last vestiges of the *tonadillas* of the 18th century. J. B. T.

CAROL, Noël or Nowell, from *noël*, the French and generic name for the large family of song known as O.F. *Nouel*; Norman Fr., *Nuel*; English, *Nowell*; Burgundian, *Noé*; Poitevin, *Nau*; Ger., *Weihnachtslied* or *Weihnachtsgesang*; Dutch, *Kerstlied*; Polish, *Kolendy*), is primarily traditional song in honour of the birth of Christ.

The carol came prominently into being at a time when Latin was ceasing to be a language universally understood. This was a perfectly natural development from the Hymns and Sequences, etc., of the church services. To St. Francis of Assisi is due the invention of the *praesepe* or cribs of Bethany to stimulate the humble Italian congregations to the acceptance of the doctrine of the Incarnation with more enthusiasm than was at that time being shown for the *Quicunque vult*. To him, too, in his Song of the Creatures, we owe the beginnings of the popular hymns and carols apart from church music, designed to appeal to the masses.

English carols have been classified by Rickert (see Bibliography) according to their subject-matter. The early ones are those of the Nativity and the Incarnation, together with a large group dealing with the Annunciation. Later we get the Shepherd carols and the Epiphany group. Parallel with these there are the Christmastide Festivity carols, the Wassail and the Boar's Head group.

As to the music, it must be admitted that apart from one or two folk-song carols there is not much to compare with the carols of the Continent, though some of it is very beautiful. There are some by William Byrd, O. Gibbons, Lawes and other great musicians, but they are

motets rather than carols. One of our most popular carols, 'The first Nowell,' is a portion only of a carol, and its frequent repetition is monotonous. Another, "God rest you merry Gentlemen,' existing in various forms, has a grand tune, which was used for political purposes in the 18th and 19th centuries, with different words. There is a West of England tune [1] obviously based on the notes of a peal of bells. Another fine air is that of 'Remember, O thou Man' from Francis Ravenscroft's Melismata of 1611. The Coventry Carol of earlier date is an excerpt from a Pageant 1591 —printed with alterations to the rhythm in Bramley and Stainer. A very early carol, still sung on Christmas Day at Queen's College, Oxford, is that known as the Boar's-head Carol—'The Boar's head in hand bear I,' 'Caput apri defero.' It was printed by Wynkyn de Worde in 1521. A later variant-tune given in Fyffe, 'The Boar is dead,' was sung before Prince Henry at St. John's College, Oxford, in 1607.

Of early English carols one of the most beautiful is a Processional Lullaby, 'Qui creavit coelum,' sung by the nuns of St. Mary's, Chester, with a varying lullaby refrain to each line. In the 14th and 15th centuries beautiful carols were being written, some of which are to be found in 'Early Music in the Bodleian,' by Nicholson and Stainer. Of about the same date are some 'English Carols of the Fifteenth Century,' from Trinity College, Cambridge, edited by J. A. Fuller Maitland and W. R. Rockstro, 1891. There are many MSS. in the British Museum easily accessible, thanks to Hughes' *Catalogue of Early English Music*, and some of these MSS. have been, in part, published. The Hill MS. in Balliol College Library contains a most interesting collection of carols probably entered from memory by Alderman Hill in his commonplace-book in 1536. It has been published in *Anglia*, and for Professor Flügel. It throws much light on other MSS. of the time containing carols. Some of the carols are early 15th century.

Of the Annunciation Carols many are real gems, *e.g.* 'There is no rose of such virtue as is the Rose that bare Jesu' and 'Tidings true then become new,' with a Nowell refrain (see Fuller Maitland and Rockstro). There are many in the Hill MS.

Epiphany Carols too are often rather attractive with the dramatic element of the visit of the Wise Men or Magi, or The Three Kings. The German 'Es führt drei Könige Gottes Hand' is a typical example. Lully set a Provençal carol on the subject to a spirited triumphal march air which is still sung in the south of France.

It is easy to see how the 'shepherd' motive inspired so many of the total number of extant carols in England and in other countries. One of the finest is 'Can I not sing but hoy, when the jolly Shepherd made so much joy,' with the refrain beginning 'Ut hoy,' obviously based on the French 'et hoye,' or 'et hye,' of the time. It is given in full in Rickert and in Chambers and Sidgwick, from the Hill MS. In France 'Laissez paistre vos bestes pastoureaulx' was a favourite pastoral carol found as early as 1535 in 'La Fleur des Noëls,' more often sung in later times to the tune of 'Venez divin Messie.'

There is a large class of folksong carols based mainly on subjects drawn from mystery plays and pageants. Among these may be mentioned the 'Cherry-tree Carol,' 'The Carnel and the Crane,' 'Joseph was an old man,' 'Dives and Lazarus,' 'I saw three ships,' 'The Holy Well,' 'All under the Leaves,' 'To-morrow shall be my dancing day.' There are others in Cecil Sharp's collections, and much information in the publications of the Folksong Society.

Carols in England have suffered strange vicissitudes. They began as popular songs of great beauty, with a strong devotional flavour as a rule. The Reformation diverted the interest of the carol-singing public from the Virgin and Child motive, and the carol became rather a formal and sometimes dull hymn. The Puritans are blamed for discouraging carol-singing as they discouraged dancing and theatrical performances generally, but the Restoration had no permanent effect on carols and carol-singing, though carols in collections were reprinted.

From the time of the Restoration almost down to our own times carols were printed in collections issued as broadsides or sometimes as garlands. Hone in 1822 in *Ancient Mysteries described* gave a list of 89 which were then, if not in use, at any rate commonly known. From 1700 to 1850 the carol may be said to have been neglected as a rule, though Sandys stimulated the attention of a few. This attention has had the effect of putting carols on the level of ordinary hymns, with performance in church as the crucial test. At the present time there are many so-called carols which are nothing more than uninspired hymns or second-rate partsongs, or rhymed versions of Latin or German originals in which the sense has been sacrificed for the sake of the rhyme.

Perhaps the most beautiful of all carols are to be found in the 'Lullaby' or the 'Cradle-song' group, and the palm must be given to those originally written in German, owing to the wonderful wealth of diminutives in that language. One of the most attractive is the 17th-century 'Schlaf mein Kindelein,' a translation of the early Latin 'Dormi fili' with its almost untranslatable refrain, 'Mille tibi laudes canimus, Mille, mille, millies.' Many of these have been translated into English.

[1] See Chappell's 'Popular Music.'

Some of the English ones which survive are excellent. One has its original tune set to rather hymn-like words by T. Pestel [1] (1584–1659). The words, which vary, are given in Rickert and also in more modern form, in 'Carols,' by W. J. Phillips. Another is that with the refrain 'Lulla, la lulla, My sweet little baby, what meanest thou to cry,' from W. Byrd's 'Psalms, Sonnets and Songs' (1588).[2]

Probably the earliest carol is the Anglo-Norman 'Seignors, ore entendez à nus' translated by F. Douce,[3] of a festive nature. Another early carol, 'Orientis partibus adventavit asinus,' was sung in the 13th century at Sens and also at Beauvais. As in the case of so many early carols it is macaronic, *i.e.* in two languages. The tune is good, and has been preserved in English hymnody [4] to the words 'Soldiers who are Christ's below,' but the original rhythm has been destroyed. There are old though later carols in Norman French, and in the Poitou dialect, and in the collection reprinted by Chardon. In this latter it is interesting to find religious carols ascribed to secular tunes. This in France, as elsewhere, was quite the rule. In Th. Belamy's 'Noëls' the carols are directed to be sung to the last new gavotte or other stage music.

Many of the French noëls begin with the same words as those of the song to which the carol was intended to be sung, *e.g.* 'Pour bien chanter Noël' was to be sung to the air 'Pour bien chanter d'amour,' and 'N'aimeras-tu jamais mon âme' to the air 'N'aimerez-vous jamais, bergère,' etc. Sometimes a secular tune after becoming a carol tune was again used for worldly purposes, *e.g.* the Drinking Song in the 'Beggar's Opera' was originally sung to a French carol. Sometimes, too, carols have been diverted to other uses. A fine Christmas hymn of Andreas Hammerschmidt has been sadly clipped and curtailed, and what was 'Freuet euch ihr Christen alle' with its joyful refrain of hallelujahs is now found masquerading as 'Forty days and forty nights,' a Lenten hymn.[5]

Of early carols in other countries there may be cited 'Resonet in laudibus,' 'Singen wir mit fröhlichkeit,' also found with the German words 'Joseph lieber, Joseph mein' (1605).

Another almost universal carol in varying forms was 'Puer natus in Bethlehem,' 'Ein Kind geborn zu Bethlehem.' There is also the early plain-song 'Dies est laetitiae' with its Dutch version 'Tis een dach van vrolichkeit' and the German variants. Another fine plainsong is 'Ecce tandem sempiternus.'

One of the most popular was the macaronic carol 'In dulci jubilo,' of early but not certain date, admirably translated by John Wedderburn [6] in 1567. The tune was murdered in Neale and Helmore to suit the jingle known as 'Good Christian men rejoice.'

A very early carol with late 13th-century words is 'Es kommt ein Schiff geladen,' given by Woodward.[7] The tune is ascribed to 1608, but seems to be earlier.

One of the grandest of all carols is 'Quem pastores laudavere,' early 15th century, and intended to be sung line by line in church by four separate choirs of boys.

An interesting and unique volume, 'Piae cantiones,' [8] compiled by Theodoric Peter of Nylandt and published in 1582, reprinted with notes and the original music by the Plainsong and Mediæval Music Society (1910) under the editorship of the Rev. G. R. Woodward, contains over 70 hymns of which over 20 are for Christmastide. One of its tunes, perhaps the most beautiful in the set, a spring-carol, 'Tempus adest floridum,' was used by the Rev. J. M. Neale for the trivial rubbish of 'Good King Wenceslas.'

In Germany the popular carol developed parallel with the Christmas Choral of which 'Vom Himmel hoch' is a well-known example. In the 'Musae Sioniae' of Michael Praetorius, 1611, there are many Christmas songs and motets, many of which have been anglicised and sung in this country. There are in existence many collections of carols in German, and in rather difficult patois.

The early carols seem to have been for unison singing, but in the 16th and 17th centuries carols have a tendency to become motets. J. Mouton (*d.* 1522) wrote a motet 'Noë, noë, psallite,' on which a Mass was written by Arcadelt. François Eustache du Caurroy, maître de chapelle to Charles IX., Henri III. and Henri IV., left some famous noëls in his 'Mélanges de la musique,' published posthumously. After his time there is a dearth of composers whose works have come down to us, but there seems to have been no shortage in carol words. French is rich in the possession of many fine carols, several of which were written to be sung to the tune of 'O Filii et filiae,' but more of which were intended to be sung to very secular airs. An almost universal favourite is the air (frequently used in England) to which 'Célébrons la Naissance' or the popular 'Chantons je vous en prie' is sung. There are many others, such as 'Guillot prends ton tambourin' and 'Faisons réjouissance,' which were obviously dance tunes.

Burgundy was rich in the carols collected by Th. Belamy and F. Fertiault: Provence in those of Saboly and Peyrol, while Auvergne

was especially the home of the 17th-century carols of Natalis Cordat.

The airs of the French noëls have formed the basis for a considerable amount of French organ music for use in the midnight Mass at Christmas, and possibly for other seasons.

BIBLIOGRAPHY

ENGLISH. — Wynkyn de Worde in 1521 issued the first known printed collection of carols. A fragment of it remains in the Bodleian Library, and contains the 'Boar's-head Carol,' 'Caput apri defero,' and the colophon 'Thus endith the Christmasse Caroles newly imprinted in London at Flete Strete at the Signe of the Sonne by Wynkyn de Worde the yere of our Lord M.D.XXI.'

CAROLAN, see O'CAROLAN, TURLOGH.

CAROLI, ANGELO ANTONIO (*b.* Bologna, June 13, 1701; *d.* there, June 26, 1778), was appointed organist at the Accademia Filarmonica, Bologna, Apr. 15, 1726, and composer, Apr. 15, 1728. He was five times President of the Academy. After filling the post of maestro di cappella at several churches, he became G. A. Perti's successor at the Congregazio dell'Oratorio, Apr. 20, 1750. At first he wrote operas and oratorios which apparently have all disappeared. Five masses *a* 4 v. with orchestra, 2 cantatas and some secular songs are mentioned in *Q.-L.* as still in existence.

E. v. d. S.

CARON, PHILIPPE (*b. circa* 1420), a composer of the 15th century. He is said by Tinctor, who names him Firmin, to have been the scholar of Binchois and Dufay. The name is French or Flemish, and a chorister 'P. Ph. Caron' is mentioned[1] as a member of the cathedral choir of Cambrai. (See *Q.-L.* for the three masses in the Library of the Pope's Chapel, among which is one on 'L'homme armé.') Other compositions, sacred and secular, are found in Cambrai, Modena (Estense), Rome (Casanatense, Cappella Giulia), Florence (XIX. 59; XIX. 176; Panciatichiano, 27), London (Roy. App. 57), Dijon, 517 (formerly 295). The National Library at Paris preserves 8 'chansons' of 4 voices.

Reprints of works by Caron, without Christian name, are found in *D.T.Ö.* (*Trienter Codices*). For the French 'chansons': E. Droy et G. Thibault, *Bibliographie des recueils de chansons du XV^e siècle.*

M. L. P.

CARON, ROSE-LUCILE, *née* MEUNIEZ (*b.* Monerville, Seine-et-Oise, Nov. 17, 1857), a famous French operatic soprano, a pupil of the Paris Conservatoire from 1880, when she was already married, until 1882, when she obtained a second prize for singing and an *accessit* for opera.

Her début took place at the Théâtre de la Monnaie, Brussels, in 1882, where she created the part of Brunehilde in Reyer's 'Sigurd'; she remained there till 1885, when (June 12) she appeared at the Paris Opéra, again in Reyer's work. She sang in Paris the principal parts in 'La Juive,' 'Freyschütz,' 'Henry VIII.' and Massenet's 'Cid'; created the soprano parts at Brussels in Godard's 'Jocelyn' (1888) and Reyer's 'Salammbô' (1890). In the latter year she went again to Paris, appearing in 'Sigurd,' 'Lohengrin' (1891) and 'Salammbô' (1892). She sang the part of Sieglinde in the French performance of 'Die Walküre' (1893), and that of Desdemona in Verdi's 'Otello' (1894). Elizabeth in 'Tannhäuser,' and Donna Anna were among her finest parts, and she was engaged in 1898 at the Opéra-Comique to appear in 'Fidelio,' a part she had undertaken in Brussels. She also sang in Gluck's 'Iphigénie en Tauride,' at the same theatre in 1900. In 1902 she became one of the professors of singing in the Conservatoire of Paris, but she has since resigned.

G. F.

CAROSO, FABRITIO, of Sermoneta, author of *Il ballarino* (Venice, 'appresso Francesco Ziletti,' 1581), a valuable work upon dancing, dedicated to Bianca Cappella de' Medici, Grand Duchess of Tuscany. It gives instructions for performing the dances of the period, with music in lute-tablature, and plates showing the attitudes of the dancers. It contains the author's portrait at the age of 46. Another publication, based upon the former, but so much revised and rewritten as to make it a new book, entitled *Nobiltà di dame* (Venice, 'presso il Muschio,' 1600; reissued, 1605), has a dedication to the Duke and Duchess of Parma and Piacenza dated 1600. It contains the same portrait of the author altered so as to present him at the age of 74. As late as 1630, a collection was published under the name of *Raccolta di varij balli . . . nuouamente ritrouati negli scritti del sig. Fabritio Caroso* (*Rome: G. Facciotti*).

G. E. P. A.

CARPANI, GIUSEPPE ANTONIO (*b.* Villalbese, district of Brianza, Jan. 28, 1752; *d.* Vienna, Jan. 22, 1825), poet and writer on music.

He studied law at Milan and Padua, and practised under the celebrated advocate Villata at Milan. While thus employed he wrote more than one comedy and several opera-libretti for the Italian stage, among others 'Camilla,' composed by Paër. In consequence of some violent articles against the French Revolution in the *Gazzetta di Milano*, of which he was editor from 1792–96, he had to leave Milan when it was taken by the French. Until the peace of Campo Formio in 1797 he lived at Vienna; after that date he became censor and director of the stage in Venice, but a malady of the eyes drove him back to Vienna, where the Emperor pensioned him till his death. He published a number of translations of French and German operas, and also wrote 'La passione di Gesù Cristo,' which was set to music by Weigl, and performed in 1804 in the palace of Prince Lobkowitz, and in 1821 by the Gesellschaft der Musikfreunde. He also translated the 'Crea-

[1] According to Haberl, *Vierteljahrsschrift*, i., a Jean Caron is mentioned by Fétis and van der Straeten i.

tion' into Italian, and wrote a sonnet on the celebrated performance of that work, at which Haydn was present the year before his death. Carpani had the greatest esteem and affection for Haydn, which led to his publishing his well-known *Haydine*, etc. (Milan, 1812, and a second enlarged edition at Padua, 1823). *La Haydine* is a kind of æsthetical work, and a eulogy on Haydn's compositions. It quickly found a translator in Beyle, the French writer, who published it as his own composition under the name of Bombet—*Lettres écrites de Vienne*, etc., by Louis Alexandre César Bombet (Paris, 1814). Carpani attacked this piracy in two spirited letters—*Lettere due, dell' autore delle Haydine* (Vienna, 1815). Beyle was, nevertheless, audacious enough again to publish his work, this time under the alias of Stendahl, *Vies de Haydn, Mozart, et Métastase*, etc. (Paris, 1817). In spite of Carpani's protestations, the first of the two appeared in English as *Lives of Haydn and Mozart* (Murray, 1817; and Boston, U.S., 1839). Extracts of Carpani's original work, translated by D. Mondo, appeared at Niort in 1836, and in a complete form at Paris, 1837, under the title *Haydn, sa vie, ses ouvrages, et ses aventures*, etc., par Joseph Carpani; traduction de Mondo. Some clever but partial sketches of Rossini were published by Carpani in one volume as *Le Rossiniane* (Padua, 1824). This also was pirated anonymously by Beyle (Paris), and published by Mondo. Yet another book, *Le Mayeriane*, on the work of Simon Mayr, is mentioned by Riemann. In 1809 Carpani accompanied the Archduke John on his expedition to Italy. After the return of peace, he devoted himself to starting the *Biblioteca Italiana*. He died in the smaller Liechtenstein Palace at Vienna. C. F. P.

CARPENTER, John Alden (*b.* Park Ridge, Chicago, Illinois, U.S.A., Feb. 28, 1876), American composer, still living in Chicago, where he is engaged in business.

Carpenter began the study of music under the instruction of his mother. At twelve years of age he took up more serious work with Amy Fay, a pupil of Liszt and Tausig. He pursued theoretical study unaided till he was about sixteen, when he became a pupil of W. L. Seeboeck. In 1893 he entered Harvard University. During his four years as a student he took the musical courses directed by Prof. John Knowles Paine. On graduating in 1897 he entered his father's business in Chicago and has always maintained his active connexion with it. In 1895, while on a European visit, he studied for several months in Rome with Sir Edward Elgar. In America the following winter he took a theoretical course under Bernard Ziehn, a distinguished teacher of Chicago. He continued his work under Ziehn till the latter's death in 1912, and regarded him as his most valuable instructor.

Carpenter's music, whether in large or small forms, orchestral, vocal, or solo instrumental, is characterised by certain easily discernible traits, chief of which are a whimsical fancy, a delicate, even poetic humour, and tender sentiment. His melodic invention is facile and his themes have fluency and grace. He writes with an easy mastery of form, and his orchestral works are filled with colour, but never garish. In short, he is a composer who produces music with manifest enjoyment and whose quick impulses are governed by good taste. The following is a list of his works:

Orchestral: 'Adventures in a Perambulator,' 1915; concertino for piano and orchestra, 1915; symphony (Norfolk Festival), 1917; 'The Birthday of the Infanta,' ballet (Chicago Opera Company), 1919; 'Krazy Kat,' a jazz pantomime, 1922; chorus, 'The Home Road,' mixed voices; sonata in G major, piano and violin.

Song Cycles: 'Gitanjali' (Tagore); Watercolours (four Chinese tone poems); 'Improving Songs for Anxious Children.'

Numerous songs with piano accompaniment, and piano pieces.

W. J. H.

CARPENTRAS (Il Carpentrasso), the surname given by his Italian contemporaries to Eleazar Genet in reference to his origin from the town of Carpentras, Vaucluse). He is mentioned as 'Curpentrus' by Rabelais (*Le Quart Livre des faits et dicts héroïques de Noble Pantagruel* (1552). (See Genet, E.)

CARR, (1) John, a 17th-century London music publisher, who issued many of the important musical treasures of his day. He was a friend, and in some degree a partner, of John Playford, his contemporary in music-publishing, while his shop 'near the Middle Temple Gate' must have been close to Playford's—this latter was 'in the Inner Temple and near the Church door.' Among the works published by Carr, either alone or in conjunction with Playford, are:

'Tripla Concordia'; Matthew Locke's *Melothesia or certain rules for playing upon a continued Bass*, 1673; 'Comes Amoris, or the Companion of Love, being a collection of Choice Songs,' 5 books, 1687–94; *The Lawfulness and Expediency of Church Musick* (a sermon preached at St. Bride's in 1693);

and many others now of antiquarian interest. Thomas Salmon published through him his famous *Essay to the advancement of Musick by the casting away the perplexity of different cliffs*, 1672, a work which, attacked by Matthew Locke, John Playford, and others, caused a small paper war. With Playford, Carr published Henry Purcell's 'Sonnata's of III Parts,' 1683.

(2) Richard, son of the above, was a musician in Charles the Second's royal band, and he, for a very short time, was connected with Henry Playford as publisher—see imprint on *Theater of Musick*, 1685. John Playford the elder, in bidding farewell to the public in 'Choice Ayres,' fifth book, 1684, says that he will now leave his labours to be taken up by two young men, 'my own son and Mr. Carr's son who is now one of His Majesty's Musick, and an ingenious person whom you may rely upon.' F. K.

CARREÑO, Teresa (*b.* Caracas, Venezuela, Dec. 22, 1853; *d.* New York, June 12, 1917), an eminent pianist.

From her father, a Minister of Finance in her native place, she received her earliest musical instruction, but while quite young she studied further under L. Gottschalk in New York, and later under G. A. St. C. Mathias in Paris, and still later under Rubinstein. At the age of 9 she made her public début at a charity or benefit concert in the Academy of Music in New York, subsequently making a tour through the States. But for a time pianoforte-playing was in abeyance, for it is recorded that she sang at four days' notice, for Mapleson, the part of the Queen in 'Les Huguenots,' this being her first appearance on the stage. In 1875 she (temporarily as it proved) adopted the profession of the stage, under the management of Maurice Strakosch, and became part of the company which included Brignoli and Giovanni Tagliapietra, the latter her husband after her separation from E. Sauret. In 1892 she married Eugen D'Albert, from whom, however, she parted three years later. Subsequently she married Arturo Tagliapietra, youngest brother of her second husband. While touring in Venezuela with Tagliapietra's opera company Mme. Carreño conducted the performances for three weeks during a quarrel between the official conductor and the singers. In 1889 she reappeared as a pianist, and it is from that date that her fame increased year by year until she held one of the first places among contemporary pianists. Her playing was remarkable for almost masculine vigour combined with much romantic charm and poetry, and a superb technical finish. Mme. Carreño composed the Venezuelan National Anthem. R. H. L.

CARRODUS, John Tiplady (*b.* Keighley, Yorks, Jan. 20, 1836; *d.* London, July 13, 1895, violinist). His father was a zealous amateur, a violin player, and leader of the local Choral Society. The boy was destined to music from the first, and at 12 years of age was put into the able hands of Molique, whom he accompanied to Stuttgart, and with whom he remained till he was nearly 18. He had appeared in public in London on June 1, 1849, at a concert given by C. Salaman in the Hanover Square Rooms. On his return to London he entered the orchestra of Covent Garden, and made his first appearance as a solo-player at a concert of the Musical Society of London, Apr. 22, 1863; after that time he was frequently heard at the Philharmonic, the Crystal Palace, and other leading concerts. He published two violin solos and a 'Morceau de salon.' He was leader of the opera band for many years. His death took place within a few hours of his return from the opera-house. G.

CARSE, Adam (originally A von Ahn) (*b.* Newcastle-on-Tyne, May 19, 1878), composer.

He received his musical education chiefly at the R.A.M., where he studied composition under Corder, and held the Macfarren scholarship. He was made an associate in 1902. He has been engaged chiefly in teaching, but in spite of this the list of his compositions is considerable. It includes a cantata, 'The Lay of the Brown Rosary,' which was first performed at the Queen's Hall, Mar. 1902. But the greater part of his important work is orchestral. The following have received public performance: 'The Death of Tintagiles' (St. George's Hall, July 1902); 'Prelude to Manfred' (Philharmonic Society, Mar. 1904); concert overture in D (London Symphony Orchestra, Dec. 1904); symphonic poem, 'In a Balcony' (Promenade Concert, Aug. 26, 1905); and a symphony in C minor (Patrons' Fund Concert, July 3, 1906). A second symphony in G minor, played at the R.C.M. students' concert, Nov. 19, 1908, was revised and produced at the Newcastle festival of 1909. Later works for orchestra include a set of variations produced at a concert of the R.C.M. Patrons' Fund (July 1913), and Two Sketches for strings founded on a Northumbrian song and dance played at the Promenade Concerts (1924). Carse has also written songs and chamber music, and has made a speciality of easy pieces suitable for teaching purposes. (See *B.M.S. Ann.*, 1920.)

G. S. K. B., with addns.

CARTE, Richard D'Oyly (*b.* London, May 3, 1844; *d.* there, Apr. 3, 1901), famous as the impresario of the Gilbert and Sullivan partnership, was the son of Richard Carte, a partner in the well-known firm of Rudall, Carte & Co., music publishers and musical instrument makers. Their speciality was the flute, and D'Oyly Carte's father was himself an exceptionally good flute player. His mother came from the Suffolk branch of the old D'Oyly family, hence the addition to his family name.

Richard was educated at the University School and College, London, which he left at the age of about 17 to join his father's business and to study music. Indeed the latter seems to have come first in his mind, for not only did he write and publish songs and flute exercises, but he composed an opera, 'Dr. Ambrosias,' produced privately at St. George's Opera House, Langham Place, Aug. 8, 1868. Nevertheless D'Oyly Carte soon discovered that not in composing, much less in flute making, lay his most promising abilities. He had a natural talent for management and organisation, and with no resources beyond those resulting from an admirable education he presently started a concert agency at Craig's Court, Charing Cross. Thanks in part no doubt to his excellent taste in artistic matters the venture was a success. He began to arrange tours. He looked after Gounod's business affairs when that composer was in England; he negotiated engagements for many singers and players, including

Carlotta Patti, Adelina Patti and Madame Liebhart; he took Mario, the tenor, on his last concert tour and he gave Edward Lloyd his first public engagement. Gradually he severed every connexion with his father's business, and, in addition to the concert agency, he began to associate himself with the production of light opera. In this connexion he introduced to England, among other operas, Lecocq's 'Giroflé-Girofla' and Offenbach's 'Whittington,' besides producing works such as 'Madame Favart,' 'Claude Duval' and so on. It was in 1875, during the run of one of these operas—Offenbach's 'La Perichole'—that the idea occurred to him which was destined to revolutionise light opera in England. Business was not good, so he suggested to Madame Selina Delaro, for whom he was then acting as manager at the Royalty Theatre, that a first piece should be put on and that Gilbert and Sullivan should be asked to provide it. The result was 'Trial by Jury.' Its success was considerable, and D'Oyly Carte, quick to see further possibilities, formed a syndicate to produce Gilbert and Sullivan operas at the Opera Comique. Later, following dissensions in the syndicate, he decided to build his own theatre. This he did in a street called at that time Beaufort Buildings, his first intention being to call it the Beaufort Theatre; only later the fortunate idea of using the local name of 'Savoy' occurred to him. Here in 1881 'Patience' was transferred from the Opéra-Comique, and the term 'Savoy Opera' has been applied to all these operas ever since. The Gilbert and Sullivan connexion (see SULLIVAN) remained unbroken till 1891, but with two new productions by the famous partners ('Utopia' in 1893; 'The Grand Duke' in 1896), several operas with music by Sullivan and *libretti* by different authors, and other works, few of which were wholly successful, D'Oyly Carte carried on the management of the theatre till his death.

In the meantime, however, he had embarked on a most interesting venture. In 1887 he acquired a site, then a waste space, in Cambridge Circus and built a theatre (now the Palace Theatre) on it for the purpose of producing a serious opera by Sullivan. It was hoped, apparently, that the publicity attaching to the theatre would bring forward other British composers and that British opera would be established as a regular institution. For instance, Hamish McCunn was to write music to a *libretto* by Andrew Lang on the subject of 'Cleopatra'; F. H. Cowen and Goring Thomas were asked to compose operas; and it was intended that Sullivan himself should write a second opera. In fact, however, only one English opera was heard at the English Opera House, Sullivan's 'Ivanhoe,' produced at the opening of the theatre on Jan. 31, 1891. This was extremely successful, but there was no English opera ready to follow it, and Messager's 'La Basoche,' brought forward to fill the gap, resulted in a considerable loss, so that the theatre was closed on Jan. 16, 1892. The theatre was then let for a season to Sarah Bernhardt, and subsequently D'Oyly Carte, who had become convinced of the fundamental difficulties of finding new operas and of the impossibility of making the venture profitable, sold it to a syndicate.

D'Oyly Carte was twice married, first to Miss Prowse by whom he had two sons, and subsequently, two years after her death in 1885, to Helen Lenoir who had acted as his secretary in the early days of the concert agency at Craig's Court. She was a talented woman who proved of great assistance to him during the remainder of his life, and after his death carried on the management of the Gilbert and Sullivan operas till her own death in 1913.

Much of the comfort of the modern English theatre may be traced to D'Oyly Carte's influence. For instance, the Savoy set a standard in comfort to other London theatres, and it was the first public building in England to be lit by electricity; no fees were charged for programmes or cloak-room accommodation, and an orderly arrangement of the 'queue' to pit and gallery was first instituted there. The English Opera House, too, was considered decidedly ahead of its time, the credit for which was entirely D'Oyly Carte's, because he was always keenly interested in building and himself suggested most points in the design. D'Oyly Carte has several claims on the gratitude of Englishmen. He combined knowledge of art and literature with organising ability in a manner none too common among impresarios, and thanks to his qualities in this respect he was able not only to see the possibilities of Gilbert as an opera librettist, but to make a lifelong friendship with Arthur Sullivan, without which the Gilbert and Sullivan partnership would hardly have lasted as long as it did. F. T^ye.

CARTER, (1) CHARLES THOMAS (*b.* Dublin, 1734; *d.* London, Oct. 12, 1804), composer, showed rare musical talent in his 16th year, and was appointed organist of St. Werburgh's Church, then a fashionable place of worship, in 1751, which position he held till the close of the year 1769.

John O'Keeffe says:

'Carter had been brought up in the choir of Christ Church Cathedral, Dublin [1740–45], and was organist to Werburgh Church. Any music he had never seen before, even upside down, he played it off on the harpsichord.'

In 1755 he published 6 sonatas for the harpsichord, and in 1760 wrote 'Shannon's Flowery Banks,' followed by the enormously popular 'Guardian Angels' (sung by Robert Mahon) in 1762, which was adapted as a hymn-tune,

'Oliver's,' in 1764, and as 'Helmsley' in 1769. At the close of the year 1769 he set 'O Nancy, wilt thou fly with me' (Scotticised as 'O Nannie, wilt thou gang wi' me')—words by Thomas Percy, subsequently Bishop of Dromore—to music which at once made his name, and he settled in London in 1770. Between the years 1773 and 1777 Carter's songs were popularised by Vernon at Vauxhall, but he also wrote what would now be termed 'musical comedies,' *e.g.* 'The Rival Candidates' (1775), 'The Milesians' (1777) and 'The Fair American' (1782), all performed at Drury Lane Theatre. In 1787 he was given the post of musical director of the Royalty Theatre, Goodman's Fields, where he produced 'The Birthday' (1787) and 'The Constant Maid'; and in 1792 he composed the comic opera 'Just in Time' for Covent Garden. O'Keeffe, in his *Recollections*, has some amusing stories of Carter (who was as improvident as his countryman Bickerstaffe), and praises highly his hunting song 'Ye Sportsmen, give ear.' He was musical director of Lord Barrymore's Theatre at Wargrave from 1786–89.

W. H. G. F.

(2) Sampson, elder brother of the above, graduated Mus.D. at Dublin University in 1771. He was a lay vicar-choral of both Dublin cathedrals—Christ Church and St. Patrick's—and survived his brother Thomas (1) by some years.

CARTER, Thomas (*b.* Dublin, May 1769; *d.* London, Nov. 8, 1800), was a chorister in Cloyne Cathedral.

So great was his musical precocity that he was taken up by the Earl of Inchiquin, who sent him to Italy. Having finished his studies at Naples in 1788 he went to India, and was musical director of the theatre at Calcutta. His health broke down and he returned to London, where, in 1793, he married a Miss Wells, of Cookham, Berkshire. He composed many theatrical interludes, and some trivial songs.

W. H. G. F.

CARTIER, Jean Baptiste (*b.* Avignon, May 28, 1765; *d.* Paris, 1841), violinist, son of a dancing-master.

His first teacher on the violin was an Abbé Walrauf. In 1783 he went to Paris and continued his studies under Viotti. His progress must have been rapid, as he very soon, on Viotti's recommendation, obtained the post of accompanist to Marie Antoinette, which he held up to the outbreak of the Revolution. From 1791–1821 he was in the band of the opera as assistant leader and solo-player. From 1804 he was a member of the Emperor Napoleon's private band under Paisiello and of the Royal band from 1815 till 1830. Cartier was a good violinist, and it was his great merit to have revived the noble traditions of the old Italian school of violin-playing by publishing new editions of the works of Corelli, Tartini, Nardini and other great masters, which at that time were all but unknown in France. He thereby caused not only his own numerous pupils but all the young French violinists of his time to take up the study of these classical works for the violin. In his work *L'Art du violon* (Paris, 1798 and 1801) Cartier gives a comprehensive selection from the violin music of the best Italian, French and German masters, which is rightly regarded as a practical history of violin literature in the 17th and 18th centuries.

It is much to be regretted that a history of violin-playing, which he wrote, has never been made public. His compositions are of no importance. He published sonatas in the style of Lolli, études, and duos for violins. Fétis also mentions 2 operas 2 symphonies and violin concertos, which have remained in MS.

P. D.

Bibl.—Marc Pincherle, *Les Violonistes, compositeurs et virtuoses* H. Laurens, *Collection des Musiciens célèbres*, Paris, 1922).

M. L. P.

CARULLI, (1) Ferdinando (*b.* Naples, Feb. 10, 1770; *d.* Paris, Feb. 1841), an eminent guitarist. Though self-taught he attained a perfection of execution before unknown on the guitar, and on his arrival in Paris in 1808 created a perfect furore. In the space of 12 years he published 300 compositions, including a 'Method' which passed through 4 editions. He was also the author of *L'Harmonie appliquée à la guitare* (Paris, 1825), a treatise on the art of accompanying, which was the first work of its kind. A selection of his guitar compositions (with biography, etc.) forms Bd. 1 of the 'Alte Meister der Gitarre,' a series edited by E. Schwarz-Ruflinger. See review in *Z.M.W.*, June 1919, pp. 552-6.

M. C. C.

(2) His son, Gustavo, (*b.* Livorno, June 20, 1801; *d.* Boulogne-sur-mer, Oct. or Nov. 1876[1]), professor of singing and composer, is known for his didactic works, such as 'Solfèges' for one and two voices, singing methods and exercises, vocal quartets, etc.

M. L. P.

CARUSO, Enrico (*b.* Naples, Feb. 25, 1873; *d.* there Aug. 2, 1921), the most popular tenor of his generation. After studying singing from 1891 under Guglielmo Vergine, he made a modest début at the théâtre Bellini (Naples) in 'Faust,' 1894. He gradually gained favour, and established his position in Italy, when in 1899 he created at Milan the part of Loris in Giordano's 'Fedora.' He also created the tenor parts in Cilèa's 'Adriana Lecouvreur,' Franchetti's 'Germania' and other operas. Still little was heard of him in London till 1902, when he sang with brilliant success at Monte Carlo with Madame Melba in Puccini's 'Bohème.' He came to Covent Garden in the same year, appearing first (May 14) as the Duke in 'Rigoletto.' His success with the audience was unmistakable, but not every one in the theatre

[1] *Fétis.*

on that memorable night realised his possibilities. During the season Caruso earned more and more applause every time he was heard, but he did not at once cause a rush to the box office. An engagement in America kept him away from London in 1903, but he was back at Covent Garden the following year, and from that time dated his immense popularity. His Rodolfo in 'La Bohème' did more, perhaps, than any other part to establish his fame in London, and incidentally he and Madame Melba made the popular reputation of Puccini's opera in this country. Caruso sang regularly at Covent Garden down to 1907. In 1908, however, he did not appear. As the result of his triumphs at the Metropolitan Opera-House, New York, he had bound himself by an inclusive contract to Conried, and the Covent Garden Syndicate would not pay the terms demanded for his services. In its combination of power and sweetness Caruso's voice has not been approached in our time. Moreover, the singer made the most of nature's abundant gifts. His breath control was so complete that he could deliver the longest phrase without any suggestion of being at the end of his resources. He was equally at home in the passion of Canio's lament in 'Pagliacci' and in the tranquil charm of the duet in the dungeon at the end of 'Aïda.'

Towards the end of the American season of 1908–9 Caruso suffered a temporary failure of voice and could not finish his engagement. On his return to Europe he had to undergo a throat operation, but after a period of rest his voice returned with undiminished powers. When in 1913, terms having been arranged, Caruso came back to Covent Garden, he had an enthusiastic welcome; but some at least of his listeners felt that his voice, though still splendid, was not quite what it had been. It was noticeable, too, what in his later seasons in New York the critics often pointed out, that he was in better voice on one night than another. He had no vocal inequalities in his early London seasons. However, he remained, till the night of his last appearance on the stage, the chief attraction at the Metropolitan. He died of pleurisy. S. H. P.

Bibl.—P. U. R. Key and Bruno Zirato, *Enrico Caruso. The Authorised Biography of the World's Greatest Tenor.* London, 1923; Emil Ledner, *Erinnerungen an Caruso*, pp. 93. Hanover and Leipzig, 1922.

CARUSO, (1) Lodovico (Luigi), *b.* Naples, Sept. 25, 1754; *d.* Perugia, 1822), son of a musician at Naples, studied under Nicolo Sala, composed in all 60 operas (see *Fétis*), of which the first was 'Il Barone di Trocchia' (Naples, 1773), and the last 'L' avviso ai maritati' (Rome, 1810). His 'Artaserse' was performed in London in 1774. He also composed 4 oratorios, 4 cantatas, and masses, etc., of a style more dramatic than ecclesiastical. He is said to have lived for some time in Paris and Germany, and to have been conductor at Palermo. He had a brother (2) Emmanuele, also a musician. M. C. C.

CARVALHO, João de Sousa (*b.* Alemtejo, before 1769; *d.* after 1793), a Portuguese dramatic composer who studied in Italy. Vasconcellos mentions 12 operas by him, performed at Lisbon between 1769 and 1793, and a cantata 'O monumento immortal' sung on June 8, 1775, at Lisbon, on the occasion of the unveiling of a royal statue. Music had a large share in the celebrations. The first day of the festival consisted of Jommelli's opera 'Il Demofoonte'; the second, 'L' Eroe coronato,' an Italian serenata by David Pérez, the third, the 'Immortal Monument' of Carvalho. From 1793 onwards, Carvalho published a number of compositions in the *Jornal de Modinhas.* J. B. T.

CARVALHO, (1) Marie Caroline Félix, *née* Miolan (*b.* Marseilles, Dec. 31, 1827; *d.* Puys, Seine-Inférieure, July 10, 1895), a distinguished soprano, received instruction from her father, François Félix Miolan, an oboe player, and from Duprez at the Conservatoire, Paris (1843–47), where she obtained the first prize in singing. She made her début in the first act of 'Lucia,' and in the trio of the second act of 'La Juive,' at Duprez's benefit Dec. 14, 1849. She appeared at the Opéra-Comique, Apr. 29, 1850, in 'L'Ambassadrice,' May 22 in 'Le Caïd,' and July 20 in 'Giralda,' and made her reputation as Isabelle in 'Le Pré aux clercs,' as the heroines on the respective productions of 'Giralda' and 'Les Noces de Jeannette,' July 20, 1850, and Feb. 4, 1853. In the latter year she married Carvalho (see (4)) then engaged at the same theatre. From 1855–66 she sang at the Lyrique during her husband's management, first in two successful creations, 'La Fanchonnette' (Clapisson), and 'La Reine Topaze' (Massé). She made a great effect as a Mozart singer, *e.g.* Cherubino, Zerlina and Pamina; and by her creation of the heroines in Gounod's operas.

'The opera stage has rarely seen a poet's imagining more completely wrought than in the Marguérite of Mme. Miolan-Carvalho . . . I had . . . watched the progress of this exquisitely finished artist with great interest . . . finding in her performances a sensibility rarely combined with such measureless execution as hers . . . but I was not prepared for the delicacy of colouring, the innocence, the tenderness of the earlier scenes, and the warmth of passion and remorse and repentance which one then so slight in frame could throw into the drama as it went on . . . Those know only one small part of this consummate artist's skill that have not seen her in this remarkable "Faust"' (Chorley).

From 1868–83 she sang alternately at the Opéra and Opéra-Comique (as Isabella in 1872 on the 1000th performance of 'Le Pré aux clercs,' one of her successes) until her retirement on June 9, 1885. She first appeared in England at the Royal Italian Opera as Dinorah, with great success, on the production of that opera ('Pardon de Ploërmel') July 26, 1859.

She sang every season until 1864 inclusive, and again in 1871–72, and worthily maintained her reputation—viz. as Margaret on the production of 'Faust,' Oscar ('Ballo in maschera'), the Zerlinas (Mozart and Auber), Matilde, Donna Elvira, Rosina ('Barbiere' and 'Nozze'), Catarina ('L'Étoile du nord'), the Countess ('Le nozze'), etc., and in the small part of the Happy Shade in 'Orfeo.' Mme. Carvalho also sang at Berlin, St. Petersburg, Brussels, Marseilles and elsewhere. Two brothers of Mme. Carvalho were also musicians. (2) Amédée Félix (*d.* New Orleans), orchestral conductor; (3) Alexandre (*d.* Apr. 26, 1873), professor of organ and harmonium, and as such attached to the Lyrique for several years. (4) Léon Carvaille, known as Carvalho (*b.* Port-Louis, Île de France, Jan. 18, 1825; *d.* Paris, Dec. 29, 1897), a noted opera manager. Educated at the Paris Conservatoire, where in 1848 he obtained an *accessit*, he played small parts at the Opéra-Comique, was director of the Lyrique, 1856–68 (except 1861), afterwards at the Vaudeville, where he produced Daudet's 'L'Arlésienne' with Bizet's music. He became stage manager at the Opéra, and in 1876 manager of the Opéra-Comique. In consequence of the fire of May 25, 1887, a heavy fine was imposed upon him, and he was imprisoned for a time, since the accident was judged to be the result of managerial carelessness. He was released on appeal and was again manager from 1891 until his death. During his career, in addition to works already named, he revived Gluck's 'Orphée' with Viardot-Garcia, and produced 'Les Troyens' (Berlioz), 'Contes d'Hoffmann,' 'Lakmé,' 'Manon,' the operas of Bruneau, etc. He had previously produced at the Lyric the same composers' early operas. Later, at the Opéra-Comique in 1883, he revived 'Carmen' after seven years' neglect. In 1888 he was succeeded by M. Paravey. A. C.

Bibl.—Spoll, *Mme. Carvalho, notes et souvenirs.* Paris, 1885.

CARVER, Robert (*b. circa* 1491), monk of Scone Abbey, is important as a Scottish composer of the 16th century, whose works have not yet (1927) been fully examined.

There are but scanty records concerning a certain religious house in Perthshire, the Abbey of Scone, which eventually formed part of the royal palace of that place. One priceless document is in the Advocates' Library at Edinburgh. The name 'Antiphonarium,' by which it is called, is incorrect, as the MS. contains a round dozen of masses and 30 motets, with 6 settings of Magnificat. The only name of a composer occurring through the MS. is that of Robert Carver, attached to several of the compositions, and in two cases accompanied by a date, either of actual composition or merely of transcription, 'Robertus Carver, alias Arnat, Canonicus de Scone' (or 'Sconensis'). In 1513 the composer is stated to have been 22 years old, so that he was born in 1491, and a man of 55 when he wrote out the other dated piece, 1546. Neither of the surnames is associated particularly with Scotland, nor does either look like a name adopted on the Canon's entry into religion. In the *Liber Ecclesie de Scon*, published by the Bannatyne Club in 1843, on p. 207 there is a 'Preceptum' of Sasine (seisin) quoted by Patrick Hepburn, Bishop of Moray and Abbot *in commendam* of the Abbey of Scone, to which is appended the signature of 'Robertus Carwor,' as one of the chapters. The date of this is Nov. 4, 1544.

Scanty as are these external evidences, the music contained in the MS. shows that Carver had mastered the art so far as it was developed in his time. The skill with which the 19 parts are handled, the composer's sense of melodic beauty, and, perhaps more than all, his command of sonorous effect, are far in advance of his time. The single motet which the writer has transcribed is in eight contrasted movements, beginning with the words 'O bone Jesu,'[1] contains in some of them a wonderful and even thrilling effect of sonority, for the whole 19 voices are combined on the word 'Jesu,' and the sequence of harmonies is surprisingly rich and varied. In laying out his 19 parts, Carver was obviously considering the conditions of the community to which he belonged, for the adult male voices predominate, and no fewer than ten of them are tenors. The others are four trebles or sopranos, two altos ('Medius') and three baritones or basses. The first section is followed by one for three trebles, two altos, three tenors and two basses; this by an octet, two 19-part sections, a couple more in nine parts and a final portion in the original nineteen.

There is no such *tour de force* to be found elsewhere in the MS., but beside the 10-part Mass there are many works employing an unusually large number of parts. While these remain in the obscurity of the single part written separately on the pages, it is impossible to form an opinion as to their merits. Most of the masses are adorned with initial letters in red ink showing the elaborate penmanship that is usual, and at one or two points the flourish at the end of the composition contains a portrait or caricature of the same face, that of a typical ecclesiastic. As the face is recognisably the same in all, it is probable that some well-known character in the Scone community is represented. M.

CARY, Annie Louise (*b.* Wayne, Kennebec Co., Maine, Oct. 22, 1842; *d.* Norwalk, Conn., Apr. 3, 1921), American concert and opera singer. From 1864–66 she studied in Boston with J. Q. Wetherbee and Lyman Wheeler.

[1] Edited by J. A. Fuller Maitland and published in modern score by the Year Book Press, 1926.

In August of the latter year she went to Milan and prepared for an operatic career with Giovanni Corsi. She made her operatic début in Copenhagen. For two seasons she sang in theatres of the Scandinavian peninsula devoting her vacations to study with Mme. Viardot-Garcia at Baden-Baden. In the autumn of 1869 she sang at Brussels, then spent the winter in Paris studying with Maurice Strakosch and Bottesini. She now signed a contract with the brothers Maurice and Max Strakosch for 3 years, and in Aug. 1870 returned to the United States. From that time till her retirement at the height of her popularity in 1882, she was one of the most admired of opera and concert contraltos, her services being always in demand at the opera houses of London, St. Petersburg and New York. The seasons of 1875–77 were spent in Russia. She married Charles Monson Raymond in the spring of 1882, and subsequently lived in retirement in New York. Her voice was a mezzo-contralto of wide range and great beauty. H. E. K.

CARY ELWES, see ELWES.

CASA, (1) GIROLAMO DALLA, called DA UDINE, musician in the town band of Venice, 1574; maestro di cappella of the wind instrument orchestra of the Signioria of Venice, 1584; wrote 3 books of madrigals, and 'Il vero modo di diminuir,' 2 books, 1584.

(2) NICOLO DALLA (latter part of 16th cent.), a musician of the Signioria of Venice, probably a brother of the former, wrote 'Canzoni e madrigali a 4 voci. Lib. 2' (Venice, 1591). In a collective volume of 1586 there are 2 motets *a* 5 and a dialogue *a* 10 v.; also a song in Amadino's 'Florindo,' 1593.

E. v. d. S.

CASADESUS. The name of a family of French musicians whose members, both men and women, have made a name in their profession. The most notable are: (1) FRANÇOIS-LOUIS (*alias* Francis) (*b.* Paris, Dec. 2, 1870), gained a 2nd prize in harmony (1895) at the Conservatoire, was conductor of the Orchestre de Paris and founded and directed the American Conservatory at Fontainebleau (1918–22). He has striven, in his compositions, to realise the union of popular tendencies with the conception of modern dramatic production in music. He has composed operas, 'Cachaprès' (3 acts, 1914), 'Le Moissonneur' (5 acts), 'Au beau jardin de France' (1 act), both 1918; a symphony, and an operette, 'La Chanson de Paris,' performed in Paris, Nov. 1924.

(2) HENRI-GUSTAVE (*b.* Paris, Sept. 30, 1879), gained 1st prize for viola (Conservatoire, 1899), the founder (1901) and director of the Société des Instruments anciens' (Paris).

(3) MARCEL-LOUIS-LUCIEN (*b.* Paris, Oct. 30, 1882), gained 1st prize for violoncello (Conservatoire, 1903), was killed in the war (1914–18).

(4) MARIUS-ROBERT-MAX (*b.* Paris, Oct. 24, 1892), gained 1st prize for violin (Conservatoire, 1914), also a composer (quartets, etc.).

(5) ROBERT MARCEL (*b.* Paris, Apr. 7, 1899), gained first pianoforte prize (Conservatoire, 1913), an excellent performer, who appears to be one of the most gifted of the younger generation of French pianists. M. L. P.

CASALI, GIOVANNI BATTISTA (*b.* Rome, 1730; *d.* there 1792), maestro di cappella of St. John Lateran, Rome, from 1759 till his death.

An opera of his, 'Campaspe,' was produced at Venice 1740, and another, 'Antigone,' at Turin in 1752. Grétry was his pupil for 2 years in Rome, but Casali did not detect his talent, and sent him back with a letter of introduction in which he described the great opera writer as 'a nice fellow, but a thorough ass and ignoramus in music.' Casali's works comprise 4 masses, motets, Magnificats and many other pieces for the church as well as an oratorio, 'La benedizione di Giacobbe.' (See *Q.-L.*) He wrote in a very pure style, though without much invention. A Mass and four other pieces are given by Lück (Sammlung, 1859), two motets in Schott's Répertoire, and an 'O quam suavis,' a pretty melodious movement, by Novello, from Choron. G.

CASALI, LODOVICO (*b.* Modena, latter part of 16th cent.), organist at Scandiano, Modena, 1618; wrote masses, motets, etc.; also 'Ampiotheatro degli honori, e maravigliosa grandezza della musica,' MS. codex, Ferrara 16th century (?) (*Q.-L.*).

CASALS, PABLO (*b.* Vendrell, Tarragona, Dec. 30, 1876), famous violoncellist, has also, since he formed and directed his own orchestra at Barcelona, become known as a symphonic conductor.

The father of Casals was an organist and gave him some musical teaching at an early age. By the time he was 12 he had played nearly every orchestral instrument in some fashion. He next took up the violoncello seriously and had lessons from José Garcia in Madrid where he entered the Royal Conservatoire and studied chamber music, playing under MONASTERIO (*q.v.*). His own principles of VIOLONCELLO-PLAYING (*q.v.*) he developed in the time following this when he was a professor of his instrument at the Conservatoire of Barcelona and formed a quartet with Crickboom as first violin. He accepted an engagement as solo violoncellist at the Paris Opéra (1895) and in 1898 made his début as a virtuoso in Paris at the Lamoureux concerts and in London at the Crystal Palace. In 1901 he first visited America and thenceforward was touring on both sides of the Atlantic, but the recognition of his unique powers came comparatively slowly, no doubt because his supreme instrumental command was always controlled by and directed towards musical

interpretation. It was not until 1909 when he played Bach's suite in C for violoncello alone and took part in concerted works at a concert of the CLASSICAL CONCERT SOCIETY (*q.v.*) that Londoners realised Casals as representative of a new era in the art. Casals made the unaccompanied suites of Bach (formerly regarded as works of academic interest) take their true place in the repertory of living music, and in the sonatas of Beethoven and Brahms, the concertos of Haydn, Schumann, Lalo and others, he has given to his hearers all over the world a new conception of the music, by the faithfulness with which he follows his ideal of perfection.

In 1914 Casals married the American singer Susan Metcalfe, and his considerable powers as a pianist have since become evident to the public in a number of Lieder recitals in which he has appeared as his wife's accompanist. He is, however, more than that, for he has not only taught her a repertory of Spanish songs, notably those of Granados, but has modelled her interpretation of the classics in a remarkable fashion. In 1919 he founded and directed the Barcelona Orchestra and in doing so set his stamp on orchestral performance by applying through untiring rehearsal his principles of discovering the meaning of every phrase through faithfulness to the text. He has taken his orchestra to Paris, but first appeared as conductor in London with the London Symphony Orchestra on Dec. 7, 1925. The verdict of a leading orchestral player on that occasion was 'He demands perfection.' His compositions are for violoncello and pianoforte, violoncello solo, violin and pianoforte; a Miserere, and a large choral work, 'La Vision de Fray Martin.' C.

CASATI, GASPARO (*d.* Novara, 1644), a Franciscan monk, maestro di cappella at Novara Cathedral from 1641. He was a prolific composer of masses, motets, sacri concerti (several reprints) and other church music, published between 1641–44. (For list see *Q.-L.*) He died in early youth.

CASATI, GIROLAMO, DETTO FILAGO (*b.* late 16th cent.), a Carmelite monk of Novara, organist of Novara Cathedral, 1609; of Remanengo, near Cremona, 1625; maestro di cappella at Como Church, *c.* 1635; at the Carmelite Church (del Carmine), Pavia, 1654. He wrote several books of sacred songs *a* 2-5 v., and instrumental pieces for stringed instruments. E. V. d. S.

CASCIOLINI, CLAUDIO, a Roman composer of the early 18th century. He was choirmaster of the church San Lorenzo in Damaso, Rome, and upheld the traditions of the *a cappella* Palestrina style. Of his numerous compositions left in MS. a few have been published in modern times, some motets in Proske's 'Musica divina' and elsewhere, a Mass for 4 v. edited by Jansen, published by Schott, and 2 Requiems for 3 and 4 v. edited by Haberl. J. R. M.

CASE, JOHN, M.D. (*d.* Jan. 23, 1599–1600), sometime Fellow of St. John's College, Oxford, published in 1586 *The Praise of Musicke*, and in 1588 *Apologia musice tam vocalis tam instrumentalis et mixtae*. There is in the Cambridge Univ. Library a broadside of 'A gratification unto Master John Case, for his learned booke, lately made in the praise of Musicke. VI. voc.' Cantus secundus begins 'Let others prayse what seemes them best.' The broadside is a printed voice part of a poem by Thomas Watson bearing the words, 'set to music by William Byrd.' (See *D.N.B.*)

CASEDA, DIEGO (or JOSÉ) (*d.* Seville, 1723), a Spanish composer who was for many years maestro de capilla at the cathedral of El Pilar at Saragossa, and subsequently at Seville. Eslava gives a specimen of his work. J. B. T.

CASELLA, ALFREDO (*b.* Turin, July 25, 1883), pianist and composer, was on the advice of Martucci sent to Paris, entering the Conservatoire in 1896 and studying pianoforte with Diémer and composition with Fauré. He left that institution three years later after winning the Premier Prix. Since then Casella has displayed extraordinary activity as public performer, composer, conductor, and writer on musical subjects. On various occasions he has conducted the orchestras of Colonne and Lamoureux in Paris, of Mengelberg in Amsterdam, as well as the Philharmonic in Berlin and orchestral concerts in Rome and Milan. His contributions to criticism have appeared in *L'Homme enchaîné*, *Courier musical*, *Musical America*. In 1917 Casella founded in Rome the society which has since become the Società Italiana di musica moderna.

Of his many orchestral compositions, the best known so far are the suite in C major and the suite 'Le Couvent sur l'eau,' the latter derived from a ballet in two acts of the same title, which, so far, has never been performed in its entirety. As an accomplished pianist he knows and exploits the resources of the instrument with great skill, and some of his pianoforte compositions have won considerable popularity. His critics already recognise four distinct styles in his composition: the first embracing music written between the years 1902 and 1910; the second goes from 1911–15; the third, from 1915–18, and the latest, which began after two year's inactivity, consists technically of a modification of the third style.

The complete works of Casella are as follows:

PIANOFORTE

1902. Pavane.
1902. Variations sur une chaconne.
1904. Toccata.
1909. Berceuse triste.
1910. Barcarola.
1910. Sarabande.
1914. Nove pezzi.
1915. Pagine di guerra.
1916. Pupazrztti.

1916. Sonatina.
1917. A notte alta.
1918. Inezie.
1918. Grazioso e antigrazioso.
1918. Three pieces for Pianola.
1920. Undici pezzi infantili.
1920. Fox Trot.

LYRICS

1903. Cinque liriche.
1906. Soleils couchants, Soir païen, En Ramant.
1910. Sonnet.
1913. Il bove.
1915. L'Adieu à la vie.

ORCHESTRAL WORKS

1905. First Symphony in B minor.
1908–10. Second Symphony in C minor.
1909. Italia, rhapsody on Sicilian and Neapolitan melodies.
1909. Suite in C major.
1911–12. Le Couvent sur l'eau Suite.
1916. Heroic Elegy.
1917. 'Pagine di guerra films.'
1917. Pupazzetti.

VOICE AND ORCHESTRA

1913. Notte di maggio.

TRANSCRIPTIONS, Etc.

Préludes, valses et nocturnes de Chopin.
Islamey of Balakirew, adapted for grand orchestra.
Mahler's Seventh Symphony, transcribed for piano.
Frescobaldi's Clavecin and Organ works revised.
Beethoven's Sonatas.
Deux cadences for Mozart's Concerto 20.
The Evolution of Music.

CHAMBER MUSIC

Barcarola e scherzo for flute and piano.
Sonata for v'cl. and piano.
Siciliana e burlesca for piano, violin, and v'cl.
Five pieces for String Quartet.

FOR THE THEATRE

'Le Couvent sur l'eau,' commedia corografica, in two acts.

F. B.

CASELLA, Pietro (*d.* before 1300), a 13th-century Italian, the oldest known composer of madrigals. He was a friend of Dante, who mentions him in his *Purgatorio*, so that he must have died before 1300.

Bibl.—Carlo Perinello, *Casella* (1904); E. Pistelli, *Il canto di Casella* (1907). E. v. d. S.

CASENTINI, Signora (18th cent.), a good singer in the comic style, appeared at the Pantheon in London in 1791, taking the principal part in Paisiello's 'Locanda,' and other operas.

Lord Mount-Edgcumbe describes her as 'a pretty woman and genteel actress.' In 1793 she had married Borghi, second violin at the opera, and was singing at the King's Theatre; but she was not in good health, and her voice was too weak for that house. Her later history is not known. J. M.

CASIMIRI, Raffaele (*b.* Gualdo Tadino, Umbria, Nov. 3, 1880), studied under Bottazzo at Padua, where, in 1899, he was appointed master of the Schola Cantorum. In 1901 he became editor of the *Rassegna Gregoriana*, a quarterly magazine for the propagation of Solesmes Chant. Between the years 1903 and 1908 he was choirmaster at Calvi, Teano, Capua and Perugia, and, in 1909, was invited by Pope Pius X. to found the Schola Cantorum at Vercelli. At length, in Dec. 1911, he was promoted maestro of the Lateran Basilica, Rome. He composed numerous masses and motets, organ voluntaries, sacred songs, etc., but in 1915 devoted himself mainly to choir training and musical research. He was conductor of the Roman choirs that visited London in 1922. Among his discoveries are: the probable date of Palestrina's birth; the date of appointment of Palestrina as chorister in St. Mary Major; and the identification of that composer's masters as Rubino and Firmin le Bel of Noyau, two Frenchmen, thus destroying the legend of Goudimel. His discovery of Palestrina's annotated scores proved a corrective for Haberl's edition; he inaugurated (1924) *Note d' archivio*, a quarterly magazine for the publication of ancient scores, documents and historical jottings. W. H. G. F.

CASINI, Giovanni Maria (*b.* close of 17th cent.[1]; *d. circa* 1715), a Florentine priest.

He came to Rome early in life, but not before he had learnt the elements of counterpoint in his native town. At Rome he was successively the pupil of Matteo Simonelli and Bernardo Pasquini, under the last-named of whom he perfected himself as an organ player. The only post which he is known to have held was that of organist in the cathedral of Florence, which he held from 1703 until 1714 or later. He followed in the wake of Doni Vicentino and Colonna in endeavouring to revive the three old Greek 'genera' of progression, viz. the diatonic, the chromatic and the enharmonic. Fétis, indeed, says that, as several enthusiastic pedants of his class had done before him, he constructed a harpsichord in which the notes represented by the black keys were subdivided, so as to obtain just intonation. Baini does not go so far as this, but only states him to have adopted the views of those who thus wasted their labour and ingenuity. He describes a harpsichord which Casini had constructed in 1706 at the expense of Camillo Gonzaga, Count of Novellara. It had 4 octaves, each divided into 31 notes, and as the highest of the treble was in octaves to the lowest of the bass, it had 125 keys in all, black and white.

Casini's extant works consist of:

A MS. oratorio 'Il viaggio di Tobia,' and another dealing with the Flight into Egypt (at Modena), 'Canzonette spirituali,' Florence, 1703, a volume of motets for 4 v. in the 'stile osservato,' intituled 'Johannis Mariae Casini, Majoris Ecclesiae Florentiae modulatoris, et sacerdotio praediti, moduli quatuor vocibus: opus primum. Romae, apud Mascardum, 1706,' 'Responsori per la Settimana Santa, a 4 voci, op. 2, Florence, C. Bindi, 1706,' 'Pensieri for the Organ, op. 3, Florence, 1714.' A motet of his is given by Proske in his *Musica divina*, ii. No. 58, and two of the 'Pensieri' in vol. iii. of Torchi's *L' arte musicale in Italia*. E. H. P.

CASSA, see Drum (2).

CASSADÓ, Joaquín (*b.* Mataró, near Barcelona, Sept. 30, 1867; *d.* there, May 25, 1926), a Spanish composer who began his career as choirmaster of Nuestra Señora de la Merced at Barcelona. He was afterwards organist of S. José, and conductor of a choral society, the Capilla Catalana, which he founded in 1890. Latterly he has lived much in Paris. His compositions, besides a quantity of church music include a 'Sinfonía dramatica' (Nuremberg, 1903), symphonic poems, a comic opera and 'Hispania' a fantasía for PF. and orchestra (Paris, 1911). J. B. T.

[1] *Fétis* gives 1675 as the date of his birth, but it is not ascertained.

CASSATION, perhaps implying 'farewell,' designates a piece of instrumental music of the 18th century, for the open air (some writers claim a derivation from the German *Gasse*, a street) in several movements, much like the SERENADE or DIVERTIMENTO, though it seems appropriate only to the finale of such a composition. In Köchel's Mozart Catalogue there are three, Nos. 62, 63, 99, the last two of seven movements each. G.

CASSEL, GUILLAUME (*b.* Lyons, 1794; *d.* Brussels, 1836), dramatic singer; studied first under Georges Jadin, and then at the Paris Conservatoire under Garat and Talma.

He made his début at Amiens, and sang at various places previous to his appearance at the Opéra-Comique in Paris, where he remained for three years. At the end of that time he quarrelled with Pixérécourt, the director, and retired to Belgium, where he settled for life. After a five years' engagement in Brussels he retired from the stage in 1832, and became a teacher. He trained many eminent pupils, including Madame Dorus-Gras. In 1833 he was appointed professor of singing at the Brussels Conservatoire. M. C. C.

CASSIODORUS, MAGNUS AURELIANUS (*b.* Schillazzo, Lucania, *c.* 485; *d.* Vivarese, Calabria, *c.* 580), held high offices at the courts of Theodoric and Athalaric. He retired to the monastery built by him at Vivarium (Vivarese), where he wrote his work *De artibus . . .*, including a chapter, *Institutiones musicae*, which, together with Boetius, forms one of the chief sources of information about the musical theories of the ancients and about the musical instruments of his time. E. V. D. S.

CASTANETS (or castagnettes) consist of two small pieces of hard wood, shaped somewhat like a scallop shell. The two halves are hinged together by a string, the ends of which pass over the thumb and first finger of the performer. The remaining fingers strike the two halves together, either in single strokes, or in trills made by using the fingers in succession; the instrument emits a deep hollow *click*, which, although not a musical note, is capable of considerable variety of tone-colour. A good performer is able to syncopate one hand against the other in a variety of rhythmic combinations, and to produce carefully graduated crescendos and diminuendos. The castanets are by no means an easy instrument to play, the musicianship of a dancer being at once revealed by her control, or the lack of it. The emotional value of castanets well played is very great. They are believed to be Spanish in origin, dating from the immodest dancers of Cadiz, who visited Rome and were alluded to by Martial in his Epigrams; the Moors probably adopted them from the Spaniards.

When required to be played in the orchestra, to accompany dance-music, it is usual to attach a pair, half on each side, to a flat piece of hard wood, ending in a stick about eight inches long. By shaking this apparatus, the required effect is produced, without the necessity of fitting the castanets to the fingers of the performer, who generally is playing some other instrument, and must suddenly take up the castanets to play a few bars. Another contrivance, used chiefly in military bands, consists of a double pair of castanets held open by light springs and mounted on a frame attached to the hoop of a side-drum. In this form the castanets are worked by the drummer with the ordinary side-drum sticks.

D. J. B.; addns. J. B. T.

CASTEL, LOUIS BERTRAND (*b.* Montpelier, Nov. 11, 1688; *d.* Paris, Jan. 11, 1757), Jesuit theorist and writer on musical subjects, studied mathematics at Toulouse, and later (1720) at Paris. He was struck by some passages in Newton's 'Optics,' remarking on the ratio similarities between the breadth of the seven colour-bands in the spectrum, and the seven string-lengths, which, when in vibration, produce the individual notes of the major scale. He thereupon busied himself, first in theory but later in practice, with the construction of a 'Clavecin oculaire,' the colour scale of which corresponded with that of the diatonic scale, and was calculated to appeal to the eye as the other does to the ear. He spent much time and money on this project, and was one of the earliest to investigate the scientific relationship between colour and sound. Most subsequent attempts to construct 'colour-organs' have been based on a different principle (the simple ratio equivalencies between the vibration frequencies of the notes of the musical scale on the one hand, and those of the component colours in the colour-octave on the other). Below is a list of Castel's writings:

Nouvelles expériences d'optique et d'acoustique (*Mémoires de Trévoux*, 1735); a description of the 'clavecin oculaire' which was translated into German (Hamburg, 1739). An English derivative also appeared under the title *Explanation of the Ocular Harpsichord* (London, 1757).

Lettres d'un académicien de Bordeaux sur le fond de la musique (Paris, 1734).

Remarques sur la lettre de M. Rameau (*Mémoires de Trévoux*, 1736). Castel was acquainted with Rameau and is supposed to have assisted him with his writings on musical theory.

(See *Fétis.*)

J. MK.

CASTELLAN, JEANNE ANAÏS (*b.* Beaujeu, Rhone, Oct. 26, 1819), a distinguished soprano singer who received instruction in singing from Bordogni and Nourrit at the Paris Conservatoire, and gained 1st prizes in singing and opéra-comique in 1836. She went on the operatic stage in Italy, and sang with success at Turin, Milan and Florence (where in 1840 she married Enrico Giampetro, a singer), also at Vienna, etc. She first appeared in England, May 13, 1844, at a Philharmonic concert, with such success that she was re-engaged at a subsequent concert on June 10, and at other concerts. On Apr. 1, 1845, she first appeared at Her Majesty's as Lucia, with fair success,

and remained there during that and the two next seasons, and was Isabella in 'Robert le Diable' (May 4, 1847) with Jenny Lind. From 1848–52, except 1849, when she was at the Opéra, Paris, where she was the original Bertha in 'Le Prophète,' she sang each season at Covent Garden, where she proved herself a pre-eminently useful singer in many parts of different character. Her last new parts were Glicera in 'Sappho' (Gounod), Cunegunda in 'Faust' (Spohr), and Amazili in 'Jessonda' (*ibid.*). Mme. Castellan was also a favourite in concerts and festivals, and last appeared at the Birmingham Festival of 1858. A. C.

CASTELLI, Ignaz Franz (*b.* Vienna, Mar. 6, 1781; *d.* there, Feb. 5, 1862), German dramatist of great popularity, author of the librettos of Weigl's 'Schweizerfamilie,' and Schubert's 'Verschwornen' or 'Häusliche Krieg,' and adapter amongst others of Meyerbeer's 'Huguenots.'

From 1811 he held the post of 'Hoftheaterdichter' at the Kärnthnerthor Theatre in Vienna. He was the founder, and from 1829–1840, sole editor of the *Allgemeiner musikalischer Anzeiger.* M. C. C.

CASTELLO, Dario, maestro of instrumental music at S. Mark's, Venice, in 1629, wrote two books of sonatas 'in the modern style' for organ or spinet (or harpsichord), with violin, violetta, trombone, bassoon and trumpets; also for voices and instruments. Published, Venice, 1621–44; both in score and in parts. E. v. d. S.

CASTELNUOVO-TEDESCO, Mario (*b.* Florence, Apr. 3, 1895), composer, studied with Ildebrando Pizzetti, who, although anxious to let his pupil's own individuality develop itself freely, influenced him in a slight degree. At the age of 15 Castelnuovo composed a piece for piano, 'Cielo di settembre,' which revealed considerable originality and promise, and in 1913 a more mature work for the same instrument appeared under the title of 'Questo fu il carro della morte.' A year later followed a song, 'Ninna-Nanna,' two French songs, and two madrigals that showed not only great skill in choral writing, but the gift of interpreting the spirit of old poetry by modern means. Still more interesting in this respect are the two song-cycles written in 1915, 'Stelle cadenti' and 'Coplas,' on old folk-poetry, Italian and Spanish respectively. In 1916 Castelnuovo issued another choral work, the 'Two Greek Songs' for male voices, and to the same year belong the two songs from Tagore and a piano piece, 'Il raggio verde,' which now forms part of a cycle of sea-pieces with two other works dating from 1919, 'Alghe' and 'I naviganti.' The year 1917 saw the production of the songs, 'Il libro di Dolcina,' and in 1919 the three 'Canti all' aria aperta' for violin and piano were written.

A work of considerable importance was finished in 1920: the setting for voice and orchestra of three of the 'Fioretti' by St. Francis of Assisi. In the course of the same year Castelnuovo began his operatic setting of Machiavelli's comedy, 'La Mandragola.'

During the years 1921–24 no work of large dimensions appeared; the fact is doubtless attributable to the composer's continued occupation with his opera. Among the smaller works of that period, however, may be mentioned 'Cipressi' (1921), 'Vitalba e biancospino' (1922), 'Alt-Wien,' a Viennese Rhapsody (1923), and 'Epigrafe' (1923) for piano; 'Capitan Fracassa' and 'Ritmi' (1921) for violin and piano; and an important series of songs from Shakespeare's dramatic works, set to the original English words (1922–24).

In his instrumental pieces Castelnuovo combines a strongly personal and highly refined manner of handling his means of expression with a poetry of feeling that shrinks from superficial realism. He never attempts a direct reproduction of the pictorial aspects of his subjects, but always transmutes them into such purely musical values as appear to him to produce similar emotions. In his vocal music he refrains from merely throwing into relief the imagery of the poetry he chooses, and endeavours instead to express its essence by a definite atmosphere and a continuous musical movement. In the important song-cycles, 'Stelle cadenti' and 'Coplas,' for instance, where the temptation to interpret the popular feeling of the verses by means of real or imitated old Italian and Spanish folk-idioms must have been strong, Castelnuovo has chosen the more difficult and more subtle manner of creating equivalent impressions by modern and entirely personal means. Instead of merely illustrating the words, the music comments on them, either lyrically, philosophically or with gentle irony. The Shakespeare songs are models of purely musical and yet singularly apt settings, and the Italian composer's treatment of English prosody is irreproachable. E. B.

CASTIL-BLAZE, see Blaze.

CASTILLO, Diego del (*d.* Madrid, after 1600), a Spanish church-musician, who was organist at Seville in 1560, and succeeded Bernardo Clavijo as choir-master at the Chapel Royal, Madrid. Eslava prints 2 motets by him, for 5 voices. J. B. T.

CASTILLON DE SAINT-VICTOR, Marie Alexis, Vicomte de (*b.* Chartres, Eure-et-Loir, Dec. 13, 1838; *d.* Paris, Mar. 5, 1873), was admitted at the military academy of Saint Cyr in 1856, but abandoned the military career for music. His first teacher was Victor Massé, to whom he dedicated a symphony (1865); then César Franck from 1868. He had been introduced to him by his friend, H. Duparc. His musical studies were interrupted by the Franco-

German war, the hardships and privations of which impaired his health, and caused his premature death. First secretary of the Société Nationale at its foundation (1871), Castillon was exceptionally well gifted; his serious and refined talent, the nobleness of his inspiration, mark him as one of the most original of Franck's first pupils. He left behind him a quintet, op. 1, a quartet and two trios for piano and strings; a string quartet; a sonata for piano and violin; an orchestral suite (unpublished), a 'Marche scandinave,' 'Esquisses symphoniques,' an overture, 'Torquato Tasso,' for orchestra, all unpublished; Psalm lxxxiv. for soli, chorus and orchestra. His concerto for piano and orchestra, op. 12, performed for the first time on Mar. 10, 1872, at the Concert Populaire, conducted by Pasdeloup with Saint-Saëns at the piano, was outrageously hissed. He has composed pianoforte pieces, 'Fugues dans le style ancien,' 'Première Suite,' etc.; his songs, 'Six Poésies' (Armand Sylvestre), op. 8, opened the way to Duparc, Chausson and the modern French school of song; he may be considered a precursor in this branch, and one of the protagonists of the revival of chamber music in France. G. F.; rev. M. L. P.

Bibl.—Octave Séré, *Musiciens français d'aujourd'hui*, 1921, including a list of the composer's works.

CASTRATO. Eunuchs were in vogue as singers until comparatively recent times; they were employed in the church choirs of Rome and elsewhere, but exerted their greatest influence in the Italian opera of the 18th century. They were known as castrati. Their high-pitched voices were much appreciated, and resembled those of altos, trebles or sopranos in register, although not in quality.

The reason for the boyish type of voice is to be found in the absence of certain growth changes, which take place in the male at the time of puberty, as the result of circulation of certain internal secretions in the blood. The growth changes, as they affect the larynx, cause the wings of the thyroid cartilage to meet at a sharper angle than before, with the result that the Adam's apple becomes more prominent. The vocal cords increase in length and bulk, and their margins become thicker and more rounded; the various muscles and other parts of the larynx show a certain increase in size.

Because of these changes, the vocal cords of an adult man can vibrate more slowly than those of a boy, chiefly because of their increased mass, and the voice is lower in pitch. The quality of sound is also changed in the mature man, because a greater surface of the vocal cords comes into contact during phonation.

The larynges of castrati do not undergo these changes; some growth takes place, but it is the result of a very gradual process, and does not cause any interruption in the singing career. Furthermore, the voice remains of a high pitch, and the mechanism of singing is the same as in boyhood; therefore the training of professional castrati could begin at an early age and proceed uninterruptedly. It is probable that boys were chosen for the beauty of their voices and were then prepared for the calling of adult choristers; castration after puberty has no effect on the larynx.

Although the voice of the castrato has a high pitch, yet the quality is of a characteristic type and does not necessarily conform closely to that of a boy. The rest of the body, apart from the larynx, shows a greater development in eunuchs than in normal men. The capacity of the lungs and the force of expiration are equal to, if not greater than that of a mature man, so that the power of the voice of the castrato is very great. This characteristic, in conjunction with the distinctive quality, gave to singers of this type an extraordinary popularity. V. E. N.

CASTRO, Jean (Juan) de, of Spanish or Portuguese origin, a native of Evreux, Normandy,[1] was living at Antwerp in 1571; in 1582–84 was vice-Kapellmeister at Vienna; in 1588 and in 1591 was in the service of Duke William of Juliers, and was at Cologne in 1593 and 1596. A 3-part Mass was published at Cologne in 1599, books of motets at Louvain 1571, 1574, at Douai 1588, at Antwerp 1592, at Cologne 1593 and 1596; books of madrigals and chansons at Louvain 1570, 1575, 1576, Paris 1575, 1580, Antwerp 1569, 1582, 1586, 1591, 1592, 1595, etc. (See *Q.-L.*).

Bibl.—*Grande Encyclopédie*: article by Michel Brenet.

CASTRUCCI, (1) Pietro (*b.* Rome 1679; *d.* Dublin, Feb. 29, 1752), a distinguished violin-player and a pupil of Corelli.

In 1715 he came to England with Lord Burlington and became leader of Handel's opera-band. He had a benefit concert in London, July 23, 1715. He had a special reputation as performer on the Violetta marina, an instrument of his own invention. In Handel's 'Orlando' is an air accompanied by two violette marine with violoncelli pizzicati, 'per gli Signori Castrucci' (see the MS.) meaning Pietro and his brother Prospero. In Handel's 'Sosarme' is also an air with violetta marina obbligato. In 1737 he was superseded at the opera by Festing. To his undoubted talent Castrucci added an amount of charlatanism surprising in a pupil of Corelli. An instance is given by Burney (*Hist.* iv. 353 note). J. C. Walker (*Irish Bards*, 1786) states that Castrucci was invited to Dublin to conduct the Rotunda Concerts, that he died there in great poverty, but was honoured by a splendid funeral. He came to Dublin in 1750, and had a benefit concert at Fishamble Street, Feb. 21, 1751. If John O'Keeffe's *Recollections* are to be trusted, the date of Castrucci's death was

[1] According to Eitner; Liége according to Fétis.

1751–52, as O'Keeffe describes himself as 'about four years old' at the time (born 1747); but the date 1769 is given by most of the authorities. He published 12 concerti grossi and 3 books of violin sonatas. His brother, (2) PROSPERO (*d.* 1760),[1] was director of the 'Castle Society of Music,' and is famed as the original of Hogarth's 'The Enraged Musician.' He published 6 violin sonatas in 1739 (*Q.-L.*).

P. D.; addn. by W. H. G. F.

CATALANI, ALFREDO (*b.* Lucca, June 19, 1854; *d.* Milan, Aug. 7, 1893), composer.

He studied at first with his father, the organist of the church of S. Frediano in that city. At the age of 14 he wrote a Mass which was sung in the cathedral. At 17 he went to the Paris Conservatoire, where he studied in Bazin's class. Returning to Italy, he studied for 2 years at the Milan Conservatorio, at the theatre of which his first essay at dramatic composition, an 'Egloga' in one act, 'La Falce,' was produced in the summer of 1875. On Jan. 31, 1880, his grand 4-act opera, 'Elda' (words by D'Ormeville), was brought out at Turin; on Mar. 17, 1883, a similar work, 'Dejanice,' in 4 acts (libretto by Zanardini), was given at La Scala at Milan; in 1885 a symphonic poem for orchestra, 'Ero e Leandro,' attained considerable success; 'Edmea,' a 3-act opera (libretto by Ghislanzoni), was produced at La Scala, Feb. 27, 1886; 'Loreley' was given at Turin in 1890, and at Covent Garden, July 12, 1907; and 'La Wally' in 1892. The last named has retained its popularity with Italian audiences. M.

CATALANI, ANGELICA (*b.* Sinigaglia, May 10, 1780; *d.* Paris, June 12, 1849), a great soprano singer.

Her father was a tradesman, and at about the age of 12 she was sent to the convent of Santa Lucia at Gubbio, where her beautiful voice soon became a great attraction. On leaving the convent, she found herself, owing to the sudden impoverishment of her parents, compelled to perform in public. Her musical education had been but ill cared for, but her voice was so full, powerful and clear, her intonation so pure and true, and her instinctive execution of difficult and brilliant music so easy and unfaltering, that her singing had a charm which has scarcely ever been equalled, and her very first steps in a theatrical career were marked by the most extraordinary success. In 1795, at the age of 16, she obtained her first engagement at the Fenice at Venice, and made her début as Lodoiska in Mayr's opera. Her face, figure and voice assured her success, a success which grew day by day, and lasted for nearly 30 years. In the season of 1798 she sang at Leghorn, the year after, at La Pergola in Florence, and, in 1801, at Milan. From Milan she went to Florence, Trieste, Rome and Naples, exciting everywhere the same astonishment and admiration.

Her reputation now reached the ears of the Prince Regent of Portugal, who engaged her to sing at the Italian Opera there, and she arrived about the end of the year 1804. Her salary was 24,000 cruzados (£3000). It was here that she married Valabrègue, of the French embassy; but she always kept her name of Catalani before the public. Her husband, a stupid, ignorant soldier, appears to have had no ideas beyond helping his talented wife to gain the utmost possible amount of money on every occasion, and spending it for her afterwards. They went first to Madrid, and then to Paris, where she sang only in concerts, but where she gained even more fame than before.

In Dec. 1806, Mme. Catalani appeared at the King's Theatre, London. She had been engaged at a large salary: and her engagements entailed on the theatre an expense surpassing anything before experienced; moreover, her disposition would not endure the possibility of rivalry nor would the extravagance of her increasing demands allow any manager to engage other singers. It appears that the total amount received by her from the theatre in 1807, including benefits, was £5000, and her total profits that year, with concerts, provincial tour, etc., £16,700—an immense sum to be received in such a period for the services of a single artist. She received as much as 200 guineas for singing 'God save the King' and 'Rule, Britannia,' and at a single festival £2000. Had she practised the least economy she must have amassed a very great fortune; but this she did not do. Her husband, too, was passionately addicted to gambling, and lost vast sums at play. She remained seven years in England, where she finally succeeded in becoming the only singer of eminence, and led in both lines; but one singer does not constitute an opera, though Valabrègue used to say, 'Ma femme et quatre ou cinq poupées,—voilà tout ce qu'il faut.' She sang at the Birmingham Festival of 1811. In 1812 she appeared as Suzanna on the occasion of the first performance in England of 'Le nozze di Figaro.' She quitted the theatre at the end of the season of 1813, having first endeavoured (unsuccessfully) to purchase it, and so become sole proprietor, sole manager and sole singer. After leaving this stage, she for many years never trod any other, except at Paris, where she obtained the management of the Italian opera, with a subvention of 160,000 francs; but the undertaking was not fortunate. On the return of Napoleon, in 1815, she left Paris, going first to Hamburg, and afterwards to Denmark and Sweden, and exciting everywhere the wildest admiration and enthusiasm. She returned to France, after the Restoration, by Holland and Belgium. On her arrival at

[1] Burney.

Paris, she resumed the direction of the Théâtre Italien, and established the same ruinous system which had, for a time, destroyed opera in London. Every expense of scenery, orchestra and chorus was curtailed, and every singer of worth excluded, in order that the entire receipts might go, with the subvention, into the purse of Valabrègue This was not all. To suit this state of things the operas were arranged in such a manner that little of the original but the name remained. The rest consisted of variations by Rode, and similar things, with the famous 'Son regina,' interpolated in place of the concerted pieces and songs which had been cut out. In May 1816 Catalani left her opera in the hands of managers, and went to Munich to give some concerts and representations. In 1818 she left her opera entirely, and resumed her wanderings, which lasted nearly ten years. In 1824 she returned to London, performing a certain number of nights with no regular engagement. She reappeared in 'Il nuovo fanatico per la musica,' an opera by Mayr, 'arranged' for her. 'Her powers were undiminished, her taste unimproved.' She next continued her wanderings on the continent, visiting in turn Germany, Italy and Paris once more, then Poland, Russia and the north of Germany again in 1827. About this time she sang for the last time at Berlin, and resolved to cease singing in public. But she revisited England once more in 1828, Lord Mount-Edgcumbe heard her at Plymouth, and describes her as having lost, perhaps, a little in voice, but gained more in expression: as electrifying an audience with her 'Rule, Britannia'; and as still handsome, though somewhat stout. After a time, she retired to a villa which she had bought in the neighbourhood of Florence. Her charitable deeds were innumerable, and the amount of money earned by her in concerts for such purposes alone has been estimated at 2,000,000 francs. At her residence she founded a school of singing for young girls.

According to Fétis and all other authorities, her voice must have been one of extraordinary purity, force and compass, going as far as g''' with a sweet clear tone. This exquisite quality was allied to a marvellous truth and rapidity of execution. No singer has ever surpassed, or perhaps equalled, her in chromatic scales, whether in velocity or precision.

Lord Mount-Edgcumbe says:

'Her voice is of a most uncommon quality, and capable of exertions almost supernatural . . . while its agility in divisions, running up and down the scale in semi-tones, and its compass in jumping over two octaves at once, are equally astonishing. It were to be wished that she was less lavish in the display of these wonderful powers, and sought to please more than to surprise; but her taste is vicious, her excessive love of ornament spoiling every simple air, and her greatest delight (indeed her chief merit) being in songs of a bold and spirited character, where much is left to her discretion (or indiscretion), without being confined by the accompaniment, but in which she can indulge in *ad libitum* passages with a luxuriance and redundancy no other singer ever possessed, or if possessing ever practised, and which she carries to a fantastical excess.'

J. M.

CATCH originally meant simply a ROUND (*q.v.*) for three or more voices (unaccompanied), written out at length as one continuous melody, and not in score. The catch was for each succeeding singer to take up or catch his part in time; this is evident not only from the manner in which they were printed, but also from the simple and innocent character of the words of the oldest catches, from which it would be impossible to elicit any ingenious cross-reading. But in course of time a new element was introduced into catches, and words were selected so constructed that it was possible, either by mispronunciation or by the interweaving of the words and phrases given to the different voices, to produce the most ludicrous and comical effects. The singing of catches became an art, and was accompanied by gesture, the skill with which they were sung has become a tradition, and certainly many old specimens are so difficult that they must have required considerable labour and practice to sing them perfectly.

Catches were most in vogue in the reign of the dissolute Charles II., and as much of the popular literature of that period was sullied by indecency and licentiousness it is not surprising that catches were contaminated with the prevailing and fashionable vice[1]; the more than questionable character of the words to which many of the catches of that age were allied has sufficed to ensure the banishment of a large amount of clever and learned musical contrivance. In later times Dr. William Hayes, S. Webbe and Dr. Callcott have excelled in the composition of catches: 'Would you know my Celia's charms' by Webbe is a well-known example; 'Ah, how, Sophia,' and 'Alas, cry'd Damon' by Callcott are also tolerably well known, and still occasionally performed.

Dr. W. Hayes published several collections of catches, some with words by Dean Swift, and in his preface to the first set (1763) says 'The Catch in Music answers to the Epigram in poetry, where much is to be exprest within a very small compass, and unless the Turn is neat and well pointed, it is of little value.'

W. H. C.

The following are the principal collections of catches and glees published in England.

Glees, rounds, catches and canons are so inextricably mixed in publication that it would be an extremely difficult task to indicate the particular character of each collection.

After the publication of 'Pammelia,' 'Deuteromelia' and 'Melismata,' John Playford and his son were responsible for catch

books. John Walsh and John Johnson followed, but their issues were mainly reprints from the earlier books. The institution of the different catch and glee clubs throughout the country gave great impetus to the composition and publication of this class of music. The list does not pretend to anything like completeness, but it may be of use to the student of the subject, and may be taken also as an illustration of the article GLEE.

1609. Pammelia: Musicke's Miscellanie, or mixed varietie of Pleasant Roundelayes and delightful Catches of 3, 4, 5, 6, 7, 8, 9, 10 parts in one. None so ordinarie as musicall, none so musicall as not to all very pleasing and acceptable.

1609. Deuteromelia: or second part of Musicke's Melodie, or Melodious Musick of Pleasant Roundelaies. K. H. Mirth, or Freemen's songs, and such delightful catches.

1611. Melismata: Musicall Phansies fitting the court, citie, and countrey Humours.
The first two were edited and collected by Thomas Ravenscroft; the last bears in addition the name William Ravenscroft.

1651. Musical Banquet. J. Playford.

1652. Catch that Catch can, or a choice collection of Catches, Rounds, and Canons for 3 and 4 voyces. Collected and published by John Hilton. Sm. oblong. John Playford.
The punning title and much of the contents are taken from Ravenscroft's publications.

1667. Catch that Catch can, or The Musical Companion (a second edition of the above, with additions). Oblong 4to. J. Playford.

1672–73. The Musical Companion in two books (a third edition with additions). Oblong 4to. J. Playford.

1685. Catch that Catch can, or the second part of the Musical Companion. Oblong 4to. John Playford.

The Pleasant Musical Companion: Being a choice collection of Catches for three and four voices. Oblong 4to. John Playford.
The date of first edition not ascertained. The sixth dated 1720; eighth, 1724; ninth, 1726; and tenth, 1730.

1686. The Second Book of the Pleasant Musical Companion. Oblong 4to. J. Playford.

1687–1726. The Second Book of the Pleasant Musical Companion. Second edition dated 1687; a fourth dated 1701 (with a Supplement, 1702); a fifth, 1707; and a ninth, 1726.
Another book, with the title 'The Pleasant Musical Companion,' was published by John Johnson of Cheapside about 1740. It is from engraved plates, and appears to be a reprint from the Playford predecessors.

Circa 1730. The Catch Club, or Merry Companions: Being a choice collection of the most diverting catches for three or four voices (with a second part). Oblong 4to. Published by John Walsh, senior. A later one bearing the same title, but selected by C. J. F. Lampe, was published about 1762 by Walsh, junior, in oblong folio.

1763. A Collection of Catches, Canons, and Glees, for three, four, five, six, and nine voices, never before published. Selected by Thomas Warren, London, for the editor. Oblong folio.
This most valuable collection extended from the above first volume, dated 1763, to the thirty-second. It contained 652 pieces. Warren was secretary to the Noblemen and Gentlemen's Catch Club.

A Collection of Vocal Harmony, consisting of Catches, Canons, and Glees. Selected by Thomas Warren. Oblong folio.

1763. Social Harmony, consisting of a collection of songs and catches. By Thomas Hale, of Darnhall, Cheshire. 8vo.
Another work with this title was published in octavo volume by Jones & Co. about 1830.

1764. Catches, Canons, and Glees. Composed by Samuel Webbe. Nine volumes. Oblong folio.
This was issued at intervals by Webbe from 1764 onwards to about 1798. A selection from the work was made and published in three volumes.

1769. The Essex Harmony: Being an entire new collection of the most celebrated Songs and Catches, Canzonets, Canons, and Glees. By John Arnold. 2 vols. 8vo, 1769; second edition, 1777; third edition, 1786.
A much later work under this title was published by Bland & Weller in two vols. 4to, *circa* 1795.

Circa 1776. A Collection of Catches and Glees. Composed by L. Atterbury. Oblong folio.

1780. A Collection of Catches, Canons, Glees, Duets, etc. Four vols. Edinburgh, J. Sibbald.
This was reprinted by Longman & Broderip, and again by Muzio Clementi.

Circa 1780–90. The Gentleman's Collection of Catches, Glees, Canons, etc. Selected by J. Bland. Folio.

The Ladies' Collection of Catches, Glees, Canons, etc. Selected by J. Bland. Folio.
Two collections of selected glees, etc., which extended to twenty or more numbers. John Bland published other collections, besides quantities in sheet form.

Circa 1790. Apollonian Harmony: A collection of scarce and celebrated Glees, Catches, Madrigals, Canzonets, Rounds, and Canons. Six vols. 8vo. Thompson.
A later issue from the same plates was issued by Button & Whitaker.

Vocal Harmony: A collection of Glees, Madrigals, etc., including the prize glees from 1763 to 1794. Edited by Wm. Horsley. Nine vols. Folio.

The Flowers of Harmony. Four vols. 8vo.

Circa 1800. British Vocal Harmony: A select collection of ancient and modern Duets, Glees, and Catches. H. Gray. Oblong 8vo.

Circa 1810–15. A Collection of Catches and Glees. By William Cranmer, Edinburgh. 4to.

1821, etc. Kentish Harmony (a series of small square volumes published by W. Blackman).

The Apollo. A similar series, but embellished with portraits.

Convito armonico: A collection of Madrigals, Elegies, Glees, Canons, Catches, and Duets. Selected by S. Webbe, junior. Four vols. Folio.

1824. A Collection of Glees, Canons, and Catches. Composed by the late John Wall Callcott. Edited by Wm. Horsley. Two vols., with fine portrait.

1864. The Rounds, Catches, and Canons of England. Edited by Dr. Rimbault. Large 4to.

To the above might be added many collections of glees and catches by different writers, as those of Benjamin Cooke, Maurice Greene, J. Stafford Smith, J. Danby, Wm. Horsley and others. In addition is the great mass of minor publications and single sheets from Purcell's time onward. F. K.

CATCH CLUB. This society, the full title of which is 'The Noblemen and Gentlemen's Catch Club,' was formed in 1761 for the encouragement of the composition and performance of canons, catches and glees, and the first meeting took place in November of that year, when there were present the Earls of Eglinton, Sandwich and March, Generals Rich and Barrington, the Hon. J. Ward, and H. Meynell and R. Phelps. These gentlemen, with the Duke of Kingston, the Marquesses of Lorne and Granby, the Earls of Rochford, Orford and Ashburnham, Viscounts Bolingbroke and Weymouth, Lord George Sutton, Colonels Parker, Windus and Montgomery, Sir George Armytage, and H. Penton, W. Gordon and J. Harris, who joined in 1762, were the original members, and all subsequently enrolled were balloted for. Among distinguished persons afterwards admitted to the Club were George IV. (elected when Prince of Wales in 1786), William IV. (elected when Duke of Clarence in 1789), the Dukes of Cumberland (1786), York (1787), Cambridge (1807) and Sussex (1813). The professional members elected into the Society of the Catch Club included Beard, Battishill, Arne, Hayes, Atterbury, Paxton, S. Webbe, Piozzi, Knyvett, Stevens, Callcott, Danby, Greatorex, Bartleman, R. Cooke, Horsley, Goss, Walmisley and Turle. In 1763 the Club offered its first prizes, one for two catches, a second for two canons, and a third for two glees, and they were awarded to Baildon, Marella, Dr. Hayes and G. Berg. From its foundation to 1794 the prizes were competed for annually, and among the winners were Arne, Hayes, J. S. Smith, Danby, S. Webbe, Lord Mornington, Paxton, Atterbury, Dr. Cooke, R. Cooke, Dr. Alcock, Stevens, Spofforth and Callcott. In 1787, in consequence of Dr. Callcott having submitted nearly 100 compositions in competition for the prizes, a resolution was passed that 'in future no composer should send in more than three compositions for one prize.' From 1794–1811 no prizes were offered, and after being awarded for two years they were again discontinued, until in 1821 they were once

more revived, a gold cup taking the place of the medals. The rules of the Club required the members to take the chair in turns at the dinners which were held at the Thatched House Tavern every Tuesday from February to June, except in Passion and Easter weeks. The successive secretaries of the Club were Warren (1761–94), S. Webbe (1794–1812), Sale (1812–1828), R. Leete (1828–36), Jas. Elliott (1836–52), O. Bradbury (1852–73), E. Land (1859–76), Dr. W. H. Cummings (1876–97), James A. Brown (1897–1909) and William Fell (1909–). Webbe's glees 'Hail! Star of Brunswick' and 'The Mighty Conqueror' were composed specially for George IV., who invariably took his call and sang in his glee; and the Duke of Cambridge attended to the last year of his life and rarely omitted his call, one of his favourite glees being Webbe's 'Glorious Apollo.' In 1861 the Club celebrated its centenary with much vigour, and to commemorate the event offered a silver goblet for the best 4-part glee, which was awarded to Dr. W. H. Cummings for 'Song should breathe.' The Club's meetings were held at the Criterion restaurant till 1915, then discontinued, but resumed in Jan. 1919 at Simpson's in the Strand until 1925. A Ladies' Night was held at the Criterion in May of that year, and it was decided to return to that restaurant for the future. C. M., with addns.

CATEL, Charles Simon (*b.* L'Aigle, Orne, June 10, 1773; *d.* Paris, Nov. 29, 1830), began his studies very early under Sacchini, Gobert and Gossec, in the École Royale de Chant et de Déclamation, at Paris (see Conservatoire de Musique).

In 1787 he was accompanist and 'professeur-adjoint' of the School, and from 1790–1802 accompanist at the Opéra. The same year he became chief, conjointly with Gossec, of the band of the Garde Nationale, for which he wrote a vast quantity of military music, which was adopted throughout the revolutionary army. His first work of public note was a De Profundis for the funeral of Gouvion in 1792. Another was a Hymn of Victory on the battle of Fleurus (June 26, 1794), performed June 29, 1794, written for chorus with wind accompaniment only. On the formation of the Conservatoire in 1795 Catel was made professor of harmony. He immediately began the compilation of his *Traité d'harmonie*, which was published in 1802. It was translated into German, Italian and English. Founded on those of Kirnberger and Türk it at once superseded the more artificial theories of Rameau, and remained for many years the sole text-book of France. In 1810 he became one of the inspectors of the Conservatoire, a post which he retained till 1814. In 1815 he was elected member of the Institut, in the room of Monsigny, and in 1824 Chevalier of the Legion of Honour. Catel wrote largely for the stage—'Semiramis' (1802), 'L'Auberge de Bagnères' (1807), 'Les Bayadères' (1810), and other operas in 1808, 1814, 1817, 1818 and 1819. They had the merit of elegance and purity, but they were not successful; the public insisted on recognising Catel as a savant and a professor, and prejudged his works as 'learned music.' Besides his theatrical and military music Catel wrote symphonies for wind only, hymns and choral pieces, quintets and quartets for strings and wind, songs, solfeggi, etc. He contributed to the 'Solfèges du Conservatoire.'

Bibl.—J. Carlez, *Catel, étude biographique et critique*, Caen, 1894; Frédéric Hellouin and Joseph Picard, *Un musicien oublié, Catel, de l'Institut Royal de France, de 1773 à 1830*, Paris, 1910.

CATELANI, Angelo (*b.* Guastalla, Mar. 30, 1811; *d.* S. Martino di Mugnano, Sept. 5, 1866), a musician and writer on music.

He received his first instruction from the organist of the place, and afterwards at Modena from Giuseppe Asioli and M. Fusco. In 1831 he entered the Conservatorio of Naples, then under Zingarelli, and became the special pupil of Donizetti and Crescentini. In 1834–37 he was director of the theatre at Messina, in 1837 at Correggio, and finally settled at Modena in 1838, where he was successively maestro di cappella and (from 1859) keeper of the Este Library. Catelani was the author of three or four operas, as well as of a Requiem and other pieces of church music; but his claim to mention rests on his archæological works:

Notices of P. Aron; N. Vincentino (*Gazzetta musicale*, 1851); *Epistolario di autori celebri in musica* (1852–54); *Bibliografia di due stampe ignote di O. Petrucci da Fossombrone* (1856)—a treatise on the two first pieces of music printed from type; *Della vita e delle opere di Orazio Vecchi* (1858); Ditto *di Claudio Merulo da Correggio* (1860); Ditto *di Alessandro Stradella* (Modena, Vincenzi, 1866).

G.

CATERS, the name given to changes rung on 9 bells. The word, from its derivation, should be written *quaters*, to indicate that *four* pairs of bells change their places in each successive permutation. It must be understood that although the changes are rung on 9 bells, 10 bells are used, the 10th (tenor) always being the last bell in every change.

W. W. S.

CATHEDRAL MUSIC is the term used to connote music written for the choirs of the English cathedrals, more particularly the harmonised settings of the canticles of morning and evening prayer, commonly known as the Service (*q.v.*), and Anthem (*q.v.*).

Important collections of Cathedral Music were made in the 17th century by Barnard and in the 18th century by Arnold, Boyce and Tudway. The contents of these collections are catalogued here under the names of their editors.

CATLEY, Anne (*b.* near Tower Hill, London, 1745; *d.* near Brentford, Oct. 14, 1789). She was born of very humble parents, her father being a hackney coachman, and her mother a washerwoman. Endowed with great personal beauty, a charming voice, and a natural talent

for singing, she gained her living at the early age of 10 years by singing in the public houses in the neighbourhood, and also for the diversion of the officers quartered in the Tower.

When about 15 years of age she was apprenticed by her father to William Bates for the purpose of receiving regular instruction in the art of singing, Catley binding himself in the penalty of £200 for her due fulfilment of the covenants in the indenture. She made rapid progress, and in the summer of 1762 made her first appearance in public at Vauxhall Gardens. On Oct. 8 in the same year she appeared at Covent Garden Theatre as the Pastoral Nymph in Dr. Dalton's alteration of Milton's 'Comus,' and in 1763 at Marylebone Gardens after some litigation occasioned by the attempts of Sir Francis Blake Delaval (a young baronet who had taken her to live with him) to put an end to her apprenticeship to Bates. Shortly afterwards she became a pupil of Macklin, the actor, who procured her an engagement at Dublin, where she became a great favourite. In 1770 she returned to England, and reappeared at Covent Garden Theatre on Oct. 1 as Rosetta in 'Love in a Village.' After the season she was again engaged at Marylebone Gardens, where she appeared on July 30, 1771, and sang until the close of the season. She sang in O'Hara's burletta, 'The Golden Pippin,' on its production at Covent Garden Theatre in 1773. In this burletta occurred the song 'Where's the mortal can resist me,' which, slightly varied, is now known as the hymn tune 'Helmsley' (see CARTER, Charles Thomas). Having amassed an independence Miss Catley retired from public life in 1784. She died at the house of General Lascelles, her husband. W. H. H., rev.

CATOIRE, GEORGE LVOVITCH (*b.* Moscow, Apr. 27, 1861), a Russian composer who studied with Klindworth and others in Berlin, with Liadov in St. Petersburg, and whose early work attracted the favourable attention of Tchaikovsky. A symphony in C minor, op. 7, and the symphonic poem, 'Mzyri' (after Lermontov), op. 13, were among the works with which he first made his mark. His pianoforte concerto in A flat, op. 21, was introduced to England at the Promenade Concerts of Queen's Hall in Aug. 1920 by Sir Henry Wood and Miss Isabel Gray. His pianoforte sonatas and chamber works have further served to carry his name outside his own country. He is professor of composition at the Moscow Conservatoire, and has issued a Manual of Harmony. C.

CATRUFO, GIOSEFFO (*b.* Naples, Apr. 19, 1771; *d.* London, Aug. 19, 1851), studied at the Conservatoire de la Pietà dei Turchini. In 1791 he produced his first two opéras-bouffes at Malta. On the outbreak of the war he joined the French army, but in 1799 he wrote another opéra-bouffe for the theatre at Arezzo and a Mass and Dixit for the cathedral of that town. In 1804 he left the army, going to Genoa to compose for the stage and the Church. About 1810 he went to Paris, and settled in London as a singing master in 1835.

Apart from a number of light operas, church music, songs and vocal exercises, he wrote *Barème musical, ou l'art de composer la musique sans en connaître les principes* (1811); *Des phases de l'art musical depuis Palestrina jusqu'à Rossini* (1850); *De la voix et des instruments à cordes*, etc. E. v. d. S.

CATTERALL, ARTHUR (*b.* Preston, Lancashire, 1883), violinist, pupil of Willy Hess in 1894, and of Adolph Brodsky (at the Royal Manchester College of Music) in 1895. He played at all Cosima Wagner's soirées at Bayreuth in 1902, and the following year at a Hallé concert in Tchaikovsky's concerto. In 1909 he led the orchestra of the Queen's Hall Promenade Concerts, and 1912–25 the Hallé orchestra. He is professor at the Royal Manchester College of Music and leader of the CATTERALL QUARTET (see below), which has established a high reputation.

He is heard at his best in chamber music; has a strong lead, but is without temperamental eccentricities. He is a self-contained classical player who lets the music of the great masters speak for itself. W. W. C.

CATTERALL QUARTET, THE, was established in the season 1910–11 and originally consisted of Arthur Catterall, first violin; O'Malley, second violin; David Reggel, viola; and Johan C. Hock, violoncello.

In the season 1914–15 an alteration was made in the personnel of the quartet, O'Malley resigning through ill-health and Reggel securing an appointment in the U.S.A. In their places were appointed John S. Bridge, second violin, and Frank S. Park, viola, and the quartet has remained so for the last ten years (to 1925).

It may be recorded that the first performance of Elgar's quartet in the provinces was given by the Catterall Quartet, and also the first performance in England of Pizzetti's quartet. But the repertory of the Quartet consists mainly of the old masters, and in no case is a work undertaken which is not entirely approved by all the four players.

For biography of the leader, see CATTERALL. JOHN S. BRIDGE (*b.* Bury, Lancs.) studied with Willy Hess. He is well known as the leader of the Llandudno Orchestra and vice-leader of the Manchester Hallé Orchestra, and also the Liverpool Philharmonic.

FRANK S. PARK (*b.* Manchester) studied with Dr. Brodsky. He is the principal viola in both the Manchester Hallé Orchestra and the Liverpool Philharmonic.

JOHAN C. HOCK (*b.* Amsterdam) studied with Professor Ivan Mossel at the Conserva-

toire in Amsterdam. He came to England in 1898. W. W. C.

CAURROY, François Eustache du, Sieur de St. Frémin (*b.* Gerberoy, near Beauvais, 1549[1]; *d.* Paris, Aug. 7, 1609), canon of the Ste. Chapelle and prior of St. Aïoul de Provins; a composer of great merit in his day.

He entered the service of the French kings as singer in the royal chapel about 1569, and continued in office during the reigns of Charles IX., Henry III. and Henry IV. In 1583 he is called master of the children of the chapel, and later, master of the music of the chapel. From 1573 he was Prior of St. Aïoul in the diocese of Provins. The titles 'Canon of the Sainte-Chapelle' and 'Surintendant de la musique du Roi' (a post created for him in 1599) are mentioned by Fétis. He was buried in the Church des Grands Augustins. A monument (destroyed in the Revolution) was erected to his memory by his successor Nicolas Formé, with an epitaph by his friend Cardinal du Perron.[2] Du Caurroy was called by his contemporaries 'Prince des professeurs de musique,' a title he shared with Orlando Lasso and Palestrina. His compositions include 'Missa pro defunctis,' performed at the funerals of the kings of France at St. Denis until the 18th century and at Notre Dame on All Souls' Day — one copy only exists at the Bibliothèque Nationale in Paris; 'Preces ecclesiasticae' (2 books, containing 25 compositions *a* 4, 5 and 6 v.) (Paris, 1609). Published by his grandnephew André Pitart: 'Fantaisies' in 3, 4, 5 and 6 parts, a collection of 42 instrumental pieces, on sacred and secular themes (Paris, 1610); and 'Mélanges de musique' (Paris, Ballard, 1610), from which Burney prints in his third volume a Noël in 4 parts. This work consists of 62 pieces *a* 4, 5, 6 and 7 v., containing chansons, psalms, motets, Noëls, etc., composed for the service of the court (Ballard, 1610). As early as 1569, the music printers, Le Roy and Ballard, inserted 3 pieces by Du Caurroy in their 22nd and 23rd books of 'Chansons.' The collection 'Le Rossignol musical' (Phalèse, 1597) contains one. Like his contemporaries, Le Jeune and Mauduit, he composed music to measured verses in imitation of Greek and Latin models (see Meslanges). Du Caurroy has been credited without proof, or any likelihood, with the airs 'Charmante Gabrielle' and 'Vive Henri IV.'

Reprints.—Burney, vol. 3, a 'Noël' in four parts. Henry Expert, 'Les Maîtres musiciens de la Renaissance Française,' vol. 17. Édu. Caurroy, 'Mélanges' (Paris, Leduc, Sénart). Five instrumental 'Fantaisies,' issued by the same (Paris, Sénart).

Bibl.—*Grande Encyclopédie*: Michel Brenet, *Eustache du Caurroy*; H. Quittard, *Eustache du Caurroy* (Les Meslanges publiés par M. H. Expert); *Revue musicale*, 1904.

M. C. C. and M. L. P.

[1] Eustache du Caurroy, son of Claude du Caurroy, registrar 'en l'élection de Beauvais,' was baptized in the church of la Basse-Œuvre, Beauvais, Feb. 4, 1549.

[2] See La Borde, *Essai sur la musique ancienne et moderne*, 1780, vol. 8.

CAUSSIN, Ernuld (Arnoldus Causinus), choir-boy at Cambray Cathedral in 1528. He became a composer, and is spoken of as 'Musicus celeberrimus' on the title-page of his motets *a* 5 v. lib. 1 (1548). Other motets of his appear in Giacomo Moderne de Pinguente's 'Motetti del fiore' (1539–42), and in other collective volumes (*Q.-L.*; *Fétis*).

CAUSTON (Cawston, Caustun), Thomas (*d.* Oct. 28, 1569), English composer of church music. He appears as one of the 40 gentlemen of the Chapel Royal among a list of musicians, with their fees, contained in the Establishment book for 1552 (B.M. *Stowe* 571/36*b*), and continued as such until his death, as is testified by the following extract from the Chapel Royal Cheque Book:

'1569. Mr Causton died the 28 of October, and Richard Farrant was sworne in his place the 5 of Novembr.'

He contributed largely to the 'Certaine Notes' (1560) of John Day (*q.v.*). His name, or initials, only occur occasionally in the first edition, but in a reprint, that of 1565, he is credited with a good deal. From a collation of these two editions, he appears as the composer of two complete services (each including a Morning, Communion and Evening Service), an alternative Evening Service (M and ND) belonging to the first whole service, and 6 anthems. The 1565 edition also contains the bassus part of another anthem, 'Oft Blessed Lord,' by Causton. Day's 'Whole psalmes in foure partes' (1563) contains 141 settings, and of these, 27 are by Causton. His work here is rather different from that of the rest. The majority are simple settings, often in plain counterpoint, but Causton's part writing is much more elaborate, with small points of imitation, usually at small intervals, very closely wrought into the texture (see *M.L.*, Apr. 1924). A Morning Service by Causton is in B.M. Add. MSS. 31,226, and another (from 'Certaine Notes') in B.M. Add. MSS. 30,480-3. A Venite and Communion Service by him were printed in Jebb's 'Responses' (1847), and a Communion and Evening Service by Novello (ed. Royle Shore). J. Mk.

CAVACCIO, Giovanni (*b.* Bergamo, *c.* 1556; *d.* Aug. 11, 1626), was in 1581 maestro at the Cathedral.

Thence after 23 years' service he was called to be maestro at S. Maria Maggiore at Bergamo, where he remained till his death. Cavaccio contributed to a collection of Psalms, dedicated in 1592 to Palestrina. His works include a Requiem published at Milan, 1611; Magnificats, 1581 and 1582; Psalms, 1585; Madrigals, 1585, 1597, etc. (see *Q.-L.*). Some of his pieces are found in the 'Parnassus musicus' of Bergameno, and 3 organ pieces are given in vol. iii. of Torchi's *L' arte musicale in Italia*.

G.

CAVAILLÉ, the name of several generations of distinguished organ-builders originating in the south of France.

The most eminent member of the family was ARISTIDE CAVAILLÉ-COLL (*b.* Montpellier, Feb. 2, 1811; *d.* Paris, Oct. 13, 1899). The name of Coll was that of his grandmother.

In 1833 he went to Paris to see what progress was being made in his art, but without the intention of establishing himself there. Hearing that there was to be a competition for the construction of a large organ for the basilica of St. Denis, he determined to send in a tender, although only two days remained for preparing it. When called up before the committee he gave them such interesting explanations of his plans that they decided to accept his tender. Barker's pneumatic lever was first used in this organ. He thus became established in Paris, built the fine organ of the Madeleine, and many others in the capital and in the provinces. He wrote:

Études expérimentales sur les tuyaux d'orgue (1849); *De l'orgue et de son architecture* (1856); and *Projet d'orgue monumental pour la basilique de St. Pierre de Rome* (1875).

Charles Mutin, a pupil, succeeded as head of the firm, Gabriel, son of Aristide, having founded a firm of his own, 1892. The original firm of Cavaillé-Coll is now (1926) styled Établissements Cavaillé-Coll, under the management of A. Convers.

BIBL.—CONSTANT PIERRE, *Les Facteurs d'instruments de musique; les luthiers et la facture instrumentale* (1893); ALBERT PESCHARD, *Notice sur Aristide Cavaillé-Coll et les orgues électriques* (1899); CONTE PAUL DE FLEURY, *Dictionnaire biographique des facteurs d'orgues français* (1925).

V. de P.; addns. M. L. P.

CAVALIERI, EMILIO DEL (*b. circa* 1550; *d.* Rome, before end of 16th cent.[1]), a Roman gentleman of good family and fine musical perceptions, whose contribution as a composer to the music of the Renaissance is important.

He spent a great portion of his life at the court of Ferdinand dei Medici, who appointed him to the quaintly-named office of 'Inspector-General of the Artists' at Florence. There he lived upon terms of intimacy with Giovanni Bardi of Vernio, Giulio Caccini, Vincenzo Galilei, Peri, Corsi and Rinuccini, a group of accomplished artists and gentlemen who were bent upon freeing music from the trammels of the 'stile osservato,' and bringing about some better result from the union of instruments, poetry, and the human voice than had up to their time been achieved.

Cavalieri, then, was one of the earliest projectors of instrumental accompaniment, and among the first to employ the basso continuo, with figures and signs attached to guide the different instruments in filling up the intermediate parts. Alessandro Guidotti, who published 'La rappresentazione di anima e di corpo' in 1600, thus explains the system of the 'Basso figurato':

'I numeri piccoli posti sopra le note del basso continuato per suonare, significano le consonanze e le dissonanze di tal numero, come il 3 terza, il 4 quarto, e così di mano in mano.'

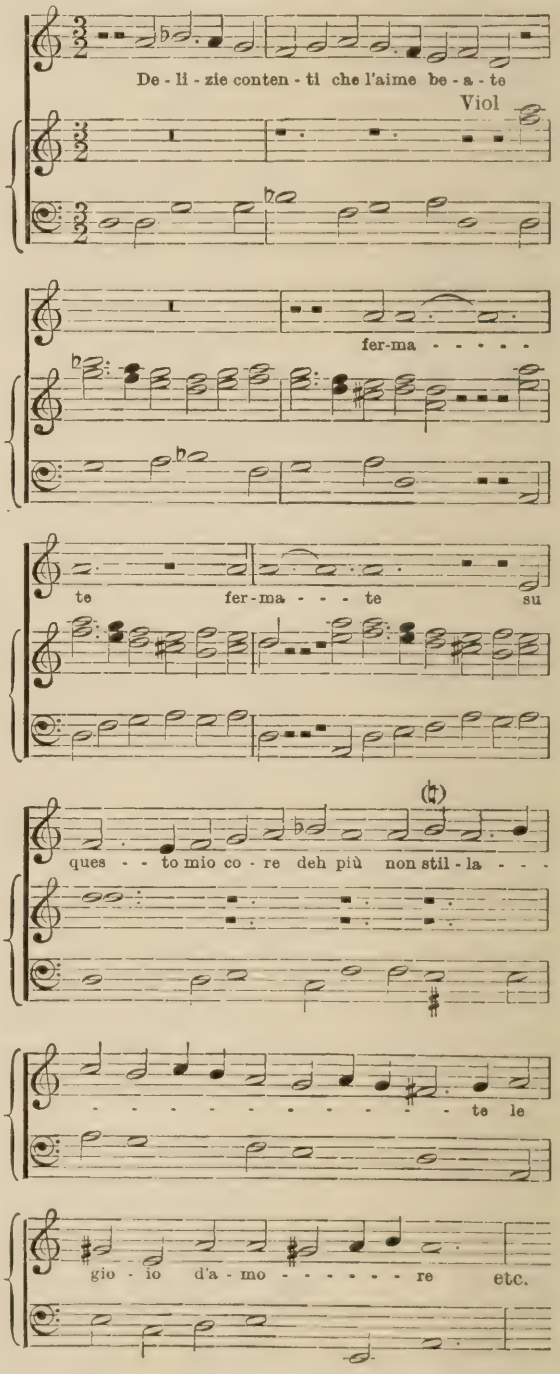
Cavalieri did not attempt to elaborate the accompaniment thus suggested; a great deal was still left to the players themselves, just as in the plain-song the underlying parts were filled in by what in England was known as 'descant,' and in Italy as 'il contrapunto della mente.' Not the less, however, did the labours of Cavalieri and his contemporaries constitute at once a starting-point and a stride in art.

Cavalieri produced four musical dramas: 'Il Satiro' (1590); 'La disperazione di Fileno'; 'Il giuoco della cieca' (1595); and 'La rappresentazione,' mentioned already. They were one and all of them arrangements of words provided by Laura Guidiccioni, an accomplished lady of the Lucchesini family. Of these works the last named only was edited, as stated above, by Guidotti of Bologna. (See *R.M.I.* vol. ix. p. 797.) E. H. P.

CAVALIERI, KATHARINA (*b.* Währing, Vienna, 1761; *d.* there, June 30, 1801), a dramatic singer.

At a very early age she was placed under Salieri by some wealthy connoisseurs who had heard her sing in church, and in 1775, when barely 14, was engaged at the Italian Opera. A year later the Emperor Joseph founded a German Opera, to which she was transferred. As Cavalieri never sang out of Vienna her name is almost unknown elsewhere, but Mozart's approval stamps her as an artist of the first rank. In one of his letters (1785) he says, 'She was a singer of whom Germany might well be proud'; and it was for her he composed the part of Constance in the 'Entführung,' the soprano part in 'Davidde penitente,' that of Mme. Silberklang in the 'Schauspiel-Director,' and the air 'Mi tradì' in 'Don Giovanni,' on its first representation at Vienna, May 7, 1788. Salieri called her his favourite pupil, and wrote the principal parts of several operas for her. She sang in nearly all the oratorios produced by the Tonkünstler-Societät (now the Haydn-Verein), and maintained her popularity to the last against many eminent singers. Her voice was of considerable compass, and she was a cultivated musician. She made up for her want of personal attractions by her fascinating manners. She was compelled, from over-exertion, to retire when in the prime of life (1793). C. F. P.

CAVALIERI, LINA (*b.* Rome, Dec. 25, 1878), operatic soprano. Endowed by nature with a good voice and unusual beauty, she began her public career at the age of 14 as a singer at café-concerts. A growing reputation led, after five or six years, to the ambition for better things, and she took up serious study in



[1] Riemann, on the authority of the *Rassegna Nazionale* of Nov. 15, 1893, gives the date as Mar. 11, 1602, but his most important work, 'La rappresentazione di anima e di corpo,' was performed for the first time in 1600, and all the accounts of him agree in stating that it was not performed in his lifetime.

Italy with Mme. Mariani-Masi. In 1901 she made her début on the operatic stage at the Royal Theatre, Lisbon, as Nedda in 'Pagliacci,' the music of which suited her rather light voice admirably. Her subsequent successes in Italy, France, England and America were chiefly gained in parts of this calibre, such as Thaïs, Manon, Mimi and Gilda, rather than in the slightly heavier modern repertory which she also essayed. During her first Covent Garden season (1908) she appeared in Puccini's 'Manon Lescaut' and 'Tosca' and Giordani's 'Fedora.' After 1906, however, her career was principally confined to the United States, where she sang in New York and Chicago. She married the tenor, Lucien Muratore, with whom she has taken part in several concert tours. H. K.

CAVALLERIA RUSTICANA, opera in 1 act; libretto by G. Targioni-Tozzetti and G. Menasci, founded on a tale by Verga; music by Mascagni. It was awarded the prize offered by the publisher Sonzogno. Produced, Costanzi Theatre, Rome, May 17, 1890; Philadelphia, Grand Opera House, Sept. 9, 1891; London, Shaftesbury Theatre (Lago season), Oct. 19, 1891; Paris, Opéra-Comique, Jan. 19, 1892; in English, Grand Theatre, Islington, Apr. 9, 1884.

CAVALLI, Pietro Francesco (*b.* Crema, Feb. 14, 1602; *d.* Venice, Jan. 14, 1676), a composer of importance in the early history of opera.

He was the son of Gian Battista Caletti-Bruni, for 40 years director of the cathedral choir at Crema, and he took that of Cavalli from his patron, a Venetian nobleman. In 1617 he became singer in the choir of St. Mark's under Monteverdi; in 1640 organist of the second organ; in 1665 organist of the first organ in that church; and in 1668 maestro di cappella. Of his church music nothing has been published beyond 'Musiche sacre,' containing a Mass, Psalms and Antiphons for 2 to 12 v. (Venice, 1656), and Vespers for 8 v. (*ib.* 1675). Santini possessed a Requiem of his (sung at Cavalli's funeral) for 8 v. in MS. His operas were very numerous. He began to write for the theatre in 1639 ('Le nozze di Teti'), and continued so to do for 32 years. There were then 5 theatres in Venice, and Cavalli was fully employed. The author of *Le glorie della poesia e della musica* (Venice, 1730) gives the names of 34 operas which he produced for Venice alone between the years 1637 and 1665. Fétis mentions 39. Altogether 41 operas are accounted for, 27 of which are in the Marciana Library, Venice. In 1660 he was called to Paris for the marriage of Louis XIV., and produced his opera of 'Xerse' (originally written for Venice, 1654) in the Grand Gallery of the Louvre; to Paris again in 1662 for the Peace of the Pyrenees, when he brought out 'Ercole amante'; and to Innspruck for the fête on the reception of Queen Christina. His wife belonged to the Sozomeni family; he grew rich and enjoyed the esteem and affection of his fellow-citizens. He took the opera from the hands of Monteverdi, and maintained it with much dramatic power and with a force of rhythm before unknown. His advance on Monteverdi in melodic construction is well shown in the following example from 'Il Giasone' (1649) with accompaniments for 2 violins and bass.

'Il Giasone' is published in 'Die Oper' Part II. (Eitner). Some examples from 'L' Eris-

mena' (1655) will be found in Burney's *History*, vol. iv. Two 3-part motets and one 2-part were printed in Marcello's *Sacra Corona*, Venice, 1656.

BIBL.—PARRY, *Music of the XVIIth Century* (*Oxf. Hist. Mus.* vol. iii.); articles by AMBROS in the *Neue Zeitschr. f. Mus.*, 1869, vol. lxv. p. 314 ff.; by H. KRETZSCHMAR in the *Vierteljahrsschrift für M.-W.*, 1892, p. 1 ff.; GALVANI, *Teatri musicali di Venezia*; TADDEO WIEL, *Mus. Ant.* iv. 1 (Oct. 1912); HENRI PRUNIÈRES, *Notes sur une partition faussement attribuée à Cavalli, R.M.I.* vol. 27, 1920; EGON WELLESZ, *Cavalli und der Stil der venetianischen Oper von 1640–60, Studien zur M.-W.*, vol. i. (1913) pp. 1-103.

G., with addns.

CAVALLINI, ERNESTO (*b.* Milan, Aug. 30, 1807; *d.* there, Jan. 7, 1874), a great clarinet-player.

He was taught in the Milan Conservatorio, and after an engagement at Venice and considerable travelling he returned to his native city, first as player in La Scala orchestra, and then as professor in the Conservatorio. In 1852 he accepted a post at St. Petersburg, which he filled for 15 years, after which he returned to Milan in 1870. In 1842 he was elected member of the Paris Académie des Beaux Arts. Cavallini travelled much and was well known in Paris, London and Brussels. He played a concerto of his own at the Philharmonic Concert, June 23, 1845. Fétis describes his volubility and technique as prodigious, and his breath as inexhaustible; his intonation was also very good, though his instrument was only the old six-keyed clarinet.

G.

CAVATINA (Ital., diminution of *cavata*,[1] the act of producing tone from a musical instrument) originally signified a short song, without a second part and the repetition of the first, but has been frequently applied to a smooth melodious air, forming part of a grand scena or movement. W. H. C.

CAVENDISH, MICHAEL (*b. circa* 1565; *d.* 1628), composer of madrigals and ayres; the youngest of three sons of William Cavendish of Cavendish Overhall by Ann, his wife, daughter of John Cocks of Beamonds. The pedigree of this elder branch of the Cavendish family, which became extinct in the 17th century, is fully recorded in Davy's *Suffolk Collections* (B.M. Add. MSS. 19,122). The younger branch is now represented by the Duke of Devonshire. The exact date of Michael Cavendish's birth is not known. He died unmarried, in the parish of St. Mary, Aldermanbury, London, probably on July 5, 1628, and his will was proved on July 11 of that year (P.C.C.; 72, Barrington). He dedicated his volume of compositions published in 1598 to Lady Arabella Stuart, who was his second cousin. Sir Charles Cavendish, one of Wilbye's patrons, was his father's first cousin; and so was Lady Pierpoint, the wife of Thomas Greaves's patron. Cavendish was a contributor to East's *Whole Booke of Psalmes* in 1592, and he produced one volume of his own compositions in 1598. The title-page of the only known copy of this book, now in the British Museum, is mutilated; the book contains twenty airs with lute accompaniment with an alternative version for four voices, and these are followed by eight madrigals for five voices. His madrigal, 'Come, gentle swains' (No. 24 of the set) was largely rewritten before it appeared three years later as one of 'The Triumphes of Oriana.' It is the only example among the Triumphs that had been previously printed, and it is not impossible that the idea was put into Morley's mind by Cavendish. In estimating the artistic value of his work it must be remembered that his 'Ayres' were the first to appear after Dowland's first book, and he was also comparatively early in the field as a madrigal composer. The eight madrigals are printed in ENGLISH MADRIGAL SCHOOL, vol. xxxvi. E. H. F.

[1] B.M. Add. MSS. 14,221 (f. 86) contains a Recitativo con cavata by Cafaro.

CAVOS, CATTERINO (*b.* Venice, 1776; *d.* St. Petersburg, Apr. 28, 1840), conductor and composer.

He was the son of the musical director of the famous Fenice Theatre. At 14 he was the chosen candidate for the post of organist to St. Mark's, but relinquished his chance in favour of a poor musician. He became by turns assistant to his father, conductor of the opera in Padua, and teacher in Venice. In 1797 he went to Russia as conductor of Astarti's opera company. When the Emperor Paul succeeded Catherine II., the company was disbanded, but Cavos remained in Russia, and, in 1799, was made director of the Italian and Russian operas, and professor in the Theatrical School. It was his duty to compose for three companies—Italian, Russian and French. The success of his operas on Russian fairy-tales encouraged him to make some tentative efforts for national colouring in his music. 'Ivan Sonsanin,' an opera on the same subject as 'A Life for the Tsar,' met with great success in 1815. The Russian element is very slight in the music of Cavos; nevertheless he must be reckoned one of the first to start that movement towards nationality in music which Verstorsky strove to develop, and which eventually culminated in the genius of Glinka. Cavos composed a vast number of operas and vaudevilles. His music was pleasing but not inspired. R. N.

CAZZATI, MAURIZIO (*b.* Guastalla, *c.* 1620; *d.* there, 1677), organist of S. Andrea, Mantua, 1641; maestro di cappella to the Duke of Sabioneta, 1648–51, at the Accademia della Morte in Ferrara; appointed maestro di cappella at S. Maria Maggiore in Bergamo, 1653; and at San Petronio in Bologna, 1658. He resigned this post in 1671, possibly on account of a violent quarrel with Arresti, organist of the same church, who had severely criticised the Kyrie in a Mass of Cazzati.

His 'Risposta alle oppositioni,' etc., was printed at Bologna, 1663. His voluminous compositions (see *Q-L.*) comprise masses, psalms and motets, besides canzonets and airs, and sonatas and other instrumental works. One of his motets, 'Sunt breves mundi rosæ,' was printed in Ballard's collection for 1712, and other pieces in Profe's *Geistliche Concerten* (Leipzig, 1641).

CEBELL, a name used by Purcell and others for the dance form now generally known by the name of Gavotte. An instance occurs in a suite of Purcell printed in Pauer's 'Old English Composers,' and in vol. vi. of the Purcell Society's publications, and 'The old Cebell' is given by Hawkins, *History*, App. 22. M.

CECILIA, ST., Virgin and Martyr, was a young Roman lady of noble birth, who, being educated in the Christian faith, vowed to lead a celibate life and to devote herself to the service of religion.

She was, however, compelled by her parents to marry Valerianus, a young Roman noble and a Pagan, with whom she prevailed so much as not only to induce him to respect her vow, but, with his brother, to embrace the Christian faith. Seized and brought before the Pagan authorities, and refusing to abjure their faith, they were condemned to death, the brothers being decapitated, and the virgin-wife placed in a dry bath with fire beneath, which failing to terminate her existence as rapidly as her persecutors desired, they sent an executioner to despatch her by severing her head from her body. These events occurred at Rome about A.D. 229, under Alexander Severus, according to most writers, although some state them to have happened in Sicily under Marcus Aurelius between A.D. 176 and 180. Her house at Rome, where she was put to death, was converted into a church, or a church was built over it, to which in 821 her remains, with those of her husband, his brother and other martyrs, were translated. This church was repaired and sumptuously embellished in 1599, and a monument of the saint erected.

St. Cecilia has long been regarded as the tutelary saint of music and musicians, but the period at which she was first so looked upon is involved in obscurity. There is a tradition that an angel by whom she was visited was attracted to earth by the charms of her singing, but when it originated is equally unknown. Early writers make no mention of her skill in music; even as late as 1594 a long Italian poem by Castelletti, entitled 'La trionfatrice Cecilia, vergine e martire Romana,' was published at Florence, which does not allude to it. It is certain, however, that nearly a century before she had been considered as Music's patroness, for in 1502 a musical society was established in Louvain, the statutes of which were submitted to the magistrate for his sanction. The founders desired to place the new association under the patronage of 'St. Job,' but the magistrate decided that it should be put under the auspices of St. Cecilia.

Cecilian Festivals. For a very long time the custom of celebrating upon St. Cecilia's festival (Nov. 22) the praise of music by musical performances existed in various countries, and many associations were formed for the purpose. The earliest of such associations of which any notice has been found was established on Oct. 12, 1570, at Evreux in Normandy, under the title of 'Le Puy de Musique.' A solemn celebration of Vespers and Compline took place in the cathedral on the vigil; High Mass, Vespers and Compline were performed on the feast day, and a Requiem Mass for the souls of departed founders on the morrow. A banquet was given after Mass on the feast day, and prizes were awarded for the best motets, part-songs, airs and sonnets. The best composers of the day were competitors for these prizes, and amongst those who obtained them are found the names of Orlando de Lasso, Eustache du Caurroy and Jacques Salmon.

It was a century later before any similar association was regularly established in England. In 1683 a body of persons known as 'The Musical Society' held the first of a series of annual celebrations in London. Their practice was to attend divine worship (usually at St. Bride's Church), when a choral service and anthem with orchestral accompaniments (often composed expressly for the festival) were performed by an exceptionally large number of musicians, and a sermon, usually in defence of cathedral music, was preached. They then repaired to another place (commonly Stationers' Hall), where an ode in praise of music, written and composed expressly for the occasion, was performed, after which they sat down to an entertainment. These odes were written by Dryden (1697 and 1697), Shadwell, Congreve, D'Urfey, Hughes and other less-known writers, and composed by Henry Purcell (1683 and 1692), Blow (1684, 1691, 1695, and 1700), Draghi, Eccles, Jeremiah Clarke and others of lesser note. Purcell produced for 1694 his 'Te Deum and Jubilate in D,' and Blow his for 1695. These celebrations were kept uninterruptedly (with the exception of the years 1686, 1688 and 1689) until 1703, after which they were held only occasionally. The Musicians' Company in London revived the celebration of the festival in 1903.

Pope wrote his fine ode in 1708, but it was not set to music until 1730, and then in an altered and abbreviated form by Dr. Greene, as the exercise for his doctor's degree. It was first set in its original form about 1757

by William Walond, organist of Chichester Cathedral, and at a much later period by Dr. Thomas Busby. In 1736 Handel reset Dryden's 'Alexander's Feast,' originally composed in 1697 by Jeremiah Clarke, and in 1740 Dryden's first ode, originally set in 1687 by Draghi. Odes were composed at various periods by Drs. Pepusch and Boyce, by Festing, Samuel Wesley, Parry and others.

About the same time that the London celebrations were established similar meetings were held at Oxford, for which odes were written by Addison, Yalden and others, and set by Blow, Daniel Purcell, etc. These meetings were continued until 1708, and perhaps later. Other places followed the example, as Winchester, Gloucester, Devizes and Salisbury. At the latter place, in 1748 (the time of holding it having previously been changed), the meeting was extended to two days, and gradually developed into the modern musical festival, oratorios being performed at the cathedral in the morning, and secular concerts at the Assembly Room in the evening.

There are some records of a musical celebration having taken place on St. Cecilia's Day in Edinburgh in 1695, and in the early part of the 18th century several took place in St. Patrick's Cathedral, Dublin.

In Paris some years since it was the custom to have a Solemn Mass performed in the church of St. Eustache on St. Cecilia's Day, for the benefit of the Society of Artist Musicians. The orchestra of the Société des Concerts du Conservatoire took part. On these occasions a new Mass, composed expressly by some eminent musician, was usually produced. Amongst those who wrote such masses were Adolph Adam, Niedermeyer (1849), Dietsch, Gounod (1855) and Ambroise Thomas (1857) Later, masses by Saint-Saëns, C. Franck, Th. Dubois and S. Rousseau, etc., were utilised. Since the appointment of Félix Raugel as maître de chapelle at St. Eustache (1910) the Mass of St. Cecilia has been replaced by a sacred concert and a Solemn Benediction. From 1911–13 works by Liszt, Bach and Handel were given; in 1922 and 1923 works by C. Franck and Widor.

Musical celebrations on St. Cecilia's Day are recorded as having taken place at various periods in Italy, Germany and elsewhere. Spohr composed a 'Hymn to St. Cecilia' for the Cecilian Society at Cassel in 1823, and Moritz Hauptmann another for the same society in the following year. W. H. H.

BIBL.—*St. Cecilia Feasts, Odes*, etc., *Mus. Ant.* ii. 234 (July 1911); an Index to songs and musical allusions in the *Gentleman's Journal*, 1692–94.

CECILIA SOCIETY, see BOSTON.

CELESTA, a keyboard instrument in which plates of steel suspended over resonating boxes of wood are struck by hammers after the manner of the pianoforte action. It was invented in 1886 by Auguste Mustel of Paris, who subsequently combined its characteristic effects with those of the 'Mustel Organ,' producing some distinctly new qualities of tone. The tone of the celesta itself is of exquisite purity, and as an orchestral instrument it has been used by a large number of modern composers in operas, ballets and mystic pieces, where a special quality of tone is required. Its compass is four octaves upwards from the middle *c*, and the part is written an octave below the actual pitch. The tone improves as the pitch rises. M., with addns.

CELESTINA, a keyboard instrument in which the sound is produced by the friction of a continuous band of rosined silk upon catgut or wire strings. (See SOSTINENTE PIANOFORTE.) F. W. G.

CELESTINO, ELIGIO (*b.* Rome, *c.* 1739; *d.* Jan. 14, 1812), a violin-player.

Burney heard him in Rome in 1770, and considered him the best Roman violinist of the period. In 1772 he began to travel, and appeared in London in that year. He was appointed violinist of the court band at Stuttgart in 1776. He gave a concert with his wife at Frankfort in 1780, and already had the title of Konzertmeister to the Duke of Mecklenberg, at Ludwigshut, a post which he retained till his death. In Preston's Catalogue (London, 1797) we find of his composition Six Sonatas for a Violin and Bass (op. 9), and three Duos a Violino e Violoncello (London, Clementi, 1798). Some other works, such as a vocal solo or trio with orchestral accompaniment, are mentioned in *Q.-L.* P. D.

CELLI (STANDING), FRANK H.; (*b.* London, 1842; *d.* there, Dec. 27, 1904), operatic basso-cantante; brother of William T. Carleton, singer, and Herbert Standing, actor, both well known. His voice, which might also be termed a heavy baritone, was of an unusually sweet, sympathetic quality, yet sufficiently powerful and extremely flexible. He had received little instruction when he made his début at the age of 20 at the old Marylebone Theatre as Mat-o'-the-Mint in a revival of 'The Beggar's Opera.' Other stage and concert work followed, including one engagement as Lorenzo (with songs) in a revival of 'The Merchant of Venice' at the Princess's Theatre. He then studied and sang in oratorio with Mme. Rudersdorff, and in the late 'sixties went on a concert tour with Mme. Carlotta Patti. His true bent, however, was towards opera, for which his fine voice and striking physique eminently suited him. Accordingly in 1871 he joined Mapleson's provincial troupe, which then included Tietjens, Trebelli, Sinico, Ilma di Murska, Bettini and Foli, with Bevignani as conductor, and made his first appearance at Birmingham as Valentine in 'Faust,' then given for the first time in that city. His chief

successes, later on, were gained in English opera, especially under Carl Rosa, with whose company he sang regularly for several years, his best characters being Mephistopheles, Don Giovanni, Count Arnheim, Peter the Great, Escamillo, Count Almaviva in 'Figaro,' and the King in 'Maritana.' Towards the latter part of his career he drifted into light opera, visiting the United States and various colonies, where he quickly won popularity. At home he was always a great favourite, and his voice retained much of its freshness and charm to the end. He was the father of Miss Faith Celli, the well-known actress. H. K.

CELLIER, ALFRED (*b.* Hackney, Dec. 1, 1844; *d.* London, Dec. 28, 1891), a composer of light opera.

He was the son of a teacher of French, was educated at the Grammar School, Hackney, and from 1855–60 was a chorister at the Chapel Royal, St. James's, under the Rev. Thomas Helmore. In 1862 he was appointed organist to the church of All Saints, Blackheath. At the age of 21 he became director of the Ulster Hall Concerts, Belfast, succeeding Dr. Chipp, and conductor of the Belfast Philharmonic Society. He was appointed organist at St. Alban's Church, Holborn, in 1868. Cellier was conductor at the Prince's Theatre, Manchester (1871–75); Opéra-Comique, London (1877–79), and joint conductor, with Sir A. Sullivan, of the Promenade Concerts, Covent Garden (1878 and 1879), besides holding numerous smaller appointments at the Court, St. James's, and Criterion Theatres. His compositions include a setting of Gray's 'Elegy,' written for the Leeds Festival (Oct. 10, 1883), a Suite Symphonique for orchestra, various songs and PF. pieces, among which latter must be mentioned a charming 'Danse-Pompeuse,' 1880, dedicated to and frequently played by Mme. Montigny-Rémaury. But Cellier was best known as a composer of light opera or opéra-bouffe. Besides much incidental music to plays, etc., he produced the following:

'Charity begins at Home,' Gallery of Illustration, 1870, 'The Sultan of Mocha,' produced at the Prince's Theatre, Manchester, Nov. 16, 1874, with great success, and at St. James's Theatre, London, Ap. 17, 1876; 'The Tower of London,' Oct. 4, 1875; 'Nell Gwynne,' Oct. 16, 1876; 'Bella Donna, or the Little Beauty and the Great Beast,' Ap. 27, 1878, all produced at Manchester; The Foster Brothers,' 1876 (St. George's Hall); 'Dora's Dream,' Nov. 17, 1877; 'The Spectre Knight,' Feb. 9, 1878; 'After All,' Dec. 16, 1879; 'In the Sulks,' Feb. 21, 1880, operettas in one act, all produced at the Opéra-Comique Theatre. 'Pandora,' a grand opera in three acts, words by Longfellow, was produced in Boston in 1881.

Few of the larger works obtained other than provincial popularity, in spite of the pleasing and elegant music contained therein, probably owing to weak librettos; but on Sept. 25, 1886, in his opera of 'Dorothy,' produced at the Gaiety Theatre, a fresh setting of his 'Nell Gwynne' to a new book, Cellier gained his first real success, thanks to the musical merits of the work, which ran through the entire autumn season, and on Dec. 20 was transferred to the Prince of Wales's Theatre, where it enjoyed an exceptionally long career. Its successor, 'Doris,' Lyric Theatre, Apr. 20, 1889, was less popular, but 'The Mountebanks,' to an admirable libretto by W. S. Gilbert (Lyric, Jan. 4, 1892), was another great success. It was technically a posthumous work, as the composer died before he could complete it by the composition of an overture: a movement from his Suite Symphonique was adapted for the purpose. A *lever du rideau* entitled 'The Carp' was produced at the Savoy Theatre on Feb. 13, 1886, and another 'Mrs. Jarramie's Genie,' at the same, Feb. 14, 1888. On Sept. 21, 1887, the 'Sultan of Mocha' was revived at the Strand Theatre, with a new libretto by Lestocq. During his later years Cellier resided in America and Australia, but returned to England in 1887. He was buried in the Norwood Cemetery. A. C.

'CELLO, a contraction of VIOLONCELLO.

CEMBAL D' AMORE translated is 'harpsichord of love,' but, according to Adlung (*Musica Mechanica*), this instrument did not belong to the clavicembalo or harpsichord genus, but to that of the clavichord. The instrument should be regarded as a double clavichord, the two instruments being separated by the tangents. The strings, he states, were as long again as in the ordinary clavichord, and the tangents which produced the tone from the strings, instead of touching them near to their left-hand terminations, made the impact exactly in the middle of their whole length between the bridges, of which there were two instead of one as in the clavichord, and two soundboards of unequal forms and dimensions. Both halves of the strings were thus set in vibration simultaneously, which necessitated the use of a different damping contrivance from the simple one of the clavichord. In the cembal d' amore the strings lay upon the damping-cloth instead of its being woven between them, and small wooden uprights supported it. The strings were therefore damped when at rest; when raised upwards by the tangents they were free to vibrate, and remained so as long as the keys were pressed down. The form of a cembal d' amore was that of an English spinet with the keyboard to the right hand of the player instead of the left, thus reversing the extension of the instrument laterally. Adlung attributed to it more tone than the ordinary clavichord, and more capability of *bebend* effect by the gently reiterated movement of the key. But too much pressure on the key would affect the intonation as in a clavichord. In estimating its dynamic power he places the cembal d' amore far behind the pianoforte, though beyond the clavichord. Mattheson[1] (*Critica Musica*) refers

[1] The only known illustration was found by E. van der Straeten in Mattheson's papers at Hamburg, and reproduced, with particulars, in *Mus. T.*, Jan. 1924. A detailed description is given in J. Adlung's *Musica mechanica*, vol. iii. p. 123.

to it and to a parallel between the Florentine (pianoforte) and Freiberg (cembal d' amore) in a bantering tone. Gottfried Silbermann of Freiberg (1683–1753) invented it, and Hähnel of Meissen attempted to improve it by adding a 'Celestine' register. Others, as Oppermann and Masse of Hamburg, made the instrument. A drawing of this rare instrument is preserved in the State and University library of Hamburg.

Through the even series of partial tones being virtually banished by the contact with the second or node at the half length of the string, the quality of tone or *timbre* must have tended towards that of the clarinet. The Rev. J. R. Cotter, of Donoughmore Rectory, Cork, between the years 1840 and 1865 endeavoured to obtain this effect from a pianoforte which he had constructed in Broadwood's workshops, by making a 'striking place' at the middle of the vibrating length of string. In this, the Lyrachord, as he named it, the clarinet quality was a prominent characteristic. A. J. H.

CEMBALO or CIMBALO (Ital.), a dulcimer, an old European name of which, with unimportant phonetic variations, was Cymbal. The derivation of cembalo is from the Greek *κύμβη* (Latin *cymba*), a hollow vessel; and with the Greeks *κύμβαλα* were small cymbals, a larger form of this ringing instrument being well known in modern military bands. These cymbals and bells in the Middle Ages were regarded as closely allied, and rows of bells of different sizes, *tintinnabula* or *glockenspiel*, were also called *cymbala*. Virdung (1511) names *zymbeln* and *glocken* (cymbals and bells) together. It was most likely the bell-like tone of the wire strings struck by the hammers of the dulcimer that attracted to it the name of cymbal or cembalo. It is explained here, however, not only for the meaning dulcimer, but for the frequent use of the word 'cembalo' by composers who wrote figured basses, and its employment by them as an abbreviation of clavicembalo. The dulcimer, or cembalo, with keys added, became the clavicembalo. In course of time the first two syllables being, for convenience or from idleness in speaking or writing, dropped, 'cembalo' also was used to designate the keyed instrument, that is, the clavicembalo or harpsichord—just as 'cello' in the present day frequently stands for violoncello. In the famous Passacaille of J. S. Bach, 'cembalo' occurs where we should now write 'manual,' there being a separate pedal part (see PEDAL). But we know from Forkel that Bach used a double 'flügel' or clavicembalo, having two keyboards and obbligato pedals, as well as the organ with pedals. (See HARPSICHORD.) A. J. H.

CENDRILLON, opera in 4 acts; text by Henri Cain; music by Massenet. Produced Opéra-Comique, May 24, 1899.

CENERENTOLA, LA, opera on the story of Cinderella, by Rossini; libretto by Feretti; produced Teatro Valle, Rome, 1817, King's Theatre, London (much mutilated), Jan. 8, 1820, and Théâtre des Italiens, Paris, June 8, 1822. Georgina Burns revived it in 1891 in a successful tour of the provinces.

CENTS, a numerical device for the comparison of vibration ratios, see INTERVAL.

CERESINI, GIOVANNI, a 17th-century composer of Cesena. He was Accademico Etereo in 1607; maestro di cappella 'della morte in Ferrara,' in 1627. He wrote 'Messa et salmi,' 5 v., op. 3., 2 editions, 1618 and 1623; 2 books of madrigals, 1607, and op. 4, 1627; 2 books of motets, 1617 and 1638 (*Q.-L.*).

ČERNOHORSKY (CZERNOHORSKY), BOHUSLAV MATĚJ (called also Padre Boëmo) (*b.* Nymburk, Bohemia, 1684; *d.* 1742), taught Gluck and Tartini.

He was a friar of the Minorite order, and was for a time Regens Chori at the Santo in Padua, and about 1715 organist in the convent church at Assisi, where Tartini was his pupil. About 1735 he was director of the music at St. Jacob's Church, Prague, where Gluck learnt from him. He was an excellent composer, but very few of his works are extant, the chief part of them having been destroyed by a fire in his convent. A few of his works are in the church archives at Prague and in private hands. He died while on his way to Italy. A biographical notice by Laurencin was published in the *Neue Zeitschrift für Musik*, 60, No. 13 (*Riemann*, etc.).

M.

CERONE, DOM PIETRO (*b.* Bergamo, *c.* 1566; *d.* after 1613), a priest who migrated to Spain in 1592, and entered the chapel of Philip II. in 1593.

In 1608 he left Spain for Naples, where he belonged to the Chapel Royal. He wrote *Le regole più necessarie per l' introduttione del canto fermo*, etc., Naples, 1609, and *El Melopeo*, a folio volume, in Spanish, of 22 books and 1160 pages of small print (Naples, 1613), a work, according to the account of Fétis, valuable in some respects, but tedious, confused and unequal to an astonishing degree. It is founded on the system of Zarlino; indeed there is some reason to believe that it is a mere redaction of a work with the same title which Zarlino speaks of as having completed in MS., but which has totally disappeared. The whole edition of Cerone's work is said to have been lost at sea except 13 copies, but 10 copies are mentioned as still extant, in *Q.-L.*, which refers to a third work of Cerone, *Curiosidades del cantollano* (Madrid, 1709 *sic*, perhaps for 1609). See also *Proc. Mus. Ass.*, 1878–79, p. 87. G.

CERRETO, SCIPIONE (*b.* Naples, 1551; *d.* there, after 1631), an important writer on musical theory whose known works are: *Della prattica musica* (1601); *Dell' arbore musicale* (1608); *Dialogo harmonico*, dealing with counter-

point and canon, etc. (MS. autograph, 1631); *Due raggionamente in forma di dialogo* (MS. 1626), counterpoint and canon. Of his madrigals only 1 book, 'L' Amarillide a 3 voci' (1621), and 3 numbers in Arcadelt's '1 lib. di madrigali' (1608) have survived. E. v. d. S.

CERRITO, FANNY, see SAINT-LÉON (2).

CERTON, PIERRE (*d.* Paris, Feb. 23, 1572[1]), a French musician of the first half of the 16th century; master of the choir at the Sainte-Chapelle, Paris; first mentioned there as 'Clerc sous la prébende de M. de Colligny,' May 8, 1532; entitled 'master of the boys' at the Ste.-Chapelle in 1542.[2] He is mentioned by Rabelais in the *Nouveau Prologue* to the 2nd book of Pantagruel. Having become permanent chaplain in 1548, he retained both titles until his death. Before 1560 he was in possession of a canon's prebend at the church of Notre-Dame, Melun, from which district he probably originally came. An annual service was founded by him at this church for Lady Day, and the inscription of it was engraved on a stone now preserved at the Museum of Melun. Other pious foundations of his were given to the Ste.-Chapelle and the Hôtel-Dieu, Paris. Certon was a prolific composer. The number of his masses appears to be 6: 'Missae tres Petro Certon,' 'Sus le pont d'Avignon,' 'Adjuva me,' 'Regnum mundi' (1558), 'Missa pro defunctis,' 'Missa ad imitationem moduli' (1558) (Le Roy; Ballard). His motets, 'Recens modularum,' etc., amounting probably to 50, are included in the publications of Phalèse (Louvain, 1558), Cipriani (Venice, 1544), Attaingnant (1533–49). His chansons amount to about 200, including the collections which are not mentioned in *Q.-L.* They are contained in the following collections: Attaingnant (1533–49), Moderne (1538), Le Roy and Ballard (1552), Tylman Susato (Antwerp, 1543–50), etc. He also composed French psalms and canticles. A Magnificat is found in 'Canticum B. M. Virginis . . . 1559' (see *Q.-L.*).

Modern reprints include:

HENRY EXPERT: *Répertoire populaire de la musique de la Renaissance.* 1. Chanson: 'Si par fortune avez mon cœur acquis' (Paris, Sénart); 'Monuments de la musique au temps de la Renaissance' (1925); 3 Masses: 'Sus le pont d'Avignon,' 'Regnum mundi,' 'Adjuva me' (Paris, Sénart).

CH. BORDES: 'Chansonnier du XVIe siècle.' 1. Chanson: 'J'espère et crains, je me tais et supplie. . . .' (Paris, Ronart et Lerolle); 'Ancient Church Music,' printed by the Motet Society (1843). 1 piece (2 trebles and tenor to English words).

BIBL.—MICHEL BRENET, *Les Musiciens de la Sainte-Chapelle du Palais* (1910), with list of works. M. L. P.

CERVELAT, the French name for RACKET (*q.v.*). (*PLATE IV.* No. 3.)

CERVETTO, (1) GIACOBO BASEVI (BASSEVI) (called Cervetto the Elder) (*b.* Italy, 1682; *d.* London, Jan. 14, 1783). His sobriquet 'Cervetto' (a little stag) points to a translation of the German-Jewish name of Hirschel. He came to London in 1728 as a dealer in Italian instruments and a violoncellist. In the latter capacity he took part in the performance of Dr. Arne's 'Comus' in 1737, and Burney tells us in 1739 that Cervetto, together with Abaco, Lanzetti, Pasqualini and Caporale, 'brought the violoncello into favour,' although it was already in use in England during the 17th century. In 1744 Cervetto, Pasqualini and Caporale were playing at the concerts at Hickford's Room, and Burney says that while the two former possessed a greater technique and musical knowledge, their tone was raw and crude and their style of delivery uninteresting, and Caporale surpassed them with respect to the latter qualities. For many years Cervetto was solo violoncellist at Drury Lane Theatre, where he afterwards succeeded Garrick as manager, with great financial success. He was 'of an amiable disposition but of odd appearance and manners, his large proboscis causing him to be hailed from the gallery with "Play up, Nosey."' There are several amusing anecdotes told regarding his habits. At the time of his death he had amassed a fortune of £20,000, which he left to his son JAMES, who was the most gifted of his many pupils. His compositions consist of 6 trio sonatas for 3 violoncellos or 2 violins and a bass; 6 trios for 2 violins, violoncello or harpsichord; 12 solos, and 6 solos for violoncello and thorough-bass, 6 solos and 8 solos for German flute and basso continuo; 6 lessons or *divertimentos* for 2 violoncellos, op. 4. Several of his sonatas and solos have appeared in modern editions (E. v. d. Straeten's *History of the Violoncello*).

(2) JAMES (the younger) (*b.* London, 1747; *d.* there, Feb. 5, 1837), pupil of his father and C. F. Abel, appeared on Apr. 23, 1760, at a concert given at the Little Theatre in the Haymarket in conjunction with Gertrud Schmeling (afterwards Mme. Mara), aged 10, 'Master Barron,' a pupil of Giardini, aged 13, and Fanny Burney, then a nine-year-old pianist. In 1765 he played with his father at a concert given by Parry the harpist, and soon became one of the leading violoncellists of his time. From 1780 he played at the professional concerts at the Hanover Square Rooms, where in 1783 he was joined by Duport and Baumgarten, and in 1784 he played a violoncello concerto by Haydn there, being joined about that time by Chabran (Gaëtano Chiabrano). From 1763–70 he toured as a soloist on the Continent, and after his return became (1771) a member of the Queen's band. Although not possessing the fiery temperament and virtuosity of Crosdill, he surpassed both him and his father in beauty of tone and delicacy of phrasing. He composed 3 books of duets for 2 violoncellos, 2 books of solos, 1 book of sonatinas for violoncello and bass, op. 4. A fine portrait of him in oils is in the possession of W. E. Hill & Sons (reproduced

[1] *Riemann.*
[2] See his second book of Motets.

in E. v. d. Straeten's *Hist. of the Violoncello*). *Q.-L.* mentions a Jasper Cervetto, whom he thinks probably a son of James, as the 19th-century author of a divertimento for 2 violoncellos and 2 books of duets for violin and violoncello opp. 5 and 6. E. v. d. S.

CES, see Cis.

CESARI, Gaetano (*b.* Cremona, 1870), critic and historian, entered the Conservatoire of Milan as a student of the double bass, and on completing his studies was for some years a performer on this instrument in various Italian orchestras. In 1900 he resumed his studies, going to Hamburg, where he sought the advice of Arnold Krug. From Hamburg he went on to Munich to study under Felix Mottl, graduating at the same time in philosophy at the university. On his return to Italy, Cesari for a time taught history, and later was appointed librarian to the Conservatoire. He is also musical critic to the *Corriere della Sera* and member of the Permanent Commission for Music of the Italian Ministry of Education. His most important works include a critical edition of Monteverdi and the collection of Verdi's letters, *Il Copialettere di Giuseppe Verdi*. F. B.

CESARIS, Johannes, an early 15th-century composer. He is one of the three musicians named by Martin le Franc as predecessors of Dufay and Binchois (see Carmen, Johannes). A motet of his in 4 parts and 5 secular songs to French words are contained in MS. Canonici Misc. 213 in the Bodl. Lib. One of the latter (in 3 parts, with 2 sets of words) is transcribed in Stainer's *Dufay and his Contemporaries*.

J. F. R. S.

CESI, (1) Napoleone (*b.* Naples, 1867), son of the Neapolitan pianist, Beniamino Cesi. He studied with his father, then with Martucci, Lauro Rossi and Serao; and was classified second in the Rubinstein competition won by Ferruccio Busoni. He has composed operas and various pianoforte pieces, amongst them a concertstück for piano and orchestra and a concerto dedicated to his daughter Cecilia, who is also a pianist of some ability. His brother (2) Sigismondo (*b.* Naples, May 24, 1869) was taught by his own father and A. Longo for pianoforte, and by N. D' Arienzo for theory. In 1898 he founded in Naples a Liceo Musicale, together with E. Marciano, of which he is still the director. He has published editions of the works of Schumann and Clementi, and is the author of a study on the ' history and literature of the pianoforte.' F. B.

CESTI, Marcantonio (*b.* Arezzo, *c.* 1620 [1]; *d.* Venice, 1669), an ecclesiastic, a native of Arezzo according to Baini, whom Fétis follows, but of Florence according to Adami.

In due course he became a pupil of Carissimi. He was maestro di cappella in Florence in 1646, was made a member of the papal choir on Jan. 1, 1660, and vice-Kapellmeister at Vienna from 1666–69.

The bent of Cesti's genius was towards the theatre, and he did much for the progress of the musical drama in Italy. Bertini says of him :

' Contribuì molto ai progressi del teatro drammatico in Italia, riformando la monotona salmodia che allova vi regnava, e trasportando ed adattando al teatro le cantate inventate dal suo maestro per la chiesa.'

That he owed much to his master Carissimi, as he did to his contemporary Cavalli, whose operas were then in vogue at Venice, cannot be doubted, but that he deserves to be dismissed as the plagiarist of either of them is untrue.

The following is a list of the operas of Cesti :

' L' Orontea,' 1649 ; ' Cesare Amante,' 1651 ; ' La Dori,' 1663 ; ' Tito,' 1666 ; ' Semiramide,' 1667 ; ' Il pomo d' oro,' 1668 ' L' Argia,' 1669 ; ' La schiava fortunata,' 1674.

This last, and another, ' Genserico,' were left unfinished at his death, the former being completed by Marcantonio Ziani, the latter by Domenico Partenio. Four others, without date of production, are mentioned in *Q.-L.* Bertini and Gerber say that he set Guarini's ' Pastor Fido ' to music, but the work is not known to exist. Burney has preserved a scene from ' L' Orontea' in his *History of Music*, and Hawkins has done the like by a pretty little duet for soprano and bass, called ' Cara e dolce è libertà.' His name is chiefly known in the present day by the melodious song, ' Intorno all' idol mio,' quoted by Burney. The Abbé Santini had a collection of his chamber pieces, and the score of his Dori, lately republished ; some of his canzonets were published in London by Pignani in 1665, and ' Pomo d' oro ' is published in *D.T.Ö.* (see Denkmäler). There are 3 motets and 21 cantatas for soprano solo at Ch. Ch., Oxford (see Arkwright's Catalogue, Part I.), and one in the National Library in Paris. The ' Judicium Salomonis,' published as Carissimi's, is almost certainly by Cesti.

CETERA, see Cither.

CEVALLOS (Ceballos ; Zaballos), the name of two brothers, Spanish composers of the 16th century.

(1) Francisco (*d.* Burgos, 1571) held the post of maestro de capilla there from 1535 until his death. Works attributed to him rather than to his brother are found in MS. at the Escurial, Seville, and Toledo cathedral (MS. 7 motets and 3 masses), and the cathedral of El Pilar at Saragossa ; the last possesses a Mass by him (3rd tone). Eslava printed three motets, and Mitjana (*Encl. de la musique : Espagne*, p. 1975) quotes a fabourdon.

(2) Rodrigo, who on June 10, 1556, was appointed maestro de capilla at Cordoba, is known as a composer of secular music.

J. B. T.

[1] *Riemann* (1922) gives the date of his baptism Oct. 15, 1618 ; Coradini, however, gives his birth date as Aug. 5, 1623.

CHABRAN (real name CHIABRANO). Three musicians of this name have hitherto been inextricably confused. A careful investigation of all available sources has led to the following results. They were apparently relatives who came from Piedmont, and Fétis says that Francesco, whom he mistakes for (1) CHARLES (*b. circa* 1723), who always appeared under the name of Chabran, was a nephew and pupil of Somis (G. B.?) at Turin. Charles became a member of the royal chapel at Turin, 1747. He went to Paris in 1751, where he met with great success, and published 6 sonatas for violin and basso continuo, op. 1, which were also published by Welcker in London, where he appeared in 1752. The importance of Charles lies in the fact that, together with other pupils of Somis, he handed the latter's art down to posterity. Some of his sonatas were republished by Cartier, Alard, A. Moffat, etc. (2) GAËTANO CHIABRANO is probably identical with 'Capperan,' who appears as violoncellist in the orchestras of the Paris Opéra and Concert Spirituel in 1755, the royal chapel at Turin, 1752–55, and again in 1771, and the Concerts of Ancient Musick, London, 1784 (as 'Chabran'). He wrote solos for violoncello and bass, published by Bremner, London, as 6 solos by Chiabrano and Piantanida, *c.* 1780; 2 sonatas for ditto (MS.) in the Berlin Library; 5 MS. sonatas for violoncello and bass by Gaëtano Ciabrano, in the Milan Conservatoire, are apparently by the same. (3) FRANCESCO CHABRAN published a Tutor for the guitar in 1790, and a book of opera-dances for pianoforte, violin or flute, *c.* 1795. A sonata for violoncello attributed to him in the British Museum Catalogue is evidently by GAËTANO CHIABRANO. E. v. d. S.

CHABRIER, ALEXIS EMMANUEL (*b.* Ambert, Puy-de-Dôme, Jan. 18, 1841; *d.* Paris, Sept. 3, 1894), showed as a child a precocious inclination for music. He took it up first as an amateur while he was studying law at Paris and was employed at the Ministère de l'Intérieur. At the Lycée St. Louis, or Louis-le-Grand (according to one of his biographers), he studied piano with Edouard Wolf, and afterwards harmony, counterpoint and fugue with Semet and Aristide Hignard. He was, however, in a great measure self-taught. His first works of any importance were two operettas, more worthy of notice than most compositions of their kind, 'L'Étoile'[1] (Bouffes Parisiens, Nov. 28, 1877) and 'L'Éducation manquée' (Cercle de la Presse, May 1, 1879). Two years later, having devoted himself entirely to music, he published 'Dix Pièces pittoresques' for piano, followed later on by 'Habanera' (1885), 'Bourrée fantasque' (1891), etc., and in Dec. 1883 a Rhapsody on original Spanish airs, 'España,' performed by Lamoureux in his concerts at the Château d'Eau, with extraordinary success. Thus his reputation was made. As chorus-master (1884–85) he helped Lamoureux to produce the first two acts of 'Tristan und Isolde,' thus developing his talent for orchestration. He then produced a scena for mezzo-soprano and female chorus, 'La Sulamite' (Mar. 15, 1885), also selections from his opera 'Gwendoline,' first given in its entirety (3 acts) at the Théâtre de la Monnaie, Brussels, Apr. 10, 1886 (later performances: Karlsruhe, May 30, 1889; Leipzig, 1890, and other German towns; Lyons, Apr. 1893; Paris, Opéra, Dec. 27, 1893).

Finally, his remarkable work, 'Le Roi malgré lui,' though conceived in an antiquated form, was given at the Opéra-Comique (May 18, 1887). After three performances it was stopped by the fire of May 25, but was reproduced at the temporary establishment on Nov. 16, 1887. His unfinished opera,[2] 'Briséis,' consisting of one act only, was produced at the Opéra, May 8, 1899.[3] Chabrier's musical language is marked by great brilliancy, an exuberant verve and wit, an inexhaustible spontaneity, a vivid harmonic rhythmical and orchestral colouring. His works show a rare power of combining all the musical materials at his disposal, and his 'España' is a model in that respect. Although he has left serious works for the stage, his nature was not that of a dramatist, and the lyric side of his temperament prevailed in all his productions. He possessed an innate gift for expressing drollery in music, for instance in his songs (1890, 'Ballade des gros dindons,' etc.), the more so since it was the natural reflection of his own turn of mind. He may be considered to be one of the generators of modern French music. A. J. and M. L. P.

BIBL.—OCTAVE SÉRÉ, *Musiciens français d'aujourd'hui.* (1921.)

CHACONNE (Ital. *ciacona*), an obsolete dance, probably of Spanish origin. At any rate the name is Spanish, *chacona*, and is said to be derived from the Basque *chocuna*, 'pretty' (Littré). It is first mentioned in Spain in 1591, and Cervantes has an admirable description of the dance in one of his *Exemplary Novels* (*La ilustre Fregona*), published in 1610. The chaconne was a dance usually in 3-4 time (with the accent on the 2nd beat of the bar), of a moderately slow movement, which belonged to the class of variations, being, in fact, in the large majority of cases, actually a series of variations on a 'ground bass,' mostly eight bars in length. It closely resembles the Passacaglia. (For a comparison of the two see PASSACAGLIA.) Among the most celebrated examples are that in Bach's fourth sonata for violin solo, and the two (one with 21, the other with 62 variations) in Handel's 'Suites de

[1] The libretto of this work with one number from the original music was used as the basis of 'The Lucky Star' (Savoy Theatre, London, Jan. 7, 1899) by a number of adapters and Ivan Caryll.

[2] Planned in three acts.

[3] First performance (concert form), Lamoureux Concerts, Feb. 7, 1897; Berlin, Jan. 14, 1899.

Pièces.' Lully made the chaconne the customary ending to his operas, and its use in such a place was a convention of the later 17th and early 18th century opera. Gluck conformed to it in the *finale* of his 'Orfeo,' and with some modifications in the final ballet of his 'Iphigénie en Aulide.' In Couperin's 'Pièces de clavecin' (1713), is a chaconne in 2-4 time, 'La Favorite Chaconne à deux tems.' E. P.; addns. J. B. T.

CHADWICK, George Whitefield (*b.* Lowell, Mass., U.S.A., Nov. 13, 1854), American composer of choral and instrumental works and songs, living in Boston.

He began the study of piano under his elder brother and later went to Boston, where he studied organ under Eugene Thayer. For a short time he was director of music at Olivet College, Michigan, but resigned to go to Leipzig, where he studied in 1877 and 1878 under Reinecke and Jadassohn in the class with Helen Hopekirk and Carl Muck. In 1879 he studied in Munich under Rheinberger. While in Leipzig he composed an overture, 'Rip van Winkle,' which he conducted at a festival concert of the Handel and Haydn Society of Boston after his return to America in 1880. He made Boston his home and became organist of the South Congregational Church. He was appointed professor of harmony, composition and orchestration in the New England Conservatory of Music (Boston), and became its director in 1897. He still (1926) holds this post. Yale University conferred upon him in 1897 the honorary degree of Master of Arts. He conducted for several seasons the music festivals at Worcester, Mass., but confined himself chiefly to his duties at the Conservatory and to composition.

Chadwick's works include operas, choral compositions, orchestral pieces (symphonies and other forms), chamber music, piano pieces and songs. His productivity has been not only large but varied. His writings for the stage range from serious musical dramas like 'Judith' to a burlesque operetta, 'Tabasco,' which had much popularity. His creations in the choral field, however, are more important. His ode for the opening of the Columbian Exposition (Chicago, 1892), 'The Viking's Last Voyage,' and 'Phœnix Expirans,' are works of imagination, virility and melodic inventiveness. His symphonic compositions disclose a sympathy with classic ideals. In some later works, such as 'Tam o' Shanter,' Chadwick showed his readiness to assimilate modern methods and orchestral devices, which he handled with skill. His chamber music is characterised by clarity and dignity. Above all things else he draws clear and engaging melodic outlines in all his music. He has used representative themes in some works and in others has utilised the idioms of negro songs. But his music is for the most part conservative in style. The following is a list of his works:

Operas: 'The Quiet Lodging,' 1894; 'Tabasco,' burlesque opera, 1894; 'Judith,' lyric drama, 1901; 'The Padrone,' opera, 1915; 'Love's Sacrifice,' pastoral opera, 1917.

Choral Works with Orchestra: 'The Viking's Last Voyage,' 1881; 'The Song of the Viking,' 1882; Dedication ode for the new Hollis Street Church, Boston, 1886; Noël for mixed voices, 1888; 'Lovely Rosabel,' ballad for mixed voices, 1889; 'The Lily Nymph,' 1895; 'Ecce jam noctis,' written for Yale University Commencement, 1897; 'Phœnix Expirans,' 1892; Ode for the opening of the Columbian Exposition, 1892; 'Land of our Hearts,' 1918.

Orchestral Compositions: Symphonies, C major, 1882; B flat, 1888, F, 1896; serenade for strings, 1890; A Pastoral Prelude, 1891; Symphonic Sketches, an orchestral suite in A, 1896 'Cleopatra,' symphonic poem, 1891; sinfonietta in D, 1906; 'Suite Symphonique' in E flat, 1911; 'Aphrodite,' symphonic poem, 1912; 'Angel of Death,' symphonic poem, 1917; 'Tam o' Shanter,' symphonic ballade, 1917: theme variations and fugue for orchestra and organ, 1923. Overtures: 'Rip Van Winkle,' 1879; 'Thalia,' 1883; 'Melpomene,' 1891; 'Adonais,' 1898; 'Euterpe,' 1906; anniversary overture, 1922.

Chamber Music: String quartets in G minor, C major, D major, E minor, and D minor; quintet in E flat, PF. and strings.

Songs with Orchestral Accompaniment: 'Lochinvar,' 1896; 'A Ballad of Trees and the Master,' 1899; 'Joshua,' 1909; 'Afar on the Plains of Tigris,' 1911; 'Aghadoe,' 1911; four Christmas songs, 1912; 'The Curfew,' 1914; 'The Voice of Philomel,' 1914; 'The Fighting Men,' 1918; 'Drake's Drum,' 1920.

Numerous songs with piano or organ accompaniment, organ compositions, piano works, church music and partsongs.

W. J. H.

CHAIR ORGAN, an older name for Choir Organ, not impossibly arising from the fact that in cathedrals the choir organ often formed the back of the organist's seat.

CHÂLET, LE, a comic opera in 1 act; words by Scribe and Mélesville; music by A. Adam; produced Paris, Sept. 25, 1834; Olympic Theatre, London, 1837. G.

CHALIAPIN, Fedor Ivanovich (*b.* Kazan, Feb. 11, 1873), celebrated opera-singer. His father was a peasant, and unable to give his son any educational advantages, musical or otherwise.

At 17 the young man joined a provincial opera-company, and was soon entrusted with leading parts. In 1892, after a tour in the region of the Caspian Sea and the Caucasus, he found himself in Tiflis, where he studied for a year with Oussatov. Two years later he began to sing in St. Petersburg, at the Summer Theatre, the Aquarium and the Maryinsky Theatre, but it was not until 1896, when he was engaged at the Private Opera in Moscow, that Chaliapin's name became famous. This enterprise, supported by a rich lawyer of the name of Mamontov, made a special feature of national opera, and gave the young singer an opportunity of displaying his exceptional powers. Chaliapin impersonated, with striking power and originality, most of the chief bass parts in Russian opera: Ivan the Terrible in Rimsky-Korsakov's 'Maid of Pskov,' the title-rôle in Moussorgsky's 'Boris Godounov,' Melnik in Dargomijsky's 'Rousalka,' Yeremka in Serov's 'Power of Evil,' etc. He sang in Milan in 1901 (ten performances of Boito's 'Mefistofele'), and again in 1904. R. N.

On June 24, 1913, at Drury Lane, Chaliapin made his first appearance in England with the Russian company which on that date introduced Moussorgsky's 'Boris Godounov' to England. 'Khovanstchina' (Moussorgsky)

and 'Ivan the Terrible' (Rimsky-Korsakov) were his other impersonations in this season, from which the fame of the Russian opera in this country began (see BEECHAM, Thomas). In the following year he added to these rôles two parts in Borodin's 'Prince Igor.' After the Russian revolution he made extensive concert tours in America, raising considerable funds to aid his famine-stricken countrymen. Latterly he has been regularly engaged at the Chicago Opera and at the Metropolitan of New York, where his performances as Boris and in the two Mephistopheles parts of Boito and Gounod have brought him a prestige equal to that which his intensely dramatic personality secured for him in Europe. In 1926 he reappeared on the English stage, singing Mephistopheles (Boito) and Don Basilio ('Il Barbiere'). C.

CHALUMEAU (from *calamus*, a 'reed'), an obsolete instrument of the beating single reed type. In its rudest form it was made from a cylindrical reed in which the speaking tongue was cut, and this was therefore not removable, in the manner of the modern clarinet reed. An interesting example lent by M. Césare Snoeck to the Royal Military Exhibition, London, 1890, was $8\frac{1}{4}$ inches long, and about $\frac{6}{10}$ inch internal diameter, and was pierced with six finger-holes on the upper side, and one thumb-hole beneath. The tongue or reed was cut on the upper side. By the 17th century the instrument, from its rude original form, had developed into a family, of soprano, alto, tenor and bass, with a slightly increased compass due to the introduction of two keys. In this state it was ready by means of a slight modification to become the modern CLARINET (*q.v.*). The name Chalumeau, especially in its German form Schalmei or Schalmey, is also given to a totally different instrument from the foregoing; that is, to an instrument with conical tube and double reed, the antetype of the oboe (see SHAWM). There may be room for doubt as to which of the two instruments is intended where the name occurs in the scores of Gluck's operas. The word is also used for the lowest register of the clarinet. (See *PLATE LXXV.* No. 3.) D. J. B.

CHAMBER MUSIC is the term properly applied to all music intended for domestic use. Before the public concert became a recognised institution, chamber music (Ger. *Kammermusik*; Ital. *musica da camera*) was used principally in contradistinction to music written either for the church or the theatre. Consequently early in the 17th century we find the title of *musico da camera* (musician of the chamber) mentioned as a position held by musicians in a noble household, and composers of that time producing *cantate da camera* and *madrigali da camera* for their patrons. With the rise of the violin during the century, the distinction between the *sonata da camera* and *sonata da chiesa* came into vogue in Italy (see CORELLI), and from that time began the special association of the term with the idea of concerted music for strings, though the consort of viols, as exemplified in the 'Fancies' of the old English school, was one species of chamber music amongst many which flourished in this country at an early date (see CHEST OF VIOLS).

So general a term cannot receive any precise classification. It is important to observe, however, that the development of chamber music in its various branches was always specially dependent on the patronage in one form or another of an aristocracy, until the concert room converted chamber music into a species of public performance.

We find the Italian renaissance, the English Elizabethan period, the French court of Louis XIV. (who established the office of *maître de la musique de la chambre du Roy*), and, in the 18th century, the small German courts modelled on that of 'Le Grand Monarque,' each in turn producing chamber music of distinguished types, concerted and solo, vocal and instrumental.

Wherever patronage was uncertain the cultivation of chamber music was sporadic. That is the essential difference between the cases of Corelli in Italy and Purcell in England. The former, living and working under the protection of Cardinal Ottoboni, headed a great school of chamber music; his English contemporary, despite his superior personal genius, remained an isolated phenomenon. Purcell's sonatas of three parts (published 1683), offered to those 'who carry musical souls about them,' were merely seed thrown by the wayside; they established no type and proclaimed no era.

The models of the sonata for stringed instruments with thorough-bass accompaniment for harpsichord and of the concerto for a larger group of instruments, established by the great Italians, Corelli, Vivaldi and others, at the end of the 17th century, remained the dominant types of concerted chamber music throughout the first half of the 18th century. Handel and J. S. Bach were alike indebted to them for the forms of their instrumental works, and again, in comparing these two the influence of patronage in determining the course of events is apparent. Handel, fighting his own way through the world, produced a comparatively small amount of chamber music—the violin sonatas are the most important part of it—and he turned the concerto from a chamber music form into an orchestral one for public performance. Bach, on the other hand, produced the bulk of his sonatas, suites and concertos during his Cöthen period (see BACH), and the meticulous attention which he paid to detail as opposed to massed effects proclaims him pre-eminently a chamber music composer.

Haydn, who developed the string quartet and kindred combinations of concerted

chamber music in the seclusion of Prince Esterhazy's country house, may be regarded as the last outstanding representative of the era of patronage, although the form which his work took indicated new artistic directions which subsequent composers were to follow.

The first essential difference between the quartets of Haydn and the chamber music of the preceding generation is one of texture. His quartet represents the equal conversation of the four instruments, and the complete emancipation of all chamber music from the control of a THOROUGH-BASS (*q.v.*) followed as its consequence. The second is that of FORM (*q.v.*). By a series of modifications and developments from existing shapes he arrived empirically at the classical sonata form (see SONATA), and established it as the framework of all concerted chamber music for instruments; Mozart followed in his steps, and for nearly a hundred years after Haydn's death that framework was considered to be an essential condition of such music. The only important departure from it was made by Beethoven in the last series of his quartets (published posthumously), works which can scarcely be said to belong either to the chamber or the concert room, but were written rather as an intimate personal diary of the soul.

A less definable characteristic than either form or texture, but one common to all classical examples of chamber music, is the intimacy of feeling expressible through the subtleties of an *ensemble* of combined solo players. On this characteristic all the great masters have relied. The opening of Mozart's string quartet in C major (Köchel, 465), considered in its day one of the enigmas of music, is a typical instance of such reliance, and all the masters of the classical era from Bach to Brahms afford countless others.

The concert room of the 19th century did not essentially alter the structure of chamber music. History records no counterpart in it to the symphonic poem which in the middle of the century threatened to supersede the classical symphony of the orchestra. The development of programme music left the string quartet and its companion combinations virtually untouched. The concert room, however, had its effect in sophisticating the ideas of chamber music and coarsening its texture. Amongst 19th-century composers it often seems rather a matter of chance whether a work is scored for a chamber music combination or for an orchestra. Even Brahms, whose understanding of chamber music style was more complete than that of any other composer of his generation, could begin his first string quartet (op. 51, C minor) with a passage which has all the appearance and sound of being an orchestral idea reduced for four strings, and the chamber music of such composers as Dvořák, Grieg and Tchaikovsky teems with passages illustrating the same point.

Moreover, the enlargement of the piano from a chamber instrument, as it was in the days of Mozart, to the concert room instrument for which Schumann wrote his quintet for piano and strings, created a new standard of technique for those species of chamber music which combine the piano with strings. Schumann, indeed, may be said to have begun a new epoch in this type of chamber music which was carried further by Brahms, Dvořák and César Franck. In their piano quintets, etc., these composers are felt to be writing primarily for the public concert hall, even though it be a small hall, rather than for purely domestic performance. With the 19th century, too, performers organised themselves into permanent parties for the performance of chamber music, and necessarily studied their *ensemble* increasingly from the standpoint of the concert platform.

Recently this chamber music of the concert room has entered on a new phase. All those influences of romanticism which converged to produce what is known as PROGRAMME MUSIC (*q.v.*), though kept at bay for a time, began to affect first the spirit, then the actual form of chamber music. During the 19th century these influences began to operate most clearly in the work of Slavonic composers. Smetana's string quartet, 'From my life,' and Tchaikovsky's trio for pianoforte and strings, 'In memory of a great Artist,' show the influences at work. At the end of the century Debussy used the string quartet as a medium for that kind of impressionism which he had evolved at the keyboard of the piano. Ravel following a few years later with the string quartet and the septet (harp, flute, clarinet and string quartet), carried further what Debussy had begun. The characteristic of this early 20th-century French school of chamber music is the concentration of the interest on successive impressions of harmony and timbre rather than on design. This is true even where the traditional sonata form is followed with exactitude, as it is in Ravel's quartet.

In England in the first decade of the century there came an impulse among the younger composers to write short single-movement works for various combinations of instruments. This impulse was fostered from without by the competitions instituted by W. W. COBBETT (*q.v.*); but it would be untrue to suggest that his prizes were the cause of so general a departure from the sonata tradition. The 'Fantasies' by Hurlstone, Frank Bridge, Vaughan Williams and others, which won prizes, were in some instances no doubt influenced by practical considerations, not only of the conditions laid down for the competitions, but also of what would be serviceable in the concert room. They

were also the result of the desire for a more direct and less pretentious form of musical expression. Thus, while German chamber music was becoming increasingly elaborate, with the involved counterpoint of Max Reger and the theoretic artifice of Arnold Schönberg's harmony, both French and English composers in their different ways were throwing over accepted traditions, and from them it largely comes that at the end of the first quarter of the century the chamber music repertory includes again works of innumerable sizes and shapes having little or no connexion with that three- or four-movement sonata form based on the classical view of tonality which modern harmony has challenged (see HARMONY). Chamber music combinations, and particularly the string quartet, have been found to be a peculiarly convenient medium for all those experiments with atonality, multiple-tonality, quarter-tones and other divisions of the scale which are characteristic of the restless technical enterprise of to-day.

Throughout the 19th century chamber music lay in a quiet backwater of the stream, more or less immune from the controversies which urged on the progress of orchestral music. To-day it has been drawn into the vortex, as the festivals held annually by the INTERNATIONAL SOCIETY FOR CONTEMPORARY MUSIC show. It is unnecessary to pass any judgment on the desirability or otherwise of this state of things. The course of history is here outlined merely to establish the fact that chamber music, though still called by the name which indicates its domestic origin, has become merely a species of public concert music differing from orchestral music only in the fact that it is performed by groups of solo players sufficiently small to produce a perfected *ensemble* without the aid of a conductor.

(For the facts about the several combinations see DUET, TRIO, QUARTET, QUINTET, SEXTET, SEPTET, OCTET and NONET.)

C.

CHAMBER ORGAN, an organ of small size, suitable for use in a dwelling.

CHAMBONNIÈRES, JACQUES CHAMPION DE (*b.* 1602; *d.* Paris, *c.* 1672), grandson of Thomas Champion, son of Jacques Champion, 'sieur de la Chapelle,' and of Anne Chatriot (married Jan. 31, 1601), daughter of Robert Chatriot, 'sieur de Chambonnières.' He added to his name that of his maternal grandfather's estate, in Brie (district of Meaux, now department of Seine et Marne), which was also the home of the Couperin family. He succeeded his father as spinet-player to Louis XIII., and became harpsichord-player to Louis XIV. He led an unsettled life and sought service in Sweden, at the court of Brandenburg. An unequalled composer and player of his time, in the opinion of Constantin Huyghens, the Abbé Le Gallois[1] says he 'excelled every performer in the roundness and softness of his touch.' In fact, Chambonnières is regarded as the founder of the French school of the 'clavecin.' His production for the harpsichord —two books of 'Pièces de clavessin' (1st book, 1670, Conservatoire Library; 2nd, National Library, undated)—are of historic importance.[2] They consist of dance airs grouped together on a plan similar to that of the suite for lute. The consideration he gives to the use of 'Agréments' (see ORNAMENTS) is marked by the existence of a table, the first one published (1st book) for harpsichord solely. He is known to have been the teacher of G. Nivers, the three earlier Couperins, Cambert, Le Bègue and d'Anglebert.

PIRRO, *Les Clavecinistes* (1925).

M. L. P.

CHAMINADE, CÉCILE (*b.* Paris, Aug. 8, 1861), pianist and composer, studied various branches of music with Le Couppey, Savart, Marsick and Godard.

At 8 years of age she wrote some pieces of church music, and gave her first concert when she was 18. Since that time her numerous works of all kinds have attracted the attention of the public, and she has brought them forward during many concert tours, in France and elsewhere, particularly in England, where she became a regular visitor after her first appearance in June 1892. A great number of songs, pianoforte pieces, a 'Concertstück' with orchestra, etc., are among her most successful works. She has essayed the larger forms of music, having written several orchestral suites, a 'Symphonie lyrique' with chorus and orchestra, called 'Les Amazones'; two trios for piano and strings; a ballet, 'Callirhoë,' produced at Marseilles, 1888; and an opéra-comique, 'La Sévillane,' unpublished. Notwithstanding the real charm and clever writing of many of Mlle. Chaminade's productions, they do not rise above the level of agreeable salon music.

G. F.

CHAMPEIN, STANISLAS (*b.* Marseilles, Nov. 19, 1753; *d.* Paris, Sept. 19, 1830). At the age of 13 he was already maître de chapelle at Pignou, Provence, writing masses, etc., for the church of that town. In 1770 he went to Paris as church composer. In 1780 his first opéra-comique, 'Soldat français,' was produced at the Comédie Bois de Boulogne. After that

[2] Reprints in *Le Trésor des pianistes*, vol. v.; and in *Les Maîtres français du clavecin des XVIIe et XVIIIe siècles* (Paris, Sénart.) P. Brunold et A. Tessier, *Œuvres complètes de Chambonnières* (1925).

time he wrote over 40 operas and operettas, of which many were performed in other countries; but 15 operas written after 1792 were never performed. 'La Mélomanie' and 'Le Nouveau Don Quixotte' were his most popular works and had many revivals. Napoleon gave him a pension of 6000 francs, which he lost at the Restoration. After many vicissitudes and hardships, a committee of authors, including Boieldieu and Scribe, assured him a pension which he only enjoyed about 18 months before he died. An interesting experiment of his was the writing of an opera in prose, for which he chose a literal translation of Sophocles's *Electra*. The work was rehearsed at the Opéra and received with great applause, but the authorities refused, without giving a reason, to permit its performance (*Fétis*).

CHAMPION, a family of French musicians, the first of which seem to have been (1) NICOLAS and (2) JACQUES, who belonged to the chapel of Charles V. as singers, in 1521 and following years. Of Nicolas's work is known the psalm 'Beati omnes qui timent' (6 parts), which is found in two collections printed in 1542 and 1569 at Nuremberg. (3) THOMAS, called Mithou, organist and spinet-player in the reigns of Charles IX. and Henri III., published 'Premier livre contenant 60 pseaumes de David (1561).' He had married Marguerite (1570), daughter of the Scotch lutenist, Charles Edinthon. His two sons, (4) JACQUES, 'sieur de la Chapelle,' and (5) NICOLAS, followed him in his post under the succeeding kings; the first named was the father of (6) JACQUES CHAMPION DE CHAMBONNIÈRES (see CHAMBONNIÈRES). (7) ANTOINE was, according to Fétis, an eminent organist in the reign of Henri IV.; a 5-part Mass in the library at Munich (attributed to him by the same authority) is the work of NICOLAS, a 16th-century composer of psalms and motets. This might be Nicolas (1) mentioned above. Fétis declared himself the possessor of a book of organ pieces by Antoine Champion, but it is not to be found now in Fétis's library.

M. L. P.

CHANGE RINGING, a system of producing changes on sets of bells of various numbers, viz. 5, 6, 8, 10, or 12, tuned to the notes of the major scale—the largest bell (tenor) always being the tonic or keynote. The fundamental rules which govern the system are:

(1) That there must be an alteration in the sequence of the bells at each successive blow of the clapper.
(2) That a bell can alter only one place either up or down at a time.
(3) That the first sequence is ROUNDS (*q.v.*).
(4) That the 'touch' or 'peal' (*i.e.* the composition of the changes) is not completed until the sequence of Rounds is again reached.

It should be the aim of the composer, while adhering to the above rules, to obtain the most musical sequences possible.

A bell working its way from the leading or first place (front) to the last place (behind) is said to be 'hunting up.' The reverse of this is called 'coursing down.'

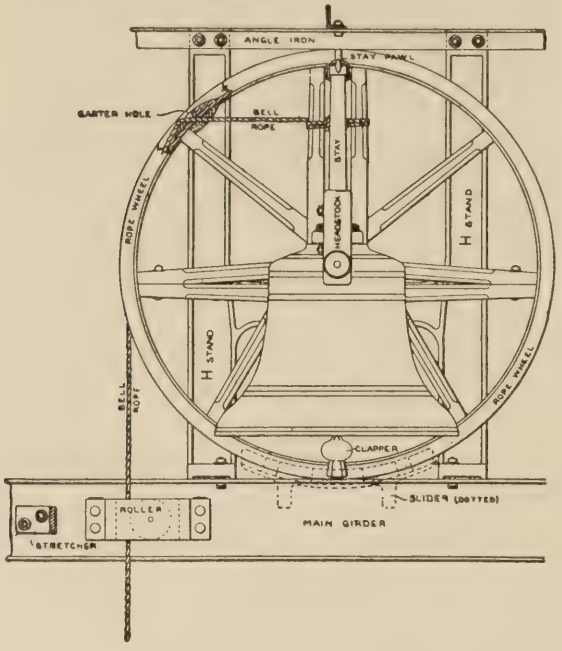
In the following example of ten changes on five bells it will be seen that No. 1 'hunts up' first and then 'courses down,' while No. 5 is doing the exact opposite:

1 2 3 4 5	5 4 3 2 1
2 1 4 3 5	5 3 4 1 2
2 4 1 5 3	3 5 1 4 2
4 2 5 1 3	3 1 5 2 4
4 5 2 3 1	1 3 2 5 4
	1 2 3 4 5

The above is a 'plain hunt' on 5 bells, and it may be regarded as the elemental basis upon which the science of change ringing is founded.

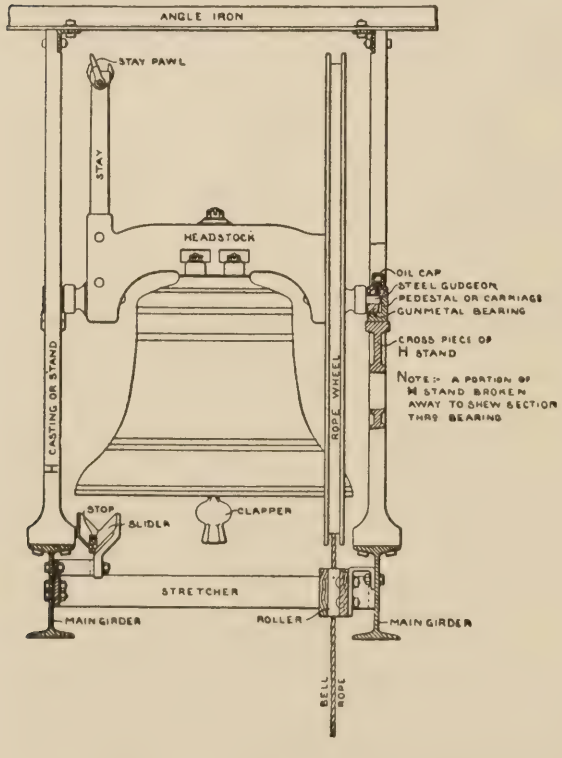
Arising from this, and still adhering to the fundamental rules already mentioned, many methods—more or less intricate—of producing changes have been evolved. The three original methods are named GRANDSIRE, STEDMAN and TREBLE BOB.

Change ringing proper is not possible on less than 5 bells or on a greater number than 12. Changes are rung on 7, 9 and 11 bells, but in each case 8, 10 and 12 bells respectively are used, the tenor bell remaining the last note of the sequence throughout the composition.



The following table shows the number of changes possible on a given number of bells, the change ringers' technical term for each group, and the approximate time which would be taken in ringing them:

No. of Bells.	Name.	No. of Changes.	Years.	Days.	Hours.	Minutes.
4	Singles . .	24	..	..	..	1
5	Doubles . .	120	..	..	..	5
6	Minor . .	720	..	..	..	30
7	Triples . .	5,040	..	..	3	..
8	Major . .	40,320	..	1	4	..
9	Caters (quaters)	362,880	..	10	12	..
10	Royal . .	3,628,800	..	105	..	..
11	Cinques . .	39,916,800	3	60	..	..
12	Maximus . .	479,001,600	37	355	..	..



The following diagrams show the way in which a modern bell is hung for the purpose of change ringing.

The crown of the bell is firmly bolted to the headstock, which revolves on 'gudgeons' working in ball bearings. To the headstock is fixed a large wooden wheel—grooved for the purpose of admitting the rope by which the ringer causes the bell to begin its motion, and to swing in alternate opposing directions for every pull of the rope. The bell describes

an ever-increasing arc until it is mouth upwards, its clapper striking the bell at each swing at the time when the bell is reaching

the end of its movement. The process of getting the bell into this position is called 'raising,' and the bell when raised is said to

be 'up' or 'set.' The bell may, if desired, be allowed to go a little way 'over the balance' until the stay pawl rests against the slider stop. It can there remain at rest, and the ringer may remove his hands from the rope.

'Falling a bell' is bringing it from the 'set' to the 'at rest' position. In doing this the ringer lessens the arc described by the bell—by shortening the rope and thus checking its movement.

Change ringing is practicable only when the bells are describing their complete circle and are being rung up to the 'balance' each time.

In change ringing bringing the bell from one 'set' position to the other demands skill and judgment so that the successive 'striking' shall be regular and even. An expert band of ringers secures perfect precision in the 'striking.' This, together with the full tone of the bell, in whole swing, the ever changing notes, the continuity, and the mingling of sounds constitutes the indescribable charm of good change ringing. In many ways the succession of sounds has little real musical significance, but the indefinite rhythmic tonal progression is fascinating. The best result is obtained by listening at some distance away from the tower, when bells are rung in 'full swing.'

Stedman's Principle.—A system of change-ringing invented by Fabian Stedman, a printer of Cambridge, who published his great work, *Tintinnalogia*, in 1668. It is probable that his method was formulated about 1640. He based it upon the six changes of which three bells are capable, for these six changes are being rung continuously by a group of three bells 'in front' while the other bells 'behind' are 'dodging.' The division of the course is into 'sixes' (the groups of six changes) instead of 'leads,' and at the end of each 'six' one of the three bells 'in front' goes into the dodging places while one of the bells from 'behind' comes into the three-bell work 'in front.'

CHANGING NOTE, see Nota Cambita.

CHANOT, (1) François (*b.* Mirecourt, France, 1787; *d.* Brest,[1] 1823), a maker of musical instruments at Mirecourt, entered the navy as an engineer under the Empire, but quitted it after the Restoration. Returning to Mirecourt, he made special studies in the construction of the violin, and ultimately built one which deviated considerably in form from the accepted pattern. Believing that, in order to make every part of the instrument partake equally of the vibrations of the sound, the fibres of the wood should be preserved in their entire length, he considered the corners and curves of the outline as so many obstacles to the propagation of the waves of sound, and accordingly gave his violin a pear-shaped form, resembling that of the guitar. The table (belly) he made quite flat, and left out the sound-post altogether, on the

[1] According to Constant Pierre, at Rochefort.

ground that it merely served to break the waves of sound, while in reality it transmits them from table to back.

This violin (if one may still call it so) he submitted to the authorities of the Institut de France. After having been examined by a committee of eminent men, both scientific and musical, and tried against instruments of Guarnerius and Stradivarius, it was pronounced not inferior in quality to the violins of these great makers ('Rapport de l'Institut,' in the *Moniteur Universel*, Aug. 22, 1817). One of his violins, made for Viotti in 1818, and a violoncello, are kept at the Instrumental Museum of the Paris Conservatoire. It is difficult to account for this decision, which experience quickly proved to be a complete delusion, as all instruments made after the new pattern turned out of indifferent quality. P. D.

(2) Georges (*b.* Mirecourt, Mar. 26, 1801; *d.* Courcelles, Seine et Oise, Jan. 10, 1883), brother of François, came to Paris in 1819, and made violins of the 'Chanot' model, but was soon obliged to give up this model. He worked for the instrument-maker Clément for a year, and in 1821 for Gand, whom he left in 1823 to set up for himself. After several changes of address he settled in 1848 on the Quai Malaquais, where he remained until his retirement from business in 1872, leaving his business to his son-in-law, Marie-Joseph Chardon. Georges Chanot was an admirable maker of violins and a skilful repairer.

Madame Chanot, his wife (*née* Florentine Démoliens), was also a violin-maker, and is probably the only female one known to fame. She made several violins with her own hands, worked assiduously with her husband at his trade, and died some years before his retirement. E. J. P.

(3) Georges (*b.* 1831; *d.* 1895), son of the last named, learnt the trade from his father, and in 1851 left Paris for London, where he worked for several years with Maucotel, the brother of the Parisian instrument-maker. In 1858 he set up for himself, and was known for many years as one of the best workmen in London, gaining gold medals at various exhibitions, including the London Inventions Exhibition, 1885.

His eldest son, G. A. Chanot, of Manchester, is known as an excellent violin-maker.

His second son, F. W. Chanot, (*d.* Jan. 1911), also a violin-maker, is better known as a publisher of violin music. His business in Wardour Street is carried on by his third son Joseph, an artist-craftsman who fully sustains the reputation of the family, and specially excels in making and adjusting bridges and sound-posts.

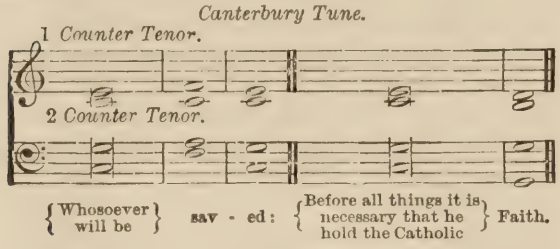
CHANSON, see Song, subsection France.

CHANT. To chant is, generally, to sing, and, in a more limited sense, to sing certain words according to the style required by musical laws or ecclesiastical rule and custom; and what is thus performed is styled a Chant and Chanting, *Cantus firmus*, or *Canto fermo*. The method of chanting that belongs to the Latin service-books is described under the heading Gregorian Tones. Practically, the word is now used for the short melodies sung to the psalms and canticles in the English Church. These are either 'single,' *i.e.* adapted to each single verse after the tradition of sixteen centuries, or 'double,' *i.e.* adapted to a couple of verses, or even, according to a recent still greater innovation, 'triple' and 'quadruple,' ranging over three and four verses respectively.

The qualifying terms *Gregorian*, *Anglican*, *Gallican*, *Parisian*, *Cologne*, etc., as applied to tone or chant, simply express the sources from which any particular chant has been derived.

It is historically incorrect to regard the structure of ancient tones and of modern chants as being antagonistic each to the other. The famous *Book of Common Praier noted*, of John Merbecke (1550), includes music of the Latin ritual, adapted, *mutatis mutandis*, to the new English translations of the Missal and Breviary. The ancient Gregorian chants for the psalms and canticles were in use not only immediately after the Reformation but far on into the 17th century; and although the Great Rebellion silenced the ancient liturgical service, with its traditional chant, yet in the fifth year after the Restoration (1664) the well-known work of the Rev. James Clifford, Minor Canon of St. Paul's, gives as the 'Common Tunes' for chanting the English Psalter, etc., correct versions of each of the eight Gregorian Tones for the Psalms, with one ending to each of the first seven, and both the usual endings to the eighth, together with a form of the Peregrine Tone similar to that given by Merbecke.[1] Clifford gives also three tones set to well-known harmonies, which have kept their footing as chants to the present day. The first two are arrangements of the 1st Gregorian Tone, 4th ending—the chant in Tallis's 'Cathedral Service' for the Venite—with the melody, however, not in the treble but (according to ancient custom) in the tenor. It is called by Clifford 'Mr. Adrian Batten's Tune'; the harmony is essentially the same as that of Tallis, but the treble takes his alto part, and the alto his tenor. The second, called 'Christ Church Tune' and

Christ Church Tune.



[1] See Table of chants in *Acc. Harmonies to Brief Directory*, by Rev. T. Helmore, App. II. No. cxi.

set for first and second altos, tenor and bass, is also the same ; except the third chord from the end.

Clifford's third specimen is quoted as 'Canterbury Tune,' and is that set to the Quicunque vult (Athanasian Creed) in Tallis's 'Cathedral Service' ; but, as before, with harmonies differently arranged.

Canterbury Tune.

It has all the characteristics of the 8th Gregorian Tone, with just such variations as might be expected to occur from the lapse of time, and decay of the study of the ancient forms and rules of Church music.

The fourth of Clifford's examples is also a very good instance of the identity, in all essential characteristics, of the modern Anglican chant and the ancient Gregorian psalm tones. It is an adaptation of the 8th Tone, 1st ending —the tone being in the tenor :

The Imperial Tune.

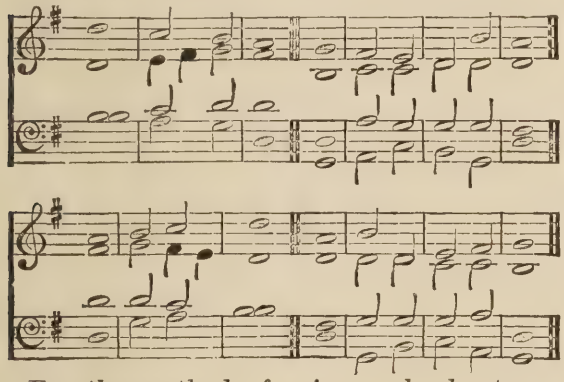
The work published in 1661 by Edward Lowe, entitled *Short Directions for the Performance of Cathedral Service* (2nd ed., 1664), also gives the whole of the tones, and nearly all their endings, according to the Roman Antiphonarium, and as Lowe had sung them before the Rebellion when a chorister at Salisbury. He also gives the harmonies quoted above as the 'Imperial' and 'Canterbury' tunes, and another harmony of the 8th Tone, short ending (Merbecke's 'Venite') with the plain-song in the bass.

The *Introduction to the Skill of Music*, by John Playford (born 1623), in its directions for the 'Order of Performing the Divine Service in Cathedrals and Collegiate Chapels' confirms the above statements. Playford gives seven specimens of psalm tones, one for each day of the week, with 'Canterbury' and the 'Imperial' tunes in 'four parts, proper for Choirs to sing the Psalms, Te Deum, Benedictus, or Jubilate, to the organ.'

The Rev. Canon Jebb, in the second volume of his *Choral Responses and Litanies of the United Church of England and Ireland*, gives from the three writers quoted and from Morley's *Introduction* (1597) a table of such old English chants as are evidently based upon or identical with the Gregorian psalm tones. He also gives some interesting specimens of the experiments made by English composers shortly after the Reformation, preliminary to the settling down of the new four-part chant into the rhythm which it permanently adopted, based upon the rhythm of some of the old tones (see CHANTING).

It is interesting to note also that in the earliest days of the Reformation on the Continent, books of music for the service of the Reformed Church were published, containing much that was founded directly upon the Gregorian plain-song ; and it was chiefly through the rage for turning everything into metre that the chant proper fell into disuse among Protestant communities on the Continent. See the *Neu Leipziger Gesangbuch* of Vopelius (Leipzig, 1682).

The special work for the guidance of the clergy of the Roman Church, and all members of canonical choirs, in the plain-song which they have specially to chant, is called the *Directorium Chori*. The present *Directorium* corresponds with the famous work prepared by Guidetti (1582), with the aid of his master Palestrina. But as is the case in most matters of widespread traditional usage, differences are found between the books of present and past liturgical music, not simply in different countries and centuries, but in different dioceses of the same country and the same century. The York, Hereford, Bangor and Lincoln 'uses' are named in our Prayer Book, as is also that of Salisbury, which obtained a foremost place of honour for the excellence of its church chant. Our own chants for the responses after the Creed, in the Matins and Vespers of English cathedrals, are almost the same to the present day as those found in the most ancient Sarum Antiphonary, and differ slightly from the Roman.



The psalm tone, or chant, in its original and complete form, consists of (1) An Intonation at the beginning, followed by a recitation on the dominant of its particular mode ; (2) A Mediation, *a tempo*, closing with the middle of each verse ; (3) Another recitation upon the dominant with a Termination completing the verse, as in the following — the 3rd Tone sixth ending (see PSALMODY) :

In the modern Anglican chants the Intonation has been discarded, and the chant consists of the Mediation and Termination only.

When the tune or phrase coincides with a single verse of the psalm or canticle it is styled a 'single chant,' as are all those hitherto cited. At the time of the Restoration, as already

stated, the Gregorian chants were still commonly used, till lighter tastes in music and the lessened numbers of men in cathedral choirs led to the composition of new treble chants and a rage for variety. Some of these, which bear such names as Farrant, Blow and Croft, are fine and appropriate compositions. But a different feeling gradually arose as to the essential character of church music; double chants and pretty melodies with modern major or minor harmonies, came to be substituted for the single strains, the solemn and manly recitation tones, and the grand harmonies of the 16th century. The Georgian period teemed with flighty chants, single and double: many of which can hardly be called either reverential or beautiful, though it must be confessed that many very charming melodies have been produced on the lines of the double chant by composers of eminence. The following by Dr. Crotch is remarkable for its grace and elegance, as well as for the severity of the contrapuntal rule to which the quondam Oxford professor subjected himself in its construction (*per recte et retro*). Each of the four parts in the former half of the chant has its notes repeated backwards in the corresponding bars of the second half.

For the method of using such chants see CHANTING.

Compare also GREGORIAN TONES; PSALMODY.

T. H.

CHANTERELLE, a French term for the highest or E string of the violin. G.

CHANTING. The term is by modern usage generally confined to that species of ecclesiastical singing in which prose verses of varying length are sung to a repeated melody. Chanting belongs especially to the Psalms and Canticles of the daily offices of the Church.

It has been shown above (see CHANT) that the form of the chants now in common use in the English Church was evolved first by the application of harmony to the Gregorian Tones, then by new compositions of a more or less similar pattern. This evolution in composition produced a difficulty in execution which has made good chanting the rarest accomplishment among modern choirs. It turned the chant from a formula of melody in which only pitch relationships were defined, into a composition complete in its own rhythm reinforced by harmonic progressions and held as nearly as possible to strict time by being written in notes of definite time value measured out with bar lines. The chant became in fact a short partsong written on the following rhythmic pattern:

which might better be expressed as—

That composers 'thought' this rhythm in the actual process of composition is proved by numerous examples, of which the following is typical:

BARNBY.

Obviously here the grace of both treble and tenor melodies is destroyed if the chant rhythm is broken. Yet elasticity has to be allowed somewhere in performance of such chants to accommodate the varying lengths of the prose verses, and the indefinite prolongation of reciting-notes with the right to subdivide the notes of the mediations and endings, without, however, destroying their relative time values, was held to provide sufficiently for this verbal necessity. Treated in that way the above chant sung to the first verse of the Venite becomes

The practical effect is to begin the chant in strict time with a strong accent, when all that part of each half-verse which cannot be squeezed into it has been disposed of in short notes, and this is the method of chanting which earned in the 19th century the derisive epithet of the 'Anglican thump.'

In the 18th century chanting was practically confined to cathedrals and collegiate churches, and it is at least possible that the prevailing tradition of slow *tempi*, together with the comparatively expert training of the singers, prevented the evil from being too obviously apparent. The revival of church life in the 19th century, which gave to nearly every

parish church the ambition to possess a 'fully choral' service performed by a surpliced choir, brought the method into prominence, and it was stereotyped by the publication of various 'pointed' psalters in which the words of the whole Book of Psalms were printed with accents, asterisks, syllables in heavy type and sometimes barlines, all tending to mark off the recitation from a strict time singing of the chant. Among the earlier of these books may be mentioned that of Robert Janes (1843), Hullah's 'Psalms with Chants' (1844), the Psalter of the S.P.C.K., edited by Turle (1865), the 'English Psalter' (1865), the 'Psalter Accented' (1872). But by far the most important publication, because it gained a wide acceptance comparable with that of 'Hymns Ancient and Modern,' was 'the Cathedral Psalter,' in which the Rev. S. Flood-Jones, Rev. Dr. Troutbeck, Turle, Stainer and Barnby collaborated (1875). Its 'notes and explanations respecting the pointing of the canticles and the psalms' directly recommend the method described above. Other Psalters, such as 'The Barless Psalter,' 'The Free Rhythm Psalter,' the 'St. Mary Abbott's Psalter,' in which S. Higham, the editor, used miniature notes placed over the syllables to indicate time values, were designed partly to improve the disposition of the syllables, partly to remedy the defects supposed to be the result of the system of 'pointing' which the Cathedral Psalter represented. All failed in practice because their well-intentioned editors all overlooked the basic fact that the 'Anglican thump' was not so much the product of a system of pointing as of a wrong view of the function of a chant. Composers had treated the chant as a musical composition to which words had to be fitted, instead of as a piece of music which must bend to fit every verbal rhythm of which the English language is capable, and editors of Psalters were powerless to counteract the composers' views. Individual choirmasters here and there could and did instruct their choirs in a more intelligent treatment of verbal rhythms in psalmody, but their efforts could not affect the general issue.

Concurrently with this general extension of psalm-singing in English churches came a movement in favour of the restoration of the GREGORIAN TONES (*q.v.*) in their unharmonised form. This was an ecclesiastical, rather than an artistic, movement, but it denoted at least a dim recognition of the evils inherent in the structure of the Anglican chant. About the year 1840 a sporadic study of plain-song was begun. Merbecke was re-edited by both Pickering and Rimbault. Dyce and Burns published an adaptation of the plain-song to the Prayer Book. Oakley and Redhead brought out the 'Laudes diurnae' at the chapel in Margaret Street, London, and the 'Oxford Psalter' was published in 1843. Helmore's 'Psalter Noted' (1850) was an attempt to take up Merbecke's work at the direction after the Venite, 'and so with the psalms as they are appointed,' and to furnish an exact guide for 'pointing.' But the movement had to wait for fuller scholarship to accomplish any important result, and to this day the results have not furnished a complete answer to those authorities who maintain that the tones devised for the Latin language are ill-adapted to the genius of the English one.

The arguments against the use of the Gregorian tones for chanting the English Psalms are developed at some length by Dr. Robert Bridges, the Poet Laureate, in his article on chanting in *The Prayer-book Dictionary* (1912). It is he who has led the most important movement for the reformation of the method of Anglican chanting, developing the principle that the chant must be fitted to the words, not the words to the chant. In his various writings [1] he has analysed in detail the verbal rhythms of the English Psalms and examined closely with reference to its history the structure of the Anglican chant. His arguments deserve the closest study. His principal conclusions may be summarised here:

(1) That the chants themselves comprise a body of national music worthy to be preserved in the services of the national church, though they require careful selecting and the rejection of those specimens which are complicated by passing notes.[2]

(2) That the rhythmic form of the chant must be treated merely as a norm to be varied in detail to accommodate the verbal rhythm of each half-verse; that is to say, no time values as indicated in the notation of semibreves, minims, etc., are to be considered as indicating a strict time.

(3) That 'the words in recitation should be sung at the same pace as the words in melody; the melody should have a *slight* tendency to be the quicker, as if the sense had escaped from bonds into freedom rather than the reverse.' [3]

(4) That a series of devices can be arrived at 'which will make the chant-rhythm give way to the words without destroying the rhythmical unity or the harmonic structure,' [4] and that these devices can be expressed approximately in musical notation, using syncopations, triplets and 'lesser minims.'

This last, worked out in detail by the man universally acknowledged to be most sensitive to the implications of verbal rhythm in the English language, has produced a complete theory of chanting which already the

[1] *The Prayer-book Dictionary*: 2 articles, 'Chant' and 'Chanting'; *Mus. Antiquary*, ii. 125 (Ap. 1911), 'English Chanting.' *Ibid.* iii. 74 (Jan. 1912), 'Anglican Chanting.'

[2] Bridges even goes so far as to suggest the excision of passing notes from existing chants. See *Prayer-book Dict.*, 'Chanting,' para. 15, 'Type of Chant needed.'

[3] *Ibid.* para. 6, 'Manner of Singing.'

[4] *Ibid.* para. 7, 'Chant treated as a Chant.'

more enlightened among church musicians have begun to apply practically. *The Psalter Newly Pointed* (S.P.C.K. 1925) was designed to embody his principles, but until it has received an extensive trial it is obviously too early to estimate the general practicability of the theory. C.

CHANTY, see SHANTY.

CHAPEAU CHINOIS, see CHINESE PAVILION.

CHAPELLE (Fr.), originally the musicians of a chapel, and now extended to mean the choir or the orchestra, or both, of a church or chapel or other musical establishment, sacred or secular. The *maître de chapelle* is the director of the music. In German the word *Kapelle* or *Capelle* is used more exclusively for the private orchestra of a prince or other great personage, and the *Kapellmeister* is the conductor or director. *Maestro di cappella* and *maestro de capilla* are the corresponding terms in Italian and Spanish respectively, though in the Latin countries the ecclesiastical significance has been more generally preserved. Chapel-master is not customary as an English equivalent (cf. PRECENTOR). *Cappella pontificale* is the term for the whole body of singers in the Pope's service, the *cantatori cappellani*, the *cantatori apostolici* and the *cantatori pontificali*. The derivation of the term 'chapel' is explained below. (See CHAPEL ROYAL.) G.

CHAPEL ROYAL. The term chapel is derived from the *cappella*, or cloak, of St. Martin, which was treasured as a relic by the Frankish kings and carried before them into battle. It was also used to give sanctity to oaths. The keepers of the cloak were termed *cappellani* (hence chaplains), and in course of time the sanctuary in which it was kept was called the *cappella*. Subsequently the use of the term was extended to any private sanctuary or holy place.

But apart from its more ordinary use as referring to a building, the word chapel was used to denote the entire apparatus, including the *personnel*, the vestments, the plate and the service-books (musical and otherwise), which constituted the religious establishment attached to the household of a sovereign or of any great nobleman or bishop. The New English Dictionary cites examples of such use in mediæval times: thus in 1420 *Siege Rouen*, 1295 in *Archæol.* xxii. 381, 'His Chapelle mette hym at the dore there and wente before hym alle in fere.' Pace in J. S. Brewer's *Reign of Henry VIII.* xi. (1884), I. 270, 'Surely he would have out of your chapel not children only but also men. Your Grace's chapel is better than his.'

So the Chapel Royal was the term that signified the religious establishment of a sovereign, and such establishments were maintained with considerable dignity and elaboration at the courts of the kings of France and of England. Wherever the king travelled in state he took his Chapel Royal with him, together with the other officers and members of his household, and it was the duty of the Chapel to perform the daily services wherever the king was in residence, whether he attended in person or not. As a matter of course, the entire Chapel attended Henry VIII. at the Field of Cloth of Gold. When the sovereign was in residence at one of his own palaces the services were naturally performed in the private chapel attached to the palace, whether in Tudor times at Greenwich or Whitehall, or later at St. James's Palace, or in early days at Eltham or elsewhere; and the chapels in those palaces came to be styled Chapels Royal, this term being applicable to any chapel belonging personally to the sovereign and used for his own purposes in worship. Nevertheless it is an error to speak of officers such as the dean or subdean or organist 'of the Chapels Royal,' seeing that the establishment is a single one and independent of special buildings. Mention must here be made of St. George's Chapel in Windsor Castle. In one sense it is a Chapel Royal, and was indeed sometimes styled 'Libera Capella Regia (not Regis) infra castellum de Wyndesore'; but in the days of Edward VI. and Elizabeth, as well as more recently, it is technically described as 'The King's Free Chapel of St. George in Windsor Castle.' It is a 'Royal Peculiar,' as also is Westminster Abbey; in other words, it is exempt from all episcopal or archiepiscopal jurisdiction. But St. George's Chapel, although situated in the Royal Castle of Windsor, was an independent foundation and was never served by the Chapel Royal; it was reconstituted by Edward III. when he founded the Order of the Garter as the special chapel of that Order.

The Chapel Royal of England has a very interesting and ancient history, and throughout its history it has been very closely associated with the musical activities of this country. As early as 1135 there is mention of such an establishment; but the earliest record of the choristers or the 'Children of the Chapel,' as they have always been termed, dates from the reign of Henry V. At various times authority was given by the sovereign for 'taking up,' or in other words compelling, boys with good voices in other choirs to join the Chapel Royal. In the later days of Queen Elizabeth the children of the Chapel Royal, in addition to their ecclesiastical work, played a very important part in the development of the music-drama; a subject which is dealt with in a highly important paper by G. E. P. Arkwright read to the Musical Association in 1914. At the period of the Restoration the musical ability of the children was astonishingly high, and their performances are

frequently commented upon by Samuel Pepys in his *Diary*. Among Captain Cooke's boys at that period were John Blow, Pelham Humfrey, Henry Purcell, Michael Wise, William Turner, Thomas Tudway, and they were shortly followed by Croft and Jeremiah Clark under the mastership of Blow. These boys in later years became 'Gentlemen of the Chapel,' a title by which the adult members of the choir were and are described.

Membership of this body was a coveted distinction, and the names of most of the leading musicians throughout the history of English music are included among the 'gentlemen.' Fortunately a very complete record of membership, with precise dates of appointment, resignation or death, is preserved in the famous *Cheque-book* of the Chapel which has recently been handed over by the Lord Chamberlain to the custody of the Keeper of the Rolls, and it can be seen in the Record Office. The first recorded Master of the Children was John Plummer in 1444. He was succeeded by Henry Abyngdon whose fame as a singer and organist was recorded in a Latin epitaph by Sir Thomas More. In 1509 William Cornyshe (*q.v.*), famous both as a musician and dramatist, succeeded William Newark as Master. In 1561 Richard Edwards, best known by his madrigal 'In going to my naked bed,' but a poet of some distinction as well as a musician, became Master of the Children, and he in turn was followed by William Hunnis. At this period the number of the children was twelve.

Among the great Tudor composers the following were Gentlemen of the Chapel: Fairfax, Cornyshe, Tallis, Byrd, Robert Parsons, Morley, William Mundy, Orlando Gibbons and Thomas Tomkins.

Tomkins held office in the Chapel during many years while he was organist of Worcester Cathedral, a fact that illustrates the non-residentiary character that sometimes qualified membership. It was in connexion with his Chapel Royal duties that Gibbons met with his death; the circumstances are fully described under Gibbons (*q.v.*), but it should be noted that the Chapter minute granting leave of absence from Windsor to Nathaniel Giles on that same occasion records that he had been summoned 'cum tota capella regia' to attend on the King at Canterbury, and the term as used there certainly means the whole establishment with its chattels.[1]

Of the buildings that have been known as Chapels Royal little need be said here. That in St. James's Palace is, practically speaking, the only actual Chapel Royal now served by the establishment. In that building, which dates from the reign of Henry VIII., a full choral service is still performed twice on Sundays by the 'Gentlemen and Children of the Chapel.' The school for the 'children' has recently ceased to exist, but the children still retain their brilliant uniform, dating from Tudor times and somewhat similar in style to that worn by the Yeomen of the Guard. The Chapel Royal in Whitehall ceased to be maintained as a chapel towards the close of the nineteenth century. The Whitehall Chapel of Tudor days was the old chapel of the Palace and perished when the Palace was destroyed. In later times Inigo Jones's Banqueting Hall was for a long period used as the Chapel Royal. The Savoy Chapel was constituted a Chapel Royal in 1773 by a special patent issued by George III., but the musical services at the Savoy were never of much importance.

George IV. had a Chapel Royal at Brighton. The chapel built by Queen Victoria in Windsor Great Park and commonly described as a royal chapel is not in a technical sense a 'Chapel Royal'; it was built for the convenience of residents in the more remote parts of the Park, and not expressly for the personal use of the sovereign. E. H. F.

CHAPÍ, Ruperto (*b.* Villena, near Alicante, Mar. 27, 1851; *d.* Madrid, Mar. 25, 1909), a prolific composer for the Spanish theatre. He was the son of the village barber, who was also a musician; and he had composed a *Zarzuela* before he was 17. He studied for a time at the Madrid Conservatoire, and in 1872 received the appointment of Músico mayor to the Spanish Artillery. In 1873 the Academy of St. Ferdinand sent him to Rome, from which he industriously sent home a number of operas and a symphonic poem. Poverty afterwards drove him to comic opera, in which his singular aptitude for musical caricature was of great service. He managed, however, to undertake more serious works, among which his last opera, 'Margarita la Tornera,' and the earlier 'Curros Vargas' are the most valuable. He also composed 4 string quartets. His best pupil is D. Manuel Manrique de Lara. J. B. T.

CHAPPELL & CO. This firm of music publishers, concert agents, and more recently piano manufacturers started business in Jan. 1812 at 124 New Bond Street, previously tenanted by Goulding, D'Almaine & Co. The firm consisted of (1) Samuel Chappell (*d.* Dec. 1834), who had already published several works, with John Baptist Cramer and Francis Tatton Latour. At the expiration of seven years, J. B. Cramer retired, Chappell & Co. having previously removed to a nearly opposite house, 50 New Bond Street. The first partnership is noticeable for the establishment of the Philharmonic Society, all the business arrangements for which were made at No. 124. At the end of the second term of partnership (1826), Latour withdrew, and

[1] In the reign of Charles I. a Roman Catholic establishment was set up for the private use of his Queen, Henrietta Maria, and this precedent was followed in the case of Catharine of Braganza.

carried on a separate business until 1830, when he sold it to his former partner. In 1829 Samuel Chappell was in partnership with G. Longman and Bates, who had been musical instrument-makers at 6 Ludgate Hill in 1824. After Samuel Chappell's death in 1834, the business was carried on for the widow by her sons, (2) WILLIAM (*b.* London, Nov. 20, 1809; *d.* there, Aug. 20, 1888), the eldest, being 25 years old. Desiring to propagate a knowledge of the music of the Madrigalian era, William (in 1840) projected the Musical Antiquarian Society, which held its meetings and rehearsals at No. 50. He edited Dowland's songs for the Society, and also edited and published (1838–40) a 'Collection of National English Airs,' giving their pedigrees and the anecdotes connected with them, with an essay on minstrelsy in England. This was afterwards expanded into his *Popular Music of the Olden Time* (2 vols., 1855–59). This standard book was afterwards recast, and published in 2 vols. under the editorship of Professor H. E. WOOLDRIDGE (*q.v.*) in 1893. W. Chappell projected a general history of music, and the first volume was published in 1874 .

The business was greatly extended by (3) THOMAS PATEY CHAPPELL (*d.* London, June 1, 1902), under a family arrangement by which his elder brother left, and bought the half of the business carried on under the name of Cramer & Co., with the late T. F. Beale as his partner. It was under Thomas Chappell's management that the great extension of the buildings took place, and he was the projector of the Monday Popular Concerts, and the Saturday Popular Concerts which sprang out of them, both of which have owed their success in great measure to the management of (4) S. ARTHUR CHAPPELL (*d.* Dec. 21, 1904), a younger brother. (See POPULAR CONCERTS.) St. James's Hall was projected and carried out mainly by the Chappells. (See SAINT JAMES'S HALL.)

The piano factory of Chappell & Co. is in Chalk Farm Road. Under the guidance of the late E. Glandt, who was their piano constructor, their instruments have largely gained in favour and commensurate sale. They have successfully entered the lists of concert grand manufacturers. The firm became a limited company in Dec. 1896. Thomas Chappell was succeeded by his son, T. Stanley Chappell, as the chairman of the company of which William Boosey is the managing director. The firm is the lessee of QUEEN'S HALL (*q.v.*) and proprietor of the NEW QUEEN'S HALL ORCHESTRA (*q.v.*).

W. C.; addns. F. K. and A. J. H.

CHAPPINGTON, JOHN (*b.* South Molton, Devon; *d.* Winchester, June 27–July 4, 1606), built an organ in 1597 for Magdalen College, Oxford. He was buried at Wells Cathedral (Wills, Somerset House; 62 Stafford).

CHAPPLE, SAMUEL (*b.* Crediton, 1775; *d.* Ashburton, Oct. 3, 1833), a blind musician, taught the pianoforte by a master named Eames, who had been a pupil of Thomas, a scholar of John Stanley—all blind men. In 1795 he was appointed organist of Ashburton, where he continued for nearly 40 years. He composed and published many anthems, songs, glees and pianoforte sonatas. W. H. H.

CHARAMELINHA, see ESCOBAR, André de.

CHARD, GEORGE WILLIAM, Mus.D. (*b.* Winchester, 1765; *d.* May 23, 1849), became lay-clerk and assistant organist of Winchester Cathedral (1787), and in 1802 was appointed organist. His appointment to Winchester College seems not to have taken place till 1832. He was also organist of St. Maurice with St. Mary Kalender Church, Winchester. He was famous as a trainer of boys' voices (West's *Cath. Org.*). He published some church music and 'Twelve Gle›s, for three, four and five voices.' He was buried in the cloisters of Winchester College Chapel. W. H. H.

CHARDE (CHARD), JOHN, a 15-16th century English musician. After 16 years of study at Oxford University, and having written a Mass and Antiphon in 5 parts, he applied in 1518 for the degree of Mus.B. This was granted on condition that he should give his Mass and Antiphon into the hands of the proctors, and write another 5-part Mass on the 'Kyrie rex splendens.' Anthony à Wood, in his *History of Oxford University*, adds that, although compositions in 4, 5 and 6 parts had become frequent since Henry VIII.'s accession, Charde was the first on the University registers who composed in so many parts.

CHARITY CHILDREN, MEETING AT ST. PAUL'S. A festival service attended by the children of the old charity schools of the metropolis, was held annually in June under the dome of St. Paul's Cathedral, the children taking a prominent part in the singing. The first of these festivals was held in 1704, on the Thursday in Whitsun-week, at St. Andrew's Holborn; the second in 1705 at St. Sepulchre's, where the service took place until 1738, when it was held at Christ Church, Newgate St., and was continued there until 1801. In that year the children met at the cathedral, where the services were subsequently held, except in 1860 when the cathedral was under repair and the schools assembled on the Handel orchestra at the Crystal Palace. On Apr. 23, 1789, the children met at St. Paul's, when King George III. went in state to return thanks for his restoration to health; and, earlier still, on July 7, 1713, at the thanksgiving for the Peace of Utrecht they were assembled in the streets. The effect of the music has been recorded by many eminent musicians, including Haydn, in whose memorandum book in the Conservatoire

at Vienna there is a note on the service, quoting Jones's double chant (see JONES, John; also Pohl's *Haydn in London*, p. 212), and Berlioz, who was present in 1851 ('Soirées de l'orchestre,' No. 21). The number of the children varied, but was generally between 5000 and 6000; they were arranged in an amphitheatre constructed for the occasion under the dome. Among the conductors have been Bates, H. Buckland and Shoubridge. The last festival service was held in June 1877. C. M.

CHARKE, RICHARD (18th century), an English violinist and composer.

He succeeded Richard Jones as first violin at Drury Lane before, or about, 1740. He married Charlotte, the youngest daughter of Colley Cibber, whom he ill-treated, the full account of which treatment is set forth in a book published by her in 1755. He emigrated to Jamaica, where he died in the prime of life. Hawkins credits him with being the first to compose 'Medley Overtures,' *i.e.* compiled from passages taken from other works, principally popular airs. 'Charke's Hornpipe' is one of the few compositions which survived him. Burney mentioned that Charke was a dancing-master, and an actor, a man of humour, and an excellent performer on the violin.

F. K.

CHARPENTIER, (1) GUSTAVE (*b.* Dieuze, Meurthe, June 25, 1860), a composer of a single masterpiece, 'Louise,' an opera, the success of which depended as much on the human appeal of the libretto, which showed both dramatic and literary instinct, as on the appropriateness and originality of the music.

Charpentier was at school at Tourcoing, where his parents took up their residence after the Franco-German War. At the age of 15 he was put into business for two years, but was admitted into the Lille Conservatoire, and having carried off many prizes then entered the Paris Conservatoire in 1881. A pupil of Massart for violin, he was afterwards in Pessard's class for harmony, competing twice for prizes without success. In 1885 he entered Massenet's composition class, and in 1887 won the grand prix de Rome with his 'scène lyrique,' 'Didon,' first performed at one of the séances of the Institut, and afterwards at a Colonne Concert and at Brussels. Among the works composed at Rome were the orchestral suite 'Impressions d'Italie,' which rapidly became famous, and was heard at the leading centres of symphonic music; and 'La Vie du poète,' a 'symphonie-drama' in four movements for orchestra, soli and chorus, set to words of his own. Other works of his include two sets of 'Poèmes chantés,' one for voice and pianoforte, the other for voice and orchestra; settings for voice and pianoforte of 5 of Baudelaire's 'Fleurs du mal' and for voice and orchestra of three 'Impressions fausses' of Verlaine, given at a Colonne concert in Paris (1895), a 'Sérénade à Watteau' for voice and orchestra, performed in the Luxembourg gardens, Nov. 9, 1896, a 'Fête du couronnement de la Muse,' performed at Lille and in Paris (1898) and eventually incorporated in 'Louise,' a second orchestral suite (1894) of which the MS. was burnt in a fire, and the two operas 'Louise' and 'Julien.'

Charpentier's most important work is the 'roman musical' of 'Louise,' in 4 acts, produced at the Opéra-Comique in Paris, Feb. 2, 1900, and since then on all the most important continental stages; the independence and novelty of this work has made it one of the most noteworthy of modern French operas. It was given at Covent Garden, June 18, 1909. The poetic instinct, the exact observation of character, the art of contrast, and the balance of proportion, are marked features of the libretto, which is by Charpentier himself; the orchestral writing and the treatment of the voices are alike skilful in the highest degree, and show consummate musical taste throughout, though the orchestral colouring is apt to sound monotonous after several hearings of the opera. In 'Julien,' its successor, which was produced at the Opéra-Comique, Jan. 3, 1913, the composer used up the larger portion of his early work 'La Vie du poète,' enlarging it into an opera in 4 acts and a prologue. This proved as great a failure, in spite of its short-lived *succès d'estime*, as 'Louise' had been a success. The libretto, once more the composer's own, was vaguely symbolic of a romantic type of socialism and lacked the humanity that gave life to 'Louise,' the orchestration was often crude and monotonous, and much of the thematic material was merely repeated from 'Louise' as well as 'La Vie du poète.' By far the most interesting sections of the opera were those in which these two works were drawn upon; and this dependence for inspiration on previous compositions, combined with the lapse of 13 years between the two operas, led critics to draw an obvious inference which has received confirmation in the fact that, with the exception of the recasting in ballet form of the early suite 'Impressions d'Italie' in 1913 (the year after he was elected to be Massenet's successor in the Académie des Beaux Arts), no music of any importance has since come from his pen, though an operatic Triptyque ('L'Amour au faubourg, commédiante tragédiante') and other works have for long been announced as 'in preparation.' It remains to mention that Charpentier is a Chevalier of the Légion d'Honneur, that he has published critical articles on Bizet and Bruneau, and that he founded in 1902 'L'Œuvre de Mimi Pingon,' an attempt to provide Parisian

workgirls with a popular theatre in which they should act as well as be spectators.

G. F. and L. W. H.

BIBL.—ANDRÉ HIMONET, *Louise, de Gustave Charpentier. Étude historique et critique, analyse musicale.* (Paris, 1922.)

His brother (2) VICTOR (*b.* Dieuze, Meurthe, July 23, 1867) obtained a 2nd prize for violoncello-playing at the Conservatoire, 1888. He is now a conductor. M. L. P.

CHARPENTIER, (1) JEAN JACQUES BEAUVARLET (*b.* Abbeville, June 28, 1734; *d.* Paris, May 6, 1794), was organist of St. Paul, Lyons, then (in 1772) at the abbey of St. Victor and the church of St. Paul, Paris, where he succeeded Daquin. One of the four organists at Notre-Dame (1783), he was considered with his colleague of St. Sulpice, Nicolas Séjan, one of the cleverest of virtuosi on the organ. He composed 'Douze Noëls variés pour l'orgue'; music for harpsichord, 2 concertos; and collections of sonatas, etc.

(2) JACQUES MARIE BEAUVARLET (*b.* Lyons, July 3, 1766; *d.* Paris, Sept. 7, 1834), son of the preceding, was organist at St. Germain des Près (1815–33) and at St. Eustache, Paris (1831–1834). He published a 'Journal d'orgue'; hymns and a Magnificat for organ; and masses; also pieces and arrangements for pianoforte. M. L. P.

CHARPENTIER, MARC-ANTOINE (*b.* Paris, after 1634; *d.* Feb. 24, 1704), went to Italy while still young, and studied music under Carissimi in Rome for some years. On his return to France he entered the household of Mademoiselle de Guise as composer, and co-operated at the same time with Molière in the performances of the Théâtre-Français; this employment lasted after the poet's death. It was only after 1679 that Charpentier was charged (officially or otherwise) with the composition of the music performed at the Dauphin's private Mass. In 1683 he competed for one of the four posts of sous-maître de chapelle, Lalande obtaining one of them; but illness forced him to withdraw his candidature. About 1684 he was appointed maître de musique to the Jesuits of the Maison-professe in Paris, composing spiritual 'tragédies' which were given at the Collège de Clermont. Engaged by the Duke of Orleans, the future Regent of France, as his master of composition, Charpentier wrote for him a little treatise, *Règles de composition et l'abregé des règles pour l'accompagnement.* He entered the Sainte-Chapelle, Paris, on June 28, 1698, as maître de musique, replacing François Chaperon.

Although working in Paris at a time when all operatic composers were more or less overshadowed by Lully's influence and capacity, Charpentier's musical ability was generally recognised, and he was considered a more learned and cultivated musician than Lully. His opera 'Médée' has genuine touches of dramatic feeling, and makes an effort to break new ground. He obviously found it difficult to follow a definite dramatic development; irrelevant matter is frequently introduced in 'Médée'; the opening prologue, quite unconnected with the Greek tragedy following, consists of dances, songs in praise of Louis XIV., etc., while later on an Italian love-song is suddenly dropped into the middle of the dramatic action. The structure is much the same as in the operas of Lully, but the music, on the whole, of finer quality, the declamatory passages being better modelled and more melodious without losing their oratorial effect. That he was a great admirer of Italian composers, especially of Carissimi, explains the good style and melodiousness of his vocal writing. In the treatment of the instruments there is a great deal more careful work, both in accompaniments and independent movements, than in Lully's operas (Parry, *Oxf. Hist. Mus.* vol. iii.).

'Médée,' tragédie lyrique, in five acts and a prologue, the words by Thomas Corneille, was performed in Paris, Dec. 4, 1693, by the members of the Académie Royale de Musique; but although it had 'un grand succès,'[1] was never repeated. The principal parts were taken by Mademoiselle le Rochois (Médée), Mademoiselle Moreau (Créuse), M. Dun (Créon), and M. Du Mesny (Jason).

A folio edition was published, 'Médée tragédie mise en musique par Monsieur Charpentier. A Paris, par Christophe Ballard, 1694' (in the B.M., National and Conservatoire Libraries, Paris), and another edition in 1704 (in the Berlin State Library). Charpentier is said to have composed seventeen operas. A large number of his MS. compositions are in the Conservatoire, National and St. Geneviève Libraries of Paris, and at Versailles and Avignon. The only printed works of his were: 'Airs de la comédie de Circé' (Christophe Ballard, 1676), 'Médée' (1694), 'Motets mêlez de symphonie' (Paris, Jacques Édouard, 1709). At different dates appeared 'Airs sérieux et à boire,' for voice or voices, with or without continuo in the volumes of the *Mercure Galant*, *Nouveau Mercure Galant*, and in the collections of airs printed by Ballard.

As composer of sacred music Charpentier holds, together with Lalande, a prominent position in France at the end of the 17th century. His numerous compositions in that style are 8 or 10 masses, more than 30 psalms, motets for most of the feasts in the year, several settings of Te Deum, Magnificat, etc. He wrote also three-part pieces to be sung in women's convents, elaborate Psalms with solos, chorus and instrumental parts for the Dauphin's chapel. His cantatas and his

[1] According to Brossard it was considered as the most learned and choice dramatic work printed since Lully's death. Its failure to hold the stage is attributed to the poverty of the poem. M. L. P.

admirable oratorios are the most original and striking feature of his output. A disciple of Carissimi, he was the only French musician who composed Sacred Histories (Histoires sacrées) after the Old and New Testaments. In them his dramatic talent, his depth of expression and feeling were entirely at ease.

LIST OF WORKS

(See catalogues in (1) *La Tribune de St. Gervais*, Jan. 1900, MICHEL BRENET, *Marc-Antoine Charpentier*: (2) J. ÉCORCHEVILLE, *Catalogue du fonds de musique ancienne de la Bibliothèque Nationale*. Paris, 1910.)

CHURCH AND OTHER VOCAL WORKS

Meslanges (MSS.) autographs, 28 volumes and a few additional portfolios (Paris, National Library) containing:

1. Masses (8 or 10) for 2, 4, 5, 6 and 8 voices, Requiem Mass for 4 voices, a Mass for 4 choirs, etc.
2. Psalms (more than 30) for 3, 4, 5 and 6 voices, Canticles, Lamentations of Jeremiah for 1, 2 and 4 voices, etc.
3. Motets, Hymns, Proses, Anthems, Elevations for voices and orchestra or voices and continuo. (Some Motets printed in 'Motets mêlez de symphonie' (1709).
4. Leçons de Ténèbres, Litanies de la Vierge.
5. 'Histoires sacrées,' Oratorios, Cantatas:—Caecilia virgo et martir, Caedes sanctorum Innocentium, Historia Esther, Judicium Salomonis, Filius prodigus, Dialogus inter Christum et peccatores, Sacrificium Abrami, Mors Saulis et Jonathae, Le Reniement de St. Pierre (French title but Latin words), etc.
6. Plain Chant.
7. Tragédies spirituelles: 'Clissonus' (1685); 'Celse martyr' (1687); 'David et Jonathas,' 'Saul' (1688); also 'Ballets des saisons' (1688); 'Orphée (1690), etc.; performances at the Jesuit College (Collège de Clermont).
8. At different dates: 'Airs sérieux et à boire' in the collections of the *Mercure Galant* and *Nouveau Mercure Galant* (1678); 'Quoy rien ne vous peut arrester,' 'En vain rivaux assidus,' etc., also in 'Airs à boire sur des sujets plaisants à 2, 3 et 4 parties,' 'Recueil d'airs sérieux et à boire de différents autheurs pour l'année 1695' (both printed by Ballard), including 'Celle qui fait tout mon tourment.'
9. Vocal Chamber Music, Instrumental Music: 'Caprice' (3 violins), March, Minuets, Preludes, Concert for 4 viols, Overtures, 'Noëls' for instruments, etc.

DRAMATIC WORKS

1. Molière's play 'Le Mariage forcé,' comédie-ballet en 3 actes, set to music by Lully, was revived (with 'La Comtesse d'Escarbagnas') at the Palais Royal, July 8, 1672, with music by Charpentier.
2. La musique du 'Malade imaginaire,' comédie-ballet en 3 actes de Molière, produced at the Palais Royal, Feb. 10, 1673.
3. 'Circé,' tragédie, précédée d'un prologue par M. Corneille de l'Isle; the music to the 'Intermèdes' by Charpentier. First performed at the Théâtre de Guénégaud, Mar. 17, 1675. More than thirty performances were given. In 'Nouvelles parodies bacchiques,' vol. iii. Paris, 1702, p. 101, are the following airs from 'Circé.' Prologue: premier menuet, l'air 'Tout rit dans ce bocage,' l'air 'Les plaisirs suivent les peines,' 1er acte: l'air 'Je fais ma félicité,' 4ème acte: première loure, seconde loure, prélude des vents, menuet des Néréides.
4. 'L'Inconnu,' comédie en 5 actes de M. Corneille de l'Isle et de M. Visé; mêlées d'ornemens de musique par Charpentier. First performed at the Théâtre de la rue Guénégaud, Nov. 17, 1675. (In 'La Clef des chansonniers,' 1717, ii. 226, is 'L'air de la sarabande de l'Inconnu.')
5. 'Les Amours d'Acis et Galatée,' opéra, représentée chez M. de Rians, procureur du roi au Châtelet, in Jan. 1678.
6. 'Les Fous divertissans,' comédie en 3 actes, avec trois divertissements par M. Raymond Poisson. First performed at the Théâtre de Guénégaud, Nov. 14, 1680.
7. Les airs de danse et les divertissements de la 'Pierre philosophale,' comédie en 5 actes, de M. Corneille de l'Isle et de M. Visé. Given at the Théâtre de Guénégaud on Feb. 23 and 25, 1681.
8. 'Endimion,' tragédie. First performance on July 22, 1681.
9. 'Psyche,' set to music by Lully, revived with music by Charpentier, 1684.
10. 'Les Amours de Vénus et d'Adonis,' tragédie de Visé, was revived Sept. 3, 1685, with the addition of 'divertissements et danses,' composed by Charpentier; six performances were given.
11. Médée, 1693.
12. 'La Sérénade,' comédie en 1 acte de M. Regnard. Performed on July 8, 1694.
13. 'Philomèle' un opéra, was performed three times at the Palais Royal. It was said that the Duc d'Orléans, who had some share in the composition of the opera, would not allow it to be published.
14. Pastorales: Le Sort d'Andromède (*c.* 1670); Les Arts florissans (*c.* 1673); Le Retour du printems, idylle sur la convalescence du roi (*c.* 1680); La Noce de village (1682); Le Jugement de Pan (*c.* 1690); La Fête de Ruel (*c.* 1690); Actéon (*c.* 1690); Les Plaisirs de Versailles (*c.* 1695); La Couronne de fleurs; Flore (un 'air de Flore' is given in 'La Clef des chansonniers,' 1717, vol. i. p. 188); Dialogue de Vénus et Médor.
15. Prologues: pour les tragédies 'Polyeucte,' 1680, and 'Andromede,' 1682.

CHARTON-DEMEUR, see DEMEUR, Anne Arsène.

CHATTERTON, JOHN BALSIR (*b.* Portsmouth, 1805; *d.* London, Apr. 9, 1871), an eminent harpist, studied under Bochsa and Labarre; first appeared at a concert of Aspull's in 1824, succeeded Bochsa as professor of the harp at the R.A.M., and in 1842 was appointed harpist to Queen Victoria. He wrote much for the harp, chiefly operatic selections.

M. C. C.

CHAUNTER, the highest pipe of the bagpipe, from which the 'chaunt' or melody is produced, as opposed to the drones, which each speak only to a single note. (See BAGPIPE.)

W. H. S.

CHAUSSON, ERNEST (*b.* Paris, Jan. 21, 1855; *d.* Limay, June 10, 1899), was an interesting composer of the school of César Franck.

For a short time (1880) he was in Massenet's composition class at the Conservatoire. He studied with Franck, 1880–83. From the latter he received the traditions of his solid structural style, of his rare simplicity of accentuation, of his refined methods of expression. These qualities were enhanced by his own delicate and sensitive nature, prone to melancholy. That, as it were, envelopes his music with a veil of sadness. Of all Franck's pupils he was certainly the most spontaneously emotional. It was especially in instrumental works and chamber music that his talent was manifested, though everything he wrote reveals an individuality becoming ever stronger.

A lyrical scene, 'Jeanne d'Arc,' 'Hélène,' a 2-act lyric drama, 'Les Caprices de Marianne' (not published), 'Le Roi Arthus' in 3 acts to a libretto of his own (produced Théâtre de la Monnaie, Brussels, Nov. 30, 1903), represent his work for the stage. To this must be added incidental music for Shakespeare's *Tempest* (produced 1888), and 'La Légende de Ste. Cécile,' a lyric drama in 3 acts (produced Jan. 25, 1892). His purely orchestral compositions include symphonic poems 'Viviane' (1882), 'Solitude dans les bois' (1886; destroyed), 'Soir de fête' (1898; not published); a symphony in B flat (about 1890); a 'Poème' for violin and orchestra (1896); several vocal works with orchestra: 'Poème de l'amour et de la mer' (1882–92), 'Chanson perpétuelle' (1898), 'Hymne védique,' 'Chant nuptial,' 'Chant funèbre,' etc. (choruses). His chamber music

includes a trio in G minor, a so-called 'concert' for piano, violin and string-quartet (1890–91), a quartet in A for piano and strings, a string quartet (unfinished), a 'pièce' for v'cello or viola (published 1917). Chausson also wrote some piano music: 'Quelques Danses' (1896), 'Paysage' (1895), etc.; motets and organ solos.

Amongst these the chamber music is the part of Chausson's output which contributes the most to keep his name before the concert-going public, for the violin sonata is frequently played and the 'concert' and piano quartet occasionally. The 'poème' also keeps its place in the repertory of violinists of the first rank.

The songs with piano accompaniment (opp. 2, 8, 13, 14, 17, 24, 27, 33, 34 and 36) are characteristic of his poetic and penetrating nature. They contain exquisite things. Though not so amply constructed as Duparc's they follow that master's tradition.

For some ten years Chausson acted as secretary to the Société Nationale de Musique, of which he was one of the most ardent promoters. He died from a bicycle accident at Limay, Seine-et-Oise. G. F.; addns. M. L. P.

CHAUVET, Charles Alexis (*b.* Marines, Seine-et-Oise, June 7, 1837; *d.* Argentan, Orne, Jan. 28, 1871), a distinguished French organist. A pupil of the Paris Conservatoire from 1850, in Benoist's organ class, and that of Ambroise Thomas for composition, he won the first organ prize in 1860; and in 1869, having filled various posts as organist, he was appointed to the new organ of the Trinité in Paris. He left many works for organ and for piano, which show much refinement of style and elegiac charm. G. F.

CHECK (Fr. *l'attrape, la chaise*; Ger. *Fänger*; Ital. *ribatto* or *paramartello*), an important member in the action of a grand pianoforte, consisting of an upright of thick wire, bearing an almost spade-shaped head of leather or some light wood covered with leather. It is fixed in the back part of the key behind the hammer, and its duty is to catch the hammer when it falls a certain distance away from the string, and hold it until it is released by the finger of the player allowing the key to rise. In upright pianofortes, which now are always made with check actions, the check is placed before the hammer, and a stud projecting from the butt of the hammer comes in contact with the check. (See Pianoforte.) A. J. H.

CHÉDEVILLE, two brothers, (1) Esprit-Philippe (l'aîné) (*d.* Paris, 1782), and (2) Nicolas (le jeune, le cadet), the greatest of French musette players. Esprit was also oboist in the Royal Chamber Music. They wrote a large number of compositions for musette, lists of which are given in *Fétis* and *Q.-L.* Nicolas wrote also 6 sonatas for flute, oboe or violin and bass, op. 7. A Tutor for the galoubet published by Decombe (Paris) bears the name of Chédeville. H. Expert has edited a selection from their works. E. v. d. S.

CHELARD, Hippolyte André Jean Baptiste (*b.* Paris, Feb. 1, 1789; *d.* Weimar, Feb. 12, 1861), opera composer, the son of a clarinet-player at the Opéra. He was destined for the musical profession from his childhood, and studied at the Conservatoire from 1803 under R. Kreutzer for the violin, and Gossec, Méhul and Cherubini for composition.

Having won the Grand Prix de Rome for composition in 1811 he went to Italy, and studied church music under Baini and Zingarelli in Rome, and dramatic music under Paisiello and Fioravanti at Naples. He produced his first work, a comic opera, 'La casa da vendere,' at Naples in 1815. He became a violinist at the Opéra (1818–29), and gave lessons, composing diligently at the same time. After infinite trouble his tragic opera of 'Macbeth' (libretto by Rouget de l'Isle) was produced at the Opéra (June 29, 1827), but it was soon removed from the boards, and Chelard left Paris for Munich, where the success of 'Macbeth' was so decided that the King of Bavaria made him his Kapellmeister. He returned to Paris in 1829, produced an unsuccessful opera 'La Table et le logement,' established a music business, and remained there till the Revolution of 1830 drove him back to Munich to become widely known as a composer and leader. 'Der Student' and 'Mitternacht' won much success there. In 1831 he led the Thuringian Festival at Erfurt. In 1832 and 1833 he was in London conducting the German opera company, of which Schröder-Devrient and Haitzinger were members.[1] In 1835 his best work, 'Die Hermannschlacht,' a solid and carefully written work in the German style, was given in Munich; in 1836 he was employed as theatre and concert director at Augsburg, and became court Kapellmeister at Weimar. Here two more operas were brought out, 'Der Scheibentoni' (1842) and 'Der Seekadett' (1844). Here too he met Berlioz in 1843 (see the latter's *Voyage musical*, Lettre 4). He was succeeded by Liszt in 1848, and for two years went to live in Paris, returning to Weimar in 1854. A posthumous opera, 'L'Aquila Romana,' was given in Milan in 1864.

A. M.; addns. from *Riemann.*

CHELLE, William (*b.* 1498), secular chaplain at Oxford. He supplicated for Mus.B., Dec. 14, 1524, and was admitted to the degree, Apr. 3, 1525 (*Oxf. Reg.* 1, 136). In 1525 he copied a theoretical treatise by John Tucke, written *c.* 1500 (B.M. Add. MSS. 10,336) in New College, Oxford, and another collection in 1526 (Lambeth MSS. 466). In the latter year he was appointed lay-vicar of Hereford Cathedral, and in 1532 was promoted to be

[1] Fétis says that Malibran sang in his 'Student' in 1834.

prebendary. Owing to his musical attainments, he was made precentor under Queen Mary, in 1554, and continued in office till 1564, when he was deprived, for recusancy, by Bishop Scory. W. H. G. F.

CHELLERI (Keller), Fortunato (*b.* Parma, 1686 ; *d.* Cassel, 1757), of German descent, studied with his uncle, F. M. Bassani, at Piacenza, and wrote between 1707 and 1722, 16 operas which were successfully performed in Northern Italy and Spain (1709). In 1723 he became court Kapellmeister at Würzburg, and in 1725 at Cassels. In 1726 he visited London, and thence was called by the King of Sweden (successor of the Landgrave of Cassels) to Stockholm, where he remained till 1734, when he was obliged to resign on account of the climate. The King allowed him to return to Cassels with a pension. He composed church music, cantatas, symphonies, chamber and organ music, etc. A MS. 'concerto a quatro' (2 vlns., vla., Bc.) in B flat from the Granville Library is now in private hands (*Q.-L.* ; *Mendel*).

CHEMINEAU, LE, opera in 4 acts, text by Jean Richepin, music by Xavier Leroux. Produced Paris, 1907 ; Covent Garden, Oct. 12, 1910 ; New Orleans, 1911.

CHENG or Sheng, a small portable organ of great antiquity in China, with bamboo pipes arranged in a circle upon a wooden air reservoir and with 'free' reeds of thin brass (*PLATE XV.* No. 1). In the ancient form there were 13 pipes, but in the more modern instrument there are 17, four being mute. The proper method of sounding the cheng is by suction of the breath (see American Organ). A small hole in each sounding pipe is covered by the finger, and then the column of air in the pipe being proportioned to the size and weight of the reed, the latter vibrates. By its introduction into France at the close of the 18th century, it became the parent of the accordion, concertina and harmonium. (See Pipes, Evolution of, subsection Free Reed.)

An interesting light is thrown on the European 'invention' of the Regal (*q.v.*) by the mention of a reed organ (*Hsing lung shêng*) in the Chinese official records of the *Yüan Shih*, compiled about the year 1370. According to the account there given, which has been specially verified for the writer by the Chinese scholar, the Rev. A. C. Moule, it was presented by the Moslem Kingdoms ('the lands of the West') to the victorious Emperor Kublai between the years 1260–64. It had a scale of 15 notes and six pipes to each note, but no stops. A keyboard, in the modern sense of the word, was also absent, but sliders—one under each of the sets or ranks of six pipes—were pulled out or pushed in by the hands (see Organ). Two single bellows outside the case, raised alternately by the blower, supplied the wind ; and, according to another ancient account, there was an air reservoir of soft leather within the case after the principle of the bagpipe. The original reeds were of bamboo and of the 'beating' type as in the Arghoul and Regal. It probably came from Bagdad. The Chinese records state that as it produced only sound but no scale (*i.e.* suitable for their musical system) it was reconstructed about or a little before the year 1300, and 'free' reeds, characteristic of the Chinese mouth organ the *Cheng* or *Sheng*, were substituted, thus transforming the instrument into a very early predecessor of the harmonium. In this form it apparently had a chromatic scale from D to E (one octave and a note), which, though not used chromatically by the Chinese performers, enabled them to accompany the Confucian hymns which vary in pitch according to the seasons. (Cf. *Journal of the Royal Asiatic Society*, April 1926.) F. W. G.

CHERUBINI, Maria Luigi Carlo Zenobio Salvatore (*b.* Florence, Sept. 14, 1760 ; *d.* Paris, Mar. 15, 1842), a famous composer, son of a musician at the Pergola Theatre.

'I began,' says he, in the Preface to his autograph Catalogue,[1] 'to learn music at six, and composition at nine. The first from my father, the second from Bartolomeo and Alessandro Felici, and after their death from Bizzarri and J. Castrucci.' His first work was a Mass and Credo in D, for four voices and accompaniment, and by the time he was 16 he had composed 3 Masses, 2 Dixits, a Magnificat, a Miserere and a Te Deum, besides an oratorio, 3 cantatas and other smaller works. In 1777 or 1778 the Grand Duke, afterwards the Emperor Leopold II., granted him an allowance that he might study under Sarti at Bologna. Thither Cherubini went, and there he remained for four years, thoroughly acquiring the old Italian contrapuntal style, and gaining that proficiency in polyphonic writing in which scarcely any composer since his time has equalled him. The compositions given in the Catalogue under 1778 and 1779 are all Antiphons written on *Canti fermi, alla Palestrina.* With the early part of 1780, however, this stops. His first opera, 'Quinto Fabio,' was written during that summer and produced at Alessandria, and for the next fourteen years operas and dramatic music seem to have engaged almost his entire attention :

1782, 'Armida' (Florence), Adriano in Siria' (Leghorn), 'Il Messenzio' (Florence) ; 1783, 'Lo sposo di tre' (Venice) ; 1784, 'L' Idalide' (Florence), 'L' Alessandro nell' Indie' (Mantua).

These operas must have made his name known all over Italy. In 1784 he was invited to London, and wrote 'La finta principessa'

[1] The Catalogue referred to here and elsewhere in this article was compiled by Cherubini himself, with an interesting Preface, and published after his death by Bottée de Toulmon, under the title of 'Notice des manuscrits autographes de la musique composée par feu M. L. C. Z. S. Cherubini, Paris, chez les principaux éditeurs de musique,' 1843. It has been reprinted by Bellasis in his *Memorials.* A still more complete catalogue is in *Q.-L.*

1. CHINESE CHENG. 2. ENGLISH CONCERTINA (19th cent.).
3. ACCORDION (*c.* 1850). 4. SERAPHINE (*c.* 1840).

1, 2, 3. Galpin Collection. 4. Metropolitan Museum, New York.

(1785), and 'Giulio Sabino' (1786), for the King's Theatre, but without success. He also added six airs, including 'For tenderness formed,' to Paisiello's 'Marchese Tulipano,' and treated similarly other operas then on the stage in London. He was much noticed by the Prince of Wales, and held the post of Composer to the King for one year. In July 1786 he left London for Paris, where he seems to have remained for the whole of the next year, very much fêted and liked. In the winter of 1787–1788 he brought out his eleventh opera at Turin, 'Ifigenia in Aulide.' He then returned to Paris, which from that time became his home. His first opera in Paris was 'Démophon,' to Marmontel's libretto, Dec. 5, 1788. In this opera he broke loose from the light vein of the Neapolitan school, and laid the foundation of the grand style which he himself afterwards so fully developed. Meanwhile he was fully employed. Léonard, Marie Antoinette's coiffeur, had obtained permission to found an Italian Opera, and Cherubini received the entire musical direction of it. During the years 1789–92 he conducted the so-called 'Bouffons' at the Théâtre de la Foire St. Germain, in operas of Anfossi, Paisiello, Cimarosa and other Italians, besides writing a great number of separate pieces in the same style for insertion into these works. At the same time he was eagerly pushing on in the path opened by 'Démophon.' 'Marguérite d'Anjou' was produced in 1790, and on July 18, 1791, he brought out 'Lodoïska,' a decided step in advance. The effect produced by his new style, with its unusual harmonic combinations and instrumental effects, was both startling and brilliant, and took the composers of the day completely by surprise. 'Lodoïska' was followed by a series of operas in which he advanced still farther. 'Koukourgi' (1793) remained in MS. to be afterwards adapted to 'Ali Baba'; but 'Elisa' (Dec. 13, 1794), 'Médée' (Mar. 13, 1797), 'L'Hôtellerie portugaise' (July 25, 1798), 'La Punition' and 'La Prisonnière' (1799), 'Les Deux Journées' (Jan. 16, 1800), known in Germany as 'Der Wasserträger,' as well as a number of small one-act works, such as 'L'Épicure' (1800), 'Anacréon' (1803) and 'Achille à Scyros' (1804), both ballet-operas and both masterpieces, show how unceasing was his activity, and how much he must have pleased the opera-goers. But though successful with the public, his pecuniary position was anything but satisfactory. When the Conservatoire de Musique was founded in 1795, he was appointed one of the three Inspecteurs des Études, an appointment by no means commensurate with his genius and artistic position, chiefly no doubt because of Napoleon's dislike to him, a dislike which the Emperor took no pains to conceal. Cherubini's nature, at all times grave, not to say gloomy, became visibly depressed under these circumstances, and he began to lose all pleasure in his profession. In 1795 he married Mlle. Cécile Tourette, a step not likely to diminish his anxieties. He therefore willingly accepted an offer to write an opera for the Imperial Theatre at Vienna, where he arrived early in July 1805. Here he made acquaintance with Beethoven, whose deafness was not then so great as to be an obstacle to conversation, and the two were often together. Beethoven esteemed Cherubini above all the then living writers for the stage, and his vocal music was much influenced by him. What Cherubini thought of Beethoven's music is not so clear. He was present at the first performances of 'Fidelio,' but beyond his remarks that no one could tell what key the overture was in, and that Beethoven had not sufficiently studied writing for the voice, nothing is known. 'Il était toujours brusque,' was his one answer to inquiries as to Beethoven's personal characteristics.[1]

The 'Wasserträger' was performed shortly after Cherubini's arrival, and 'Faniska' produced Feb. 25, 1806. But it was a poor time for operas in Vienna. The war between Austria and France broke out immediately after his arrival; Vienna was taken on Nov. 13, and Cherubini was soon called upon to organise and conduct Napoleon's *soirées* at Schönbrunn. But his main object at Vienna was frustrated, and he returned to France. His mind became so much embittered as to affect his health. Whilst living in retirement at the château of the Prince de Chimay, his friends entreated him to write some sacred music for the consecration of a church there; for a long time he refused, but at last set to work secretly, and surprised them with the Mass in F for three voices and orchestra (1809). With this work a new epoch opens. It is true that both in 1809 and 1810 we find operas ('Pimmalione,' Nov. 30, 1809, 'Le Crescendo,' Sept. 1, 1810), that in 1813 he wrote the 'Abencérages,' and even so late as 1833 'Ali Baba,' but the fact remains that after 1809 sacred music was Cherubini's main occupation. Besides a number of smaller sacred pieces for one, two, three or more voices, with orchestra, organ or quartet, the Catalogue contains:

4 masses, in F, D minor, A flat, and the 'Messe solennelle' in C (Mar. 14, 1816), 'Messe des morts' (Requiem) in C minor (1817), the 'Messe solennelle' in E (1818); that in G, and a Kyrie (both 1819); that in B♭ (Nov. 1821); a Kyrie in C minor (Sept. 13, 1823); the Coronation Mass for 3 v. (Apr. 29, 1825); and lastly the Requiem in D for men's voices (Sept. 24, 1836).

During the hundred days Napoleon made him Chevalier of the Legion of Honour; and shortly after, under Louis XVIII., he was elected member of the Institut, and in 1816 was appointed jointly with Lesueur 'musician and superintendent of the King's Chapel,' with a salary of 3000 francs. Thus almost at once did honour, position and income all fall upon him. In 1822 he became director of the Conservatoire,

1 See Schindler's *Beethoven*, vol. i. 118.

and instructional works, the *Solfèges pour l'examen de l'école*, fill the Catalogue during the next few years. The *Cours de contrepoint et de la fugue*, which was published in 1835, was largely the work of Halévy. Nor are these years barren in instrumental works. In 1815 the Philharmonic Society, then recently formed, offered him the sum of £200 for a symphony, an overture and a vocal piece, and at their invitation he paid a fifth visit to London. He arrived in March; the symphony (in D) was finished on Apr. 24, and played on May 1. It was afterwards (in 1829) scored as a quartet. The overture was performed at the concert of Apr. 3, and another MS. overture on May 29. In addition to these the Catalogue shows:

A Funeral March for full orchestra (Mar. 1820); a march for 'Faniska' (May 15, 1831); 6 string quartets, viz. in E♭ (1814), in C, from the Symphony, with a new Adagio (1829), in D (July 31, 1834), in E (Feb. 12, 1835), in F (June 28, 1836), in A minor (July 22, 1837); and a string quintet in E minor (Oct. 28, 1837).

In addition to the works above mentioned he wrote several operas in conjunction with other composers, such as 'Bayard à Mézières,' with Boieldieu, Catel and Isouard, in 1814, and 'Blanche de Provence' in 1821, to celebrate the baptism of the Duc de Bordeaux, with Boieldieu, Paër, Berton and Kreutzer; also a great number of canons for two, three or more voices. The catalogue contains in all 305 numbers, some of them very voluminous, besides a supplementary list of 30 works omitted by Cherubini, as well as 18 volumes (some of them of more than 400 pages) of music by various Italian writers, copied out by the great composer himself, a practice which he admits having learned from his old master Sarti.

Three Periods of Composition.—Cherubini's artistic career may be divided into three periods. The first, 1760–91, when he was writing motets and masses *à la* Palestrina, and operas in the light Neapolitan vein, may be called his Italian period. The second operatic period opens with 'Lodoïska,' though the beginning of the change is apparent in 'Démophon' (1788) in the form of the concerted pieces, in the entrances of the chorus, and the expressive treatment of the orchestra. 'Lodoïska,' however, shows an advance both in inspiration and expression. 'Médée' and 'Les Deux Journées' form the climax of the operatic period. In the former the sternness of the characters, the mythological background, and above all the passion of Medea herself, must have seized his imagination and inspired him with those poignant, almost overpowering accents of grief, jealousy and hatred in which 'Médée' abounds But it is impossible not to feel that the interest rests mainly in Medea, that there is a monotony in the sentiment, and that the soliloquies are tedious; in a word, that in spite of all its force and truth the opera will never command the wide appreciation which the music as music deserves. The 'Deux Journées' forms a strong contrast to 'Médée,' and is a brilliant example of Cherubini's versatility. Here the sphere of action is purely human, simple, even plebeian, and it is impossible not to admire the art with which Cherubini has laid aside his severe style and adapted himself to the minor forms of the arietta and *couplet*, which are in keeping with the idyllic situations. The finales and other large movements are more concise, and therefore more within the range of the general public, and there is an ease about the melodies, and a warmth of feeling, not to be found elsewhere in Cherubini. This period closes with the 'Abencérages' in 1813, for 'Ali Baba,' though completed in 1833, was largely founded on 'Koukourgi' (1793), and 'Olimpiade,' to Metastasio's words, was incomplete.

The third period, that of his sacred compositions, dates, properly speaking, from his appointment to the Chapelle Royale in 1816, though it may be said to have begun with the Mass in F (1809), which is important as being the first sacred work of his mature life, though it is inferior to that in A, and especially to the Requiem in D minor. The three-part writing in the Mass in F seems scarcely in keeping with the broad outlines of the work, and the fugues are dry and formal. That in A, also for three voices, is concise, vocal and eminently melodious. The Requiem in C minor is at once his greatest and most famous work. The Credo for eight voices *a cappella* is an astonishing instance of command of counterpoint, and shows how perfectly he could adapt it to his own individual thoughts. Technique apart, it ranks below his other great sacred works. It is probable that Cherubini intended it to be considered as a study, for only two numbers were published during his lifetime, viz. the concluding fugue 'Et vitam,' and an elaborately developed 'Ricercar' in eight parts with one chief subject and three counter-subjects, in which all imaginable devices of counterpoint are employed.

In estimating Cherubini's rank as a musician, it must be remembered that though he lived so long in Paris, and did so much for the development of French opera, he cannot be classed among French composers. His pure idealism, which resisted the faintest concession to beauty of sound as such, and subjugated the whole apparatus of musical representation to the idea; the serious, not to say dry, character of his melody, his epic calmness—never overpowered by circumstances, and even in the most passionate moments never exceeding the bounds of artistic moderation—these characteristics were hardly likely to make him popular with the French, especially during the excitement of the Revolution. His dramatic style was attractive from the novelty of the combinations, the truth of the dramatic expres-

sion, the rich harmony, the peculiar modulations and brilliant instrumentation, much of which he had in common with Gluck. But his influence on French opera was only temporary. No sooner did Boieldieu and Auber appear than the severer muse of Cherubini, dwelling in a realm of purer thought, dropped her hold on the public. His closest tie with the French school arose from the external accident of his connexion with the Conservatoire, where he had the formation of all the important French composers of the first half of the 19th century. In Germany his works met with more enduring appreciation. One of the first things Mendelssohn did after he felt himself safe in the saddle at Düsseldorf was to revive 'Les Deux Journées' and to introduce the Mass in C in the church. Six months later he brought forward one of the Requiems, and when he had to conduct the Cologne Festival in 1835 it was to Cherubini's MS. works that he turned for something new and good. A reference to the Index of the Leipzig *A.M.Z.* will show how widely and frequently his works have been performed in Germany. Cherubini's portrait by Ingres is in the gallery of the Louvre, Paris. He left one son and two daughters, the younger of whom was married to Hippolyte Rossellini of Florence. A. M.

CHESTER, LTD., J. and W. This music-publishing firm was established at Brighton in 1860. Its activities were at first confined to the ordinary retail trade to which a music-lending library, the first of its kind to be established in this country, was later added. In 1915 the business was transferred to London and under the proprietorship of O. M. Kling (formerly manager of Breitkopf & Härtel), became the leading agency for Russian music and contemporary music of other countries, and in 1919 began to specialise in the publication of works of the kind. Under the title of *The Chesterian* the firm issues a monthly musical review dealing chiefly with contemporary music.

CHESTER MUSICAL FESTIVAL. The first festival was held June 16, 17 and 18, 1772, under the management of Orme, the cathedral organist, with Dr. William Hayes as conductor. The *Chester Courant* for June 23 of that year says:

'On Tuesday, Thursday & Friday last, were performed in the Broad Isle of the Cathedral, the celebrated Oratorios of 'Messiah,' 'Samson,' and 'Judas Macchabaeus,' before a most polite and numerous audience. The several performers filled their respective Departments with spirit and execution; and the amazing powers of the two Miss Linleys conspired to render the Entertainment so great and excellent as can be expected, or ever was produced from the human voice.

'On Wednesday Evening a Concert of Select Musick was performed in the Exchange Hall, where amongst other very capital pieces, Mr. Linley, Junr., distinguished himself as one of the greatest masters of the Violin which this nation has produced.'

A masked ball was held at the Exchange, on the Thursday night, and was conducted 'with the greatest elegance and decorum.' Although apparently successful, it is remarkable that this festival of 1772 is not mentioned in any work on Chester, and so completely had the memory of it died out, that a correspondent writing to the *Chester Chronicle*, Oct. 5, 1821, states that from all the information he had been able to collect, 'the First General Festival of Oratorio Music was held in 1783.' This, as we have seen, is erroneous, and the festival of Sept. 16 to 19, 1783, was the second held in Chester. The committee, encouraged by past experience, extended the festivities, and the following exhausting programme was gone through: 'Messiah,' 'Jephthah,' 'Judas Maccabeus' (in the Cathedral); 'Acis and Galatea,' and a miscellaneous concert in the County Hall, as well as assembly balls on Tuesday, Thursday and Friday evenings; a fancy dress ball on Wednesday evening; and a public breakfast (with Catches and Glees) on Saturday morning. The musical portion was directed by Knyvett, and led by Cramer; and amongst the performers were Kotzwara (the composer of 'The Battle of Prague'); John Ashley (the celebrated bassoon-player); and Crosdill, the violoncellist.

Some idea of making the festival triennial now began to manifest itself, and the third meeting was held Sept. 1786, with the same number of concerts, cathedral performances, public balls, etc. The oratorios given were 'Messiah' and 'Joshua,' and the Handel Festival Selection, as performed in Westminster Abbey at the Commemoration, 1784. Handel's 'L' Allegro' was also given at the evening concerts. The singers included Mrs. Billington and Rubinelli, and Mrs. Siddons acted during the week at the Theatre Royal.

For the first time, the organ and orchestra were erected at the west end of the nave—an arrangement which was continued until 1829, and reverted to again in 1891.

The triennial arrangement, however, fell to the ground, and 1791 saw the fourth Chester festival—one important feature being the substitution for the morning concert of a fourth day's performance in the Cathedral, where the 'Messiah,' 'Samson,' and two Handel selections were given. The vocalists comprised Madame Mara, Mrs. Crouch (Miss Phillips), Michael Kelly and Harrison. Owing to the disturbed state of affairs at home and abroad, it is scarcely surprising that no other festival was held until 1806—when the usual week's festivities took place. The cathedral performances included the 'Messiah' (with Mozart's

additional accompaniments for the first time); and, as a complete novelty, Haydn's 'Creation.' The vocalists included Mrs. Billington, Mrs. Dickons, Harrison and Bartleman. The band consisted of most of the leading players of the day, including Lindley and Dragonetti. Greatorex, the organist of Westminster Abbey, presided at the pianoforte and organ, and conducted the festival, which was under the patronage and enjoyed the presence of H.R.H. the Duke of Gloucester.

1814 saw the sixth festival, beginning Sept. 27, and the performance contained a curiosity, namely,

'A new occasional Oratorio, compiled chiefly from "JUDAS MACCABEUS," in which will be produced "THE BATTLE," by Raimondi.'

The vocalists included Madame Catalani, Mrs. Salmon, Braham, Kellner and Bartleman. Greatorex conducted and Cramer led the band, which again included Dragonetti and Lindley. Of such importance was the festival that it caused the postponement of the Oswestry races.

The seventh festival took place in 1821; the 'Messiah' being given on the first day, and selections from the 'Creation,' 'Judas Maccabeus,' 'Joshua,' and Mozart's 'Requiem.' The vocalists included Mrs. Salmon, Miss Stephens and Madame Camporese; and Braham, Swift, Rolle and Kellner. The orchestra was led by Cramer.

The eighth festival was held in 1829. The works performed included the 'Messiah,' and selections from 'Judas Maccabeus,' 'Joshua,' 'Jephthah,' 'Solomon,' 'Israel in Egypt' and the 'Creation.' The principal vocalists were Madame Malibran, Miss Paton, Mrs. Knyvett, Braham and Phillips. The orchestra was led by F. Cramer and Mori, and Greatorex again conducted. This was the last of the old series of Chester festivals.

Fifty years afterwards they were revived by a two days' festival (the ninth) held in the Cathedral, July 23 and 24, 1879, under the management of the Rev. C. Hylton-Stewart, Cathedral precentor, and Dr. J. C. Bridge, the Cathedral organist, the latter of whom conducted. This was so successful that the festival was expanded to three days for the tenth meeting in 1882, and was held triennially up to 1900, the sixteenth and last.

Among the works specially written for these festivals are several by the conductor (see BRIDGE, (2) Joseph Cox); a Psalm, 'By the Waters,' Oliver King; Cantata, 'The Soul's Forgiveness,' Dr. Sawyer; and overtures by E. H. Thorne and Sir Frederick Bridge.

In addition to the standard works of the great composers, many of their lesser known works have been included, such as

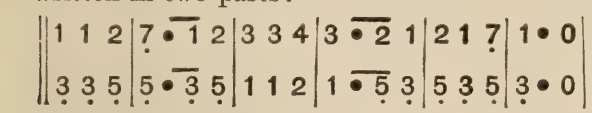
'Organ Concerto' and 'Concertante for stringed instruments,' Handel; the 'Funeral and Triumphal Symphony,' and selection from 'Childhood of Christ,' Berlioz; 'Journey to Emmaus,' Jensen; Symphony, 'The Earthly and the Divine,' Spohr; Oratorio, 'The Deluge,' Saint-Saëns, etc.; while many works such as Verdi's Requiem, Tchaikovsky's 'Pathetic Symphony,' and selections from Wagner's 'Parsifal' have been performed for the first time in an English cathedral. J. C. B.

CHEST OF VIOLS, a set of six viols, properly matched as to size, power and colour, used for chamber performance. It usually consisted of two trebles, two tenors and two basses: occasionally of two trebles, three tenors and one bass, the bass being properly twice as long in the string as the treble. (See VIOL.) These sets of viols, thus duly proportioned, were often made by the old English makers. They were carefully fitted into a 'chest,' which seems to have been a shallow vertical press with double doors. Dr. Tudway, in a letter addressed to his son, printed in Hawkins (ch. 144), describes it as 'a large hutch, with several apartments and partitions in it, each partition was lined with green bays to keep the instruments from being injured by the weather.' Hawkins quotes an advertisement, dated 1667, of two 'chests of viols' for sale, one made by John Rose in 1598, the other by Henry Smith in 1633. 'Both chests,' says the advertiser, probably referring to the instruments, but possibly to the hutches, 'are very curious work.' In a well-known passage in *Musick's Monument* (p. 245), Mace says of the 'Press for Instruments,' which forms a conspicuous part of the furniture of his elaborately designed music room,

'First see that it be conveniently large, to contain such a number as you shall design for your use, and to be made very close and warm, lyn'd through with bayes, etc., by which means your instruments will speak livelily, brisk and clear. . . . Your best provision, and most complete, will be a good chest of viols, six in number, viz. two basses, two tenors, and two trebles, all truly and proportionably suited. . . . Suppose you cannot procure an entire chest of viols, suitable, etc., then thus: endeavour to pick up, here or there, so many excellent good odd ones, as near suiting as you can, every way, viz. both for shape, wood, colour, etc., but especially for size.'

Mace's Press for Instruments includes, besides the 'chest of viols,' a pair of violins, a pair of 'lusty full-sized theorboes,' and three 'lusty smart-speaking' lyra-viols, the whole constituting 'a ready entertainment for the greatest prince in the world.' The principle of the 'chest of viols' is found in the quartets and quintets of violins which were occasionally made by the Cremona makers. E. J. P.

CHEST-VOICE. By this term is commonly understood the lowest sounds of a voice, and any others that can be produced in the same manner; in other words, the 'first register' (see SINGING). J. H.



CHEVAL DE BRONZE, LE, a comic opera on a Chinese subject, in 3 acts; words by Scribe, music by Auber; produced Opéra-Comique, Mar. 23, 1835; at the Académie (Opéra), Sept. 21, 1857. As the 'Bronze Horse' it was produced at Drury Lane, Jan. 5, 1836. G.

CHEVALIER, belonged to the 'Grande Bande des Vingt-quatre violons' under Henri IV. and Louis XIII., played the 'quinte de viole,' a kind of viol. His name appears most frequently at the beginning of the 17th century as a composer of ballets. Between the years 1587 and 1617 he composed no less than 33, according to a list drawn up by Michel Henry, one of Louis XIII.'s 24 violins, and now in the Bibliothèque Nationale at Paris.

Bibl.—Henry Prunières, *Le Ballet de cour en France avant Beuserade et Lully.* Paris, 1914.

CHEVÉ or Galin-Paris-Chevé System, a method of teaching part-singing and sight-reading, much used in France, is thus called, from the names of its founder and chief promoters. Its essential features are two: first, the use of the principle of 'tonic relationship,' the learner being taught to refer every sound to the tonic, and secondly, the use of a numeral notation, the figures 1, 2, 3, etc., serving as the written symbols for the several sounds of the scale. *Do* (*ut*) = 1, *Re* = 2, etc. The following is an example of 'God save the King,' thus written in two parts:

A dot under a figure shows that it is in a lower octave, a dot above a figure in a higher. The zero shows a 'rest' or silence; a thick dot, as in the second measure, continues the preceding sound. The varying lengths of sound are shown by a bar or bars above the figures, as in the second and fourth measures. The numerals are treated only as visual signs; the names sung are the old sol-fa syllables. The use of the numerals is to keep the positions of the sounds in the scale impressed on the learner's mind, and thus help him to recognise and sing the sounds. This figure notation is used only as introductory to the ordinary musical notation. The system has been the subject of much controversy in France, but it has made considerable way and was first authorised by Ministerial resolution for use in the Écoles Publiques of France, July 23, 1883, though only in the elementary course. In 1905 it was adopted in the programmes of the Écoles Normales. But the programmes of 1922 pass this system over in silence. The instructions (*Journal Officiel*, June 22, 1923) only recommend the usage of a simplified notation as a means of Aural Training. The system has been adapted for English use by M. Andrade and Mr. G. W. Bullen.

The idea of using numerals in the way above shown is best known to the general world through the advocacy of Jean Jacques Rousseau. Pierre Galin (1786–1821), who first developed the plan practically, was a teacher of mathematics at Bordeaux. Aimé Paris (1798-1866), one of his most energetic disciples, was educated to be an avocat, but devoted his life to the musical propaganda. He added to this system a special nomenclature, since adopted into the Tonic Sol-fa (*q.v.*) system, for teaching time.

Émile Chevé (1804–64) was a doctor, and married a sister of Paris. His *Méthode élémentaire de la musique vocale*, a complete exposition of the system, has a curious title-page. The title is followed by the words 'ouvrage repoussé [in large capitals] à l'unanimité 9 avril, 1850, par la Commission du Chant de la ville de Paris, MM. Auber, Adam, etc. etc.,' and below this is a picture of a medal 'Décernée Juin 1853 à la Société Chorale Galin-Paris-Chevé' for 'lecture à première vue' and other things, by a jury composed of Hector Berlioz and other musicians (6th ed., 1856).

R. B. L., with addns.

CHEVILLARD, (1) Pierre Alexandre François (*b.* Antwerp, Jan. 15, 1811; *d.* Paris, Dec. 20, 1877), a distinguished French violoncellist.

He became famous for the brilliance and accuracy of his execution, for the success of his teaching at the Paris Conservatoire (1860), and for the foundation, in 1835, of the Société des derniers quatuors de Beethoven, one of the oldest institutions of the kind in France and one of the most important.

His son, (2) Paul Alexandre Camille (*b.* Paris, Oct. 14, 1859; *d.* Chatou, Seine-et-Oise, May 30, 1923), was one of the most prominent of French orchestral conductors as well as an earnest composer. He was at first a pianoforte pupil of the Conservatoire (2nd prize); and afterwards followed his own instincts as a composer, without definite teaching. Chevillard's works are remarkable for a style at once personal, solid and refined; they include a trio, quartet and quintet for piano and strings; a string quartet; a very remarkable sonata for violin and piano; a sonata for violoncello and piano; smaller violin and violoncello pieces; a set of variations and an 'Étude chromatique' for piano; a 'Ballade symphonique'; a symphonic poem, 'Le Chêne et le roseau,' and a 'Fantaisie symphonique'; as well as songs. He left in MS. his music to E. Schuré's drama *La Rousalka*, played with the performance of the drama in Paris, Mar. 23, 1903. He founded in 1895 a trio called Trio Chevillard-Hayot-Salmon. On the death of Lamoureux (*q.v.*), Chevillard directed the concerts given under his name. In 1887 he assisted Lamoureux in the first representation of 'Lohengrin' in Paris, and was his substitute in 1897–99, and on many other occasions. Chevillard soon earned a high reputation as a conductor of the classics, especially Beethoven, Schumann, Wagner and Liszt. Rolland (*Musiciens d'aujourd'hui*) gives him the credit of having first drawn the attention of the Paris public to Russian music,

while he complains of Chevillard's lack of sympathy with the native modern school. His manner of conducting was strong, precise and careful, with more communicative warmth than that of his predecessor. Madame Chevillard, a daughter of Lamoureux, translated Weingartner's pamphlet on the symphony since Beethoven. G. F.; addns. M. L. P.

CHIABRAN, see CHABRAN.

CHIAVETTE (little keys, or clefs). This was a system of moving the clefs up or down in order to keep the notes within the limits of the stave. In notating music written for unaccompanied voices there is no obligation to indicate the exact pitch; and as pre-seventeenth century musicians were restricted as to the number of key-signatures at their disposal, and were, moreover, hampered by a prejudice against transposing the modes, the range of their voice-parts was sometimes compelled into an appearance of being abnormally high or low. In order to accommodate these unusual ranges to the eye, and to avoid using leger lines, the clefs of the voice-parts were, if the range were high, moved down from their normal position on the stave; if low, moved up.

The ordinary position of the clefs was called the *chiavi naturali*; and both the acute and grave positions were called the *chiavi trasportati*; but the term *chiavette* (called by Morley in the *Plaine and Easie Introduction* 'the high key') was generally taken to mean the high range transposition of the clefs.

Transpositions of a fifth could also be made. It should be observed that the transpositions affect *each* voice-part, and affect them systematically; a single clef in the acute or grave position, whilst the others are in their normal places on the stave, merely has reference to the range of that particular voice-part.

It has been suggested that the system of the *chiavi* was connected with the plagal or authentic character of the modes or their transpositions. But there is considerable evidence against this theory. Palestrina's *Missa Papae Marcelli* in Mode xiv. (plagal), and his *Missa Dies Sanctificatus* in Mode vii. (authentic), are both written in the *chiavette*; and though the clef-transpositions of a fifth might indicate that the mode were transposed, the clef transpositions—equally common—of a third would be of no use for such a purpose.

There is no reason to suppose that the pitch at which the music was sung corresponded with the pitch of the *chiavi*. Indeed, in many works written in the *chiavette*, for example, the Taverner-Tye motet 'O Splendor' (Bodl. MSS. Mus. Sch. e. 1–5), this would be practically impossible. S. T. W.

CHICAGO is, by reason of its Symphony Orchestra, its Opera and other institutions, one of the most important centres of musical life in the United States of America.

CHICAGO SYMPHONY ORCHESTRA. — This orchestra owes its origin to Theodore THOMAS (*q.v.*) who gave a long series of concerts in Chicago when he was still the leader of an itinerant orchestra which went out from New York, and another series which he gave every summer for a number of years in a building erected for exposition purposes on the Lake front. The first Thomas Concert was given in Chicago in 1869, when the city was only 34 years old as a municipal corporation. It was then surpassed in population both by Cincinnati and St. Louis. Leaving New York in 1890 Thomas founded in 1891 the Chicago Orchestra, so called for 15 years. It then became the Theodore Thomas Orchestra until 1912, when the present name—The Chicago Symphony Orchestra — was adopted. The management of the orchestra is in the hands of the Orchestral Association of Chicago, organised in 1891, which owns Orchestra Hall on Michigan Avenue, built in 1904—a property which secures permanent endowment of the orchestra. Thomas conducted the orchestra until his death in 1905 when he was succeeded by F. A. STOCK (*q.v.*), the present conductor (1926), who had been Thomas's assistant. Under him the orchestra has more than maintained its position among the leading orchestras of the United States. The present concert-master (leader) is Jacques Gordon, and Eric De Lamarter is assistant conductor. In addition to the regular series of symphony concerts given throughout the winter season, a series of popular concerts and one of concerts for children is given each year. The orchestra tours extensively and makes periodic visits to New York and other large Eastern cities. It possesses a pension fund which has received large gifts from benefactors. The orchestra has a very large repertory of classical and modern works, and has been responsible for the production of many new works by American composers. The excellent programme books of its concerts contain notes written by Felix Borowski.

THE CHICAGO CIVIC OPERA COMPANY was formed in 1910 as the Chicago Grand Opera Company, chiefly from the forces previously drawn together by Oscar HAMMERSTEIN (*q.v.*). Andreas Dippel was its first manager (1910–13), with Cleofonte CAMPANINI (*q.v.*) as chief conductor. Campanini carried on the management until 1915, when, the original organisation

having become bankrupt, a new one was formed with the name of Chicago Opera Association, Campanini remaining as general director and with Herbert M. Johnson as business manager. Until his death, in 1919, Campanini was the most influential factor in the enterprise. In 1920 he was succeeded as executive director by Herbert M. Johnson, with Giño Marinuzzi as artistic director. Mary Garden was general director for the season 1922–23. Giorgio Polacco followed as artistic director with Herbert M. Johnson as manager. Except for a break in 1914–15, regular seasons have been presented in Chicago and performances have been given in other cities. The Company owes much to the benefactions of Mr. and Mrs. Harold McCormick. Its seasons have included a large number of new works which have become celebrated.

The Chicago North Shore Festival Association of Evanston, Illinois, was organised in 1908 to consolidate work previously undertaken by the musical clubs of Evanston and Ravenswood and the school of music in North Western University. It gives a series annually of excellent concerts, usually six in number, in which choral music is prominent. A festival choir, varying in size from 600 to 1100 voices, a children's choir of 1500 voices drawn from schools, are among the forces conducted by P. C. Lutkin. Many large choral works, including those of Pierné, Bantock, Elgar and Coleridge-Taylor, have been given. A competition for a prize of 1000 dollars for the best symphonic composition by an American composer is held annually by the Association.

The Chicago Musical Union, though not the first, was perhaps the most important of the early choral societies of Chicago. It began its activities with a performance of 'The Creation' in 1857. It was first conducted by C. M. Cady; then, from 1860, by A. L. Coe, and in 1863 by Hans Balatka. It flourished till 1865.

The Apollo Musical Club was organised in 1872 through the efforts of Silas G. Pratt and George P. Upton. Originally a male choir after the model of the Apollo Club of Boston, it was expanded into a mixed choir in 1875. Its early conductors were A. W. Dohn (1872–74), Carl Bernstein (1874–75), but its development to a position of leadership is primarily due to its third conductor, William L. Tomlins (1875–98), and to Harrison M. Wild, who succeeded him. Under these the highly efficient choir of some 250 singers has given a large repertory of the greater choral works. Amongst many others it gave the first performance in America of Elgar's 'Dream of Gerontius' (1903).

The Chicago Mendelssohn Club, founded in 1894, is a male voice choir directed by Harrison Wild.

The Civic Music Association of Chicago was founded in 1913 with the object of encouraging the study and understanding of music throughout the community. It has accomplished excellent work in providing music for the people by giving concerts in the small parks, playgrounds and other civic centres of the city; but its most notable accomplishment has been the organisation in 1920 of the Civic Orchestra which, under the direction of Frederick Stock and Eric De Lamarter, has not only formed a training school for orchestral performers, but has offered monthly concerts of symphonic music at merely nominal rates of admission. The Association has been active, too, in the training of children's choruses and in the fostering of community singing.

The Chicago Musical College was founded in 1867 by Florenz Ziegfeld and was incorporated in 1877. Ziegfeld remained its active head for nearly 50 years. Since 1916 Felix Borowski has been president and Carl. D. Kinsey manager. The teaching staff numbers over 100 and the annual enrolment of students is over 4000. The college occupies its own building at 64 E. Van Buren Street; its faculty has always been notable for ability, and from time to time guest-instructors have been engaged. (See also Libraries.)

The American Conservatory was founded in 1886 by John J. Hattstaedt, who is still its director.

The above is founded on information from Krehbiel's articles in the 2nd edition of this Dictionary; from the *Amer. Supp.*; and from Felix Borowski. C.

CHICKERING. Chickering & Sons, pianoforte-makers of Boston and New York, claim to be the earliest existing American house, and the first to have obtained any prominence. According to information supplied by Chickering, the first pianoforte made in America was upon an English model, probably one of Broadwood's. It was made by Benjamin Crehorne, of Milton, U.S.A., before the year 1803. From that year the construction of American pianofortes was persistently carried on, but without any material development, until a Scotchman named James Stewart, afterwards known in London through his connexion with Collard & Collard, gave an impetus to the American home-manufacture. Stewart induced Jonas Chickering (1798–1853) to join him, but two years after Stewart returned to Europe, when Chickering was left upon his own account. The year given as that of the actual establishment of the Chickering firm is 1823. Two years subsequent to this, Alpheus Babcock, who had served his time with Crehorne, contrived an iron frame for a square pianoforte, with the intention to compensate for changes of temperature affecting

the strings, for which he took out a patent. Whether this was suggested by an improvement with the same object patented in London in 1820 by James Thom and William Allen, or was an independent idea, is not known, but Babcock's plan met with no immediate success. However, this attempt at compensation laid the foundation of the modern equipoise to the tension in America as Allen's did in England. Jonas Chickering produced a square pianoforte with an iron frame complete, except the wrest-pin block, in 1837. From 1840 this principle was fostered by Messrs. Chickering, and applied to grand pianofortes as well as square, and has since been generally adopted everywhere. In 1908 the firm was absorbed into the American Pianoforte Company. A. J. H.

CHILCOT, Thomas (*d.* Bath, Nov. 1766), organist of the Abbey Church, Bath, from 1733 until his death, was the first master of Thomas Linley, the composer. He produced 'Twelve English Songs, the words by Shakespeare and other celebrated poets' (1745); two sets of harpsichord concertos (1756), and other works. W. H. H.

CHILD, William, Mus.D. (*b.* Bristol, 1606; *d.* Windsor, Mar. 23, 1697), organist and composer of church music. He received his musical education as a chorister of Bristol Cathedral under Elway Bevin (*q.v.*), the organist.

He is usually said to have taken the degree of Bachelor of Music at Oxford in 1631, but the date on his exercise (see below) is 1639. In 1632 he was appointed one of the organists of St. George's Chapel, Windsor, jointly with Nathaniel Giles, in the room of John Mundy, and in the same year one of the organists of the Chapel Royal. In 1643, when the whole establishment was expelled, Child is said to have retired to a small farm and to have devoted himself to composition, the anthem 'O Lord, grant the King a long life' dating from this time. About 1660 he was appointed chanter of the Chapel Royal and one of the King's private musicians. At the Restoration he was present at Charles II.'s coronation, Apr. 23, 1661. On July 8, 1663, he proceeded Doctor of Music at Oxford, his exercise being an anthem which was performed in St. Mary's Church on the 13th of the same month. He died at Windsor in the 91st year of his age, and was interred in St. George's Chapel. His gravestone is near the present entrance to the organ loft. The inscription on this stone is given in West's *Cath. Org.* Dr. Child published in 1639, in separate parts, engraven on small oblong copper plates, a work entitled:

'The first set of Psalmes of iii voyces, fitt for private chappells, or other private meetings with a continuall Base, either for the Organ or Theorbo, newly composed after the Italian way,'

and consisting of twenty short anthems for 2 trebles and a bass, the words selected from the Psalms. This work was reprinted, with the same title, in 1650, and was again reproduced, from the same plates, in 1656, but with the title changed to

'Choise Musick to the Psalmes of Dauid for Three Voices, with a Continuall Base either for the Organ or Theorbo.'

His other published works consist of 'Divine Anthems and vocal compositions to several pieces of Poetry'; Catches in Hilton's 'Catch that Catch can,' 1652, and Playford's 'Musical Companion,' 1672; and some compositions in 'Court Ayres.' There is also a catch by Child, 'Let poets ne'er puzzle' (B.M. Add. MSS. 29291/9b), which is described as 'an epitaph on Ralph Amner' (*q.v.*), a Dance Suite in E minor for 3 viols, and consisting of Prelude, Pavan, Air and Courante (Add. MSS. 31423), and another for 3 viols with a basso continuo part for the harpsichord, written when he was organist of Windsor, and including Allemande, Courante, Air and Sarabande (Add. MSS. 18940-4).

Child gave £20 towards building the Town Hall at Windsor, and bequeathed £50 to the corporation to be applied in charitable purposes. His portrait, painted in 1663 shortly after taking his doctor's degree, was presented by him to the Music School at Oxford. An amusing story of a bargain made by Child is told in the Chapter Records, thus:

'Dr. Child having been organist for some years to the king's chapel in K. Ch. 2nds time had great arrears of his salary due to him, to the value of about £500, which he and some of our canons discoursing of, Dr. C. slited (*sic*), and said he would be glad if anybody would give him £5 and some bottles of wine for; which the canons accepted of, and accordingly had articles made with hand and seal. After this King James 2 coming to the crown, paid off his Brs. arrears; wch. much affecting Dr. Child, and he repining at, the canons generously released his bargain, on condition of his paving the body of the choir wth. marble, wch. was accordingly done, as is comemorated on his gravestone.'

The 20 Psalms (publ. 1639, also contained in Add. MSS. 34289) are as follows:

'Blessed is the man.'
'Heare me, when I call.'
'Helpe me, Lord.'
'How long wilt thou forget me.'
'In the Lord put I my trust.'
'I will give thanks.'
'Lord, how are they increased.'
'Lord, who shall dwell.'
'O Lord, my God.'
'O Lord, our Governour.'
'O Lord, rebuke me not.'
'O that the salvation were given.'
'O that my wayes.'
'Praise the Lord, O my soule.'
'Ponder my words, O Lord.'
'Preserve me, O God.'
'Save me, O God.'
'The foole hath said.'
'Why doth the Heathen.'
'Why standest thou so far off.'

Besides these, the following compositions of Child exist in various MSS.:

SERVICES, Etc.

Whole Service in D ('Sharp Service') (including V., T.D., J., K., C., M., N.D.). PH.; Add. MSS. 30478-9 (Tenor cantoris part only); Harl. 7338 (score).
Whole Service in C (V., Bcte, J., C., Sanctus, Gloria, M., N.D., Cantate, Misereatur). Add. MSS. 17784/176b (Bass part only).
Whole Service in A minor. Add. MSS. 17784/168 (Bass part only).
Whole Service in E♭. Add. MSS. 17784/148 (Bass part only).
Whole Service 'in E sharpe.' Add. MSS. 17784/144b (Bass part only).
Whole Service 'in C fa ut' (T.D., J., K., C., Sanctus, Cantate Misereatur). Add. MSS. 17784/141 (Bass part only).
Whole Service 'in F fa ut' (T.D., J., K., C., Cantate, Misereatur). Add. MSS. 30933/42 (score); Add. MSS. 31404/10b (organ score).

Whole Verse Service in E. Harl. 7338/76-85 (score).
Evening Service in C minor, 'Flat service for Verses' (M., N.D.). Ch. Ch. 1227 (organ score); Ch. Ch. 1220-4 (Alto, Tenor and Bass parts only).
Service in E minor (T.D., J., K., C., M., N.D.). Ch. Ch. 525, 1002 (scores).
Second Service in G (Bcte, J., K., C., M., N.D., Cantate, Deus Misereatur). Ch. Ch. 1002 (score).
Verse Evening Service in A. Add. MSS. 17784/163 (Bass part only); Harl. 7338 (score).
Verse Evening Service in B♭. Add. MSS. 17784/162 (Bass part only); Harl. 7338 (score).
Verse Evening Service 'in E la mi.' Add. MSS. 30933/26 (score).
Verse Evening Service in D minor. Harl. 7338/42 (score).
Verse Evening Service in A minor (M., N.D.). Ch. Ch. 1227 (organ score); Ch. Ch. 1012 (Bass part only).
Morning and Evening Service in F (T.D., J., Sanctus, Cantate, Misereatur). Harl. 7338/30b (score).
Morning and Evening Service, in Gamut, Add. MSS. 31404/38b (organ score).
Evening Service in F. Harl. 7338/87-89b (score).
'Flatt Service' in C fa ut. Add. MSS. 17784/161 (Bass part only).
Short Service in D sol re (J., Sanctus, Gloria). Add. MSS. 17784/160 (Bass part only); Add. MSS. 30933/26 (score)
Kyrie and Creed 'for Morley's Service.' Ch. Ch. 1220-4 (Alto, Tenor and Bass parts only).
Sanctus in E♭. Add. MSS. 6324/149b (score).

ANTHEMS

'Allmightie God, which hast knitt.' Harl. 4142/1b (words only).
'Behold how good and joyful.' Add. MSS. 17784/19b (Bass part only).
'Blessed be.' Durh.; Add. MSS. 17784/36b (Bass part only).
'Bow down thine ear.' PH.
'Give the King thy judgments.' PH.; Add. MSS. 17784/23b (Bass part only).
'Glory be to God on high' (*a* 8). Add. MSS. 30478-9 (Tenor part only); Add. MSS. 33239/112 (score).
'Hear me, O God.' Tenb. O.B. /250.
'Heare, O my people.' Durh., PH.
'Holie, Holie, Holie.' Harl. 4142/9 (words only).
'I am the resurrection.' PH.
'If the Lord himself had not been on our side.' 'An anthem of thanksgiving to God for having put an end to the great Rebellion in 1641 by the restauration of the Royal family.' Harl. 7338 (organ score); Add. MSS. 17784/31b (Bass part only).
'I heard a voice.' St. G. Ch.
'I will be glad and rejoyce' (verse anthem). Add. MSS. 17784/11b (Bass part only).
'Let God arise' (verse anthem). Add. MSS. 17784/20b (Bass part only).
'Lord, who shall dwell' (verse anthem). Ch. Ch. 1220-4 (Alto, Tenor and Bass parts only).
'My Heart is fixed' (verse anthem). Add. MSS. 17784/53b (Bass part only).
'My soule trulie waiteth.' Harl. 4142/15b (words only).
'O Almighty God' (collect for All Saints' Day). PH.
'O clap your hands.' Durh.; Add. MSS. 30478-9 (Tenor part only); Add. MSS. 17784/36b (Bass part only).
'O clap your hands' (verse anthem). Add. MSS. 17784/52b (Bass part only).
'O God, wherefore art thou absent.' PH.
'O how amiable' (verse anthem). Add. MSS. 17784/54b (Bass part only).
'O let my mouth be filled.' PH.; Add. MSS. 17784/27 (Bass part only).
'O Lord God, the Heathen are come into thine inheritance' (*a* 5) ('composed in the year 1644 on the occasion of the abolishing The Common Prayer and overthrowing the constitution both in Church and State'). Harl. 7338 (score): Add. MSS. 17784/61 (Bass part only).
'O Lord, grant the King a long life' ('at the Restauration'). Harl. 7338 (score); Add. MSS. 17784/33b (Bass part only); Durh. C 17/103.
'O Lord, grant the King a long life' (verse anthem). Add. MSS. 17784/50b (Bass part only); Durh. C 2/198.
'O Lord, how long.' Add. MSS. 17784/61 (Bass part only).
'O Lord, thou hast searched me out.' PH. 37/G 9 (Bass cantoris part only).
'O praise the Lord of Heaven.' Tenb. O.B.; Add. MSS. 17784/28b (Bass part only).
'O praise yee the Lord' (*a* 5) ('. . . upon the Restauration of the Church and Royal Family in 1660'). Harl. 7338 (score).
'O pray for the peace.' Durh.; Add. MSS. 17784/32 (Bass part only).
'O sing unto the Lord.' Add. MSS. 17784/21b (Bass part only); Add. MSS. 30478-9 (Tenor part only).
'O worship the Lord.' Harl. 4142/21b (words only).
'Praise the Lord, O my soul' (full anthem). Harl. 7338 (score); Add. MSS. 17784/32b (Bass part only).
'Praise the Lord, O my soul' (verse anthem). Add. MSS. 17784/56 (Bass part only).
'Sing unto God, O ye kingdoms.' Harl. 4142/25 (words only).
'Sing we merrily' (*a* 8) ('. . . being part of his Exercise at Oxford for the Batchelour's degree in Musick in the year 1639'). PH.; Harl. 7338 (score); Add. MSS. 17784/29b (2 parts only).
'The Earth is the Lord's' (for 3 basses). Add. MSS. 17820/82 (score); Add. MSS. 17784/16b (Bass part only).
'The King shall rejoyce.' Add. MSS. 17784/51b (Bass part only).
'The Lord is onlie my support.' Add. MSS. 17784/27b (Bass part only).
'The Spirrit of Grace grant us.' Harl. 4142/28b (words only).
'Thou art my King, O God.' Add. MSS. 30478-9 (Tenor part only); Add. MSS. 17784/22b (Bass part only).
'Turn thou us.' PH.; Add. MSS. 17784/53 (Bass part only).
'What shall I render.' PH.; Harl. 4142/31b (words only).
'Ye sons of Sion' (Xmas hymn *a* 2). Ch. Ch. 365 (score).

MOTET

'O bone Jesu' (*a* 4). Add. MSS. 33235/100b (score); Ch. Ch. 14 (score)

CHANTS

Dr. Child's 'Windsor Chant' in foure parts for the Psalms of David. Add. MSS. 17784/177b (Bass part only).
Chants also in Add. MSS. 17841/45 and Add.MSS. 37027.

W. H. H. and J. M^K.

CHILDREN OF DON, THE, opera in 3 acts, words by T. E. Ellis (Lord Howard de Walden); music by Holbrooke; produced London Opera House, June 15, 1912. The first part of a trilogy of which DYLAN is the second and BRONWEN (still unperformed, 1927) the third.

It was given in German at Volksoper, Vienna, Apr. 1923.

CHILESOTTI, OSCAR (*b.* Bassano, July 12, 1848; *d.* there, June 20, 1916), one of the most eminent of Italian musical antiquaries. He was at the university of Padua, where he graduated in law, subsequently attaining high rank as an amateur violoncellist and flute-player, and a musical theorist. His life was devoted to the revival of old music, and he edited a valuable *Biblioteca di rarità musicali*, containing

(Vol. i.) Dances from books of the 16th century; (vol. ii.) Pichi's 'Balli d' arpicordo' (1621); (vol. iii.) G. Stefani's 'Affetti amorosi' (1624); and (vol. iv.) Marcello's 'Arianna.'

Mention must also be made of his edition (1881) of L. Roncall's 'Capricci armonici' (1692); of his translations of various collections of lute-music, from the tablature, and of such historical and critical work as *I nostri maestri del passato* (1882); *Di G. B. Besardo*, etc. (1886); *Sulla lettera critica di B. Marcello contro A. Lotti* (1885); *Sulla melodia popolare nel secolo xvi*; and some Italian translations from Schopenhauer. He was a regular contributor to the *Gazzetta musicale di Milano*, and occasionally wrote in the *R.M.I.*, and the publications of the Int. Mus. Gesellschaft.

M.

CHILSTON, the name of the author of a short treatise 'of musical proporcions and of theire naturis and denominacions,' written in English about the middle of the 15th century, and included in the famous manuscript from the monastery of the Holy Cross at Waltham, which once belonged to Thomas Tallis and is now among the treasures of the British Museum.[1]

Nearly the whole of this treatise is printed in Hawkins's *History of Music*, ii. 229. The writer, in common with all mediæval theorists, treats the science of music as a branch of Applied Mathematics:

'Numbers may be referred to length and breadth of earth or of other measure that belongeth to Geometry, or they may be considered as they be number in themselves and so they belong to Arithmetic, or they may be referred to length and shortness and measure of musical instruments, the which cause highness and lowness of voice, and so they belong to harmony and to craft of music.'

Harmonic progression is illustrated by the ratio of the fifth and the octave:

[1] MS. Lansdowne, 763.

'Diapason, *i.e.* proportio dupla is the most perfect accord after the unison. Between the extremities of the Diapason, *sc.* the treble and the tenor, will be given a middle that is called the Mean, the which is called Diapente, *i.e.* sesquialtera to the tenor and Diatessaron, *i.e.* sesquitercia to the treble. Therefore that manner of middle is called Medietas Armonica. Sequitur exemplum: a pipe of six foot long with his competent breadth is a tenor in diapason to a pipe of 3 foot with his competent breadth: then is a pipe of 4 foot the mean to them twain, diatessaron to the one and diapente to the other, as thou shalt find more plainly in the making of the Monochord that is called the Instrument of Plain-song.'

Immediately preceding this treatise in the manuscript is

'a litil tretise acording to the ferst tretise of the sight of Descant, and also for the sight of Counter and for the syght of the Countirtenor and of Faburdon.'

The 'ferst tretise' referred to is that of Lionel Power, which is fully described by Burney and Hawkins. We are left in doubt whether the supplementary treatise is the work of Power or of Chilston. The earlier portion of it appears in almost identical language in MS. Bodl. 842, where it is headed 'Opinio Ricardi Cutelle de London.' (See DESCANT; FAUXBOURDON.)

J. F. R. S.

CHIME. To chime is to sound a bell by swinging it the shortest arc necessary to bring the clapper into contact with the bell.

W. W. S.

CHIME-BELLS (Lat. *cymbala*; Old Eng. *cymbals, chymme-bells, clokarde*), small bells, either of the usual shape or like hemispherical gongs, arranged in order and suspended in a frame over the performer's head or placed on a stand in front of him; they were sounded by being struck with a single hammer or with two, one in each hand. The number of bells varies from 4 to 9 in a single set; in the larger sets, requiring two performers, there are as many as 13 or 15. Illustrations are frequent in English manuscripts from the 11th to the 15th centuries (see *PLATE LXIV.*); a continental 13th-century illustration (Cantigas de Santa Maria, Madrid) shows seven bells in a low frame with cords, bearing note-labels attached to their clappers and pulled by a seated musician (see *PLATE LV.* No. 3). Dunstan, who died in 988, excelled on the psaltery, lyre, and in 'touching the cymbals.' He is said to have made a set of chimes for Canterbury. These chimes were frequently used with the organ, and Aelred, Abbot of Rievaulx in the 12th century, strongly denounces not only the groaning of the bellows, and the roar of the organ pipes, but 'the noise of the cymbals.' 'Why,' he asks, 'such organs and so many cymbals in the church?' Probably the mixture-stop known as the cimball (Zimbel), found in later days in the organ, was an attempt to reproduce the brilliancy of the bell-chimes. A treatise by Theophilus, a monk of the 11th century, is printed by Rimbault in his *History of the Pianoforte*, which minutely describes the casting and tuning of these little bells. Probably owing to its bell-like effect, the name cymbal was in later times applied to the psaltery and then to the dulcimer; from the psaltery it passed to the keyed psaltery, the clavicymbal or harpsichord. F. W. G.

CHIMES. The origin of this word is obscure but is connected with the Latin 'cymbalum' and the German 'zimbel'—a small bell struck with a hammer. A chime may be described as (1) a diatonic set of bells—sometimes including the minor 7th and the augmented 4th, giving the possibilities of modulation to the dominant and sub-dominant of the key. (2) A series of musical sounds or tunes played mechanically or otherwise on such a set of bells.

Chimes were first played by hand. The different hours of the day were originally announced in the same way. More than 100 B.C. a mechanism was used in connexion with the 'clepsydra,' by which a weight was released at the hour and struck a bell. This is the earliest record of what may be called a striking clock. Many centuries afterwards a working part was invented to play quarter chimes, and later on chime tunes. Mechanical figures for striking the quarters and hours on bells were in use sometime before the introduction of clock dials, and seem to have been very popular. Before 1298 there was a clock at St. Paul's Cathedral with such figures. Decker (1609) calls them 'Paul's Jacks,' and also says 'the time of St. Paul's goes truer by 5 notes than the chimes of St. Sepulchre's Church.' The word 'jack' is derived from the Latin *jaccomarchiadus*—a man in a suit of armour. These figures were always represented as being clothed in a suit of mail.

One of the earliest records of chimes is in 1432, when 'Richard Roper was paid 20d. for mending the chymes' in Norwich Cathedral.

CHIME MECHANISM.—Chime mechanism was invented soon after the advent of weight clocks. When these clocks were first made, many devices were used to indicate the flight of time, such as performing figures, crowing cocks, etc. Peter Lightfoot, monk and abbot of Glastonbury, was the earliest maker of such clocks (1335). Soon after this they were made on the Continent. Probably the quarters of the hour were first indicated by a jack on a single bell and later by two jacks on two bells, the notes of which were a 2nd, 3rd, 4th or 5th apart. Such quarters are known as 'ding-dong' or 'ting-tang,' and from their introduction to the present time have been more extensively used than any others.

Ancient chime mechanism is very simple, and consists of a weight-driven barrel—generally made of wood—into which pins are driven on exactly the same principle as that of a musical box. A primitive substitute for the properly constructed chime barrel was the trunk of a tree into which spikes were driven. The pins in the chime barrel pull down levers, which lift

hammers with which they are connected by wires and release them, so that in their descent they fall upon and strike the bell from the outside.

In mechanical playing the bell is always struck by hammers which operate on the outside surface of the bell and in this country play melody only. In such a mechanism the barrel has to do all the work. It was satisfactory so long as the requirements were merely a regular succession of notes of equal length played at a moderate speed—a hymn tune or the like—but there are few melodies of real interest which come within these limits, particularly as regards secular tunes, consequently more elaborate airs, consisting of mixed long and short note values—groups of short notes in quick succession, etc.—were set on the chime barrel. These unequal demands made the speed of the barrel irregular, with the result that one bar was played at a quicker or slower rate than another. This obliterated everything as to correct time, producing a most unsatisfactory musical effect, and in many instances a grotesque performance. One tune above all others calculated to show the defects of such a mechanism is 'Rule, Britannia,' which never should be set upon a barrel controlled by the ancient mechanism.

The first important improvement made on the old mechanism was by Messrs. Lund & Blockley. The general principles were good but certain parts were too weak to bear the strain of the heavy driving weight used. Further improvements were made by Messrs. Gillett of Croydon, who installed their first machine at Boston Parish Church in 1868. Its particular advantage is in the division of the mechanical operations. A separate movement raises the hammer levers into action position immediately after they have fallen. When raised, they are prevented from falling by a spring trigger which can be released by the slightest pressure. The only work the barrel has to do is to release the triggers, so that the demand on it is reduced to a minimum, but the actual power is the same and derived from one source—the driving weight.

The chime machine of Messrs. Smith & Sons, of Derby, differs from Messrs. Gillett's machine principally in the subdivision of the driving power. Each hammer or set of hammers has its own special mechanism driven by an independent weight, instead of the power being derived from one source. These weights are so adjusted that the requirements are amply provided for whatever demands are made, thus securing accurate time in the playing—a most important consideration.

Chime Tunes.—It is impossible to fix the date when chime tunes were first introduced. The earliest mention of any tune played by chimes is in the will of John Baret (1463), who in addition to leaving money to repair the chimes of the Parish Church of Bury, Suffolk, expressed a wish that they should play 'Requiem eternam' at stated times to his memory. In Abbot Parker's Register there is a copy of an agreement between the Abbot of Gloucester and Thomas Loveday, dated 1572, in which the latter

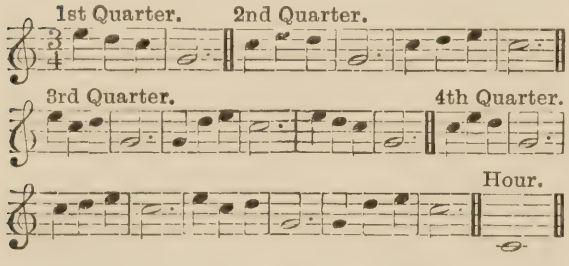
'hath covenaunted and Bargaynd with the Abbot to repayre the Chyme gonge uppon eight belles and upon two ympnes that is to say "Christe Redemptor Omnium" and "Chorus horæ Jerusalem," well-tuynable and wokemanly by the Feast of All Saynts next ensuinge for which the said Abbot promyseth to pay the seid Thomas Loveday four mares sterlinge at the fynisshement of his said repayre.'

In 1553 an indenture between the King's four 'missioners' and the Bishop of Worcester and Gloucester shows that 'the said Commission have redelyvered unto the Dean and Chapter one Great Bell whereon the Clock strykithe and eight other bells whereupon the Chyme goithe.' Chime tunes gradually increased in popularity until in the 18th century every church of importance possessed a clock with quarter chimes and chime tunes.

In selecting tunes for chimes, many repeated notes, long successions of quick notes or very long notes should be avoided. No tune should ever be attempted on a smaller number of bells than it demands for its correct rendering. The mutilation of well-known melodies is to be greatly deprecated, and it is difficult to understand how people will listen a whole lifetime to these distortions without complaint. The National Anthem has been burlesqued more than any other well-known tune.

Continental Method.—The chime mechanism used on the Continent is exactly the same in principle as that originally used in this country but is constructed on a much larger scale, having so much more to do in playing long pieces of music in three or more parts. The largest chime barrel in the world is that of Bruges, the reputed weight of which is over 8 tons. It is made of gun metal and is pierced with 30,500 holes, into which the studs or catches are fixed. As the barrel is a permanent part of the mechanism, the music played cannot be altered except by a rearrangement of the studs, which takes some three or four days to do. For this reason the same music is heard for a whole year, and in some instances for a longer time, before it is changed. At Malines and Bruges, according to the music set on the barrel, anything from 60 to 80,000 notes are played every 24 hours. The driving weight required is over $1\frac{1}{4}$ tons.

The music for the automatic carillon is just as elaborate as that played by the carillonneur, and requires much the same consideration as to its most effective arrangement. Frequently the melody is played throughout in octaves, and this gives greater definition to the most important part.



Quarter Chimes.—In England the uniform plan of the music for quarter chimes is to increase the length of the chime as the hour proceeds, *e.g.* Westminster Quarters, 4, 8, 12 and 16 notes. This is not followed to any great extent on the Continent, however; those of the City Hall of Copenhagen, put in twenty-one years ago, are on these lines, showing the influence of our famous quarter chimes. Taking two of the most famous continental chimes, viz. those of Malines and Bruges, we find that: (1) the hour is divided into eight parts, the quarters being subdivided into half-quarters; (2) the half-quarter consists of a short, quick flourish of two bars in length; (3) the quarters before and after the hour are comparatively short and of equal length, about four times as long as the half-quarters; (4) the half-hour quarter is four times as long as the previous quarter; (5) the hour is twice as long as the half-hour; (6) the hour to come is struck after the half-hour quarter on a smaller bell than that used for the hour strike.

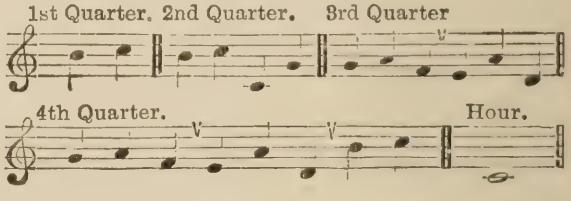
The following are our best known quarter chimes:

(1) Cambridge Quarters (commonly called Westminster Quarters).—The mechanism for playing these quarters was first erected in St. Mary's Church (the Great), Cambridge, 1793–94.

In their proper form (a peal of 10 bells would provide the requisite notes) the hour bell should be the octave of the third bell of the quarter chimes. They are frequently played on 6- or 8-bell peals; but musically these are very unsatisfactory, as in both, the hour bell—Nos. 6 and 8 respectively—leaves an incomplete effect on the ear.

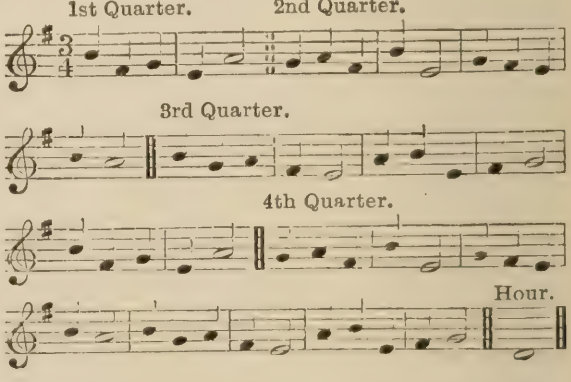
The notes of the quarter chimes are:

The history of these quarter chimes is interesting, although the statements regarding it are the hearsay evidence of Amps of Cambridge, who related the particulars in his correspondence with Dr. Raven in 1861. Dr. Raven's *Church Bells of Cambridgeshire*, pp. 105 and 106, states:



'About the time of these improvements Dr. Jowett was Regius Professor of Laws and Dr. Randall Regius Professor of Music, and Crotch and Pratt, then mere lads, were his pupils. Dr. Jowett was an expert mechanician. . . . He appears to have been consulted by the authorities of the University and to have taken Crotch into his counsels. The latter may be credited with the idea of taking the phrase of four notes from the fifth bar of the opening symphony of Handel's "I know that my Redeemer liveth" and, by a system of variations not unworthy of Fabian Stedman, expanding it "into this musical chime." It was said by Pratt that when the chimes were first heard they were thought so strange that they were nicknamed "Jowett's Hornpipe." Very few except those who had known Crotch were aware that he had anything to do with their composition.'

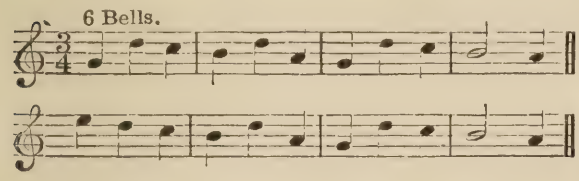
It is doubtful whether the initial phrase was borrowed from Handel, but although Crotch had left Cambridge some five years before the chimes were put up, it is highly probable that he was responsible for the arrangement and variation of the notes which constitute the now famous quarter chimes, which were in use for over half a century before they attracted any attention.



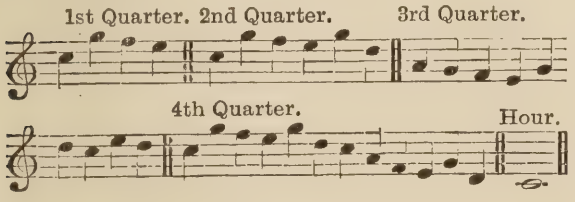
They were first copied at the Royal Exchange, London, in 1845. The groups of four notes were not changed, but the sequence was altered, and the arrangement was no improvement on the original. In 1859–60 they were copied at the Houses of Parliament, and it was after this that they became popularly known as 'Westminster Quarters.'

'Cambridge Chimes,' so called, on domestic clocks are frequently met with. They are merely ringers' changes on 8 bells, and are often exactly the same as those which do duty for 'Whittington Chimes.'

(2) Magdalen Chimes, Oxford, erected in 1713, unique and fascinating on account of their indefinite rhythmic progression.

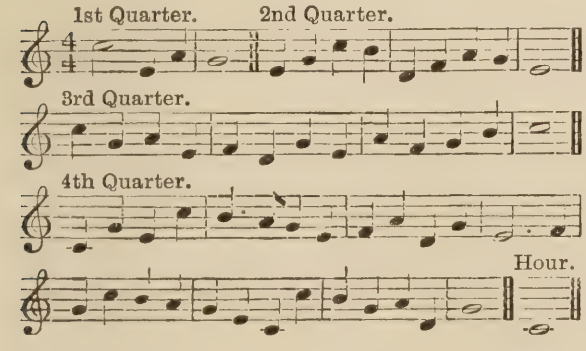


(3) Carfax Chimes, Oxford, arranged by John Smith, clockmaker, Derby. They were first erected at Freshwater in 1895 and called Tennyson Chimes; copied at Oxford, 1898; also at Uppingham and Maralin; and now known as Carfax Chimes.

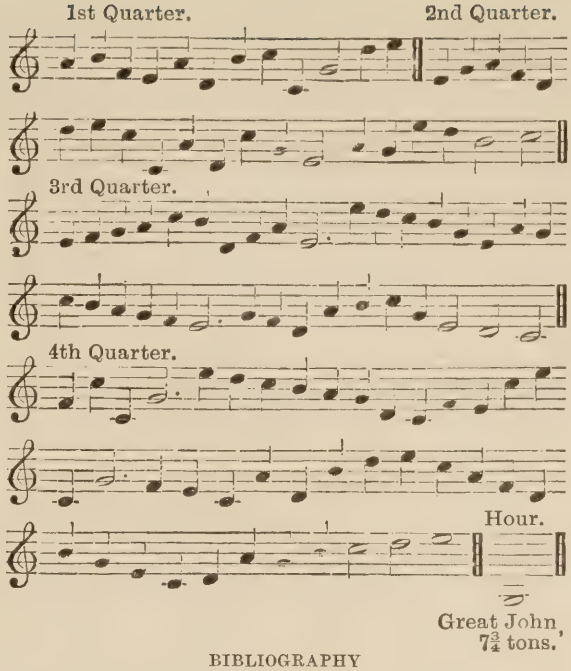


(4) Whittington Chimes.—In their oldest form these chimes were played on six bells and based on the ancient tune, 'Turn again,

Whittington,' to be found in D'Urfey's *Wit and Mirth; or Pills to Purge Melancholy:*



The earliest reference to the tune is in Shirley's 'Constant Maid,' Act II. Scene ii. 'Six bells in every steeple, And let them all go to the city tune, "Turn again, Whittington"' (1640). It is with Bow Church that the Whittington tradition is connected. If the chime was played by the clock, it must have been in existence before the great fire of 1666, as the six-bell tune has not been played since that date. In 1905 Sir Charles Villiers Stanford wrote a new set of quarter chimes based on the old tune and using the *twelve* bells now in the tower:



Whittington Chimes, commonly so called, are to be found exclusively on domestic clocks and vary considerably as to the notes played. The different 'runs' are merely ringers' changes on a specified number of bells.

(5) Guildford Chimes, composed by George Wilkins, organist of St. Nicholas Church, Guildford, were first set up in Holy Trinity Church, Guildford, 1843; copied at Chard, Bournville, Irthlingborough, Macclesfield, Northleach and Stratton.

(6) Beverley Minster Chimes, arranged by Rev. Canon Nolloth, D.D., in such a way that the different length and ending of each strain should make it easy to distinguish the particular quarter it indicates. The full compass of the ten bells is employed and anything like a tune avoided. They are the longest quarter chimes in the British Isles and were put up in 1902.

CHINESE PAVILION (Chinese Crescent, Chapeau Chinois, Turkish Crescent, Jingling Johnny). This instrument consists of a pole with several transverse brass plates of some crescent or fantastic form, and generally terminating at top with a conical pavilion or hat, whence its several names. On all these parts a number of very small bells are hung, which the performer causes to jingle, by shaking the instrument, held vertically, up and down. (See *PLATE XXX.* No. 4.) It was used in military bands. (See Glockenspiel.)

V. de P.

CHINZER, Giovanni (mid 18th cent.), a German-Swiss (?) musician, who appears to have written several operas in Italy between 1735 and 1742. In about 1750 he settled in Paris, where he brought out several books of trio-sonatas, sonatas for violin as well as flute or violin and bass, violin duets, a Mass, Dixit Dominus and arias. He appears to be identical with the Sigr. Chinzer who was in London *c.* 1796, some of whose violin duets Preston published at that time (*Fétis*; *Q.-L.*).

CHIPP, Edmund Thomas, Mus.D. Cantab., (*b.* London, Christmas Day, 1823; *d.* Nice, Dec. 17, 1886), organist, eldest son of T. P. Chipp (well known as the player of the 'Tower drums'), was a chorister in the Chapel Royal, St. James's.

He studied the violin under Nadaud and Tolbecque, and was in the Queen's private band from 1843–45; became known as an organist of some repute, from his holding the position of honorary organist at Albany Chapel, Regent's Park, 1843–46. In 1847 he succeeded Dr. Gauntlett at St. Olave's, Southwark, a

position he resigned on being elected organist to St. Mary-at-Hill, Eastcheap, in 1852. On W. T. Best's retirement from the Panopticon in 1855, Chipp was chosen to succeed him as organist, and retained the appointment until the close of that institution. He was invited to become organist to Holy Trinity, Paddington, where he remained from 1856 until his appointment asorganist of the Ulster Hall, Belfast, in 1862. He took the degree of Mus.B. at Cambridge in 1859, and of Mus.D. in 1860. In 1866 he was appointed organist to the Kinnaird Hall, Dundee, and also to St. Paul's Church, Edinburgh. In November of that year both appointments had to be resigned, as he was appointed organist and Magister Choristarum to Ely Cathedral.

The works produced by this composer are the oratorio of 'Job'; 'Naomi, a Sacred Idyl'; much church music; a book of 24 sketches for the organ, and various minor works, songs, etc. M.

CHIROPLAST, see LOGIER, Johann Bernard.

CHITARRONE (Ital., augmentative of *chitarra*), a theorbo, or double-necked lute of great length, with wire strings and two sets of tuning-pegs, the lower set having twelve, and the higher eight strings attached; the unusual extension in length affording greater development to the bass of the instrument. (See *PLATE XLV.* No. 5.)

The Italian chitarra was not strung with catgut like the Spanish guitar, but with wire, like the German cither and the old English cithern. The chitarrone, as implied by the suffix, was a large chitarra; and the Italian instrument called by this name is a theorbo with a shorter neck, strung with wire, and played with a plectrum. In Italy the instrument figured here is called Arciliuto; but the German authorities, Praetorius (1619) and Baron (1727), call it Chitarrone. Both the chitarrone and the archlute were employed in Italy in the 16th century with the clavicembalo and other instruments to accompany the voice, forming a band, the nutty, slightly bitter timbre of which must have been very sympathetic and agreeable. Lists of these earliest orchestras are extant, notably one that was got together for the performance of Monteverdi's 'Orfeo' in 1607, in which appear two chitarroni. A very fine specimen of this interesting instrument is in the South Kensington Museum. The length of it is 5 feet 4 inches. It is inscribed inside 'Andrew Taus in Siena, 1621.' (See ARCHLUTE, CITHER, LUTE, THEORBO.) A. J. H.

CHLADNI, ERNST FLORENS FRIEDRICH (*b.* Wittemberg, Nov. 30, 1756; *d.* Breslau, Apr. 3, 1827), has been called the father of modern acoustics.

His father was a stern educator, and his youth was consequently spent in close application to the study of a variety of subjects, of which geography seems to have been the chief, and music very subordinate, for he did not begin to study the latter consistently till he was nineteen. At the college of Grimma he studied law and medicine, apparently uncertain to which to apply himself. At Leipzig in 1782 he was made doctor of laws, but soon abandoned that position and the study of jurisprudence to apply himself exclusively to physical science. His attention was soon drawn to the imperfection of the knowledge of the laws of sound, and he determined to devote himself to their investigation. His first researches on the vibrations of round and square plates, bells and rings, were published as early as 1787. It was in connexion with these that he invented the beautiful and famous experiment for showing the modes of vibration of metal or glass plates, by scattering sand over the surface.

His researches extended over a considerable part of the domain of acoustics; embracing, besides those mentioned above, investigations on longitudinal vibrations, on the notes of pipes when filled with different gases; on the theory of consonance and dissonance; the acoustical properties of concert-rooms; and the distribution of musical instruments into classes. With shortsightedness characteristic at once of the greatest and least of mortals, he thought the noblest thing to do would be to invent some new instrument on a principle before unknown. To this object he himself said that he devoted more time, trouble and money than to his great scientific researches. The result was first an instrument which he called Euphon, which consisted chiefly of small cylinders of glass of the thickness of a pen, which were set in vibration by the moistened finger. This he afterwards developed into an instrument which he called the Clavi-cylinder, and looked upon as the practical application of his discoveries, and the glory of his life. In form it was like a square pianoforte, and comprised four and a half octaves. The sound was produced by friction from a single glass cylinder connected with internal machinery, by which the differences of the notes were produced. Its advantages were said to be the power of prolonging sound and obtaining 'crescendo' and 'diminuendo' at pleasure. After 1802, when he published his *Treatise on Acoustics*, he travelled in various parts of Europe taking his clavi-cylinder with him, and lecturing upon it and on acoustics. In Paris, in 1808, he was introduced to Napoleon by Laplace. The Emperor with characteristic appreciation of his importance gave him 6000 francs, and desired him to have his great work translated into French, for the benefit of the nation. This work he undertook himself, and in 1809 it was published with a short autobiography prefixed,

and dedicated to Napoleon. After this he resumed his travels and lectures for some years. His labours in science, mostly but not exclusively devoted to acoustics, continued up to the year of his death, which happened suddenly, from apoplexy.

The following is a list of his more important works in connexion with acoustics, in the order of their appearance:

1. Entdeckungen über die Theorie des Klanges. 1787.
2. Über die Längentöne einer Saite. 1792.
3. Über die Longitudinalschwingungen der Saiten und Stäbe. 1796.
4. Über drehende Schwingungen eines Stabes.
5. Beiträge zur Beförderung eines bessern Vortrags des Klanglehre. 1797.
6. Über die Töne einer Pfeife in verschiedenen Gasarten.
7. Eine neue Art die Geschwindigkeit der Schwingungen bei einem jeden Töne durch den Augeschein zu bestimmen. 1800.
8. Über die wahre Ursache des Consonirens und Dissonirens. 1801 (?).
9. Nachricht von dem Clavicylinder, einen neugefundenen Instrumente. 1800 (?).
10. Zweite Nachricht von dem Clavicylinder, und einem neuen Baue desselben. 1837 (?).
11. Die Akustik. Breitkopf und Härtel. 1802.
12. Neue Beiträge zur Akustik. *Ib.* 1817.
13. Beiträge zur praktischen Akustik, etc. (with remarks on the construction of instruments). *Ib.* 1821.
14. Kurze Übersicht der Schall- und Klanglehre, etc. Schott, 1827.

C. H. H. P.

CHLUBNA, Osvald (*b.* Brno, 1893), a Moravian composer, pupil of Janáček for composition, whose works are making their way in his own country. He holds a post in the Conservatoire at Brno. His works include: 'Píseň mé touhy' (A Song of Yearning), for orchestra; 'Tiché usmíření' (Quiet Reconciliation); 'Šumařovo dítě' (The Fiddler's Child), for voices and orchestra; 'Pomsta Catullova' (Catullus's Revenge), opera, the libretto from Vrchlický.

R. N.

CHOICE OF HERCULES, THE, a 'musical interlude' for solos and chorus; words from Spenser's 'Polymetis'; music by Handel, partly adapted from his 'Alcestis.' Autograph in Royal Library (B.M.)—begun June 28, 1750, finished July 5, 1750; but last chorus added afterwards. Produced at Covent Garden, Mar. 1, 1751. G.

CHOIR, sometimes spelt Quire. (1) The part of the church east of the nave, in which the services are celebrated. The term is now generally restricted in England to cathedrals and abbey churches, 'chancel' being used for the same part of a parish church.

(2) The body of singers or other ministers occupying the choir and participating in the services of the church.

(3) Any body of singers, not necessarily ecclesiastical. In this sense the term is synonymous with 'chorus.'

(4) Divisions of a body of singers into sections, as when a work is written for 2, 3, 4 or more choirs.

(5) Divisions of the orchestra according to instrumental timbre, as strings, wood-wind and brass. This last use of the term choir is more frequent in America than in England. C.

CHOIR ORGAN, the name given to the small organ which, in cathedral and other churches, used to hang suspended in front of, and below, the larger or great organ. It derived its name from its employment to accompany the vocal choir in the chief portions of the choral service except the parts marked 'Full,' and the Glorias, which were usually supported by the 'Loud Organ' as it was sometimes called. The choir organ was generally of very sprightly tone, however small it might be; one of three stops only not unfrequently consisting of the following combination — Stopped Diapason, Principal, Fifteenth. As a rule a good choir organ should have a sufficient proportion of string and reed-toned stops to give variety, colour and contrast in accompanying voices; and for use in solo-playing as opposed to the reedy tone of the swell organ and the powerful tone of the great.

Father Smith's choir organ at St. Paul's Cathedral (1694–97), the most complete he ever made, had the following eight stops: Stopped Diapason (Wood), Principal, Flute (Metal), Gemshorn Twelfth, Fifteenth, Mixture III ranks, Cremona (through), Vox humana (through).

In modern instruments this organ is much enlarged, and is often enclosed in a swell-box. There is generally a better balance of tone than was formerly the case, and the octave and fifteenth are much less fierce and assertive in tone. Occasionally a Tuba is played from the choir manual, so as to leave the great and swell available for its accompaniment.

E. J. H.; addns. T. E.

CHOLLET, Jean Baptiste Marie (*b.* Paris, May 20, 1798; *d.* Nemours, Jan. 9, 1892), a popular opéra-comique tenor, director of the theatre at Bordeaux, maître de chapelle to the King of Holland, from 1804–16 was taught singing and the violin at the Conservatoire, and in 1814 gained a solfeggio prize.

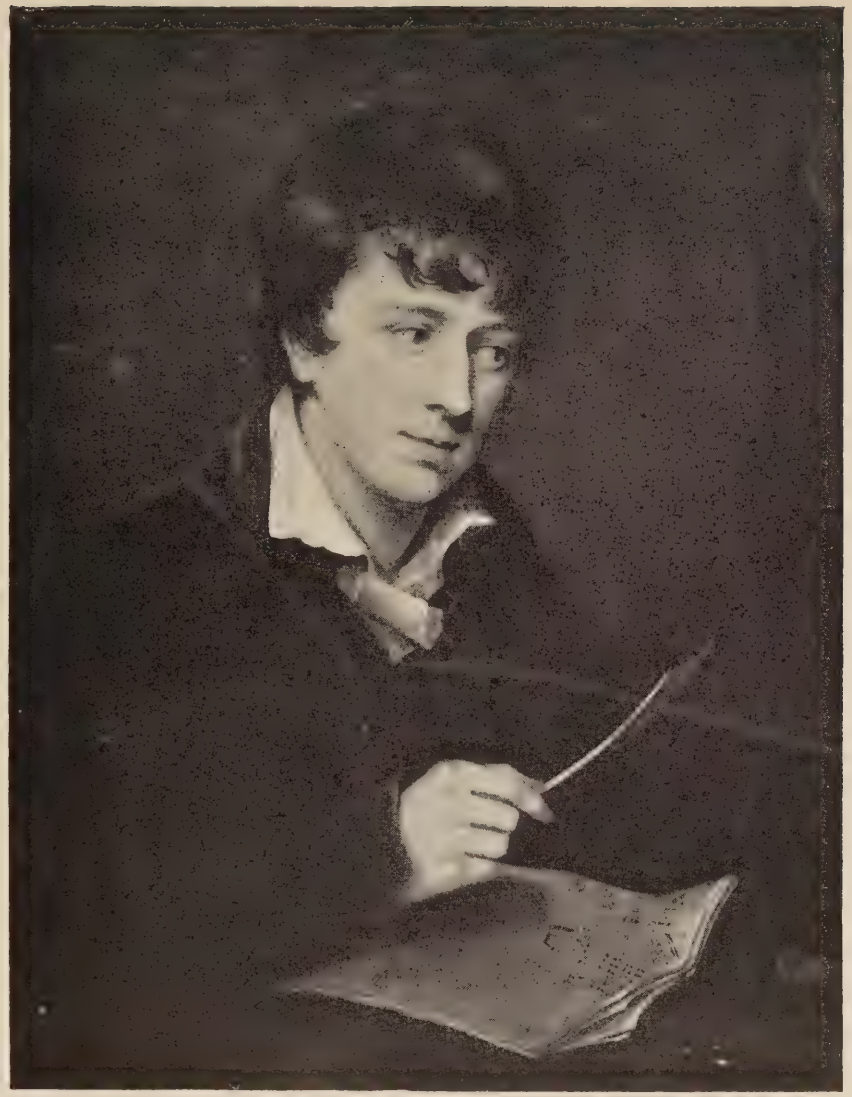
In 1815, the Conservatoire having been closed owing to political events, he became chorus singer at the Opéra and the Italian and Feydeau Theatres. From 1818–25 he played in the provinces, under the name Dôme-Chollet, the quasi-baritone parts played formerly by Martin and others. In 1825 he played both at Brussels and the Opéra-Comique, Paris, and obtained in 1826 an engagement at the latter, where, having adopted the tenor repertory, he remained until 1832. His principal new parts were in operas of Hérold and Auber, viz. Henri ('Marie'), Aug. 12, 1826, in which he made his first success by his singing of the song 'Une Robe légère'; Fritz, in 'La Fiancée,' Jan. 10, 1829; 'Fra Diavolo,' Jan. 28, 1830, and 'Zampa,' May 3, 1831. He then sang with great success at Brussels, The Hague, etc. From 1835–47 he was again at the Opéra-Comique, being most successful in new operas of Hérold ('L'Éclair') and Adam ('Postillon de Longjumeau'), etc. He directed the Hague Theatre for a time. In 1850 he played with Mitchell's company at St. James's Theatre, viz.

as Lejoyeux ('Val d'Andorre'), in which he made his début, Jan. 4, and in some of his well-known parts. He was well received, on account of his easy, gentlemanly and vivacious acting, and his command both of humour and pathos, which atoned for loss of voice. From 1852–1854 he sang at the Lyrique without success, and soon after retired. His farewell benefit took place at the Opéra-Comique, Apr. 24, 1872, when Roger reappeared in a scene from 'La Dame blanche,' and Chollet himself as Barnabé in the celebrated duo from Paer's 'Maître de chapelle' with Mlle. Ducasse, the favourite, then 'Dugazon' at the above theatre. A. C.

CHOPIN, Frédéric François (*b.* Zelazowa Wola, near Warsaw, Feb. 22, 1810[1]; *d.* Paris, Oct. 17, 1849), the composer who endowed the modern pianoforte with a great literature of its own, was the son of Nicholas Chopin (*b.* Nancy, 1770), who came to Warsaw about 1787 as a book-keeper in a manufactory of snuff. The business collapsed during the political troubles of the close of the 18th century. Nicholas became a captain in the National Guard, and on retiring, a teacher of French. In this capacity, while acting as tutor to the son of Countess Skarbek, he made the acquaintance of Justine Kryzanowska, whom he married in 1806. Three daughters and one son were born to the Chopins, and the father was appointed professor of French in the newly founded Lyceum of Warsaw. He held similar appointments in the school of artillery and engineering from 1812, and in the military preparatory school from 1815, besides keeping a boarding-school of his own.

The general education which the composer received seems to have been of a strangely superficial order, considering his father's profession. A fair amount of French, a little Latin, and mathematics and geography are mentioned; but in music he had the advantage of learning from a good all-round musician, Adalbert Zywny, a Bohemian, who was a violinist, pianist and composer, and from whom he learnt with such success that he played a concerto by Gyrowetz in public on Feb. 24, 1818, before he was 9 years old. He was called a second Mozart, and became the object of that female adoration, one instance of which had an important effect on the circumstances of his later life. In 1820, Mme. Catalani (*q.v.*) heard him play, and gave him a watch with an inscription. He had already attempted composition, and dedicated a march to the Russian Grand Duke Constantine, who had it scored for a military band. The lessons with Zywny were continued until Chopin was 12 years old, and in 1824 he entered the Lyceum. About the same time his father sent him to the head of the Warsaw Conservatorium, Joseph Elsner, for instruction in harmony and counterpoint. According to Liszt,

'Elsner taught Chopin those things that are the most difficult to learn and most rarely known; to be exacting to one's self, and to value the advantages that are only obtained by dint of patience and labour.'



There is evidence that while at the Lyceum, whatever may have been the shortcomings of his general education, he was a lively boy, so fond of private theatricals as to call from an eminent Polish actor the opinion that he ought to have gone on the stage. This opinion was endorsed in after years by some French professional actors, and by John Parry, who met Chopin at Chorley's house in 1848.[2] He collaborated with his youngest sister in writing a one-act comedy, 'The Mistake; or the Pretended Rogue.' In 1825 he played again in public in the first movement of a concerto by Moscheles; he also improvised upon one of the instruments invented about that time, which aimed at uniting the harmonium with the pianoforte. (See Aeolodion.)

This year, 1825, saw the publication of Chopin's op. 1, the first rondo, in C minor; but he remained at the Lyceum until 1827, and it seems probable that his efforts to do his school work without diminishing the amount of time he wished to devote to his music, acted detrimentally on his health, and perhaps laid the foundations of that delicacy which has been so absurdly exaggerated. On leaving the school he was allowed to devote himself exclusively to music, and in the course of certain short excursions, such as that to Reinerz in Silesia, and to the country house of a member of the Skarbek family, he appeared as a pianist. Prince Radziwill, Governor of Posen, took great interest in the boy, but there is no foundation for the assertion made by Liszt, that Radziwill paid for Chopin's education. About this time, too, he wrote the variations on 'La ci darem,' op. 2, and the trio, op. 8, for piano and strings; the other works of the period were published posthumously, such as the rondo for two pianos, the sonata, op. 4, the E minor nocturne, and the polonaises in G minor, D minor and B flat.

In 1828 Chopin got his first sight of the great world. He was taken by a friend of his father, Professor Jarocki, to Berlin, where a congress of scientists under Alexander von Humboldt was to be held. In Berlin Chopin caught sight of several musical celebrities, among others, Spontini, Zelter and Mendelssohn, but seems to have been too shy to introduce himself. He heard a few operas, such as Spontini's 'Cortez,' and the 'Matrimonio segreto' of Cimarosa, and was much impressed by Handel's 'Ode on St. Cecilia's Day,' which was given at the Singakademie. After some months spent at home in Warsaw, during

[1] The discovery of the certificate establishes this fact, which was previously questioned, in spite of the evidence of the tombstone.

[2] This was told to the writer by Chorley in 1864.

JOHN FIELD

From a painting in the possession of Messrs. Collard & Collard

CHOPIN

From a drawing by F. X. Winterhalter in the possession of H. Davan Wetton

which he heard Hummel and Paganini, he went, in July 1829, to Vienna, where he found that Haslinger was about to publish his 'La ci darem' variations. Count Gallenberg and others urged him to give a concert, and this took place on Aug. 11, 1829, a time when the fashionable world was away from Vienna. The composer was announced to play his variations, and the 'Krakowiak,' both for piano and orchestra. The parts of the latter piece were so illegible that it had to be withdrawn, and he improvised in its stead, taking as his theme a subject from 'La Dame blanche,' and a Polish tune. His success was great, and another concert, at which both the variations and the 'Krakowiak' were given, took place one week afterwards, on Aug. 18. The criticisms on his playing are full of interest; one writer noticed as a defect 'the non-observance of the indication by accent of the commencement of musical phrases,' and there are allusions to his 'precision and accuracy,' as well as to the fact that his tone was considered by some, Moscheles for instance, as insufficient for a large room.

We gather from confidential letters to a bosom friend and schoolfellow named Woyciechowski,[1] that about this time Chopin was (or believed himself) in love with a pupil of the Warsaw Conservatorium, Constantia Gladkowska, whose attractions inspired some of the compositions of the period, notably the adagio of the concerto in F minor, and the valse in D flat, op. 70, No. 3 (posthumously published).

He was now to set forth upon the regular career of a travelling virtuoso, and a farewell concert was given on Mar. 17, 1830. The interest taken in him was so great that every seat was occupied, and a second, and even a third concert had to be given, in spite of the fact that at the first he and the audience were not in perfect sympathy. It is significant of the state of musical taste in Warsaw that on each of the three occasions the concerto was divided; on the first occasion the allegro from the F minor concerto was separated from the remainder by a divertissement for the French horn; and at the second concert by a violin solo. At the third, which took place on Oct. 2, 1830, the E minor concerto was subjected to similar treatment, and on each of the three occasions Chopin played potpourris on Polish tunes, either written down beforehand or extemporised. At the second the 'Krakowiak' was also given, and the profits were about £125. At the third Mlle. Gladkowska was one of the singers, so it was no wonder that the concert was the most successful of the three in point of Chopin's own performances. He left Warsaw on Nov. 1, 1830, and went to Breslau, Dresden, Prague, Vienna, Munich and Stuttgart, on the way to Paris. Besides the works already enumerated, his compositions now included the polonaise in E flat, with orchestra, the introduction and polonaise for piano and violoncello (in its first form), and a number of études, nocturnes, valses, polonaises and mazurkas. The tour, from a financial point of view, was not a success; Haslinger, in Vienna, found it too expensive to publish good music, and so laid everything but waltzes aside. Some of Chopin's letters from Vienna contain amusing remarks on those whom he met. Thalberg 'takes tenths as easily as I do octaves, and wears studs with diamonds'; 'Moscheles does not at all astonish me'; Czerny 'has again arranged an overture for eight pianos and sixteen performers, and seems to be very happy over it,' and so on. In July 1831 he was obliged to wait at Munich till money was sent him from home; he gave a concert, at which he played the E minor concerto, and the fantasia on Polish airs.

At Stuttgart he heard of the taking of Warsaw by the Russians, an event which is said to have inspired the wild despair of the study in C minor, op. 10, No. 12.

Although Chopin arrived in Paris in a mood of despondency and rather short of money, the Parisians received him all the more readily because he was a Pole, and a wave of sympathy with the troubles of Poland was just then passing over the French nation. With his clear-cut profile, high forehead, thin lips, tender brown eyes, delicately formed hands and pale complexion, it was little wonder that he rapidly made friends among the most important musical people of Paris. Of the pianists of the time, he chiefly admired Kalkbrenner for his technique, and even went so far as to join some of his classes! Although much of the information that is forthcoming as to Chopin's first impressions of Paris must be considered apocryphal, we know from his letters that he was not slow in realising the kind of work which lay before him to do, and that this was something else than the career of a mere virtuoso-pianist. On all hands it is admitted that he did not excel in the interpretation of music other than his own, and that his technique was less certain than that of some of his contemporaries.

'Perhaps I cannot create a new school, however much I may wish to do so, because I do not know the old one; but I certainly *do* know that my tone-poems have some individuality in them, and that I always strive to advance. . . . So much is clear to me, I shall never become a Kalkbrenner; he will not be able to alter my perhaps daring but noble resolve —to create a new era in art.'

Among Chopin's earliest friends in Paris were Cherubini, Bellini, Berlioz, Meyerbeer, Liszt, Hiller, Osborne, among composers, and Baillot, Brod, Franchomme and Pixis, among executive artists. His first concert took place on Feb. 26, 1832. He played the F minor concerto and the 'La ci darem' variations,

[1] Quoted in Karasowski's *Life*, vol. ii.

besides taking part with Kalkbrenner in a duet for two pianos by the latter, accompanied on four other pianos. Hiller tells us that Mendelssohn, who was present, 'applauded triumphantly.' Another appearance was made by Chopin on May 20, 1832, at a charity concert given by the Prince de la Moskowa. In another letter he touches upon the sordid little tragedy which must have been the lot of so many artists at various times, the need of keeping up the appearance of a larger income than was actually existing, in order to secure the patronage of the fashionable world, and to pose as a successful teacher. He speaks of having many pupils belonging to the Conservatoire, as well as private pupils of Moscheles, Herz and Kalkbrenner, and says that they profess to regard him as the equal of Field (!). When John Field came to Paris, in the winter of 1832–33, he and Chopin had not very much personal sympathy, in spite of the undoubted influence which Field's characteristics as a composer had exercised upon the younger man. Field spoke of Chopin as 'un talent de chambre de malade.' In the same winter Chopin took part with Hiller and Liszt in a performance of Bach's concerto for three harpsichords (played on pianos), in the intervals of a theatrical performance for the benefit of Miss Smithson, afterwards the wife of Berlioz. Both Berlioz and Liszt were not quite sympathetic to Chopin, and their excesses of style seemed to him ridiculous. As early as 1833, it is said [1] that Chopin declared that Berlioz's music was such as to justify any man who chose to break with him,—an unusually violent expression of opinion for Chopin. It was not till after Chopin's death that Berlioz uttered his famous sneer, 'Il se mourait toute sa vie.'

Meanwhile Chopin's music was steadily making its way, and between 1833 and 1847 every year saw the publication of some of his works, so that it must have been worth the publishers' while, financially speaking, to bring them out. The vogue of his music was started in Germany with Schumann's article on 'op. 2,' and the often-quoted words, 'Hats off, gentlemen! a genius!'

After the winter of 1834–35 Chopin's appearances as a virtuoso were very rare; three quasi-private concerts were given in 1841, 1842 and 1848, but they were distinctly for the sake of bringing forward new works, not in order to exhibit the composer's ability as a pianist. On Dec. 7, 1834, he played an andante (probably that which stands as the introduction to the polonaise in E flat (at a concert given by Berlioz in the Conservatoire, and on Christmas Day of the same year he played with Liszt Moscheles' 'grand duo,' op. 47, and a duet on two pianos written by Liszt on a theme of Mendelssohn's (the MS. of which has disappeared). Chopin's retirement from the public career of a pianist seems to date from Apr. 1835, and a performance of his E minor concerto, at which he met with a lukewarm reception from the public. His actual last appearance in public (not including the quasi-private concerts already referred to) was at Habeneck's benefit at the Conservatoire, where he played the andante and polonaise, op. 22. In the summer of the same year he met his parents at Carlsbad, and afterwards visited Dresden and Leipzig, where Mendelssohn introduced him to Schumann, and he and Clara Wieck played to each other; she played her future husband's sonata in F sharp minor, op. 11, and he 'sang' (as Schumann says) his nocturne in E flat, op. 9. Mendelssohn gives an amusing account [2] of an evening during which he played 'St. Paul' to Chopin, the two parts of which were separated by Chopin's performance of some new études and a concerto movement: 'It was just as if a Cherokee and a Kaffir had met and conversed.' With Schumann's opinions of Chopin every musical reader is familiar.

In the summer of 1836 a similar journey was made to Marienbad, Dresden and Leipzig, the first place being visited with the object of meeting again a certain Mlle. Maria, daughter of Count Wodzinski, whose three sons had been at the school kept by Nicholas Chopin. Chopin proposed to, and was rejected by, the young lady, who subsequently made a better match in a worldly point of view. The most permanent trace of the affair is in a 'tempo di valse' in F minor, op. 69, No. 1, which is dated 'Dresden, Sept. 1835, pour Mlle. Marie'; the lady cherished the autograph as 'L'Adieu.'

The first of Chopin's visits to England took place in July 1837; his object was primarily to consult a doctor, and to arrange certain business matters, the latter resulting in the publication of his works by the firm of Wessel & Co. (later Ashdown & Parry, now Edwin Ashdown). Chopin played at the house of James Broadwood in Bryanston Square, but his delicate state of health was one of the obstacles to his visiting or receiving visits. It was about this time that the first unmistakable signs of pulmonary disease began to show themselves.

Chopin used to say that his life consisted of an episode without a beginning and with a sad end. He referred to the intimacy with Georges Sand (Mme. Dudevant), the history of which has been related by various persons, with greater or less opportunities for ascertaining the truth, but, as regards a good many of them, with very incomplete success, so far as absolute veracity is concerned. The acquaintance began, at Liszt's instigation, early in 1837, when Chopin visited the novelist at Nohant.

[1] Franchomme is the witness.

[2] *Letters to his Family*, Oct. 8, 1835.

They planned a sojourn in the island of Majorca, where Chopin was to recover his health in the company of his friend. He borrowed money for his expenses, and the party, consisting of Mme. Sand, her son, daughter and maid, and Chopin, started by Port-Vendres and Barcelona in Nov. 1838 for Palma, where for a time everything was *couleur de rose*. After some time an exceptionally wet season set in, and Chopin was miserable, his illness increasing on him to such an extent that the landlord insisted on their quitting his house, and paying for the process of disinfecting it. To add to the other troubles, his piano was seized by the Custom-house officers, and not released till Feb. 1839. The various accounts of the sojourn in Majorca are embodied, in a more or less credible way, in George Sand's *Un Hiver à Majorque* and *Histoire de ma vie*; the other side of the picture is given, after the quarrel and separation, in *Lucrezia Floriani* (published in 1847), where Chopin figures as Prince Karol—a high-flown, consumptive and exasperating nuisance. The most important of the works completed at Palma is the set of preludes, op. 28, in which the curious may see reflected the various moods of the composer's temperament during this famous 'episode.' The ballade in F, op. 38, the polonaise in C minor, op. 40, No. 2, and the scherzo in C sharp minor, op. 39, seem all to have been conceived about the same time. Early in Mar. 1839, Chopin and Georges Sand returned to France, and after being nursed at Marseilles the invalid was taken to Genoa, and thence to Nohant. For the next seven years or so their summers were spent at Nohant, the rest of the year in Paris—at first at No. 10 rue Pigalle, and afterwards in the Cité d'Orléans. During this period his relations with publishers were satisfactory, and his lessons commanded a high price. He played at St. Cloud before the royal family, together with Moscheles, in the winter of 1839, and gave two concerts of his own, on Apr. 26, 1841, and Feb. 21, 1842. On the second occasion we learn from Maurice Bourges that Chopin played the mazurkas in A flat, B major and A minor; three studies (probably op. 25, Nos. 1 and 2, and op. 10, No. 12); the ballade in A flat; four nocturnes, one of which was in F sharp minor, op. 55; the prelude in D flat; and the impromptu in G flat. The conditions of these concerts appear to have been almost ideal in their avoidance of the ordinary drawbacks of public entertainments. The audience consisted mainly of his friends and pupils, and the tickets were eagerly taken up in private. About this time Moscheles says of him in his Diary:

'His ad libitum playing, which, with the interpreters of his music, degenerates into disregard of time, is with him only the most charming originality of execution; the amateurish and harsh modulations which strike me disagreeably when I am reading his compositions no longer shock me, because his delicate fingers glide lightly over them in a fairy-like way; his piano is so soft that he does not need any strong forte to produce contrasts; it is for this reason that one does not miss the orchestral effects which the German school demands from a pianoforte player, but allows one's self to be carried away, as by a singer who, little concerned about the accompaniment, entirely follows his feelings.'

In another place he says:

'Personally I dislike the artificial, often forced, modulations; my fingers stumble and fall over such passages; however much I may practise them I cannot execute them without tripping.'

In 1847 Chopin's connexion with Georges Sand came to an abrupt and painful end. It is unnecessary to discuss the details of the quarrel between them, but it is pretty certain that the consequent distress of mind accelerated the composer's ill-health, if it was not a primary cause of his early death. In Oct. 1847 was published Chopin's last composition, the sonata for piano and violoncello, op. 65, in G. minor. His last concert was given in Paris on Feb. 16, 1848, when the approach of the Revolution was already being felt. He played with Alard and Franchomme in Mozart's trio in G (Köchel, No. 496), and with Franchomme in three movements of his new sonata, besides a number of solos, among which were the Berceuse, the valse in D flat, op. 64, and the Barcarolle. Sir Charles Hallé, who was present on the occasion, gave an account to the writer of how Chopin played the forte passages towards the end of the Barcarolle pianissimo with all manner of refinements. Like so many other musicians, Chopin fled from the disturbances of the Revolution to London, where he arrived on Apr. 21, 1848. He played at Lady Blessington's, at Gore House, Kensington, and at the Duchess of Sutherland's, at Stafford House. Erard, Broadwood and Pleyel sent him pianos, and almost whenever he played he had to be carried upstairs. That, nevertheless, his playing could occasionally produce the effect of unexpected force, as in the octaves of the A flat polonaise, was recorded by the late Mr. Henry Fowler Broadwood. Two morning concerts were given at Mrs. Sartoris's and Lady Falmouth's, and the price of tickets was a guinea. He appeared at Manchester on Aug. 28, 1848, but did not excite as much enthusiasm as was to have been expected, and he also played at Glasgow and Edinburgh, the latter on Oct. 4. At Edinburgh, miserable in lodgings and ill, he collapsed, and Dr. Zyschinski carried him off to his own house and tended him there.[1] Between whiles he had been visiting Scotch friends, such as Miss J. W. Stirling, Lady Murray and Lord Torphichen. At the close of this tour he was in the deepest dejection of spirits, and was evidently nearing the end. He returned to Paris, and died there between three and four in the

[1] We owe the record of Chopin's last visit to England to the late A. J. Hipkins, whose notes were incorporated in Bennett's Biographical Sketch of Chopin (*Mus. T.*), Niecks's Life, and an article by Hueffer in the *Fortnightly*.

morning of Oct. 17, 1849. There was a grand funeral service at the Chapelle de la Madeleine, when Mozart's Requiem was sung; the body was afterwards interred in the cemetery of Père la Chaise, near the graves of Cherubini and Bellini.

An Estimate of Chopin.—Robert Schumann, when reviewing Chopin's Preludes for the *Neue Zeitschrift für Musik*, in 1839, called him 'the boldest and proudest poetic spirit of the times!' (*Ges. Schriften*, iii. 122); he might have added with at least equal truth, and in the face of all contemporary opposition, that Chopin was a legitimately trained musician of quite exceptional attainments, a pianist of the first order, and a composer for the pianoforte pre-eminent beyond comparison—a great master of style, a fascinating melodist, as well as a most original manipulator of puissant and refined rhythm and harmony. As he preferred forms in which some sort of rhythmic and melodic type is prescribed at the outset,—such as the mazurka, polonaise, valse, bolero, tarantelle, etc., he virtually set himself the task of saying the same sort of thing again and again; yet he appears truly inexhaustible. Each étude, prelude, impromptu, scherzo, ballade, presents an aspect of the subject not pointed out before; each has a *raison d'être* of its own. With few exceptions, all of which pertain to the pieces written in his teens, thought and form, matter and manner, shades of emotion and shades of style, blend perfectly. Like a magician he appears possessed of the secret to transmute and transfigure whatever he touches into some weird crystal, convincing in its conformation, transparent in its eccentricity, of which no duplicate is possible, no imitation desirable. He was a great inventor, not only as regards the technical treatment of the pianoforte, but as regards music *per se*, as regards composition. He spoke of new things well worth hearing, and found new ways of saying such things. The emotional materials he embodies are not the highest; his moral nature was not cast in a sublime mould, and his intellect was not profound; his bias was romantic and sentimental rather than heroic or naïve—but be his material ever so exotic, he invariably makes amends by the exquisite refinement of his diction. He is most careful to avoid melodic, rhythmic or harmonic commonplaces; a vulgar melody or a halting rhythm seem to have been revolting to him; and as for refined harmony, he strove so hard to attain it, that in a few of his last pieces he may be said to have overshot the mark, and to have subtilised his progressions into obtuseness.

The list of his works extends only up to op. 74, and when bound up in a few thin volumes Chopin is certainly not formidable, yet his published pieces represent an immense amount of care and labour. With regard to rare musical value, originality and perfection of style, the solo pieces may be classed as follows: études and preludes; mazurkas and polonaises; ballades and scherzi; nocturnes and valses; etc. The two concertos are highly interesting as far as the treatment of the solo part is concerned, but the orchestration is poor. This obvious fact has led certain lovers of Chopin's music to rescore the accompaniments of the two concertos; but it may be maintained that Chopin did not intend to accompany the solo part more heavily than he has done. At the same time, the concertos and other works with orchestra are more effective when played on two pianos than in their original form. In his treatment of other instruments than the piano, he is hardly at his ease, and neither the trio, op. 8, nor the sonata with violoncello, op. 65, represents him at his best. In the light but effective polonaise in C for piano and violoncello, Franchomme made various modifications in the violoncello part which are undoubtedly great improvements; the melodic value of the work becomes greater, as well as its general effect. But these changes were made with the composer's sanction.

The seventeen Polish songs, which were published as op. 74, owe much to traditional sources. They are characteristic of the sort of thing Chopin often contributed, and liked to contribute, to the social gatherings, and to the albums of his female compatriots. The collection consists of a number of fine old tunes, set to new words, and arranged by Chopin. In one or two instances, such as Nos. 16 and 17, it may be that the songs are the work of some amateur, corrected by Chopin.

Chopin's Teaching.—From certain records by his pupils, it is possible to realise what qualities in a pianist seemed to Chopin most valuable. Touch was of supreme importance; scales were to be practised legato with full tone, very slowly at first, and gradually increasing in speed. Scales with many black keys were chosen first, and C major last of all. Selections were made from the studies of Clementi, Cramer and Moscheles, from the suites, preludes and fugues of Bach, and from his own études. Several of Field's nocturnes were recommended for the production of a rich singing tone. 'Everything is to be read cantabile, even my passages; everything must be made to sing—the bass, the inner parts, etc.' Double notes and chords in music of Hummel's date and later, had to be struck together, no arpeggio being allowed unless indicated by the composer. He generally played shakes according to the old tradition of beginning with the auxiliary note. Many old-fashioned tricks in fingering were revived by Chopin, in spite of the horror with which the pedants of his time regarded them. He would pass the thumb under the

little finger, or *vice versa*, with a distinct bend of the wrist. He would slide from one key to another with the same finger, and this not merely when gliding down from a black to a white key, and he allowed the longer fingers to pass over the shorter, without the aid of the thumb. The fingering of chromatic thirds as he himself marked it in the study, op. 25, No. 5, gives the possibility of a perfect legato with a quiet hand.

As to tempo rubato, it is most interesting to learn that Chopin always kept a metronome on his piano; his rubato was by no means the unreasoning abandonment of rhythm which we often hear in the present day; 'the singing hand,' as he said, 'may deviate from strict time, but the accompanying hand must keep time.' 'Fancy a tree with its branches swayed by the wind—the stem is the steady time, the moving leaves are the melodic inflections.' He disliked exaggerated accentuation, which 'produces an effect of pedantic affectation.' He also strongly advised his pupils to cultivate ensemble playing.

As to the comparative value of the various editions of Chopin's works, a few words may not be out of place. The earliest, and in many ways the most authoritative, are those published in Paris during the composer's lifetime. Next in order of importance come the collective editions of Tellefsen, Klindworth and Mikuli (Paris, Moscow and Leipzig respectively). The English edition of Wessel & Co. (now Edwin Ashdown) ranks as one of the early editions, but there is no evidence that Chopin corrected the proofs. Klindworth's edition is of considerable practical value; his fingerings, however, and occasionally his alterations of the text, diminish its authority. The Peters and Litolff editions are fairly accurate as far as the text is concerned, though the fingering is often queer (*i.e.* based on Klindworth), and the Breitkopf & Härtel edition of the complete works, including the songs and the ensemble pieces, is convenient, although various misprints are copied from older editions, and it is not always a safe guide in regard to details of harmony.

A selected list of lives and other works on Chopin is given below. Liszt's *F. Chopin* is based on some articles which appeared in the *Gazette musicale* in 1851–52, and was published in book-form in 1879; an English translation, by M. Walker Cook, appeared in 1877, and a German version in 1881. Mme. de Wittgenstein was Liszt's collaborator in this book, as well as in other of his literary productions. Many of the misleading statements regarding Chopin are said to be due to the reminiscences of a Pole named Grzymala. Professor Niecks's *Life* in two volumes, London, 1888, is thoroughly trustworthy. Certain books by Georges Sand, referred to above, may be consulted.

The list of Chopin's works is as follows. Those marked with an asterisk were published posthumously:

Op.	
1.	Rondo, C minor.
2.	'La ci darem' Variations (with Orchestra).
3.	Introduction and Polonaise, in C (PF. and V'cello).
4.	*Sonata, C minor.
5.	*Rondeau à la Mazur.
6.	Four Mazurkas.
7.	Five Mazurkas.
8.	Trio (PF. and Strings).
9.	Three Nocturnes.
10.	Twelve Studies.
11.	Concerto, E minor.
12.	Variations (with Orch.), 'Ludovic' (Hérold).
13.	Fantasia on Polish airs.
14.	Krakoviak Rondo (with Orch.).
15.	Three Nocturnes.
16.	Rondo, E♭.
17.	Four Mazurkas.
18.	Valse, E♭.
19.	Bolero.
20.	Scherzo, B minor.
21.	Concerto, F minor (with Orch.).
22.	Polonaise, E♭ (with Orch.).
23.	Ballade, G minor.
24.	Four Mazurkas.
25.	Twelve Studies.
26.	Two Polonaises.
27.	Two Nocturnes.
28.	Twenty-four Preludes.
29.	Impromptu, A♭.
30.	Four Mazurkas.
31.	Scherzo, B♭ minor.
32.	Two Nocturnes.
33.	Four Mazurkas.
34.	Three Valses.
35.	Sonata, B♭ minor.
36.	Impromptu, F♯.
37.	Two Nocturnes.
38.	Ballade, F.
39.	Scherzo, C♯ minor.
40.	Two Polonaises.
41.	Four Mazurkas.
42.	Valse, A♭.
43.	Tarantelle.
44.	Polonaise, F♯ minor.
45.	Prelude, C♯ minor.
46.	Allegro de Concert.
47.	Ballade, A♭.
48.	Two Nocturnes.
49.	Fantasia, F minor.
50.	Three Mazurkas.
51.	Impromptu, D♭.
52.	Ballade, F minor.
53.	Polonaise, A♭.
54.	Scherzo, E.
55.	Two Nocturnes.
56.	Three Mazurkas.
57.	Berceuse.
58.	Sonata, B minor.
59.	Three Mazurkas.
60.	Barcarolle.
61.	Polonaise Fantaisie.
62.	Two Nocturnes.
63.	Three Mazurkas.
64.	Three Valses.
65.	Sonata, G minor (PF. and Violoncello).
66.	*Fantaisie Impromptu.
67.	*Four Mazurkas.
68.	*Four Mazurkas.
69.	*Two Valses.
70.	*Three Valses.
71.	*Three Polonaises.
72.	*Nocturne, E minor, Marche funèbre in C minor, and three Écossaises.
73.	*Rondo for two PF.s in C.
	Without opus number.
	*Seventeen Songs with PF. acct.
	Three Studies.
	*Mazurkas in G, B♭, D, C and A minor.
	*Valses, E major and minor.
	*Polonaises, G♯ minor and B♭ minor.
	*Variations in E, 'The Merry Swiss Boy.'
	Duet Concertante. on 'Robert' (for PF. and V'cello. written with Franchomme).

In addition to these a fugue and a nocturne have appeared the musical value of which is *nil*.

E. D., with addns.

CHORAGUS, a titular functionary in the University of Oxford, who derives his name from the leader of the chorus in the ancient Greek drama (χορᾱγός). In the year 1626 Dr. William Heyther, desirous to ensure the study and practice of music at Oxford in future ages, established the offices of Professor, Choragus and Coryphæus, and endowed them with modest stipends. The Professor was to give instruction in the theory of music, the Choragus and the Coryphæus were to superintend its practice. The ordinances of Dr. Heyther say,

'Twice a week is the Choragus to present himself in the Music School and conduct the practice, both vocal and instrumental, of all who may choose to attend.'

The instruments to be used by the students at these performances were furnished out of Dr. Heyther's benefactions; provision was made for obtaining treble voices, and everything

requisite to the regular and practical cultivation of music as one of the academic studies appeared to have been devised. Yet Dr. Heyther must have had certain misgivings as to the future of his institutions, for he enacts that

'if *no one* shall attend the meetings in the Music School, then the Choragus himself shall sing with two boys for at least an hour.'

Little as Dr. Heyther asked of posterity, he obtained still less.[1] The practices ceased; the instruments were dispersed, and their remnant finally broken up by the authorities as old lumber; and no Choragus has either conducted or sung in the Music School within the memory of man. Latterly the Choragus was charged, along with the Professor, with the conduct of the examinations for musical degrees, but this duty no longer exists, and even the name and office of the Coryphæus have become extinct. The emolument of the office, derived in part from the above-mentioned endowment, in part from fees paid on examination, amount in all to an insignificant total. C. A. F.

CHORAL or CHORALE (Ger. *Choral*), a choral song (*cantus choralis*) of ecclesiastical use, whether (*a*) the choral plain-song (*cantus planus*, *cantus firmus*) of the Roman Office; or (*b*) the Protestant Church-hymn (*Kirchenlied*: *Chorgesang*).

The Gregorian Choral

In Roman use the Choral represented the *concentus* as distinguished from the *accentus* or intonation of the Collect, Epistle, Gospel, prayers, and other portions of the Office — *Preface*, *Paternoster*, etc. The Gregorian Choral, generally sung by more than one voice (hence *Choral*) in proximity to the altar, was essentially a Mass-song (*Messegesang*) treating, usually, a Bible text: of 630 Mass-songs in a 10th-century Codex at St. Gall, more than 430 are from the Psalms, 160 from other parts of the Bible; only 25 are non-Biblical. To the category of Chorals belong the *Introitus*, *Offertorium*, *Communio*, sung by the choir; the *Tractus* (*cantus tractus*), *Gradual* (*responsorium graduale* or *gradale*), *Alleluias*, sung by a voice or voices distinct from the choir between the Epistle and Gospel; and the *Ordinarium Missae*, *i.e.* the *Kyrie*, *Gloria in excelsis*, *Credo*, *Sanctus*, *Benedictus*, *Agnus Dei*, and *Sequences* (*prosa*), sung by the choir. There developed also a large *corpus* of Latin hymns and antiphons for the Church seasons and hours — Julian (p. 547) enumerates more than 500 in English mediæval use. Sung by the clergy and choir, they were as little intelligible to the passive congregation as the Mass itself. But in Germany, as elsewhere, short vernacular hymns were early admitted into public worship and, after their refrain, were called 'Kirleison,' 'Leisen,' or 'Leichen.' They were the earliest congregational hymns, and consisted of a stanza or stanzas prefixed to the *Kyrie eleison* or *Christe eleison*, ejaculations which had passed from the Greek into the Latin Church, especially for festival use. The oldest of them dates from the end of the 9th century; the first of its three stanzas reads:

'Unsar trohtin hat farsalt sancte Petre giwalt
Daz er mag ginerjan zeimo dingenten man.
Kyrie eleyson! Christe eleison.'

Other rare examples of pre-Reformation popular hymnody are: the Easter 'Christ ist erstanden,' the Whitsuntide 'Nun bitten wir den heiligen Geist,' the Christmas 'Gelobet seist du, Jesu Christ,' the Trinity 'Das helfen uns die Namen drei,' the Good Friday 'Gott ward an ein Kreuz geschla'n,' and the intercessory 'Mitten wir im Leben sind.' Their abnormal liturgical use is suggested by the conjecture (Koch, i. 208) that the second of those named was sung by the congregation while a wooden dove or a living bird was released from the roof of the church. Another opportunity for congregational utterance was afforded by the post-gradual *Alleluias* sung at Easter. The Christmas Mystery plays also invited vernacular hymns — *e.g.* the Latin-German 'In dulci jubilo,' and 'Ein Kind geborn zu Bethlehem' ('Puer natus in Bethlehem'). The best Latin hymns, too, were frequently translated—*e.g.* the *Te Deum*, *Gloria in excelsis*, *Veni creator spiritus*, as well as the *Credo*, *Paternoster*, *Sanctus*, and some of the Psalms. Hence, when Luther set himself to provide the apparatus of congregational praise, he was able to draw upon a tradition of ecclesiastical song and a fund of popular hymnody. Between Otfrid of Weissenburg (9th century) and 1518 upwards of 1440 German vernacular hymns were written. Yet throughout the mediæval centuries church music was almost exclusively the province of the choir and clergy. The Reformation gave a voice to the laity, but without immediately destroying the choir's monopoly.

The Protestant Choral

As signifying a congregational hymn, the word Choral came into general use in the second half of the 16th century, at a period when the principles of melodic symmetry and rhythm were being grasped; when, too, steps were first taken to transfer the *cantus planus* from the tenor to the discant in the interests of congregational singing. The Choral was the peculiar interest of the Evangelical (Lutheran) Church. The Reformed (non-Lutheran) bodies, deeming the Psalter the sole inspired manual of Church praise, disapproved of original hymns as a detail of public worship, and condemned their communities consequently to musical infertility.

[1] At the festival held in Oxford, 1926, to commemorate the tercentenary of Heyther's foundation the music practice, under the Choragus, was revived.

Luther, steeped in and esteeming the music of the ancient Church, was himself the first Evangelical hymnist, the Ambrose of the Reformation, who equipped the Protestant liturgy with the apparatus of choral song. His materials were fourfold: (1) official Latin hymnody; (2) pre-Reformation popular hymns; (3) secular folk-song; (4) original hymns.

1. Official Latin Hymnody.—Of the Latin hymns, with (for the most part) their adapted melodies, which the Evangelical Church took over, the following are the most familiar:

'Allein Gott in der Höh' sei Ehr'' (*Gloria in excelsis*), by Nikolaus Decius; 'Also heilig ist der Tag' (*Salve festa dies*); 'Christe, der du bist Tag und Licht,' by Wolfang Meusel, or 'Christe, du bist der helle Tag' (*Christe qui lux es et dies*), by Erasmus Alber; 'Christum wir sollen loben schon' (*A solus ortus cardine*), by Luther; 'Christus, der uns selig macht' (*Patris sapientia, veritas divina*), by Michael Weisse; 'Da Christus geboren war' (*In natali domini*); 'Der du bist drei in Einigkeit' (*O lux beata trinitas*), by Luther; 'Der Tag der ist so freudenreich' (*Dies est laetitiae*); 'Erhalt uns, Herr, bei deinem Wort' (*Sit laus, honor et gloria*), by Luther; 'Herr Gott, dich loben wir' (*Te Deum laudamus*), by Luther; 'Jesus Christus, unser Heiland, Der von uns' (*Jesus Christus, nostra salus*), by Luther; 'Komm, Gott, Schöpfer, heiliger Geist' (*Veni Creator Spiritus*), by Luther; 'Komm, heiliger Geist, Herre Gott' (*Veni Sancte Spiritus*), by Luther; 'Nun komm, der Heiden Heiland' (*Veni redemptor gentium*), by Luther; 'Verleih' uns Frieden gnädiglich' (*Da pacem, domine*), by Luther; 'Was fürcht'st du, Feind Herodes, sehr' (*Hostis Herodes impie*), by Luther; 'Wir glauben all' an einen Gott' (*Credo in Deum patrem omnipotentem*), by Luther.

To these must be added many Psalm versions and paraphrases of Holy Scripture.

2. Pre-Reformation Popular Hymns.—Realising the strength of their appeal, Luther and his colleagues appropriated many popular mediæval hymns, rewriting or expanding their words and adapting their melodies. This process of 'Verbesserung' was natural in a Reformation which was itself a gigantic act of correction. Hans Sachs (1494–1576), for instance, 'christlich verändert und korrigiert' the pre-Reformation 'Dich Frau vom Himmel ruf' ich an' to 'Christum vom Himmel ruf' ich an.' Luther described his 'Jesus Christus unser Heiland' as John Hus's hymn verbessert'; while the antiphon *Regina coeli* of Lossius was adopted as 'correctum per Herm. Bonnum.' Sacred folk-song attached thus to the service of the Evangelical Church provided the following hymns or melodies or both:

The Christmas 'Gelobet seist du, Jesu Christ,' and 'In dulci jubilo'; the Passiontide 'Da Jesus an dem Kreuze stund' and 'O du armer Judas'; the Easter 'Christ ist erstanden,' 'Christ lag in Todesbanden,' and 'Freu' dich, du werthe Christenheit' (whose melody was also set to 'Es ist das Heil uns kommen her'); the Trinity 'Christ fuhr gen Himmel'; the Whitsuntide 'Nun bitten wir den heil'gen Geist'; as well as 'Dies sind die heil'gen zehn Gebot,' 'Gott der Vater wohn uns bei,' 'Gott sei gelobet und gebenedeiet,' and 'Mitten wir im Leben sind.'

3. Secular Folk-song. — Already in the 15th century Heinrich von Laufenberg had written religious parodies ('contrafacta') of secular ditties. Luther was not less sensitive to the value of popular art as a contributor to the apparatus of religion; the Calvinist Church also, owing to the paucity of material at its disposal, was compelled to borrow freely. In their action, however, the early Lutheran compilers were moved also to purify popular art by substituting — to quote a Frankfort title-page dated 1571 — 'geistige, gute, nütze Texte and Worte' for the 'böse und ärgerliche Weise, unnütze und schampare Liedlein' in popular use. Thus the hymn 'Ach gott, thu' dich erbarmen' received its melody from the secular 'Frisch auf, ihr Landsknecht alle'; 'Durch Adams Fall' from the Pavia song; 'Freut euch, freut euch in dieser Zeit' from 'So weiss ich eins, das mich erfreut'; 'Helft mir Gott's Güte preisen' and 'Von Gott will ich nicht lassen' from 'Ich ging einmal spazieren'; 'Herr Christ, der einig Gott's Sohn' from 'Ich hört ein Fräulein klagen'; 'Hilf Gott, das mirs gelinge' from (?) 'Könnt ich von Herzen singen'; 'Ich dank dir, lieber Herre' from 'Entlaubt ist uns der Walde'; 'Ich hab' mein Sach Gott heimgestellt' from 'Ich weiss mir ein Röslein hübsch und fein'; 'In dir ist Freude' from an Italian dance-measure, 'A lieta vita'; 'Nun freut euch, lieben Christen g'mein' from a melody heard and noted by Luther, 'Wach auf, wach auf, du schöne'; 'Nun höret zu, ihr Christenleut' from 'Und wollt ihr hören neue Mär'; 'O Christe Morgensterne' from 'Er ist der Morgensterne'; 'O Haupt voll Blut' and 'Herzlich thut mich verlangen' from 'Mein G'mut ist mir verwirret'; 'O Welt ich muss dich lassen' from 'Inspruck ich muss dich lassen'; 'Vom Himmel hoch da komm ich her' and 'Vom Himmel kam der Engel Schaar' from 'Aus fremden Landen komm ich her'; 'Wacht auf, ihr Christen alle' from a Netherlandish folk-song, 'Waer is mijn alder liefste'; 'Warum betrübst du dich, mein Herz' from 'Dein g'sund mein Freud''; 'Was mein Gott will' from the French 'Il me souffit de tous mes maulx'; and 'Wenn wir in höchsten Nöthen sein' from (?) a French folk-song.

4. Original Hymns. — Among the writers whose work enriched evangelical hymnody Luther stands pre-eminent. Between 1523 and 1543 he wrote 38 pieces, the majority of them translations, revisions, or enlargements of pre-Reformation material. His original, or mainly original, hymns are 8 in number:

1. 'Christ lag in Todesbanden.' (1524.)
2. 'Christ unser Herr zum Jordan kam.' (1543.)
3. 'Ein neues Lied wir heben an.' (1524.)
4. 'Erhalt uns, Herr, bei deinem Wort.' (1542.)
5. 'Jesus Christus unser Heiland, Der den Tod.' (1524.)
6. 'Nun freut euch, lieben Christen g'mein.' (1523.)
7. 'Vom Himmel hoch da komm ich her.' (1535.)
8. 'Vom Himmel kam der Engel Schaar.' (1543.)

It is a testimony to their virility, as it is to the conservatism of German hymnody, that all but two (No. 3 *supra* and 'Für allen Freuden auf Erden' (1538)) of Luther's hymns are still in German use. Seventeen of them received original tunes in the hymn-books in which they first appeared:

1. 'Ach Gott vom Himmel sieh' darein.' (1524.)
2. 'Aus tiefer Noth schrei ich zu dir.' (1524.)
3. 'Ein neues Lied wir heben an.' (1524.)
4. 'Ein feste Burg ist unser Gott.' (1535.)
5. 'Es spricht der Unweisen Mund wohl.' (1524.)
6. 'Es wollt uns Gott genädig sein.' (1524.)
7. 'Jesaia dem Propheten.' (1526.)
8. 'Jesus Christus, unser Heiland, Der den Tod.' (1524 and 1535.)
9. 'Jesus Christus, unser Heiland, Der von uns.' (1524 and also 1535.)

10. 'Mensch, willst du leben seliglich.' (1524.)
11. 'Mit Fried' und Freud' ich fahr' dahin.' (1524.)
12. 'Nun freut euch, lieben Christen g'mein.' (1524 and 1535.)
13. 'Sie ist mir lieb die werthe Magd.' (1545.)
14. 'Vater unser im Himmelreich.' (1539.)
15. 'Vom Himmel hoch da komm ich her.' (1539: not the secular melody (1535) already referred to.)
16. 'Wär Gott nicht mit uns diese Zeit.' (1524.)
17. 'Wohl dem der in Gottes Furcht steht.' (1524.)

What share Luther himself had in their composition cannot be stated positively. Johann Walther (1496–1570) and Konrad Rupff, his predecessor as cantor at the Saxon court, assisted the Reformer at Wittenberg in 1524. But Luther concerned himself directly in their task, a fact established by the MS. of a discarded melody by him (Zahn, No. 2562) for his 'Vater unser im Himmelreich.' The virile melody 'Ein feste Burg,' if reminiscent of Gregorian material, is generally attributed to him. 'Jesaia dem Propheten' discloses a similar borrowing (from the *Sanctus*). Zelle (pp. 11, 64) suggests that 'Nun komm, der Heiden Heiland,' and the melody of M. Weisse's 'Nun lasst uns den Leib begraben,' are also Luther's compositions.

The Earliest Hymn-books.—The second and third quarters of the16th century represent the productive period of Lutheran hymnody. More than 200 books published in that period contain the rugged, objective hymns of the Reformation set to melodies as direct and massive, for the most part, as themselves. Edited by Walther, the earliest of them—the so-called 'Achtliederbuch'—was published at Wittenberg in 1524 under the title *Etlich christlich lider Lobgesang, und Psalm, dem rainen wort Gottes gemess . . . in der Kirchen zu singen.* It contained four melodies ('Nun freut euch, lieben Christen g'mein,' 'Es ist das Heil uns kommen her,' 'In Gott gelaub' ich das er hat,' and 'In Jesus Namen heben wir an'), set to four hymns by Luther, three by Paulus Speratus (*d.* 1551), his assistant, and one by an anonymous writer. A larger book, *Enchiridion oder eyn Handbuchlein . . . geistlicher Gesenge, und Psalmen, rechtschaffn und kunstlich vertheutscht,* was published at Erfurt in a duplicated edition in 1524, probably under the direction of Justus Jonas (*d.* 1555) and Johannes Lange. The two editions contained 16 melodies set to 25 hymns — the eight of the 'Achtliederbuch,' 14 others by Luther, one each by Justus Jonas, Erhart Hegenwalt, and Elisabethe Cruciger (*d.* 1535), the wife of Luther's favourite pupil.

Simultaneously with, or soon after, the publication of the *Enchiridion,* Walther issued from Wittenberg (1524) the first hymn-book to which Luther contributed a Preface. Repeatedly reissued and enlarged, his *Geystliche gesangk Buchleyn* contained 35 melodies set to 32 hymns (24 by Luther) and 5 Latin texts. Besides the writers already mentioned, Michael Stiefel (1486–1567) and Johannes Agricola (1492–1566) each contributed a hymn. Walther's five-part (Discantus, Altus, Tenor Bassus, Vagans or Quintus) settings of the melodies were designed, as Luther remarked in his Preface, to attract youths from 'der Buhllieder und fleischlichen Gesänge' to 'etwas Heilsames.' Five years later (1529) Joseph Klug published at Wittenberg for Luther, who added a new Preface, his *Geistliche Lieder. Auffs new gebessert zu Wittenberg,* an enlarged collection of hymns and melodies of which no copy has survived. On the evidence of a later (1535) edition it appears to have contained 50 German hymns, 29 of them by Luther, with others by Hans Sachs (1494–1576), Adam von Fulda (1493–1558), Johann Kolross (*d.* 1558), and other writers already named. The last hymn-book published under Luther's supervision was the *Geystliche Lieder. Mit einer newen vorrhede D. Mart. Luth.,* printed in two parts by Valentin Babst at Leipzig in 1545. The collection contained 101 German hymns, including all of Luther's. Other contributors to it, besides some of those already mentioned, were Matthäus Greitter (*d.* 1550 or 1552), Wolfgang Dachstein (*d. circa* 1561), Adam Reissner (1496–*c.* 1575), Johannes Schneesing (*d.* 1567) and Michael Weisse (*d.* 1534).

Melodies grew in number less rapidly than hymns. But Zahn (vol. vi.) distinguishes nearly 200 new tunes in the hymn-books of 1524–45. Surveying the whole century the notable composers are: Joachim von Burck (1541?–1610), Sethus Calvisius (1556–1615), Wolfgang Dachstein (*d. circa* 1561), Nikolaus Decius (*d.* 1541), Johann Eccard (1553–1611), Wolfgang Figulus (*c.* 1520–91), Bartholomäus Gesius (1556–1613 or 1614), Matthäus Greitter (*d.* 1550 or 1552), Nikolaus Herman (1485?–1561), Johann Kugelmann (*d.* 1542), Joachim Magdeburg (*b.* 1525), Philipp Nikolai (1556–1608), Cyriakus Schneegass (1546–97), Nikolaus Selnecker (1528–92), Johann Spangenberg (1484–1550), Melchior Vulpius (*d.* 1616), Johann Walther (1496–1570) and Luther himself.

Later Development. — The Lutheran revolution did not immediately substitute congregational for professional singing. Composers continued to place the *canto fermo* in the tenor in four- or five-part settings for the choir, leaving to the congregation restricted opportunities to participate. As in the pre-Reformation period, congregational hymns were sung *unisono* without accompaniment, vocal or instrumental. But before the 16th century ended, the first step was taken to release the Choral from the traditions of the Motet and to admit the congregation to associate with the choir in singing it. Lukas Osiander (1534–1604), a Protestant minister, published at Nürnberg in 1586 his *Funfftig geistliche Lieder und Psalmen,* a collection of (for the most part) old melodies, whose *cantus,*

however, he removed from the tenor to the discant, in order 'das ein gantze christliche Gemein durchauss mit singen kan,' supposing that the clearer definition of the melody would encourage the congregation to do so. Inadequate as it was — for a small choir could afford inadequate support to a congregational melody — Osiander's innovation was repeated by later editors: Johann Raw(partially)in 1589, Rogier Michael in 1593, Sethus Calvisius and Johann Eccard in 1597, the Eisleben Gesangbuch of 1598 (all but eleven melodies), the Regensburg compilation in 1599 ('Mit 5 Stimmen also gesetzt, dass jederman den Choral und bekandte Melodey jedes Gesangs ungehindert wol mit singen kan'), the Nürnberg hymn-book of 1608, Georg Quitschreiber's Jena collection of 1608, and Hans Leo Hassler's *Kirchengesang* of 1608, whose melodies were 'simpliciter gesetzt' to promote their congregational rendering.

The ultimate substitution of a discant for a tenor melody was also due to the weakening of the Netherlandish contrapuntal tradition and the penetration of the Italian melodic style into Germany in the 17th century, a development of which Hans Leo Hassler (*d.* 1612) and Heinrich Schütz (1585–1672) were pioneers. It is significant that already in 1591 Adam Gumpelzhaimer had published at Augsburg his *Neue teutsche geistliche Lieder*, three-part settings (cantus, tenor, bass) 'nach art der Welschen [*i.e.* Italian] Villanellen.' In the half-century that followed, the Italian Concerto invaded the precincts of Lutheran hymnody, revolutionising the treatment of the Choral, which composers began to offer to the public under the title of 'Harmoniae,' 'Cantiones sacrae,' 'Geistlicher Harfenklang,' 'Rosetulum musicum,' 'Rosengärtlein,' and so forth. The Concerto, however, was essentially non-congregational, while the choir of the period was inadequate to afford the harmonic support which effective congregational singing required.

On the other hand, the organ, a newly perfected instrument, was available for that service, while the introduction of figured bass (*continuo*) aided the organist to underprop the melody and decided the victory for the discant over the tenor. The earliest important hymn-book of the 17th century—Johann Hermann Schein's (1586–1630) *Cantional* (1627)—added a figured bass to its melodies for the use of 'organists, instrumental players and lutenists.' The organ decisively assumed the responsibility which the choir was unable to fulfil, when in 1650 Samuel Scheidt (1587–1654), the Halle organist, published his *Tabulatur Buch* containing 112 settings of 100 melodies to serve as accompaniments of congregational singing.

As he distinguished the separate stanzas of the hymns, Scheidt may be regarded as the father of the Choral cantata, and no less is the founder of Germany's organ school, which built itself upon the Choral and thereby was happily diverted from mere virtuosity. From Scheidt onwards, German organists developed their technique upon the Choral, treating it either in free counterpoint with the melody as the *cantus firmus* (*praeambulum*), or in canonic variations, or fugally. Pre-eminent in this art were Michael Praetorius (1571–1621), Johann Christoph Bach (1642–1703), Johann Michael Bach (1648–94), Johann Pachelbel (1653–1706), Dietrich Buxtehude (1637–1707), Georg Böhm (*b.* 1661), Johann Adam Reinken (1623–1722), Johann Gottfried Walther (1684–1748), and Johann Sebastian Bach (1685–1750). In modern times the full revelation of Bach's grandeur has brought the organ and Choral again into association in a literature which Hubert Parry (1848–1918) in England, Johannes Brahms (1833–97), Sigfrid Karg-Elert and Max Reger (1873–1916) in Germany, have enriched.

German composers in the 17th century, on the whole, were less successful in writing fine melodies than in rearranging the treasures of the past to satisfy the taste of their period. The most notable of them are: Michael Praetorius (1571–1621), Melchior Franck (*d.* 1639), Johann Michael Altenburg (1584–1640), Heinrich Schütz (1585–1672), Johann Hermann Schein (1586–1630), Johann Schop (*d.* 1664 or 1665), Johann Crüger (1598–1662), the finest melodist of the century, Heinrich Albert (1604–1651), Andreas Hammerschmidt (1612–75), Johann Rosenmüller (1619–84), Christoph Runge (1619–81), Georg Neumark (1621–81), Peter Sohren (*d.* 1692 or 1693), Jakob Hintze (1622–1702), Johann Rodolph Ahle (1625–73), Johann Georg Ebeling (1637–76), Gottfried Vopelius (1645–1715) and Joachim Neander (1650–80). Zahn enumerates upwards of 450 hymn-books published in the 17th century. In addition to Schein's (1627) already mentioned, the most important of them are: Johann Crüger's *Newes vollkömliches Gesangbuch* (Berlin, 1640); his *Praxis pietatis melica* (Berlin, 1648 (3rd edn.)); the Crüger-Runge hymn-book (Berlin, 1853); and Gottfried Vopelius's *Neu Leipziger Gesangbuch* (Leipzig, 1682). The publication of local hymn-books was very general in the latter part of the century.

Poetry of the Choral.—Viewed as poetical literature,the Choral passed in the 17th century through the testing experience of the Thirty Years' War (1618–48), a period of unrelieved and universal gloom whose agony found a relief in 'Kreuz- und Trostlieder' and a hymnody subjective, sincere, devout. Paul Gerhardt (1607–76), the principal hymnist of the century, is second only to Luther in popularity, and in fertility his superior. The second half of the century culminated in the Pietistic revival led by Philipp Jakob Spener (1635–1705), a reaction from the formalism of official Lutheranism

which, however, except in Bohemia and Moravia, never developed into organised dissent. Of hymn-writers, to the earlier period belong Johann Michael Altenburg (1584–1640), Johann Heermann (1585–1647), Martin Rinkart (1586–1649), whose 'Nun danket alle Gott' (1636) voiced the people's relief at the conclusion of the devastating war, Georg Weissel (1590–1635) and Paul Flemming (1609–40). In the second half are notable, besides Gerhardt, Christian Keimann (1607–62), Johann Rist (1607–67), Johannes Olearius (1611–84), Johann Franck (1618–77), Georg Neumark (1621–81), Johann Georg Albinus (1624–79), Louise Henriette of Brandenburg (1627–67), Gottfried Wilhelm Sacer (1635–99), Emilie Juliane of Schwarzburg-Rudolstadt (1637–1706), Salomo Liscow (1640–89) and Christoph Tietze (1641–1703).

The change which passed over the spirit of German hymnody in the 17th century was reflected consequently in its melody. The rugged, rhythmic tunes of the Reformation, so congregational in their simplicity and directness, were dispossessed by unmetrical, aria-like tunes, and even by dance rhythms. In Hallé, the centre of Pietism, Johann Anastasius Freylinghausen published (1704) the classic *Gesangbuch* of that school. It contained nearly 700 hymns, set to 174 melodies, with figured bass. Nearly half (82) of the tunes were new; only five represented the 16th century and the traditions of Luther. Pietism, indeed, connoted for the Choral the end of its creative period, a fact strikingly illustrated in the case of Bach. Spitta (i. 367) has dispelled the illusion that he contributed tunes to Freylinghausen's 'Spiritual Hymn-Book,' though there are countless proofs in his Passions and cantatas that he had much in common with a literature so intimate and warm. Also he contributed to Schemelli's *Gesangbuch* (1736) melodies for three hymns included in Freylinghausen's collection — 'Dir, dir Jehovah, will ich singen,' 'Eins ist not; ach Herr dies eine,' and 'Wie wohl ist mir, O Freund der Seelen.' But they are typical of all his compositions in this form. Unapproachable in his treatment of the ancient melodies, as his preference for them is patent, Bach's original hymn-tunes (*e.g.* No. 42 of the 'Christmas Oratorio') are of the aria type, and, if they cannot be said to be wholly uncongregational, distinctly lack the characteristics of an effective congregational hymn.

It does not follow from the presence of Chorals *simplice stylo* in Bach's cantatas and oratorios that he desired them to be sung by the congregation, though his orchestration of them strongly suggests that they were so sung. But his art and the Choral are inextricably associated. His earliest compositions were Choral studies for the clavier or organ. All the famous hymn melodies in common use he enriched with matchless harmonies. They are rarely absent from his cantatas and oratorios. Their stanzas and their melodies inspired the work of his maturest genius. His organ technique was developed upon them, and they are the theme of the bulk of his music for that instrument. It would appear, as Spitta (iii. 107) comments, that Bach was impelled to connect the Choral with all his work for the service of God, and to display it in its fullest brilliance. So complementary are they that Bach and the Choral together fell under the ban of 18th-century Rationalism, awaiting the 19th-century Revival which restored them to repute. It is not merely a coincidence that Philipp Spitta, who first interpreted the resurrected Bach, was the son of the author of *Psalter und Harfe*, through whom Evangelical hymnody recovered the spirit of which Rationalism had deprived it.

CHORALEON, see AEOLODION.

CHORAL HARMONIC SOCIETY. The members of this amateur society met at the

Hanover Square Rooms for the practice of concerted vocal and instrumental music. In 1837, J. H. B. Dando was the leader, Holderness the conductor and H. Bevington the organist. The programmes usually included a glee or madrigal with symphonies, overtures and vocal solos. C. M.

CHORAL HARMONISTS' SOCIETY, an association of amateurs devoted to the performance of great choral works with orchestral accompaniments, held its first meeting at the New London Hotel, Bridge Street, Blackfriars, Jan. 2, 1833, and the subsequent ones at the London Tavern until the last Concert, Apr. 4, 1851, twelve months after which the Society was dissolved. It had a full band (containing, in 1838, 14 violins, 6 violas, 3 violoncellos, 3 basses, with complete wind) and chorus. The solo singers were professionals—Clara Novello, Miss Birch, Miss Dolby, J. A. Novello, etc. Its conductors were V. Novello, Lucas, Neate and Westrop; leader J. H. B. Dando. The programmes were excellent. Among the works performed were Beethoven's Mass in D (Apr. 1, 1839, and again Apr. 1, 1844), Haydn's 'Seasons,' Mendelssohn's 'Walpurgisnacht,' etc.

The Choral Harmonists were a secession from the CITY OF LONDON CLASSICAL HARMONISTS, who held their first meeting Apr. 6, 1831, and met alternately at Farn's music shop, 72 Lombard Street and the Horn Tavern, Doctors' Commons. T. H. Severn was conductor, and Dando leader, and the accompaniments were arranged for a septet of strings. Among the principal works thus given were—'Oberon,' Spohr's Mass in C minor, and 'Letzten Dinge,' a selection from Mozart's 'Idomeneo,' etc. The name 'City of London' was intended to distinguish it from the CLASSICAL HARMONISTS, a still older society, meeting at the Crown and Anchor Tavern, Strand, of which Griffin and V. Novello were conductors. C. M.

CHORAL SYMPHONY, the ordinary English title for Beethoven's ninth symphony (op. 125) in D minor, commissioned by the Philharmonic Society, but first performed at the Kärnthnerthor Theatre, May 7, 1824. First performance in London, by the Philharmonic Society, Mar. 21, 1825. At the Paris Conservatoire it was played twice, in 1832 and 1834, half at the beginning and half at the end of a concert. At Leipzig, on Mar. 6, 1826, it was played from the parts alone; the conductor having never seen the score! In America, by the New York Philharmonic Society, May 20, 1846. G.

CHORD is the simultaneous occurrence of several musical sounds, producing harmony. The term is used when such occurrences are considered independently of context. Certain of the more frequently recurring chords are named, such as the 'common chord,' the chord of the sixth, of the dominant, of the diminished seventh, of the ninth, etc. (See HARMONY.) C. H. H. P., with addns.

CHORDING is a word of recent origin, used to express the distribution of notes within a chord, whether clustered or spaced out. It is as important an element now of orchestration as it was of vocal writing in the 16th century. Since it may redistribute the upper partials, there is a point where it merges into tone-quality. A. H. F.-S.

CHORISTER (Querestere and other variants). The origin of the word is obvious—a singer in a CHOIR (*q.v.*). Strictly speaking, the designation has no age limit or sex restriction, but it is now generally reserved for boy singers in cathedrals or church choirs. This ecclesiastical office is of ancient origin. The oldest choral grammar school in this country is that of St. Paul's Cathedral, which dates from the time of Edward the Confessor. It is mentioned by Ingulphus; and through all the vicissitudes of more than eight centuries, this Foundation still exists, and to-day the Choir School of St. Paul's Cathedral is a model of its kind. The office of Master of the Children (choristers) at the Chapel Royal can be traced as far back as the reign of Henry VI., who appointed John Plummer to that post, Sept. 29, 1444.

In the Foundation Statutes of Cathedrals, Chapels Royal and College Chapels at the Universities of Oxford and Cambridge choristers find a place. When, nearly six hundred years ago, King Edward III. founded the College of Windsor (St. George's Chapel), provision was made for six choristers (increased to thirteen by Edward IV.), who should have 'clear tuneable voices' and

'be duly instructed in grammar and song, when not engaged in the services of the chapel.'

In 1550 it was provided further that

'every chorister of the College, whose voice from henceforth shall change, shall have five marks yearly for his exhibition towards his finding at grammar school for the space of four years, if he be apt and will diligently apply himself to learn.'

Also it was enjoined that

'one of the priests or clerks should be chosen yearly to be Grandsire of the choristers, and to teach them the catechism and the principles of grammar and to write, and also to see to their manners.'

He was

'bound to teach ten other poor children at the least freely, if they resort unto him.'

He was to

'teach the ten choristers every week day in the year from six o'clock in the morning until eight, and from twelve o'clock daily until two; which teacher should receive for his labours quarterly twenty-five shillings. The rest of the day the teacher of Music shall instruct the choristers diligently to sing and to play upon instruments.'

As an example of a Cathedral 'choir school' Foundation, that of Durham may be instanced. Patrick Sanderson, in his *Antiquities of the*

Abbey, or Cathedral Church of Durham (1767), p. 62, thus refers to it :

'In the centry-garth, under the south end of the nine altars betwixt two pillars adjoining to the nine altars door, was a song-school, erected for the teaching six children to sing, for the maintenance of God's service in the Abbey Church, who had their meat and drink among the children of the Almery, at the expence of the house. This school was built with the Church, and was neatly wainscotted within, round about, two yards high, and had a desk from one end of the school to the other to lay their books on. The floor was boarded for warmness, and round about it long forms were fastened in the ground for the children to sit on, and the place where the master sat and taught was all close boarded for warmness. His office was to teach the six children to sing, and play on the organs every principal day, when the monks sang their high mass, and at even-song ; but when the monks were at mattens, and service at midnight, one of them played on the organs himself, and none else. The master had his chamber adjoining to the song-school, where he lodged, and his diet in the prior's hall among the prior's gentlemen : and his other necessaries were supplied at the common charge, till the suppression of the house, when the school was pull'd down, so it is difficult to find where it stood.'

The Durham Statutes were revised in 1555. Statute XXVII., 'The Choristers and their Master,' reads thus :

'There shall be ten young boys as choristers, with good voices, to serve in the choir ; to teach whom (as well in singing as in good manners, besides the number of clerks) a person shall be appointed, of good fame and conversation, skilful in singing and in the management of the organ : And to encourage his greater attention, he shall have leave of absence on ordinary days ; but he must constantly attend upon Sundays and holidays to perform the service.

'When he has leave of absence, the precentor shall appoint one of the minor canons, or singing-men who understands playing on the organ, to do that office. If the master is negligent of the boys' health or education, after a third admonition, to be removed. He shall likewise be sworn to perform his duty.'

Statute XXXI. (' of the commons ') was to the effect that the minor canons, the upper-master of the Grammar School, and the master of the choristers should receive six shillings per month ; the singing men each four shillings and eightpence ; the grammar scholars and choristers three shillings and fourpence. Statute XXXII. (The Minister's Vestments, commonly called *Liveries*) enacted that

'The minor canons, clerks, and other ministers of the church, choristers, grammar scholars, cooks, and poor men shall use an upper vestment of the same colour. Each minor canon, and the head-master of the grammar school, four yards of cloth for his gown at five shillings a yard ; the master of the choristers three yards of the same ; the choristers, grammar scholars, and under-cook, two yards and a half at three shillings and fourpence.'[1]

Early in the 19th century cathedral choristers suffered scandalous neglect at the hands of deans and chapters, and the treatment meted out to those children of tender years by the masters set over them was often brutal. Miss Maria Hackett (1783–1874) devoted her time and means to ameliorating the condition of choristers in all parts of the kingdom, by personal visitations to the various cathedrals, and by her pen in vigorously waging war with deans and chapters, and bringing them to a sense of their duties. Miss Hackett was permitted to see the realisation, to a very large extent, of the object to which she had devoted her beneficent life.

F. G. E.

CHORLEY, Henry Fothergill (*b.* Blackley Hurst, Lancashire, Dec. 15, 1808 ; *d.* London, Feb. 16, 1872), journalist, author and art critic. The only approach to systematic teaching in music which he ever received was from J. Z. Herrmann, afterwards conductor of the Liverpool Philharmonic Society. He frequented all the performances within reach ; and his notes of these in his journal bear witness to the steady growth of his judgment. In Sept. 1830 he made his first appearance in the columns of the *Athenæum*, and shortly after was received upon its staff. He then settled in London, and continued to write for the *Athenæum* until within a few years of his death in 1872. At the same time he attempted composition in other branches of literature —novels, dramas, biographies and poems. Among these may be mentioned :

Sketches of a Seaport Town (1834) ; *Conti, the Discarded* (1835) ; *Memorials of Mrs. Hemans* (1836) ; *The Authors of England* (1838) ; *The Lion, a Tale of the Coteries* (1839) ; *Music and Manners in France and North Germany* (1841) ; *Pomfret* (1845) ; *Old Love and New Fortune* (1850), a five-act play in blank verse ; *The Lovelock* (1854) ; *Roccabella* (1859) ; *The Prodigy* (1866) ; *Duchess Eleanour* (1866).

He dramatised G. Sand's ' L'Uscoque,' set to music by Benedict ; for whom also he wrote the libretto of ' Red Beard.' Besides translating many foreign libretti, he wrote the original word-books of one version of the ' Amber Witch ' (Wallace), of ' White Magic ' (Biletta), of the ' May Queen ' (Bennett), ' Judith ' and ' Holyrood ' (Leslie), ' St. Cecilia ' (Benedict), ' Sapphire Necklace ' and ' Kenilworth ' (Sullivan), and words for many songs by Meyerbeer, Goldschmidt, Gounod, Sullivan, etc. He will be best remembered, however, as a musical critic. Within a year of his joining the staff of the *Athenæum* he had that department entrusted entirely to him, which he did not give up till 1868. His two published works which contain the deliberate expression of his opinions on the subject of music are *Modern German Music* (1854)—a republication, with large additions, of his former work *Music and Manners*—and *Thirty Years' Musical Recollections* (1862). Beside these may be mentioned his *Handel Studies* (1859) and *National Music of the World* (edited by H. G. Hewlett after Chorley's death, and published 1880). (See *H. F. Chorley, Auto-*

[1] The writer is indebted to the late P. A. organist of Durham Cathedral for this information. See also William Hutchinson's *History and Antiquities of the County Palatine of Durham* (Newcastle, 1785–94), vol. ii. p. 133 *et seq.*, for further information.

biography, Memoir, and Letters, by H. G. Hewlett. London, 1873.) Chorley is buried in Brompton Cemetery. J. M.

CHORON, Alexandre Étienne (*b.* Caen, Oct. 21, 1772; *d.* Paris, June 29, 1834), writer and composer. He was a good scholar before becoming a musician. He began the study of music without assistance, but afterwards received lessons from the Abbé Roze and the Italian Bonesi.

Highly gifted by nature, he soon acquired great knowledge in mathematics, languages and every branch of music, and published his *Principes d'accompagnement des écoles d'Italie* (Paris, 1804, 3 vols.), in which he introduced Sala's practical exercises on fugue and counterpoint, Marpurg's treatise on fugue, many exercises from Padre Martini's 'Esemplare,' and a new system of harmony of his own—a work which cost him much time and money. In 1805 he became a music publisher, and published many fine works of the best Italian and German masters. In conjunction with Fayolle he then undertook the publication of his *Dictionnaire des musiciens* (2 vols. 8vo, Paris, 1810–11). Though devoted to his scientific studies and hampered with an unsuccessful business, Choron could not resist the temptation of trying his powers as a composer, and gave to the public 'La Sentinelle,' a song long popular, and introduced in many French plays. But his great scheme was his *Introduction à l'étude générale et raisonnée de la musique*, a capital book, which he left unfinished, because his necessities obliged him to devote his time to teaching music and to accept the situation of 'Directeur de la musique des fêtes publiques' from 1812 to the fall of Napoleon. Under Louis XVIII. he had the charge of reorganising the precentorship of the Cathedrals. He was appointed director of the Académie royale de Musique (Opéra) in Jan. 1816, but the appointment having been rudely revoked in 1817 he founded a school for the study of music, which was supported by the Government from 1824–30 under the title of Institution royale de Musique classique et religieuse, but declined rapidly when deprived of external aid. It was taken up later by Niedermayer under the name of 'École de musique religieuse classique.' Amongst the musicians educated by Choron in this famous school we must mention the composers Dietsch, Monpou, Boulanger-Kunzé, the tenor G. Duprez, the critic Scudo; the singers Clara Novello, Rosine Stolz and Hébert-Massy.

The premature death of Choron may be attributed to disappointments and difficulties after the fall of Charles X. This learned musician and very kind-hearted man composed a Mass for three voices, a Stabat for three voices, and a number of hymns, psalms and vocal pieces for the church; but his best titles to fame, after the works already mentioned, are his translations and editions of Albrechtsberger's works, his *Méthode concertante de musique à plusieurs parties* (Paris, 1817), his *Méthode de plain-chant* (1818), his *Manuel complet de musique vocale et instrumentale ou Encyclopédie musicale*, which was published by his assistant Adrien de La Fage in 1836–38 (Paris, 6 vols. and 2 vols. of examples), and several other didactic treatises, which contributed greatly to improve the direction of musical studies in France. In fact, Choron may be considered as a pedagogue of genius, and he had the credit of opening a new field to French musicians, such as Fétis, Geo. Kastner and Adrien de La Fage (see *Fétis* and *Q.-L.*). The reader may also be referred to the *Éloge* of Gauthier (Caen, 1845), and A. de La Fage (Paris, 1843). Scudo, in his *Critique et littérature musicales* (Paris, 1852, p. 333), has given a vivid picture of Choron as director of his school of music. G. C.; addns. M. L. P.

CHORTON, the 'Chorus' or ecclesiastical pitch to which organs were usually tuned in the 17th and 18th centuries. It was considerably higher than the chamber pitch used for secular music. This chamber pitch (*Kammerton*) was of two kinds, the high and the low, but both were below the chorus pitch. (See Pitch; also Spitta, *J. S. Bach*, Engl. tr. ii. 286, 324, 676, etc.) M.

CHORUS (from Gr. χόρος; Fr. *chœur*; Ger. *Chor*; Ital. *coro*). (1) Any body of singers, originally in the drama, subsequently in works of the oratorio type derived from drama, whose performance is of an ensemble as opposed to a solo kind. The word is equally applicable whether such singers sing in unison or polyphony. (See Choir.)

(2) Compositions written for such a body.

(3) In the 17th and 18th centuries the word was commonly used to denote the concerted conclusion of duets, trios, etc. Thus 'Coro' in the scores of Handel's operas.

(4) The refrain of a song, or the part repeated by all available singers. C.

CHORUS, the name in mediæval Latin for the Crot, Crwth (*q.v.*), or Crowd. A manuscript of the 11th century written in England (B.M. Tib. c. vi.) gives an illustration of the chorus and informs us that it was made of wood and had four strings, whilst Aimeric de Peyrac in the 14th century states that they were arranged in two pairs and tuned a fourth apart. Another 11th-century illustration of this bowed crot is in the University Library, Cambridge (MSS. Ff. 1.23), where it is shown without a finger-board and played at the shoulder: the

finger-board appears in a 13th-century MS. of English workmanship (B.M. Add. MSS. 35,166).

Owing to the fact that this Latin name is given at times to a primitive form of bagpipe (as in Gerbert's *De cantu et musica sacra*), the antiquity and popularity of the bagpipe in Scotland and Wales at the end of the 12th century has been strongly advocated; for Giraldus Cambrensis, writing at that time, states that the chorus was in general use in both these countries. But he is evidently alluding to the crot or crwth, however appropriate the name chorus may have been to the bagpipe when the drone or two drones were added to that instrument in the 13th and 14th centuries. F. W. G.

CHOUDENS FILS. This important Parisian music-publishing business was founded in June 1845 by Antoine de Choudens, at whose death, in 1888, his son Paul (*d.* Paris, Oct. 7, 1925) succeeded him. The publications of the firm, which began with an anthology of over 200 vocal pieces called 'I canti d' Italia,' include most of the works of Berlioz, Gounod, Reyer, Lalo, Bruneau, Offenbach, Audran, etc. G. F.

CHOUQUET, Adolphe Gustave (*b.* Havre, Apr. 16, 1819; *d.* Paris, Jan. 30, 1886), wrote the verses of a great many choruses and songs.

From 1840–56 he was teaching in New York. He contributed for a number of years to *La France musicale*, and *L'Art musical*, giving occasional musical articles to *Le Ménestrel* and the *Gazette musicale*; but his chief works are *Histoire de la musique dramatique en France, depuis ses origines jusqu'à nos jours*, Paris, 1873, and *Le Musée du Conservatoire national de Musique*, Paris, 1875, two works containing original views and much information. Chouquet was made keeper of the museum of the Conservatoire in 1871, and made large additions to it. He published the catalogue of the museum in 1875. G.

CHRISMANN, Franz Xavier (*d.* May 20, 1795), secular priest and eminent organ-builder. He worked chiefly in Upper and Lower Austria and in Styria. His name first appears in connexion with a monster organ at the monastery of St. Florian, near Linz, begun in 1770, but left unfinished in consequence of a quarrel with the provost. The fame of this organ spread far and wide, though it was not completed till 1837. He also built organs at the abbey Spital-am-Pyhrn, and in the Benedictine monastery at Admont, both organs destroyed by fire. The latter he considered his best work. Mozart and Albrechtsberger were present in 1790 at the opening of an organ built by Chrismann in the church of Schottenfeld, one of the suburbs of Vienna, and both pronounced it the best organ in Vienna. Though little known it is still in existence, and in spite of its small dimensions the workmanship is admirable, particularly the arrangement and voicing of the stops. Chrismann died in his seventieth year, when engaged upon an organ for the church of the small town of Rottenmann in Styria, where there is a monument to his memory. C. F. P.

CHRISTMANN, Johann Friedrich (*b.* Ludwigsburg, Sept. 10, 1752; *d.* Heutingsheim, near Ludwigsburg, May 21, 1817), Lutheran clergyman, composer, pianist, flautist and writer on the theory of music.

He was educated at Tübingen, and in 1783 was appointed minister of Heutingsheim. His great work *Elementarbuch der Tonkunst* is in two parts (Spire, 1782 and 1790) with a book of examples. He was joint editor of the Spire *Musikalische Zeitung*; in which, among other articles of interest, he detailed a plan (Feb. 1789) for a general Dictionary of Music. This scheme was never carried out. He was also a contributor to the *Musikalische Zeitung* of Leipzig. Christmann composed for voice and piano, and with Knecht arranged and edited a valuable collection for the Duchy of Würtemberg, entitled 'Vollständige Sammlung . . . Choral-melodien.' Many of the 266 hymns were his own composition. He was a friend of the Abbé Vogler. M. C. C.

CHRISTMAS ORATORIO (Ger. *Weihnachtsoratorium*), a sequence of 6 church cantatas, by Bach, for the various holy days of Christmastide. The words are written and compiled by Picander and Bach himself, and the series was composed in 1734 (see Spitta, *Bach*, Engl. tr., ii. 570 ff.; see also Bach).

CHRISTO, Fr. Estevão de (*b.* Torres Novas, nr. Lisbon; *d.* Thomar, 1613), a Portuguese monk, who professed in the Monastery of Thomar in 1559 where he arranged and edited music for processions and for Holy Week, for general use in Portugal. His 'Processionale' was printed at Coimbra in 1593; his 'Liber Passionum,' at Lisbon in 1595. The latter was provided with a preface by the celebrated composer Duarte Lobo, but was afterwards found to be incorrect. The 'Introducção facilissima e novissima do canto fermo' attributed to him was probably the work of Vicente Lusitano. J. B. T.

CHRISTO, Fr. Luiz de (*b.* Lisbon ?, 1625; *d.* there, Sept. 7, 1693), a Portuguese monk of the Carmelite order, who was also an organist and composer. His works include Passions according to the four evangelists (for 4 v.), 'Liçoẽs ? (lectiones) de Defunctos,' motets and vilhancicos. J. B. T.

CHRISTUS: (1) Mendelssohn's unfinished oratorio, the completed portions of which were first performed at the Birmingham Musical Festival, Sept. 8, 1852 (see Mendelssohn). G.

(2) Liszt's second oratorio performed Budapest 1873, in celebration of the jubilee of the composer's career (see Liszt).

CHRISTUS AM ÖLBERGE, the original title of Beethoven's MOUNT OF OLIVES.

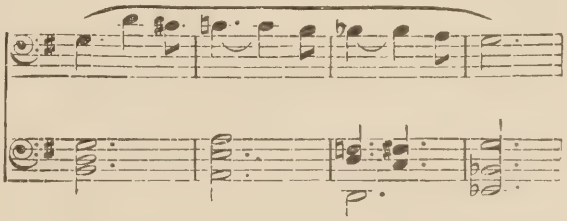
CHROMATIC. A word derived from the Greek χρωματικός, the name of one of the ancient tetrachords, the notes of which were formerly supposed to be similar to the scale known as 'chromatic' in later times.

(1) Instruments are said to be chromatic when throughout the whole or a substantial part of their compass they can be made to produce all the notes of the chromatic scale.

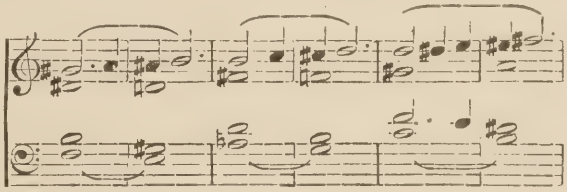
(2) In melodic and harmonic analysis the term chromatic is generally applied to notes marked with accidentals which are abnormal to the scale of the key in which the passage occurs. Hence a note which is chromatic with reference to a particular key may cease to be chromatic if a suitable modulation occurs at the same time. This is also true of chords which are chromatic in this sense. The exact application of the word chromatic will therefore depend on the view which is taken of the true definition of key in the chosen context. Thus in the following example from John Daniel ('Chromatic Tunes,' 1606) the first part of the

melody is chromatic. So in the broad sense is the character of the whole harmonic structure, with reference to the prevailing key of G minor. But if the incidental modulations, to C minor, F major, and so forth, are taken into particular account, then no one of the notes of the melody is actually chromatic at the moment of utterance. Ambiguity of this kind is very frequent in what is commonly called chromatic harmony, though in the music of the classical period, when the definition of keys was strongly emphasised, there is usually no difficulty in using the term chromatic with fair consistency.

The following melody from Mozart's symphony in D is highly chromatic.



So is the following passage from Beethoven's sonata in B♭ (op. 106), the movement quoted being in the key of D.



G. D.

CHROMATIC HARP, see HARP.

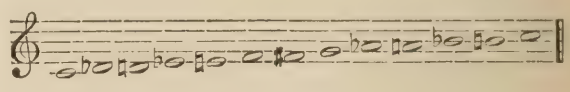
CHROMATICISM. A consistent historical tendency towards scalar and harmonic expansion, which takes the form of bringing into ordered relation to a given system elements that were originally chromatic and external to it. There were, even in the rigid technique of the ecclesiastical modes, contingencies in which a foreign note might be introduced, but it was not until classical tonality made the major and minor scales the exclusive pivots around which all developments had to be grouped, that chromaticism became a marked feature of melodic and harmonic evolution. The fundamental position of the chromatic scale as a limit of expansion no doubt reinforced this tendency, and in a comparatively short time there was no element in it which had not found a more or less formal relation to the prevailing melodic and harmonic values. The examples already given under the heading CHROMATIC will be sufficient to show how far this tendency had progressed up to the period of Beethoven. The 19th century took for granted the ground already gained, and proceeded to knit these chromatic features ever more closely into the classical fabric. From chromaticisms that were comparatively unaccented, as in the following from Wagner's 'Tannhäuser,' the step was made to harmonies

in which the prevailing colour was unmistakably chromatic. The following example is reduced from Wagner's 'Tristan und Isolde.'

At the same time melody, which had heretofore moved somewhat circumspectly with reference to chromatic notes, began to treat them with marked freedom, as in the following, which is also reduced from Wagner's 'Tristan und Isolde.'

And this freedom in the incorporation of chromatic material has been steadily pursued by Wagner's successors.

In analogous fashion, chromaticism in the sense defined is a feature in the neo-modal and other non-classical systems which contemporary music is in process of exploring. Whether such systems are derived from the past or are modern inventions of modal type, they are rarely used rigidly. All kinds of progressions which are chromatic with reference to the chosen system are incorporated freely, and at least one of these modern modes, the whole-tone scale, is itself inherently chromatic in derivation. The combination of tonalities also involves, from the traditional point of view, an increasingly chromatic attitude towards the elements of music, and all these technical expansions, whatever their derivation, serve to encourage the tendency under discussion. The expansion of any scale or mode may indeed achieve, as the classical system has achieved, a chromaticism which is complete to a degree.



There is, however, a still more radical view of the structure of music which is discernible in some of the features of contemporary work, and which seems to point to a logical end towards which all expansions might theoretically converge. This is the adoption, more or less acknowledged, of the chromatic scale itself as a homogeneous musical medium. In extreme form this would be pure chromaticism. Considered from such a point of view, all the various scales, with their respective melodic and harmonic values, to which music has hitherto attached itself, become stages in the approach towards what is undoubtedly an all-inclusive system. The chromatic scale is in fact the final arbiter as to what shall be music, and this has been true both in theory and practice ever since equal temperament in tuning fixed our system of intervals. There is therefore a certain logical appeal in a theory that would accept chromaticism without reservation, and attempts have been made to write in this medium, all the traditional values being modified or ignored. It cannot be said that there is as yet any æsthetic evidence that the method is more than an intellectual abstraction, but the following passage from Arnold Schönberg's op. 11 may be taken as embodying

in comparatively simple terms the extreme point of view.

CHROMATIC SCALE. The scale of twelve semitones, which is the fundamental scale of all the music of western civilisation. Since permanent values were given to all the traditional intervals of pitch, the chromatic scale has included all the notes available in our notation, and has also coincided with the notes produced by instruments which have a fixed mechanism. It therefore represents a technical limit beyond which variations of pitch have no recognised place in our musical system.

The notation of the chromatic scale has never been altogether consistent, owing to the fact that the accidentals employed were originally related to the more variable intervals which preceded equal temperament. Thus for every note in the chromatic scale there are now, admitting double sharps and double flats, at least two forms of notation. Moreover, composers have tended to become less concerned with the theoretical basis of notation, with the result that simplicity in writing or reading has often been the only reason for a particular choice of method. With reference to the key of C the following is theoretically consistent.

The choice of notation here follows the traditional analysis of classical harmony, and similar relations to other keys can be deduced by regarding each sound respectively as representing, in the chosen key, the tonic, minor second, major second, minor third, major third, perfect fourth, augmented fourth, perfect fifth, minor sixth, major sixth, minor seventh and major seventh. It is clear, however, that the use of natural signs would be largely avoided if sharps in ascending, and flats in descending, were more frequently chosen. Practical convenience of this kind has led many composers to prefer this latter method.

(See also EQUAL TEMPERAMENT; HARMONY; MODE; NEO-MODAL; SCALE; TONALITY.)

G. D.

CHRYSANDER, FRIEDRICH (*b.* Lübthee, Mecklemburg, July 8, 1826; *d.* Bergedorf, Sept. 3, 1901), is known to the musical world chiefly through his profound and exhaustive researches on Handel, to which he devoted his life.

He studied at the University of Rostock, lived for some time in England, and later on his own estate at Bergedorf, near Hamburg. His biography of Handel, standing evidence of his studies, remains incomplete.[1] In detail and historical research it remains the ground-

[1] Breitkopf & Härtel, Leipzig: vol. i. 1858; vol. ii. 1860; vol. iii. part 1, 1867.

work of all subsequent study of Handel's history, although certain details have since received correction, and its view of Handel's abstract importance as a musician must be accepted with reservation. He represents him not only as the culminating point of a previous development, and the master who perfected the oratorio, but as the absolute culminating point of all music, beyond whom further progress is impossible. While holding these views Chrysander was naturally a declared opponent of all modern music; he was also partial, if not unjust, in his criticisms on the older masters, such as J. S. Bach. Besides these biographical studies Chrysander edited the complete works of Handel for the German 'HÄNDEL-GESELLSCHAFT' (*q.v.*). His laborious collations of the original MSS. and editions, his astounding familiarity with the most minute details, and his indefatigable industry, combine to make this edition a work of the highest importance, at once worthy of the genius of Handel and honourable to the author. In continuation of his task of popularising Handel's works in Germany, after the completion of the undertaking, Chrysander issued several of the oratorios with suggested abbreviations such as are required in the present day, and with the addition of many cadenzas from old copies. Some so treated are 'Hercules,' 'Deborah,' 'Esther' and 'Messiah.' Amongst other writings of Chrysander may be mentioned two admirable treatises, *Über die Molltonart in Volksgesängen*, and *Über das Oratorium* (1853); also *Die Jahrbücher für musikalische Wissenschaft*, in 2 vols., 1863–67 (Breitkopf & Härtel); and finally a number of articles in the *Allgemeine musikalische Zeitung* of Leipzig (which he edited from 1868–71, and again from 1875 to its cessation in 1882), violently criticising the productions of the modern school. Of the highest importance in musical literature was the *Vierteljahrsschrift für Musikwissenschaft*, undertaken with Spitta and Guido Adler, which appeared between 1885 and 1895. He also published some excellent editions of Bach's 'Klavierwerke' (4 vols., with preface; Wolfenbüttel, 1856), and Carissimi's oratorios 'Jephte,' 'Judicium Salomonis,' 'Jonas' and 'Baltazar,' which appeared in his collection *Denkmäler der Tonkunst* (Weissenborn, Bergedorf). Complete editions of the works of Corelli (ed. Joachim) and Couperin (ed. Brahms) began in the same series. As a supplement to the Handel edition, five works were reissued, from which Handel had appropriated ideas or portions: No. 1 was the Magnificat of Erba; No. 2 the Te Deum of Urio (previously published in the *Denkmäler*); No. 3 a serenata of Stradella; No. 4 a book of duets by Clari; and No. 5 Gottlieb Muffat's harpsichord pieces, 'Componimenti musicali' (see DENKMÄLER). An interesting obituary notice, by his son-in-law, Mr. Charles Volkert, appeared in the *Mus. T.* for Oct. 1901. A. M., with addns.

CHUECA, FEDERICO (*b.* Madrid, May 5, 1846; *d.* there, June 20, 1908), a Spanish composer of comic operas whose mind was steeped in the popular street-songs of his country and who had the happy knack of composing the kind of music which Madrid audiences liked to hear. 'Cadiz' and 'Caramelo' are Andaluz in feeling, 'La alegría de la huerta' is Murcian, while the third act of 'La Caza del Oso' is built on tunes from the Asturias. He received a good education, and spent his vacations with a street band which he had organised for the amusement of himself and his friends. A set of waltzes for orchestra, 'Lamentos de un preso,' attracted the attention of Barbieri, who was conductor of the Sociedad de Conciertos, and their success in performance decided Chueca to adopt music as a career. He produced a large number of delightful comic operas, including 'Pobre Chica,' 'El Caballero de Gracia,' 'La Gran Via' (with VALVERDE); while 'Cadiz' has a charm and lightness of touch comparable with that of Barbieri, Sullivan or Offenbach. Chueca is the typical composer of the period of modern Spanish history known as the Restoration. J. B. T.

CHURCH, (1) JOHN (*b.* Windsor, 1675; *d.* Jan. 6, 1741), received his early musical education as a chorister of St. John's College, Oxford. On Jan. 31, 1697, he was admitted a gentleman of the Chapel Royal, and on Aug. 1 following was advanced to a full place, vacant by the death of James Cobb.

He obtained also in 1704 the appointments of lay vicar and master of the choristers of Westminster Abbey. He is buried in the south cloister of Westminster Abbey. Church composed some anthems and services (Tudway Collection, MSS., R.C.M., B.M., Ch. Ch., etc.). His service in F appears in Ouseley's 'Cathedral Music,' 1853; he wrote also many songs, and was the author of an *Introduction to Psalmody*, published in 1723. The editorship of *Divine Harmony*, an important collection of the words of anthems used in the Chapel Royal (1712), has been frequently ascribed to Croft, but Davey,[1] on the evidence of Thomas Ford's MSS. in the Bodleian, considers it to have been the work of Church. (2) RICHARD (1699–1776), cousin of the above, was organist of Gloucester Cathedral (Davey). W. H. H., with addns.

CHURCH CHORAL SOCIETY, see NEW YORK.

CHURCH MUSIC SOCIETY, THE, was inaugurated March 20, 1906, at a meeting held at the Church House, Westminster, with the object of facilitating

'The selection and performance of the music which is most suitable for different occasions of Divine Worship, and for choirs of varying powers.'

Its organisation consists of a president,

[1] *Hist. Eng. Mus.* (ed. 1921), p. 343.

vice-presidents, treasurer, one or more secretaries, a council and executive committee, all of whom are elected annually. The 19th annual report (1925) gives a list of about 1000 members who are of three classes: (1) Life members (a donation of not less than £5), (2) ordinary members (annual subscription 5s.) and (3) Associates (organists, choirmasters, parochial clergy, etc., who are asked only to pay for postage of literature).

The society has done much useful work of an advisory kind; it arranges lectures, practices and courses of study in church music, and has published a Choral Service Book, many occasional papers and a valuable series of reprints of old church music for parish choirs. Sydney H. NICHOLSON (*q.v.*) is chairman of the executive, and the Lady Mary Trefusis, with others, is honorary secretary. C.

CHUTE, the name of an *agrément* of the French school. The word is sometimes used of the COULÉ (see ORNAMENTS). E. B[L].

CHVALA, EMANUEL (*b.* Prague, Jan. 1, 1851), writer and composer, studied the pianoforte with Cainer and Celestin Müller, and theory with Josef Foerster and Fibich; he also occupied himself to some extent with composition. In 1878, Josef Sladka persuaded him to write on musical questions for his publication *Lumir*, and it is in this direction that he has done the greatest service to Czechoslovak art, contributing also important articles to 'Dalibor,' 'Politik' and other journals. His criticism is sound and free from exaggerated Chauvinism. A series of essays in German, entitled *A Quarter of a Century of Bohemian Music* (1862–87), helped to introduce the works of his compatriots to a wider public. His compositions include songs—many in the folk-style; pianoforte pieces; a romance and little suite for violin; string quartets in D minor and C minor, a trio in G minor and a quintet in B flat major; a concert overture in C, a sinfonietta, 'Impressions of Spring,' and a tone picture, 'Wake-night,' considered the most successful of his compositions. Chvala fills an important official position as director in chief of State railways. R. N.

CHWATAL, (1) FRANZ XAVER (*b.* Rumburg, Bohemia, June 19, 1808; *d.* Soolbad, Elmen, June 24, 1879), was a music-teacher from 1832 at Merseburg, and from 1835 at Magdeburg.

He produced salon-pieces for the piano (to the number of 200 or upwards), and two pianoforte methods.

His brother, (2) JOSEPH (*b.* Jan. 12, 1811), founded an organ-factory at Merseburg, under the name of Chwatal und Sohn, which has brought out several small improvements in organ-action. M.

CIAJA, AZZOLINO BERNARDINO DELLA (*b.* Siena, Mar. 21, 1671), composer, organist and amateur organ-builder.

Besides his published works—'Salmi concertati' (Bologna, 1700), 'Cantate da camera' (Lucca, 1701, and Bologna, 1702), 'Sonate per cembalo' (Rome, 1727)—he left in MS. 4 masses and several cantatas and motets (see *Q.-L.*); but it is by his instrumental composition that he is now known, and his treatment of the sonata form is held to be of some importance in the history of the art (see Adolf SANDBERGER: *Zur älteren italienischen Klaviermusik*). In 1733, Ciaja, as a Knight of St. Stephen, presented a magnificent organ to the church of that order in Pisa, still one of the finest in Italy, containing 4 manuals and 100 stops. He not only superintended its construction, but personally assisted the workmen. M. C. C.

CIAMPI, FRANCESCO (*b.* Massa, *c.* 1704), an excellent violinist who went to Venice *c.* 1728, where he composed and produced a number of operas between 1729 and 1762. Burney praises a Mass and a Miserere; and Mendel confirms his opinion with regard to the latter, which is in the Hofburg Library, Vienna. E. v. d. S.

CIAMPI, LEGRENZIO VINCENZO (*b.* Piacenza, 1719), dramatic composer, now remembered chiefly as the composer of the famous song 'Tre giorni son che Nina' (see *Oxf. Hist. Mus.* vol. iv. p. 234, and *Mus. T.*, 1899, pp. 241-3), erroneously ascribed to Pergolesi. The song was introduced into his opera, 'Gli tre cicisbei ridicoli,' by Ciampi.

He came to London in 1748 with a company of Italian singers, and between that year and 1762 produced 'Gli tre cicisbei ridicoli,' 'Adriano in Siria,' 'Il trionfo di Camilla,' 'Bertoldo in Corte,' previously performed in Italy, 'Didone,' 'Catone in Utica,' 'Il negligente,' and some songs in the pasticcio 'Tolomeo.' Burney says that 'he had fire and abilities' but no genius. His comic operas were the most successful, but 'Didone' is said to contain beautiful music. He also composed 12 trios for strings, 6 organ concertos, 6 concertos of 6 parts, Italian songs, overtures, and a Mass (1758), now in the State Library at Berlin. M. C. C., with addns.

CIANCHETTINI, (1) VERONICA ELIZABETH (*née* DUSSEK) (*b.* Czaslau, Bohemia, 1779; *d.* London, 1833), pianist and composer, studied the pianoforte under her father from infancy. In 1797 she joined her brother, J. L. Dussek, in London, where she married Francesco Cianchettini. She was a successful teacher, and composed two concertos and several sonatas for the pianoforte.

Her son, (2) PIO (*b.* London, Dec. 11, 1799; *d.* Cheltenham, July 20, 1851), was a composer and pianist. At 5 years old he appeared at the Opera House as an infant prodigy. A year later he travelled with his father through Holland, Germany and France, where he was hailed as the English Mozart. By the age of

8 he had mastered the English, French, German and Italian languages. In 1809 he performed a concerto of his own composition in London. Catalani appointed him her composer and director of her concerts, and frequently sang Italian airs which he wrote to suit her voice. He published a cantata for two voices and chorus to words from 'Paradise Lost'; music to Pope's 'Ode on Solitude'; 'Sixty Italian Notturnos' for two, three and four voices, and other vocal pieces. He was also editor and publisher of a book of canons by Padre Martini, as well as of the scores of many symphonies and overtures of Mozart and Beethoven. M. C. C.

CIBBER, Susanna Maria (*b.* Feb. 1714; *d.* Jan. 30, 1766), singer, sister of Dr. Thomas Augustine Arne, the celebrated composer, made her first public appearance, Mar. 13, 1732, at the Haymarket Theatre, as the heroine of Lampe's opera 'Amelia,' with considerable success.

In Apr. 1734 she became the second wife of Theophilus Cibber. On Jan. 12, 1736, Mrs. Cibber made 'her first attempt as an actress' at Drury Lane Theatre in Aaron Hill's tragedy of 'Zara,' and was soon accepted as the first tragedian of her time, a position which she maintained for thirty years. Her success as an actress did not, however, lead her to abandon her position as a vocalist; in the theatre she continued to represent Polly in 'The Beggar's Opera,' and other like parts. The contralto songs in the 'Messiah,' and the part of Micah in 'Samson,' were composed by Handel expressly for her. Her voice, according to all contemporary testimony, although small, was indescribably plaintive, and her powers of expression enabled her to impress most forcibly upon the mind of the hearer the meaning of the language to which she gave utterance. And what sterling advantages must have been derived from the combination of the powers of a great actress with those of a vocalist in the delivery of recitative! Mrs. Cibber is buried in the north cloister of Westminster Abbey. It is said that Garrick, on hearing of her death, exclaimed, 'Then Tragedy expired with her.' W. H. H.

CICONIA (? a translation of 'Ooijevaar' = stork), Joannes (*b.* Liège, late 14th cent.), was a canon at Padua, theorician and composer. There is a MS. treatise (*De proportionibus*) in the Ferrara library, and at Pisa; *Nova musica* (4 vols., MS. copy), Bologna; *Incipit praephatio nove musice* (5 vols.), Florence; Riccardiana, chansons, etc., in collect. cod. of various towns; new editions by Wolf, Riemann, Stainer. (See *Q.-L.* and *Riemann.*) E. v. d. S.

CID, LE, opera in 4 acts; words by Ad. D'Ennery, Louis Gallet, and Édouard Blau; music by J. Massenet. Produced Opéra, Paris, Nov. 30, 1885. (See also Cornelius.)

CIFRA, Antonio, (*b.* Rome, *c.* 1575; *d.* Loreto, *c.* 1638), was one of the few pupils actually taught by Palestrina during the short time that the great master associated himself with the school of Nanini.

In 1609 he was maestro at the German college in Rome, in 1610 he was maestro at Loreto, but in 1623 removed to San Giovanni in Laterano. Two years later he entered the service of the Archduke Charles, and about 1628 returned to Italy. That he was an erudite and elegant musician is shown by the fact that the Padre Martini inserted an Agnus Dei of his, as a specimen of good work, in his essay on counterpoint. He himself published a large quantity of his masses (1619 and 1621), motets, madrigals and psalms, at Rome and at Venice, of which a detailed catalogue is given in *Q.-L.* After his death Antonio Poggioli of Rome published a volume containing no less than 200 of his motets for 2, 3, 4, 6 and 8 voices. The title-page of this book contains a portrait of him taken in the 45th year of his age. Underneath the engraving are the following exceedingly poor verses—

'Qui poteras numeris sylvas lapidesque movere,
Siccine praeruptus funere, Cifra, siles?
Fallimur; extincto vivis laetissimus aevo.
Et caneris propriis clarus ubique modis.'

Cifra is among the 'masters flourishing about that time in Italy,' of whose works Milton sent home 'a chest or two of choice music books.' (Phillips's *Memoir.*) E. H. P.

CILÈA, Francesco (*b.* Palmi, Calabria, July 29, 1866), composer.

His parents were Giuseppe Cilèa, an advocate, and Felicità Grillo. Although passionately devoted to music from his earliest years, he received no regular instruction, until at the age of 9 he was fortunate enough to enlist the sympathy of Francesco Florimo, the friend of Verdi, and the librarian at the Conservatorio of Naples. Florimo strongly recommended his parents to devote him to a musical career, and the boy was sent a year later to a *Liceo-convitto* at Naples, where he devoted himself ardently to the study of the pianoforte. In 1881 he entered the Naples Conservatorio, where he studied the pianoforte with Beniamino Cesi, and counterpoint and composition with Paolo Serrao. In 1889, while still at the Conservatorio, he produced his first opera, 'Gina,' a work in three acts, to a libretto by Golisciani. Its success was so marked that Sonzogno, the publisher, commissioned the young composer to write another opera in three acts, 'La Tilda,' which was produced at the Pagliano Theatre, in Florence, Apr. 1892, and was received with much favour. Cilèa continued to write much for the pianoforte, and in 1894 produced a sonata for violoncello and pianoforte. In 1896 his 'L'Arlesiana,' an opera in three acts, founded upon Alphonse Daudet's famous drama, was produced at the Teatro Lirico,

Milan. The music was charming, and the composer's clever use of folk-tunes was much admired, but the libretto was poorly constructed and the opera was not very successful. In 1896 Cilèa was appointed professor at the R. Istituto Musicale at Florence, where he remained until 1904. His next opera was 'Adriana Lecouvreur,' written to a libretto drawn by Colautti from Scribe's well-known play. This was produced at the Teatro Lirico, Milan, in Nov. 1902. 'Adriana' first carried his fame beyond the Alps. It was produced at Covent Garden in Nov. 1904. Though not conspicuous for dramatic power, it is a work of decided charm and accomplishment. The lighter scenes, in particular, are very cleverly handled, and show welcome signs of the genial influence of Verdi's 'Falstaff.' A later opera, 'Gloria,' written to a libretto by Colautti, was produced with emphatic success on Apr. 15, 1907, at La Scala theatre, Milan. R. A. S.

CIMA, (1) Giovanni Paolo, of Milan, organist there in 1609. He wrote motetti, ricercari, concerti ecclesiastici, etc.; also instrumental music between 1598 and 1610 (*Q.-L.*). (2) Tullio (*b.* Ronciglione, near Rome, *c.* 1620), a singer at the Lateran, Rome. In 1621 he signs the dedication of his 'Sacrae Cantiones' at Valentani, and in 1648 he calls himself LL.D. He wrote a considerable number of church compositions, motets, etc. (See *Q.-L.*) E. v. d. S.

CIMADOR, Giambattista (*b.* Venice, *c.* 1761; *d.* London, *c.* 1808), composer, and player on the violin, violoncello and pianoforte, born of a noble family in Venice.

In 1788 he produced in Venice 'Pimmalione,' an interlude, with which, notwithstanding its success, he was so dissatisfied as to burn the score and renounce composition for the future. Cherubini used the words of several scenes from this interlude for his opera of 'Pimmalione.' About 1791 Cimador settled in London as a teacher of singing. Hearing that the orchestra of the King's Theatre, in the Haymarket, had refused to play Mozart's symphonies on account of their difficulty, he arranged six of them as sestets for strings and flute. The work was well done, and the symphonies first made known in this form speedily took their proper place with the public. He composed duos for two violins and violin and alto, a concerto for the double-bass, and a few vocal pieces.

M. C. C.

CIMAROSA, Domenico (*b.* Aversa, Naples, Dec. 17, 1749; *d.* Venice, Jan. 11, 1801), one of the most celebrated Italian dramatic composers.

Cimarosa, who was the son of poor working people, received his musical training at the Conservatorio Santa Maria di Loreto. He attended that celebrated school for 11 years (1761–72), and acquired a thorough knowledge of the old Italian masters under Manna, Sacchini, Fenaroli and Piccinni. In 1772 he produced his first opera, 'Le stravaganze del conte,' at the Teatro de' Fiorentini in Naples, which was so successful as to give him at once a place among composers. From that date till 1780 he lived alternately at Rome and Naples, and composed for the two cities some 20 operas, 'L' Italiana in Londra' (Rome, 1779) among the number. Between 1780 and 1787 he was busy writing as the acknowledged rival of Paisiello, who, up to that time, had been undisputed chief of Italian operatic composers. His operas were also performed abroad, not only in London, Paris, Vienna and Dresden, where an Italian opera existed, but elsewhere, through translations. To this period belong 'Il pittore parigino' (1781), 'Il convito di pietra' (1781), 'La ballerina amante' (Venice, 1783), 'L' Olimpiade' (1784), 'Artaserse' (1784), 'Il sacrifizio d' Abramo,' and 'L' impresario in angustie' (1786). In 1787 Cimarosa was invited to St. Petersburg as chamber composer to Catherine II., and there developed an amazing fertility in every species of composition. Among his operas of this time should be mentioned 'La Cleopatra' and 'La vergine del sole' (1788). Some years later, on the invitation of Leopold II., he succeeded Salieri as court Kapellmeister, and it was in Vienna that he composed his most celebrated work, 'Il matrimonio segreto' (1792), a masterpiece of its kind, which at the time roused an extraordinary enthusiasm, and is the only work by which Cimarosa is at present known. So great was the effect of its first performance, that at the end the Emperor had supper served to all concerned, and then commanded a repetition of the whole. His engagement at Vienna terminated by the Emperor's death (1792). Salieri was again appointed Kapellmeister, and in 1793 Cimarosa returned to Naples, where he was received with every kind of homage and distinction; 'Il matrimonio segreto' was performed fifty-seven times running, and he was appointed Kapellmeister to the King, and teacher to the princesses. From his inexhaustible pen flowed another splendid series of operas, among which may be specified 'Le astuzie feminili' (1794), 'L' amante disperato' and 'L' impegno superato' (1795), and the serious operas 'Gli Orazii e Curiazii' (1794), 'Penelope' (1795), 'Achille all' assedio di Troja' and 'Semiramide' (1799). His last years were troubled by a melancholy change of fortune. The outbreak of revolutionary ideas carried Cimarosa with it, and when the French republican army marched victoriously into Naples (1799) he expressed his enthusiasm in the most open manner. Cimarosa was imprisoned and condemned to death. Ferdinand was indeed prevailed upon to spare his life and restore him to liberty on condition of his leaving

Naples, but the imprisonment had broken his spirit. He set out for St. Petersburg, but died at Venice, leaving half finished an opera, 'Artemisia,' which he was writing for the approaching carnival. It was universally reported that he had been poisoned, and in consequence the Government compelled the physician who had attended him to make a formal attestation of the cause of his death.

Besides his operas (66 are enumerated in *Q.-L.*), Cimarosa composed several oratorios, cantatas and masses, etc., which were much admired in their day. His real talent lay in comedy—in his sparkling wit and unfailing good-humour. His invention was inexhaustible in the representation of that overflowing and yet naïf liveliness, that merry teasing loquacity which is the distinguishing feature of genuine Italian 'buffo'; his chief strength lies in the vocal parts, but the orchestra is delicately and effectively handled, and his ensembles are masterpieces, with a vein of humour which is undeniably akin to that of Mozart. It is only in the fervour and depth which animate Mozart's melodies, and perhaps in the construction of the musical scene, that Cimarosa shows himself inferior to the great master. This is more the case with his serious operas, which, in spite of their charming melodies, are too conventional in form to rank with his comic operas, since taste has been so elevated by the works of Mozart. Cimarosa was the culminating point of genuine Italian opera. His invention is simple, but always natural; and in spite of his Italian love for melody he is never monotonous; but both in form and melody is always in keeping with the situation. In this respect Italian opera has manifestly retrograded since his time. A bust of Cimarosa, by Canova, was placed in the Pantheon at Rome.

Diaghilev's production of 'Le astuzie feminili' (Paris and London, 1920), in a highly decorative version, marked the beginning of a revived interest in Cimarosa and the opera of his time. A. M.

CIMBALOM, see Dulcimer.

CINCINNATI, Ohio, has been an important centre of musical activity since the foundation of the biennial musical festival in 1873, described below. A number of efforts, important in the musical history of America, led up to this event.

The story begins, logically, with the first of the German 'Sängerfeste,' which have been held periodically in different cities of the United States since 1849. German societies devoted to 'Männergesang' existed in the large cities of the Atlantic coast before they did in the Ohio valley, but the first union of such societies for festival purposes took place in Cincinnati in 1849. It was an extremely modest affair, the choir numbering only 118 singers, and only one concert being given. But as a result of the meeting the North American 'Sängerbund' was formed, and its festivals soon grew to such enormous dimensions that it became necessary to erect temporary halls for their accommodation. In 1870 one of these festivals was given in the city which had seen their birth. Nearly 2000 singers participated, and the merchants of the city, desirous of having a building spacious enough to accommodate a textile fabrics exhibition, aided the 'Sängerfest' officials in the erection of a large hall, and after the festival preserved it for exhibition purposes.

At this period Theodore Thomas (*q.v.*) used to visit the larger cities of the middle West with his symphony orchestra. When in Cincinnati one day in the spring of 1872, the project of holding a national festival of the singers of the United States in the convenient Exposition Hall was broached to him. The plan was not essentially different from that of the German festivals which had prompted it, except that it was to be a meeting of mixed choirs, the English language was to be used and the orchestral feature was to be lifted into prominence.

Cincinnati Musical Festival.—A committee was formed, a guarantee fund collected and an invitation issued 'to the Choral Societies of America,' describing the projected festival, and stating its object to be

'to elevate and strengthen the standard of choral and instrumental music, and also to bring about harmony of action between the musical societies of the country, and more especially of the West.'

Thirty-six societies, representing 1250 singers, accepted the invitation. Some of the acceptances came from cities many hundred miles distant, but the majority were from Cincinnati and the cities and towns of Ohio. Twenty-nine societies were present at the first general rehearsal. The festival was held on May 6, 7, 8, 9, 10, 1873. The chorus numbered about 1000, the orchestra 108, with Thomas's band as a nucleus, and the principal works performed were Beethoven's 'Choral Symphony,' Handel's 'Dettingen Te Deum' and scenes from Gluck's 'Orpheus.' The festival aroused much popular enthusiasm, and steps were at once taken for a second meeting two years later, the most important being the formation of the Cincinnati Biennial Musical Festival Association, a corporate body that has conducted the business affairs of all the festivals since. The second festival, held in 1875, was followed by a movement looking to the permanency not only of the festivals but also of their home. The wooden building which had housed the German 'Sängerfest' of 1870 was replaced by a substantial and beautiful hall with wings constructed to serve exposition purposes, a gift to

the city made by Reuben R. Springer, a retired merchant, and other public-spirited citizens. The hall was provided with a magnificent organ (at the time of its construction one of the half-dozen largest in the world). The erection of this building compelled the postponement of the third festival to 1878, but public interest had been so wrought up that with expenses aggregating $55,595, there was yet a profit from the festival of over $32,000, nearly one-half being given by the Festival Association to the fund then being raised for the organ, the building of which had been undertaken by a special organisation. The plan of uniting societies in the festival was now abandoned, and the singers organised into a permanent choir, whose affairs are all managed by the Festival Association. In 1880 this choir contained over 600 voices, but since 1890 it has numbered about 400.

With the single exception noted above, the festivals have been held regularly every two years in May. Thomas continued to conduct until 1904. He was succeeded by van der Stucken (see STUCKEN), 1906–12; Ernst Kunwald conducted the festivals of 1914 and 1916; Eugène YSAŸE (*q.v.*) that of 1918.

The programmes have ranged widely, including with most of the great choral classics new works by such composers as Elgar, Pierné and Wolf Ferrari, as well as occasional works by native composers.

H. E. K.; addns. from *Amer. Supp.*, etc.

THE CINCINNATI SYMPHONY ORCHESTRA was organised in 1895 under the auspices of the Cincinnati Orchestra Association, supported by stock-holders and subscribers to a guarantee fund. In the first season there were three series of concerts conducted by Frank van der Stucken, Anton Seidl and Henry Schradieck. Van der Stucken was then engaged as sole conductor and remained for twelve years, during which period ten afternoon and ten evening concerts were given annually. At the close of the 13th season (1906–07) the Orchestra Association, rather than submit to the dictation of the American Federation of Musicians, disbanded the orchestra. It was reorganised in 1909, with Leopold Stokowski as conductor, who continued in that capacity till May 1912. In October of that year Dr. Ernst Kunwald succeeded him, remaining till Dec. 1917. During the rest of that season the orchestra had as guest conductors Walter Rothwell, Victor Herbert, Henry Hadley, Ossip Gabrilowitsch and Eugène Ysaÿe. In 1918 Ysaÿe was engaged as permanent conductor; he resigned in 1922, and was succeeded by Fritz Reiner, who was re-engaged in 1923 for a period of four years.

The orchestra during Stokowski's time consisted of 77 men; in Kunwald's of 85, and during the regime of Ysaÿe was increased to 90, at which number it still stood in 1924. Fourteen pairs of concerts are given on alternate weeks during the season; also twelve popular concerts on Sunday afternoons and four children's concerts and an average of thirty concerts on tour. The orchestra is supported by an endowment fund of $700,000 bequeathed by the late Cora Dow in 1915 and by a generous guarantee fund subscribed by citizens of Cincinnati to cover the inevitable annual deficit. R. A.

CONSERVATORY OF MUSIC.—The Cincinnati Conservatory was started in 1867 by Clara Baur and directed by her until her death in 1912. Her niece, Bertha Baur, then carried on the institution. The instruction is arranged in five grades from juvenile to 'master' courses. The staff numbers about 75, students from 1200 to 1500. A students' orchestra conducted by P. A. Tirindelli has been an important feature in the training. (See *Amer. Supp.*)

CINELLI, the Italian name for CYMBALS (*q.v.*). M.

CINQ MARS, an 'opéra dialogué' in 4 acts; words by Poirson and Gallet, music by Gounod. Produced Opéra-Comique, Paris, Apr. 5, 1877; in London (in English) Coronet Theatre (Carl Rosa Co.), Nov. 17, 1900. M.

CINQUES, the name given to changes rung on 11 bells. The word, from its derivation, indicates that *five* pairs of bells change their places in each successive permutation. It must be understood that although the changes are rung on 11 bells, 12 bells are used, the 12th (tenor) being the last bell in every change. W. W. S.

CINTI, see DAMOREAU.

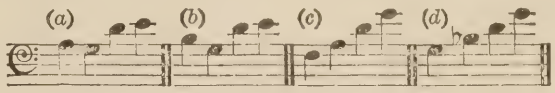
CIPRANDI, ERCOLE (*b. circa* 1738; *d.* after 1790), an excellent tenor, who sang in London from 1754–65. He played Danao in 'Ipermestra' by Hasse and Lampugnani, produced at the King's Theatre, Nov. 9, 1754. In 1765 he was still singing at the same theatre, and appeared as Antigone in 'Eumene.' Burney found him at Milan in 1770, as fine a singer as before. J. M.

CIPRIANI, LORENZO, a *buffo* singer at the Pantheon, London, about 1790. He performed in the same company with Pacchierotti, Mara and Morelli. In 1791 he played Valerio in 'La Locanda' of Paisiello. There is a capital sketch-portrait of him in the character of Don Alfonso Scoglio, in 'La bella pescatrice,' performed at the King's Theatre, Pantheon, Dec. 24, 1791; drawn by P. Violet, and engraved by C. Guisan, pupil to F. Bartolozzi, R.A. J. M.

CIRCASSIENNE, LA, opéra-comique in 3 acts; words by Scribe, music by Auber; produced Opéra-Comique, Paris, Feb. 2, 1861, and in London. G.

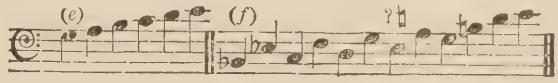
CIRULLO, GIOVANNI ANTONIO, of Andria, Naples, a 16-17th century madrigal composer.

In 1607–09 he lived at Andria. He wrote 6 books of madrigals, and 3 madrigals appeared in Phalese's 'Il Helicone' in 1616.



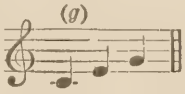
E. v. d. S.

CIS, CES, the German term for C♯ and C♭. (See C.) G.



CISNEROS, Eleonora de (*née* Broadfoot) (*b.* New York, Nov. 1, 1878), operatic mezzo-soprano. She studied in Italy and Paris after making her début as one of the maidens in 'Die Walküre' at the Metropolitan Opera House, New York. Her successful career in Italy started at the Reggio, Turin, in 1902, with Amneris, her best part. Possessing a voice of unusual power and compass, and a striking stage appearance, she excelled especially in modern heroic rôles, ranging from Brünnhilde, Ortrud, Venus and Dalila to Herodias and Clytemnestra. The last named she sustained in the first Italian performance of Strauss's 'Elektra' at La Scala in 1908, and she similarly created there the title-rôle in Tchaikovsky's 'Pique-Dame' in 1905. Altogether she sang at 16 opera-houses in Italy in about seven years, besides taking part in the Verdi centenary at Parma. She first sang at Covent Garden in 1904 during the autumn season conducted by Cleofonte Campanini, under whose baton she also appeared at the Manhattan Opera House, New York, in 1906–08, earning emphatic success in various parts. Subsequently she was heard in London for several (chiefly autumn) seasons, besides touring extensively in Europe and visiting Australia with the Melba Opera Co. in 1911. Mme. de Cisneros, who was married in Havana in 1901, brought her active career to a close in 1916. H. K.

CITHER, Cithern, Cithorn or Cittern (Fr. *cistre, sistre,* or *courante*; Ger. *Cither, Zither*; Ital. *cetera*), an instrument shaped like a lute, but with a flat back, and with wire strings, generally adjusted in pairs of unisons, and played with a plectrum of quill (see *PLATE XXVIII.* No. 2). The classical cither described here is to be distinguished from its descendant known as the Zither (*q.v.*).



The cither during the 16th and 17th centuries appears to have enjoyed great favour on the Continent and in England. The English citherns had usually four pairs of wire strings, but according to Carl Engel (*Musical Instruments*, etc., 1874) they were not limited to this number. He quotes a curious title-page: 'New Citharen Lessons with perfect Tunings of the same from four course of strings to fourteene course, etc.,' adorned with an engraving of a Bijuga (two-necked) cither, the counterpart of a theorbo or two-necked lute, strung with seven pairs of strings over the finger-board, and seven single strings at the side. The date of this is 1609. John Playford published a book entitled *Musick's Delight, containing new and pleasant lessons on the Cithern, London, 1666.* Praetorius (*Synt. Mus.*, 1618) gives various cither tunings, including the common French (*a*) and Italian (*b*) four-course tunings—

He speaks of the *illiberale sutoribus et sartoribus usitatum instrumentum*; he gives the old lute-tunings (*c*) and (*d*), and says that the last is called *in corda valle*, and is used with small instruments an octave higher, and, as usual, with strings of brass or steel. Among other tunings there is an old Italian six-course (*e*) and, in Prague, a twelve-course (*f*) with resonance, says Praetorius, like a Clavicymbel or Symphony.

He gives woodcuts in *Sciagraphia* (1620) of these larger citherns, and two of the smaller. The Cetera or Italian cither was used by improvisatori, and extant specimens are often tastefully adorned with ornament. Stradivari is known to have made one. Finally, keyed cithers with hammers were patented by English and German makers. The cither, under the name of English Guitar, and tuned in the common chord (*g*), was very popular in this country during the 18th century. Many specimens are to be met with, bearing the name of Preston, a music-seller in the Strand. The German Streichzither, as the name indicates, was played with a bow. This was horizontal, like the Schlagzither and its prototype the Scheidholt, all of which variants will be more conveniently described under the accepted modern appellation of Zither, an instrument to place upon a table, well known in South Germany. The difference between a cither and a lute is in the shape of the body, flat-backed in the former, pear-shaped in the latter; the cither has wire strings and is played with a plectrum, while the lute has catgut strings to be touched with the fingers. The cither-notation, or tablature, is similar to that of the lute, but is written on four lines, to correspond with one of the commoner tunings (*a*) or (*b*).

A. J. H.; addns. G. E. P. A.

CITOLE (Cythol, Sythole, Sitole, Cytele), a mediæval instrument with wire strings plucked by the fingers or with a plectrum (see *PLATE I.* No. 1). It was identical with the cetera, Cither (*q.v.*) or cittern, and the name is probably a corruption of cithola, a Provençal contraction of citharola. An accomplished minstrel was expected to play the citole, and frequent mention is made of it in

the English Romances of the 14th and 15th centuries. A very early illustration of the instrument occurs in the title-page of a copy of the Gospels executed for the Emperor Charlemagne in the 8th century. (See Bastard's *Peintures et ornements des manuscrits.*) The court band of King Edward III. contained a 'cyteler,' and an excellent example in sculpture of the citole at this period is to be found on the front of the Minstrels' Gallery at Exeter Cathedral in the hands of the first musician on the left.

Rimbault's suggestion that the citole was a square-shaped psaltery, of which he gives an illustration in *The Pianoforte* (1860), is without any authority. F. W. G.

CITY GLEE CLUB. Founded in 1853 as successor to the much older 'Civil Club' in the City of London, this Club remains one of the most active of the glee-singing institutions. Its original meeting-place was the New Corn Exchange Hotel (Mark Lane), but it removed to the London Tavern (Fenchurch Street) in 1878. It holds bi-monthly meetings for the singing of glees, partsongs, etc., during the winter months, the singers being for the most part members of the choirs of Westminster Abbey, St. Paul's Cathedral, the Chapel Royal. Originally the membership of the Club was limited to 100, but in the season 1923–24 it numbered 150. It possesses a valuable library of music and has assiduously maintained the special character of its musical meetings. A president is elected annually. The present (1926) hon. secretary and treasurer is A. J. Brown, who has held office since 1921, when he succeeded Howard Smith, whose connexion with the Club in a secretarial capacity had extended for over 50 years. (Information from Souvenir Programme of the 'Ladies' Concert,' Dec. 3, 1923.)

C.

CITY OF LONDON CLASSICAL HARMONISTS, see CHORAL HARMONISTS.

CLAGGET, CHARLES (*b.* Waterford, 1740; *d. circa* 1820), a violinist who made a number of inventions in the construction of instruments.

He was leader of the band at the theatre in Smock Alley, Dublin, from 1762–64, and at Crow St. Theatre Royal from 1764–68. He conducted at Liverpool (1771–73) and at Manchester (1773–75). Coming to London in 1776, he devoted his attention to the improvement of various musical instruments. In Dec. 1776 he took out a patent for

'Improvements on the violin and other instruments played on finger boards,'

which he asserted rendered it 'almost impossible to stop or play out of tune.' In Aug. 1788 he took out another patent for

'Methods of constructing and tuning musical instruments which will be perfect in their kind and much easier to be performed on than any hitherto discovered.'

Among these methods were the following:

(1) A new instrument called the Teliochordon, in form like a pianoforte, but capable of being put much better in tune, for the grand pianoforte or harpsichord divide every octave only into thirteen[1] parts or semitones, whereas on this instrument every octave can be divided into thirty-nine parts or gradations of sound; for any finger-key will, at the pleasure of the performer, produce three different degrees of intonation.

He represented that by this instrument all thirds and fifths could be highly improved, and what is called the 'woulfe' entirely done away with.

(2) A method of uniting two trumpets or horns, one in D and the other in E flat, so that the mouthpiece might be applied to either instantaneously, thereby getting the advantage of a complete chromatic scale (see VALVE).

(3) Tuning-forks with balls or weights for the more easy tuning of musical instruments.

(4) A new instrument composed of a proper number of these tuning-forks or of single prongs or rods of metal fixed on a standing board or box and put in vibration by finger keys. Or a celestina stop made by an endless fillet might be applied, producing the sounds on these forks or prongs as it does on the strings.

(5) Tuning keys of a form which rendered them steadier and easier to use than others.

And (6) a better method of fitting the sounding post of a violin to its place.

Clagget was also the inventor of the

'Aiuton, or, Ever-tuned Organ, an instrument without pipes, strings, glasses or bells, which will never require to be retuned in any climate.'

Of this instrument and others he published a descriptive account under the title of *Musical Phenomena.* He kept his collection of instruments at his house in Greek Street, Soho, which he called 'The Musical Museum.' About 1791 he exhibited them publicly at the Hanover Square Rooms. On Oct. 31, 1793, Clagget gave what he termed an 'Attic Concert' at the King's Arms Tavern, Cornhill, several of the pieces being played on or accompanied by the various instruments invented or improved by him. The performance was interspersed with *A Discourse on Musick,* the object of which was professedly to prove the absolute necessity of refining the harmony of keyed instruments, and to insist that Clagget's inventions had effected that object. In the course of this address a letter from Haydn to Clagget, dated 1792, was read, in which the great composer expressed his full approbation of Clagget's improvements on the pianoforte and harpsichord. The *Discourse* was published with the word-book of the concert, and to it was prefixed a well-engraved portrait of Clagget, who is described beneath it as 'Harmonizer of Musical Instruments,' etc. etc. He is represented with a violin bow in his right hand, and in the left one of the sounding bars of his 'Aiuton.' He wrote 6 solos for 2 violoncellos and 6 for violin and violoncello; also a duet for violins, and some songs.

W. H. H., with addns.

CLAIRSEACH, see CLARSETH.

CLAPISSON, ANTOINE LOUIS (*b.* Naples,

[1] Actually twelve.

Sept. 15, 1808; *d.* Paris, Mar. 19, 1866), was a good violin-player before becoming a composer, and published a great many romances and songs, which exhibit an easy vein of melody.

His operas are :

'La Figurante' (5 acts, 1838); 'La Symphonie' (1839); 'La Perruche' (1840); 'Frère et mari' (1841); 'Le Code noir' (3 acts, 1842); 'Les Bergers-Trumeau' (1845); 'Gibby la cornemuse' (3 acts, 1846); 'Jeanne la folle' (5 acts, 1848); 'La Statue équestre' (1850); 'Les Mystères d'Udolphe' (3 acts, 1852); 'La Promise' (3 acts, 1854); 'La Fanchonnette' (3 acts, Mar. 1, 1856); 'Le Sylphe' (2 acts, Nov. 1856); 'Margot' (3 acts, 1857); 'Les Trois Nicolas' (3 acts, 1858); 'Madame Grégoire' (3 acts, 1861).

The plots are generally poor, and many of them were unsuccessful. In fact 'La Promise' and 'La Fanchonnette' are the only two of his operas which gained public favour. There is, however, much good music in 'Gibby,' 'Le Code noir' and several others.

Clapisson was violinist in the opera orchestra from 1832–38, and became professor of harmony at the Conservatoire. He was made Chevalier de la Légion d'Honneur in 1847, and member of the Institut in 1854. He collected ancient instruments of music, and sold his collection to the French Government in 1861; it is now included in the museum of the Conservatoire. Annibale dei Rossi's splendid spinet, ornamented with precious stones and exhibited at the South Kensington Museum, was bought from Clapisson. G. C.

CLAPP, Philip Greeley (*b.* Boston, Mass., Aug. 4, 1888), an American composer, who studied music at Harvard College and in Europe as Sheldon Fellow of the university. He has taught in various schools of music. His most important compositions are :

Symphonies in E minor, E flat, and A; an orchestral prelude, 'In Summer,' a tone poem 'Norge,' for orchestra and piano, and a dramatic poem for trombone and orchestra. R. A.

CLAQUEBOIS, see Xylophone.

CLARABELLA, a wooden organ stop (open) of 8-foot pitch, invented by Bishop. (See under Organ: Vocabulary of Stops.) T. E.

CLARI, Giovanni Carlo Maria (*b.* Pisa, *c.* 1669; *d. circa* 1745), composer, studied music at Bologna, under the well-known Colonna, of whom he has always been considered to have been one of the best pupils. He was maestro di cappella at Pistoia about 1712, at Bologna in 1720 and at Pisa in 1736.

For Bologna he wrote in 1695 an opera entitled 'Il Savio delirante,' which had considerable success. But his renown chiefly comes from a collection of vocal duets and trios written with a basso continuo which he published between 1740 and 1747. A later edition is extant, published by Carli of Paris in 1823, and arranged with a modern accompaniment for the piano by a Polish composer named Mirecki, who called the composer 'Abate.' In these his novel treatment of fugue, and his approach towards the modulation of later times, help to mark an epoch in composition, and stamp him as a progressive and profound musician. Several of the duets were the subject of some of Handel's appropriations, and a selection of them was published by Dr. Chrysander, as No. 4 of the 'Supplemente' to his great edition of Handel.

There is a Stabat Mater by Clari in C minor in the Royal Library at Copenhagen and also in the Fitzwilliam MSS. at Cambridge; and Landsberg of Rome had the following works of his :

A Mass for 5 v., strings and organ; a Credo for 4 v.; Psalms for 4 v. in 2 dialogued choruses; a De Profundis for 4 v. and the organ; a Requiem for 9 v., strings and organ; a Missa di cappella for 4 v.; Psalms for Compline arranged for 2 choruses.

A fuller catalogue is in *Q.-L.* Novello's 'Fitzwilliam music' contains no fewer than 23 compositions of Clari from masses, and the Stabat Mater. E. H. P.

CLARIBEL, see Barnard, Charlotte A.

CLARINET (Fr. *clarinette*; Ger. *Klarinette*; Ital. *clarino, clarinetto*), a wooden or ebonite instrument played with a 'single' beating-reed. Clarinets are of various kinds: (1) The ordinary clarinet in B♭, A, C and E♭, the C, and the E♭ pitched a fourth higher than the B♭, being practically obsolete in the orchestra; (2) the basset-horn; (3) the alto and (4) the bass clarinets, respectively an octave lower than the ordinary clarinets in E♭ and B♭; (5) the pedal clarinet.

The following description defines the scheme on which all clarinets are based; but on the alto and bass instruments the side-holes covered by the fingers on the ordinary clarinet are closed by key work. (See *PLATES XVII.* Nos. 3 and 5; *LXXV.* No. 1.)

(1) The clarinet consists essentially of a mouthpiece furnished with a single beating-reed, and a cylindrical tube pierced with many side-holes, terminating in a bell. The fundamental scale comprises nineteen semitones from *e* in the bass stave to *b♭′*. As the lowest note is emitted through the bell, a true chromatic scale necessitates the use of eighteen side-holes as a minimum, but the simplest clarinet in customary use at the present day, and known as the ordinary thirteen-keyed instrument, has twenty side-holes, of which seven are closed by the left thumb and by the first, second and third fingers of the right and left hands, two by the little fingers acting through open standing keys, one by an open standing key closed by either or both of the second and third fingers of the right hand acting by means of ring touch-pieces, and ten by closed keys. The thumb and finger-holes being closed, and the keys untouched, the note produced is *g*, and the raising of the fingers successively gives *a*, *b*, *c′*, *d′*, *e′*, *f♯′*, *g′*, the last note sounding from the thumb-hole. The closing of the two lower keys gives the low *f* and *e*, intermediate semitones are obtained by keys, and by the same means the range of the fundamental compass upwards is completed from *g′*, the thumb-hole note, often called 'the open note,' to *b♭′*. The thumb-key, giving *b♭′*, is very generally known as the 'speaker-key,' as when it is open the twelfths

speak instead of the fundamental notes. This register is termed Chalumeau (see ABBREVIATIONS and CHALUMEAU), and is of a somewhat different quality from the higher notes. The latter are obtained by a contrivance which forms the chief initial difficulty in learning the instrument, but has the advantage of giving it a very extended compass. The lever of the B♭ key named above ends close to the back thumb-hole, and answers a double purpose. In conjunction with the A♮ key it produces its own open note, but when raised by the point of the left thumb, while the ball of the same closes the back hole, it serves to determine a node within the tube, and raises the pitch by an interval of a twelfth. If all the side-holes be now closed by the fingers, the note issuing by the bell is B♮, in the treble stave, and by successive removal of fingers or opening of keys fifteen more semitones are obtained, reaching to *c‴* sharp; the thumb being constantly kept at its double duty of closing the G hole and opening the B♭ key. With the high C♯, what may be termed the natural scale of the instrument ends, although a whole octave more of notes may be got by cross-fingerings, depending considerably on the individual skill of the player. It is usually understood that the extreme note obtainable is *c⁗* natural or sharp, an octave above that just given. But it is most undesirable to write for the instrument above the immediate *g‴*, and in piano passages above *c‴*. We thus have in all three octaves and a sixth, of which the lower three octaves are perfectly available for legitimate use; and which, it will be presently shown, are considerably extended by the employment of several instruments in different keys.

For the means of producing the tone see REED and MOUTHPIECE.

As the clarinet in C is now practically obsolete, the instrument belongs to the transposing class. Parts for the clarinet in B flat are written one tone higher than they sound; for the clarinet in A, a minor third higher; and for the clarinet in E flat, a minor third lower. The written compass of the B flat and

A clarinet is from  to about 

and of the E flat, from  to  .

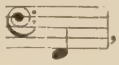
Besides these instruments others have been occasionally used. A small clarinet in F, above the C instrument, has been happily given up, except in an occasional piece of German dance music. The D, between these two, has been considered by some composers to blend better with the violins than the graver-pitched clarinets. It corresponds to the E flat clarinet on which parts written for it, such as in 'Die Walküre' or Strauss's 'Till Eulenspiegel,' are generally played in this country. Generally speaking, the B flat and A instruments are used alternatively, in correspondence with the key of the music; and owing to the fact that the instrument, in common with all wind-instruments, is highly susceptible to change of temperature, a modification of the B♭ clarinet has been introduced by providing this instrument with an extra key, giving it the same compass downwards as that in A, and thus dispensing with any need for changing the instrument during the course of the music. Mention should also be made of the ingenious attempts to design an instrument that can be transposed as from A♮ to B♭ without suffering in quality. Simiot of Lyons early in the 19th century (and probably between 1820 and 1830) designed a B♭ model with a separate upper joint for A♮. The lower joint was fitted with a telescopic sliding addition by means of which the A♮ pitch could be obtained from the B♭ joint, but with some loss of correct intonation. The example known to the writer has several extra keys, and is a beautiful specimen of workmanship. Buffet exhibited another such instrument in the Paris Exhibition of 1867, and, more recently, the late Jas. Clinton brought out a very cleverly contrived instrument of the kind. In such instruments, however, it is difficult to attain to really accurate intonation, and there are also the objections of increased weight, cost and liability to get out of order.

Helmholtz has analysed the tone and musical character of the clarinet among the other wind-instruments, and shows that the sounds proper to the reed itself are hardly ever employed, being very sharp and of harsh quality; those actually produced being lower in pitch, dependent on the length of the column of air, and corresponding with the sounds proper to a stopped organ-pipe. With a cylindrical tube these are the third, fifth, seventh and ninth partial sounds of the fundamental tone. The upper register rising a twelfth from the lower or chalumeau, seems to carry out the same law in another form. On the other hand, the conical tubes of the oboe and bassoon correspond with open pipes of the same length, in which the octave, the twelfth and the double octave form the first three terms of the series. See Helmholtz's paper in the *Journal für reine und angewandte Mathematik*, vol. lvii.; and, for quality of tone, notes by D. J. Blaikley in the *Proceedings of the Musical Association*, 1879–80, p. 84; also observations by Dr. Dayton C. Miller in *The Science of Musical Sounds*, 1916.

The instrument is commonly said to have been invented about the year 1690 by Johann Christopher Denner, at Nuremberg The late

Messrs. Boosey & Co., Ltd.

1. SOPRANO SAXOPHONE. 2. ALTO SAXOPHONE. 3. BASS CLARINET.
4. BASSET HORN. 5. CLARINET.



W. Chappell's opinion that he could trace the instrument back to mediæval times as the shawm, schalm or schalmuse (*Hist. of Music*, i. 264), must be accepted in a very general way only, as these names, probably derived from *calamus* (see CHALUMEAU), signified primarily merely an instrument made from a reed, or having a reed as its source of sound. The English shawm and German schalmey were conical tubes with double reeds, and were, therefore, essentially rudimentary oboes and not clarinets, while the French name chalumeau comes to us in connexion with a cylindrical tube in which a single beating-reed was cut. The radical difference between the clarinet and the oboe as now understood, as lying in the over-blowing to the twelfth instead of to the octave, was not then known, and any reed instrument, cylindrical or conical, and with single or double reed, would give the same fundamental scale, with only slight differences of tone-quality between one and the other. Hence the name shawm and its variants may have been used somewhat indiscriminately.

The present name for the single reed instrument, clarinet or clarionet, is evidently a diminutive of *clarino*, the Italian for the trumpet taking the highest parts in trumpet bands, and *clarion*, the English equivalent. If the chief characteristic of the clarinet, as distinguished from the chalumeau, that is to say, the register a twelfth higher than the fundamental, obtained by opening the 'speaker' key, is considered, a correspondence is seen both in compass and brightness of quality between the instrument and the clarino.

V. C. Mahillon (*Catalogue descriptif et analytique du Musée Instrumental du Conservatoire Royal de Musique de Bruxelles*, 1893) adduces evidence to show that the work of Denner in the transition from the chalumeau to the clarinet was in the nature of slight modifications rather than a distinct invention. Since Denner's time the instrument has been successively improved by Stadler of Vienna, Iwan Muller, Klosé and others, the improvements, or at least modifications, being continuous up to the present day.

In 1843 Klosé completely reorganised the fingering of the instrument, on the system commonly called after Boehm, which is also applied to the flute, oboe and bassoon. It may, however, be remarked here that Boehm's or Klosé's fingering is hardly so well adapted to this as to the octave-scaled instruments. It certainly removes some difficulties, but at the expense of greatly increased complication of mechanism, and liability to get out of order.

Although Rameau had used clarinets in 1751 in his 'Acante et Céphise,' their introduction into the orchestra really dates from about 1770, when Mozart employed them in his Paris Symphony. Haydn too wrote for clarinets, though sparingly. Since then they have become an essential part of the wood-wind.

(2) BASSET-HORN (Fr. *cor de basset*; Ger. *Bassethorn*; Ital. *corno di bassetto*; sometimes *clarone*) is in F, furnished with additional low keys and a prolonged bore, enabling it to reach the note C, which is equivalent to F below the bass clef,  , the part being written a fifth higher than it sounds. With the exception of the last four semitones thus added, the instrument is in all respects a clarinet. These four notes are obtained by means of long keys worked by the thumb of the right hand, which, in the ordinary clarinet, has no other function besides that of supporting the instrument. For convenience of handling, the instrument has been made in various curved shapes; with a bend either between the right and left hands, or in the upper part just below the mouthpiece. Occasionally it has been made with a bore abruptly bent on itself like that of the bassoon. Its tone is fuller and more reedy than that of the clarinet. It is rather smaller in bore than the alto clarinet (see below), and the difference in tone-quality between the two instruments is chiefly due to this.

Mozart wrote much for this instrument, as in the Requiem where it replaces the clarinet, there being independent parts for two players, and the opera 'Clemenza di Tito,' while in his chamber music there are often parts for two or even three basset-horns.

It is generally replaced now by the (3) ALTO CLARINET, sometimes in the same key but more generally in E flat, a whole tone lower, but its compass goes no further than  , written  . It is also made in F with a compass corresponding exactly with that of the basset-horn. In build it follows the pattern of

(4) The BASS CLARINET (Fr. *clarinette basse*; Ger. *Bass Klarinette*; Ital. *clarone*, or *clarinetto basso*), an octave lower in pitch than the ordinary clarinets. To overcome the disadvantages attaching to a straight wooden pipe, there is curved metal tubing fixed at each end leading to the mouthpiece and to a wide bell pointing outwards and upwards. It has been made in three keys — B flat, C and A. The first named is that which is now generally used in England; the instrument in C is practically obsolete; while that in A is seldom met with outside Germany. The compass is from  to  , although instruments have been

made with keys to produce four semitones lower. The parts are generally written in the treble clef, sounding a major ninth or minor tenth lower. In German scores, however, it will be found written for in the bass clef, and the treble clef for the higher notes, in each case sounding a major second or minor third lower.

The tone-quality is somewhat similar to the ordinary clarinet, but 'looser' and more 'hollow.' Its introduction into the orchestra practically dates from its employment by Meyerbeer in the scores of 'Les Huguenots' and 'Le Prophète.'

Possessing, like the clarinet, the power of producing a beautifully smooth *pianissimo*, it is frequently made to play a certain solo passage in the first movement of Tchaikovsky's sixth symphony, originally written for the bassoon.

(5) PEDAL CLARINET (Fr. *clarinette contrebasse*; Ger. *Kontrabass Klarinette*; Ital. *clarino contrabasso*) is a military band instrument, being built in B flat, an octave lower than the bass clarinet, and has as yet been but rarely used in the orchestra. It has also been made in France an octave below the alto clarinet and styled 'contralto.' D. J. B.

CLARINO (Med. Latin *claro, clarasius*; English, clarion), the Italian name for clarinet (also clarinetto) and a TRUMPET (*q.v.*) of small bore, used chiefly in its extreme upper register. (See *PLATE LXXXIII.* No. 4.) D. J. B.

CLARION, an organ reed stop of 4-ft. pitch. (See under ORGAN: VOCABULARY OF STOPS.) T. E.

CLARK, the REV. FREDERICK SCOTSON (*b.* London, Nov. 16, 1840; *d.* there, July 5, 1883), teacher, organist and composer, of Irish parentage.

He received his earliest musical instruction from his mother (a pupil of Chopin) and Mrs. Anderson. He was soon sent to Paris to study the piano and harmony with Sergent, organist of Notre Dame, and at the age of 14 was appointed organist of the Regent Square Church. He next studied under E. J. Hopkins, and subsequently entered the R.A.M., where his masters were Sterndale Bennett, Goss, Engel, Pinsuti and Pettit. In 1858 he published a *Method for the Harmonium*, and for a few years was organist at different churches in London. In 1865 he founded a College of Music for students of church music and the organ. Soon after this he became organist of Exeter College, Oxford. He graduated Mus.B. in 1867, and was appointed head master of St. Michael's Grammar School, Brighton. Six months later he was ordained deacon, and afterwards priest. He next went to Leipzig, where he studied under Reinecke, Richter, etc. When in charge of the English Church at Stuttgart he pursued his musical studies under Lebert, Krüger and Pruckner. In 1873 he returned to London, and in 1875 resumed his connexion with the London Organ School. In 1878 he represented English organ-playing at the Paris Exhibition. Besides being a remarkable executant on the organ, he had great facility in composition. His works, which amount to over 500, consist principally of small organ and pianoforte pieces, many of which have attained great popularity. W. B. S.

CLARK, J. MOIR (*b.* Aberdeen, *c.* 1863), was a pupil of Professor Prout at the R.A.M., 1883–1886, and afterwards went to study in Germany. His quintet for piano and strings in F, first played in Dresden in 1892, was introduced to England by Miss Dora Bright in the following year. It even obtained an entrance into the programme of a Popular Concert (St. James's Hall) in Nov. 1894. Some pianoforte variations were also played by Miss Bright in 1889, and a suite for piano and flute was brought forward by Mr. F. Griffiths in 1893; a Scotch Suite for orchestra was performed by the Stock Exchange Orchestral Society in 1895. M.

CLARK, RICHARD (*b.* Datchet, Bucks, Apr. 5, 1780; *d.* Oct. 5, 1856). At an early age he became a chorister at St. George's Chapel, Windsor, and at Eton College. In 1802 he succeeded his grandfather, John Sale, the elder, as lay clerk at St. George's Chapel and Eton College; these appointments he held until 1811. In 1805 he was appointed secretary to the Glee Club. In 1811 he obtained the places of lay vicar of Westminster Abbey and vicar-choral of St. Paul's, and in 1820 succeeded Joseph Corfe as a gentleman of the Chapel Royal. In 1814 Clark published a volume of the words of the most favourite glees, madrigals, rounds and catches, with a preface containing an account of the song 'GOD SAVE THE KING' (*q.v.*), the composition of which he there attributed to Henry Carey. A second edition of this work appeared in 1824, but the subject of the popular tune was omitted, Clark having in 1822 published a separate volume assigning its composition to Dr. John Bull. He was the composer of a few anthems, chants and glees, and the author of pamphlets on *Handel and the Harmonious Blacksmith*, *Handel's 'Messiah'*; the derivation of the word 'Madrigale,' *Musical Pitch*. W. H. H.

CLARKE, JEREMIAH (*b. circa* 1659; *d.* London, Dec. 1, 1707), an English composer of some importance, began his career as a chorister in the Chapel Royal under Dr. Blow.

He was organist of Winchester College, 1692–1695 (see P. Hayes's *Harmonica Wiccamica*). In 1693 his master, Dr. Blow, resigned in his favour the appointments of almoner and master of the children of St. Paul's Cathedral. In 1695 he was appointed organist of St. Paul's

and a vicar-choral in 1705. On July 7, 1700, Clarke and his fellow-pupil, William Croft, were sworn in as gentlemen-extraordinary of the Chapel Royal, with the joint reversion of an organist's place, whenever one should fall vacant, a contingency which happened on May 15, 1704, by the death of Francis Piggott, on which Clarke and Croft were on May 25 sworn in as joint organists. For New Year's Day, 1706–07, Clarke composed an ode beginning 'O Harmony, where's now thy power?' the MS. of which is in the Bodleian (MS. Mus. C, 6). Clarke, having the misfortune to become enamoured of a lady whose position in life rendered his union with her hopeless, fell into a state of despondency, under the influence of which he shot himself at his house in St. Paul's Churchyard. He was buried in the New Crypt of St. Paul's, Dec. 3 (see *Athenæum*, Apr. 2, 1887).

Clarke composed several anthems, chiefly of a pathetic kind, but not deficient either in force or dignity. One of the most important was an 'Ode on the Glorious Assumption of the Blessed Virgin,' beginning 'Hark, she's call'd,' for solos (2 sopranos, 2 altos, tenor and bass), and chorus with accompaniment for 2 trumpets, 2 flutes, strings and continuo. An early MS. of it is at St. Michael's, Tenbury. He was the original composer of Dryden's famous ode, 'Alexander's Feast,' which was performed at Stationers' Hall on the occasion for which it was written, the feast on St. Cecilia's Day, Nov. 22, 1697, and at two or three concerts shortly afterwards; but the music was not printed, and seems now irretrievably lost. In 1699 Clarke (in conjunction with Daniel Purcell and Richard Leveridge) composed the music for the opera 'The Island Princess,' and (jointly with Daniel Purcell) for the opera 'The World in the Moon,' 1697. He also furnished music for

'The Fond Husband' (1676), Sedley's 'Antony and Cleopatra' (1677), 'The Virtuous Wife' (1680), 'Titus Andronicus' (1687), 'The Cornish Comedy' (1696); 'A Wife for any Man,' 'The Campaigners' (1698); 'The four Seasons,' or 'Love in every age' (1699); 'The Bath' (1701); 'All for the Better' (1702), and 'The Committee' (1706),

besides composing an ode in praise of the Island of Barbados, a cantata, some lessons for the harpsichord (some of which have been republished, 1923, in Fuller Maitland's collection, called *At the Court of Queen Anne*) and numerous songs published in the collections of the day. W. H. H., with addns.

CLARKE, John, Mus.D., afterwards known as Clarke-Whitfeld (*b.* Gloucester, Dec. 13, 1770; *d.* Holmer, near Hereford, Feb. 22, 1836), received his musical education at Oxford under Dr. Philip Hayes. In 1789 he was appointed organist of the parish church of Ludlow; in 1793 he took the degree of Bachelor of Music at Oxford; in the same year he was appointed master of the choristers at St. Patrick's Cathedral and Christ Church, Dublin. In 1794 he succeeded Richard Langdon as organist of Armagh Cathedral, which post he held till 1797. In 1795 he was given by private grace the degree of Mus.D. in Dublin, and in 1799 the Irish rebellion led him to resign his appointments and return to England, where he soon afterwards became organist and master of the choristers of Trinity and St. John's Colleges, Cambridge. In 1799 he was granted the degree of Doctor of Music at Cambridge, *ad eundem* from Dublin; in 1810 incorporated at Oxford. He assumed the name of Whitfeld, in addition to his paternal name of Clarke, on the death of his maternal uncle, Henry Fotherley Whitfeld, in 1814. In 1820 he resigned his appointments at Cambridge for those of organist and master of the choristers of Hereford Cathedral, and on the death of Dr. Hague, in 1821, he was elected professor of music in the University of Cambridge. In 1832, in consequence of an attack of paralysis, he resigned his appointments at Hereford. He is buried in the East Walk of the Bishop's cloister, Hereford Cathedral, where a mural tablet is erected to his memory. Dr. Clarke-Whitfeld's compositions consist of Cathedral Services and Anthems (published in four vols. in 1805 and subsequently), 'The Crucifixion and the Resurrection,' an oratorio, and numerous glees, songs, etc. He edited a collection containing 30 anthems from the works of various composers. Amongst the many works arranged by him for voices and pianoforte, his edition of several of Handel's oratorios and other pieces must not be forgotten, as being the first of that author's works so treated. W. H. H.

CLARKE, Rebecca (*b.* Harrow, Aug. 27, 1886), composer and viola-player, of musical parentage, grew up in an environment of chamber music. She showed early talent, and began to play the violin at the age of 8. At the R.C.M. she studied composition with Stanford, and took up the viola as the basis of her professional career. She played at several of the Classical Concerts, was a member of a quartet consisting of Adila and Jelly d'Aranyi, violins, and Suggia (afterwards May Mukle), violoncello, besides other combinations. In 1916 she went to America, originally for a season, but remaining until after the war; and she now divides her time between the two countries. As a composer she first attracted attention in the competition connected with the Berkshire (U.S.A.) Festival of 1919, where her sonata for viola and piano was at first bracketed with the suite of Ernest Bloch, but placed second by a casting vote. In 1921 she again secured the second place in the same competition with her trio for piano, violin and violoncello, and was afterwards commissioned to write another work for the 1923 Festival, which took the form of a Rhapsody for violoncello and piano. The same year she under-

took a journey round the world, playing the viola.

1914–18. Songs: 'Shy One,' 'The Cloths of Heaven,' 'Infant Joy,' 'Down by the Salley Gardens.'
1918. Two Duets for vla. and v'cl. (unaccompanied) (Lullaby and Grotesque).
1919. Sonata for vla. and PF.
1920. Psalm for Chorus.
1920. Psalm for voice and PF.
1921. Trio for PF., vln. and v'cl.
1922. 'The Seal Man,' for voice and PF.
'Chinese Puzzle,' for vln. and PF.
1923. Rhapsody, for v'cl. and PF.
1924. Three Old English Songs, arranged for voice and vln.
'Midsummer Moon,' for vln. and PF. E. E.

CLARONE, the Italian name for BASS CLARINET and sometimes for BASSET-HORN. (See CLARINET.)

CLARSETH (CLARSEACH), a large wire-strung Irish harp (*PLATE XXXVIII.* No. 3; see HARP).

CLASSICAL is a term which in music has much the same signification as it has in literature. It is used of works which have held their place in general estimation for a considerable time, and of new works which are generally considered to be of the same type and style. Hence the name has come to be especially applied to works in the forms which were adopted by the great masters of the latter part of the 18th century, as instrumental works in the sonata form, and operas constructed after the received traditions; and in this sense the term was used as the opposite of 'romantic,' in the controversy between the musicians who wished to retain absolutely the old forms, and those, like Schumann, who wished music to be developed in forms which should be more the free inspiration of the composer, and less restricted in their systematic development. (See ROMANTIC.) C. H. H. P.

CLASSICAL CONCERT SOCIETY. This Society came into existence after the death of Joachim to continue the series of chamber-music concerts which had been organised by the 'Joachim Committee' in London (see JOACHIM QUARTET), and gave its first concert at the Wigmore (then Bechstein) Hall on Oct. 21, 1908. The programmes followed the same classical pattern for several years and were in the hands of the leading chamber-music players of the day, the Klingler Quartet, Lady Hallé, Fanny Davies, Leonard Borwick, Pablo Casals, etc. Later a more eclectic policy was adopted, and a good many works by living composers were introduced. There was an interval during the war years (1914–18), a further series of concerts being given in 1919, 1921 and 1922. N. C. G.

CLASSICAL HARMONISTS, see CHORAL HARMONISTS.

CLAUDIN, the name by which Claudin de Sermisy was known to his contemporaries. (See JEUNE, Le, and SERMISY.)

CLAUSS-SZARVADY, WILHELMINE (*b.* Prague, Dec. 13, 1834; *d.* Paris, Sept. 1, 1907), one of the eminent pianists of the time. She was the daughter of a merchant, received her musical education at the Proksch Institute at Prague, and in 1849 made her first concert tour, exciting great attention both at Dresden and Leipzig (1850). Nevertheless, she lived almost unnoticed in Paris for nearly a year, although Berlioz interested himself much in her favour. She announced a concert, but it was postponed on account of her mother's death. Being now an orphan, she was kindly received by the singer Mme. Ungher-Sabatier, and in the following year her claims were acknowledged in Paris. From thence her fame spread through Europe. She was in London in 1852, and again in 1871. Her last visit was in 1886. She married (1857) the author Friedrich Szarvady. Her repertory mainly consisted of the works of Scarlatti, Bach, Beethoven, and it was upon her execution of these that her great reputation was founded. A. M.

CLAUSULA, see CADENCE (I.).

CLAVÉ, ANSELMO (*b.* 1824; *d.* 1874), a Catalan musician, who, with no great musical culture but with considerable intuition and practical good sense, founded choral societies in various parts of the country, for which he wrote a number of works in the style of choruses of French and Italian opera. These choral societies have had considerable development in Catalonia; and from being groups of men and women who sang mainly by ear have developed into associations like the 'Orfeó Català,' perhaps the most important musical institution in Spain. J. B. T.

CLAVECIN, the French name for a harpsichord, derived by apocope from the Latin *clavicymbalum*. (See HARPSICHORD and PSALTERY.) A. J. H.

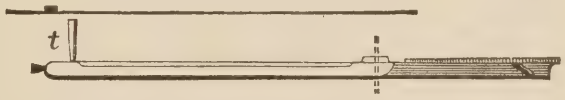
CLAVICEMBAL D'AMOUR, see CEMBAL D'AMORE.

CLAVICEMBALO, one of the Italian names for a harpsichord, and the most used. It is derived from *clavis*, a key, and *cembalo*, a dulcimer or psaltery. Other Italian names for this instrument are *gravicembalo* (a phonetic variation caused by the interchange of *r* with *l*) and *arpicordo*, from which comes our 'harpsichord.' (See CEMBALO and HARPSICHORD.) A. J. H.

CLAVICHORD (Ger.; Med. Latin *clavicordium*; Fr. *manicorde, manicordion, clavicorde*; Ital. *manicordo*; Span. *manicordio*). In the Romance tongues Clavicordo and similar names imply a spinet. The real clavichord is different, and is a keyboard stringed instrument, the tones of which are elicited by tangents, slender upright blades of brass

GERMAN CLAVICHORD, 1763

From Hipkins & Gibbs's *Musical Instruments*. By permission of The Encyclopædia Britannica Co., Ltd.



PRINTED IN GREAT BRITAIN.

inserted in the key levers, and flattened at the top where the contact is with the strings; rising to them in playing, to excite the sound and at the same time mark off the vibrating lengths of the strings from the belly bridge. The clavichord thus differs from the virginal or spinet and from the harpsichord, a genus characterised by the employment of mechanical plectra of crow quill, raven's quill or leather inserted in wooden uprights called jacks, and also the piano, which is mechanically acted upon by hammers.

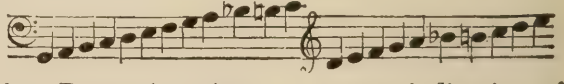
The clavichord is developed from the simple monochord, the virginal, spinet and harpsichord from the psaltery, and the piano from the dulcimer. There is no evidence as to which was first, although the simplicity of its structure points to the priority of the clavichord. Virdung (*Musica getutscht und auszgezogen*, Basle, 1511), our earliest authority (although an earlier illustration than Virdung's is to be found in a 'Wunderbuch' at Weimar, dating from about 1440),[1] says he never could learn who, by putting keys to a monochord, had invented it, or who, on account of those keys, first called it Clavicordium. The earliest record of it is in Eberhard Cersne's *Rules of the Minnesingers*, A.D. 1404, where it appears with the clavicymbal and the monochord itself. In 1477 William Horwood, master of the choristers at Lincoln Cathedral, was appointed to teach the boys the 'clavychord.' In an inventory found in Spain by Van der Straeten, dated 1480, mention is made of a clavichord with tangents and called 'manicordio.'[2] Quotations from Murray's *New English Dictionary* are, A.D. 1483, Caxton, *G. de la Tour*, k. vi., 'where his vyell and clavicordes were,' and as Clarichord, A.D. 1508, the will of Wyldegris (Somerset House), 'Payre of Clarycordes,' A.D. 1509, Hawe's *Past Pleas*, xvi. xii., 'Rebeckes, Clarycordes, eche in theyr degre.' The substitution of *r* for *v* has probably arisen from a copyist's error, afterwards continued. It is not certain whether true clavichords or spinets are meant by these and other contemporary quotations.

The oldest existing specimen known of the real tangent clavichord is dated A.D. 1537, and is in the Metropolitan Museum, New York. It is said to be Italian but has German attributes. There are older spinets preserved. Sebastian Virdung in the above-mentioned work describes and figures the clavichord, but his woodcuts of keyboard instruments, not having been reversed for the engraver, are wrong as to the position of bass and treble. Other writers who have followed Virdung and have used his illustrations, Martin Agricola, 1529, Luscinius, 1536, and even Dr. Rimbault (*The Pianoforte*, p. 30), 1860, have not observed his obvious error.

In shape the clavichord has been followed by the square pianoforte, of which it was the prototype (see *PLATE XC.* 1). The case was oblong and was placed upon a stand or legs. The length, according to the compass and period of construction, was from 4 to 5 feet; the breadth less than 2 feet; the depth of case 5 to 7 inches. The keys were in front, and extended beneath the sound-board to the back of the case, each being balanced upon a wire pin, and prevented from rattling against its neighbour by a small piece of whalebone projecting from the key and sheathed in a groove behind. The lower or natural keys were usually black, and the upper or chromatic, white. In Italy and the Netherlands the practice was frequently reversed. The strings, of finely drawn brass wire, were stretched nearly in the direction of the length of the case, but with a bias towards the back. On the right of the player were inserted in the sound-board, strengthened on the under side by a slip of oak to receive them, the wrest or tuning-pins round which the strings were fastened, while at the back and partly along the left-hand side of the case, they were attached by small eyes to hitch-pins of thicker wire. On the right hand the strings rested upon a curved bridge, pinned to fix their direction, and conducting their sound-waves to the sound-board, a flat surface of wood beneath, extending partly over the instrument, but in clavichords of the 18th century we miss the harpsichord sound-hole cut as a rose or some other ornamental device—often the initials of the maker's name. Nearly at the back of each key, in an upright position, was placed the small brass wedge or 'tangent' (*t*), about an

inch high and an eighth of an inch broad at the top. The tangent, when the key was put down, rose to the string and pressing it upwards set it in vibration. With a good touch the player could feel the elasticity of the string, and the more this was felt the better the instrument was considered to be. By the pressure of the tangent the string was divided into two unequal lengths, each of which would have vibrated, but the shorter was instantly damped by a narrow band of cloth interlaced with the strings, which also damped the longer section directly the player allowed the key to rise and the tangent to fall. The tangents thus not only produced the tones, but served as a second bridge to measure off the vibrating lengths required for the pitch of the notes. Thus a delicate tone was obtained that had something in it charmingly hesitating or tremulous; a tone although very weak, yet capable, unlike the harpsichord or spinet, of increase and decrease, reflecting the finest and most tender gradations of the touch of the

[1] See Southgate's Catalogue of Musical Exhibition at Fishmongers' Hall.
[2] *History of the Pianoforte*, by A. J. Hipkins, p. 58.



player, and in this power of expression without a rival until the pianoforte was invented. To ears accustomed to the pianoforte, the 'blocking' sound inseparable from the clavichord tone would seem a disadvantage. Koch, in his *Musikalisches Lexikon*, describes the clavichord as 'Labsal des Dulders, und des Frohsinns theilnehmenden Freund' ('the comfort of the sufferer and the sympathising friend of cheerfulness').

Up to the beginning of the 19th century the use of the clavichord in Germany was general. It was a favourite instrument with J. S. Bach, who preferred it to the pianoforte; and with his son Emanuel, who wrote the *Versuch über die wahre Art das Klavier zu spielen*, an essay on the true method of playing the clavichord, and the basis of all succeeding text-books of keyed stringed instruments. Mattheson lauded the clavichord above the clavicymbal or harpsichord. Mozart used the clavichord now in the Mozarteum at Salzburg in composing his 'Zauberflöte' and other masterpieces, although in playing he leant to the harpsichord style. Beethoven is reported to have said 'among all keyed instruments the clavichord was that on which one could best control tone and expressive interpretation' (*Vortrag*). Beethoven's own style of performance on the piano is shown more than by any tradition, by his commentary on Cramer's studies, preserved by Schindler, to have been founded upon the technique of the clavichord.

Clavichords made before the 18th century had two or three unison strings to a note, beginning in the bass with one string and one tangent to each note, then continuing with two strings and, from *c'* upwards, three, up to the highest notes of a four-octave compass. The lowest key, apparently E, was of short measure and made to sound C, and the F♯ to sound D, according to the convention of the SHORT OCTAVE (*q.v.*). One string or set of strings was, moreover, made to serve for two, or even more notes, in the 'gebunden' clavichords, so that F and F♯ were on the same string, the latter note being produced by a tangent stopping the string at a shorter length. The notes chosen for the longest stopping in these fretted ('gebunden') clavichords appear to have been G♯, B♮, D and F. About the end of the 17th century the clavichord was enlarged and the compass extended, so that fretted clavichords were made with only two tangents to a pair of strings, but leaving the notes A and D throughout the scale with one tangent and 'bundfrei' (*i.e.* free from fretting). The strings were arranged according to their greatest sounding lengths, in the scale F, G, A, B♭, C, D and E♭, the nearer tangent stopping the semitones F♯, G♯, B♭, C♯ and E♮. The explanation of the longer stopping is in the tuning, the groundwork being derived from fifths, upwards C, G, D, A, and downwards F, B♭ and E♭; octaves being employed to bring the scheme within an octave and a fifth. F or C were used as pitch notes, and the nearer sharps and naturals, semitones to the first scale, were made as well as could be done by regulating the spacing of the tangents. With this imperfect tuning it is no wonder J. S. Bach[1] hailed with joy the 'bundfrei' or fret-free clavichord where each pair of strings had its own tangent, and devoted himself to the composition of the immortal 'forty-eight,' of the 'well-tuned keyboard' (*Wohltemperirtes Clavier*) where an endurable chromatic, or Equal-Temperament tuning could, as in the harpsichord, be observed, and each semitone become the keynote of a Major and Minor scale. The 'bundfrei' clavichord has been attributed to Daniel Faber of Crailsheim, the year given being 1720, or thereabouts.

An unduly strong pressure on the key, by displacing a little the point of contact of the tangent, tightened the vibrating part of the string and made the note very slightly sharper in pitch; this fault was deprecated by C. P. E. Bach. There is no doubt that clavichord players preserved a very tranquil position of the hand in order to preserve truth of intonation. Another special grace was that of repeating a note several times in succession without quitting the key, a dynamic effect (German BEBUNG, *q.v.*) which could not be done on the harpsichord or piano.

Praetorius (*Syntagma musicum*, 1614–18) says that the earliest clavichords had only twenty keys, *in genere diatonico*, with two black keys (B♭), so there were not more than three semitones in an octave; like the scale attributed to Guido d'Arezzo, the full extent of which would have embraced twenty-two keys in all—

but Praetorius gives no nearer indication of the compass, and of course none of the pitch (see HEXACHORD). But in Virdung's time there were thirty-five keys or more, starting from the F below the bass stave and embracing the complete system of half-tones; and in that of Praetorius at least four octaves, still the usual compass when J. S. Bach wrote the *Wohltemperirtes Clavier*. By the middle of the century five octaves were attained.

There is great probability that the Greek monochord, a string stretched over a soundboard, and measured off into vibrating lengths by bridges, was a stepping-stone to the invention of the clavichord. Used for centuries in

[1] The view of Mme. LANDOWSKA (*q.v.*) that the *Wohltemperirtes Clavier* was not written for the clavichord but for the harpsichord has been widely accepted since the above was written. C.

the Church to initiate the singers into the mysteries of the eight tones, it must at last have seemed more convenient to dispense with shifting bridges, and at the points of division to adjust fixed bridges raised by an apparatus imitated from the keys of the organ, to press the strings and produce the notes required. This would be an elementary clavichord action, and may account for clavichords, and harpsichords too, being styled monochords in the 15th and 16th centuries, and even as late as the 18th (D. Scorpione, *Riflessioni armoniche*, Naples, 1701). The earliest notice of a monochord among musical instruments is to be found in Wace's *Brut d'Angleterre* (*c.* 1115), 'Symphonies, psaltérions, monachordes.' Ambros (*Geschichte*, 1864, vol. ii. p. 199), from the silence of Jean de Muris as to the clavichord, though repeatedly enumerating the stringed instruments in use (*Musica speculativa*, 1323), infers that it did not then exist, and from this and other negative evidence would place the epoch of invention between 1350 and 1400. De Muris refers to the monochord with a single string, but recommends the use of one with four strings, to prove intervals not previously known. These four strings were the indices to the eight church tones. Rimbault (*The Pianoforte*, p. 36) has been deceived in quoting from Bohn's edition of Sismondi the well-known advice to a jongleur by Guiraut de Calanson (*d.* 1211). It is there stated that the jongleur should play on the citole and mandore, and handle the *clarichord* and guitar. Reference to the original (Paris MS. La Vallière, No. 14, formerly 2701) confirms the citole and mandore, but instead of 'Clarichord' we find 'Manicorda una corda,' doubtless a simple monochord, for in the 'Roman de Flamenca' we find 'l' autr' accorda lo sauteri al manicorda' ('the other tune the psaltery to the monochord'). In the *Dictionnaire étymologique*, Paris, 1750, 'manicordion' is rendered by monochord. Citole and mandore are also there, but not clavichord.

As to the etymology of clavichord: the word *clavis*, key, in the solmisation system of Guido d' Arezzo, was used for note or tone, and thus the *clavis* was the 'key' to the musical sound to be produced. The *claves* were described by alphabetical letters, and those occupying coloured lines, as F on the red and C on the yellow, were *claves signatae*, the origin of our modern clefs. When the simple monochord gave place to an instrument with several strings and keys, how easy the transference of this figurative notion of *claves* from the notes to the levers producing them! Thus the name Clavichord from *clavis*, key, and *chorda*, string, would come very naturally into use. (Ambros, *Geschichte der Musik*, vol. ii., Breslau, 1864.)

Virdung and Reynvaan (*Musijkaal kunst Woordenboek*, Amsterdam, 1795) mention clavichords with pedals, and Adlung describes them. These clavichords had two octaves and a note of pedals on a separate pedalier, which had three or four strings to each note, for which the tangents were arranged as fretted ('gebunden'). An example has been recently found by Herr Paul de Wit of Leipzig. It is a combination of three instruments, two of 4-foot pitch, the middle one, or lower manual, to be drawn forward when required. The pedalier, the lowest in position, is of 8- and 16-foot pitch, the strings being overspun. It has 25 pedals. The maker's nameplate is inscribed 'Johann David Gerstenberg, Orgelbauer zu Geringswald, hat uns gemacht, 1760.' Experiments were made with the clavichord to introduce a damper register, instead of the muting cloth or tape, and to get a mechanical *piano* effect by a shortened rise of the tangent, useless additions to an expressive instrument. No doubt these contrivances were instigated by the square piano, which was then becoming popular, and was soon to supersede the clavichord altogether.

According to Fischhof (*Versuch einer Geschichte*, etc., 1853), Lemme of Brunswick, Wilhelmi of Cassel, Vensky, Horn and Mack of Dresden, and Krämer of Göttingen, were reputed in the 18th century good clavichord makers. Carl Engel quotes the prices of Lemme's as having been from 3 to 12 louis d'or each; Krämer's from 4 to 14, according to size and finish. Wilhelmi charged from 20 to 50 thalers (£3 to £7 : 10s.).

In the 19th century clavichords were made by Hoffmann, Stuttgart, in 1857, on the pattern of one belonging to Molique. They were made for the late Joseph Street, of Lloyd's. A few were made by Arnold Dolmetsch since 1896, and by Henry Tull since 1920. The last named has overcome the defect of 'blocking.' (See TANGENT.) A. J. H., with addns.

CLAVICYTHERIUM, the monkish Latin name for a vertical spinet (see *PLATE XIX.*). There is a valuable specimen of this instrument in the Donaldson Museum belonging to the R.C.M., which was formerly in the collection of Count Giovanni Correr of Venice. There is no name or date on this instrument, but it can be hardly later than the first years of the 16th century; Virdung gives a woodcut of such an instrument (*Musica getutscht und auszgezogen*, Basle, 1511). The keyboard of this specimen has three octaves and a minor third, E to g'', less than Virdung's compass, but we may regard the lowest E as being tuned down to C, according to the 'short octave' arrangement. The jacks have plectra of wire, not quill. The upright harpsichord has been also called clavicytherium. There is a fine example in the Metropolitan Museum, New York. Signor Alessandro Kraus, figlio, of Florence, issued a pamphlet, in English, describing the very interesting 'One-Keyboarded Clavicytherium' in the

Kraus Collection (1910), giving a photograph of the instrument. A. J. H.

CLAVIER. (1) The French name for keyboard of organ, pianoforte and kindred instruments. (Ger. *Claviatur*, *Tastatur*; Ital. *tastatura*.)

(2) The German name for keyboard stringed instruments, harpsichord, clavichord, pianoforte, etc.

(3) The term, used occasionally in English in both French and German senses, has been especially applied to certain instruments used for technical practice which afford the conditions of piano-playing with a minimum of tone and known as 'practice claviers.'

CLAVIJO (Clavixo) DEL CASTILLO, Bernardo (*d.* Madrid, Feb. 1, 1626), a Spanish organist and player on the clavichord, who was at one time professor of music at the University of Salamanca and eventually choirmaster of the Capilla Siciliana at Madrid. He is praised as a performer by Vicente Espinel, author of the Spanish novel on which the French *Gil Blas* was afterwards based. His instrumental compositions include a *tiento* for organ (Escurial MSS.) pubd. by P. Villalba ('Antología de organistas clásicos') ; and a volume of motets, pubd. in Rome in 1588. J. B. T.

CLAVIOL, see Sostinente Pianoforte.

CLAY, Frederic (*b.* Paris, Aug. 3, 1838 [1]; *d.* Great Marlow, Nov. 24, 1889), a dramatic composer, was the son of James Clay, M.P., a very famous whist-player, and author of a well-known treatise on the game.

He held a post for a time in the Treasury. He was educated in music entirely by Molique, with the exception of a short period of instruction at Leipzig under Hauptmann. His compositions were almost wholly for the stage. After two small pieces for amateurs, 'The Pirate's Isle' (1859) and 'Out of Sight' (1860), he made his public début in 1862 at Covent Garden with 'Court and Cottage,' libretto by Tom Taylor. This was followed by 'Constance' (1865), 'Ages Ago' (1869), 'The Gentleman in Black' (1870), 'Happy Arcadia' (1872), 'Cattarina' (1874), 'Princess Toto' and 'Don Quixote' (both 1875). In addition to these Clay wrote part of the music for 'Babil and Bijou' and the 'Black Crook' (both 1872), and incidental music to 'Twelfth Night' and to Albery's 'Oriana.' 'The Merry Duchess' was produced at the Royalty Theatre, May 23, 1883, and 'The Golden Ring' at the Alhambra, Dec. 3, 1883. He also composed two cantatas, 'The Knights of the Cross' (1866) and 'Lalla Rookh' (containing what is perhaps his best-known song, 'I'll sing thee songs of Araby'), produced with great success at the Brighton Festival, Feb. 1877 ; and not a few separate songs.

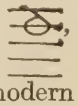
In all his works Clay showed a natural gift of graceful melody and a feeling for rich harmonic colouring.[2] Although highly successful in the treatment of dramatic music, it is probable that his songs will give him the most lasting fame. 'She wandered down the mountain side,' 'Long ago' and 'The Sands of Dee,' among others, are poems of great tenderness and beauty, and not likely to be soon forgotten. He was struck with paralysis immediately after the production of 'The Golden Ring.' A. S. S.

CLAYTON, Thomas (*b. circa* 1670 ; *d. circa* 1730), was one of the King's band from 1692–1702. He went to Italy for improvement in the latter year. On his return he associated himself with Nicola Francesco Haym and Charles Dieupart, both excellent musicians, in a speculation for the performance of musical pieces at Drury Lane Theatre. Clayton had brought with him from Italy a number of Italian songs, which he altered and adapted to the words of an English piece written by Peter Motteux, called 'Arsinoë, Queen of Cyprus,' and brought it out, Jan. 16, 1706, as an opera of his own composition. Elated by his success he proceeded to set to music Addison's opera 'Rosamond,' which was performed in 1707 and completely exposed his incapacity. The speculation, however, continued to be carried on until 1711, when, the Italian opera being firmly established in the Haymarket, the managers of Drury Lane Theatre determined to discontinue the production of musical pieces. Clayton and his colleagues then gave concerts at the Music Room in York Buildings, and John Hughes, the poet, having, at the request of Sir Richard Steele, altered Dryden's 'Alexander's Feast,' it was set to music by Clayton and performed there on May 24, 1711, in conjunction with 'The Passion of Sappho,' a poem by Harrison, also set by Clayton. As to his residence in Dublin, see *D.N.B.*, *s.v.* Wharton, Thomas, Marquis of, vol. lx. W. H. H.

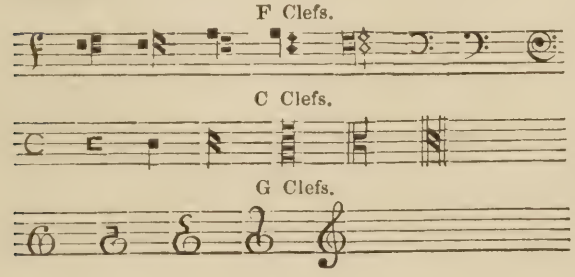
CLÉ DU CAVEAU, the title of a large collection of French airs, including the tunes of old songs dating from before the time of Henry IV., old vaudevilles, commonly called *pont-neufs*, and airs from operas and *opéras comiques* which from their frequent use in *comédies vaudevilles* have become popular airs (what are called *timbres*). The fourth and last edition of the work, published by Capelle, goes down to 1848 ; it contains 2350 different airs, and as many forms or models for couplets. The origin of the title is as follows : Some French song-writers of the 18th century, notably Piron, Crébillon (father and son) and Collé, instituted, about 1737, a sort of club, where they dined regularly. Apparently they called their society Le Caveau, from the place of

[1] See *London Figaro* for Dec. 7, 1889.

[2] This is retained as the opinion of Clay's greater contemporary, Arthur Sullivan. A modern musician would hardly apply the phrase to Clay's slender talent. C.



CLAVICYTHERIUM or UPRIGHT HARPSICHORD (Italian, 17th cent.)



Metropolitan Museum, New York

meeting, an inn of that name kept by one Landelle in the Rue de Buci, near the Comédie-Française and the Café Procope, where these boon companions finished their evenings. From that time all societies of song-writers have connected themselves as much as possible with this first society, and so the name Caveau is synonymous with a club of the same kind. The original society lasted exactly ten years, after which, in 1762, Piron, Crébillon *fils*, Gentil Bernard and others formed a new society which, becoming a 'café' of the Palais Royal, lasted twenty years. The 'Caveau moderne' was founded in 1805 by Capelle, the author of the Clé du Caveau, with the help of Grimod de la Reynière, Piis, Armand Gouffé and Philippon de la Madeleine; they met at Balaine's in the Rocher de Cancale, rue Montorgueil. The society lasted till 1816, and in 1825 an effort was made to revive it, but after a year's existence it disappeared, together with another club, 'Les Soupers de Momus,' founded in 1816. In 1834 a new society was founded at Champeaux's under the direction of Albert Montémont, and was called at first Les Enfants du Caveau, and then Le Caveau only. It still exists, and is managed by a committee headed by a president elected every year, who holds Panard's glass and Collé's bells as symbols of his office.

A. J.; corr. by M. L. P.

CLEF (Ital. *chiave*, from the Lat. *clavis*; Ger. *Schlüssel*), *i.e.* key, the only musical character by which the pitch of a sound can be *absolutely* represented. The clefs now in use are three only—  ,  and  or : These severally represent *c'*, *g'* and *f*. Two other clefs, severally representing *d''* and *G*, have been long obsolete. From the last of these, Γ, the Greek gamma, which represents the lowest sound of the musical system, is derived the word *gamut*, still in use. A *d* clef, indicating the note a third below that to which the bass clef is applied, occurs in a collection of old English motets, etc., by Tallis and others (B.M. Add. MSS., 17,802-3). It stands thus on the stave,  , and occurs in the 'bassus' part.

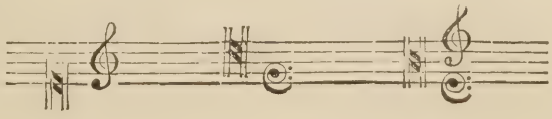
The derivation of the modern clefs from the letters F, C and G can be seen in the following table of the clefs in their various stages of transition:

One or other of these characters, placed on one or other of the lines of a stave, indicates the name and pitch of the notes standing on that line, and by inference those of other notes on lines and spaces above and below it.

The stave which, at various times, has consisted of a greater or less number of lines, consists now commonly of five. On any one of these each of the three clefs might be (almost every one has been) placed. In the following examples they occupy the positions in which they are now most commonly found:

Changes of clef during the course of a composition may only take place in the notation of music for certain instruments, as when the viola changes from the C (alto) clef to the G, or the violoncello and bassoon from the F clef to the C (tenor). But formerly the same licence was allowed in the notation of vocal music; the C clef in particular was frequently moved up or down to correspond with the *tessitura* of the voice part, with the object of keeping the notes more or less within the stave.

Only, however, in its relation to the stave of five lines can a clef be said with truth to change its place. On the Great Stave of Eleven Lines the clefs never change their places; but any consecutive set of five lines can be selected from it, the clef really retaining, though apparently changing, its place:



From the above it will be seen that when notes are written 'in the tenor clef' (more properly 'on the tenor stave') they are written on the 3rd, 4th, 5th, 6th and 7th lines of the 'great stave' of eleven; that when written 'in the alto clef' they are written on the 4th, 5th, 6th, 7th and 8th lines of this great stave; and when 'in the soprano clef' on the 6th, 7th, 8th, 9th and 10th.

The more familiar bass and treble staves consist severally of the lowest and the highest five lines of the great stave:

In early musical MSS. two, and even three, clefs are sometimes found on the same stave. It

would be in no way inconsistent with modern theory, and indeed might be convenient in books of instruction, so to place them as above. (See also CHIAVETTE.)

H. C. D.; addns. S. T. W.

CLEGG, JOHN (*b.* Dublin, 1714; *d.* London, *c.* 1750), a violinist, was the son of William Clegg, and a pupil of his father and of William Viner, master of the Dublin Castle Band. In 1723, when only 9 years of age, he performed in London in public a concerto of Vivaldi, and afterwards gained an eminent position in the musical profession, surpassing, according to contemporary writers, every other player in England in tone and execution. In 1737 he had a benefit at Crow St. Theatre, Dublin. On Jan. 21, 1743/44, he became insane, and was confined in Bedlam Hospital, where, as Burney relates, 'it was long a fashionable, though inhuman amusement, to visit him there, among other lunatics, in hopes of being entertained by his fiddle or his folly.' He was discharged as cured on July 20, 1744, but was again admitted on Dec. 15 of the same year. He was finally discharged Oct. 13, 1746. Clegg appears also to have been a composer for his instrument, but no work of his has come down to us.

P. D., with addns.

CLEMENS NON PAPA, the sobriquet of JACQUES, or JACOB, CLÉMENT, one of the most renowned musicians of the 16th century.

Fétis attempts to prove that he was born before 1475, but the evidence is quite unsatisfactory, and all that is practically known of him is that he died before 1558, since a motet on his death, by Jacob Vaet, is contained in a work published in that year ('Novum et insigne opus musicum,' tom. I., Noribergae, 1558).

He was born in Flanders, and is said to have been Kapellmeister at Vienna to Charles V. and his brother Ferdinand I. According to E. G. J. Grégoir (*Galerie biographique des artistes musiciens belges*, 1862, p. 199), he was connected with Antwerp Cathedral, but as the same writer (in his *Notice historique sur les Sociétés . . . de musique d'Anvers*, etc., 1869) omits the name of Clément from his notice of the Cathedral choir, the statement in the earlier work is probably a mistake. Clément was one of the most prolific and popular composers of his day. His very sobriquet is a proof of the high reputation in which he was held by his contemporaries, since it was intended to distinguish him from Pope Clement VII. Ten volumes of his masses were issued in folio size by Phalèse at Louvain between 1556 and 1560, and in 1559 the same publisher issued seven books of his motets. *Q.-L.* gives a long list of his works.[1] Commer has published 43 of his motets, chansons and Flemish psalms ('Collectio Op. Mus. Batavorum'). Proske has included three motets in his *Musica divina*, and winds up a notice of his life by the following remarks:

'He seems to have attempted all the styles then known. He was no slave to counterpoint, but for his time possessed an extraordinary amount of melodies and clear harmony. No one in his day surpassed him for tunefulness and elegance, his melodies are far more fresh and pleasing than those of his contemporaries, and his style is easy, simple and clear. That he often pushed imitation too far and neglected the due accentuation of the text is only to say that he belonged to the 16th century.'

W. B. S.

CLÉMENT, FELIX (*b.* Paris, Jan. 13, 1822; *d.* Jan. 23, 1885), composer, and writer on musical history and archæology.

From 1843 onwards he held various posts as organist and director of church music, ultimately at the Sorbonne. In 1849 he directed choral performances in the Sainte-Chapelle, the outcome of which was the publication of a collection of ancient music in that year. His most important published compositions are choruses for Racine's 'Athalie' and 'Esther.' For several years he contributed largely to Didron's *Annales archéologiques*, thus preparing himself for his *Histoire générale de la musique religieuse* (Paris, 1861), in which are included translations from Cardinal Bona's treatise 'De divina psalmodia' and Formby's 'Gregorian chant compared to modern music.' He edited several books of religious music for the Church, such as 'Eucologie en musique selon le rit parisien' (Paris, 1843 and 1851); 'Le Paroissien romain' (Paris, 1854); and 'Chants de la Sainte-Chapelle' (1849). His 'Méthode complète de plain-chant' (2nd ed., 1872) does not contain anything new, but is clear and orderly. His 'Méthode d'orgue' (1874) exhibits a moderate knowledge of thorough-bass and fugue. Clément's most useful compilation is his *Dictionnaire lyrique*, a convenient list of operas on the plan of Allacci's *Drammaturgia*, compiled from Babault's *Dictionnaire général des théâtres* and similar works, not without occasional errors and omissions. Four supplementary parts have been issued, bringing the work down to 1881; and a second edition of the whole, edited by A. Pougin, appeared in 1897. Clément also published *Les Musiciens célèbres depuis le 16ème siècle* (Paris, 1868, 42 portraits) and an *Histoire de la musique* in 1885.

G. C.

CLEMENT, FRANZ (*b.* Vienna, Nov. 17, 1780; *d.* there, Nov. 3, 1842), the eminent violinist who was the first to perform Beethoven's violin concerto in public.

His father was butler in a nobleman's establishment, and at the same time, after the fashion of the period, a member of his master's private band. His father and Kurzweil, the leader of another nobleman's band, were his teachers. Clement began to play the violin

[1] More than 250 vocal compositions, sacred and secular, were printed under his name in collections of the 16th century.

when he was only 4, and in Mar. 1789 made his first successful appearance in public at a concert in the Imperial Opera-house. He soon began to travel with his father, and in 1790 came to London, where he gave very successful concerts, some of which were conducted by Haydn and Salomon. He also played at Oxford at the second concert given in celebration of Haydn's installation as Doctor of Music. Having returned to Vienna, he was appointed solo-player to the Emperor, and in 1802 conductor of the newly established theatre 'an der Wien,' which post he retained till 1811. From 1812–18 he travelled in Russia and Germany, and then again in 1818–21 conducted the opera in Vienna. In 1821 he began to travel with the celebrated singer Catalani, conducting her concerts, and was also for a short time (about 1816) conductor of the opera at Prague. He died in poor circumstances.

Clement was not only a remarkable violin-player, but an unusually gifted musician. Spohr, in his *Autobiography*, relates that Clement, after having heard two rehearsals and one performance of the oratorio 'The Last Judgment,' remembered it so well that he was able, on the day after the performance, to play several long pieces from it on the piano without leaving out a note, and with all the harmonies (no small item in a composition of Spohr's) and accompanying passages; and all this without ever having seen the score. Similarly he was said to have made a piano score of the 'Creation' from memory, after having heard the oratorio a few times, merely with the help of the book of words, and that his arrangement was so good that Haydn adopted it for publication.

Clement's style was not vigorous, nor his tone very powerful: gracefulness and tenderness of expression were its main characteristics. His technical skill appears to have been extraordinary. His intonation was perfect in the most hazardous passages, and his bowing of the greatest dexterity. Beethoven himself has borne the highest testimony to his powers by writing especially for him his great violin concerto. The original manuscript of this greatest of all violin concertos, which is preserved in the Imperial Library at Vienna, bears this inscription in Beethoven's own handwriting:

'Concerto par Clemenza pour Clement, primo violino e direttore al theatro a Vienne dal L. v. Bthvn., 1806.'

Clement was the first who played it in public, on Dec. 23, 1806. It would be difficult to believe, if we had not the programme still to refer to, that at this concert he also performed a set of variations 'mit umgekehrter Violine'—with the violin upside down.

He published for the violin 25 concertinos, 6 concertos, 12 studies, a great number of airs variés and smaller pieces; for the piano, a concerto; for orchestra, 3 overtures; for the stage, an opera and the music for a melodrame. All these works are, however, entirely forgotten, and the greater part seem to have disappeared. P. D.

CLEMENT (Clemens), Johann Georg, whom Gerber calls Clementi (*b.* Breslau, *c.* 1710), Knight of the Golden Spur, and Kapellmeister for over fifty years (from 1735) at the church of St. Johann in Breslau.

His numerous compositions for the church comprise 14 masses, 27 offertories, 18 graduals, Te Deums, etc., and a Requiem performed at the funeral of the Emperor Charles VI. (1742). None of them has been published (for list see *Fétis*). He left two sons, one at Vienna; the other first violin at Stuttgart, 1790, at Cassel, 1792, and afterwards Kapellmeister at Carlsruhe. The latter adopted the name Clementi. M. C. C.

CLEMENTI, Muzio (*b.* Rome, 1752; *d.* Evesham, Mar. 10, 1832[1]), the composer who first distinguished the style of the pianoforte from that of the harpsichord in his compositions.

Clementi's father, an accomplished workman in silver, himself of a musical turn, observed the child's uncommon musical gifts at an early period, and induced a relation of the family, Buroni, choirmaster at one of the churches at Rome, to teach him the rudiments. In 1759 Buroni procured him lessons in thorough-bass from an organist, Cordicelli, and after a couple of years' application he was thought sufficiently advanced to compete for an appointment as organist, which he obtained. Meanwhile his musical studies were continued assiduously: Carpani taught him counterpoint and Santarelli singing. When barely 14 Clementi had composed several contrapuntal works of considerable size, one of which, a mass, was publicly performed, and appears to have created a sensation at Rome. An English gentleman, Peter Beckford, M.P., nephew of Alderman Beckford, and cousin of the author of *Vathek*, with some difficulty induced Clementi's father to give his consent to the youth's going to England, when Beckford offered to defray the expenses of his further education, and introduce him to the musical world of London. Until 1773 Clementi quietly pursued his studies, living at the house of his protector in Dorset. Then, fully equipped with musical knowledge, and with an unparalleled command of the instrument, he came upon the town as a pianist and composer. His attainments were so conspicuous that he carried everything before him, and met with a most brilliant, hardly precedented, success. From 1777–80 he acted as cembalist, *i.e.* conductor, at the Italian Opera in London. In 1781 Clementi started on his travels, beginning with a series

[1] See Chester's *Registers of Westminster Abbey* and the *Quarterly Musical Magazine*, ii. 308.

of concerts at Paris[1]; from thence he passed, *via* Strassburg and Munich, to Vienna, where he made the acquaintance of Haydn, and where, at the instigation of the Emperor Joseph II., he engaged in a sort of musical combat at the pianoforte with Mozart. Clementi, after a short prelude, played his sonata in B♭—the opening of the first movement of which was long afterwards made use of by Mozart in the subject of the 'Zauberflöte' overture—and followed it up with a toccata, in which great stress is laid upon the rapid execution of diatonic thirds and other double notes for the right hand, esteemed very difficult at that time. Mozart then began to preludise, and played some variations; then both alternately read at sight some MS. sonatas of Paisiello's, Mozart playing the allegros and Clementi the andantes and rondos; and finally they were asked by the Emperor to take a theme from Paisiello's sonatas and accompany one another in their improvisations upon it on two pianofortes. The victory, it appears, was left undecided. Clementi ever afterwards spoke with great admiration of Mozart's 'singing' touch and exquisite taste, and dated from this meeting a considerable change in his method of playing: striving to put more music and less mechanical show into his productions. Mozart's harsh verdict in his letters (Jan. 12, 1782; June 7, 1783) was probably just for the moment, but cannot fairly be applied to the bulk of Clementi's work. He disliked Italians; the popular prejudice was in their favour, and they were continually in his way. He depicts Clementi as 'a mere mechanician, strong in runs of thirds, but without a pennyworth of feeling or taste.' But L. Berger, one of Clementi's best pupils, gives the following explanation of Mozart's hard sentence:

'I asked Clementi whether in 1781 he had begun to treat the instrument in his present (1806) style. He answered *no*, and added that in those early days he had cultivated a more brilliant execution, especially in double notes, hardly known then, and in extemporised cadenzas, and that he had subsequently achieved a more melodic and noble style of performance after listening attentively to famous singers, and also by means of the perfected mechanism of English pianos, the construction of which formerly stood in the way of a cantabile and legato style of playing.'

With the exception of a concert tour to Paris in 1785 Clementi spent all his time from 1782–1802 in England, busy as conductor, virtuoso and teacher, and amassing a considerable fortune. He had also an interest in the firm of Longman & Broderip (*q.v.*), 'manufacturers of musical instruments and music-sellers to their majesties.' The failure of that house, by which he sustained heavy losses, induced him to try his hand alone at publishing and pianoforte-making; and the ultimate success of his undertaking (see Clementi & Co.) shows him to have possessed commercial talents rare among great artists. In Mar. 1807 property belonging to Clementi's new firm, to the amount of £40,000, was destroyed by fire.

Amongst his numerous pupils, both amateur and professional, he had hitherto trained John B. Cramer and John Field (*q.v.*), both of whom soon took rank amongst the first pianists of Europe. In 1802 Clementi took Field, *via* Paris and Vienna, to St. Petersburg, where both master and pupil were received with unbounded enthusiasm, and where the latter remained in affluent circumstances. On his return to Germany Clementi counted Zeuner, Alex. Klengel, Ludwig Berger and Meyerbeer amongst his pupils, and made the acquaintance of Beethoven (see his letter to Collard, dated Apr. 22, 1807) and of Haydn. During this tour, on Sept. 15, 1804, he married a daughter of J. G. G. Lehmann, cantor of the Nicolaikirche in Berlin, who, after a journey to Italy with her husband, died in childbirth, Aug. 1805. He married again in London, July 3, 1811, Emma Gisburne (see License, St. Pancras). With Klengel and Berger he afterwards went again to Russia. In 1810 he returned to London for good, gave up playing in public, devoting his leisure to composition and his time to business. An educational work of this period of some importance in its day was his *Introduction to Practical Harmony*, originally called *Clementi's Selection of Practical Harmony, for the Organ or Pianoforte*, containing in addition to a treatise on harmony and counterpoint a wide selection of works for keyboard instruments by many masters.[2] He wrote symphonies for the Philharmonic Society between 1812 and 1824 which were highly esteemed, many pianoforte works, and above all completed that superb series of one hundred studies, 'Gradus ad Parnassum' (1817), upon which to this day the art of solid pianoforte-playing rests. In 1820 and 1821 he was again on the Continent, spending an entire winter at Leipzig, much praised and honoured. A public dinner was given in his honour in London on Dec. 17, 1827. He lived to be 80, and the last years of his life were spent at Evesham, in Worcestershire, where he died. His remains were honoured by a public funeral, and were deposited in the cloisters of Westminster Abbey. He retained his characteristic energy and freshness of mind to the last. He was married three times, had children in his old age, and shortly before his death was still able to rouse a company of pupils and admirers—amongst whom were J. B. Cramer and Moscheles—to enthusiasm with his playing and improvisation.

Influence of Compositions. — Clementi left upwards of 100 sonatas, of which about

[1] The books of Messrs. Broadwood & Son contain the entry at this date 'Shipped a harpsichord and a pianoforte for Mr. Clementi to Paris.'

[2] A full list of the contents appeared in former editions of this Dictionary under the heading Practical Harmony.

60 are written for the piano without accompaniment, and the remainder as duets or trios—sonatas with violin or flute, or violin or flute and violoncello; moreover, a duo for two pianos, 6 duets for four hands, caprices, preludes and 'point d'orgues composés dans le goût de Haydn, Mozart, Kozeluch, Sterkel, Wanhal et Clementi,' op. 19; *Introduction à l'art de toucher le piano, avec 50 leçons*; sundry fugues, toccatas, variations, valses, etc., preludes and exercises remarkable for several masterly canons, and lastly, as his lasting monument, the 'Gradus ad Parnassum' already mentioned.

Clementi may be regarded as the originator of the proper treatment of the modern pianoforte, as distinguished from the harpsichord. His example as a player and teacher, together with his compositions, have left a deep and indelible mark upon everything that pertains to the piano.

In a smaller way Clementi, like Cherubini in a larger, foreshadowed Beethoven. In Beethoven's scanty library a large number of Clementi's sonatas were conspicuous; Beethoven had a marked predilection for them, and placed them in the front rank of works fit to engender an artistic treatment of the pianoforte; he liked them for their freshness of spirit and for their concise and precise form, and chose them above all others, and in spite of the opposition of so experienced a driller of pianoforte-players as Carl Czerny, for the daily study of his nephew.

The greater portion of Clementi's 'Gradus' and several of his sonatas—for instance the sonata in B minor, op. 40; the three sonatas, op. 50, dedicated to Cherubini; the sonata in F minor, etc.—have all the qualities of lasting work: clear outlines of form, just proportions, concise and consistent diction, pure and severe style; their very acerbity, and the conspicuous absence of verbiage, must render them the more enduring.

He is the first completely equipped writer of sonatas. Even as early as his op. 2 the form sketched by Scarlatti, and amplified by Emanuel Bach, is completely systematised, and has not changed in any essential point since. Clementi represents the sonata proper from beginning to end. He played and imitated Scarlatti's harpsichord sonatas in his youth; he knew Haydn's and Mozart's in his manhood, and he was aware of Beethoven's in his old age; yet he preserved his artistic physiognomy—the physiognomy not of a man of genius, but of a man of the rarest talents—from first to last.

There is confusion in the various editions of his works: arrangements are printed as originals, the same piece appears under various titles, etc. The so-called complete editions of his solo sonatas—the best, that published by Holle at Wolfenbüttel, and edited by Schumann's friend Julius Knorr, and the original edition of Breitkopf & Härtel, since reprinted by that firm—are both incomplete; the sonatas with accompaniment, etc., are out of print, and only two of his orchestral works seem to have been printed at all. (See *Q.-L.*)

E.D.; addns. from the composer's grandson, H. Clementi Smith, and others.

CLEMENTI & CO. After the bankruptcy of Longman & Broderip, Muzio Clementi entered immediately into a fresh partnership with John Longman, at one of the old shops (26 Cheapside), and when Longman leaving him went to another address in Cheapside, Clementi became head of a new firm consisting of himself, Banger, F. A. Hyde, F. W. Collard and D. Davis. The new partnership, at first known as Clementi, Banger, Hyde, Collard & Davis (afterwards shortened into Muzio Clementi & Co., or Clementi & Co.), underwent gradual changes. In 1810 Hyde's name disappears and the firm becomes Clementi, Banger, Collard & Davis. In 1819 it is Clementi, Collard, Davis & Collard, and in 1823 Clementi, Collard & Collard, while after Clementi's death in 1832 it finally appears as Collard & Collard, who remained at 26 Cheapside, the old Longman address.

The Clementi firm had great trade and reputation in the manufacture of pianofortes. Clementi's name was doubtless of great weight as a guarantee of good workmanship. Violins and other instruments bear their stamp; they were, besides, music publishers. (See Collard.)

F. K.

CLEMENZA DI TITO, LA, opera in 2 acts, text adapted from Metastasio by Mazzola; music by Mozart. Produced Prague, Sept. 6, 1791; King's Theatre, Haymarket, Mar. 27, 1806. G.

CLÉOPÂTRE, opera by Massenet; produced Monte Carlo, season of 1914–15; Chicago, Auditorium, Jan. 10, 1916.

CLÉRAMBAULT, Louis Nicolas (*b.* Paris, Dec. 19, 1676; *d.* there, Oct. 26, 1749), a pupil of A. Raison, whom he succeeded as organist at St. Jacques, later at St. Louis, St. Cyr and St. Sulpice. He composed 5 books of French cantatas and a number of single cantatas which were highly esteemed in their time. He also wrote one book each of harpsichord (1703) and of organ pieces; the latter were republished in Guilmant's *Archive des maîtres de l'orgue.* E. v. d. S.

CLER'EAU, Pierre (*d.* before 1557), a 16th-century master of the boys' choir at the church

of Toulon (or Toul ?) in 1554, died apparently before 1557. He composed masses, motets, 'Ier. livre de chansons,' 'Ier. livre d'odes de Ronsard.' His Mass, 'In me transierunt,' was re-edited in score by Witt (Ratisbon, Coppenrath). E. v. d. s.

CLESS, Magister Johann (*b.* Hanau, Hanoius ? mid-16th cent.), wrote music for the choruses of Scaliger's Latin translation of Sophocles' *Ajax* performed at Strassburg in 1587. The choruses are remarkably fine, especially the 8-part chorus with 2 solo voices and the dance-choruses. They have been republished in ArthurPrüfer's 'Untersuchungen,' etc. (1890). E. v. d. s.

CLEVE, Johannes de (*b.* Cleve ?, 1529 ; *d.* Augsburg, July 14, 1582), a tenor singer in the Vienna court chapel, 1563–64 ; then at the court of Archduke Charles at Graz. He went to Augsburg apparently in 1576. He was a church composer of great merit, and wrote 2 books of cantiones sacrae (1559), 1 book cantiones seu harmoniae sacrae (1579), in MS. : masses, motets, canons, etc. A considerable number of his works have been republished in modern editions. (See *Q.-L.*) E. v. d. s.

CLEVELAND, Ohio. Several orchestral organisations have existed at Cleveland, including that conducted by George Lehmann (1886–89) and one formed under Johann H. Beck in 1889.

Cleveland Symphony Orchestra.—The Musical Arts Association of Cleveland, Ohio (incorporated in 1902), established the Cleveland Symphony Orchestra on a permanent basis in 1918. Nikolai Sokoloff, engaged then as conductor, has remained at that post ever since. In 1920 Arthur Shepherd was appointed assistant conductor. In the first season the orchestra numbered 55 players. It has been increased, and since the season of 1921–22 it has had 90. Sixteen pairs of concerts (in afternoon and evening) are given in the regular season in Cleveland ; also 12 popular concerts, 8–10 children's concerts, 12–15 concerts in the public schools ; and on tour outside of Cleveland a number that has varied in recent years betwen 48 and 65.

The orchestra is supported by more than 900 annual subscribers to the maintenance fund. In co-operation with the Board of Education of Cleveland two music schools are carried on in high schools of the city by the Musical Arts Association, most of whose teachers are members of the Cleveland Symphony Orchestra. The instruction given is in the playing of all orchestral instruments and in *ensemble*. The Musical Arts Association makes a point of inviting annually one or more composers to conduct their own works with the orchestra. R. A.

CLICQUOT, see Cliquot.

CLIFFE, Frederick (*b.* Lowmoor, near Bradford, Yorks, May 2, 1857), received his earliest musical instruction from his father, an amateur violoncellist.

At the age of 6 he played the pianoforte in a manner far beyond his years, at 9 he began to study the organ, and at 11 was appointed organist to Wyke Parish Church, while a year later he is said to have been able to play the whole of Bach's 48 preludes and fugues. Meanwhile Cliffe acquired a local reputation by the beauty of his voice. After being appointed organist to a dissenting chapel, Cliffe's services became in great demand for 'opening' new organs. From 1873–76 he was organist to the Bradford Festival Choral Society, and later, on being elected to the Titus Salt scholarship at the National Training School of Music, he studied under Sullivan, Stainer, Prout and Franklin Taylor. In 1883 he was appointed to a pianoforte teaching staff of the then recently founded R.C.M., and is now (1926) a member of the Board of Professors. Next he toured as solo pianist and accompanist with Mme. Lemmens-Sherrington and others ; became in succession organist to Curzon Chapel and St. George's, Albemarle St., and to the Leeds Festival under Sullivan as assistant to Dr. Spark. In the latter capacity he played in 'The Golden Legend,' and for the Festival he arranged and played the organ part in the first performance there of Bach's B minor Mass. After twenty years of continuous church work Cliffe retired in 1889. He was organist to the Bach Choir from 1888–94, and of the Italian Opera at Drury Lane, Her Majesty's and Covent Garden about the same time. It is, however, as a composer that he made his greater reputation, and it is curious to note that the work which *par excellence* established that reputation, his opus 1, a fine symphony in C minor, was rejected by the Leeds Selection Committee. When it was produced by Manns at his own benefit (Crystal Palace, Apr. 20, 1889), it created a very unusual amount of interest. In 1901 he became a pianoforte professor at the R.A.M., and an examiner for the Associated Board of the R.A.M. and R.C.M. ; for them he toured in Australia in 1898, and in 1900 and 1903 he visited South Africa on behalf of the Cape of Good Hope University. He has travelled also in America.

The following is a list of Cliffe's principal productions :

Symphony No. 1 in C minor. (1889.)
Symphony No. 2 in E minor. (Leeds, 1892.)
Tone Poem, 'Cloud and Sunshine,' for orchestra. (Philh., 1890.)
Violin Concerto D minor. (Norwich, 1896.)
'The Triumph of Alcestis,' contralto, voice and orchestra. (Norwich, 1902.)
'Ode to the North-East Wind,' choir and orchestra. (Sheffield, 1905.)

R. H. L.

CLIFFORD, (1) Rev. James (*b.* Oxford, 1622; *d.* Sept. 1698), son of Edward Clifford, a cook, then living in the parish of St. Mary Magdalen, Oxford, is important for evidence his work

affords of the state of English Church music in the 17th century.

In 1632 he was admitted a chorister of Magdalen College, and so remained until 1642.

On July 1, 1661, he was appointed tenth minor canon of St. Paul's Cathedral, and in 1675 was advanced to the sixth minor canonry. In 1682 he became senior canon. He was also for many years curate of the parish church of St. Gregory by St. Paul's, and chaplain to the Society of Serjeants' Inn, Fleet Street. In 1663 Clifford published, under the title of

'The Divine Services and Anthems usually sung in the Cathedrals and Collegiate Choirs of the Church of England,'

a collection of the words of anthems; the first of its kind which appeared in the metropolis. (It had been anticipated in a collection compiled and printed by Stephen Bulkley at York in 1662, and in a book of

'Anthems to be sung . . . in the Cathedral Church of the Holy and Undivided Trinity in Dublin,'

printed 1662. The only known copy of this last is in the library of Trin. Coll. Dublin; it contains the words of 51 anthems and the names of most of the composers.) So great was the success of Clifford's work that a second edition, with large additions, appeared in 1664. To the first edition are prefixed:

'Briefe Directions for the understanding of that part of the Divine Service performed with the Organ in St. Paul's Cathedral on Sundays and Holydayes';

and to the second, chants for Venite, the Psalms and the Athanasian Creed. The work is curious and interesting as showing what remained of the cathedral music produced before the parliamentary suppression of choral service in 1644, and what were the earliest additions made after the re-establishment of that service in 1660. Clifford's only other publications were *The Catechism, containing the Principles of Christian Religion*, and *A Preparation Sermon before the receiving of the Holy Sacrament of the Lord's Supper, preached at Serjeants' Inn Chapel, in Fleet Street*, which appeared together in 1694.

Clifford had a younger brother (2) Thomas (*b.* Oct. 1633), who was admitted chorister of Magdalen College in 1642 and resigned in 1645.

W. H. H.; addns. L. M'C. L. D.

CLIFTON, John C. (*b.* London, 1781; *d.* Hammersmith, Nov. 18, 1841), studied for five years under Richard Bellamy. He subsequently became a pupil of Charles Wesley, and devoted himself entirely to music, resigning an appointment in the Stationery Office which he had held for about two years.

After an engagement at Bath, where he conducted the Harmonic Society, he went in 1802 to Dublin, and in 1815 produced there a musical piece called 'Edwin.' He organised, together with Sir John Stevenson, a concert in aid of the sufferers by the Irish famine. In 1816 he invented an instrument called the 'Eidomusicon,' intended to teach sight-reading. An attempt made in 1818 to bring out his invention in London failed, and he then adopted Logier's system of teaching, and remained in London for some time. He wrote numerous glees and songs. He married the proprietress of a ladies' school at Hammersmith, where he died.

W. B. S.

CLINGHER, see Clinio, Teodoro.

CLINIO (Clingher), Teodoro (*b.* Venice, 16th cent.), was maestro di cappella at Treviso Cathedral in 1592. He composed 'Missarum 6 v. lib. 1,' Venice, 1592; 'Singularia 4 v.'; 'Christi Domini Passiones 3, 4, et 6 v.,' Venice, 1595; and a great amount of church music (in MS.), including several Passiones. (See *Q.-L.*)

CLIQUOT, (1) Robert (*b.* 17th cent.), the first of the French organ-makers who made his name celebrated, was of an old family living at Meaux. He was maker by warrant to Louis XIV.; he worked at the construction of the organ in the chapel of the Château at Versailles (1711). He had already established his reputation by the great instruments which he had made in the cathedrals of Rouen (1686–1689), Saint Quentin (1701–03) and Blois (1704). About 1713 he gave up the direction of his workshops to his son, Jean Baptiste, with whom he made a specification for the enlargement of the great organ in the cathedral at Laon.

(2) Jean Baptiste, son of the foregoing, executed a great deal of work in repairing the organ at Laon Cathedral (1714–16).

(3) Louis Alexandre (*d.* Paris, Jan. 25, 1760), brother of the foregoing, was the maker of the organs in the churches of Houdan (1734), and of Chevreuse, Seine et Oise. The organ at Houdan has kept its 21 stops in their primitive state until now.

(4) François Henri (*b.* Paris, 1728; *d.* there, 1790), son of the foregoing, acquired European fame for the quality of his reeds and mixtures. He succeeded his father in 1760 and took Pierre Dallery into association in 1765. His most capable workmen were Lair, Isnard, Laurent, Brachet and Gillier, who collaborated with him in the construction of the organs at the church of Saint Médard (1767) and of Saint Gervais (1764–68). The most beautiful organs in the Parisian churches owe their existence to Cliquot: the Jacobins, Rue St. Dominique (1771); Sainte-Chapelle (1771); St. Nicholas-des-Champs (1776); St. Merry (1781); St. Sulpice, 32 ft. pedal, 66 stops and 5 manuals (1781); Notre Dame (1784); St. Leu (1786–88). He carried out a great deal of work in the provinces, notably on the organs of Versailles cathedral (1761); important restorations to the organs of the cathedral at Nantes (1784), and of Meaux. He began the construction of the organ in the church of St. Nicholas du Chardonnet at Paris, and of the great organ in the cathedral at Poitiers, his

chef-d'œuvre, but he died before this work was completed and it was his son François who finished them. The organs of St. Gervais, of St. Nicholas-des-Champs and of St. Leu at Paris, those of Nantes and of Poitiers, still preserve the greater part of the original stops of François Henri Cliquot. F. R[L].

CLIVE, CATHERINE, known as 'Kitty Clive' (*b.* London, 1711; *d.* Dec. 6, 1785), a dramatic singer, the daughter of William Raftor, an Irish gentleman.

Displaying a natural aptitude for the stage she was engaged by Colley Cibber for Drury Lane Theatre (1728–41), and made her first appearance there, Nov. 1728, as the page Ismenes, in Nat. Lee's tragedy 'Mithridates.' In 1729 she attracted great attention by her performance of Phillida in Colley Cibber's ballad opera, 'Love in a Riddle.' Her personation of Nell in Coffey's ballad opera, 'The Devil to Pay,' in 1731, established her reputation, and caused her salary to be doubled. On Oct. 4, 1734, she married George Clive, a barrister, but the pair soon agreed to separate. She continued to delight the public in a variety of characters in comedy and comic opera, and was engaged by Garrick in 1746 for Drury Lane, until Apr. 24, 1769, when, having acquired a handsome competence, and being pensioned by Horace Walpole, she took leave of the stage and retired to Twickenham, where she occupied a house in the immediate vicinity of Horace Walpole's famous villa at Strawberry Hill, until her death. One of the most prominent events in Mrs. Clive's career as a singer was Handel's selection of her as the representative of Dalila in his oratorio 'Samson,' on its production in 1743. She was the first to sing Arne's 'Where the Bee sucks.' W. H. H.

CLOCHES, see BELL (2), ORCHESTRAL.

CLOCKING, or CLAPPERING, tying the bell rope to the clapper for the purpose of chiming, *i.e.* pulling the clapper to strike the bell instead of moving the bell in the usual way. It is a most pernicious practice, and if persisted in eventually cracks the bell. Some of the finest old bells have been ruined in this way. W. W. S.

CLODIUS, CHRISTIAN (*b.* Neustadt, near Stolpen, Oct. 18, 1647), a teacher in Neustadt, who compiled a collection of students' songs while at Leipzig University, described by W. Niessen, *Vierteljahrsschrift f. mus. Wissenschaft*, vii. 579; C. Blümml, *Aus dem Liederbuche*, etc. (1908). E. v. d. S.

CLOSE, see CADENCE (II.).

CLOSSON, ERNEST (*b.* St. Josse-ten-Noode, near Brussels, Dec. 12, 1870), was in 1896 appointed assistant curator of the museum of musical instruments at Brussels Conservatoire, and in 1912 became teacher of musical history there. Since 1917 he has also been professor at the Mons Conservatoire and since 1920 music critic to *L'Indépendance belge*. As lecturer and critic he has done valuable work and published a large number of books on musical subjects, making a special study of Belgian folk-song and kindred matters. His works in that direction begin with *Chansons populaires des provinces belges*, 1905 (3rd ed., 1920), and include *Vingt noëls français anciens*, 1911; *Le Manuscrit dit* 'des basses danses' *de la bibliothèque de Bourgogne*, 1912; *Notes sur la chanson populaire en Belgique*, 1913. He has also issued several essays on æsthetics in music, notably *Esthétique musicale*, 1921. He has contributed to the present edition of this Dictionary. C.

CLUER, JOHN (*d. circa* 1729–30), appears to have been originally a ballad and chap-book printer early in the 18th century, and to have worked at premises in Bow Churchyard.

Afterwards he issued the most beautifully engraved and adorned music of his period. He was entrusted by Handel with the publication of several of that master's early productions. Cluer, as shown by a type-printed music sheet in the British Museum ('The Pedigree of a Fiddler'), claims to have invented some improvements in music type or the setting of it: this was before he worked from the engraved plate. The passage on the sheet referred to runs:

'For the future all the songs printed by J. Cluer in Bow Churchyard will be set to musick, and as he hath invented a new and quick way of doing the same in letterpress for the enlargement of musick, songs will now be sold by him at a much cheaper rate, etc. etc.'

The periodical squabbles which Handel had with the elder Walsh caused the former to grant to Mears, and also to Cluer, the right of publication of some of the Italian operas. The first which Cluer had of these was 'Giulio Cesare,' published in 1724; but he had previously printed Handel's 'Suites de pièces' in 1720. The other operas are 'Tamerlane,' 'Rodelinda,' 'Scipio,' 'Alessandro,' 'Riccardo Primo,' 'Admeto' and 'Lotario.' The first three were also issued in octavo, transposed for the flute. The operas have very finely engraved pictorial title-pages. Among other of Cluer's publications are *A Pocket Companion for Gentlemen and Ladies*, 2 vols., 1724–25, a couple of dainty volumes from copperplates; two quaint packs of musical playing-cards (one set in the British Museum); 'Psalm Tunes,' by William Anchors; Twelve Overtures by Handel, and other works. Cluer was associated with B. Creake, a bookseller in Jermyn Street whose name appears on the imprints. Thomas Cobb was Cluer's engraver and successor in business, having married his widow. Cobb, having had the business for a few years after Cluer's death, was followed by Wm. Dicey. After Cluer's death the imprints frequently merely give 'at the printing-office in Bow Churchyard.' F. K.

CLUTSAM, George H. (*b.* Sydney, New South Wales, 1866), composer, began his career as a pianist, and after considerable travel in New Zealand and in Asia settled in London and became known as an accompanist and then more particularly as a musical critic (the *Observer*, 1908–18, essays in *Mus. T.*, etc.). The production of a symphonic idyll, 'The Lady of Shalott,' by the New Symphony Orchestra in Oct. 1909, and the performance at about the same time of a cantata, 'The Queen of Rapunzel,' made him known in London as an accomplished composer, and the production by Beecham in 1910 of his one-act opera, 'A Summer Night,' left no doubt of his ability to write interestingly for the stage. Two years later (Apr. 1912) another one-act piece, 'After a Thousand Years,' was produced at the Tivoli in London and oddly described as 'a New Egyptian Miniature Grand Opera.' It was in fact an attempt to write a whole opera in dimensions possible for inclusion in a variety entertainment. A more important work, and the last of Clutsam's works to claim importance from the musician's point of view, was the opera, 'König Harlekin,' produced with momentary success at the Kurfürstenoper, Berlin, in Nov. 1912. After that Clutsam turned to a field of activity which has been more profitable from the material point of view. He collaborated with Hubert Bath in the music to Basil Hood's 'Young England,' produced at Birmingham in 1916, and has since brought out several musical comedies in London. In this field his greatest popular success has been 'Lilac Time' (1923), which musically is a potpourri of Schubert. C.

COATES, Albert (*b.* St. Petersburg, Apr. 23, 1882), conductor and composer. His father, born at Bridlington in Yorkshire, was settled in business in St. Petersburg, where he had married a Russian lady. Albert was the youngest of their seven sons. He was sent to England for education and was at school first in Essex then at Liverpool. At the latter place he learnt music from one of his brothers, who was an organist there, but he entered Liverpool University as a science student, and at length returned to St. Petersburg and entered his father's office. It soon appeared, however, that orchestration was a stronger point with him than book-keeping, and he was 20 years old when arrangements were made for him to enter the Conservatorium of Leipzig. There he studied the violoncello with Klengel and the piano with Robert Teichmüller, but the greatest factor in his artistic development was Nikisch and his class in conducting. His appointment by Nikisch to be *répétiteur* at the Opera of Leipzig started Coates on his practical career, and he first appeared there as emergency conductor in 'Tales of Hoffmann.' This led in 1906 to his securing on Nikisch's recommendation the chief post as conductor to the Elberfeld opera house, where he remained two years conducting a large repertory of works including the German classics, Mozart, Wagner and Strauss. This was followed by a period of conducting at the Dresden Opera, where Coates shared the responsibilities with Schuch. He married in 1910 Madelon, daughter of Alfred R. Holland. He conducted for a season at Mannheim, during which time he was invited to conduct 'Siegfried' at St. Petersburg, which led to his appointment as a principal conductor there for five years. During this important period in his career Coates added to his repertory the large number of Russian works both of the opera and the concert room, his performance of which has since added to his reputation both in Europe and in America. He was in close touch with the leading Russian musicians of the time, especially Scriabin, who imparted to him his ideas on the interpretation of his music and who influenced him strongly in his own style of composition. Coates first became prominent in England in 1913 when at Covent Garden he shared the Wagner performances with Nikisch with acknowledged success. He had appeared at Queen's Hall in 1910 with the London Symphony Orchestra, but it was not until April 1919, when it was no longer possible for him to continue his work in Russia, that he signalised his arrival with a series of concerts with the same orchestra, and henceforward became one of the regular conductors during a part of the season in London. Beecham engaged him for the season with which Covent Garden was reopened after the war, and subsequently he has been responsible for many of the best performances of the B.N.O.C. both at Covent Garden and the provinces, and he has conducted the major part of two festivals at Leeds (1922 and 1925). In America he has conducted the Philharmonic Society of New York and also concerts of the Symphony Society, and from 1923–25 he spent part of each season at Rochester, N.Y., as conductor of the Eastman orchestra. His engagements as a guest conductor have carried him to most of the principal cities of Europe; in 1925 he undertook some special performances at the Paris Opéra. He holds a firmly established position as a master of the orchestra, and excels in work on a large scale, notably Wagner and the symphonic works of Scriabin.

Little of Coates's composition has been presented to the public. An opera, 'Assurbanipal' (the book by Mrs. Albert Coates, Russian by Balmont), was set down for performance at Moscow in Jan. 1915, but postponed. An elaborate symphonic poem, 'The Eagle,' dedicated to the memory of Nikisch, was given at Leeds in 1925. Some piano pieces have been published. C.

COATES, Eric (*b.* Hucknall, Notts, Aug. 27, 1886), gained a scholarship at the R.A.M., where he studied the viola with Tertis and composition under Corder. He made a name for himself as a chamber-music player and from 1912 was leading viola in the Queen's Hall Orchestra. Several of his orchestral works, in which the slight material is gracefully handled, were produced at the Promenade and other concerts of this orchestra, and have become popular. For a list including numerous songs see *B.M.S. Ann.*, 1920. C.

COATES, John (*b.* Girlington, near Bradford, June 29, 1865), a distinguished tenor singer. His father, Richard Coates, was choirmaster at Girlington church, and John sang in this choir at the age of 5.

Two years later he joined the choir of St. Jude's, Bradford, becoming in due course the chief treble. Owing to the death of his father he had to leave Bradford Grammar School early and go into an office when 13. While still engaged in business, he sang Valentine in 'Faust' for the Carl Rosa Company at Manchester and Liverpool, but without success. It was as a baritone that in Sept. 1893 he took lessons from Shakespeare, who pronounced his voice a tenor. Getting a hearing from D'Oyly Carte, Coates made an appearance at the Savoy Theatre in 'Utopia Limited,' and was forthwith engaged to tour in America with that opera. During a second visit to America he sang in 'An Artist's Model,' and then followed several years of regular work in musical comedy in London and the provinces. Convinced that he was a tenor and not a baritone, Coates at length took a bold step, giving up his engagements and studying a variety of tenor parts in private. Starting his career all over again he had a very hard struggle, and it was at this period that he was engaged to bring out Sullivan's 'Absent-minded Beggar' at the Alhambra Theatre, in Nov. 1899. Fortune changed when, in Nov. 1900, he sang in 'The Gay Pretenders' at the Globe Theatre, and in the summer of 1901 created the part of Claudio in Stanford's 'Much Ado About Nothing,' at Covent Garden. Singing at Leeds in the autumn of the same year, and in Elgar's 'Dream of Gerontius' at Worcester (1902), he was fairly launched as a festival tenor. At the Birmingham Festivals of 1903, 1906 and 1909 he sang the tenor parts in the productions of Elgar's 'Apostles,' and 'Kingdom,' and Bantock's 'Omar Khayyám.' As an opera-singer Coates hitherto had more opportunities in Germany than in England, but he was with the Moody-Manners Company throughout the season of 1907–08, singing many important parts; he was principal tenor in Beecham's season at His Majesty's Theatre, 1910. He was with Beecham again, this time at Covent Garden, in the autumn of 1910, when he sang the chief part in Eugen D'Albert's 'Tiefland.' After playing both Siegfrieds in the Denhof performances of the 'Ring' in the provinces in 1911 he went (1911–13) on the Quinlan tour in the United Kingdom, South Africa and Australia, adding Tristan among other parts to his repertory.

At the outbreak of the war (1914–18), Coates, though much beyond military age, at once joined the National Reserve. In Nov. 1914 he joined the London University O.T.C., and in Apr. 1915 he was given a commission. He served in France with the Yorkshire Regiment, 1916–19, and was twelve months at the Front. Demobilised with the rank of Captain, he resumed his professional career in Mar. 1919. Since then, apart from a few special appearances as Lohengrin and Don José for the Carl Rosa Co. at Covent Garden, he has confined his attention to the concert-room, singing everywhere with all his old success, both at festivals and in his own recitals of English songs. In addition to giving programmes of Elizabethan and Tudor music he has introduced many new songs by English composers of the present day. S. H. P.

COB (Cobb), James (*d.* London, Aug. 20, 1697), became a member of the Chapel Royal in 1660. He composed songs and catches, contributed to Playford's 'Choyce Ayres' (1679) and to the Catch Club. (See *Q.-L.*)

E. v. d. S.

COBB, John, a 17th-century gentleman of the Chapel Royal, sworn in, July 1638. He composed an elegy on Wm. Lawes, printed among the psalms of Hy. and Wm. Lawes, 1648, in which he is styled organist of H.M.'s Chapel Royal. At the outbreak of the Revolution he took to private teaching. Cobb, who is the composer of the well-known 3-part catch 'Smiths are good fellows,' contributed 4 canons and 1 catch to Hilton's collection (1652), a glee to Playford's *Musical Companion*, 1667; also some numbers in *Catch Club*, 3, vol. 3. E. v. d. S.

COBBETT, Walter Willson, (*b.* Blackheath, 1847), affords a striking instance of conspicuous services rendered to the cause of music by one who has himself practised the art solely as an amateur. A highly successful man of business—as founder and chairman of the company known as Scandinavia Belting, Ltd.—it has been humorously remarked of him that he has given to commerce what time he could spare from music, while others have summed up his career in another way by describing him as a British Belaiev. What is certain is that by his wisely directed and wholly disinterested activities, pursued with inexhaustible enthusiasm throughout a long life, he has laid under heavy obligation all who are concerned with the higher interests of our native art.

Cobbett's services to the musical community

have taken many forms, mostly associated with that particular branch of the art, namely, chamber music, in which he himself is more especially interested. A fine violinist himself, he has throughout his life been a devoted student of chamber music in the most practical se se — leading his own quartet at weekly meetings continued year after year with unfailing regularity—and from the first he has made it his special business to extend the general knowledge and promote the wider appreciation of that branch of the art.

By the series of Cobbett Competitions which he initiated some quarter of a century ago, and by his numerous direct commissions to native composers, he has been instrumental in enriching the British chamber-music catalogue with some of the most notable works which have been added to it within recent years. These include, to mention but a few, compositions by York Bowen, Frank Bridge, James Friskin, Armstrong Gibbs, W. Y. Hurlstone, Herbert Howells, John Ireland, J. B. McEwen, Stanford, Waldo Warner, and Vaughan Williams—names which speak for themselves.

Particular encouragement has been given also through the agency of these competitions to the production of short single-movement works of the now well-known ' Phantasy ' class, which have proved such an acceptable addition to the repertory ; while at the R.C.M. and the R.A.M. Cobbett has furthered the chamber-music cause in another way by offering a series of annual prizes for the best performances by the students.

In the way of literary propaganda Cobbett was responsible for the issue of a valuable series of Chamber Music Supplements, continued for several years, in connexion with the *Music Student*, while more recently he has undertaken the production of a comprehensive *Cyclopedia of Chamber Music* which is now in course of preparation. In conjunction with the Worshipful Company of Musicians, of whose Committee he is a member, he has also recently instituted and endowed an annual Cobbett Medal for services to chamber music, the first (1924) recipient of which was T. F. Dunhill (*q.v.*), the second (1925) Mrs. Coolidge, and the third (1926), Alfred J. Clements, of the South Place Sunday Concerts.

He has likewise given many prizes from time to time to the makers of British violins, with the object of raising the standard of our native instruments ; has very actively interested himself in the movement for giving Sunday concerts of chamber music in the poorer districts ; and, in conjunction with the Society of Women Musicians, has provided a free public library of chamber music.

Still (1927) an enthusiastic performer in private, Cobbett was in his younger days the leader of several orchestras, including for many years that of the Strolling Players Amateur Orchestral Society. To which it may be added that he is the happy possessor of a fine collection of Cremona violins, which he delights in lending out to fellow-artists who are worthy of them. H. A. S.

COBBOLD, William (*b.* Norwich, Jan. 5, 1559/60 ; *d.* Beccles, Nov. 7, 1639), organist of Norwich Cathedral before 1599, holding the post till 1608, when he became a singing-man in the cathedral, W. Inglott being appointed organist. He was born in the parish of St. Andrew, Norwich.

Cobbold was one of the ten musicians who harmonised the tunes for

' The Whole Booke of Psalmes with their wonted Tunes as they are song in Churches, composed into foure partes,'

published by Thomas East in 1592. He contributed a madrigal, ' With wreaths of rose and laurel,' to ' The Triumphes of Oriana,' 1601. The only other known compositions by him are another madrigal, ' New Fashions,' and an anthem, ' In Bethlehem towne,' of which some separate parts are preserved in the R.C.M. He is buried on the south side of the chancel of Beccles parish church. His epitaph is quoted in West's *Cath. Org.*, from which most of the above information is taken. Dr. A. H. Mann has re-edited the madrigal from ' Oriana,' with biographical note. W. H. H.

COCCHETTA, COCHETTINA, see Gabrielli, Catterina.

COCCHI, Claudio (*b.* Genoa, end of 16th cent.), entered the Order of St. Francis in 1626 in the service of Cardinal Dietrichstein in Germany ; in 1627 he was maestro di cappella at Trieste Cathedral, and, after some wanderings, in 1632 held the same post at S. Francesco, Milan and Accademico Arrischiato dell' Allegro. His known works are : ' Armonici concentus,' etc., Venice, 1626 ; Messe, *a* 5 v., 1627 ; ' Ghirlanda sacra,' Milan, 1632. Also some pieces in MS. cod. Lechler. (*Q.-L.*).

COCCHI, Gioacchino (*b.* Padua, *c.* 1715 ; *d.* Venice, *c.* 1804), dramatic composer ; produced his first operas, ' Adelaide ' and ' Bajasette,' in Rome (1743 and 1746).

In 1735 he was at Naples, and about 1753 was appointed maestro di cappella of the Conservatorio degli Incurabili at Venice. Here he wrote ' Il pazzo glorioso.' In 1757 he came to London as composer to the Opera till 1762, where he conducted Mrs. Cornelys's subscription concert for two years. During a sixteen years' residence in England he composed 11 operas, as well as contributing to several pasticcios (see *Q.-L.*). About 1772 he returned to Venice. His reputation was considerable for a time both in Italy and England. Burney praises ' his good taste and knowledge in counterpoint,' but says he ' lacked invention, and hardly produced a new

passage after his first year in England.' He realised a large sum by teaching. M. C. C.

COCCIA, CARLO (*b.* Naples, Apr. 14, 1782; *d.* Novara, Apr. 13, 1873), son of a violinist, studied under Fenaroli and Paisiello.

The latter procured him the post of accompanist at King Joseph Bonaparte's private concerts, and encouraged him after the failure of his first opera, 'Il matrimonio per cambiale' (Rome, 1808). Between the years 1808 and 1819 he composed 22 operas for various towns in Italy, and 2 cantatas, one for the birth of the King of Rome (Treviso, 1811), the other (by a curious irony, in which Cherubini also shared) for the entry of the allied armies into Paris (Padua, 1814). In 1820 he went to Lisbon, where he composed 4 operas and a cantata, and thence to London (Aug. 23), where he became conductor at the Opera. He discharged his duties with credit, and profited by hearing more solid works than were performed in Italy, as he showed in the single opera he wrote here, 'Maria Stuarda' (1827). He was also professor of composition at the R.A.M. on its first institution. In 1828 he returned to Italy. In 1833 he paid a second visit to England, and then settled finally in Italy. In 1840 he succeeded Mercadante as maestro di cappella at Novara, and was appointed Inspector of Singing at the Philharmonic Academy of Turin. His last opera, 'Il Lago delle Fate' (Turin, 1844), was unsuccessful. Coccia wrote with extreme rapidity, the entire opera of 'Donna Caritea' (Turin, 1818) being completed in six days. 'Clotilde' (Venice, 1815) was the most esteemed of all his works in Italy. (For list see *Fétis.*) M. C. C.

COCCIA, MARIA ROSA (*b.* Rome, Jan. 4, 1759), a composer who won a remarkable degree of contemporary renown, although very few of her works are still in existence.

A Magnificat for four voices and organ (Fitzwilliam Museum, Cambridge) is dated Oct. 2, 1774, and soon after that date she underwent an examination by four professors of the Academy of Saint Cecilia, with such credit that an account of the examination was printed at Rome in 1775, with her portrait and a specimen of her work. In this latter year she seems to have been given the title of maestra di cappella by the Accademia Filarmonica of Bologna, and the Cambridge collection already mentioned contains an 8-part 'Dixit Dominus' by her, in which is her portrait and some biographical information. In 1780 was published an *Elogio storico della signora Maria Rosa Coccia Romana*, with letters addressed to her by Metastasio, Padre Martini and Farinelli. A cantata for four voices is in the Dresden Museum, and is dated 1783. M.

COCHLAEUS (COCLEUS), JOHANNES, D.D. (real name Joh. Dobnek) (*b.* Wendelstein, near Nuremberg, Jan. 10, 1479; *d.* Breslau, Jan. 10, 1552). He was Canon of Worms Cathedral; was in 1530 at St. Victor's, Mayence; finally Dean at St. Mary's, Frankfort-on-M. He was an ardent opponent of Luther. He taught Glarean, and was probably at Cologne soon after 1500. He wrote a treatise, *Musica*, which appeared anonymously and had several editions, until it was published at Cologne in 1507 under his own name (on his taking the degree of M.A.). It was gradually enlarged and eventually appeared at Nuremberg in 1511 as *Tetrachordum Musices*, and went into at least 6 editions between that date and 1526. Of his compositions only 2 odes *a* 4 v. of 1512 appear to be known; reprinted in Forkel, *Musikgeschichte*, ii. 159, 160. E. v. d. S.

COCKS & CO., ROBERT. This business was established in 1823 by Robert Cocks at No. 20 Princes Street, Hanover Square, until the end of 1844, when it was removed to No. 6 New Burlington Street. In 1868 Robert Cocks took into partnership with him his two sons, Arthur Lincoln Cocks and Stroud Lincoln Cocks. During the 75 years of its existence upwards of 16,000 publications have issued from the house, including many works of solid and permanent worth, such as Czerny's Schools of Practical Composition and of the Pianoforte; Spohr's and Campagnoli's Violin Schools; Albrechtsberger's and Cherubini's Treatises on Counterpoint; Bertini's Method; J. S. Bach's Pianoforte Works, etc. etc. A periodical, the *Monthly Miscellany*, contained original notices of Beethoven by Czerny. W. H. H.

ROBERT COCKS (*d.* Apr. 7, 1887), the original founder, died in his ninetieth year, and was buried at Kensal Green. At his death Robert M. Cocks became proprietor and carried on the business until Dec. 1898, when he retired and transferred the concern to Augener, who purchased the leases and goodwill for this branch, retaining the old name. F. K.

COCLICUS, ADRIAN PETIT (*b.* Hainault, *c.* 1500; *d.* Copenhagen, 1563), a pupil of Josquin des Prés, member of the Papal chapel and confessor of the Pope. After imprisonment for his dissolute life he went to Wittenberg in 1545, where he became a Protestant. Following several appointments in various north German towns he became a member of the Chapel Royal, Copenhagen, in 1563. He wrote 'Compendium Musices' (Nuremberg, 1552), and 'Musica reservata,' 4-part psalms (1552), and a song in organ tablature in Kleber's MS. organ-book. (See *Q.-L.*) E. v. d. S.

COCQ, LE, see GALLUS.

CODA, the Italian for a tail. That which goes by the name in music is very fairly expressed by the word, for it is that part which comes at the end of a movement or piece of any kind, and has to a certain extent an independent existence and object, and though not

always absolutely necessary, cannot often be easily dispensed with.

The earliest idea of a musical coda was probably a few simple chords with a cadence which served to give a decent finish to the mechanical puzzles over which so much ingenuity was wont to be expended in old days. For instance, when a number of parts or voices were made to imitate or follow one another according to rigorous rules, it would often occur that as long as the rules were observed a musical conclusion could not be arrived at. Indeed sometimes such things were constructed in a manner which enabled the piece to go on for ever if the singers were so minded, each following the other in a circle. In order to come to a conclusion a few chords would be constructed apart from these rigorous rules, and so the coda was arrived at.

Applied to instrumental music of the classical era this came to be a passage of optional dimensions which was introduced after the regular set order of a movement was concluded. For instance, in a series of variations, each several variation would only offer the same kind of conclusion as that in the first theme, though in a different form ; and in the very nature of things it would not be æsthetically advisable for such conclusion to be very strongly marked, because in that case each several variation would have too much the character of a complete set piece to admit of their together forming a satisfactorily continuous piece of music. Therefore it is reasonable when all the variations are over to add a passage of sufficient importance to represent the conclusion of the whole set instead of one of the separate component parts. So it is common to find a fugue, or a finale or other passage at the end which, though generally having some connection in materials with what goes before, is not of such rigorous dependence on the theme as the variations themselves.

Similarly in the other forms of instrumental composition there is a certain set order of subjects which must be gone through for the movement to be complete, and after that is over it is at the option of the composer to enlarge the conclusion independently into a coda. When the sections of a complete movement are very strongly marked by double bars the word is frequently written, as in the case of minuet and trio, and the corresponding form of scherzos, which are mostly constructed of a part which may be called A, followed by a part which may be called B, which in its turn is followed by a repetition of the part A ; and this is all that is absolutely necessary. But beyond this it is common to add an independent part which is called the coda, which serves to make the whole more complete. In instrumental forms which are less obviously definite in their construction, the coda is not distinguished by name, though easy to be distinguished in fact. For instance, in a rondo, which is constructed of the frequent repetition of a theme interspersed with episodes, when the theme has been reproduced as many times as the composer desires, the coda naturally follows and completes the whole. The form of a first movement is more involved, but here again the necessary end according to rule may be distinguished when the materials of the first part have been repeated in the latter part of the second, generally coming to a close ; and here again the coda follows according to the option of the composer.

The coda was developed into a matter of very considerable interest and importance by Beethoven. Mozart occasionally refers to his subjects, and does sometimes write a great coda, as in the last movement of his symphony in C, known as the 'Jupiter,' but most often merely runs about with no other ostensible object than to make the conclusion effectively brilliant. The independent and original mind of Beethoven seems to have seized upon this last part of a movement as most suitable to display the marvellous fertility of his fancy, and not unfrequently the coda became in his hands one of the most important and interesting parts of the whole movement, as in the first movement of the 'Adieux' sonata, op. 81, the last movement of the quartet in E♭, op. 127, and the first movement of the Eroica symphony. Occasionally he goes so far as to introduce a new feature into the coda, as in the last movement of the violin and pianoforte sonata in F major, but it is especially noticeable in him that the coda ceases to be merely 'business' and becomes part of the æsthetical plan and intention of the whole movement, with a definite purpose and a relevancy to all that has gone before. Modern composers have followed in his steps. C. H. H. P.

CODAX (Codaz), Martin (14th cent.), a Galician or Portuguese troubadour, probably a native of Vigo, whose music was discovered in 1914 in the binding of a 14th-century MS. of Cicero's *De officiis*. It consists of seven poems in the Galician-Portuguese dialect, dating, it is believed, from the first half of the 13th century. The words of several of the poems had been known before in the early Galician-Portuguese *Cancioneiros*, or Song-books ; they belong to the most primitive types of Peninsular poetry, being parallelistic in form (cf. Psalm cxxxvi. 17, 18) and written in the masculine gender. The neumes of the musical notation are written on a stave of five lines above the words ; and though the copyist seems to have been no musician, merely drawing the signs which he saw in front of him (in No. 6 he has forgotten to put them in), it is possible to read the notation of five of the seven songs with a certain probability, as has been done by

D. Santiago Tafall. The music is apparently non-mensural, and in free rhythm. The melodies are pronounced to be genuinely Galician in feeling; they have the flexibility and grace of the folk-songs still sung by country people in remote districts of Galicia; the tonality, melodic phrases and cadences are those of the songs known as *Alalás*. The name 'Codax' is probably a nickname; or it may conceivably be a mistake for *Codex*; *i.e.* 'Martin's Codex, or the Book of Martin.' (See Pedro Vindel, *Las Siete Canciones de Amor* (facsimile), Madrid, 1915; A. F. G. Bell, *History of Portuguese Literature*, p. 29, 1922. The music is transcribed in *Bul. de la R. Academia Gallega*, xii. 117 (May 1917), and in *M.L.*, V. i. 29-30 (Jan. 1924). See also *R.F.E.* ii. 3 (July-Sept. 1915).) J. B. T.

CODETTA is the diminutive of Coda, from which it offers no material differences except in dimensions. It is a passage which occurs independently after the set order of a piece is concluded, as, for instance, in the combination of the minuet and trio, or march and trio; after the minuet or march has been repeated a short passage is frequently added to give the end more completeness. (See CODA; and for the special meaning of Codetta in fugal composition, see FUGUE.) C. H. H. P.

COELHO, PE. MANOEL RODRIGUES (*b.* Elvas, before 1583; *d.* 1623 ?), a celebrated Portuguese harpist and organist. After playing the organ first in his native town and then at Lisbon, he entered the Chapel Royal in 1603 and remained there for 20 years, holding the office of Capellão e Tangedor de Tecla de Sua Magestade (chaplain and player on keyboard instruments to his Majesty). His printed works include the 'Flores de Musica pera o instrumento de Tecla, & Harpa' (pubd. Lisbon; Craesbeck, 1620)—a collection of 24 *tentos* for organ and 4 *Susanas* (described as variations on the plain-song of 'Susana'), arrangements of the hymn Ave Maris Stella, etc., the earliest instrumental music printed in Portugal. J. B. T.

COENEN, the name of two brothers, sons of an organist at Rotterdam.

The elder, (1) FRANZ (*b.* Rotterdam, Dec. 26, 1826; *d.* Leyden, Feb. 1904), was a pupil of Vieuxtemps and Molique, and became famous as a violin-player; he toured in America with Herz, Lübeck and others, and settled in Amsterdam, where he was appointed director of the Conservatorium, a post he relinquished in 1895. Among his compositions are a setting of Psalm xxxii., a symphony, cantatas and quartets.

His brother, (2) WILLEM (*b.* Nov. 17, 1837; *d.* Mar. 19, 1918), attained some distinction as a pianist in America and elsewhere. He settled in London in 1865, made his début at the Covent Garden concerts and frequently played in public. His compositions include an oratorio, 'Lazarus' (1878), pianoforte music and songs.

Two more musicians of the same name may be mentioned: (3) CORNELIUS (*b.* the Hague, 1838), a successful violinist, who became conductor of the orchestra at Amsterdam in 1859, and bandmaster of the Garde Nationale at Utrecht in 1860.

(4) JOHANNES MEINARDUS (*b.* the Hague, Jan. 28, 1824; *d.* Amsterdam, Jan. 9, 1899) was educated at the Conservatorium of the Hague, became a bassoon-player in the royal orchestra, was conductor at the Dutch theatre of Van Lier, Amsterdam, from 1851, succeeded Van Bree as director of the Felix Meritis Society in 1857 and gave up the post in 1865 in order to devote himself to the direction of the music at the Palais voor Volksvlyt. He was virtually the creator of the orchestra which became renowned as the 'Palais - Orchester'; he retired in 1896. He wrote many cantatas, incidental music to Dutch plays, ballet-music, overtures, an opera, 'Bertha en Siegfried,' two symphonies, concertos for clarinet and flute respectively, a quintet for piano and wind instruments, a sonata for bassoon (or violoncello), clarinet and piano, etc. (*Riemann* and *Baker.*)

COERNE, LOUIS ADOLPHE (*b.* Newark, New Jersey, Feb. 27, 1870; *d.* Boston, 1922), an American composer and writer, who studied at Harvard College and at the Munich Conservatory and taught in various musical institutions in the United States. He wrote copiously in a great variety of musical forms; and in 1908 published *The Evolution of Modern Orchestration*; an important subject disappointingly treated. R. A.

COGAN, PHILIP, Mus.D. (*b.* Cork, 1750; *d.* Dublin, 1834), became a chorister and afterwards a member of the choir of St. Finbar's Cathedral, Cork.

In 1772 he was appointed a stipendiary in the choir of Christ Church Cathedral, Dublin, but soon resigned his post. In 1780 he became organist of St. Patrick's Cathedral, and about the same time obtained the degree of Mus.D. from the University of Dublin. He resigned the organistship of St. Patrick's in 1806, and resided in Dublin as a teacher of music. He was distinguished as a player on the organ and the harpsichord, as well as for his powers of fugue extemporisation. He published a pianoforte concerto in 1793 in Edinburgh, and several sonatas of merit in London, written somewhat in the manner of Mozart. Michael Kelly, who took lessons from Cogan about 1777, describes his execution as 'astounding.' G. A. C.

COHEN, JULES EMILE DAVID (*b.* Marseilles, Nov. 2, 1835; *d.* Paris, Jan. 13, 1901), was a pupil of the Paris Conservatoire, where he took first prizes for piano (1850), organ (1852), counterpoint and fugue (1854).

Besides holding the office of inspector of music under Napoleon III. he was professor in the Conservatoire for 35 years, and chorus-master at the Opéra for 20 years. He wrote many opéras-comiques, such as 'Maître Claude' (1861), 'José Maria' (1866) and 'Les Bleuets,' a 4-act opera (produced at the Théâtre Lyrique, 1867), etc., and composed choruses for 'Athalie,' 'Esther' and 'Psyché,' for revivals at the Comédie Française. He left, moreover, a great number of choral works, pianoforte pieces, symphonies, masses, etc.

G. F.

COLASSE, Pascal (*b.* Rheims, Jan. 1649[1]; *d.* Versailles, July 17, 1709), was educated in music at the 'Maîtrise de St. Paul,' and afterwards at the College de Navarre. He was on friendly terms with Lully as early as 1675. Lully procured him a place as 'batteur de mesure' at the Paris Opéra in or about 1677. He helped Lully in the composition of his operas, writing the intermedial parts in the choruses and symphonies. In 1683 the office of 'surintendant de la chapelle royale' was divided into four, each official being only required to direct the music for three months of each year; through Lully's influence Colasse obtained the second of these posts. In 1685 Colasse was made composer of the 'musique de la chambre' with Lalande, then was created 'maîtres des enfants de la musique' for life. At the deaths of Lambert and Lully he had the charge of staging Lully's posthumous operas, and in 1696 succeeded Lambert as 'maître de musique de chambre.' This post he resigned the same year in order to manage an operatic undertaking at Lille, for which Louis XIV. granted a privilege; but on the destruction of the theatre by fire he was allowed to resume his office at court. He finally ruined himself in the search for the philosopher's stone. He wrote numerous motets, 'cantiques spirituels,' etc.; but his energies were chiefly devoted to operatic composition. Colasse has left 10 dramatic works, of which the following were published by Ballard: 'Achille et Polyxène,' 1687, with Lully (performed also at Hamburg in the early days of opera there, 1692); 'Thétis et Pélée' (1689), 'Énée et Lavinie' (1690), 'Jason' and 'La Naissance de Vénus' (1696) and 'Polyxène et Pyrrhus' (1706). He collaborated with Lully in the 'Ballet des saisons' (1695). 'Thétis et Pélée,' his most popular work, remained in the repertory for 65 years. In it he freed himself from Lully's influence and showed his own talent. Apart from this, Colasse's conception of operatic form is so close to that of his master and the poet Quinault that he has been considered a plagiarist.

COLBRAN, Isabella Angela (*b.* Madrid, Feb. 2, 1785; *d.* Bologna, Oct. 7, 1845), a distinguished singer.

Her father was Gianni Colbran, court musician to the King of Spain. She received her first lessons in music from F. Pareja, of Madrid, and Marinelli, by whom she was taught until Crescentini undertook to form her voice and style. From 1806–15 she enjoyed the reputation of being one of the best singers in Europe. In 1809 she was *prima donna seria* at Milan, and sang the year after at the Fenice at Venice. Thence she went to Rome, and so on to Naples, where she sang at the San Carlo till 1821. Her voice remained true and pure as late as 1815, but after that time she began to sing out of tune. She was a great favourite with the King of Naples; her name became a party-word, and the royalists showed their loyalty by applauding the singer. An Englishman asked a friend one night at the San Carlo how he liked Mlle. Colbran: 'Like her? I am a royalist!' he replied. On Mar. 15, 1822, at Castenaso, near Bologna, she was married to Rossini, with whom she went to Vienna. In 1824 she came with her husband to London, and sang the principal part in his 'Zelmira.' She was then entirely *passée*, and unable to produce any effect on the stage; but her taste was excellent, and she was much admired in private concerts. On leaving England she quitted the stage, and resided at Paris and Bologna. She was herself a composer, and has left a few collections of songs. J. M.

COLE, Blanche (*b.* Portsmouth, 1851; *d.* London, Aug. 31, 1888), a distinguished operatic soprano. Her début took place in the part of Amina ('La Sonnambula') at the Crystal Palace, May 31, 1869, and thenceforward she established herself as a favourite in English opera. In 1879 she toured with a company of her own, and at various times was a member of the Carl Rosa Company. She married the pianist, Sidney Naylor, in 1868. M.

COLEMAN (Colman), (1) Charles, Mus.D. (*d.* London,[2] before July 9, 1664), chamber musician to Charles I. He wrote the music for 'The King and Queen's Entertainment at Richmond,' a masque presented by Prince Charles, Sept. 12, 1636.

After the breaking out of the civil war Coleman betook himself to the teaching of music in London, and was one of those who taught the viol lyra-way. He was recommended for the degree of Mus.D. at Cambridge by the committee appointed for the reformation of the university in 1651, and took the degree on July 2 of that year. He was appointed composer to the king in Nov. 1662, with a salary of £40 per annum. He contributed the musical definitions to Phillips's *New*

[2] Anthony Wood says in his house in Churchyard Alley.

World of Words (1658). Some of his songs are contained in the several editions of 'Select Musicall Ayres and Dialogues,' 1652, 1653 and 1659, and some of his instrumental compositions are to be found in 'Courtly Masquing Ayres,' 1662. He was associated with Henry Lawes, Capt. Cooke and George Hudson in the composition of the music for Sir William Davenant's 'First Day's Entertainment at Rutland House by Declamations and Musick,' 1656.

He had a son named (2) CHARLES (*d. circa* 1694), a member of the Royal Band. Information as to his existence was advertised for in the *London Gazette* of Apr. 12-15, 1697.

(3) EDWARD (*d.* Greenwich, Aug. 29, 1669), another son of Dr. Charles Coleman, was a singing-master and teacher of the lute and viol.

He composed the music in Shirley's 'Contention of Ajax and Achilles' in 1653. In 1656 he and his wife took part in the performance of the first part of Sir William Davenant's 'Siege of Rhodes' at Rutland House, she playing Ianthe, and the little they had to say being spoken in recitative. Upon the re-establishment of the Chapel Royal in 1660 Coleman was appointed one of the gentlemen. On Jan. 21, 1662, he succeeded Nicolas Laniere in the Royal Band. Some of Coleman's songs are printed in 'Select Musicall Ayres and Dialogues,' 1653, and other of his compositions in Playford's 'Musical Companion,' 1672.

Of Mrs. Coleman, who was one of the first women who appeared on the English stage, Pepys, who was well acquainted with both her and her husband, writes, under date of Oct. 31, 1665 :

'She sung very finely, though her voice is decayed as to strength, but mighty sweet, though soft.'

W. H. H.

COLERIDGE, ARTHUR DUKE (*b.* Ottery St. Mary, Feb. 1, 1830 ; *d.* London, Oct. 29, 1913), son of Francis Coleridge and grand-nephew of the poet, Samuel Taylor Coleridge, is memorable here for his influence on the musical life of his generation, though that influence was exercised as an amateur.

Educated at Eton and King's College, Cambridge (he took scholarships at both), Coleridge was called to the bar and was for 54 years an official on the Midland Circuit. He became Clerk of Assize in 1876. His fine tenor voice, his thorough musical accomplishment and his genius for friendship brought him into close touch with musicians of all kinds, and he sang with many famous artists of the day, including Clara Novello and Jenny Lind. With the latter and her husband, Otto Goldschmidt, he was on terms of intimate friendship, from which sprang the inception of the BACH CHOIR (*q.v.*). Coleridge's foundation of that choir for the production in England of the Mass in B minor was the chief of his public services to music in this country. Coleridge also lectured on 'the life and times' of various great composers, and the illustrations to these lectures, published from time to time with words of the vocal selections, show the wide knowledge and taste of the lecturer.[1]

Late in life Coleridge was instrumental in founding a private society for the study of Bach's church cantatas in regular order following the ecclesiastical year. He must be counted among the pioneers of the modern apprehension of Bach in England.

BIBL.—*Arthur Coleridge Reminiscences*, ed. by J. A. Fuller Maitland (London, 1921). C.

COLERIDGE-TAYLOR, SAMUEL (*b.* London, Aug. 15, 1875 ; *d.* Croydon, Sept. 1, 1912), the son of a doctor of medicine, a native of Sierra Leone, and an English mother, was a composer whose marked individuality seemed to be peculiarly the product of his mixed race.

He learnt the violin with J. Beckwith of Croydon, and entered the choir of St. George's, Croydon, at the age of 10, becoming alto singer, after the breaking of his boy's voice, at St. Mary Magdalene's, Croydon. In 1890 he entered the R.C.M. as a student of the violin ; he studied composition with Stanford, and gained a composition scholarship in 1893. From that time his name was prominently before the public, at first by the performance of early compositions at the R.C.M. students' concerts, such as a nonet and a symphony, the latter given in St. James's Hall, in 1896, under Stanford's direction. A quintet for clarinet and strings in F sharp minor (played at the R.C.M. in 1895) was given in Berlin by the Joachim Quartet (1897), and a string quartet in D minor dates from 1896. His crowning achievement as a student was the work on which more than any later one his mature reputation rests—the first part of his 'Hiawatha' trilogy, 'Hiawatha's Wedding-Feast' (Nov. 11, 1898, at the R.C.M.). The second part of the trilogy, 'The Death of Minnehaha,' was brought out at the North Staffordshire Festival in the autumn of 1899, and the third, 'Hiawatha's Departure,' by the Royal Choral Society, at the Albert Hall, Mar. 22, 1900. In the following May the overture to the whole was heard for the first time. The work, especially its first portion, made a great and lasting success which carried the name of Coleridge-Taylor all over the English-speaking world. Festival commissions were a matter of course after it, and each work was received with favour, although neither 'The Blind Girl of Castél-Cuillé' (Leeds, 1901), 'Meg Blane' (Sheffield, 1902), 'The Atonement' (Hereford, 1903) nor 'Kubla Khan' (Handel Society, 1906) made any lasting impression or could be placed in the same cate-

[1] A bound volume of Illustrations to 13 lectures, now (1926) in the possession of Mr. Akerman of Windsor, contains as subjects, Bach, Mozart, Beethoven, Gluck, Schumann, Meyerbeer, Handel, Haydn, Cherubini, Weber, Mendelssohn, Schubert and Spohr.

gory of spontaneity with 'Hiawatha.' Certain later choral works, notably 'A Tale of Old Japan,' attained a wide popular success, but only in so far as they displayed, always on a smaller scale, the qualities of melodic charm, naïvely simple rhythm and glowing orchestral colour which had appealed instantaneously as the ideal treatment of Longfellow's verse. An important side of his work was the incidental music written for various romantic plays produced at His Majesty's Theatre. The dramas *Herod* (1900), *Ulysses* (1902), *Nero* (1906) and *Faust* (1908), all by Stephen Phillips, with *Othello* (1911), were provided with music by Coleridge-Taylor, which added greatly to the effect of the productions by its masterly handling of strongly individual themes, illustrating the barbaric splendours of the first three with remarkable skill. The use of orchestral colouring was always a great feature of the composer's art, but he was by no means one of those who sacrifice all form and design to effects of colour. In spite of an evident affinity for such music as that of Dvořák, and a tendency to insist on some figure or phrase, his treatment of form is always interesting.

In 1904 he was appointed conductor of the Handel Society, which he brought to a state of satisfactory efficiency. But apart from Coleridge-Taylor's appearances as conductor of his own works at festivals, etc., his career remained uneventful and was chiefly occupied outside his composition with work as a teacher and conductor in the neighbourhood of Croydon, where he lived and died. He paid three visits to America (1904, 1906, 1910) to conduct performances of his music, and his last important composition, the violin concerto in G minor, was first heard at the Norfolk (Connecticut) Festival organised by Carl Stoeckel (see list). In England he took an active part in judging at competition festivals in many parts of the country, and during the last year of his life he was a member of the teaching staff of the G.S.M.

Coleridge-Taylor married (1899) Miss Jessie F. Walmisley, herself a musician, member of a musical family (see WALMISLEY) and fellow-student with Coleridge-Taylor at the R.C.M. Their son, HIAWATHA, has appeared as an orchestral conductor, notably when 'Hiawatha' was given as a pageant opera in the Albert Hall (May 19, 1924) and H. Coleridge-Taylor conducted the Ballet. His daughter, GWENDOLEN, has shown talent as a composer of songs, many of which have been published.

LIST OF COMPOSITIONS

Op.
1. Quintet. PF. and str. in G minor (MS.).
2. Nonet. PF., str. and wind, in F minor. 1894.
3. Suite de pièces. PF. or org. and vln.
4. Ballade in D minor. Vln. and orch.
5. String Quartet, 'Fantasiestücke.' 1895.
6. Six Children's Songs.
7. Zara's Ear-rings. Rhapsody, voice and orch. (MS.).
8. Symphony in A minor (MS.). Full orch. (R.C.M. Concert, St. James's Hall, Mar. 6, 1896).
9. Two pieces. Vln. and PF.
10. Quintet in A. Clar. and str.
11. Dream-Lovers. Operetta, 4 voices and orch.
12. Southern Love Songs.
13. Quartet in D minor. Str.
14. Legend for vln. and orch.
15. Land of the Sun. Partsong.
16. Hiawathan Sketches. Vln. and PF.
17. African Romances. Seven songs.
18. Morning and Evening Service in F.
19. Two Moorish Tone-Pictures. PF.
20. Gipsy Suite. Vln. and PF.
21. Two Partsongs (S.S.A.).
22. Four Characteristic Waltzes.
23. Valse Caprice. Vln. and PF.
24. In Memoriam. Three rhapsodies for low voice and PF.
26. The Gitanos. Cantata-Operetta for female voices.
28. Sonata. Vln. and PF. in D minor.
29. Three Songs.
30. Song of Hiawatha. (See above.)
31. Three Humoresques. PF.
33. Ballade in A minor, for orch. (Gloucester Festival, 1898.)
35. African Suite for orch.
36. Nourmahal's Song and Dance.
37. Six Songs.
38. Three Silhouettes for PF.
39. Romance in G. Vln. and orch.
40. Solemn Prelude, for orch. (Worcester Festival, 1899.)
41. Scenes from an Everyday Romance. Suite for orch. (Philharmonic Soc., 1900).
42. Four Songs, 'The Soul's Expression,' with orch. accompt.
43. The Blind Girl of Castél-Cuillé. Soli, choir and orch. (Leeds Festival, 1901.)
44. Idyll for orch. (Gloucester Festival, 1901.)
45. Six American Lyrics.
46. Toussaint l'Ouverture. Concert overture for orch. (Queen's Hall, 1901.)
47. (1) Incidental Music to 'Herod' (1900); (2) Hemo Dance, for orch.
48. Meg Blane. Mezzo-sop. solo, choir and orch. (Sheffield Festival, 1902.)
49. Incidental Music to 'Ulysses.' MS. (1902).
50. Three Song-Poems.
51. Ethiopia saluting the Colours. Concert-march for orch.
52. Four Novelletten. For string orch.
53. The Atonement. Oratorio. (Hereford Festival, 1903.)
54. Five Choral Ballads, to words by Longfellow. (Norwich Festival, 1905.)
55. Moorish Dance. PF.
56. Cameos. Three PF. pieces.
57. Six Sorrow Songs.
58. Four African Dances. Vln. and PF.
59. Twenty-four Negro Melodies for PF.
60. Romance. Vln. and PF.
61. Kubla Khan, a rhapsody for mezzo-soprano solo, chorus and orch. (Handel Society, Queen's Hall, 1906.)
62. Incidental Music to 'Nero.' (1906.)
63. Symphonic Variations on an African Air. (Philharmonic, 1906.)
64. Scènes de ballet. PF.
65. Endymion's Dream. Sop., ten. soli, female ch., orch. (Brighton Festival, 1910.)
66. Forest Scenes. PF.
67. Three Partsongs. (S.A.T.B.)
68. 'Bon-Bon' Suite. Baritone solo, ch. and orch. (Brighton, 1909.)
69. Sea-Drift. Rhapsody for ch.
70. Incidental Music to 'Faust.'
71. Valse Suite. PF. No. 1 in A minor. No. 2 in A flat. No. 3 in G minor. No. 4 in D. No. 5 in E flat. No. 6 in C minor.
72. Thelma. Opera, 3 acts.
73. Ballade in C minor. Vln. and PF.
73*a*. Partsongs.
74. No. 1. Scenes from an imaginary Ballet. PF. No. 2. Three Dream Dances. No. 3 Intermezzo, orch. No. 4. Songs and Partsongs.
75. Bamboula. Rhapsodic dance. Orch. (Norfolk, Conn., 1911.)
76. A Tale of Old Japan. Soli, ch., orch. (London Choral Society, Queen's Hall, 1911.)
77. Petite Suite de concert. Orch.
78. Three Impromptus. Org.
79. Incidental Music to 'Othello.' (1911.)
80. Concerto in G minor. Vln. and orch. (Norfolk, Conn., 1911.)
81. Two Songs, with orch.
82. Suite from the Hiawatha Ballet Music in 5 scenes.

WORKS WITHOUT OPUS NUMBERS

Anthems: 'In Thee, O Lord' (the composer's first published composition, 1892), 'Now late on the Sabbath Day,' 'By the Waters of Babylon,' 'The Lord is my strength,' 'Lift up your heads,' 'Break forth into joy,' 'O ye that love the Lord,' 'What Thou hast given me.'
Partsongs, solo songs, pieces for vln. and PF., for PF. alone, for orchestra and for organ.

BIBL.—W.C. BERWICK SAYERS, *Samuel Coleridge-Taylor, Musician. His Life and Letters.* 1915.

M.; rev. with addns., C.

COLETTI (*b.* Rome, 1811), in his day a famous Italian baritone. Coletti has, for two reasons, a distinct place of his own in operatic history. When he came to London in 1840 his engagement at the old Her Majesty's Theatre—regarded as an attempt to displace an established favourite—led to the Tamburini Riots, and in the strangest article ever written about the opera

he was spoken of by Carlyle as a man of great talent, almost of genius. His voice was described by Fétis as a basso-contante, but Chorley in his *Musical Recollections* wrote of it as a fine baritone. Coletti made no lasting impression in England, and in his later years, according to Chorley, sang only in Rome and Naples. It was in Naples that he made his début in 1834. S. H. P.

COLIN, Pierre Gilbert, French composer of the early 16th century, known under the soubriquet of Chamault, was first chaplain at the Chapel of the Children of France in Paris from 1532–36, and afterwards became chorus-master at Autun Cathedral. Many of his masses and motets were published between 1541 and 1580, as well as '30 Chansons nouvelles à quatres parties' (Paris, 1543). (See *Q.-L.* and *Fétis.*) J. MK.

COLLA, Giuseppe (*b.* Parma, *c.* 1730; *d.* there, Mar. 16, 1806), was maestro di cappella to the duke of that place.

He wrote the following operas:

'Adriano in Siria' (Milan, 1763), 'Licida e Mopso' (1769), 'Enea in Cartagine' (Turin, 1770), 'Andromeda' (*ib.* 1772), 'Didone' (*ib.* 1773), 'Tolomeo' (Milan, 1774).

In the last of these the soprano Agujari appeared with great success; Colla married her in 1780, and accompanied her to England and elsewhere. (*Q.-L.*, etc.)

COLLA PARTE (Colla Voce), 'with the part,' denoting that the tempo of the accompaniment is to be accommodated to that of the solo instrument or voice.

COLLARD. This firm of pianoforte-makers, now at Gloucester Gate, Regent's Park, London, is in direct succession, through Muzio Clementi, to Longman & Broderip (*q.v.*), music publishers, located at No. 26 Cheapside, as the parish books of St. Vedast show, as long ago as 1767. (See Clementi & Co.) Becoming afterwards pianoforte-makers, their instruments were in good repute here and abroad, and it is a tradition that Geib's invention of the square hopper or grasshopper was first applied by them. We find Clementi in the early years of the 19th century associated with F. W. Collard (*d.* 1879) and others. There can be no doubt that the genius of Clementi bore good fruit, but it was F. W. Collard, whose name appears in the Patent Office in connexion with improvements in pianofortes as early as 1811, who impressed the stamp upon that make of pianofortes which has successively borne the names of 'Clementi' and of 'Collard & Collard.' A. J. H.

COLLECTIONS OF MUSICAL INSTRUMENTS. Three or four centuries ago the distinction between a collection for practical use, such as often existed in royal and noble palaces, and a collection of musical curiosities was not so sharply defined as in the present day; but the Museum of Alfonso II. at Ferrara, the instruments acquired by King Henry VIII. of England and the Archduke Ferdinand of Austria in the 16th century, the Museum of Manfred Septala of Milan and the collections of the Venetian Contarini, of Ferdinand de' Medici at Florence, and of Dandelau in Flanders in the 17th century, show that great interest and value were attached, even then, to instruments of music other than for the expression of musical ideas. The Italian writer Saba (*c.* 1545) mentions, as a new fashion, the decoration of the interior of palaces with organs, clavecins, psalteries, lutes, viols, flutes, cornets, trumpets and other instruments, and it is probable that from this custom (not unknown to-day) arose the more systematic and intelligent collection of ancient instruments. There was, however, one branch of this subject which these earlier enthusiasts were obliged to leave untouched, and the ethnological collections of musical instruments which now afford so much information as to the skill and practice of primitive races were as unknown as they were impossible.

In the subjoined list of museums and collections an attempt has been made to denote their object and extent, and the following abbreviations have been used:

S, European Stringed instruments. K, With keyboards. W, European Wind instruments. P, European instruments of Percussion. S W P, A collection of European instruments. E, Instruments collected for ethnological purposes. A, Archæological and prehistoric instruments. G, General collection, including European and ethnological specimens. C, Printed catalogue of special interest with date of latest issue known. An asterisk denotes a public collection or a catalogue wholly devoted to musical instruments such as the fine and authoritative catalogues issued by Victor Mahillon (Brussels), G. Kinsky (Cologne), Dr. A. Hammerich (Copenhagen) and Dr. Curt Sachs (Berlin): also those recently published by the Metropolitan Museum of Art, New York (Miss Morris) and Michigan University (Dr. Stanley).

The difficulty of making the list correct and complete has been great, especially as regards collections in private hands which, as the new list shows, are continually changing locality and owner. Inquiries, however, have been carefully made, and information thankfully received from museums and well-known collectors, whilst the catalogues of all the musical exhibitions of recent years have been collated. Owing to the limitations of space very small collections and the ownership of single instruments, however rare, are not mentioned.

A. EUROPE

1. *Great Britain and Ireland*

Liverpool. Public Museum including the Mayer collection (G).

London. Victoria and Albert Museum, South Kensington (G); *C, 1874. Abbreviated revise, 1908. Specimens are frequently lent to the Bethnal Green and Provincial Museums. *Museum of the Royal College of Music, S. Kensington (G): includes the Donaldson (C, private) and Hipkins Collections, also the Tagore and Day Collections of Indian Instruments. The British Museum (A, E). Indian Museum, S. Kensington (E). Horniman (London County Council) Museum, Forest Hill (S W P); C, 1904. The Crystal Palace, Sydenham (E). The London Missionary Society (E).

Manchester. Royal College of Music, 'Henry Watson' Collection (G). *C, 1906.

Oxford. University Museum with 'Pitt-Rivers' Collection (E).

Warrington. Municipal Museum (G).

Edinburgh. *University Music School (G). National Museum of Antiquities (G); C 1892. Royal Scottish Museum.

Glasgow. Technical College, 'Euing' Collection (S K). Art Gallery (E).

Dublin. Museum of Science and Art (G). Museum of Trinity College (A). National Museum (Instruments of various kinds of Irish manufacture; also the 'Armstrong' Collection.)

Some private collections—

Aldershot. Messrs. G. Potter (P).

Brownsea Island, Poole. Collection of the late C. van Raalte, Esq. (S W P). *C. 1926.

CLAYDON HOUSE, WINSLOW. Sir E. Verney (E, especially Javanese Instruments).
EDINBURGH. Messrs. Glen & Co. (W).
EWELL, SURREY. Sir A. Glyn (G).
FAULKBOURNE, ESSEX. Canon F. W. Galpin (G). Described and illustrated in *Old English Instruments* (Methuen), 1911.
GOODRICH COURT, ROSS. H. C. Moffatt, Esq. (K).
LIVERPOOL. Messrs. Rushworth and Draper (G).
LLANWNDA, N. WALES. The Hon. F. G. Wynn (S K).
LONDON. Messrs. Boosey (W). Messrs. Broadwood (K); *C. A. Frere, Esq. (G). Messrs. Arthur and Alfred Hill (S W K). Howard Head, Esq. (G). F. G. Rendall, Esq. (W). Messrs. Rudall Carte (W). P. R. Scholes, Esq. (E). Lord Howard de Walden (S K).
OXFORD. C. M. Taphouse, Esq. (K).
RYTON-ON-TYNE, DURHAM. W. A. Cocks, Esq. (Bagpipes).
SEASCALE, CUMBERLAND. Dr. R. T. Richmond (S K W).
SOUTHAMPTON. W. Dale, Esq. (K).
WARLEY, ESSEX. Miss Willmott (S W P).

2. *Austria*

INNSBRUCK. Ferdinandeum (Tyrolese Instruments).
LINZ. Museum Francisco-Carolinum (S W P); a guide-book, 1910.
SALZBURG. Museum Carolino-Augusteum (S W P); a guide-book, 1868. Mozarteum (K).
VIENNA. Museum of the Gesellschaft der Musikfreunde (S W P); C, 1872. Instrumentens Museum; *C, 1921. Kunst-historisches Museum, including the 'Ambraser' Collection (G); C, 1920. Ethnographical Museum (E).

HONOLULU. The Bishop Museum (E); C, 1892.

F. W. G.

COLLEGE YOUTHS, Ancient Society of. This society was founded on Nov. 5, 1637, and derives its name from its first members, Lord Brereton, Lord Salisbury, Lord Dacre, Sir Cloff Clofton, etc., meeting at St. Martin's, College Hill, Upper Thames Street, to practise ringing. The church with its ring of 6 bells was destroyed in the Great Fire of London, 1666.

Fabian Stedman published his work *Campanalogia* in 1677 and dedicated it to this society, of which he was a member.

About this time two other members must be mentioned, viz. Benjamin Annable and John Holt, both accomplished change-ringers and also well known by the 'methods' they introduced.

Books in the possession of the society record the performances of its members for more than two centuries.

The first great performance was at St. Saviour's, Southwark, on the six large bells, in 1684, when the College Youths rang three 720's *without stopping*, the earliest record of so many changes being rung *continuously*.

The company for many years during the 18th century held their meetings at the Paul's Head, Cateaton Street (now Gresham Street), City. On the day of the anniversary (Nov. 5) the members walked in procession to Bow Church to attend divine service, preceded by their beadle carrying a staff surmounted by a silver bell suspended in a frame of embossed silver bearing this motto: *Intactum sileo: percute—dulce cano.* W. W. S.

COL LEGNO, 'with the wood,' a term indicating that a passage is to be played by striking the strings of the violin with the stick of the bow instead of with the hair. An effective example of Col Legno bowing will be found in study No. 14 of Woldemar's *Nouvel Art de l'archet.* It is entitled 'Imitation du Psalterium, par Michel Esser,' the latter a violinist who may be assumed to have brought this grotesque trick into use. Three strings are directed to be struck at once, the effect resembling that produced by the dulcimer, or the Hungarian cimbalom. P. D. and E. J. P.

COLLINGWOOD Lawrence A. (*b* London, Mar. 14, 1887), was for some years in Russia, where he worked under Albert Coates at the St. Petersburg Opera. Returning to England after the revolution he became known as a composer primarily through a symphonic poem, without title, for orchestra, produced by the Patrons Fund of the R.C.M. (1920) and awarded publication by the Carnegie Trust. His piano works include two sonatas. Latterly he has done some conducting, notably of certain operatic performances at the 'Old Vic.' C.

COLOGNE. The musical life of Cologne is centred chiefly in the Opera House and the Gürzenich. The former produces alternately opera and stage plays. The General Intendant is Fritz Rémond, the General Musikdirektor Eugen Szenkar. Few new German works have seen their first light on the Cologne stage (Korngold's 'Tote Stadt,' Dec. 4, 1920), and though occasional adventures are made with new foreign operas the traditions of Cologne are mainly Wagner, the Italians and 'official.' Cologne has also a small 'chamber opera' under the direction of Max Hammerschmidt.

The orchestra of the opera combines with the Gürzenich orchestra to form the Städtische Orchester, under the leadership of Hermann Abendroth, with nearly one hundred professional playing members. It enjoys the financial support of the municipality of Cologne. The Gürzenich concerts, 12 in number, are the chief musical event of the Cologne season, often given in conjunction with the choir of the Konzert Gesellschaft. They are held in the historic Gürzenich Hall, seating about 1500 persons, the conductors being Abendroth, Eldering and Körner. To the long tradition of Brahms, dating from the period of Steinbach as director, Abendroth has added the works of Brückner, for whom he is perhaps the leading propagandist in Germany. But at these concerts, like the performances of the opera, very little sympathy is shown towards modern works. Eight symphony concerts are given each winter by the municipal orchestra, and although more enterprise is shown in the choice of works, modern music, even German, has not made much headway with them. Yet Cologne is not without modern music. The Musikgesellschaft's concerts, held in the great hall of the Hochschule für Musik, those of the Gesellschaft für Kammermusikfreunde, and especially the concerts of the progressive Gesellschaft für neue Musik (under Dr. Lemacher), which gives concerts of contemporary works in the hall of the Kunstverein, afford opportunity for the production of new works by contemporary composers. Associations for chamber music include three Quartets (Anders, Gürzenich, Schulz-Prisca), the Gürzenich Trio and the Kammermusik Vereinigung of the opera (wood-wind and horn).

Choral singing has always been a feature of Cologne's musical life, though it might have been expected that a city with its background of Cathedral and so many fine churches would have taken a prominent part in the cultivation of sacred music. This is hardly the case, though Cologne has in the Domchor, under Mölders, one of the leading choirs of Germany. But secular choral-singing here, as almost everywhere on the Rhine, is in a very flourishing state. There are in Cologne 18 mixed, 27 male voice and 4 women's choirs. The leading ones are the Kölner Volkschor (director E. J. Müller) and the Kölner Männergesangverein (director Joseph Schwartz), which maintain the best traditions of German choral

singing. The Cologne Summer Music Festival, held in the hall of the Cologne fair, was attended in 1925 by choirs numbering in all some 40,000 singers from all parts of Germany.

It is intended that Cologne shall become the educational centre of west German musical life, to which end a High School for Music, on university lines, has been founded to take the place of the old municipal Conservatorium, founded in 1850 as the Rheinische Musikschule. The High School, subsidised by a joint fund from the Prussian State, the Rhineland Province and the Cologne municipality, is under the direction of Abendroth and Walter Braunfels, and is intended for those who intend to make music their career. The number of students is limited to 300 (the old Conservatorium had 1000). Students must have completed their 16th year, they must produce a certificate of education from a higher secondary school and they must give evidence of talent. The High School gives, besides general education in music, courses for organists, orchestral musicians and conductors and music teachers for schools. In the place of the Conservatorium the municipal 'Rheinische Musikschule' has been founded for those not intending to adopt music as a profession, for elementary school teachers and for the cultivation of 'Hausmusik.' The number of students is limited to 500, and students of all ages are received from the age of 14, subject to an entrance examination. H. G. D.

COLOMBA, opera in 4 acts; words founded on Prosper Mérimée's story by Francis Hueffer; music by Mackenzie (op. 28). Produced (Carl Rosa Co.), Drury Lane, Apr. 5, 1883; Hamburg (in German), Jan. 27, 1884. M.

COLOMBANI (Columbani), Orazio (*b.* Verona, 16th cent.), eminent contrapuntist, a pupil of Costanzo Porta, a Cordelier monk, and maestro di cappella at the cathedral of Vercelli, from about 1584 filled the same office in the convent of San Francesco at Milan. In 1587 he was in Venice; in 1593 at the Santo of Padua; and for a time at Urbino. Besides 5 collections of Psalms for 5, 6 and 9 voices, and 3 of madrigals, published in Italy (1576–1592) (see *Q.-L.*), there is a Te Deum of his in Lindner's *Corollarium cantionum sacrarum*, and two Magnificats and some madrigals in the King of Portugal's Library at Lisbon. One of the Magnificats is in 14 parts. Colombani united with other musicians in dedicating a collection of Psalms to Palestrina (1592). M. C. C.

COLOMBE, LA, a comic opera in 2 acts, words by Barbier and Carré, music by Gounod; produced Opéra-Comique, June 7, 1866. In English as 'The Pet Dove' (translated by Farnie), Crystal Palace, Sept. 20, 1870. G.

COLOMBI, Vincenzo, an Italian, built the magnificent organ in the church of St. John Lateran at Rome, 1549. V. de P.

COLOMBINI, Francesco (*b.* near Padua, early 17th cent.), organist at Massa del Principe Cathedral, 1623–41. He composed a considerable amount of church music, including 3 books of motets, published in Venice and in Antwerp. (For list, see *Q.-L.*) E. v. d. S.

COLONNA, (1) Giovanni Paolo (*b.* Brescia, *c.* 1637; *d.* Nov. 28, 1695), church composer, was, according to some authorities, born at Bologna, but Cozzando gives Brescia. He was the son of Antonio Colonna, a maker of organs, and studied music at Rome under Carissimi, Abbatini and Benevoli.

He was for some time organist at San Apollinare at Rome, and had become famous as a composer as early as 1659, in which year he was elected organist of San Petronio, Bologna, becoming maestro di cappella there in 1674. He was four times elected principal of the Accademia Filarmonica. Among many pupils of note he numbered the famous Bononcini. Nearly all his compositions were for the church, but his one opera, 'Amilcare,' was performed at Bologna in 1693. Among his printed works (for list of these and his MSS. see *Q.-L.*) are:

3 books of masses, opp. 5, 6 and 10 (Bologna, 1684, 1685 and 1691), 4 books of 'Salmi brevi,' opp. 1, 7, 11, 12 (Bologna, 1681, 1683, 1694), 2 books of motets, opp. 2 and 3 (*ib.* 1681), litanies, op. 4 (1682), and other sacred works, op. 8 (1687 and 1689). Six oratorios in MS.

A Magnificat and Nunc Dimittis of his for two choirs are printed in the collection of the Motet Society, and four other pieces in the Fitzwilliam Music. E. H. P.

(2) Fabio (*b.* Bologna, *c.* 1567; *d.* Naples, 1650) was the inventor of the 'Pentaconta chordon,' a stringed instrument which divided the octave into 17 parts. He published (Naples, 1618) a description of this instrument in *La Sambuca Lincea ovvero dell' istrumento perfetto libri III.*

COLONNE, Judas (called Édouard) (*b.* Bordeaux, July 23, 1838; *d.* Paris, Mar. 28, 1910), a distinguished Parisian conductor, of Italian origin. He began to earn his own living at the age of 8 years.

Later he studied music at the Paris Conservatoire, where he gained the first prize for harmony in 1858, and the same for violin in 1863. He became first violin in the Opéra orchestra (1858–67); about this time he was a member of the Lamoureux Quartet, conducted at the Concerts Pasdeloup and at the Concerts du Grand Hôtel (1871), and in 1873 established, with the music-publisher Hartmann, the Concert National. These concerts lasted two seasons, and were first held at the Odéon theatre, where Franck's 'Rédemption' and Massenet's 'Marie Magdeleine' were performed for the first time; the concerts were subsequently held at the Châtelet. In 1874, Hartmann having retired, Colonne endeavoured to form an association among artists which should be patronised by amateurs and the public. In this way were founded the Concerts du Châtelet

(now the Association Artistique des Concerts Colonne: present conductor—1926—Gabriel Pierné), which, though at first unsuccessful, have since gained so wide a reputation. It was not easy to struggle against the established popularity of the Concerts Populaires, conducted by Pasdeloup, but Colonne had the excellent idea of giving more prominence to the works of the younger French composers; he produced several orchestral suites by Massenet, the first and second of which had previously been given at the Concerts Populaires, and various orchestral compositions by Lalo, Dubois, Franck, etc.; but the success of the concerts was not fully assured until Colonne, foreseeing a reaction in favour of Berlioz, and incited by the example of Pasdeloup, in a manner devoted his concerts to the great French composer by producing with great care, and in their entirety, all his works for chorus and orchestra; 'L'Enfance du Christ,' 'Roméo et Juliette,' and particularly 'La Damnation de Faust,' the success of which crowned the popularity of his undertaking. The enterprise, having quite replaced the Concerts Populaires in public favour, became most profitable to all concerned in it, and to its director, who in 1880 was decorated with the Légion d'Honneur; he had before, in 1878, been chosen to conduct the concerts at the Trocadéro during the Exhibition. He conducted at the Opéra (1891–93), where he produced Reyer's 'Salammbô,' Saint-Saëns's 'Samson et Dalila' and Wagner's 'Die Walküre,' and visited London first in 1896 and last in 1908. On the latter occasion he conducted several Promenade concerts at Queen's Hall. His foreign engagements further included Strassburg (1895), Lisbon and seven visits to Russia. The reputation he left is that of a highly gifted conductor, full of fire, warmth, 'finesse' and generosity. His qualities were wonderfully adapted to romantic music, and for that of Berlioz he had a big and justified reputation. The modern French school owes a great deal to his efforts. As a conductor he formed a striking contrast with his contemporary, Lamoureux. If Colonne's performances always struck by their artistic tendencies they were somewhat lacking in care, firmness and clearness.

Mme. Colonne, *née* Eugénie Élise Vergin (*b.* Lille, Nord, Mar. 21, 1854), was a pupil of the Paris Conservatoire, and made a successful début at the Opéra, on Feb. 4, 1876, as Eudoxie ('La Juive'), and on Oct. 3, 1876, as Zerlina ('Fra Diavolo'), appearing afterwards at the Opéra-Comique and the Théâtre Lyrique. Later, she devoted herself to teaching, and has brought out some excellent pupils.

A. J.; addns., G. F., M. L. P.

Bibl.—Ch. Malherbe, *Édouard Colonne, Revue S.I.M.* (1910); Gustave Doret, *Musique et musiciens.* (Lausanne, 1915.)

COLOPHANE (Ger. *Kolophonium*), the French name for the rosin used for fiddle bows, from *κολοφωνία*, so called because the best rosin came from Colophon, in Asia Minor, the same place which gave its name to the imprints of early books, and has thus left a double mark on modern times. (See Rosin.) G.

COLORATURA (Ital.) (Ger. *Koloratur*), vocal music *coloured*, that is ornamented, by runs and rapid passages or divisions, where each syllable of the words has two or more notes to it. It is what the old school called 'figurato'—figured. (See Ornaments: Vocal.) G.

COLPORTEUR, LE, ou l'enfant du bûcheron, lyric drama in 3 acts; words by Planard, music by Onslow. Produced Paris, Nov. 22, 1827; Drury Lane as 'The Emissary; or, the Revolt of Moscow,' May 13, 1831. G.

COLTELLINI, Céleste (*b.* Leghorn, 1764; *d.* 1817), singer, daughter of a poet and a celebrated singer, made her first appearance at Naples in 1781.

The Emperor Joseph II. engaged her for the Opera at Vienna in 1783, and she did not return to Naples till 1790. She married a French merchant named Méricofre, and retired from the stage in 1795. Her voice was a mezzo-soprano, and she excelled in the expression of sentiment. Paisiello wrote his 'Nina' for her, and on one occasion as she was singing the air 'Il mio ben quando verra?' a lady among the audience burst into tears, crying aloud, 'Si, si, lo rivedrai il tuo Lindoro.' M. C. C.

COLYNS, Jean-Baptiste (*b.* Brussels, Nov. 25, 1834; *d.* there, Oct. 31, 1902), a distinguished violinist. He was admitted to the Brussels Conservatoire at the age of 8, where he gained prizes for violin-playing, harmony, etc.

He became solo violinist at the Théâtre de la Monnaie at a very early age, and soon afterwards was appointed professor of his instrument at the Conservatoire. In 1888 he was given a similar post at Antwerp. He made many professional tours in Europe with great success, and at various times received advantageous offers to leave his native city. Among others he was in 1876 invited by the King of Saxony to migrate to Dresden as Konzertmeister and professor at the Conservatorium there. He visited England in 1873, and played at the Crystal Palace, Apr. 12, and at the Philharmonic, July 7. Colyns occupied himself with composition for his special instrument, and also produced an opera in one act, 'Sir William' (1877), and an opera in three acts, 'Capitaine Raymond' (1881). T. P. H.

COMA, Annibale (*b.* Carpi, near Modena, *c.* mid-16th cent.), lived at Mantua *c.* 1568–87, when he composed 4 books of madrigals. Several madrigals of his are contained in collective volumes. (See *Q.-L.*) E. v. d. S.

COMBARIEU, Jules Léon Jean (*b.* Cahors, Lot, Feb. 5, 1859; *d.* July 7, 1916). Having

entered the teaching career when quite young he finally became professor at the 'lycées' Condorcet and Louis le Grand at Paris, and lectured on history of music for six years at the Collège de France from 1904. His lessons were published under the title: *Éléments de grammaire musicale historique.* He was trained in his native town by an old musician, T. Langlane, formerly pupil of the École Niedermeyer. He then followed the courses of Spitta in Berlin (1887), which left a lasting impression on his mind. Struck by the absence of musical training in the French University education, he strove to develop it and founded the *Revue d'histoire et de critique musicale,* followed by the *Revue musicale* (1904–12), chiefly devoted to musicological research. As general inspector of choral singing, his influence was also very active. Amongst his principal works are: *Les Rapports de la musique et de la poésie considérées au point de vue de l'expression* (1894), *De parabaseos partibus et origine* (1894), *Théorie du rythme dans la composition musicale moderne* (1897), *La Musique, ses lois, son évolution* (1907), etc., *Histoire de la musique des origines à la mort de Beethoven,* two volumes (1913), vol. 3: *De la mort de Beethoven au début du xx^e siècle* (1920). M. L. P.

COMBINATION PEDALS (Fr. *pédales de combinaison*) are an ingenious French invention applied to the organ, which originated with the eminent firm of Cavaillé-Coll. Instead of operating upon the draw-stops they act upon the wind supply, and in the following manner. A great organ contains, say, twelve stops. The first four (1–4) will be placed on one sound-board; the next four (5–8) on a second; and the remaining four (9–12) on a third sound-board. Each sound-board receives its wind-supply through its own separate wind-trunk, and in that wind-trunk is a ventil which when open allows the wind to reach the sound-board, and when closed intercepts it; which ventil the organist controls by means of a pedal. The advantages of the ventil system are, first, that instead of the stops coming into use in certain fixed and invariable groups, any special combination can be first prepared on the three sound-boards, and then be brought into use or silenced at the right moment by simply the admission or exclusion of the wind. Moreover their action is absolutely noiseless, as it consists in merely opening or closing a valve, instead of shifting a number of long wooden sliders to and fro. The objection has been raised, that in the ventil system the stops no longer 'register' what is about to be heard; and the extreme case is cited that every stop in the organ may be drawn, and yet no sound respond to the touch if the ventils be closed. (See Composition Pedals; Organ.) E. J. H.

COMES, see Dux; Fugue.

COMES, Juan Bautista (*b.* Valencia, 1568; *d.* there, 1643), Spanish church composer, noted for the grandiose scale on which his works were planned. His first appointment was that of maestro de capilla at Lérida (Catalonia); and he was afterwards musical director at the Colegio del Patriarca, Valencia (1605), Valencia Cathedral (1613), and the Chapel Royal at Madrid (as vice-master of the King's choir, 1619). In 1628 he returned to Valencia and was once more maestro de capilla at the Patriarca, and in 1632 at the Cathedral. A portrait of him, by Ribalta, is to be seen at the Museo Provincial at Valencia.

The works of Comes number over 200. Few were printed in his lifetime (*e.g.* the motet 'Gaude, Salve' in Victoria's 'Motecta festorum totius anni,' Rome, 1585); his MSS. are to be found mainly in the musical archives of Valencia Cathedral, the 'Patriarca' at Valencia, and the Cathedral at Segorbe, and the Biblioteca de la Diputacio at Barcelona. A classified list is given by Alcahali (*Diccionario biográfico de músicos valencianos*), and a selection was published in 1888 by the Benedictine Juan Bautista Guzmán ('Obras musicales de J. B. Comes, escogidas, puestas en partitura y ilustradas,' 2 vols. Madrid, 1888).

An interesting side of Comes's work is shown by the compositions with Spanish instead of Latin words. They are sacred in character, but not liturgical, consisting of *romances, villancicos, folías,* etc., in which the verse is sung by a few voices, and the chorus by the whole choir in six or more parts—a method of procedure adopted also by his contemporary Ruimonte (*q.v.*), whose collection of madrigals and villancicos is in the library at Christ Church, Oxford. The melodies of Comes often have a distinctly popular stamp. J. B. T.

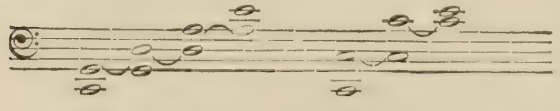
COME SOPRA, 'as above'; when a passage or section is repeated, to save the trouble of recomposing, reprinting or recopying.

COMETTANT, Jean Pierre Oscar (*b.* Bordeaux, Apr. 18, 1819; *d.* Jan. 24, 1898), entered the Paris Conservatoire, Nov. 1839, where he studied under Elwart and Carafa till the end of 1843.

He first became known as a pianist, and as the author of a number of pieces for that instrument, duets for piano and violin, as well as songs and choruses. He lived in America, 1852–55. He also came forward as a writer, and soon obtained reputation as the musical critic of the *Siècle,* with which he was connected for many years. Comettant had an easy, humorous, brilliant style; he was a great traveller, and published a large number of books on various subjects which are both instructive and pleasant reading. Of his works on music, the following are among the most important:

Trois ans aux États-Unis (Paris, 1858); *La Propriété intellectuelle,* etc. (Paris, 1858); *Histoire d'un inventeur au 19ème siècle* (Paris, 1860)—a life of Adolphe Sax, and defence of his claims; *Musique et*

musiciens (Paris, 1862)—a collection of articles originally published in the *Siècle*; *Le Danemark tel qu'il est* (Paris, 1865); *La Musique, les musiciens, et les instruments de musique chez les différents peuples du monde* (Paris, 1869)—an important work, written on the occasion of the Exhibition of 1867; *Les Musiciens, les philosophes, et les gaîtés de la musique en chiffres* (Paris, 1870)—a polemical treatise; *François Planté* (1874).



He wrote a considerable amount of music. G. C.

COMIC OPERA, a term used indiscriminately to denote a musico-dramatic work of an amusing nature. It is not the English equivalent to the French opéra-comique, for that term includes works into which seriousness and even tragedy may enter; the type is rather the opéra-bouffe. (See OPERA and OPERA BUFFA.) It would be as well if comic opera meant only a work in which there is an equal importance attaching to the text as to the music, such as one finds in the Gilbert and Sullivan series, and where, although the aim is to amuse, the technique is high. One could then differentiate between comic opera and musical play or musical comedy. For they have much in common, the dialogue is spoken and is interspersed with songs, duets and the like, and the finales are more or less elaborated. Since the days of the ballad operas the English public have always welcomed the association of light music with plays of a light and amusing character. But unless there is real workmanship and invention in both text and music such works are ephemeral and reflect merely the taste of the moment. A true comic opera, on the other hand, may reasonably be expected to have a longer life. Although in recent years the musical technique of the musical play has tended to improve, there is still great looseness in the writing and construction of the play itself and frequent reliance upon members of the cast to make their own glosses thereon wherewith to hold the public.

Light opera is a term often employed for works in which sentiment counts for more than high spirits, although the latter is not necessarily absent. The text and the music are generally on a more refined scale, but in other respects the form remains the same. N. C. G.

COMMA, a very minute interval of sound, the difference resulting from the process of tuning up by several steps from one note to another in two different ways. There are two commas:

1. The common comma is found by tuning up four perfect fifths from a fixed note, on the one hand, and two octaves and a major third on the other, which ostensibly produce the same note, thus—

or by multiplying the number of the vibrations of the lowest note by $\frac{3}{2}$ for each fifth, by 2 for each octave, and by $\frac{5}{4}$ for the perfect third. The result in each case will be found to be different, and the vibrations of the two sounds are found by the latter process to be in the ratio of 80 : 81. The difference between the two is a comma.

2. The comma maxima, or Pythagorean comma, is the difference resulting from the process of tuning up twelve perfect fifths, on the one hand, and the corresponding number of octaves, on the other; or by multiplying the number of vibrations of the lowest note by $\frac{3}{2}$ for every fifth, and by 2 for every octave. The difference will appear in the vibration of the two notes thus obtained in the ratio of 524,288 : 531,441, or nearly 80 : 81·0915.

Other commas may be found by analogous processes, but the above two are the only ones usually taken account of. C. H. H. P.

COMMER, FRANZ (*b.* Cologne, Jan. 23, 1813; *d.* Aug. 17, 1887), a pupil of Joseph and Bernhard Klein, and Leibl; organist in the Carmelite church at Cologne in 1828, and a member of the Cathedral choir. In 1832 he went to Berlin, where he became a pupil of Rungenhagen, A. W. Bach and A. B. Marx; librarian to the Königliche Musik-Institut, choirmaster at the catholic church of St. Hedwig in Berlin (1846), member of the Akademie der Künste from 1845, and joint-founder in 1844 with Theodor Kullak of the Berlin Tonkünstlerverein. He took a prominent part in the foundation of the Gesellschaft für Musikforschung (1868). He is best known as the editor of the following important works:

Collectio operum musicorum Batavorum saeculi XVI., 12 vols.; *Musica sacra XVI., XVII. saeculorum*, 26 vols. (the earlier of which were edited by Commer), containing organ-pieces, masses and motets for men's voices and full choir; *Collection de compositions pour l'orgue des XVIe, XVIIe, XVIIIe siècles*, six parts; *Cantica sacra . . . aus den XVI.-XVIII. Jahrh.*, 2 vols.

Commer also composed some church music, Lieder and dances for pianoforte, as well as music to *The Frogs* of Aristophanes, and *Electra* of Sophocles. A. M.

COMMODO, 'easily,' 'at a convenient pace'; a direction generally used with Allegro, as in the Rondo of Beethoven's pianoforte sonata in E, op. 14, No. 1. M.

COMMON TIME, see TIME.

COMMUNION SERVICE, see under SERVICE.

COMPAN, HONORÉ (still living in 1798), professor of the harp,[1] and violinist at Paris. There are extant of his works: 10 'Pièces en concerts pour la harpe'; 30 *ibid.*; 'Méthode de harpe,' or short and clear principles for learning to play on this instrument. Therein are many little pieces to illustrate these principles, and some choice ariettas with accompaniment (Paris, Thomassin, 1783). Compan was violinist at the Théâtre de la Pantomime Nationale in 1798. There has been published under his name a little *Méthode de musique* (Paris, Frère). (*Fétis.*)

[1] *Fétis.*

COMPASS, from the Latin *compassus*, 'a circle,' designates the range of notes of any voice or instrument as lying within the limits of the extreme sounds it is capable of producing.

The compass of the various instruments which are in use in modern music will be found under their respective names; it may be said generally that it is limited in the direction of the bass, but often varies in the direction of the treble according to the skill of the player, except in instruments of fixed intonation.

The compass of a modern orchestra is generally from about the lowest note of the double basses to about E in altissimo (EE to e''''), which can be taken by the violin if properly led up to.

The compass of voices for chorus purposes is from E or F below the bass stave to a''. Solos are not often written above c''', except for special singers; as the part of Astrifiammante in 'Die Zauberflöte,' which was written for Josepha Hofer, Mozart's sister-in-law, and goes up to f'''. (See AGUJARI.) For table showing compass of voice see SINGING. C. H. H. P.

COMPENSATING PISTON, a mechanical device to overcome the faulty intonation occurring when the valves of certain brass instruments are used in combination. (See VALVE.)

COMPÈRE, LOYSET (*d.* St. Quentin, Aug. 16, 1518), eminent contrapuntist, probably born in the French part of Flanders, was chorister, canon and chancellor of the Cathedral of St. Quentin.

In Guillaume Crétin's lament on the death of Okeghem he is mentioned among the distinguished pupils of the latter—

> 'Agricola, Verbonnet, Prioris,
> Josquin des Près, Gaspard, Brumel, Compère,
> Ne parlez plus de joyeulx chants, ne ris,
> Mais composez un *ne ricorderis*,
> Pour lamenter nostre Maistre et bon père.'

His reputation stood high with the contrapuntists of his own and the succeeding age, and it is amply sustained by the compositions which are known to be his. These are, 2 motets in Petrucci's 'Motetti XXXIII'; 22 compositions in Petrucci's 'Harmonice musices odhecaton'; 2 songs in Petrucci's collection 'Strambotti ode Frottole' (Lib. 4to); an 'Asperges' and a 'Credo,' both *a* 4, in Petrucci's 'Fragmenta missarum'; a motet 'O bone Jesu,' signed simply Loyset, in Petrucci's 'Motetti della Corona'; some motets in the collection 'Trium vocum cantiones' (Nuremberg, 1541). Amongst MSS. belonging to the Pope's chapel may be mentioned a Magnificat *a* 4, 6 motets, and a curious 5-part motet in which the tenor and second alto sing 'Fera pessima devoravit filium meum Joseph,' while the treble, first alto and bass are recounting the injuries received by Pope Julius II. from Louis XII. of France. (See *Q.-L.*) Other MSS. of Compère's work are to be found at Trent (Trienter Codices, see reprints below), Rome, Florence, Brussels, Dijon, Cortona and London (B.M. Add. MSS. 35,087). Compère has been confounded with Piéton, who had the same Christian name—Loyset, a diminutive of Louis. The confusion arises from the practice of the early masters, of signing their compositions with the Christian name alone.

REPRINTS.—VAN MALDEGHEM, *Trésor musical*; AMBROS, *Trienter Codices* (*D.T.Ö.*); CHARLES BORDES, *Trois Chansons du XVe siècle*; 'Le grand désir d'aimer me tient,' by L. CGMPÈRE (Paris, Rouard et Lerolle); E. DROZ et G. THIBAULT, *Poètes et musiciens du XVe siècle* (Paris, 1924); 1 'Chanson.'

BIBL.—E. DROZ and G. THIBAULT, *Bibliographie des recueils de chansons françaises du XVe siècle* (Paris, 1925).

M. C. C.; addns. M. L. P.

COMPETITION FESTIVALS. These festivals are gatherings of musical amateurs for the purpose of competing in performance before judges who not only give decisions and in some cases award prizes, but also give help, criticism and advice to the competitors. Competition festivals, chiefly in choral singing, but also in solo singing and instrumental performance, have thus become an important factor in the musical education of the people of Great Britain, and the movement has spread widely over the British Empire.

Apart from the Welsh Eisteddfod, the competitive principle in music was confined for many years in England to the brass band contests, and more especially to the manufacturing districts in the North of England. In 1882, however, the idea was extended to vocal performance, and the establishment of the Stratford Musical Festival in that year by J. S. CURWEN (*q.v.*), and the Kendal Festival in 1885 by Mary WAKEFIELD (*q.v.*), marked a new era in this class of musical performance. Competitive festivals are now held all over Great Britain and in Ireland (especially the north). These festivals, associated with towns or county areas, are organised locally and occur annually. Practically all of these organisations are affiliated under the British Federation of Musical Competition Festivals, 3 Central Buildings, Westminster, which was incorporated in 1921 and succeeded the Association which had been founded chiefly at Mary Wakefield's instigation in 1905. The Federation movement is extending, and doubtless will affect the destinies of competition festivals held in Canada, Australia, South Africa and other parts of the Empire.

Under the impetus of competition an extraordinarily high standard of choral *ensemble* has been reached by choirs of mixed voices and of men's and women's voices separately, not only in those parts of the country such as Lancashire and Yorkshire, which have always been famous for their vocal performance, but even in many small towns and villages in the south and west of England, where practically no serious effort to cultivate the music of the people had been made before the beginning of the competition festival movement. The

work done has not been confined to choral music. The competitions soon extended to instrumental and now to orchestral and chamber music; pianoforte and other instrumental solos are an invariable part of the larger festivals, and are undoubtedly increasing the abilities of amateurs who have in some cases received very little musical education outside that afforded by these festivals.

A divergence of scope is to be noted in these gatherings. Some are content with the competition side only; others, following the lines laid down by Mary Wakefield, make the culminating feature the combined performance of some important work studied by the various sections apart from competition. There is also a divergence of view as to the merits of the two forms of festival. While some musicians who have had considerable experience in judging consider that the best results are obtained by confining the festivals to competitive purposes, others, who take a broader view of the educative function, hold strongly that competition should be used merely as a means to an end, which is the performance of music for its own sake.

The British Federation publishes a *Year-book* which gives a list of the affiliated festivals held. Interesting particulars of the movement will be found in Rosa Newmarch's *Mary Wakefield* (Kendal, 1912). N. C. G.

COMPLINE (Lat. *completorium*). The last of the 'Hora Diurne,' or 'Day Hours,' of the Roman Ritual.

COMPOSITION means literally 'putting together,' and is now almost exclusively applied to the invention of music—a novelist or a poet being never spoken of as a composer except by way of analogy, but a producer of music being almost invariably designated by that title. 'Gedichtet,' says Beethoven, 'oder wie man sagt, componirt' (*Briefe*, Nohl, No. 200). As far as the construction of a whole movement from the original ideas is concerned the word is perhaps not ill adapted, but for the ideas themselves nothing could be more inappropriate. For the mysterious process of originating them the word 'invention' seems more suitable, but even that does not at all describe it with certainty. It is the fruit sometimes of concentration and sometimes of accident; it can hardly be forced with success, though very ingenious imitations of other people's ideas to be made to look like new may be arrived at by practice and the habitual study of existing music. Nevertheless, the title of composer, though only half applicable, is an honourable one, and those who do put together other people's ideas in the manner which should best justify the title are generally those who are most seldom called by it. (Cf. CONSTRUCTION.)

C. H. H. P.

COMPOSITION PEDALS are metal pedals placed above the pedal keyboard of the organ for the purpose of facilitating changes of stops.

They were invented by Bishop early in the 19th century and superseded the 'shifting movement' in use in England since the days of Father Smith.

Composition pedals were of two kinds—single-action and double-action; but the latter only are now made. A 'single-action' would either throw out or draw in given stops, but would not do both. A 'double-action' composition pedal will not only draw out a given number of stops—we will suppose the first four—but will draw in all but the same four (see ORGAN). E. J. H. rev.

COMPOUND TIME, see TIME.

COMTE ORY, LE, an opera in 2 acts; libretto in French by Scribe and Delestre-Poirson, music by Rossini; produced at the Paris Opéra, Aug. 20, 1828, and first performed in England at the King's Theatre (in Italian), Feb. 28, 1829; and in the original French at the St. James's Theatre, June 20, 1849. The greater part of the music was taken from an earlier work, 'IL VIAGGIO À REIMS' (*q.v.*). G.

COMUS, a masque, written by John Milton, and performed on Michaelmas night, 1634, at Ludlow Castle, the residence of the Earl of Bridgewater, with music by Henry LAWES (*q.v.*). The masque, under the editorship of Lawes, was published anonymously in 1637, its authorship only being declared in the 1645 edition.

The music remained unpublished in manuscript in the British Museum library until 1904, when the Mermaid Society undertook its publication, and performances of the masque, with the original music, were given in London and the provinces. Hawkins and Burney, in their *Histories of Music*, have both given one song, 'Sweet Echo,' Burney making severe comment on Lawes's setting of the song. (See SONG, section ENGLAND.)

In 1738, one hundred and four years after the original production, another version of 'Comus' was given to the public. It was in this that Thomas Augustine ARNE (*q.v.*) first gave proof of his full talents.

Milton's masque was adapted for stage requirements by Dr. Dalton, and the piece was presented at Drury Lane in the year above named, 1738. It was an immediate success, and at once established Arne's reputation. Beard, Mrs. Clive and Mrs. Arne were the singers who took the characters. Arne published the masque in folio, in 1740, and marked it as his 'Opera prima.' The imprint stands:

'Printed by William Smith, at the Musick Shop in Middle Row, Holborn, near Holborn Barrs; and sold by the author at his House, No. 17 in Craven Buildings, Drury Lane.'

Songs from Arne's 'Comus' enjoyed a long popularity. It was revived at Eton (Dec. 1922) and subsequently given in the Inner Temple Hall, London (Mar. 1923).

Another adaptation of Milton's 'Comus' was made by George Colman, and acted at Covent Garden and the Haymarket theatres in 1772; it was not a success, although probably Dr. Arne's music was employed. F. K.

CONACHER & CO. established an organ factory at Huddersfield in 1854, from which a rapidly extending business has been developed. In 1906 their list was described as including upwards of 400 organs built or enlarged by them. The following were quoted as representative: the parish church, Huddersfield; St. Michael's, Hulme, near Manchester; Glasgow University; and the Roman Catholic Cathedral, St. John's, New Brunswick. In 1921 this firm could claim to have built over 1600 organs in all parts of the world.

CON AFFETTO, see AFFETTUOSO.

CON AGITAZIONE, see AGITATO.

CON AMORE, see AMOROSO.

CON ANIMA, see ANIMATO.

CON BRIO, 'with life and fire.' Allegro con brio was a favourite tempo with Beethoven.

CONCENTO, the sounding together of all the notes in a chord, and thus the exact opposite of ARPEGGIO (*q.v.*). M.

CONCENTORES SODALES (founded June 1798; dissolved 1847) was to some extent the revival of an association (the 'Society of Musical Graduates') formed in 1790 by Dr. Callcott, Dr. Cooke and others. (See *Mus. T.*, 1892, p. 713.) For that society Dr. Callcott wrote his glee, 'Peace to the souls of the heroes,' and Robert Cooke, 'No riches from his scanty store.' After its dissolution the want of such an association was greatly felt, and in 1798 Horsley proposed to Dr. Callcott the formation of the 'Concentores Sodales.' The first meeting was held on June 9 at the Buffalo Tavern, Bloomsbury, and was attended by Dr. Callcott, R. Cooke, J. Pring, J. Horsfall and S. Webbe, jun. Among the early members were S. Webbe, sen., Linley, Bartleman, Harrison, Greatorex, Spofforth, etc. Each member who was a composer contributed a new canon on the day of his presidency. In British Museum Add. MS. 27,693 is the programme of Thurs. Nov. 18, 1802. The society began to decline about 1812, and it was decided to dissolve it.

In May 1817, at a meeting at the Freemasons' Tavern, at which Attwood, Elliott, Horsley, Linley and Spofforth were present, it was resolved to re-establish it, with this difference—that no one should be a member who was not practising composition and did not, previous to his ballot, produce a work in at least four parts. The original members were soon joined by Evans, W. Hawes, T. F. Walmisley and Smart, and later by Bishop, Goss, Jolly and Attwood. The associates included King, Leete, Terrail and Sale. The members took the chair by turns, and the chairman for the evening usually produced a new canon, which was followed by glees of his own composition, and a madrigal or some vocal work. As an illustration of the programmes may be cited that of Feb. 13, 1824, when Goss presided:

New canon, 4 in 2, 'Cantate Domino'; new glees, 'While the shepherds,' 'My days have been,' 'When happy love,' 'There is beauty on the mountain,' 'Kitty Fell,' 'Calm as yon stream,' 'List! for the breeze'; glee by Spofforth, 'Hail, smiling morn.'

On the dissolution of the Society it was resolved to present the books belonging to it to Gresham College, and the wine to the secretary, T. F. Walmisley; the money in hand was spent on a piece of plate for Horsley, the father of the society. C. M.

CONCERT (Fr. *concert*, Ger. *Konzert*, Ital. *concerto*). While the English use of the word constantly means the performance before an audience of a prearranged programme of musical works, the French, German and Italian forms of it, besides possessing this meaning, are equally applied to a particular type of composition (see CONCERTO). The old English form CONSORT (*q.v.*) approximated to this latter meaning, but the Italian form, Concerto, has been adopted into the English language to mean concerted music, particularly that for one or more solo instruments with orchestra.

Concerts, in the sense of more or less public performances of set programmes to which audiences are admitted by payment, seem to have begun in England (earlier than elsewhere) with those given in London by JOHN BANISTER (*q.v.*) between 1672 and 1678. THOMAS BRITTON (*q.v.*) carried on the practice, and during the 18th century many concert-giving institutions were formed in London, including the ACADEMY OF ANTIENT MUSIC (founded 1710) (*q.v.*), the Castle Society (1724), the Concert of Antient Music (1776) (see ANCIENT CONCERTS), the Professional Concerts (1785), besides occasional concerts of individual artists, amongst which those of Salomon and Haydn were pre-eminent from 1791–95. HICKFORD'S ROOM (*q.v.*) (1713) and the HANOVER SQUARE ROOMS (*q.v.*) (1775) were the most important concert halls of that century.

Concerts began to be propagated in Germany, Switzerland and Sweden by the Collegia Musica about the year 1700, but the first great continental institution of the kind was the 'Concert spirituel' (see under PARIS), founded by Philidor in 1725 in Paris. This formed the model for others, and from it the history of concert-giving in the 18th century developed. Other landmarks worthy of mention are the foundation at Vienna of the Tonkünstler Societät (1772), at Amsterdam of the 'Felix Meritis' Concerts (1777), and at Leipzig of the 'Gewandhaus' Concerts (1781).

While the private patronage of music by princes and nobles remained the chief source of livelihood to the musician, the progress of public concert institutions was impeded. The

breakdown of the system of patronage and the change of tone and temper which the Napoleonic wars brought to the Europe of the 19th century stimulated the increase of concerts. The Viennese development of symphonic music brought into existence the modern symphony orchestra in every centre of Europe ; improved transport by road and sea, particularly by steam power, facilitated the careers of travelling virtuosi, and in the 19th century concert-giving became an international industry. The history of the modern concert may be traced in this Dictionary by consulting articles under the names of prominent musical towns.

The concert-giving institutions of London are chronicled under their own names. The following are of primary importance from the historical point of view :

ORCHESTRAL

ROYAL PHILHARMONIC SOCIETY (originally Philharmonic Society, 1813).
NEW PHILHARMONIC SOCIETY (1852–79).
CRYSTAL PALACE SYMPHONY CONCERTS (1855–1901).
BRITISH ORCHESTRAL SOCIETY (1872–75).
RICHTER (Symphony Concerts begun 1879).
HENSCHEL (London Symphony Concerts begun 1886).
PROMENADE CONCERTS (1895).
NEW QUEEN'S HALL ORCHESTRA (originally Queen's Hall Orchestra, 1897).
LONDON SYMPHONY ORCHESTRA (1902).

CONCERTANTE (Ital.). (1) In the 18th century this name was given to a piece of music for orchestra in which there were parts for solo instruments, and also to compositions for several solo instruments without orchestra. The fine concerto by Handel in C major, for two violins and violoncello, accompanied by strings and two oboes (published in part 21 of the German Handel Society's edition) is in Arnold's old English edition entitled 'Concertante' (see CONCERTO GROSSO).

(2) In the present day the word is chiefly used as an adjective, prominent solo instrumental parts being spoken of as 'concertante parts,' and a work being said to be 'in the concertante style' when it affords opportunities for the brilliant display of the powers of the performers. For example, those quartets of Spohr in which especial prominence is given to the part of the first violin are sometimes called 'concertante quartets.' His op. 48 is a 'Sinfonie concertante, pour deux violons avec orchestre' ; his op. 88 a 'Concertante' for the same. See also his opp. 112-115, etc. E. P.

CONCERTGEBOUW, see AMSTERDAM.

CONCERTINA, a portable instrument of the Seraphine family, patented by the late Sir Charles WHEATSTONE (*q.v.*), June 19, 1829.

It is hexagonal, and has a keyboard at each end, with expansible bellows between the two. The sound is produced by the pressure of air from the bellows on free metallic reeds. The compass of the treble concertina is four octaves (*g* to *g''''*), through which it has a complete chromatic scale. This instrument is double-action, and produces the same note both on drawing and pressing the bellows. Much variety of tone can be obtained by a skilful player, and it has the power of being played with great expression and complete sostenuto and staccato. Violin, flute and oboe music can be performed on it without alteration ; but music written specially for the concertina cannot be played on any other instrument, except the organ or harmonium. Nothing but the last-named instruments can produce at once the extended harmonies, the sostenuto and staccato combined, of which the concertina is capable. There are also tenor, bass and double-bass concertinas, varying in size and shape. These instruments are single-action, producing the sound by pressure only, and are capable of taking tenor, bass and double-bass parts without alteration. The compass of the tenor concertina is from *c* to *c'''*, that of the bass from *C* to *c'''*, and that of the double-bass from *CC* to *c''*, making the total range of the four instruments $6\frac{5}{8}$ octaves. The late Signor Regondi was the first to make the instrument known, and was followed by George Case. Richard Blagrove was subsequently the principal performer and professor. Among the music written specially for the instrument are two Concertos in G and D for solo concertina and orchestra, by Molique ; two in D and E♭, by G. Regondi ; Sonata for piano and concertina in B♭, by Molique ; Quintet for concertina and strings, by G. A. Macfarren ; Adagio for 8 concertinas in E, by E. Silas ; Quintet in D for piano, concertina, violin, viola and violoncello, by the same ; 6 Trios for piano, concertina and violin, by the same. Much brilliant *salon* music has also been written for it. The concertina has been occasionally introduced into the modern orchestra for special effects. (*PLATE XV.* No. 2.) G.

CONCERTINO, 'a little Concert.'

(1) A term applied to the little band of solo instruments employed in a CONCERTO GROSSO (*q.v.*). The title of Corelli's concertos is, 'Concerti grossi con duoi violini e violoncello di concertino obligati, e duoi altri violini, viola e basso di concerto grosso ad arbitrio che si potranno radoppiare.' W. S. R.

(2) A piece for one or more solo instruments with orchestral accompaniment, which differs from the CONCERTO in its much greater concise-

ness. The concertino was traditionally regarded as freer in form than the concerto; it may be in three short movements, which are usually connected; but it more often consists of one rather long movement, in which the time may be changed or a middle part in slower tempo be introduced episodically. As good examples may be cited Weber's 'Concertino' for clarinet, op. 26, and Schumann's 'Introduction and Allegro Appassionato,' op. 92, for piano and orchestra. E. P.

CONCERT-MASTER (Ger. *Konzertmeister*), the leader, *i.e.* the first of the first violins in an orchestra, who sits next the conductor and transmits his wishes to the band. He is, as far as any one player can be, responsible for the attack, the tempo, the nuances of the playing. G.

CONCERTO (Ital.; Fr. *concert*; Ger. *Konzert*), the name generally given to an instrumental composition designed to show the skill of an executant, and one which is almost invariably accompanied by orchestra, though there are numerous exceptions.[1]

The word was, however, at one time used differently. It was first employed by Ludovico Viadana, who in 1602–03 published a series of motets for voices and organ, which he entitled 'Concerti ecclesiastici.' In this sense the word was used as equivalent to the Latin 'concentus,' and such works were called 'Concerti da chiesa' (church concertos). Soon other instruments were added to the organ; and ultimately single instrumental movements in the sacred style were written which also received the name of 'concerti da chiesa.' The real inventor of the concerto as a concert piece was Giuseppe Torelli, who in 1686 published a 'concerto da camera' for two violins and bass. The form was developed by Corelli, Geminiani and Vivaldi. From the first it resembled that of the sonata; and as the latter grew out of the suite, the movements becoming larger in form and with more internal cohesion, so it was also with the concerto: there is as much difference between a concerto by Bach and one by Beethoven as there is between the 'Suites anglaises' and the 'Waldstein' sonata. In the time of Bach and Handel the word 'concerto,' though applied exclusively to instrumental music, had a less restricted signification than that given to it later.

The 18th-Century Type.—Many of the specimens of this form in the works of the masters named more nearly resemble symphonies than concertos in the modern acceptation of the term. (See Concerto Grosso.) For instance, the first of Handel's so-called 'oboe concertos' is written for strings, two flutes, two oboes and two bassoons, and except-

[1] Such are Liszt's 'Concert pathétique' for 2 pianos, Schumann's sonata op. 14, originally published as 'Concert sans orchestre,' and Chausson's concerto for violin, piano and string quartet

ing in occasional passages these are treated orchestrally rather than as solo instruments; while of Bach we have a concerto for violino piccolo, three oboes, one bassoon and two horns, with string quartet, and another for three violins, three violas, three violoncellos and double bass, neither of which possesses the characteristics of a modern concerto. The form, moreover, of the older concerto was very free. With Bach we find a preference for the three-movement form. In the whole of his harpsichord concertos, as well as in those for one or two violins, we find an allegro, a slow movement and a finale in quick time—generally 3-8. The two concertos named above are, exceptionally, in four and only two movements respectively. With Handel, on the other hand, the three-movement form is the exception. As examples of the freedom of which he makes use may be quoted the movements of two of his 'Twelve Grand Concertos' for two violins and violoncello *soli*, with accompaniment for stringed orchestra. These works are concertos in the modern sense, as regards the treatment of the solo instruments; but their form is as varied as possible. Thus the sixth consists of a larghetto, allegro ma non troppo, musette, and two allegros, the second of which (though not so entitled) is a minuet; while the eighth contains an allemande, grave, andante allegro, adagio, siciliana and allegro. It should be mentioned here that Handel was one of the first, if not the first, to introduce opportunities for extempore performance on the part of the soloist, thus anticipating the 'cadenza,' an important feature of the modern concerto, to be spoken of presently. In the second movement of his organ concerto in D minor (No. 4 of the second set) are to be found no less than six places marked *organo ad libitum*, and with a pause over the rests in the accompaniments, indicating that the player (that is to say, he himself) was to improvise.

The Classical Form.—This was finally settled by Mozart, and though several modifications have been introduced during the next century, the general lines of construction remained the same as those fixed by him. Nearly fifty concertos of his composition for various instruments are in existence, and, while presenting slight differences of detail, closely resemble one another in the more important points. The concerto form was founded upon that of the Sonata (*q.v.*); several variations, however, must be noted. In the first place, a concerto consisted of only three movements, the scherzo, for some not very obvious reason, being excluded. Litolff's so-called 'Concerto-Symphonie' in E flat, for piano and orchestra, has exceptionally a scherzo as the third of four movements, but Brahms's introduction of one into his piano concerto in B flat was considered an innovation in 1882.

The first movement in Mozart's concertos always begins with a tutti passage for the orchestra, in which the principal subjects are announced, much as in the first part of the first movement of a sonata. Sometimes the 'second subject' is omitted in this portion of the piece, but it is more frequently introduced. An important difference in form, however, is that this first tutti always ends in the original key, and not in the dominant, or the relative major (if the work be in a minor key), as would be the case in a sonata. The solo instrument then enters, sometimes at once with the principal subject, and sometimes with a brilliant introductory passage. A repetition, with considerable modification, of the first tutti, mostly follows, now divided between the principal instrument and the orchestra; the second subject is regularly introduced, as in a sonata, and the 'first solo' ends with a brilliant passage in the key of the dominant (or relative major, as the case may be). A shorter tutti then leads to the second solo, which corresponds to the development or 'working out' of a sonata, and which, after various modulations, leads back to the original key. The principal subject is then reintroduced by the orchestra, but in a compressed form, and is continued by the soloist with the 'third solo,' which corresponds in its form to the latter part of a sonata movement. A short final tutti brings the movement to a close. In most older concertos a pause is made, near the end of this last tutti, upon the 6-4 chord on the dominant for the introduction of a cadenza by the player. Though very general, this custom was by no means universal; in several of Dussek's concertos—notably in his fine one in G minor, op. 49—no such pause is indicated. The CADENZA (*q.v.*), when introduced, could be either improvised by the player, or previously composed, either by himself or by some other person. In the cadenza the player was expected not merely to show off his execution, but to display his skill in dealing with the subjects of the movement in which it was introduced. A cadenza consisting entirely of extraneous matter would be altogether faulty and out of place, no matter what its technical brilliancy. It was the invariable custom to finish the cadenza with a long shake over the chord of the dominant seventh, after which a short passage for the orchestra alone concluded the movement. In older works the soloist was silent during these few bars; but in his concerto in C minor (Köchel's *Catalogue*, No. 491) Mozart for the first time tried the experiment of associating the piano with the orchestra after the cadenza; and his example was followed by Beethoven in his concertos in C minor, G major and E♭.

The second movement, which might be an andante, a larghetto, an adagio, or any other slow tempo, resembled in its form the corresponding portion of a sonata. Sometimes the variation form was used, as in Mozart's two concertos in B♭ (Köchel, Nos. 450 and 456); but more frequently the ordinary andante or larghetto was introduced. Two charming examples of the 'Romance' will be found in the slow movement of Mozart's concertos in D minor and D major (Köchel, Nos. 466 and 537), though the latter is not, like the first, expressly so entitled, but simply bears the inscription 'Larghetto.' The solo part in the slow movements is frequently of an extremely florid character, abounding in passages of ornamentation. Sometimes a cadenza is also introduced at the close of this movement—*e.g.* in Mozart's concertos in A major (Köchel, 414), C major (Köchel, 415) and G major (Köchel, 453). In such cases, as is evident from the examples written by Mozart himself for the works mentioned, the cadenza should be much shorter than in the first movement.

The finale of a concerto was mostly in rondo form, though examples are to be found in Mozart of the variation form being employed for this movement also; see concertos in C minor (Köchel, 491) and G major (Köchel, 453). Sometimes this rondo was interrupted by a complete change of tempo. Thus the rondo of the concerto in C major (Köchel, 415), which is in 6–8 time, is twice interrupted by an adagio in C minor, 2–4; in the middle of the rondo of the concerto in E♭ (Köchel, 482) is introduced an andantino cantabile; while another concerto in E♭ (Köchel, 271) has a minuet as the middle portion of the final presto. Short cadenzas were also frequently introduced in the finales; the concerto in E♭, just mentioned, has no less than three, all of which, instead of being left to the discretion of the player, are, exceptionally, written out in full. Similar short cadenzas will be found in the rondo of Beethoven's concerto in C minor, op. 37, while in the finale of the concerto in G, op. 58, a pause is made with the special direction 'la cadenza sia corta'—the cadenza to be short.

The innovations introduced by Beethoven in the form of the concerto were numerous and important. Foremost among these was the greater prominence given to the orchestra. In the concertos of Mozart, except in the tutti, the orchestra has little to do beyond a simple accompaniment of the soloist, but with Beethoven, especially in his later concertos, the instrumental parts have really symphonic importance. Beethoven was also the first to connect the second and third movements (see concertos in G and E flat), an example which was imitated by Mendelssohn, in whose pianoforte concertos in G minor and D minor all the movements follow continuously. Beethoven,

moreover, in his concertos in G and E flat, broke through the custom of beginning the work with a long tutti for the orchestra; in the former the piano begins alone, and in the latter it enters at the second bar. It is worthy of remark that the same experiment had been once, and only once, tried by Mozart, in his little-known concerto in E♭ (Köchel, 271), where the piano is introduced at the second bar. One more innovation of importance remains to be noticed. In his concerto in E♭, op. 73, Beethoven, instead of leaving a pause after the 6–4 chord for the customary cadenza, writes his own in full, with the note 'Non si fà una cadenza, ma attacca subito il seguente'—'Do not make a cadenza, but go on at once to the following.' His cadenza has the further peculiarity of being accompanied from the nineteenth bar by the orchestra. Another curious example of an accompanied cadenza is to be found in that which Beethoven has written for his pianoforte arrangement of his violin concerto, op. 61, through a considerable part of which the piano is accompanied by the drums, which give the chief subject of the movement.

It is evident that the example of Beethoven in his E♭ concerto led the way to the disuse of the introduced cadenza in the first movement. Neither Mendelssohn nor Brahms has inserted one at all in pianoforte concertos; and where such is intended, composers mostly write out in full what they wish played, as, for example, Mendelssohn in his violin concerto, op. 64 (where, it may be remarked in passing, the cadenza is the middle of the first movement, and not at the end). Schumann (concerto in A minor, op. 54) and Raff (concerto in C minor, op. 185) have also both written their cadenzas in full.

Sometimes concertos are written for more than one solo instrument, and are then known as double, triple, etc., concertos as the case may be. The construction of the work is precisely the same as when composed for only one instrument. As examples may be named Bach's concertos for two violins, and for two, three and four pianos; Mozart's concerto in E♭ for two pianos, in F for three pianos, and in C for flute and harp; Beethoven's triple concerto, op, 56, for piano, violin and violoncello; Brahms's concerto in A minor for violin and violoncello, op. 102; Maurer's for four violins and orchestra. Mendelssohn's autograph MSS., now in the State Library at Berlin, contain two concertos for two pianos and orchestra, and one for piano and violin, with strings.

E. P.

The Modern Concerto.—While the romantic composers of the 19th century modified the classical form to suit the needs of individual expression, only one produced so radical a change as to indicate a new type. This was Liszt, who, in his two piano concertos (E flat and A), not only linked the movements, as others had done before him, but welded them together by the use of themes running through the whole structure and changed in rhythm and tempo to suit the emotional content of each movement in turn. Thus the whole became an enlarged single-movement form in which the first allegro could be regarded as an exposition, the central movement, or movements, as episodic developments, and the finale as a combination of development with recapitulation. Liszt's example had a widespread influence on later composers, and may be traced in Saint-Saëns, notably the violin concerto in B minor, in D'Albert's violoncello concerto in C, and particularly in the highly individual style of Delius's several concertos. Tchaikovsky, Dvořák, Grieg and Bruch all followed more or less the classical pattern of contrasted movements based on sonata form, so that it cannot be said to have been superseded by Liszt's innovation. Elgar's violin concerto clings almost as closely to classical procedure as does that of Brahms (even its famous accompanied cadenza has its precedent, though probably unconsciously followed, in Beethoven), but the violoncello concerto is very much freer. It, like Delius's works, may trace part of its descent through Liszt. It is of the essence of modern form, whether in concerto writing or anything else, that the composer accepts precedent just in so far as may suit his immediate purpose and no further. Certain composers have also shown a marked tendency to return to the original conception of the concerto as a work for a group of concertante players with or without accompaniment. Chausson's 'Concert' for piano, violin and string quartet affords an instance from the 19th century. Arthur Bliss's for piano, tenor voice, xylophone and strings is a salient example from the 20th. But such works are sporadic. They have not at present developed a type.

Bibl.—H. Daffner, *Die Entwicklung des Klavierkonzerts bis Mozart* (Leipzig, 1906); A. Schering, *Geschichte des Instrumental-Konzerts bis auf die Gegenwart* (Leipzig, 1905).

CONCERTO GROSSO. (1) An orchestral concerto; *i.e.* a succession of movements, played by two or more solo instruments; accompanied by a full or stringed orchestra. The term belongs more to the late 17th and early 18th centuries (see Torelli) than to the present day.

Handel's so-called 'Concertante' is a composition of this kind, written for two solo violins, and violoncello, accompanied by stringed instruments and hautboys. Eleven out of the twelve well-known Grand Concertos, by the same composer, are written for a similar assemblage of solo instruments, accompanied by stringed instruments and continuo only; but No. VII. of this set is of an exceptional character, and contains no solo passages. Few

of these compositions contain any bravura passages for the principal instruments, which are used, for the most part, like the wind instruments in works of later date, for the purpose of producing variety of instrumentation; but sometimes, and especially in the 'Concertante,' long passages of great constructional importance are assigned to them.

Handel's six 'Oboe Concertos' are Concerti Grossi, written for a concertino consisting of two solo violins, two violoncellos, two hautboys, two flutes and two bassoons, with the addition, in No. I., of two tenors, and, in No. VI., of an obbligato harpsichord; accompanied, throughout the entire set, by the stringed orchestra and continuo. In some of these, the solo passages are much more brilliant than in the Grand Concertos above mentioned.

Corelli's Concerti Grossi are written for the same instruments as Handel's 'Grand Concertos.' J. S. Bach, in the six Brandenburg concertos, uses instrumental combinations of greater variety, and more in accordance with his own peculiar views of orchestral contrast.

In form, all these works bore a close analogy to the ordinary overture and Suite, peculiar to the middle of the 18th century, the movements consisting of a series of Largos, Allegros and Andantes, intermixed, occasionally, with Minuets, Gavottes and even Gigas. After the invention of the Sonata-form, the Concerto Grosso died out. (See CONCERTO and SYMPHONY.)

(2) A term applied to the orchestral accompaniments of a Grand Concerto, as distinguished from the concertino, or assemblage of principal instruments. W. S. R.

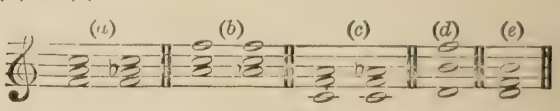
CONCERT-PITCH, an expression now understood to imply a slightly higher pitch than the standard pitch accepted for an orchestra, due to the higher temperature of the concert-hall or room. For example, the French diapason normal is A = 435 double vibrations per second (standardised in 1896). An average taken from the leading orchestras in Europe and America shows a performing or concert-pitch, of A = 439. A. J. H.

CONCERTSTÜCK, 'Concert-piece,' a term more particularly associated with works for piano and orchestra not in the full concerto form. Weber's well-known composition in F minor (op. 79) affords a classical instance (see WEBER). Schumann has left a 'Concertstück' for four horns and orchestra (op. 82).

CONCHITA, opera in 4 acts, text, adapted from *La Femme et le pantin* of Pierre Louys, by Maurizio Vaucaire and Carlo Zangarini, music by Zandonai. Produced, Dal Verme Theatre, Milan, Oct. 14, 1911; Covent Garden, July 3, 1912.

CONCONE, GIUSEPPE (*b.* Turin, 1810; *d.* there, June 1, 1861), a professor of the pianoforte and singing.

He lived for about ten years in Paris, where he gave lessons in both branches of music, and brought out several compositions for the piano, notably a set of studies published by Grus. Richault was the publisher of his vocal music, which is melodious and well written for the voice. But it is chiefly by his solfeggi and vocalizzi that Concone has made a world-wide reputation for usefulness, to which the republication of these works by Peters of Leipzig has greatly contributed. Those that are known consist of a book of 50 solfeggi for a medium compass of voice, 15 vocalizzi for soprano, 25 for mezzo-soprano, and a book of 25 solfeggi and 15 vocalizzi, 40 in all, for bass or baritone. This coupling together of bass and baritone is as a rule a great mistake, but in the present case the alternative notes given in passages which run low enable baritone voices to make very profitable use of the vocalizzi, and as they do not run very high, ordinary bass voices can sing them with sufficient ease. There is also a set of thirty very good florid exercises for soprano. (See SOLFEGGIO.)



The book of 50 solfeggi has been republished by many houses, notably by Curwen with the Tonic Sol-fa in addition to the ordinary notation.

After the French revolution of 1848, Concone returned to Turin, and became maestro di cappella and organist at the Chapel Royal.

H. C. D.

CONCORD is a combination of notes which requires no further combination following it or preceding it to make it satisfactory to the ear. The concords are perfect fifths, perfect fourths, major and minor thirds, and major and minor sixths, and such combinations of them, with the octave and one another, as do not entail other intervals. Thus the combination of perfect fifth with major or minor third constitutes what is known as a common chord, as (*a*). And different dispositions of the same notes, which are called its inversions, give, first a bass note with its third and sixth, as (*b*); and, secondly, a bass note with its fourth and sixth, as (*c*).

Besides these a chord composed of the third and sixth on the second note of any scale is regarded as a concord, though there is a diminished fifth or augmented fourth in it according to the distribution of the notes, as (*d*) or (*e*)—

—since the naturally discordant quality of the diminished fifth and augmented fourth is considered to be modified by placing the concordant note below them, a modification not effected when it is placed above them. This combination was treated as a concord even by

the theorists of the old strict diatonic style of counterpoint. (See HARMONY.) C. H. H. P.

CONDELL, HENRY (*b.* 1757; *d.* Battersea, June 24, 1824), was for many years a violinist in the orchestras at the Opera House and Drury Lane and Covent Garden Theatres.

He wrote overtures to 'The House to be sold' (1802), Dimond's 'Hero of the North' (1803), 'Love laughs at Locksmiths'; incidental music to 'Aladdin' and Reynolds's 'Bridal Ring' (1810). In 1811 he gained a prize at the Catch Club for his glee, 'Loud blowe the wyndes.' He also composed the music for the following dramatic pieces: 'The Enchanted Island,' ballet, 1804; 'Who wins?' musical farce, 1808; and 'Transformation,' musical farce, 1810; and was one of the six contributors to the comic opera, 'The Farmer's Wife,' 1814. W. H. H.

CONDUCTING, the art of directing the simultaneous performance of several players or singers by the use of gesture.

The conductor's duty is to concentrate the various purposes of individual players into one combined purpose, just as a pianist combines the various mechanisms of his instrument into one organism under his fingers. For this reason a conductor is often said to 'play on the orchestra'; indeed the power of a conductor over his players may be even greater than that of a player over his instrument, inasmuch as the mechanical element is entirely absent from the connexion between the conductor and his performers.

Richard Wagner divides the duties of an orchestral conductor under two heads—(*a*) that of giving the true tempo to the orchestra; (*b*) that of finding where the melody lies.[1] The idea of true tempo covers the technical qualifications necessary to a conductor; the idea of the melody covers the ideal aspects of his art. Very few men possess both these qualifications, but both are necessary to great conducting. Technical accuracy is useless without an imaginative mind, and the most inspired imagination is powerless unless aided by a clear head and a clear beat.

(*a*) The technical equipment and duties of the conductor, particularly the actual code of signals authorised by convention and tradition for his use, are fully described with diagrams in Berlioz's *A Treatise on Modern Instrumentation* (English translation, pp. 247-9), and more recently in Adrian C. Boult's *A Handbook on the Technique of Conducting*. Where these differ, the more modern version should be preferred.

(*b*) We may classify the more ideal aspects of the conductor's art under the following heads:

1. 'RUBATO' CONDUCTING. — A conductor must have the tempo clearly in his head, and he must *be able* to keep to it with metronomic accuracy, otherwise he can have no sense of time. But it does not follow that he should always keep rigidly to the initial tempo. 'Tempo rubato' is as necessary in orchestral music as in any other. This is a comparatively new idea: Mendelssohn, we are told by W. S. Rockstro, 'held tempo rubato in abhorrence.' It was Wagner who by his practice and his theory contended that 'modifications of tempo' are necessary to a living rendering of orchestral music.[2]

Orchestral rubato can easily be overdone; a mechanical slackening and quickening of tempo is almost worse than metronomic rigidity. Perfect orchestral rubato should be like the playing of a single performer, holding back or pressing on almost imperceptibly as his emotional impulse directs. This perfection cannot be achieved except by a permanent orchestra, at one with itself and with its conductor, and then only after long and careful rehearsals.

2. LATITUDE TO PLAYERS.—Next comes the question of what is known as 'drill sergeant' conducting. Should a conductor absolutely rule his players, or should he allow scope to individual judgment? In passages for full orchestra, or where there are difficult combinations of rhythms, etc., the conductor should probably be quite autocratic. But where one instrument stands out prominently the conductor should usually, for the moment, treat the work as a concerto, and accompany the soloist. For those conductors who esteem a full tone in the orchestra this is essential, even at the expense of clearness in the subordinate parts. Those who heard the 'Tannhäuser' overture under Mottl will remember the noble sonority of the trombones at the first fortissimo. Mottl having once indicated the tempo, allowed the trombones to play as they pleased, and kept the whole orchestra waiting on them. The trombonists, released from cramping obedience to the conductor's stick, were able to give the passage with tremendous force without sacrificing beauty of tone. It was a splendid piece of orchestral impressionism, though not satisfactory to those who value clearness of detail. This licence to individuals must be subordinate to the conductor's conception of the work as a whole. A story of Nikisch rehearsing in London illustrates the proper balance to be maintained. Whenever an instrument had a solo he would sing the passage over to the player, saying, 'That is my idea of it, now play it as you like.'

3. EFFICIENT MANAGEMENT OF A REHEARSAL. —The conductor's object must be to employ the time for rehearsal as usefully as possible. A conductor must recognise at once what are the difficult parts of a composition; what will require much rehearsal and what little. Orchestral players are very sensitive and naturally resent having their time wasted. The conductor

[1] 'The whole duty of a conductor is comprised in his ability to indicate the right tempo.' . . . 'The orchestra had learnt to look for Beethoven's *melody* in every bar . . . and the orchestra *sang* that melody. This was the secret.'—R. Wagner, *Über das Dirigiren*, translated by Dannreuther.

[2] Wagner invented this 'new style' of conducting during his conductorship at Dresden 1843-49, and codified his ideas in the famous *Über das Dirigiren* (1869).

must realise which mistakes may be passed over lightly as mere slips, which are radical and must be insisted on. Economy of time is especially important where a conductor has to direct a 'scratch' orchestra collected for the purpose with only one rehearsal to prepare for a long programme. In such cases the conductor must be ready to seize on the essential points and let the rest take care of itself.

4. Correcting and Annotating Orchestral Parts.—It is a conductor's duty to see that the parts are correct, and that any 'cuts' or other special marks are duly indicated. Some conductors add special bowing and breathing marks to the orchestral parts to produce a more perfect unanimity of rendering, while other conductors prefer to give their players more freedom. Together with this duty goes the responsibility of making certain alterations in the score of well-known works, such as Wagner's famous emendations in the choral symphony, Richter's alteration of two trumpet passages in the Eroica Symphony, the changing of  to  in the bassoon part near the beginning of the 'Tannhaüser' overture, or the almost universal substitution of a bass clarinet for a bassoon in a certain passage in Tchaikovsky's sixth symphony.

It would be out of place to discuss here how far such alterations are justifiable; they are only mentioned here because it is a conductor's duty to know of these alterations, and to settle whether he will adhere to the original score or not.

5. General Conception.—The more ideal qualities of a conductor include the power of grasping a composer's true meaning, that of impressing himself on the members of the orchestra, and that indefinable power of giving life to music which belongs to all great players and conductors. The powers of interpretation in conductors have increased much in modern times; this is doubtless largely owing to the increased virtuosity of orchestral players, but it is chiefly because modern conductors have usually made a special study of the art of 'playing on the orchestra.' Up to the middle of the 19th century a fairly correct performance was all that a conductor expected of his players: now correctness is the minimum from which he starts.

The modern art of orchestral interpretation exhibits itself in two main lines. There are those conductors whose aim is faithfully to represent the composer's intention, and those who mirror themselves in the work they are conducting. A conductor of the first type would wish his audience to say not 'this is wonderful' but 'this is right.' Most of his work is done at rehearsal; during the performance he is merely on the watch to see that his directions are carried out.

The other type of conductor makes his mark by some new and personal light thrown on an old work. To watch such a conductor is like watching a great actor—every action is expressive and every nuance is guided by the inspiration of the moment. This 'personal' method of conducting is liable to great abuses in the hands of an incompetent artist. Every pettifogging band-master must now have his 'reading' of the great masterpieces. This 'reading' usually consists of a strict disregard for the composer's intentions coupled with a gross exaggeration of nuance and a distortion of the true rhythm, which has the same relation to real 'rubato' playing that barn-storming has to good tragic acting. Such a conductor as this last had much better confine himself to merely beating time; then, at all events, the audience will hear the notes and will be able to draw their own conclusions.

It is a moot point how far a conductor is really necessary to an orchestra. A string quartet never dreams of having a conductor, and even such a work as Schubert's 'Octet' is played without one. Certainly a well-organised orchestra could perfectly well dispense with a mere time-beater in works which it knew well, and it would give a much better performance without the supererogatory gestures of an ignorant or inexperienced conductor who knows much less about the work which is being played than the players themselves. An interesting experiment has been made lately (1924) in Moscow of orchestral playing without a conductor; it is said with very good results. To achieve this it is necessary that every player should be a real artist that the members of the orchestra should have played together long enough to have become one organism, that each player should have a knowledge of the work as a whole (not his own part only), and that rehearsals should be unlimited.

History of Conducting.—We can trace the history of conducting as far back, at least, as the 15th century, by which time it had become customary to beat time to the 'Sistine choir' at Rome with a roll of paper called a sol-fa. Ornithoparcus, writing in 1516, describes 'Tact' as 'a certain motion made by the hand of the chief singer, according to the nature of the marks, which motion directs a song according to measure.' [1] This proves that by the beginning of the 16th century the practice was universal, as also does a passage from Galilei's *Dialogo* (1583) where he mentions that the ancient Greeks did not beat time 'as is customary now.' In Morley's *Introduction* (1597) we find the following dialogue:

'*Philomathes.* What is a stroke?

'*Magister.* It is a successive motion of the hand, directing the quality of every note and rest in the song, with equal measure, according to the variety of signs and proportions.'

[1] This quotation is from John Dowland's translation (1609); see also Hawkins's *History of Music*

With the decline of polyphonic music and of its rhythmic subtlety the office of time-beater gradually became less necessary, and as the idea of the conductor as interpreter was not yet born, the practice of directing music with the conducting-stick fell into disuse. How and when the change came about is doubtful,[1] but by 1738 it was customary to direct opera performances sitting at the harpsichord. This was at all events the case in Italy, and probably in Germany, though at the Paris opera Rousseau expressly says it was habitual to beat time audibly by striking the baton against the desk.[2] As regards Germany we have Gesner's famous description of Bach [3] to prove that he, at all events, was in the habit of directing music, while he himself played the organ.

According to Carl Junker's pamphlet of 1782 the pianoforte (or 'flügel') was still an integral part of the orchestra, though in one passage he certainly refers to the musical director as a 'time-beater' (*Taktschläger*). However, by the beginning of the 19th century the practice of beating time seems to have been firmly established in Germany, and from that time the art of conducting grew in importance. (See BATON.) Mendelssohn, during his conductorship of the Gewandhaus concerts (1835–43), exercised a great influence over orchestral renderings, and founded the 'Mendelssohn tradition' or the 'elegant school' of conductors, as its enemies called it.[4] This was, in its turn, superseded by the modern school of conductors, which may be said to have been founded by Richard Wagner. The pioneers of the new school were Hans von Bülow, Hans Richter and Hermann Levi. Among their immediate successors were Arthur Nikisch, Fritz Steinbach, Felix Mottl and Felix Weingartner.

The last fifty years have witnessed the growth of 'virtuoso' conducting which has been already described, and of specialisation in conducting; one conductor making a special study of the classical masters, another of Brahms or Tchaikovsky. About 1880 Von Bülow made a tour round Germany with the famous Meiningen Court orchestra, which made a great effect on orchestral playing all over the Continent. These journeys were carried on by his successor, Steinbach, who gave a memorable series of concerts in London in 1902, before retiring from the post of conductor to direct the Cologne Conservatorium.

In France, as we have seen, the practice of conducting never entirely dropped out; but orchestral playing was evidently at a very low ebb in the lifetime of Berlioz, as his memoirs testify. However, the conductor Habeneck achieved the distinction of being the subject of great praise from Wagner.[5] Berlioz's famous *Chef d'orchestre* was published in 1848. In 1874 M. Colonne instituted the 'Concerts du Châtelet,' and in 1881 Lamoureux formed his famous orchestra, which after his death was conducted by Chevillard. Lamoureux's conducting was noticeable for an extreme clearness and precision of detail which is almost unique in the history of orchestral playing.

HISTORY OF CONDUCTING IN ENGLAND.—The following instances in the 18th century of conducting with a stick or roll are noteworthy.

In the English translation of Raguenet, entitled *A Comparison between the French and Italian Musick and Operas*, published in London in 1709, the translator has a footnote (p. 42), which deserves quotation:

'Some Years since the Master of the Musick in the Opera at *Paris* had an Elboe Chair and Desk plac'd on the Stage, where, with the Score in one Hand, and a Stick in the other, he beat Time on a Table put there for that purpose, so loud, that he made a greater Noise than the whole Band, on purpose to be heard by the Performer. By degrees they remov'd this Abuse from the Stage to the Musick Room, where the Composer beats the Time in the same manner, and as loud as ever. The same was observ'd in *London* six or seven years ago; but since the *Italian* Masters are come among us, and the Opera's have been introduced, they have put a stop to that ridiculous Custom, which was Founded more upon an ill Habit than any Necessity there was for it, as doing more harm than good; for the Opera's are better Performed now without it than any Piece of Musick was formerly; because the Eye was too much Distracted, being obliged to mind the beating of the Measure, and the Score at the same time; besides, it kept the Singer and the Player in too much Subjection, and Fear of Errors, by which means they were depriv'd of the Liberty so absolutely necessary to Musick, and which gives a Strength and Spirit to the Notes.'

Samuel Wesley, in a lecture delivered in London in 1827, said:

'I remember that in the time of Dr. Boyce it was customary to mark the measure to the orchestra with a roll of parchment, or paper, in hand, and this usage is yet continued at St. Paul's Cathedral at the musical performances for the Sons of the Clergy.'

The general practice of conducting was revived much later in England, however, than on the Continent. As late as 1820 the concerts of the Philharmonic Society were directed by the joint efforts of the first violin, and a musician seated at the pianoforte, who struck a few notes if anything went amiss. In this year Spohr visited England, and when called upon to direct a Philharmonic concert insisted on doing so with the baton. His own account of the innovation is very instructive, and is worth quoting:

'I took my stand . . . in front of the orchestra, drew my directing baton from my coat pocket, and gave the signal to begin. Quite alarmed at such a novel proceeding some of the directors protested against it. . . . The triumph of the baton as a time-giver was decisive, and no one was seen any more seated at the piano during the performance of symphonies and overtures.' [6]

[1] Lully's misuse of the baton in 1687 is reported to have been the immediate cause of his death (see LULLY). Colasse, Lully's pupil, held an appointment as 'batteur de mesure' (see COLASSE).

[2] See Rousseau, *Dictionnaire de la musique*, s.v. 'Baton,' 'Battre la mesure,' and 'Maître de Musique.'

[3] See Spitta's *J. S. Bach* (Engl. tr. vol. ii. p. 259); also for a very good translation of Gesner's remarks see *John Sebastian Bach* by Sedley Taylor.

[4] See Wagner's *Über das Dirigiren.*

[5] *Ibid.*

[6] Spohr, *Autobiography*, English translation.

In 1855 the Philharmonic orchestra was conducted for one season by Richard Wagner, but this inestimable privilege was not recognised at the time, and Wagner was not engaged again. Indeed, *The Times* of 1860 goes out of its way to say that the season during which Wagner conducted was ' one of the most disastrous on record.' (See ROYAL PHILHARMONIC SOCIETY.)

Mention must be made of two conductors who had a great reputation in England in their lifetime. One was JULLIEN (*q.v.*), who conducted orchestral concerts of the popular kind from 1842–59. Jullien was to some extent a charlatan, but he had genuine ability of a kind, and in some ways foreshadowed the ' virtuoso ' conductor of later times : he also deserves commendation for helping to popularise much good orchestral music. Much more famous than Jullien is Michael COSTA (*q.v.*), who conducted in England from 1833–84. Perhaps the exaggerated respect paid to Costa during his life has caused too violent a reaction since his death. There can be no doubt that he was a very fine band-master, whatever may have been his shortcomings as an interpreter.

Between 1855 and 1860 two more or less permanent orchestras were founded in England, one by August Manns at the Crystal Palace, the other by Charles Hallé in Manchester. (See MANNS; HALLÉ; MANCHESTER.) As a conductor Manns belonged to the school of those who seek to sink themselves in the work they are conducting.[1] What he did for the south of England, Hallé did for the north.

The first series of 'Richter' concerts (London, 1879) is an important landmark in the history of English conducting. Richter revolutionised English ideas as to how classical music should be rendered, and made Wagner intelligible to English audiences for the first time. The advent of Richter may be said to have killed the ' Mendelssohn tradition ' in England.

In 1893 a series of orchestral concerts was given, at which Mottl, Levi and others were specially engaged to conduct. The musical public awoke to the fact that a conductor can play on his orchestra just as a pianist can play on his instrument. The cult of the ' virtuoso ' conductor became as fashionable as that of the prima donna. It is very much to the credit of these conductors who have been so ' ignorantly worshipped ' that they have never let this fashionable flattery affect their musical ideals.

Another important event in the history of English conducting was the formation in 1897 of the QUEEN'S HALL ORCHESTRA, under the conductorship of Henry J. WOOD (*q.v.*). The great reputation of this orchestra, apart from the individual excellence of its members, is due to the training it has received from its conductor; and while he has taught his orchestra Wood has taught himself, and may now be reckoned as a first-rate conductor, not of one style alone, but of all.

Henry Wood was the pioneer of a line of English conductors including Hamilton HARTY, Eugene GOOSSENS, Adrian BOULT. Contemporary with Wood but working on different lines are Landon RONALD and Thomas BEECHAM; also Albert COATES, who formed his experiences in Germany and Russia (see these names). Conducting classes are now established under Wood at the R.A.M. and Boult at the R.C.M. Conducting can, however, only be learnt at the conductor's desk. On the Continent there are many small posts at opera-houses and in concert-rooms through which a young man can gradually rise to the front rank, and obtain an important post as Kapellmeister. In England there are no such means of learning the art, and few appointments to be gained at the end.

There are, however, signs of improvement. The Scottish orchestra, for instance, has done splendid work in the north under the conductorship of Cowen, Landon Ronald and Julius Harrison; at Bournemouth Dan Godfrey has developed the municipal ' Town-band ' into a first-class concert orchestra, and other municipal ventures in the same direction are made from time to time. R. V. W.

CONDUCTING IN AMERICA.—The establishment within the last generation of numerous first-rate orchestras in the principal towns of the United States has favoured the position of conductors in America, who at the present time (1926) are the most highly considered class, and among the most highly paid, of musicians in that country. As in England, a great part of the pioneer work was done by foreigners, but the larger opportunities of the States have enabled it to be done on a much larger scale, and the rapid increase in the number of orchestras still makes the importation of both conductors and players a practical necessity. Nevertheless, since the foundation in 1842 of the PHILHARMONIC SOCIETY OF NEW YORK (*q.v.* under NEW YORK), there has been time for the evolution of a native history in the art of conducting. In this two names stand out with special prominence, Thomas and Damrosch. Although neither Theodore THOMAS (*q.v.*), nor the Damrosch family, father and sons, were born in America, the former arrived in that country at the age of 10, and Walter DAMROSCH (*q.v.*) was still younger when his father, Leopold DAMROSCH (*q.v.*), went there as conductor of the Männergesangverein Arion. Both Thomas and the two younger Damrosches (Frank and Walter), therefore, are to be regarded as American conductors in the sense that their art was developed in the process of building up American institutions which they headed. Thomas founded (1890) the CHICAGO SYMPHONY ORCHESTRA (see under CHICAGO), which bore his

[1] The Crystal Palace Orchestra was disbanded in 1901.

name for many years after his death. Walter Damrosch succeeded his father in conducting the NEW YORK SYMPHONY SOCIETY (see under NEW YORK) which the latter had founded in 1878, and these with the New York Philharmonic, which both were instrumental in establishing, may be considered to be the basis of the wide development which has followed. The BOSTON SYMPHONY ORCHESTRA, no less important than these as a musical institution, is less significant from the point of view of American conducting, because ever since its establishment under Henschel in 1881 it has always engaged distinguished foreigners to conduct it through a term of years. A younger man than any of the above mentioned, who may be regarded as a native product in this connexion, is Leopold STOKOWSKI (*q.v.*). Though Polish by descent and English by upbringing and general musical education, his practical experience as an orchestral conductor was gained in handling American orchestras, and it was he who brought the Philadelphia Orchestra (see PHILADELPHIA) to its present high standing. His art is the outcome of the unique opportunities which the American orchestras offer. C.

BIBLIOGRAPHY

(1) JOHANN MATTHESON: *Der vollkommene Capellmeister* (1739)—not a treatise on conducting, but a course of instruction in music for any one who aspires to become a musical director. The following passage is worth notice as an instructive commentary on conducting as we understand it now: 'How is the tempo of a musical piece to be known? Such knowledge cannot be explained in words; it is the highest perfection of the tonal art' (cf. Wagner).

(2) KARL JUNKER: *Einige der vornehmsten Pflichten eines Kapellmeisters* (1782). Deals with the tuning arrangements and management of an orchestra, questions of tempo, etc. The book contains a disquisition on 'Rubato' conducting.

(3) HECTOR BERLIOZ: (*a*) *Le Chef d'orchestre* (1848). An exhaustive text-book on the art of directing an orchestra, including diagrams to illustrate the various beats; the arrangement of an orchestra; conducting in a theatre, etc. (*b*) *Voyage musical* (No. 3, Letter to Liszt, 1844). Contains an interesting account of an imaginary rehearsal—the gradual growth of order out of chaos. An interesting sentence in relation to the views of Mattheson and Wagner is the following (where Berlioz complains of having to rehearse his works at half-speed): 'Nothing is more terrible for him (the composer) than this slackening of the rhythm.'

(4) RICHARD WAGNER: (*a*) *Über das Dirigiren* (1869). English translation by Dannreuther (1887). The 'New School' of conducting is here set forth for the first time. The works of Beethoven, Mozart and Weber are chosen as models on which to exhibit the new readings. Also very instructive hints on the renderings of some of Wagner's own works. (*b*) Wagner's notes on 'Iphigenia in Aulis' (1854) and on the performance of 'Tannhäuser,' 1852, contains interesting instructions to the conductor (on the other hand the pamphlet on 'The Flying Dutchman,' 1853, is entirely concerned with the principal actors).

(5) FELIX WEINGARTNER: *Über das Dirigiren* (1896—a pamphlet). Not a text-book; it deals with the abuses of 'Tempo rubato' conducting in the hands of incompetent conductors, especially among the would-be imitators of Von Bülow.

(6) M. KUFFERATH: *L'Art de diriger l'orchestre* (1891). A pamphlet consisting chiefly of an account of a rehearsal at Brussels conducted by Hans Richter.

(7) CARL SCHRÖDER (court-conductor at Sondershausen): *A Handbook on Conducting* (English translation, Augener & Co., 1891). A useful text-book.

(8) ADRIAN C. BOULT: *A Handbook on the Technique of Conducting*, gives figures illustrating methods of beating time, and many useful hints on the control of the baton. (London, 1921.) R. V. W.

CONDUCTOR'S PART, a substitute for a full score, in which either the parts are condensed into two staves, and the names of the various instruments are inscribed as they enter (Spohr's D minor symphony was published in this shape only), or, which is more usual, a leading part such as the first violin, on a single stave, is fully cued for the other instruments.

CONDUCTUS, a form of composition employed in the late 12th and the 13th centuries, the distinguishing feature of which was that the tenor or canto fermo was not derived from the plain-song of the church, but was an original theme, or in some cases a popular melody, in triple measure, to which one or more parts were added by way of discant. The earliest definition that has come down to us is that given in the Discantus Positio Vulgaris (Coussemaker, *Scriptores*, i. 96):

'Conductus est super unum metrum multiplex consonans cantus, qui etiam secundarias recipit consonantias.'

The word 'multiplex' here does not necessarily imply a composition in more than two parts. The primary consonances are the unison, octave, 5th, 4th and major and minor 3rd. The secondary consonances are the 15th, 12th, 11th and major and minor 10th (see Coussemaker, i. 362 *b*). At a later date the major and minor 6th and 13th and occasional passing discords were admitted (*ib.* iii. 361 *b*, iv. 212, 278, 294 *b*). Franco tells us that the *modus operandi* in the conductus differed from that in all other forms of discant (cantilena, rondellus, motetus, organum):

'quia in omnibus aliis primo accipitur cantus aliquis prius factus qui tenor dicitur, eo quod discantum tenet, et ab ipso ortum habet. In conductis vero non sic, sed fiunt ab eodem cantus et discantus.'

(Coussemaker, i. 130 *b*), and again:

'Qui vult facere conductum primum cantum invenire debet pulchriorem quam potest, deinde uti debet illo ut de tenore faciendo discantum.'

(*ib.* 132 *b*).

Walter of Odington, after defining Rondellus as a form of discant in which 'quod unus cantat, omnes per ordinem recitent,' adds:

'Si vero non alter alterius recitat cantum, sed singuli procedunt per certos punctus, dicitur Conductus, quasi plures cantus decori *conducti*':

and he subsequently tells us:

'Conducti sunt compositi ex plicabilibus canticis decoris *cognitis vel inventis* et in diversis modis ac punctis *iteratis* in eodem tono vel in diversis.'

(Coussemaker, i. 245 *b*, 247 *a*), which points to a repetition of the subject in varied form and with varied discant. From Franco and others we learn that words were not sung in all parts of the conductus, for this is probably the meaning of the somewhat ambiguous expression 'cum littera et sine.' The compositions identified as conductus in MS. Plutarch, 29, 1 of the Laurentian Library at Florence have words written below the tenor part only; the short example given by Odington has no text.

The author of the early anonymous treatise in the British Museum, printed at p. 327 of Coussemaker's first volume, speaks of conductus simplices, duplices and triplices, and gives the titles of specimens of each sort composed by the great Perotin himself. In 1898 these compositions were identified by Dr. Wilhelm Meyer of Göttingen in the Laurentian manuscript mentioned above, and Professor Wooldridge has now transcribed and printed

several of them in the first volume of the *Oxford History of Music.*

The conductus appears to have fallen into disuse by the middle of the 14th century, for we find Johannes de Muris soon afterwards complaining that only motets and cantilenæ are heard nowadays, and deploring the loss of the

'conductos cantus ita pulchros in quibus tanta delectatio est, qui sunt ita artificiales et delectabiles duplices, triplices et quadruplices.'

For a fuller account of this interesting early musical form the reader is referred to the *Oxford History of Music*, vol. i. *The Polyphonic Period*, pp. 245-318. J. F. R. S.

CONFALONIERI, Giulio Melian (*b.* Milan, 1896), composer. He studied at Milan with Pozzoli, but concluded his musical training at Bologna with Alfano (1921). He is also a doctor of letters and philosophy of Milan University. His symphonic poem 'Una notte sul monte Imetto,' performed at Milan and Bologna (1921), had a flattering reception in both places. In London he became known with the performance of the first piano and violin sonata by the Contemporary Music Section of the B.M.S. The sonata was written in 1919 and is published by Messrs. Sonzogno. A second sonata has not yet been published. The easy charm and distinction of his work won the admiration of Thomas Beecham, who entrusted Confalonieri with the incidental music to Fletcher's 'Faithful Shepherdess.' Other works published are :

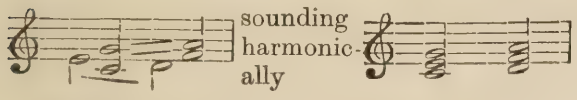
Two Piano Preludi al mattino (1920).
Songs : 4 Melodie per Cloti (1920).
Peasant Dance (1923). F. B.

CONFORTO, Giovanni Luca (*b.* Mileto : *c.* 1560), a Calabrian, admitted into the Papal Choir, Nov. 4, 1591.

His chief title to notice seems to have been the publication of a volume (*Passaggi sopra tutti i salmi*), containing a series of vocal ornamentations of all kinds wherewith to overlay the Psalms in ordinary use in the church on Sundays and holidays throughout the year. Baini ascribes to him what he considers the restoration of the 'trillo.' (See Ornaments, Vocal.) E. H. P.

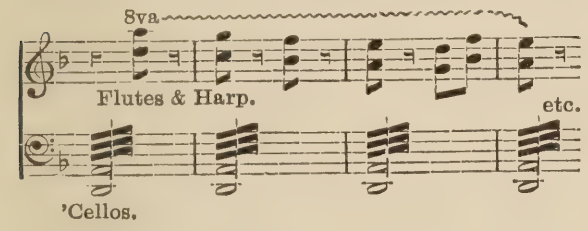
His *Breve et facile maniera d' essercitarsi a far passaggi*, published in Rome (1593 or 1603), have been republished in facsimile with translation by Dr. Johannes Wolf (Berlin, 1922). (See *Z.M.W.*, Apr. 1923, p. 391.)

CONRADI, August (*b.* Berlin, June 27, 1821; *d.* there, May 26, 1873), studied harmony and composition under Rungenhagen.



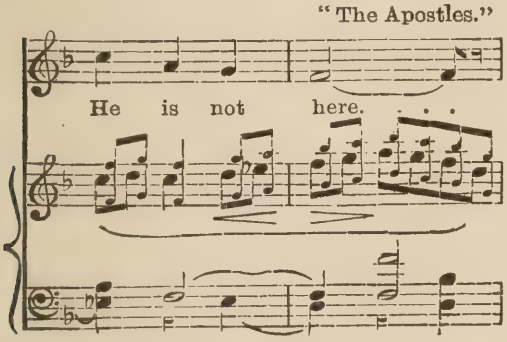
In 1843 he was appointed organist of the Invalidenhaus at Berlin, and produced a symphony ; in 1847 an opera, 'Rübezahl,' was given at Berlin. In 1849 he was Kapellmeister at Stettin, and conductor successively at the Königstadt Theatre in Berlin (1851), at Düsseldorf, Cologne, and from 1856 again in Berlin at various theatres, such as Kroll's, the Wallnertheater and Victoriatheater. In 1855 his 'Musa der letzte Maurenfürst' was performed at Berlin. His other compositions include five symphonies, overtures, string quartets, dance music for pianoforte and orchestra, and a quantity of Lieder. M. C. C.

CONRADI, Johann Georg, Kapellmeister at Öttingen in Bavaria towards the end of the 17th century, one of the earliest composers of German opera. He produced successfully at the Hamburg Theatre 'Ariane' (afterwards added to by Reinhard Keiser and reproduced in 1722 as 'Ariadne'), 'Diogenes,' and 'Numa Pompilius' in 1691 ; 'Karl der Grosse' and 'Jerusalem' (1692) ; 'Sigismund,' 'Genserico,' and 'Pygmalion' (1693). A number of MS. compositions for the church are mentioned in *Q.-L.* M. C. C.



CONRAD VON ZABERN (*b.* Zabern, Alsace), a 15th-century Mag. Theol., preacher at Heidelberg *c.* 1470, and professor at the university, where he lectured on music. He wrote an essay on the use of the monochord, *Incipit opusculum valde singulare*, printed with the Bible types of Joh. Fust and Peter Schöffer, Mayence, *c.* 1473 ; and one, *De modo bene cantandi choralem cantum* . . . printed by Schöffer, 1474 ; another edition of this by Diel appeared in 1509. E. v. d. S.

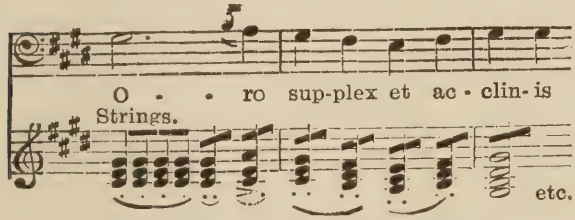
CONSECUTIVE, the term applied to intervals which recur between the same parts or voices, but more especially to consecutive fifths and octaves for long condemned by theorists on æsthetic grounds. Sir Hubert Parry explained the objection to consecutive octaves, when employed in music the part-writing of which is clearly defined, by saying that the effect of number in the parts variously moving is pointlessly and inartistically reduced. This is owing to the sense of identity which appears to us when the upper notes reinforce the most prominent harmonics of the lower. Consecutive fifths are in a somewhat different category. There is no identity here of reinforced harmonics, whatever reinforcement there is, is of the third harmonic of the lower notes but sounded an octave lower, and the similar motion of the progression only serves to make more pronounced the peculiar effect of bareness in quality, penetrative power and suggestion of definite tonality which the simultaneous sounding of two notes at the interval of a fifth creates. This effect was felt to be out of place in music of the classical type ; it was too obtrusive and was apt to destroy the characteristic clarity and subtlety of part-writing and tonal scrupulousness. It was therefore a common practice to avoid such consecutives altogether. That the effect was directly due to the similar progression of parts rather than of sounds is shown by the following example



where ' consecutives ' are avoided by the parts being made to cross.

Modern practice has definitely sought to make use of the effect produced by consecutive fifths and in various ways. At the opening of the third act of ' La Bohème ' Puccini writes:

ingeniously and aptly creating a cold, grey atmosphere. This is analogous to the ' colouring ' of a melody by accompanying it by itself at an interval of a fifth or fourth as Elgar has done in ' The Apostles ':



Another device much used by Debussy and other French writers is to support harmonies, whether closely related or not, by the fundamental bass with the fifth added. See also Ravel's sonatina for piano for many delicate effects of a similar kind; also under HARMONY, (3). The development and condensation of traditional harmonic values.

It is interesting to quote two much earlier uses of consecutive fifths. Wagner writes in ' Tristan und Isolde ':

and Verdi in his Requiem:

In musical training the avoidance of consecutive fifths and octaves in part-writing still remains essential if a sure command over chord manipulation and contrapuntal freedom is to be obtained. N. C. G.

CONSERVATOIRE DE MUSIQUE, a free school of music, established in Paris by the Convention Nationale, Aug. 3, 1795. Its first suggestion was due to a horn player named Rodolphe, and the plan which he submitted to the minister Amelot in 1775 was carried into effect on Jan. 3, 1784, by Baron Breteuil, of Louis XVI.'s household, acting on the advice of Gossec. This École Royale de Chant, under Gossec's direction, was opened Apr. 1, 1784, in the Hôtel des Menus-Plaisirs du Roi, then used by the Académie for its rehearsals. It remained there as Conservatoire until the end of 1910; at the beginning of 1911 it was moved to 14 Rue de Madrid, formerly occupied by Jesuits as a College.

The first public concert was given Apr. 18, 1786, and on the addition of a class for dramatic declamation in the following June it adopted the name of ' École Royale de Chant et de Déclamation Lyrique.' The municipality engaged a band under Bernard Sarrette in 1790, and instituted on June 9, 1792, the École Gratuite de Musique de la Garde Nationale Parisienne, which did good service under Sarrette's skilful direction, and finally took the name of Institut National de Musique, Nov. 8, 1793. But the independent existence of both these schools came to an end on the formation, by Government, of the Conservatoire de Musique, Aug. 3, 1795, in which they were incorporated. Sarrette was shortly afterwards appointed president of the institution, and in 1797 his charge extended to 125 professors and 600 pupils of both sexes, as well as to the printing-office and warehouse established at 15 Faubourg Poissonnière, where the ' Méthodes du Conservatoire,' prepared under the supervision of Catel, Méhul, Rode, Kreutzer and other eminent professors, were published. The organisation of the Conservatoire was modified by Bonaparte in Mar. 1800, after which the staff stood as follows:

Director: Sarrette. Five Inspectors of Tuition: Gossec, Méhul, Lesueur, Cherubini and Monsigny. Thirty first-class Professors: Louis Adam, Berton, Blasius, Catel, Devienne, Dugazon, Duvernoy, Garat, Gaviniés, Hugot, Kreutzer, Persuis, Plantade, Rode, Rodolphe, Sallentin, etc. Forty second-class Professors; Adrien, Baillot, Boieldieu, Domnich, Eler, Jadin, etc.

The Conservatoire was again reorganised Oct. 15, 1812, by the famous Décret de Moscou, under which eighteen pupils, nine of each sex, destined for the Théâtre Français, received an annual allowance of 1100 francs, on the same footing with the Pensionnaires—eighteen vocal students, twelve male and six female. This Pensionnat had been established in 1806, but the men alone lived at the Conservatoire. It was abolished in 1870.

On Dec. 28, 1814, Sarrette was abruptly dismissed from the post he had filled with so much

zeal and talent, and though reinstated on May 26, 1815, was compelled to retire finally on the 17th of the following November. The studies were interrupted for the time, and the school remained closed until Apr. 1816, when it reopened under its former title of École Royale de Musique, with Perne as Inspector-General. Cherubini succeeded him Apr. 1, 1822, and remained until Feb. 8, 1842, when he was replaced by Auber, who directed the Conservatoire until his death, May 12, 1871. He was followed by Ambroise Thomas, 1871–96; Théodore Dubois, 1896–1905; Gabriel Fauré, 1905–20; Henri Rabaud (appointed Oct. 1, 1920), the present (1926) director.

The budget originally amounted to 240,000 francs, but this in 1802 was reduced to 100,000, a fact indicative of the grave money difficulties with which Sarrette had to contend through all his years of office, in addition to the systematic opposition of both artists and authorities. By the publication of the *Méthode du Conservatoire*, however, to which each professor gave his adherence, he succeeded in uniting the various parties of the educational department on a common basis. Amongst the savants of the institution who assisted in this work were Ginguené, Lacépède and Prony. Under Sarrette the pupils were stimulated by public practisings; to him is also due the building of the old library, begun in 1801, and the inauguration of the theatre in the Rue Bergère, 1812. In the same year he obtained an increase of 26,800 francs for the expenses of the Pensionnat; and the institution of the 'Prix de Rome' in 1803, which secured to the holders the advantage of residing in Italy at the expense of Government, was his doing.

Under Perne's administration an 'École Primaire de Chant' was formed, Apr. 23, 1817, in connexion with the Conservatoire, and directed by Choron. The inspectorship of the École de Musique at Lille was given to Plantade. In 1810 it adopted the title of 'Conservatoire Secondaire de Paris,' in which it was followed by the École at Douai, no longer in existence. The formation of special classes for lyrical declamation and the study of opera parts was also due to Perne.

Cherubini's strictness of rule and his profound knowledge made his direction very favourable for the progress of the Conservatoire. The men's pensionnat was reorganised under him, and the number of public practices, which all prize-holders were forced to attend, increased in 1823 from six to twelve. The École de Musique founded at Toulouse in 1820 was attached to the Conservatoire (1826), as that of Lille had previously been. He opened new instrumental classes, and gave much encouragement to the productions of the 'Société des Concerts du Conservatoire.' By his means the library acquired the right to one of the two copies of every piece of music or book upon music which authors and composers are compelled to deposit with the Ministre de l'Intérieur (Mar. 29, 1834). In short, during his long administration he neglected no means of raising the tone of the studies of the Central Conservatoire, and extending its influence. The following were among his principal coadjutors:

Habeneck and Paer, inspectors of tuition; Lesueur, Berton, Reicha, Fétis, Halévy, Carafa, composition; Lainé, Lays, Garat, Plantade, Ponchard, Banderali, Bordogni, Panseron, Mme. Damoreau, singing; instrumental classes—Benoist, the organ; Louis Adam and Zimmerman, piano; Baillot, Kreutzer, Habeneck, violin; Baudiot, Norblin, Vaslin, violoncello; Guillou, Tulou, flute; Vogt, oboe; Lefèvre, Klosé, clarinet; Delcambre, Gebauer, bassoon; Dauprat, Meifred, horn; Dauverné, trumpet; Dieppo, trombone; Naderman, Prumier, harp; Adolphe Nourrit, the opera; Michelot, Samson, Provost, and Beauvallet, professors of tragedy and comedy.

Amongst the professors appointed by Auber we may mention:

Adolphe Adam, Ambroise Thomas, Reber, composition; Elwart, Bazin, harmony; Battaille, Duprez Faure, Garcia, Révial, Masset, singing; Madame Farrenc, Henri Herz, Marmontel, Le Couppey, piano; Alard, Girard, Massart, Ch. Dancla, violin; Franchomme and Chevillard, violoncello.

Classes for wind instruments:

Tulou, Dorus, flute; Verroust, oboe; Willent, Cokken, bassoon; Gallay, Meifred, horn; Forestier, Arban, cornet; Mlle. Brohan, MM. Regnier, Monrose, Bressant, professors of comedy.

The débuts under Auber's management were most brilliant, and he drew public attention to the Conservatoire by reviving the public practices. The façade of the establishment in the faubourg Poissonnière was rebuilt in 1845, and in 1864 the building was considerably enlarged, and those in the Rue du Conservatoire inaugurated, including the hall and offices of the theatre, the museum and library.

But notwithstanding the growing importance of the Conservatoire under Auber's strict and impartial direction, the last years of his life were embittered by the revival of the office of 'Administrateur' in the person of Lassabathie, a former 'chef du Bureau des Théâtres,' and the appointment of a commission in 1870 to reorganise the studies—a step in which some members foresaw the ruin of the school. Lassabathie published his *Histoire du Conservatoire impérial de Musique et de Déclamation* (Paris, 1860), a hasty selection of documents, but containing ample details as to the professorial staff.

During the regime of Ambroise Thomas, the office of 'Administrateur' was suppressed; lectures on the general history of music were instituted; an orchestral class directed by Deldevez, and compulsory vocal classes for reading at sight were founded, and the solfeggio teaching was completely reformed. Ambroise Thomas endeavoured to improve the tuition in all its branches, to raise the salaries of the

professors, and increase the general budget. Amongst the musical professors under the directorship of Th. Dubois may be mentioned: Lenepveu, Widor, Fauré (composition, counterpoint and fugue); Bourgault-Ducoudray (musical history); Mme. Rosa Caron, Jean Lassalle, Warot, Dubulle (singing); G. Marty (vocal ensemble); Al. Guilmant (organ and improvisation); Diémer, Philipp, Delaborde, Duvernoy, Marmontel (piano); Lefort, Berthelier (violin); Taffanel (flute).

Under G. Fauré's leadership: Widor, P. Vidal, Gédalge, Caussade (composition, counterpoint and fugue); M. Emmanuel (musical history); H. Büsser (vocal ensemble); E. Gigout (organ and improvisation); Paul Dukas replaced by Vincent d'Indy (orchestral and conducting class); Diémer, Philipp, A. Cortot (piano); Lefort, Remy, Nadaud (violin); Loeb (violoncello).

Since 1920 the staff of professors has altered only in detail occasioned by deaths, etc. There are about 90 teachers in all. A yearly *Annuaire officiel du Conservatoire National de Musique et de Déclamation* (Maurice Senart, Paris) gives the names of all the teachers and the general regulations of the establishment, as well as the list of branch schools of the Conservatoire and of the 'Écoles nationales de Musique.'

The Chief Council of Instruction is formed of the Minister of Public Instruction and Fine Arts, the Director of Fine Arts, the Director of the Conservatoire, the 'Chef du Bureau des Théâtres,' the Secretary of the Conservatoire. They are assisted (for the musical section) by a body of 18 members, 10 of whom do not belong to the Conservatoire and 8 of whom are professors there; a similar arrangement exists for dramatic studies with, however, only 2 professors belonging to the school.

The Conservatoire provides free musical and dramatic instruction for upwards of 600 pupils and 'auditeurs,' who, besides their regular studies, have the advantage of an extensive library and a museum of musical instruments.

The library has been moved into a building specially built for the purpose. It dates from the foundation of the school itself and is open to the public daily from 10 to 4. The first librarian, Eler, was followed by Langlé (1796–1807), the Abbé Roze (1807–20), Perne (1820–1822), Fétis (1827–31), Bottéede Toulmon (1831–50), Berlioz (as conservateur 1839–50, and as librarian 1852–69), Félicien David (1869–76), Weckerlin (1876–1909), J. Tiersot (1909–20), H. Expert (1920).

The library contains over 22,000 scores, 850 instrumental 'methods,' 550 treatises on harmony, composition, fugue, etc. The solfeggio, plain-chant and singing methods number 5000 volumes; there are 3000 volumes of musical literature. The number of works is increased constantly by means of a special grant. It also possesses a considerable number of manuscripts and autographs, to which those of the Prix de Rome were added in 1871. This collection contains the autographs of all the prize cantatas since the foundation of the Prix de Rome (*q.v.*) in 1803. Amongst the other important collections are those of Eler, composed of works of the 16th and 17th centuries put into score; of Bottée de Toulmon, comprising 85 volumes of MS. copies of the *chefs-d'œuvre* of the 14th, 15th and 16th centuries from Munich, Vienna and Rome, including all Palestrina's masses. In 1872 the library was further enriched by Schœlcher's collection, containing every edition of Handel's works and a vast array of Handel-literature. Amongst the extremely rare works are:

El Melopeo by Cerone; treatises by Agricola, Luscinius, Praetorius, Mersenne; several editions of Gafori; *Il Transilvano* by Diruta; original editions of most of the old clavecinists; *L'Orchésographie* of Thoinot Arbeau; the 'Ballet Comique de la Reine'; the *Flores musice* of 1488; old missals and treatises on plain-chant.

(See Libraries of Music.)

The museum, inaugurated 1861, now in the same building as the library, is open to the public on Mondays and Thursdays from 1.30 to 4. At first it merely contained the 230 articles which the Government had purchased from Clapisson (the first 'Conservateur') in 1861, and 123 musical instruments transferred from the Garde Meuble and other State institutions, or presented by private donors. On the appointment of Gustave Chouquet, Sept. 30, 1871, the number of objects did not exceed 380, but it now possesses 700 instruments and objects of art of the greatest interest. He was succeeded as Conservateur du musée by Léon Pilhaut (*d.* Jan. 1, 1904). His successor is René Brancour. A full historical catalogue was published by M. Chouquet (see Bibliography below).

There are affiliated schools of music (Écoles succursales) at Dijon (dir. L. Dumas), Lille (dir. Ratez), Lyons (dir. Witkowski), Nancy (dir. Bachelet), etc. In 1871 Henri Reber succeeded Ambroise Thomas as inspector of these provincial schools; then came E. Reyer, with MM. Lenepveu, Joncières, H. Maréchal, Canoby and G. Fauré, as assistant inspectors. The present (1926) Inspector-General is Alfred Bruneau; the other inspectors are the composers P. V. de la Nux, and P. Dukas.

G. C.; rev. M. L. P.

CONSERVATORIO. The Conservatori in which the great schools of Italian music were formed were so called because they were intended to preserve (*conservare*) the science of music from corruption. Of these the most ancient were the four Neapolitan schools, Santa Maria di Loreto, San Onofrio, De' Poveri di Gesù Cristo, and Della Pietà de' Turchini, which all sprang from the first school of music

founded at Naples before 1490 by Jean Tinctor, a Fleming, reconstituted by Gesualdo, Prince of Venosa, and Alessandro Scarlatti, and illustrated by a long roll of eminent musicians. (See NAPLES and TINCTORIS.)

The Conservatori of Venice arose out of the school founded by another Fleming, Willaert, at the same date with that of Naples, and were also four in number: L' Ospedale della Pietà, dei Mendicanti, degl' Incurabili, L' Ospedaletto de' SS. Giovanni e Paolo. (See VENICE.) Nor does this list include the various 'chapel schools' of music for the choirs of the great cathedrals, after the pattern of the musical school founded in the 6th century by Gregory the Great for the Pontifical Chapel at Rome, the archives of which were destroyed in the sack of Rome by Charles V. 1527. (See ROME.)

The Venetian Conservatori have ceased to exist, those of Naples are now represented by a Royal Neapolitan College, and there is a 'Reale Conservatorio di Musica' extant and flourishing at Milan.

The other schools of importance will be found under the names of the cities to which they belong, except the Conservatoire of Paris, described under CONSERVATOIRE, and the schools of London, for which see GUILDHALL SCHOOL, ROYAL ACADEMY, ROYAL COLLEGE, and TRINITY COLLEGE. C. M. P.

CONSOLE, the manuals, drawstops, pedals, and accessories of the organ, taken as a whole, and as distinct from the actual pipes and bellows.

CONSONANCE. The term consonance is used in music to denote the pleasing effect produced when the notes forming one of certain groups are sounded together. Such groups are the fourth, the fifth, the major triad, etc.

The term is also occasionally less correctly used to denote the group of notes which give consonance. Thus the fifth, for instance, is sometimes called a consonance. It is more correct to call it a consonant interval.

The pairs of notes within the limits of an octave which form consonant intervals are given below with the ratios of the vibration numbers of the two notes forming each interval. It will be seen that in each case the ratio can be expressed by two small whole numbers.

It is a general rule that the smaller the numbers which define the vibration ratio of two notes, the smoother will be the effect when the notes are sounded together.

Octave 1 : 2	Minor Third 5 : 6
Fifth 2 : 3	Major Sixth 3 : 5
Fourth 3 : 4	Minor Sixth 5 : 8
Major Third 4 : 5	

J. W. C.

CONSORT, a term used in the 16th and 17th centuries in a sense very similar to the modern use of the French word *ensemble*. A consort of instruments was any group playing together; their performance was also their 'consort,' as in Milton's lines,

'Till God ere long
To His celestial consort us unite.'

In the former sense a consort was described as 'whole' when it consisted of instruments of like kind, *e.g.* viols, ranging from treble to bass; a 'broken' consort was one in which instruments of different types, *e.g.* wind and string, were joined. Thus the 'In Nomines' and Fancies for viols were music for a whole consort (cf. CHEST OF VIOLS), while Morley's 'Consort Lessons' (1599) for treble lute, pandora, cittern, bass viol, flute and treble viol afford a good example of the broken consort. C.

CON SPIRITO, see SPIRITOSO.

CONSTANTIN, LOUIS (*b. circa* 1585; *d.* Paris, Oct. 1657), violinist and 'Roy des violons,' one of the best of the virtuosi of the early French school. Mersenne mentions him with praise.[1] He was a composer and performer, and took part, while still a youth, in the music of Louis XIII. He succeeded his friend Richomme, Dec. 12, 1624, in the post of 'Roy des violons,' which gave him authority over the whole body of minstrels and players. He held this post until his death, after which it passed to Guillaume Dumanoir. One of his sons, JEAN CONSTANTIN, was violinist-in-ordinary to the court of Louis XIV. Another Constantin, possibly his grandson, was an oboe-player at the court in 1708.

BIBL.—ER. THOINAN, *Louis Constantin, roi des violons* (*Chronique musicale*, vol. xi. Paris, 1876). M. P.

CONSTRUCTION, the writing of a piece of music according to an appreciable plan.

The element of construction is most important in instrumental music, where there is no accessory interest to keep the mind engaged. In all music connected with words the definiteness of construction must yield to the order of the language, and be dependent on what it expresses for the chief part of its effect; but in instrumental music it would be impossible for the mind to receive a satisfactory impression from a work which was purely continuous, and had no such connexion between its parts as should enable the hearer to refer from one part to another, and thereby assist his attention. The only manner in which the sense of proportion and plan, which is so important in works of art, can be introduced into music is by repetition of parts which shall be distinctly recognised by the rhythm and order of succession of their notes, and are called the subjects. And the construction of a fine movement is like that of a grand building in which the main subjects are the great pillars upon which the whole edifice rests, and all the smaller details of ornamentation are not just an irregular medley of ill-assorted beauties, but being reintroduced

[1] *Harmonie universelle*, 1636, iv. 101.

here and there, either simply or disguised with graceful devices, give that unity and completeness to the general effect which the absence of plan can never produce. As instrumental music grows older new plans of construction are frequently invented, especially in small lyrical pieces, which imitate more or less the character of songs, or represent some fixed and definite idea or emotion, according to the supposed order or progress of which the piece is constructed. In small pieces for single instruments originality of plan is generally an advantage; but in large forms of instrumental composition it is most desirable for the general plan to be to a certain extent familiar, though it is on the other hand undesirable that it should be very obvious. The former strains the attention too heavily, the latter engages it too slightly. An account of the plans most generally used for such large instrumental works as symphonies, concertos, overtures, sonatas, etc., will be found under their own headings, and from a more generalised point of view in the article FORM.

C. H. H. P.

CONTES D'HOFFMANN, opera in 4 acts, text by Barbier, music by Offenbach; produced, Opéra-Comique, Feb. 10, 1881; Adelphi Theatre (in German), Apr. 17, 1907; in English, His Majesty's Theatre (Beecham), May 12, 1910. The music was finally revised and partly orchestrated by Guiraud.

CONTI, CARLO (*b.* Arpino, Oct. 9, 1796; *d.* Naples, July 10, 1868), a pupil of Tritto and Zingarelli; counterpoint professor at Naples Conservatoire, 1846; deputy director for Mercadante (who became blind), 1862. He composed 11 operas, mostly very successful. Of an opera, 'Jane Shore,' adapted from Rowe's tragedy, and performed at the Scala Theatre, Milan, in 1830, only the 2nd act met with success. For the Church he wrote 6 masses, 2 Requiems and other compositions. Fil. Marchetti and Fr. Florimo are among the number of his pupils. E. v. d. S.

CONTI, see GIZZIELLO.

CONTI, (1) FRANCESCO BARTOLOMEO (*b.* Florence, Jan. 20, 1681; *d.* Vienna, July 20, 1732), eminent theorbist and dramatic composer, appointed court-theorbist at Vienna in 1701.

He resigned in 1705, but was reappointed theorbist in 1708, with the additional post in 1713 of court-composer. From this time he devoted himself with marked success to the composition of operas, especially the higher kind of comic operas. His best work was the tragi-comic opera 'Don Chisciotte in Sierra Morena,' which is a model of its kind for the clear delineation of each separate character. It was performed first at the Carnival of 1719 in Vienna, and afterwards (1722) at Hamburg, in German. His first opera, 'Clotilde' (Vienna, 1706), was produced in London (1709), and the songs published separately by Walsh. Conti's cantatas and oratorios are solid and thoughtful. The catalogue in *Q.-L.* comprises 16 grand operas, 13 serenades or 'Feste teatrali,' and 9 oratorios, the scores of which are to be found almost entire in the Imperial Library and in the archives of the Gesellschaft der Musikfreunde at Vienna. Mattheson, in his *Vollkommene Kapellmeister* (1739, p. 40), casts a grave slur on Conti's character through a confusion between him and his son Ignaz. The mistake was corrected by Quantz in Marpurg's *Historisch-kritische Beyträge* (1754, vol. i. p. 219), and by Gerber in his *Neues Lexicon*, but Fétis maintained the authenticity of the anecdote in the *Revue musicale* (1827, No. 3), and even repeated it in his *Biographie universelle* after the real facts had been made known by Molitor in the *A.M.Z.* (1838, p. 153).

(2) The younger Conti, IGNAZ (*b.* 1699; *d.* Mar. 28, 1759), whom Fétis is uncertain whether to call the son or the brother of Francesco, was really his son. He held the post of Hof-scholar from 1719 up to the time of his death, and composed several serenades and oratorios which bear no traces of his father's ability. C. F. P.

CONTINUO, the short for BASSO CONTINUO, the Italian equivalent for THOROUGH-BASS (*q.v.*).

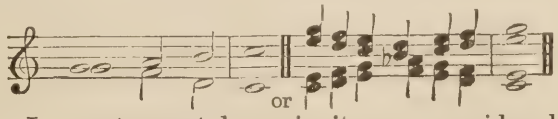
CONTRA, a prefix of which the musical meaning is 'an octave below.'

CONTRABASS CLARINET, see CLARINET (5).

CONTRABASSO, the Italian for DOUBLE BASS (*q.v.*). (See also BASS (2).)

CONTRABASS POSAUNE, see TROMBONE.

CONTRABASS TUBA, see TUBA.



CONTRA-FAGOTTO, see BASSOON (2).

CONTRALTO or ALTO (*contra*, or counter to the alto part in choral writing: see ALTO), the term used to denote the lowest of the three principal varieties of women's voices, the others being SOPRANO (*q.v.*) and MEZZO-SOPRANO (*q.v.*). Although the compass of the contralto voice may sometimes have a range of two and a half octaves from E upwards, it is the peculiarly rich and weighty quality of the lower register which gives it its character.

CONTRALTO BUGLE, the soprano SAXHORN in B♭.

CONTRAPUNTAL is properly that which is written according to the rules of strict Counterpoint. (See COUNTERPOINT.)

CONTRARY MOTION, the progression of parts in opposite directions, one or more ascending while the other or others descend, as—

In contrapuntal music it was considered

preferable to similar or oblique motion, and it always has a stronger and more vigorous character than either of these. Many conspicuous examples of its use in modern music may be found, as for instance in the slow movement of Beethoven's Symphony in C minor—

Passing notes are allowed to progress continuously by contrary motion until they arrive at notes which form a part of some definite harmony (*), as—

from the first movement of Beethoven's Sonata in B♭, op. 106. C. H. H. P.

CONTREDANSE (Engl. *country-dance*; Ger. *Contretanz*), a dance of English origin, replacing in popular favour the branle, which was in great vogue in France during the 18th century until the reign of the quadrille. The 'Suites de danses de bals du roi' (Ballard, 1699) contain 17 'contredanses anglaises.' It was also introduced into French stage-music, *e.g.* in Dauvergne's 'Les Trocqueurs' (1753) in the final ballet. The music to the contredanse is of a lively character; it is written either in 2–4 or in 6–8 time, and consists uniformly of eight-bar phrases, each of which is usually repeated. The name is a corruption of the English Country Dance (*q.v.*). Beethoven has written 12 contredanses for orchestra, from one of which he developed the finale of his 'Eroica' symphony. Mozart has also left a large number of specimens of this class of composition. A series of 5 or 6 contredanses forms a Quadrille (*q.v.*). E. P.; M. L. P.

CONVERSE, Frederick Shepherd (*b.* Newtown, Mass., U.S.A., Jan. 5, 1871), American composer, was educated in the public schools of his native town and began the study of piano under local teachers. His father intended him to make a commercial career, but his musical inclinations prevailed. He entered Harvard University in 1889 and took the musical courses under Prof. John Knowles Paine. He was graduated in 1893 with highest honours in music, and at this time his first work, a sonata for violin and piano, was performed.

Converse, after graduation, endeavoured to carry out his father's ideas, but a few months in an office proved that this was not his province. Having determined to become a professional musician, he pursued his studies under Carl Baermann, an eminent Boston pianist, and in composition with George Chadwick (*q.v.*). Subsequently he went to Europe and studied in the Royal School of Music in Munich, from which he was graduated in 1898 with honours in composition. His D minor symphony was produced at this time. On returning to America Converse settled again in Boston, where he taught harmony in the New England Conservatory, 1899–1901. Then till 1904 he was instructor in composition in Harvard University, and from 1904–07 assistant professor of music there. In 1907 he resigned in order to devote himself entirely to composition. Converse's earliest works showed the influence of his orthodox Munich training, but with his 'Festival of Pan' he made his departure toward the modern romantic style. Walt Whitman's poetry liberated him from formal traditions, and his 'Mystic Trumpeter,' regarded by most American commentators as his best composition, disclosed his eager search for imaginative delineation and dramatic expression. Converse is a composer of independent methods and large technical skill.

The following is a list of his works:

Orchestral: Overture, 'Youth,' 1897; Symphony, D minor, 1898; Festival March, 1900; 'The Festival of Pan,' 1900; 'Endymion's Narrative,' tone poem, 1903; 'Euphrosyne,' overture, 1903; 'Night' and 'Day,' tone poems for piano and orchestra on verses by Walt Whitman, 1905; 'The Mystic Trumpeter,' tone poem, 1905; 'Ormazd,' tone poem, 1912; 'Ave atque Vale,' tone poem, 1917; symphony in C minor, 1920; symphony in E major, 1922; 'Song of the Sea,' tone poem, 1924.

Operas: 'The Pipe of Desire,' 1906; 'The Sacrifice,' 1911.

Choral: 'Job,' dramatic poem for soloists, chorus and orchestra, written for the 50th anniversary of the Worcester (Mass.) Festival, 1907. Psalm for male chorus, brass instruments and orchestra, for the dedication of the new buildings of the Harvard Medical School, 1906; 'Masque of St. Louis,' 1914.

Miscellaneous: 'La Belle Dame sans Merci,' ballad for baritone and orchestra, 1903; string quartets in E flat, 1902; and A minor, 1904; overture, entr'actes and incidental music to 'Jeanne d'Arc,' play by Percy Mackaye, 1906; pianoforte pieces and songs.

W. J. H.

CONVERSI, Girolamo (*b.* Correggio about middle of 16th cent.), known as the author of the following works: Canzoni a 5 voci; Venice, G. Scotto, 1572; reprinted by the same publisher in 1573, 1575, 1578, 1580, 1585 and 1589; Madrigali, a 6 voci, lib. 1; Venice, 1584; *ibid.* in 4to. Conversi is familiar to English amateurs through his fine Madrigal, 'When all alone my pretty love was playing.' E. H. P.

COOK, Thomas Aynsley (*b.* London, July 1836 or 1831; *d.* Liverpool, Feb. 16, 1894), operatic bass. His father was an engraver living in Cornhill, and as a boy he had a fine soprano voice, which was trained by Edward Hopkins of the Temple. Developing into a powerful bass, he went to Germany and studied under Staudigl and other good teachers for five years, and sang at several Bavarian theatres. He made his début in England at the Theatre Royal, Manchester, in 1856, and was successful in leading bass parts of operas by Meyerbeer, Weber, Benedict, Balfe, and Wallace, which he sang with the 'National

English Opera' headed by Mme. Lucy Escott. For three years he then toured with that prima donna in the United States, and on his return sang with the Pyne and Harrison troupe, besides appearing once with Grisi at Liverpool as Oroveso in 'Norma.' In the 'seventies he made a name for himself in London in the opéra-bouffes of Offenbach ('Grande Duchesse' and 'Barbe-Bleue'), besides supporting Santley at the Gaiety in 'Zampa,' 'Fra Diavolo' and 'Peter the Shipwright.' His Devilshoof in the 'Bohemian Girl' was by that time famous, and he made the rôle his own. His long connexion with Carl Rosa began in Sept. 1874, at the Liverpool Amphitheatre, after a tour in America with the Parepa-Rosa Company; and, except for one short break, it lasted twenty years. During that period he sang an extensive round of parts and earned remarkable popularity in most of them. On the occasion of a 'command' performance (1892) at Balmoral Castle (at which he sang as the Sergeant in 'The Daughter of the Regiment') he was reminded by Queen Victoria that she had heard him sing in Balfe's 'Satanella' at Covent Garden in the 'fifties. He last appeared in public at Liverpool in Feb. 1894, only a few days before his death. He had a powerful voice of agreeable quality, his singing and acting being marked by abundant energy and spirit, coupled with a keen sense of humour.

His daughter, ANNIE, who sang for some years with the Carl Rosa Company, became the wife of the conductor, Eugène GOOSSENS (second of that name, *q.v.*), and is the mother of Eugène Goossens, jun., the composer and conductor. H. K.

COOKE, (1) BENJAMIN, Mus.D. (*b.* London, 1734; *d.* there, Sept. 14, 1793), organist, son of Benjamin Cooke, a music publisher in New St., Covent Garden. In his 9th year he was placed under the instruction of Dr. Pepusch, and made such rapid progress as in three years' time to be able to act as deputy for John Robinson, organist of Westminster Abbey.

In 1752 he was appointed successor to Dr. Pepusch as conductor at the Academy of Ancient Music. In Sept. 1757, on the resignation of Bernard Gates, he obtained the appointment of master of the choristers of Westminster Abbey, and on Jan. 27, 1758, that of lay vicar there. On July 1, 1762, on the death of Robinson, Cooke was appointed organist of the Abbey. In 1775 he took the degree of Doctor of Music at Cambridge, and in 1782 was admitted to the same degree at Oxford. In the latter year he was elected organist of St. Martin-in-the-Fields. He was an assistant director at the Handel Commemoration in 1784. In 1789 he resigned the conductorship of the Academy of Ancient Music to Dr. Arnold. He is buried in the west cloister of Westminster Abbey, where a mural tablet, with a fine canon (see AUGMENTATION), records his skill and worth. Dr. Cooke's compositions, which are voluminous, are for the church, concert-room and chamber. For the theatre he produced nothing except an ode for Dr. Delap's tragedy, 'The Captives,' 1786. His church music comprises the fine service in G written for the reopening of the Abbey organ after the addition by Avery of the pedal organ (West's *Cath. Org.*), and one composed in 1787 at the request of Lord Heathfield for the use of the garrison in Gibraltar; two anthems composed in 1748 and 1749 for the Founder's day at the Charter House; an anthem with orchestral accompaniments for the funeral of William, Duke of Cumberland, 1764; another of the same description, for the installation of the Bishop of Osnaburg, afterwards Duke of York, as Knight of the Bath, 1772; and fourteen others, besides several chants and psalm and hymn tunes. For the Academy of Ancient Music he added choruses and accompaniments to Pergolesi's 'Stabat Mater,' 1759, and to Galliard's 'Morning Hymn' (printed 1772); and composed an Ode for Christmas Day, 1763; 'The Syrens' Song to Ulysses'; Collins's Ode on the Passions (printed 1784); an Ode on Handel, 1785; Ode on the Genius of Chatterton, 1786; and Ode on the King's recovery, 1789. But the compositions by which he is best known are his numerous and beautiful glees, canons, etc. For seven of these (five glees, a canon and a catch) the Catch Club awarded him prizes. Dr. Cooke published in his lifetime a collection of his glees, and a second collection appeared in 1795 under the care of his son Robert. Twenty-nine glees, and eleven rounds, catches and canons by Dr. Cooke are printed in Warren's collections. His instrumental compositions consist of organ pieces, concertos for the orchestra, marches and harpsichord lessons.

(2) ROBERT (*b.* Westminster, 1768; *d.* Aug. 13, 1814), son of the above, succeeded his father, on his death in 1793, as organist of St. Martin-in-the-Fields. On the death of Dr. Arnold, in 1802, he was appointed organist and master of the choristers of Westminster Abbey. Whilst of unsound mind he ended his life by drowning himself in the Thames. He was buried in the west cloister of Westminster Abbey. Robert Cooke composed an Evening Service in C and an anthem, 'An Ode to Friendship,' and several songs and glees. Three of the latter obtained prizes at the Catch Club. A collection of eight of his glees was published by the author in 1805.

W. H. H.

COOKE, CAPTAIN HENRY (*d.* Hampton Court, July 13, 1672), probably a son of 'John Cooke, a basse from Lichfield,' who was sworn 'pisteler' of the Chapel Royal at Whitehall in 1623, and died in 1625.

The boy was 'brought up' in the Royal Chapel and took up arms for his royal master at the outbreak of the Civil War. We find him as a lieutenant in Colonel George Goring's Regiment, which formed part of the Duke of Northumberland's army on the retreat from Newcastle into Yorkshire. Before the end of the war he was promoted to a captaincy, and by that military title he was afterwards generally known. During the Commonwealth he is said to have made a living by teaching music, and it seems probable that he went to Italy and studied the language and voice production. At the Restoration he was appointed bass in the Chapel Royal and Master of the Children. It was not a cheerful prospect for a musician, for there were only five old members, no books, no surplices to wear, and the Order of Service so entirely forgotten that no two organists played it alike. Cooke set to work with the utmost energy—he strengthened the boys' voices with cornets and then reinstated the old pressgang warrant, which enabled him to take from any cathedral or country choir any boy that he considered suitable. He had an unerring judgment, for amongst the earliest batches of children he chose Turner, Wise, Blow, Tudway and Humphreys. Purcell was not chosen by him but joined the choir because his father and uncle already belonged to it.

Cooke's military discipline was soon apparent. The gentlemen were told that they must be 'properly surpliced, punctual and diligent, and must quit all interest in other quires.' The instrumentalists were bid 'wait in their turnes,' and rehearsals were held regularly on Saturdays. Cooke's boys became famous. They had 'extraordinary skill,' they could read 'anything at sight' (Pepys), could sing well in Italian, and six of them composed anthems regularly, so that as Tudway tells us 'every month they produced something fresh.' They were taught Latin and to play on the violin, organ, lute and harpsichord. All this was accomplished in less than three years, and stamps Cooke as the greatest choir trainer this country has known. With the consent of the king, who perhaps suggested the idea from his French experiences, Cooke introduced instrumental music into the church service, and 'double sackbuts and courtals' into choir processions, so that all might distinctly hear and keep together in time and tune. He frequently sang the solos in the anthems himself, and Pepys and Evelyn both bear testimony to his extraordinary abilities as a vocalist, and they were no mean judges.

He joined Davenant in his 'Entertainment' and the 'Siege of Rhodes,' composed music for some of the acts, took the part of Solyman in the latter opera, and made such an impression on Mrs. Edward Coleman (who acted with him) that nine years afterwards she was able to give an excellent representation of Cooke's performance to Pepys. In addition to this dramatic work Cooke wrote a hymn for the Installation of Knights of the Garter, Coronation Music, some 30 anthems, songs and partsongs. He had, as Pepys says, a 'strange mastery in making extraordinary surprising closes,' though his part-writing is ungrammatical. His anthems were effective and pleasing, as we see by many entries in Pepys' diary. In 1662 he became assistant to the Corporation of Musicians, afterwards Deputy-Marshal, and finally Marshal in succession to Lanière in 1670, but in 1672 he resigned office 'by reason of sickness.' He left London in 1669 for Hampton Court, where he died (1672), and was buried in the east cloister of Westminster Abbey on July 17.

As Cooke was in excellent voice in 1664 he is not likely then to have been more than from 45 to 50 years of age, and therefore about 56 when he died. At the time of his death the Crown owed him more than £500 for wages, etc., and about half this sum was paid to his widow. A résumé of his will is in Lafontaine's 'The King's Musick' and a list of his compositions. (See also the writer's article, *Mus. Ant.*, Jan. 1911.) J. C. B.

COOKE, Nathaniel (*b.* Bosham, near Chichester, 1773; *d.* there, Apr. 5, 1827), nephew of Matthew Cooke, organist of St. George, Bloomsbury, from whom he received the chief part of his musical education.

He became organist of the parish church of Brighton, for the use of the choir of which he published a Collection of Psalm and Hymn tunes, including some of his own compositions, which long continued in favour. He also published some small pieces for the pianoforte.

W. H. H.

COOKE, (1) Thomas Simpson (Tom Cooke) (*b.* Dublin, 1782; *d.* London, Feb. 26, 1848), singer and instrumentalist, studied under his father Bartlett Cooke, a famous oboe player in the band of the Smock Alley Theatre, and made such rapid progress as to perform in public a violin concerto when only 7 years of age. He received instruction in composition from Giordani. When only 15 he was appointed leader of the band at the theatre in Crow Street, Dublin, in which situation he continued several years, and composed several musical pieces. At the same time he kept a music shop in Dublin, from 1806–12. On one of his benefit nights he announced himself to sing the tenor part of the Seraskier, in Storace's opera 'The Siege of Belgrade,' an experiment which proved quite successful, and led to his removal to London, where he made his first appearance, in the same character, at the English Opera House, Lyceum, on July 13, 1813. On Sept. 14, 1815, he appeared as Don Carlos in 'The Duenna,' at

Drury Lane Theatre, where he continued as a principal tenor singer for nearly twenty years. During this period, on one of his benefit nights, he exhibited the versatility of his talents by performing in succession on the violin, flute, oboe, clarinet, bassoon, horn, violoncello, double bass and pianoforte. In 1821 he was called 'director of the music at Drury Lane Theatre' (*Quarterly Mus. Mag.*). About 1823 he undertook, alternately with his duty as tenor singer, the duty of leader of the band. In 1828–30 he was one of the musical managers of Vauxhall Gardens. Some years later he was engaged, at Drury Lane and Covent Garden, as director of the music and conductor. He was a member of the Philharmonic Society, and occasionally led the band or conducted the concerts. For several years he held the post of principal tenor singer at the chapel of the Bavarian Embassy, a post he relinquished in 1838. In 1846 he succeeded John Loder as leader at the Concert of Antient Music. He died at his house in Great Portland Street, and was buried in Kensal Green cemetery. As a singing-master Cooke had a deserved reputation, and several of his pupils achieved distinction; amongst them Miss M. Tree, Mrs. Austin, Miss Povey, Miss Rainforth, the Misses A. and M. Williams and Sims Reeves. He wrote a treatise on singing, which was much esteemed. Cooke's principal dramatic pieces were:

'Frederick the Great,' 1814; 'The King's Proxy,' 1815; 'The Count of Anjou,' 1816; 'A Tale of Other Times' (with Bochsa), 1822; 'The Wager, or, The Midnight Hour,' 1825; 'Abu Hassan' (adapted from Weber), 'Oberon, or, The Charmed Horn,' 1826 (ditto); 'The White Lady' (from Boieldieu), Oct. 1826; 'Malvina,' 1826; 'The Boy of Santillane,' 1827; 'Isidore de Merida' (from Storace), 1828; 'The Brigand,' 1829, one song in which, 'Gentle Zitella,' attained great popularity; 'Peter the Great,' 1829; 'The Dragon's Gift,' 1830; 'The Ice Witch,' 1831; 'Hyder Ali,' 1831; 'St. Patrick's Eve,' 1832; 'King Arthur and the Knights of the Round Table,' 1835; additional songs for 'A Midsummer Night's Dream,' 1840. He arranged 'Acis and Galatea' for the stage, 1842, and produced 'The Follies of a Night,' 1845.

His adaptations of foreign operas conformed to the fashion in vogue in his time, *i.e.* he omitted much that the composer wrote, and supplied its place by compositions of his own. He published 'Six Glees for three and four voices' in 1844, besides many singly. Among his glees which gained prizes were: 'Hail! bounteous Nature,' 1829; 'Come, spirits of air,' 1830; 'Let us drain the nectared bowl,' 1830; 'Thou beauteous spark of heavenly birth,' 1832; 'O fair are thy flowerets,' 1836; 'Strike the lyre' (Manchester, 1832). He likewise obtained a prize for his catch, 'Let's have a catch and not a glee,' 1832.

His eldest son, (2) Henry Angelo Michael (commonly known as Grattan) (*b.* 1809; *d.* Harting, Sussex, Sept. 12, 1889), was educated in the R.A.M., 1822–28, and for many years held the post of principal oboe in all the best orchestras; he was band-master of the second regiment of Life Guards, 1849–56.

W. H. H.; addns. by W. H. G. F.

COOPER, George (*b.* Lambeth, July 7, 1820; *d.* London, Oct. 2, 1876), was a son of the assistant organist of St. Paul's.

When 11 years old he often took the service at St. Paul's for his father, and at the Festivals of the Sons of the Clergy it was the delight of Attwood (then chief organist) to make him extemporise. On one such occasion Mendelssohn is said to have remarked and praised him. At thirteen and a half he was made organist of St. Benet, Paul's Wharf. On Attwood's death he became assistant organist of St. Paul's, *vice* his father resigned; in 1836 organist of St. Ann and St. Agnes; and on the death of his father, in 1843, succeeded him at St. Sepulchre's, and became singing-master and organist to Christ's Hospital as well. On the death of J. B. Sale, in 1856, he was appointed organist of the Chapel Royal.

COOPER, John, called COPRARIO (*b. circa* 1570; *d.* 1627), was an Englishman who, having Italianised his name during a sojourn in Italy before 1604, continued the use of it after his return to England. He was a composer for and performer on the lute and viola da gamba, and the musical instructor of the children of James I., as well as of William and Henry Lawes.

In 1606 he published:

'Funeral Teares for the Death of the Right Honorable the Earle of Devonshire: figured in seaven songes, whereof sixe are so set forth that the wordes may be exprest by a treble voice alone to the Lute and Base Violl, or else that the meane part may be added, if any shall affect more fulnesse of parts. The seaventh is made in forme of a Dialogue and cannot be sung without two voyces.'

He composed the music to 'The Masque of the Inner Temple and Graye's Inn,' performed at Whitehall, Feb. 20, 1612–13. In 1613 he published 'Songs of Mourning bewailing the untimely death of Prince Henry.' (See Campian.) He contributed 3 of the songs to the masque performed at Whitehall on St. Stephen's Night, 1613, and supplied much of the music in 'The Masque of Flowers' presented in the same place on Twelfth Night in the following year, both masques being given in honour of the marriage of the Earl of Somerset and Lady Frances Howard. A large number of compositions for strings, and strings and organ are in the library at Christ Church, Oxford (see Catalogue, Part I.[1] A song, 'Come ashore, come merry mates,' is included in J. Stafford Smith's 'Musica Antiqua' (1812). There are numerous compositions for viols by him in the R.C.M., while a fair amount of his music is in the British Museum. Add. MSS. 10,445 contains 14 fancies for 2 bass viols. There is a fancy for 3 viols in Add. MSS. 17,792-6, some for 2 viols and organ in Add. MSS. 17,790, and 12 others for 2 bass-viols and organ in Add. MSS. 31,416. Among the Egerton MSS. (2485) there is a collection of fancies for the organ in 5 parts with the titles certainly taken, and the melodies themselves probably arranged, from Italian madrigals of

[1] G. E. P. Arkwright.

the 16th and 17th centuries. There are two parts of what was probably a 5-part fancy in Add. MSS. 29,366-8, while Add. MSS. 23,779 contains 2 sets of dance suites (each consisting of a Fancy, Allemande and Galliard) arranged for treble viols, bass-viol and organ. Two galliards for lute are among the Harleian MSS. 7578, and some masque-tunes of his (including one for the Gray's Inn Masque referred to above) are in Add. MSS. 10,444. Cooper also wrote some church music and contributed 2 anthems ('I'll lay me down' (*a* 4), and 'O Lord, how do my woes increase') to Sir William Leighton's 'Teares or Lamentaciouns of a Sorrowfull Soule' (1614). The second of these was also included in the 'Tristitiae Remedia' of Thomas Myriell, 1616 (B.M. Add. MSS. 29,372-7).

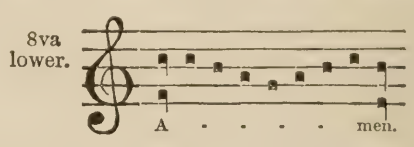
W. H. H.; addns. by J. Mᴷ.

COOPER, Richard (*d.* Jan. 20, 1764), notable as the first who engraved music in Scotland, his earliest work being the small oblong volume of music which Allan Ramsay, *c.* 1725, issued as a companion to his *Tea-Table Miscellany*. This work is now so scarce that it is doubtful if more than one perfect copy exists; its title is:

'Music for Allan Ramsay's Collection of Scots Songs, set by Alexander Stuart . . . engraved by R. Cooper.'

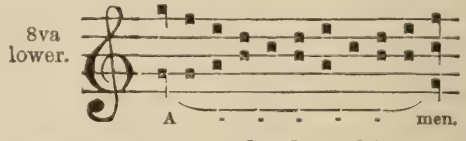
Other early Scottish collections engraved by Cooper are: Adam Craig's, 1730; Oswald's 'Minuets,' advertised in 1734; M'Gibbon's 'Six Sonatas,' 1740; and his 'Collections of Scots Tunes,' three books, 1742, 1746 and 1755. Besides music-engraving, Cooper did other work, including the fine portrait of Allan Ramsay prefixed to an edition of his 'Poems' in 1728. The *Scots Magazine* records the death of Cooper. F. K.

COOPER (Cowper), Robert, Mus.D., a 15th/16th-century English musician, praised by Morley in his *Plaine and Easie Introduction* (1597). He was Mus.B. of Cambridge, and took his degree of Mus.D. in 1502.[1] He is probably identical with the vicar-choral of Lincoln, who received his appointment on Aug. 15, 1494, and disappears from the lists in 1506. In 1516 he received 2 benefices from the Archbishop of Canterbury. Some of his songs are preserved in MS. collections. His song 'Alone' was republished by the Plainsong Society (*Q.-L.*).



COPPOLA, Pier Antonio (*b.* Castrogiovanni, Sicily, Dec. 11, 1793; *d.* Nov. 13, 1877), composer, son of a musician, studied at the Real Collegio di Musica at Naples.

His first opera, 'Il figlio bandito' (1816), was well received, and his 'Nina pazza per amore' (Rome, 1835) was performed in every town of Italy, in Vienna, Berlin, Lisbon, Spain, Mexico, and, as an opéra-comique with the title of 'Eva,' in Paris (1839). In 1836 he composed 'Enrichetta di Baienfeld' for Vienna, and this was followed by 'Gli Illinese' (Turin), one of his best works; and 'La bella Celeste degli Spadari' (Milan, 1837). At the Royal Theatre in Lisbon he produced 'Giovanna 1ma' (1841), and 'Inès de Castro' (1842). In 1843 he returned to Italy, and composed five more operas, which were less successful than his earlier works, and he finally returned to his post at Lisbon. Coppola might have taken a higher place had he not come into competition with Rossini. Some masses, litanies and other church compositions are to be found in the libraries at Naples. M. C. C.



COPPOLA, Piero (*b.* Milan, 1888), son of two well-known Italian singers, studied pianoforte and composition at the Conservatoire of that city, concluding his studies in 1909. Since then he has devoted himself to conducting and composition. He has appeared as conductor in Paris and Christiania. In Florence and Brussels he directed the first productions of Puccini's 'The Girl from the Golden West.' His compositions include, besides short pieces for piano and violin, two operas, 'Sirmione' and 'Nitrita,' the last of which obtained a prize at the McCormick competition of 1914. F. B.

COPRARIO, see Cooper, John.

COPULA, a species of Descant (*q.v.*), generally employed at the close of *organum purum* on the penultimate note of the unmeasured plain-song tenor. Franco defines it as 'velox discantus ad invicem copulatus' (Coussemaker, *Scriptores*, i. 133 *a*), to which, at a later date (1351), the author of the *Quatuor Principalia* adds: 'Sicuti est brevis partita sive fracta in semibrevibus, et semibrevis in minimis, quae copulari sive computari debent ad unam perfectionem' (*ib.* iv. 295 *b*). The following example is given by Franco:

and this, in three parts, by Walter of Odington (*ib.* i. 248 *a*):

The term was not confined to this practice of embellishing the *finis punctorum*, but was applied to any sort of flowery discant on one or more notes: 'Copula, id est floritura' (*ib.* iv. 278 *a*), 'Copula est id ubicumque sit multitudo punctorum,' 'quae multum valet ad discantum, quia discantus nunquam perfecte scitur nisi mediante copula' (*ib.* i. 114 *a*).

Theodoric de Campo (*ib.* iii. 189 *a*) uses *copula* as a synonym for *ligatura*, *i.e.* a group

[1] Brown and Stratton give 1504.

of notes bound together in one figure; and Johannes de Garlandia in one passage (*ib.* i. 116 *b*) tells us that the HOCKET (*q.v.*) was sometimes called *copula*; but no other writer supports either of these usages of the word.

J. F. R. S.

COPYRIGHT,[1] MUSICAL. British copyright, as far as it affects composers and their work, is controlled almost entirely by the Copyright Act, 1911, which came into force on the 1st day of July 1912. 'Author' throughout this article will stand for 'composer,' and throughout the Copyright Act embraces the composer.

It should be stated as a warning that no author should transfer his copyright except he is forced to do so under great pressure, and then he should be sure that he is adequately rewarded, not only for the copyright as a whole but for each separate division of that right. It is not always the *financial* returns that are most important. It may be more serious to lose power over the method of publication or the manner of performance.

What is copyright under the Act? The Act says, Section 1:

> Copyright shall subsist throughout the parts of His Majesty's Dominions to which this Act extends for the term hereinafter mentioned in any original dramatic and musical work, if (*a*) in the case of a published work the work was first published within such parts of His Majesty's Dominions as aforesaid; and (*b*) in the case of an unpublished work, the Author was at the date of the making of the work a British subject, or resident within such parts of His Majesty's Dominions as aforesaid but, in no other works, except so far as the protection conferred by this Act is extended by Orders in Council thereunto relating to Self-governing Dominions to which this Act does not extend and to foreign countries.

And the Act goes on to define copyright as far as musical compositions are concerned, as (1) the sole right to produce or reproduce the work or any substantial part thereof in any material form whatsoever; (2) to perform the work or any substantial part thereof in public; (3) if the work is unpublished to publish the work or any substantial part thereof; (4) to make any record, perforated roll, or other contrivance by means of which the work may be mechanically performed or delivered; (5) to authorise any such Acts as aforesaid.

PUBLICATION.—Publication means the issue of copies of work to the public, and does not include the performance in public of a musical work.

In non-legal terms, therefore, the copyright is the property of the composer as soon as the work is completed, whether it is published or not, and includes the rights (1) of printing the work, (2) of performing the work, (3) of reproducing the work on any form of mechanical instrument, (4) of entering into any contract for reproduction or performance.

INFRINGEMENT. Section 2.—Any *fair dealing* with the work for the purposes of private study, research, review or newspaper summary, is not an infringement. This statement is necessarily vague and any claim would have to be decided on the evidence of each case; but *the copyright is infringed* by any person who (1) sells or lets for hire or by way of trade exposes or offers for sale or hire; (2) distributes either for the purposes of trade, or to such an extent as to affect prejudicially the owner of the copyright; (3) by way of trade exhibits in public, or (4) imports for sale or hire into any part of His Majesty's dominions to which this Act extends, any work which to his knowledge infringes copyright or would infringe copyright if it had been made within the part of His Majesty's dominions in or into which the sale or hiring, exposure, offering for sale or hire, distribution, exhibition or importation took place, and (5) by any person who for his private profit permits a theatre or other place of entertainment to be used for the performance in public of the work without the consent of the owner of the copyright unless he was not aware and had no reasonable ground for suspecting that the performance would be an infringement of copyright. There are the usual civil proceedings provided in the Act by way of injunction, interdict, damages, accounts, etc., against an infringer; and summary proceedings or penalties where any person *knowingly* infringes. In the case of musical copyright the author has a greater power than any other copyright owner under the Act, for, in the last years of the century (1800) many street hawkers were selling copies of copyright musical works which had been piratically printed. It was impossible to find out who were the printers and where the stock was kept, while the vendor of the gutter, against whom action could be taken, was a man of no substance. In consequence neither the copyright owner nor the publishers could obtain any satisfactory relief. This form of infringement was rarely resorted to except in the case of music owing to the extreme cheapness of printing. Accordingly in 1902 The Musical (Summary Proceedings) Copyright Act (2 Edw. 7, chap. 15) was passed giving power to seize pirated copies without warrant. The definition of 'Musical Copyright' in this Act, which has not been repealed, is of importance. It is stated to mean the exclusive right of the owner of such copyright to do or to authorise any other person to do all or any of the following things: (1) To make copies by writing or otherwise of such musical work, (2) to abridge such musical work, (3) to make any new adaptation, arrangement or setting of such musical work or of the melody thereof in any notation or system.

'Musical work' is defined to mean 'any combination of melody and harmony or either of them printed, reduced to writing or otherwise graphically produced or reproduced.' It was found that this short Act was not sufficient

[1] This article was written in June 1924.

to stop the wholesale piracy, for although it gave power to seize copies, it gave no right of search. In consequence it was possible to keep stores of pirated copies and pass them out a few at a time to the hawkers and gutter merchants. The Musical Copyright Act, 1906 (6 Edw. 7, chap. 36), was passed to stop the holes which had become apparent in the Act of 1902. These Acts are still in force.

Limitation of Action. Section 10.—An action in respect of an infringement of copyright shall not be commenced after the expiration of three years next after the infringement.

Ownership. Section 5.—The author of the work is recognised as the first owner subject to a special proviso where the author is in the employment of some other person under a contract of service and apprenticeship and the work was made in the course of his employment, then in the absence of agreement the employer is the owner of the copyright.

Assignment.—The owner can assign his copyright either wholly or partially and either generally or subject to limitations as to country and either for the whole term or any part thereof, and may grant any interest in the right by licence, *but no such assignment or grant is valid unless it is in writing signed by the owner of the right in respect of which the assignment or grant is made or by his duly authorised agent.*

An agreement to assign the copyright or grant a license will, however, be enforced, however informal and even if made verbally, if valuable consideration therefore has been given or promised.

Term of Copyright. Section 3.—The term for which copyright shall subsist shall, except as otherwise expressly provided by this Act, be the life of the author and a period of 50 years after his death. Provided that at any time after the expiration of 25 years, or in the case of a work in which copyright subsists at the passing of the Act 30 years, from the death of the author of a published work, copyright in the work shall not be deemed to be infringed by the reproduction of the work for sale if the person reproducing the work proves that he has given the prescribed notice in writing of his intention to reproduce the work, and that he has paid in the prescribed manner to or for the benefit of the owner of the copyright royalties in respect of all copies of the work sold by him calculated at the rate of 10 per cent on the price at which he publishes the work. Under the Act of 1842 copyright endured for the life of the author and 7 years after his death, or 42 years from the date of first publication, whichever was the longer period. If the copyright of any work under either of these periods was in existence on the 1st day of July 1912, when the new Act came into force, then the copyright endures for the extended period and if the copyright has been previously assigned the author's representatives and not the assigns get the benefit of the extension subject to a right in the assignee to purchase at a valuation the right for the extended period. In the case of joint authorship (Section 16) copyright subsists during the life of the author who dies first and for 50 years after his death or during the life of the author who dies last, whichever is the longer, and in the case of joint authorship where one or more of the joint authors do not satisfy the conditions of the Act, then the work shall be treated as if the other author or authors had been the sole author or authors thereof; but Section 24 grants to the original authors' representatives, if the copyright has been assigned certain renewed powers and rights in the remainder of the extended term after the original term has expired, but as the period of duration of these sources and rights is bound to grow less and less as time goes on, there is no need to set them out at length.

The ownership of an author's MS. after his death, where such ownership has been acquired by testamentary disposition made by the author, and the MS. is of a work which has not been published or performed in public, shall be *prima facie* proof of the copyright being with the owner of the MS.

Joint authorship is defined as a work produced by the collaboration of two or more authors in which the contribution of one author is not distinct from the contribution of the other author or authors. This definition is of great importance to the composer whose music is so often combined with words.

Posthumous Works.—In the case of musical works which have not been published nor been performed in public in which copyright exists at the date of death, then the copyright will subsist till publication or performance, whichever may first happen, and for a term of 50 years thereafter, and the proviso referred to in Section 3 shall apply as if the author had died at the date of such publication or performance.

It will be gathered from this that although performance does not amount to publication, still the right of performance is commensurate with the right of publication.

Performing Rights.—Under the existing law the term copyright is all inclusive and covers performing rights. The attention of the author must be drawn to the various forms of performing rights in music, each of which should be marketed under a different kind of contract and remunerated at a different rate. The author should refer again to the warning at the beginning of this article, and should merely grant *a licence to perform* subject to suitable terms and *not assign a right.* There is the performing right in an opera, or a cantata, which is ruled by an entirely different contract from the performing right in a musical comedy or

lyrical opera. There is the separate performance of a song or piece of chamber music or other music in a concert hall, at a dance, on bands, in restaurants, and other places of public entertainment.

The author should have complete control of all these forms of reproduction by performance and should never allow them to pass from his control. Any performance without his sanction is an infringement of copyright. The latest development is reproduction by wireless which, in the absence of a legal decision to the contrary, must be reckoned part of the performing rights.

Mechanical Instrument Rights. — The last question for the author to consider is the reproduction on mechanical instruments—pianola, gramophone *et hoc genus omne*. For this method of reproduction there is special legislation (Section 19). Copyright shall subsist in records, perforated rolls and other contrivances by means of which sounds may be mechanically reproduced, in like manner as if such contrivances were musical works. The term of copyright shall be 50 years from the date of the making of the original plate from which the contrivance was directly or indirectly derived. The ownership shall lie with the person who was the owner of the original plate at the time such plate was made. He shall be deemed the author of the work and when such owner is a body corporate, the body corporate shall be deemed, for the purposes of the Act, to reside within the parts of His Majesty's dominions to which the Act extends if it has a place of business established within such parts. It is not an infringement of copyright in any musical work for a person to make records, etc., if such person proves—(*a*) That such contrivances have been previously made by or with the consent or acquiescence of the owner of the copyright of the work; and (*b*) that he has given the prescribed notice of his intention to make the contrivance, and has paid in the prescribed manner in respect of such contrivances sold by him.

There is a proviso forbidding alterations or omissions from the work so produced unless they have been previously made with the consent or acquiescence of the copyright owner or *unless such alterations or omissions are reasonably necessary for the adaptation of the work to the contrivance in question.* The proviso is supplemented by a statement that for the purposes of the proviso a musical work shall be deemed to include any work so closely associated therewith as to form part of the same work. Then follows (Subsection 3 of the same section) that after two years from the date of the Act, 5 per cent shall be paid on the ordinary retail selling price, so, however, that the royalty payable on each contrivance shall not be less than a half-penny for each separate musical work in which copyright subsists reproduced thereon, and where the royalty calculated as aforesaid includes a fraction of a farthing, such portion shall be reckoned as a farthing.

Subsection 4. That if any such contrivance is made reproducing two or more copyright works belonging to different owners the royalties are to be apportioned in such proportions as failing agreement may be determined by arbitration. There are certain sections of Clause 19 dealing with mechanical rights in works published before the Act and in works published before the Act and mechanically reproduced before the Act. It is hardly necessary to set out the requirements of these sections, as year by year their application is less and less; but attention should be drawn to the provisions of Section 7, Subsection (*d*) that notwithstanding any assignment of copyright made before the passing of the Act, any rights in respect of the making or authorising the making of contrivances by means of which the work may be mechanically reproduced, and the royalties shall belong to the author or his legal personal representative and not to the assignee.

Dominions, Colonies and Dependencies

The Dominions, *i.e.* the self-governing colonies, are the Dominion of Canada, the Commonwealth of Australia, the Dominion of New Zealand, the Union of South Africa, Newfoundland, the Irish Free State and Northern Ireland.

Canada.—Copyright in Canada has been for many years unsatisfactory. It has been difficult for the Canadian Government to deal with the question owing to Canada's proximity to the United States (see below), but in 1921 the Government passed an Act containing certain sections which were antagonistic to the letter and spirit of the Revised Convention of Berne, and as the main object of the Government was to join the Convention, the Act was held in suspense until the matter was adjusted. These sections were repealed by an amending Act assented to June 1923 so far, that they did not apply to any work the author of which was a British subject—other than a Canadian citizen, —or the subject or citizen of a country which has adhered to the Revised Convention of Berne and the additional Protocol thereto.

The Act of 1921 so amended came into force the 1st of January 1924, and Canada is now a member of the Berne Convention. Many of the clauses of this Act are taken from the Act of 1911, and the term of copyright is the same, and the term of copyright in records and perforated rolls. But the Section 18 dealing with mechanical reproduction is divergent on many points. It includes, in addition to 'Musical,' 'Literary and Dramatic' work and (Subsection 2, iii.), the making of the necessary manuscript

arrangement and instrumentations is not deemed an infringement of copyright. The royalty (Subsection 2) is two cents for each playing surface of each record and two cents for each perforated roll or other contrivance. This arrangement for the paying of a fixed sum instead of a percentage is palpably unfair, but was brought about by the pressure of the trade and the proximity of the United States, who have the same method of payment. It must be noticed that the words 'playing surface' are inserted. In the Act of 1911 the percentage is paid on 'the ordinary retail selling price of the contrivance.' The distinction is acute, and to this extent the advantage is with Canada.

If (Subsection 3) there are two or more works on the same playing surface and the owners of the copyright are different persons, then the sums payable by way of royalties are divided equally. (Subsection 5.) The Governor in Council may make regulations as to notices and payments under this section, and they are contained in a special pamphlet issued from the Canadian Government Office. There are certain provisions (Subsection 6) which bear on musical works published before the beginning of the Act. These are more important in the case of Canada, as the beginning of the Act is Jan. 1, 1924 (see date of this article).

Australia.—Australia has virtually adopted the British Act with modifications, but it does not preserve the Musical (Summary Proceedings) Copyright Act, 1902, and the Musical Copyright Act, 1906. The summary remedies in Australia, however, are very stringent, and certain extra remedies may be enforced by any one registering in Australia under the Act. Registration is, however, entirely optional. But the advantage gained by this is worth the trouble and expense. The date of this Act is Nov. 20, 1912.

New Zealand.—Copyright in New Zealand is practically similar to copyright in Australia. The British Act of 1911 forms the basis. The date of the Act is Nov. 22, 1913.

South Africa.—The copyright legislation in South Africa follows along the lines of the copyright legislation in Australia and New Zealand. The date of the Act is 1916.

Newfoundland. — Newfoundland has adopted the British Act of 1911.

The Irish Free State and Northern Ireland. (See date of this article.)—In the Irish Free State there has been no separate copyright legislation up to the present date. It is understood that a Bill is being drafted which will take the Act of 1911 as its basis. In the meantime the Act of 1911 runs. In Northern Ireland the Copyright Act of 1911 is in force and will so continue, copyright being a 'reserved service' so far as that territory is concerned. The Act of 1911 runs in all the colonies, but some local modifications have been passed in India with regard to works published there.

The Berne Convention—The Additional Act of Paris—The Revised Convention of Berne and the Additional Protocol

In 1886 an Act was passed enabling the United Kingdom, etc. etc., to join the Berne Convention which had been settled by most of the continental powers in 1885. In 1896 another conference was held in Paris and produced the additional Act of 1896, which was adopted by Great Britain in 1898 with the exception of the Interpretative Clause. In 1908 a further conference held in Berlin produced the Revised Convention. Great Britain has now adhered to this and the additional Protocol of 1914 with a slight reservation (see below). This is the final word (see date of this article) on the question of International Copyright as far as Great Britain is concerned.

The Revised Convention of Berne under its definition of literary and artistic works, includes (Art. 2) dramatico-musical works, musical compositions with or without words, adaptations, arrangements of music, as well as collections of different works, and the contracting countries are bound to make provision for the above-mentioned works.

Art. 4 defines who can benefit and runs as follows:

'Authors who are subjects or citizens of any of the countries of the Union shall enjoy in countries other than the country of origin of the work, for their works whether unpublished or first published in a country of the Union, the rights which the respective laws do now or may hereafter grant to natives as well as the rights specially granted by the present Convention. The enjoyment and the exercise of these rights shall not be subject to the performance of any formality.'

This is the pith of the Revised Convention and shows its strength and breadth. The extent of protection and the means of redress are governed exclusively by the laws of the country where protection is enforced. The country of origin of the work in the case of unpublished works is the country to which the author belongs; in the case of published works, the country of first publication; in the case of simultaneous publication in several countries of the Union that country which grants the shortest period of protection; in the case of simultaneous publication in a country outside and a country inside the Union, the latter country shall be considered exclusively as the country of origin. Published works come under the same category as the British Law of 1911. The representation of a dramatico-musical work and the performance of a musical work does not constitute publication. Not only do the articles of the Union grant the same rights as native authors to subjects and citizens of the Union, but also to subjects and citizens of countries outside the Union, who first publish their works in countries of the Union. The

term of copyright is set down for the life of the author and 50 years after his death, but in those cases where countries of the Union have not adopted this term or have modified it, then the term is regulated by the law of the country where protection is claimed and must not exceed the term fixed in the country of origin. Music is not affected by translation rights, but to a limited extent it is by serial rights and serial rights are protected under Art. 11. The stipulations of the Convention apply to the public representation of dramatico-musical works and to the performance of musical works, whether such works be published or not.

Under Art. 12 any adaptations or arrangements, etc., of a musical work are unlawful reproductions if they do not present the character of new original work.

Art. 13.—Under this Article, mechanical reproduction of musical works is protected and the public performance by means of mechanical instruments. Reservations and conditions are determined by domestic legislation and are strictly limited to the country which has put them in force. The protection accorded is not retroactive.

Art. 15 states that the author whose name is indicated on the work in the accustomed manner must be considered *prima facie* as the author of the work and consequently be admitted to institute proceedings. In the case of anonymous or pseudonymous works the publisher is held *prima facie* to be the responsible party.

Art. 18 states that the Convention applies to all works that have not fallen into the public domain at the moment of its coming into force, and contrariwise, that a work which has fallen into the public domain of the country where protection is claimed shall not be protected anew in that country.

The list of countries signatories to the Convention as set out in the list published in *Le Droit d'auteur*, the organ of the International Convention of Berne, up to Jan. 1, 1924, runs as follows :

INTERNATIONAL COPYRIGHT

(1) States—Members of the Union

(2) Acts in Force between the Union Countries

Berne Convention, revised from Nov. 13, 1908

(*a*) *Without Reservations*

Germany.	Bulgaria.	Hungary.	Monaco.
Austria.	Dantzig.	Liberia.	Poland.
Belgium.	Spain.	Luxemburg.	Portugal.
Brazil.	Haiti.	Morocco.	Switzerland.

(*b*) *With Reservations*

Denmark.—Newspaper and review articles (Art. 7 of the Berne Convention of 1886, revised by the Additional Paris Act of 1896).

France and Tunis.—Applied works of art (maintenance of prior stipulations).

Great Britain.—Retroactivity (Art. 14 of the Berne Convention of 1886 and No. 4 of the closing Protocol, revised by the Additional Paris Act of 1896). See Note A.

Greece.—1. Exclusive translation right (Art. 5 of Berne Convention, 1886).
2. Newspaper and review articles (Art. 7 of Berne Convention, 1886).
3. Right of representation performance (Art. 9 of Berne Convention of 1886).

Italy.—1. Exclusive right of translation (Art. 5 of the Berne Convention, 1886, revised by the Additional Act of Paris of 1896).
2. Right of representation with regard to translations of dramatic and dramatic-musical works (Art. 9, para. 2 of the Berne Convention of 1886).

Japan.—1. Exclusive right of translation (Art. 5 of the Berne Convention of 1886 revised by the Additional Act of Paris, 1896).
2. Public performance of musical works (Art. 9, para. 3 of the Berne Convention of 1886).

Norway.—1. Works of architecture (Art. 4 of the Berne Convention of 1886).
2. Newspaper and review articles (Art. 7 of the Berne Convention, 1886).
3. Retroactivity (Art. 14 of the Berne Convention of 1886).

Netherlands.—1. Exclusive right of translation (Art. 5 of the Berne Convention of 1886, revised by the Additional Paris Act, 1896).
2. Newspaper and review articles (Art. 7 of the Berne Convention of 1886, revised by the Additional Paris Act, 1896).
3. Right of representation in regard to translations of dramatic or dramatic-musical works (Art. 9, para. 2 of the Berne Convention of 1886).

Sweden.—Newspaper and review articles (Art. 7 of the Berne Convention of 1886).

Note A

Great Britain ratified the Revised Convention of Berne on June 14, 1912, with the exception of Art. 18 referring to retroactivity. In lieu of acceding to this article she remains bound by Art. 14 of the Convention of Berne and by para. 4 of the final Protocol of the Convention of the same date as amended by the Additional Act of Paris of May 4, 1896.

These articles run as follows :

Berne Convention, Art. 14.—The present Convention, under the reservations and conditions to be determined by a common agreement, shall apply to all works which, at the time of its coming into force, have

not yet fallen into public domain in the country of origin.

Closing Protocol 4.—The common agreement provided for in Art. 14 of the Convention is concluded as follows:

The application of the Convention to works not fallen into the public domain at the time of its coming into force shall take effect according to the stipulations relative thereto, contained in special treaties existing or to be concluded for the purpose.

In the absence of such stipulations between countries of the Union, the respective countries shall regulate, each for itself, by domestic law, the manner in which the principle contained in Art. 14 is to be applied.

Additional Act. Closing Protocol 4.—The common agreement provided for in Art. 14 of the Convention is concluded as follows:

The application of the Berne Convention and of the present Additional Act to works not fallen into the public domain in their country of origin at the time of the coming into force of this Act shall take effect according to the stipulations relative thereto, contained in special Conventions existing or to be concluded for the purpose.

In the absence of such stipulations between countries of the Union, the respective countries shall regulate, each for itself, by domestic law, the manner in which the principle contained in Art. 14 is applied.

The stipulations of Art. 14 *of the Berne Convention and of this paragraph to the closing Protocol shall apply equally to the exclusive right of translation as granted by the present Additional Act.*

The above-mentioned temporary provisions shall be applicable in case of new accessions to the Union.

The ratification applied to all the British Colonies, Protectorates and Foreign Possessions, except the self-governing Dominions, India, the Channel Islands, Papua, Norfolk Island.

Subsequent adhesions on behalf of the British Dominions and Protectorates took effect as follows:

Australia	July 1, 1912.
Newfoundland	July 1 1912.
Guernsey, Alderney and Sark	July 1, 1912.
India	Oct. 30, 1912.
Papua	Feb. 1. 1913.
Jersey	Mar. 8, 1913.
Norfolk Island	July 1, 1912.
New Zealand	Apr. 1, 1914.
Union of South Africa	May 1, 1920.
Canada	Jan. 1, 1924.
Palestine	Mar. 21, 1924.

The length of the term of copyright in the different countries is (see date of this article):

Germany	30 years after the death of the author.
Austria	30 „ „ „
Belgium	50 „ „ „
Brazil	60 „ „ „
Bulgaria	30 „ „ „
Denmark	50 „ „ „
Dantzig	30 „ „ „
Spain	80 „ „ „
France	50 „ „ „
Gt. Britain	50 years after the death of the author, but with a system of obligatory licence intervening 25 years after the death of the author.
Greece	50 years after the death of the author.
Haiti	The life of the author and that of his widow, and 20 years after the death of the author for the benefit of his children, if he leaves any. If none, 10 years for the benefit of other heirs.
Hungary	50 years after the death of the author.
Italy	1st period—Life of the author or at least 40 years from the date of publication; 2nd period—40 years, but with a system of obligatory licence.
Japan	30 years after the death of the author.
Liberia	20 „ „ „
Luxemburg	50 „ „ „
Morocco	50 „ „ „
Monaco	50 years after the death of the author.
Norway	50 „ „ „
Holland	50 „ „ „
Poland	30 years after the death of the author for the territories formerly German and Austrian; 50 years after the death of the author for the territories formerly Russian.
Portugal	50 years after the death of the author.
Sweden	30 „ „ „
Switzerland	30 „ „ „
Czecho-Slovakia	30 years after the death of the author for the territories formerly Austrian; 50 years after the death of the author for the territories formerly Hungarian.
Tunisia	50 years after the death of the author.

United States.—The last subject for consideration is the copyright in the United States, which alone of all civilised countries stands outside the Berne Convention (see date of this article). The rights of authors have been hampered by the powers of the Trades Unions. The date of the present law is Mar. 4, 1909 (in force July 1, 1909), amended by the Acts of Aug. 1912, Mar. 1913 and Dec. 1919.

Copyright.—Section 1 grants any person entitled thereto, upon complying with the provisions of the Act, the exclusive right

(*a*) To print, reprint, publish, copy and vend the copyrighted work.

(*b*) To arrange and adapt it if it be a musical work.

(*d*) (This subsection refers to a drama, but would apply equally to a dramatico-musical work.) To perform or represent the copyrighted work publicly if it be not reproduced in copies for sale; to vend any MS. or any record whatsoever thereof; to make or to procure the making of any transcription or record thereof by or from which in whole or in part it may in any manner or in any method be exhibited, performed, represented, produced or reproduced; and to exhibit, perform, represent, produce or reproduce it in any manner or by any method whatsoever.

(*e*) (Deals exclusively with a musical composition.) To perform the copyrighted work publicly for profit and for the purpose of public performance for profit and for the purposes set forth in Subsection (*a*) to make any arrangement or setting of it or of the melody of it in any system of notation or any form of record in which the thought of an author may be recorded and from which it may be read or reproduced. With a proviso that, whenever the owner of a musical copyright has licensed the mechanical reproduction of his copyright work, any other person may make similar use of the copyrighted work upon payment to the copyright proprietor of a royalty of two cents on each such part manufactured to be paid by the manufacturer thereof, and then follows certain statutory arrangements for the delivery of monthly accounts if so required by the copyright owner, and the monthly payment of royalties, and certain penalties on failure to pay royalties. There is

a further proviso by which it is the duty of the copyright owner, if he uses the musical composition himself for reproduction on mechanical instruments, or licenses others to do so, to file a notice thereof, accompanied by a recording fee in the Copyright Office; any failure to file such notice shall be a complete defence to any suit, etc., for any infringement of copyright.

Section 2 states that nothing in the Act shall annul or limit the right of the author or proprietor of an unpublished work at Common Law or in equity.

Section 3, dealing incidentally with composite works and periodicals, may affect musical works. It states, 'The copyright upon composite works or periodicals shall give to the Proprietor thereof all the rights in respect thereto which he would have if each part were individually copyrighted under the Act.' This is of some importance, for it raises many complications with regard to the ownership of copyright, and renders the interpretation of the badly drafted Act still more difficult.

Section 4 states that the works for which copyright may be secured shall include all the writings of an author.

Registration.—Section 5 refers to registration (a formality made essential under the Act) and the class to which certain works belong. Those classes which might cover musical works are (*a*) books including composite or cyclopædic works and other compilations, (*b*) periodicals, including newspapers, (*d*) dramatico-musical compositions, (*e*) musical compositions. No error in classification will invalidate or impair the copyright protection secured. This registration may complicate seriously the question of copyright in the U.S.A., which is already sufficiently difficult, for should the musical work appear in, say, a composite book or periodical, these will be registered as a whole, securing copyright to the proprietor, and it may be necessary to obtain a reassignment from the proprietor of the single piece, and register this in the name of the author. This transaction, difficult for the American citizen, is doubly so for the subject or citizen of a foreign country ignorant of foreign law.

Ownership.—Section 8 sets out that the copyright in a work belongs to a citizen of the U.S.A., and only to a citizen or subject of a foreign state or nation (*a*) if he is domiciled in the U.S.A. at the date of first publication of the work; (*b*) when the foreign state of which he is a citizen or subject grants the benefit of copyright to citizens of the U.S.A. on substantially the same basis as to its own citizens, or copyright protection substantially equal to the protection secured to such foreign authors under the U.S. Act, or by treaty, or when such foreign state or nation is a party to an international agreement which provides for reciprocity, by the terms of which agreement the U.S.A. may at its pleasure become a party thereto. The existence of reciprocal conditions is determined by the President of the United States by proclamation issued from time to time.

Publication.—Section 9. Copyright can be secured by *publication* with a *notice of copyright required by the Act* affixed to each copy of the work published or offered for sale by authority of the copyright proprietor. This is another technicality which adds to the difficulties of the U.S. Act. Omission to affix the notice invalidates the copyright.

Protection for certain Non-published Works.—Section 11. This is an important section for foreign authors, as it enables them to secure their copyright in the U.S.A. in certain forms of copyrightable property by registering one complete copy at Washington on the understanding that the work is not reproduced for sale in the U.S.A. Among such copyrightable property are dramatico-musical or musical compositions. In other words, U.S. citizens who have not published their works—for publication is a *sine qua non* of statutory protection—can obtain statutory copyright as distinct from the protection under the common law for non-published works. This clause is of greater importance to the foreign author of music who, for many reasons, may either not wish to or be unable to publish his work in the U.S.

Deposit of Copies.—Section 12. If the work has been published with the copyright notice attached, there shall be *promptly* deposited either in the mail or otherwise, addressed to the register of copyrights, Washington, two complete copies of the best edition of the work, or one complete copy as aforesaid if the author is a citizen or subject of a foreign country, and the work has been published in such foreign country, and the author cannot obtain an action or proceeding for infringement of copyright in any work until he has complied with the provision as to deposit of copies and registration. Non-registration will not invalidate copyright, but will lay the author open to penalties, and may seriously imperil the value of his property in case of infringement.

Section 15 deals with those works which are bound to be printed from type set up in the U.S.A. Music is not included in the list, but an English author should beware if he is publishing a book made up partly of letterpress and partly of music.

Copyright Notice, Form of.—Section 18 is an important section because it gives the form of the copyright notice required under Section 9, without which notice the copyright is incomplete. The notice must consist of the word 'copyright' or the abbreviation 'copr.', accompanied with the name of the copyright

proprietor and the year in which the copyright was secured by publication.

Section 19. The notice of copyright must be applied either upon the title-page or the page immediately following, or if a periodical either on the title-page or upon the first page of text of each separate number, or if a musical work either upon its title-page or the first page of music.

Section 20 deals with the loss that an author may suffer and the penalties to which he may be liable if he fails to comply with the provisions of the Act with respect to notice.

Term of Copyright.—Section 23 limits the term of copyright to 28 years from the date of first publication, provided that in certain cases only *the proprietor*, within one year prior to the expiration of the original term, can apply for and, subject to certain formalities, obtain extension of the original term for a further 28 years, subject to a second proviso—much more important to authors—by which the author of a work, if still living, or the widow, widower or children of the author, or if none of the above is still living the author's executors, or in the absence of a will his next of kin, within one year prior to the expiration of the original term, can apply for and, subject to certain formalities, obtain an extension of the original term for a further 28 years. If there is a failure to register the application for renewal and extension within the necessary time, the copyright lapses at the end of the first 28 years, but if the work is a composite work upon which copyright has been originally secured by the proprietor, and the part has not been separately registered, then the proprietor alone can secure extension subject to the formalities set out above.

Infringement of Copyright.—Section 25 sets out the liabilities to which an infringer is liable under the Act (*a*) to an injunction, (*b*) damages. The infringer has to pay to the copyright proprietor such damages as he may have suffered, as well as all profits which the infringer may have made by the infringement, or in lieu of actual damages and profits such damages as to the Court shall appear to be just. Then follows a suggested list of damages in certain cases. 'In the case of a dramatico-musical or a choral or orchestral composition, $100 for the first, $50 for every subsequent infringing performance. In the case of other musical compositions, $10 for every infringing performance.'

(*c*) To delivery upon oath, to be impounded during the pendency of the action, all articles alleged to infringe copyright.

(*d*) To delivery upon oath for destruction all the infringing copies, etc.

(*e*) Whenever the owner of a musical copyright has allowed the use of a copyright work for mechanical reproduction, then in the case of infringement of such copyright by an unauthorised manufacture, use or sale of mechanical records, etc., no criminal action shall be brought, but in a civil action an injunction may be granted, and the plaintiff shall be entitled to recover in lieu of profits and damages a royalty as provided in Section (1), Subsection (*e*).

Then follows a proviso, part of which ought clearly to have been inserted in another portion of the Act. The proviso deals with the notice that is requisite to the proprietor of the copyright whenever a person is desirous of reproduction on mechanical records, etc., and the additional penalties to which he is liable for failure to give the necessary notice. The next two clauses are not of much importance, but Section 28, dealing with penalties for wilful infringement, under which a person becomes guilty of a misdemeanour and is liable to imprisonment and a fine, has an important proviso that nothing in this Act should be construed to prevent the performance of religious and secular works, such as oratorios, cantatas and masses or octavo choruses by public schools, church choirs or vocal societies, rented, borrowed or obtained from some public library, public school, church choir, school choir or vocal society, provided the performance is given for charitable or educational purposes and not for profit. The proviso has been quoted at length as it contains so many curious limitations.

False Notice of Copyright.—Section 29. Any person who with fraudulent intent inserts or impresses a notice of copyright on uncopyrightable articles, or with fraudulent intent removes or alters the copyright notice on duly copyrighted articles, or knowingly issues or sells an article bearing a copyright notice which has not been copyrighted, or imports for sale any such article, is guilty of a misdemeanour and liable to a fine.

Importation.—Sections 30 and 31 deal with importation of non-copyrighted works, a few of which are allowed to be imported in special circumstances. To the latter clause there is an important proviso that copies imported as above may not lawfully be used to violate the rights of the proprietor of American copyright, or annul or limit the copyright protection secured by the Act.

Sections 32, 33, 34, 35, 36, 37, 38, all deal with the methods to stop importation, and the action to be taken, etc.

Limitation of Action.—Section 39 limits the time for commencing criminal proceedings to three years from the date when the cause of action arose.

Assignment of Copyright.—Section 41 asserts that the copyright is distinct from the material object copyrighted, and that the sale, etc., of the object shall not in itself constitute a transfer

of the copyright, and, *vice versa*, Section 42 deals with the right of the proprietor of the copyright to assign, grant or mortgage his copyright by an instrument in writing, and also states that the copyright may be bequeathed by will. This section is of some importance as it indirectly draws attention to a very important fact that the copyright under the U.S. Act is one and indivisible.

Section 43 deals with the necessity for recording an assignment in the Copyright Office to secure title against any subsequent purchaser or mortgagee.

Section 45 makes it mandatory for the Registrar to register the assignment.

Section 46 makes provision for the substitution of the assignee's name in the statutory notice prescribed by the Act.

The last six sections deal with assignment, most of these made necessary owing to compulsory registration.

Duties of Registrar and Librarian. — The duties of the Registrar and Librarian—chiefly of the former—are set out at length in the sections up to Section 60.

Fees.—Section 61 sets out the fees to be charged, and is of importance. For registration of any copyright work, $1, which sum includes certificate of registration under seal; 50 cents for every additional certificate. For rewriting an assignment, etc., $1, if not over 300 words in length; if more than 300, and less than 1000 words, $2; if more than 1000 words, $1 additional for each 1000 words or fraction thereof over 300 words. For recording notice of any specification, Section 1, Subsection (*e*), 25 cents for each notice, if not over 50 words, and an additional 25 cents for each additional 100 words. For comparing any copy of assignment with the record and certifying the same under seal, $1. For recording the extension or renewal of copyright, 50 cents. For recording the transfer of proprietorship of copyrighted articles, 10 cents, for each title of a book, in addition to the fee prescribed for recording the instrument of assignment. For any requested search of Copyright Office records, indexes, etc., 50 cents for each full hour of time.

Section 62 defines 'the date of publication' in case of a work, copies of which are reproduced for sale or distribution as the earliest date when copies of the first authorised edition were placed on sale, sold or publicly distributed by the proprietor of the copyright, or under his authority, and 'author' shall include an employer in the case of works made for hire.

This then is the end of the U.S. Copyright Act, one of the most intricate and confusing Acts, and one of the most difficult of interpretation.

Essentials.—But a British author of music must remember the essentials: To obtain copyright in the U.S.A. the work must be published in the U.S.A., and each copy so published must have upon it the copyright notice in the form required by the Act, and printed in the place required by the Act. Prompt registration at the Library of Congress, Washington, is also essential. Under Clause 11 of the Act it is possible by registration at Washington to secure statutory protection of the performing rights if copies of the work have not been produced for sale in the U.S.A., and so long as they are not so produced.

Presidential Proclamations.—The following proclamations have been issued by the President. It is to be noted that this protection does not include 'copyright controlling the parts of instruments serving to reproduce mechanically the musical work' provided in Section 1 (*e*) of the Act of Mar. 4, 1909, except in the case of the countries named in the second part of this list:

July 1, 1891.—Belgium, France, Great Britain and the British possessions, and Switzerland.
Apr. 15, 1892.—Germany.
Oct. 31, 1892.—Italy.
May 8, 1893.—Denmark.
July 20, 1893.—Portugal.
July 10, 1895.—Spain.
Feb. 27, 1896.—Mexico.
May 25, 1896.—Chile.
Apr. 11, 1899.—Spain.
Oct. 19, 1899.—Costa Rica.
Nov. 20, 1899.—Netherlands and possessions.
Nov. 17, 1903.—Cuba.
Jan. 13, 1904.—China.
July 1, 1905.—Norway.
May 17, 1906.—Japan.
Sept. 20, 1907.—Austria.
Apr. 9, 1908.—Convention between the United States and other powers on literary and artistic copyrights, signed at the City of Mexico. Jan. 27, 1902. (This treaty had previously been ratified and the ratifications deposited by the following countries: Guatemala, Salvador, Costa Rica, Honduras and Nicaragua.)
Aug. 11, 1908.—Japan.
Apr. 9, 1910.—Austria, Belgium, Chile, Costa Rica, Cuba, Denmark, France, Germany, Great Britain and her possessions, Italy, Mexico, the Netherlands and possessions, Norway, Portugal, Spain and Switzerland.
June 29, 1910.—Luxemburg.
May 26, 1911.—Sweden.
Oct. 4, 1912.—Tunis.
Oct. 15, 1912.—Hungary.
July 13, 1914.—Copyright Convention between the United States and other American Republics, signed at Buenos Aires, August 11 1910. (This Convention is understood to be in effect as between the United States and Bolivia, Brazil, Costa Rica, Dominican Republic, Ecuador, Guatemala, Haiti, Honduras, Nicaragua, Panama, Paraguay and Uruguay.)

Presidential Proclamations under Section 1 (*e*).

Dec. 8, 1910.—Germany.
June 14, 1911.—Belgium (effective July 1, 1909), Luxemburg (effective June 29, 1910) and Norway (effective Sept. 9, 1910).
Nov. 27, 1911.—Cuba.
Oct. 15, 1912.—Hungary (Copyright Convention between the United States and Hungary).
Jan. 1, 1915. — Great Britain. (British Order in council issued Feb. 3, 1915, effective Jan. 1 1915.)
May 1, 1915.—Italy.
Feb. 9, 1917.—New Zealand (effective Dec. 1, 1916).
Apr. 3, 1918.—Australia, and the territories of Papua and Norfolk Island (effective Mar. 15, 1918).
May 24, 1918.—France.
Feb. 27, 1926.—Sweden (effective Feb. 1, 1920).
Dec. 9, 1920.—Denmark.
Feb. 26, 1923.—The Netherlands (effective Oct. 2, 1922).

G. H. T.

COQ D'OR, LE, opera by Rimsky-Korsakov, produced Zimin's theatre, Moscow, May 1910; Drury Lane, June 15, 1914; New York, 1918; in English (Beecham), Drury Lane, July 19, 1918.

COQUARD, ARTHUR (*b.* Paris, May 26, 1846; *d.* Noirmontier, Aug. 20, 1910), a French composer, of a family of Burgundian origin.

Simultaneously with his legal studies, he began in 1865 to work at harmony with César Franck, but in the following year and for five years afterwards circumstances obliged him to discontinue his musical studies. Having taken the degree of 'Dr. jur.' in 1870 he accepted the post of secretary to a member of the Senate; but, supported by the encouragement of Franck, he devoted himself once more to composition, and in 1876 produced a ballade for baritone and orchestra, 'Le Chant des épées.' After a second interval of musical inactivity, lasting till 1881, numerous works were written, most of which were lyric or dramatic scenes for voice and orchestra, such as:

'Cassandre,' 'Héro et Léandre' (1881), 'Christophe Colomb,' 'Andromaque,' symphonic works on 'Ossian,' etc., a sacred trilogy, 'Jeanne d'Arc,' and choruses to Racine's 'Esther,' H. de Bornier's 'Agamemnon,' and Longhaye's 'Helvetia.'

His works for the stage include:

'L'Épée du roi' (2 acts, Angers, 1884); 'Le Mari d'un jour' (3 acts, Opéra-Comique, 1886); 'La Jacquerie' (4 acts, Monte Carlo, 1895), completed from a fragment left by Édouard Lalo; 'Jahel' (4 acts, Lyons, 1900); 'La Troupe Jolicœur' (3 acts and prologue Opéra-Comique, 1902).

Coquard, as musical critic to *Le Monde*, published there an excellent sketch of César Franck. He received from the Académie des Beaux Arts the 'Prix Bordin' for his book *De la musique en France depuis Rameau.* In 1892 he was appointed lecturer at the national institution for the blind. Coquard's music is distinguished by clearness, charm and exact dramatic sentiment. G. F.

COR ANGLAIS, see OBOE (2). (*PLATE V.* No. 5.)

CORANTO, see COURANTE.

COR-À-PISTONS, see HORN.

CORBETT, FRANCISQUE (real name, Francesco Corbetti or Corbetta) (*b.* Pavia, *c.* 1620; *d.* Paris, Mar. 1681), the best player of his time on the guitar.

After travelling in Italy, Spain and Germany, he settled for a time at the court of the Duke of Mantua, who sent him in 1656 to Louis XIV. He stayed for a few years in the French court, and then came to England, where Charles II. appointed him to an office in the Queen's household, with a large salary, and provided him with a wife. He was in Paris again in 1669, and again in London in 1674, 1677 (*Q.-L.*) and 1682, when he was heard by Evelyn. His best pupils were De Vabray, De Visé and Médard, who wrote a curious epitaph on him. M. C. C.

CORBETT, WILLIAM (*d.* Mar. 7, 1747/48), was an eminent English violinist at the beginning of the 18th century, composed for the Lincoln's Inn Fields Theatre, 1700–03, undertaking its direction in 1705–11.

He was leader of the band at the Opera House in the Haymarket on its first opening in 1705. On the production of Handel's 'Rinaldo' in 1711 a new set of instrumentalists was introduced into the opera orchestra, and Corbett, quitting his position in the Queen's band, went to Italy, and resided at Rome. He returned to London early in 1713 and gave concerts at Hickford's Room on Mar. 8 of that year and Apr. 28, 1714. He was appointed to the royal band of music, where his name appears from 1716–47. But for some part of this time he travelled in Italy, making occasional visits to Venice, Milan, Florence, Cremona, Bologna, Naples, etc., amassing during the time a large collection of music, and a most valuable assemblage of Italian violins, etc. Those acquainted with his circumstances were at a loss to account for his ability to make these purchases except by the supposition that he was a Government spy, employed to watch the movements of the Pretender. Corbett returned to England in 1740, and seems to have resumed his position in the royal band. He died at an advanced age. By his will he bequeathed his collection of instruments to Gresham College, providing also for the stipend of a person to show them, and for their care. The college authorities, however, rejected the gift on the ground that there was no room in the college for its reception, and the instruments were consequently sold by auction 'at the Great Room over against Beaufort Buildings, in the Strand, formerly the Hoop Tavern,' on Mar. 9, 1751. Corbett's collection of music was also sold by auction at his house in Silver Street, Golden Square. Before quitting England Corbett published several sets of sonatas for violins, flutes, oboes, etc.; some concertos for orchestra; and instrumental music for 'Henry IV.,' 1700; 'As you find it,' 1703; and 'Love Betray'd, or, The Agreeable Disappointment,' 1703. About 1729 he published 'Concertos, or Universal Bizzaries composed on all the new Gustos in his travels through Italy,' containing 36 concertos in two books, the first in four parts, the second in seven, professing to exhibit the different styles of various countries and cities (*D.N.B.*, etc.). W. H. H.

CORDANUS, BARTOLOMEO (*b.* Venice; *d.* Udine, May 14, 1757), a Franciscan monk; originally an opera composer who produced several operas at Venice between 1729–31. On June 14, 1735, he became maestro di cappella at Udine cathedral, and from that time to the time of his death he composed a large amount of church music, which is given by Fétis as 60 masses and more than 100 psalms. Some have appeared in modern editions. Eitner, who mentions also 24 sonatas for 2 violins and bass, has evidently not been able to trace many of the masses and psalms. (See *Q.-L.*) E. v. d. S.

CORDER, (1) FREDERICK (*b.* London, Jan. 26, 1852), showed from infancy a strong aptitude for music, which he was, however, not allowed to indulge, being at the age of 18 made to go into business.

From his first situation he was unexpectedly released by the pecuniary embarrassments of his employers, and he then persuaded his parents to let him enter the R.A.M., where his talent for original composition was quickly recognised. He only remained there a year and a half, as, on being elected to the Mendelssohn Scholarship, he was sent to Cologne, where he studied hard for four years under Dr. Ferdinand Hiller. Shortly after his return to England he was appointed conductor at the Brighton Aquarium, where by his talents and energy he raised the musical entertainments from the very low level at which he found them, and brought the orchestra to a better condition of efficiency. Corder's gifts and culture are wide and varied. During the years when music proved unremunerative he supported himself mainly by literary work, in much of which he had the co-operation and help of his accomplished wife. To this period belong those translations of the 'Ring' and other works of Wagner (signed H. and F. Corder), which were published in the editions of Schott, and thus became accepted as the official English versions. Several of his orchestral works have been performed at the Crystal Palace, the Philharmonic concerts and elsewhere. His romantic opera 'Nordisa,' written for the Carl Rosa Company, was produced on Jan. 26, 1887, at the Royal Court Theatre, Liverpool, with success. It has since been performed in several provincial towns, and was brought out at Drury Lane, May 4, 1887. After the death of Carl Rosa the chances of English opera became so faint that Corder found himself forced to devote himself to teaching. He accepted a post as professor of composition at the R.A.M., of which he became curator in 1889. He has trained many of the younger English composers, such as BANTOCK, BAX, HOLBROOKE (*q.v.*), and has made important literary contributions to musical education, including *The Orchestra and how to write for it* (1895) and *Modern Composition* (1909). He has also written the words for many of his own vocal compositions and provided librettos for certain of his contemporaries. For the centenary of the R.A.M. (1922) he compiled a short history of that institution, which he had served devotedly through a long career. Shortly after that event he retired from the curatorship.

Corder's principal published compositions include :

'Prospero.' Overture. 1885.
'Nordisa.' Romantic Opera. 1886.
'The Bridal of Triermain.' Cantata. (Wolverhampton Festival, 1886.)
'The Sword of Argantyr.' Cantata. (Leeds Festival, 1889.)
Elegy for 24 violins and organ. (R.A.M., 1908.)
Many songs, part-songs both for mixed and female voices, recitations to music. (See *B.M.S. Ann.*, 1920.)

(2) PAUL (*b.* London, Dec. 1879), son of the above, studied composition under his father at the R.A.M. and subsequently joined its staff. His Gaelic Fantasia 'Morar,' for orchestra, was produced by the Patrons Fund in 1908, but it, together with many other orchestral works, has remained unpublished. He is favourably known, however, by his several works for the piano. (See *B.M.S. Ann.*, 1920.)

F. A. M., with addns.

CORDIER, BAUDE (*b.* Rheims, *c.* 1400), one of the first representatives of the French art song, the outcome of the Italian Ars Nova of the 14th century. He describes his style as showing already that characteristic grace and quaintness of the French combined with the early arts of canon. Some of his songs are preserved in the libraries of Chantilly and Oxford. E. v. d. S.

CORDIER, JACQUES, known as BOCAN (BOCHAN, BOCQUAIN, BOCQUAM, as he signed himself) (*b.* Lorraine, *c.* 1580),[1] seems to have appeared first as dancing master and choreographer in England, *c.* 1610–11, for the production of court masques. He was considered the wonder of his time, not only for his dancing, but for his playing on the violin. 'He was unable to read music,' or to note it, but Mersenne admired his talent and 'his gift for modulating the tones of the violin.' In 1621 he married Radegonde Chefdeville, being then entitled 'maistre à danser de la reine' and inhabiting the Louvre. The following year, he is known to have been dancing master to 'Madame Henriette' (Henrietta Maria). He came with her to England and returned to Paris probably when the Civil War broke out. His name stands on the list of the deceased French Queen's officers in 1667, and his son GABRIEL became reversioner of his charge. 'His tomb at St. Germain l'Auxerrois was restored in 1843.'[2] He was dancing master to the aforesaid queens and to those of Spain, Poland and Denmark. Bocan's influence on French instrumental music was considerable. 'Chancy's "Tablature de Mandore" contains a graceful branle of his.'

BIBL.—J. ÉCORCHEVILLE, *Vingt suites d'orchestre du XVIIe siècle français*, 1906; P. REYHER, *Les Masques anglais*, 1909; H. PRUNIÈRES, *Le Ballet de cour en France avant Benserade et Lully*, 1914. M. L. P.

CORELLI, ARCANGELO (*b.* Fusignano, Imola, Feb. 12 or 13,[3] 1653; *d.* Jan. 10, 1713), a great violinist and composer.

He learnt counterpoint from Matteo Simonelli, and the violin from G. B. Bassani. Of the earlier part of his life but little is known. He appears to have travelled in Germany, and to have stayed for some time at Munich, attached to the court of the Elector of Bavaria. It is also related that he went to Paris in 1672, but

[1] *Fétis.* [2] *Ibid.*
[3] As to the actual dates of birth and death, which depend on the translation of Corelli's epitaph as copied by Burney in his *History*, vol. iii. p. 554, see *Q.-L.*

soon left it again, owing to Lully's jealousy. This however, according to Fétis, is very doubtful. Chrysander states that between 1680 and 1685 he spent some time in the society of Farinelli at Hanover. Some time before 1685 he returned to Italy and settled at Rome, where he published his first work, a set of twelve sonatas. He soon made a great reputation as performer and composer, and became a favourite in the highest circles of Roman society. Cardinal Pietro Ottoboni, an enthusiastic lover of the arts in general and of music in particular, was his great friend and patron. Corelli lived in the Cardinal's palace with certain intermissions (see below) up to the day of his death, conducting the concerts, which took place every Monday, and which were considered the most important and interesting events in Roman musical life. He also lived on terms of intimate friendship with some of the most eminent painters of the time, Cignani, Maratti and others, with whose assistance he formed a collection of valuable pictures. This collection, together with a not inconsiderable sum of money (about £60,000), he left in his will to his friend and benefactor the Cardinal, who, however, accepted the pictures only and handed over the money to Corelli's relations.

Intercourse with Handel and Scarlatti. —Corelli appears to have been of the most amiable disposition, and a model of truly artistic modesty. He was very simple and unpretentious in all his habits. Handel, though esteeming him highly, used to say of him : ' He likes nothing better than seeing pictures without paying for it, and saving money.' He dressed almost shabbily, and would on no account hire a carriage, but always went on foot. Hawkins, in his *History of Music*, gives an account of his meeting with Handel at Rome. Handel conducted some of his own cantatas, which were written in a more complicated style than the music with which Corelli and the other Italian musicians of that period were familiar. Handel tried in vain to explain to Corelli, who was leading the band, how a certain passage ought to be executed, and at last, losing his temper, snatched the violin from Corelli's hands and played it himself, whereupon Corelli remarked in the politest manner, ' Ma, caro Sassone, questa musica è nel stilo francese, di ch' io non m' intendo ' (' But, my dear Saxon, this music is in the French style, of which I have no experience '). It was the overture to ' Il trionfo del tempo,' which Handel, probably with special regard to Corelli, had written in the style of his concerti grossi with two solo-violins. It is a fiery impetuous piece, truly Handelian in character, and it is not difficult to understand how Corelli in his quiet elegant manner failed to attack with sufficient vigour those thundering passages. That Corelli, who in his own compositions never goes beyond the third position, might have been puzzled by this passage, which occurs in the same overture, is also possible, but it is hardly likely to have caused the scene described above.

His fame was not limited to Rome and Italy. From all countries young talents came to benefit by his instruction ; and his compositions were published in Amsterdam, Antwerp, Paris and London, as well as in Italy. Among his numerous pupils the most eminent were Geminiani, Locatelli, Somis, Baptiste and Castrucci.

Illustrious foreigners visiting Rome hardly ever failed to pay homage to Corelli. When Queen Christina of Sweden came there, he conducted in her palace the performances of an orchestra of 150 musicians. The King of Naples repeatedly tried to induce him to settle in his capital, and made him most favourable offers, which were, however, all declined by Corelli, who was not willing to give up his happy position at Rome, where he was universally loved and esteemed. In 1689 and 1690 he was at the court of Modena. It was not till about 1708 that he visited Naples, which town, with Alessandro Scarlatti as its leading musician and an excellent orchestra, was at that period by far the most important musical centre of Italy. Corelli was most anxious to ensure complete success in Naples, and, in order to be sure of effective accompaniment, took with him two violinists and a violoncello player. But he soon saw that this precaution had been superfluous. At the first rehearsal Scarlatti's band went through the introductory tutti of one of Corelli's concertos without a mistake, whereupon Corelli admiringly exclaimed : ' Si suona a Napoli ! ' (' They can play at Naples ! ') The king, however, did not appreciate his playing, and, pronouncing his adagio tedious, left the concert-room before Corelli had finished. But this was not all. Soon afterwards Corelli was leading the performance of a composition of Scarlatti, when, in a passage that probably was not well written for the violin, he made a very conspicuous mistake, while Petrillo, the Neapolitan leader, who was familiar with the passage in question, executed it correctly. Then came a piece in the key of C minor. Corelli, already disconcerted, led it off in C major. ' Ricominciamo ! ' (' Let us begin again ! ') said Scarlatti, with his usual politeness, and poor Corelli started once more in major, so that Scarlatti was at last obliged to point out his mistake. Corelli felt this incident as a great humiliation, and left Naples immediately. Returned to Rome he found that a new violinist, Valentini, had won the general applause and admiration of the public, and considering himself slighted and superseded, took it so much to heart that his health began to fail. In 1712 he published his last work, dedicated to his

admirer John William, Prince Palatine of the Rhine, and died in the following year. He was buried in a princely style in the Pantheon, not far from Raphael's tomb, and Cardinal Ottoboni erected a marble monument over his grave, the inscription on which bears testimony of the high esteem and admiration in which Corelli was held. For many years a solemn musical service was held on the anniversary of his death, when some of the great master's compositions were performed, conducted by one of his pupils. (See VIOLIN-PLAYING.)

POSITION IN HISTORY.—Corelli has a double claim to a prominent place in the history of musical art—as a great violinist who laid a firm foundation for all future development of technique and of a pure style of playing; and as a composer who materially advanced the progress of composition. Still there can be no doubt that above all he was a great violin-player, and that all he wrote grew out of the very nature of his instrument; and as the violin is not only a solo instrument but at the same time the leading orchestral one, we owe to Corelli the typical treatment of it in two important branches of composition. In his chamber-sonatas and concerti grossi (opp. 1, 2, 3, 4 and 6) he must be considered the founder of the style of orchestral writing on which the future development in this direction is based, while in the sonatas (op. 5) which have merely an accompanying fundamental bass, he gives a model for the solo sonata, and thereby for all writing for the violin as a solo-instrument.

All his works are characterised by conciseness and lucidity of thought and form, and by a dignified, almost aristocratic bearing. The slow movements show genuine pathos as well as grace, bringing out in a striking manner the singing power of the violin. The quick movements are not on the whole of equal merit with the adagios,—at least in point of originality of thought and variety of character. They appear to our modern feeling somewhat dry, almost exercise-like. (See SONATA.)

Corelli's gavottes, sarabandes and other pieces with the form and rhythm of dances do not materially differ from similar productions of his immediate predecessors and contemporaries, although, like everything that he wrote, they are distinguished by great earnestness and dignity of style, and are especially well adapted to the instrument. He was not so much an innovator as a reformer; he did not introduce new or striking effects; it cannot even be denied that his technique was a limited one—he never goes beyond the third position—but, by rigidly excluding everything that appeared to him contrary to the nature of the instrument, and by adopting and using in the best possible way everything in the existing technique which he considered conformable to the nature of the violin, he not only hindered a threatened development in the wrong direction, but also gave to this branch of the art a sound and solid basis, which his successors could and did build upon successfully.

The following are the titles of the original editions of his works:

(1) XII Suonate a tre, due violini e violoncello, col basso per l'organo, op. 1; Roma, 1683. (2) XII Suonate da camera a tre, due violini, violoncello e violone o cembalo, op. 2; Roma, 1685. (3) XII Suonate a tre, due violini e arcileuto col basso per l'organo, op. 3; Modena, 1689. (4) XII Suonate da camera a tre, due violini e violone o cembalo, op. 4; Bologna, 1694. (5) XII Suonate a violino e violone o cembalo, op. 5; Roma, 1700. The same arranged by Geminiani as Concerti grossi. (6) Concerti grossi con duoi violini e violoncello di concertino obligati, e duoi altri violini, viola, e basso di concerto grosso ad arb.trio che si potranno radoppiare, op. 6; Roma, 1712.

A number of spurious works were published under Corelli's name, but none are genuine except the above six. Many modern editions of these works exist, but the best and most authoritative is that of Joachim and Chrysander, published originally as one of the *Denkmäler der Tonkunst* and afterwards in Augener's edition in two volumes. P. D., with addns.

BIBL.—ANDREAS MOSER, *Arcangelo Corelli und Antonio Lolli, Zwei künstlerische Ehrenrettungen. Z.M.W.*, Apr. 1921, pp. 415-25.

CORFE, (1) JOSEPH (*b.* Salisbury, 1740; *d.* July 29, 1820), one of the choristers at the cathedral there under Dr. John Stephens, organist and master of the boys.

In 1783 he was appointed a gentleman of the Chapel Royal, and sang in the Handel Commemoration in the following year. In 1792 he succeeded Robert Parry as organist and master of the choristers of Salisbury Cathedral, which offices he held until 1804. Corfe composed and published a volume of Church Music, consisting of a service and eleven anthems, etc.; three sets of Glees, of twelve each; a Treatise on Singing; a Treatise on Thorough-Bass, a work still held in esteem; besides editing a Selection of Sacred Music made by James Harris, and other works.

His son, (2) ARTHUR THOMAS (*b.* Salisbury, Apr. 9, 1773; *d.* Jan. 28, 1863), became in 1783 a chorister of Westminster Abbey under Dr. Cooke. He subsequently studied the pianoforte under Muzio Clementi. In 1804, on the resignation of his father, he was appointed organist and master of the children of Salisbury Cathedral. He organised a successful festival at Salisbury on Aug. 19-22, 1828. A. T. Corfe produced and published a service and some anthems, several pianoforte pieces and *The Principles of Harmony and Thorough-Bass.* He died in the ninetieth year of his age, and was buried in the cloisters of Salisbury Cathedral, where a tablet was erected to him by his thirteen surviving children, one of whom

(3) CHARLES WILLIAM, Mus.D. (*b.* July 13, 1814; *d.* Oxford, Dec. 16, 1883), was organist of Christ Church, Oxford, from 1846; he took the degree of Mus.D. in 1852.

Another of A. T. Corfe's sons, (4) JOHN DAVIS (*b.* 1804; *d.* Jan. 1876), was organist of Bristol Cathedral from 1825 (*D.N.B.*). W. H. H.

CORFINI, JACOPO (*b.* ? Padua, 16th cent.;

d. Lucca, 1591), studied under Giaches Brunel (Brumel), and was appointed organist at Lucca Cathedral, Feb. 2, 1557. He composed concerti da chiesa 5-16 voices, 3 books of madrigals, and 2 books of motets, etc. (See *Q.-L.*)

CORKINE, William, probably a lutenist, published in 1610

'Ayres to Sing and Play to the Lute and Basse Violl. With Pavins, Galliards, Almaines and Corantos for the Lyra Violl,'

and in 1612,

'The Second Booke of Ayres, some to sing and play to the Base Violl alone; others to be sung to the Lute and Base Violl, with new Corantoes, Pavins, Almaines; as also divers new Descants upon old Grounds, set to the Lyra Violl.'

In some partbooks at Christ Church there is an anthem (*a* 5) 'Praise the Lord' by him; the bass part is missing. W. H. H.

CORNAGO, Fr. Juan, a Spanish or possibly Flemish composer of the beginning of the 16th century. Nothing is known of his life, but compositions by him, both secular and sacred, have been found in early MSS. Barbieri printed two *villancicos* ('Cancionero musical de los siglos XV y XVI,' Madrid, 1890), both for 3 voices, though one has a fourth part added by a later hand. Other works by him are in the Bibliothèque Nationale, Paris (No. 15,128: Suppl. MSS. français), consisting of French chansons; Bibl. Columbina, Seville (MS. Cantinelas Vulgares; 3 compositions): Staatsbibl. Vienna (Cod. 88), Gloria and Credo. J. B. T.

CORNELIUS, Peter (*b.* Mayence, Dec. 24, 1824; *d.* there, Oct. 26, 1874), a near relation of the painter of the same name, and as composer and author a prominent representative of what was in the mid-19th century the New-German school.

He was originally intended for the stage, and it was not till after his first performance, which seems to have been unsuccessful, that he decided to adopt music as a profession. His musical education had been incomplete, but his dramatic studies had made him acquainted with literature, and were of considerable service in developing his poetic faculties. After the death of his father (1844) he pursued music with energy and completeness, studying from 1845–50 with Dehn of Berlin; but his tendencies were forwards towards the modern ideal, rather than backwards to the strict rules of counterpoint. In 1852 he went to Weimar and joined the young artists who, under Liszt's leadership, were striving to carry out the ideas of the 'new' music. It was here that Cornelius became acquainted with Wagner's works, while with Liszt he formed ties of the closest intimacy. His active and versatile pen was of great service to the enterprise. He strove to elucidate the new principles in the *Neue Zeitschrift für Musik*, the organ of the party, both by original articles and by translating a series of lectures given in French by Liszt. As a practical embodiment of the new views he composed a comic opera, 'Der Barbier von Bagdad,' of which Liszt undertook the production, but so strong was the opposition that only one performance was given (1858), and this failure caused Liszt's retirement from his post. The opera was not revived until it was given at Munich (Oct. 15, 1885), when Cornelius's genius was fully recognised. Though it has never secured an established place in the international repertory, it has been given outside Germany, both in England and America. In 1858 Cornelius went to Vienna, where Wagner was then living, and became intimate with him also. When King Ludwig II. invited Wagner to Munich, Cornelius followed him there (1865), first as reader to the king, and later as professor of harmony and rhetoric at the Conservatorium, after it had been transformed into the 'Königliche Musikschule' with H. von Bülow as principal. Cornelius's grand opera the 'Cid,' produced at Weimar (1865), may be considered as the fruit of his intercourse with Wagner. He was working at another, entitled 'Gunlöd'—of which, after Wagner's example, he had himself taken the subject from the legends of the Edda—when he died. 'Gunlöd' was orchestrated by C. Hoffbauer and Ed. Lassen, and produced in 1891 at Weimar and 1892 at Strassburg. A duet from it was sung at the Sheffield Festival of 1902. The real strength of Cornelius as a composer lies in his many beautiful songs and choral works, which 50 years after his death are still the delight of singers and audiences. The following deserve mention: 'Duets for Soprano and Baritone,' op. 6; 'Liedercyclus,' op. 3; 'Trauerchöre' (for men's voices), op. 9; and above all, the 'Weihnachtslieder,' op. 8. Most of these are settings of his own poems. He published a volume called *Lyrische Poesien* in 1861, and an autobiography in 1874. The exquisite 'Vätergruft' for baritone solo and chorus *a cappella*, and the refined and expressive set of six 'Brautlieder,' were published after his death, the latter in 1878. Three more books of posthumous works, consisting of eleven songs and four duets, were edited by Max Hasse and published by Breitkopf & Härtel in 1898.

A complete edition of Cornelius's compositions in five volumes was undertaken by the same firm and edited by Max Hasse as follows:

Vol. I. Lieder und Gesänge (solo).
„ II. Lieder und Gesänge (concerted).
„ III. Der Barbier von Bagdad.
„ IV. Cid.
„ V. Gunlöd.

Literarische werke. Gesamtausgabe im Auftrage seiner Famile herausgegeben, 4 vols. (Leipzig, 1904.)

CORNELYS, Theresa (*b.* Venice, 1723; *d.* in the Fleet Prison, London, Aug. 19, 1797), a singer of notorious reputation, whose enter-

tainments at Carlisle House, Soho Square, engaged the attention of London Society between 1760 and 1777.

She made her first appearance in England as second woman in Gluck's 'La caduta de' Giganti' (Jan. 7, 1746). The best musicians of the day, including J. C. Bach and Abel, took part in her concerts, which secured the patronage of the royal family and the court. Though she was indicted before the Grand Jury (Feb. 24, 1771) for keeping 'a common disorderly house,' fashionable patronage continued for a few years until the newly opened PANTHEON (*q.v.*) offered a counter-attraction not to be resisted. (See *D.N.B.*)

CORNEMUSE, the Italian and French name for the BAGPIPE. (*PLATE IV.* No. 4.)

CORNET, (1) PIETER (PIETRO), a Netherlander, from 1593–1626 court organist at Brussels, composer of fantasias, dance tunes, and variations for organ in the style of the English school. (2) SEVERIN (*b.* Valenciennes, *c.* 1530; *d.* Antwerp, *c.* 1582), was master of the choir-boys at Malines Cathedral, 1571; choir-master at Antwerp Cathedral, 1577. Cornelius Verdonck was among his pupils. He composed several books of madrigals, motets, sacred and secular songs. E. v. d. S.

CORNET (1) (Fr. *cornet-à-pistons*; Ger. *Cornett*; Ital. *cornetto*). For a description of the instruments known by this name before the introduction of the modern valve system, see CORNETT. The name is now applied to a brass valve instrument, with cupped mouthpiece, intermediate in character and proportions between the trumpet and the bugle, and formerly also called Cornopean. It possesses the usual scale of open or harmonic notes, as follows:

but the B flat is slightly flat and the F is in pitch between F and F sharp, owing to the want of agreement between the natural harmonic and diatonic scales. (See *PLATE LXXXIV.* No. 1.)

The real fundamental, which is rarely made use of, is the octave below the lowest here given. The last four notes are extremely difficult, and are practically unused, the effective compass ending with C above the stave.

The relationship of the cornet to other brass instruments is treated under HORN, and the means by which its chromatic scale is obtained under VALVE, but a few special characteristics are noted here.

The instrument in C with harmonic scale agreeing in actual pitch with that written above is very little used. It is usually made with one shank for B♭ and another for A♮, and as it is treated as a transposing instrument, its actual pitch is a tone or a minor third lower than the written note, according to the shank in use. Extra crooks were formerly used down to F and even lower, but these have wisely been given up.

For military and brass band purposes, in addition to the cornet in B♭ a smaller cornet is made in E♭, the notes of which, therefore, sound a minor third higher than written.

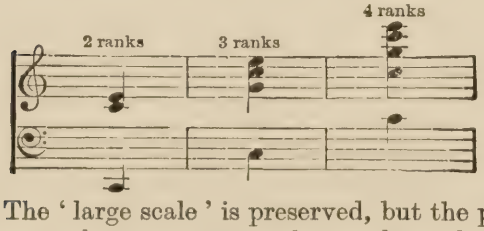
The bell of the instrument is of about the same size as that of the trumpet, but the tubing towards the mouthpiece tapers considerably, and this tapering has the effect of making the lower notes more easy to produce in tune than those on the trumpet. Although for brilliance and dignity of tone the cornet cannot equal the trumpet, and to this one may trace the reason why composers have been slow to introduce it into their scores, yet in the hands of a good player it has a distinctly vocal quality, and it is to be regretted that it is so often vulgarised.

In France cornets have always been used both in symphony and opera orchestras.

The cornet can be muted by the insertion into the bell of a pear-shaped piece of metal or wood so constructed as not to affect the pitch. There is also the echo-attachment, producing a distant-sounding quality of tone, known as the 'coffee-pot effect' among players. This attachment is incorporated as an independent bell, brought into action by a valve, and can thus be used instantaneously for echo effects. D. J. B.

CORNET (2). This name is given to several kinds of organ stops; among others to pedal reed-stops of 4 and 2 feet length in numerous Dutch and German organs. A 'Cornette' of 4 feet occurs in the cathedral organ at Kronstadt; a 'Cornetin' of 2 feet in the 'Old Church' organ at Amsterdam; and a 'Cornettino,' 2 feet, in the music hall organ at Boston, U.S.A.

The great organ Solo Cornet comprised either 5, 4 or 3 ranks of pipes. When of the former it consisted of a stopped diapason, principal, twelfth, fifteenth and tierce. When of 4 ranks the stopped diapason was omitted; when of 3, that and the principal were left out; so that the 'composition' on the middle C key stood thus—



and the one or two separate stops necessary were added or 'drawn' with the cornet when the series of 5 pipes was not complete. The pipes of the solo cornet were 4 or 5 'scales' wider or 'larger' than the corresponding pipes of the ordinary stops, to render the tone very powerful and broad; and very frequently, in order to make it still more prominent, the stop was placed on a sound-board of its own and raised a few feet above the surrounding pipes,

in which case it was called a '*mounted* cornet.' Father Smith's solo cornet at the Temple (4 ranks) was not mounted.

The Echo Cornet, of soft tone, and shut up in a box, was of 3 ranks, or 4 at most, the composition being as above given. 'Cornet Voluntaries,' as they were called, were in great vogue for a very long time, and consisted of runs and twirls for the right hand, played in single notes, first on the louder stop and then repeated on the softer, the left hand meanwhile playing a soft bass. So fashionable were these peculiar display pieces that Dr. Dupuis states on the title-page of his volume of voluntaries, containing specimens of the kind, that they were 'Performed before their Majesties at the Chapel Royal, St. Paul's Cathedral, etc.'; while Russell, in his book printed in 1812, shows that the attachment for the old Echo still lingered exactly a century after it had been improved upon by the invention of the Swell (in 1712), by directing at the head of one of his pieces 'The Swell Pedal *not* to be used in this movement.' The name 'Echo Cornet' is still frequently applied to a compound stop of small scale and light tone in swell organs. In many of the continental organs the cornet stop extends down to tenor C; and in some places it is used, on account of its strong and travelling tone, as an accompaniment to the priest's voice at the far end of the church. This is, or was, the custom a few years ago in many of the churches of Cologne, including the cathedral.

As the cornet is a compound stop that can be carried through the usual compass of a manual without any 'break' in its composition, it is sometimes looked upon as a good stop for covering the repetitions which necessarily occur in all compound stops that rise to a greater altitude than itself above the unison. At such times it is made as a 'progressive' stop; that is to say, it has fewer pipes in the bass, with an increasing number up to the middle of the keyboard. Beginning with two pipes on the CC key, a third rank is added at tenor C, and a fourth at middle C; and the stop starts with a fifteenth and tierce, to which are added first a twelfth and then a principal, thus—

The 'large scale' is preserved, but the pipes have only narrow mouths, and produce a pleasant and rather flute-like quality of tone. A stop somewhat of this kind occurs on the great manual of Schulze's fine organ in Doncaster parish church. E. J. H.

CORNETT (Cornetto, Cornet à Bouquin, Zinke), a melodic instrument very popular from the 10th to the 18th centuries. The only point of resemblance to the modern cornet lies in the cup-mouthpiece, which was, however, much shallower with a very thin edge, and made of horn, ivory or hard wood. The body of the instrument was usually of wood (sometimes ivory) and either straight or slightly curved. It was pierced with six holes for the fingers on the upper side and one for the thumb on the lower. If it was a curved cornett (Ger. *krummer Zink*; Ital. *cornetto curvo*), the exterior of the body was planed to an octagonal shape, covered with black leather and bound with metal ferrules. In the straight cornett (Ger. *gerader Zink*; Ital. *cornetto diritto*), the natural wood was shown and the body slightly lengthened so as to provide an additional hole for the little finger at the bottom of the compass. If the mouthpiece was made in one piece with the wooden body the straight instrument was called the mute or soft cornett (Ger. *stiller Zink*; Ital. *cornetto muto*). Curved cornetts were grouped into three principal sizes:

1. The Small Treble Cornett (*cornettino*) with a compass of about two octaves from alto D.

2. The ordinary Cornett (*cornetto*), with a similar compass from tenor A, a fourth below the small cornett.

3. The Great Cornett (*corno torto*), curved in S form, with a compass from tenor C (low key added), an octave below the small cornett. (See *PLATE LXXIV.*)

It is interesting to note that the earliest illustrations extant of curved cornetts appear in manuscripts of English workmanship dating from the 10th and 11th centuries, the straight cornett appearing in the 13th century: whereas in German illustrations the straight cornett is found in the 11th century and the curved form appears in the 12th century. Doubtless the curved form was derived from the shape of the natural horn of which the Norwegian 'Bukkehorn' or 'Prillarhorn,' pierced with five finger-holes, and used by the goat-herds, is a survival. The brilliancy of tone produced by a good cornettist was much admired, both for church and secular music. For instance, Roger North says in his *Memoires* (early 18th cent.):

> 'Nothing comes so near or rather imitates so much an excellent voice as a cornett pipe; but the labour of the lips is too great and it is seldom well sounded.'

About the same time, or a little earlier, Randle Holme tells us, 'It is a delicate, pleasant wind musicke, if well played and humered.' In 1604, Charles III., Duke of Lorraine, sent his cornett-player, Jean Presse, to England to secure the services of English cornettists, and the account books of many of our cathedrals show payments to such performers, the instrument being closely associated with the sack-

buts or trombones. Bach followed the usual practice of strengthening the upper voice parts in his Chorals and choruses with the cornett, and Gluck employed it in his operas, 'Paride ed Elena,' 'Orphée et Euridice,' 'Alceste,' 'Armida' and both 'Iphigenias.' Under WINDBAND, a 17th-century score is given, in which Zinken or cornetts provide the two upper parts. At the end of the 16th century the body of the great cornett was doubled in length and produced the SERPENT (*q.v.*). The fact that these instruments are furnished with finger-holes has led some writers into the curious error of imagining that they were 'reed' instruments of the oboe kind. F. W. G.

CORNETTE, VICTOR (*b.* Amiens, Sept. 27, 1795; *d.* Paris, Feb. 19, 1868), a musician of indefatigable activity. He was the son of Louis Hippolyte Cornette (1760–1832), an organist of the Cathedral of Amiens, and entered the Paris Conservatoire in 1811, studying composition under Lesueur.

He served in the band of the 'Grenadiers Tirailleurs de la Garde Impériale' in 1813 and 1814, and was at Waterloo; was professor at the College of St. Acheul from 1817–25; member of the orchestra at the Odéon (1825), Opéra-Comique (1827); chorus master at the Opéra-Comique (1831–37); director of singing at the Gymnase de Musique Militaire (1839); conductor of the Strassburg theatre (1842); chorus master to the Opéra (1847); and again chorus master at the Opéra-Comique (1848); also trombonist in the band of the Garde Nationale, and deputy organist at St. Sulpice and the Chapel of the Invalides. Cornette composed an enormous mass of music for every variety of instrument, and published *méthodes* for trombone, ophicleide, cornet-à-pistons, bugle, saxhorn, saxophone, bassoon, oboe, horn, trumpet, harp, violoncello, viola, organ and harmonium. M. C. C.; addns. M. L. P.

CORNISH, THOMAS (*d.* 1513), Bishop of Tine, assistant Bishop of Bath and Wells from 1490–1513, was Prior and Master of the Hospital of St. John Baptist, Wells, and is said to have composed some motets. He was installed Prebendary of Cudworth on Oct. 29, 1494, with licence to reside in St. John's Hospital; and on July 28, 1497, was appointed perpetual vicar of St. Cuthbert's Church, Wells. In Apr. 1499 he was installed Chancellor of the Cathedral, and on Sept. 4, 1502, he was installed as Precentor. It is not unlikely that some of the compositions attributed to 'Master Cornish' may have been the work of this Thomas Cornish, and not of William Cornish (see CORNYSHE). It is remarkable that during the Precentorship of Bishop Cornish, Wells Cathedral could boast of such fine musicians as Robert Wydow, Mus.B., Richard Bramston, John Cole, William Huchins, Richard Hygons, John Clawsy, Mus.B., John Chambers and John Gye. W. H. G. F.

CORNO, the Italian term for HORN.

CORNO DA TIRARSI, a horn fitted with a slide to enable the player to fill up the gaps of the scale in the harmonic series. (See TROMBA DA TIRARSI.)

CORNO DI BASSETTO. (1) See CLARINET (2).

(2) Another name for the clarinet stop of the organ, especially of its suitable bass.

CORNO DI CACCIA, hunting-horn, the French horn. The name often occurs in J. S. Bach's scores. (See HORN.)

CORNO FLUTE, a manual 8-ft. organ stop of very soft tone, invented by Herbert Norman.

CORNOPEAN, a name originally applied to the cornet-à-pistons, though now disused. It still sometimes appears as an organ stop, 8-ft. reed.

CORNU (Lat.) = Horn. As in modern music, corno, the Italian form of this word, stands for the orchestral or French horn; the use of the word cornu is now practically confined to the instruments so named used by the Romans. The cornu was a short curved horn of the bugle character, corresponding to the mediæval bugle and oliphant. One in the British Museum is of bronze, curved to nearly a half-circle, and is about 45 inches long. Its pitch is about D♭ or a minor third higher than that of the modern infantry bugle. The distinction between the cornu and the BUCCINA (*q.v.*) is not always clear, and the names may sometimes have been interchangeable. (See LITUUS and TUBA.) D. J. B.

CORNYSHE, WILLIAM[1] (*b. circa* 1465; *d.* 1523), composer, dramatist and actor, and producer of interludes and pageants at the court of Henry VIII. The first record of him occurs in the Household Book of Henry VII., under the date Nov. 12, 1493, where a payment is entered 'to one Cornyshe for a prophecy in rewarde, 13s. 4d.' He probably entered the King's Household about 1492, but it is not until 1496 that there is any record of him as a gentleman of the Chapel Royal. In 1502 he received 13s. 4d. for the 'setting of a carralle upon Christmas day,' but two years later was confined in the Fleet prison, apparently because of some satirical writings. During his incarceration he wrote a poem entitled 'A treatise between Truth and Informacion,' some extracts from which are given in Hawkins's *History of Music*. William Newark, the master of the children of the Chapel Royal, being in ill-health, Cornyshe formally took over his duties on Sept. 29, 1509. Between 1508 and 1516 Cornyshe, William Crane and a 'Mr. Kite' were the principal performers in the court plays, as appears from a

1 Some confusion has been caused by the number of entries in the Chapel Royal records and elsewhere, under the name of Cornyshe. It has been supposed that there were two William Cornyshes, father and son, more particularly as some songs in Add. MSS. 5465 are designated as by 'W. Cornishe, jun.' This is not established, however, with any certainty, but see *The Elizabethan Stage*, E. K. Chambers vol. ii. p. 29, where all the contemporary documentary evidence concerning the family is assembled. J. MK.

series of payments similar to one of £6 : 13 : 4 in 1508, when 'Mr. Kite, Cornishe, and other of the Chappell . . . played affore the King at Richmonte.' He continued in charge of the music at the pageants, banquets, masques, plays and devices at court, and officiated in this capacity at the Field of Cloth of Gold (June 1520). Apparently Cornyshe suffered from ill-health about 1521, and on Aug. 20, 1523, he was granted the manor of Hylden, Kent. He died soon afterwards, and was succeeded by William Crane in 1526.

Cornyshe was a great favourite with Henry VIII., and at one time received a sum of £200 from him 'upon a warraunt, in rewarde,' but this possibly included gratuities to other workers in the Chapel. The King himself, as is well known, was no mean composer, and there is a collection of partsongs, chiefly for 3 voices (B.M., Add. MSS. 31,922), in which no less than 38 compositions by Henry VIII. are bound up with the following works of Cornyshe:

Trio (for strings or voices), 'Adeu, mes amours' (with second part 'Pardona moy'), 'Adeu, adeu my hartes lust, 'Ah, the syghs,' 'Adeu, Corage,' 'Blow thi horne, hunter' (also in Roy. Lib. 58), 'My love she morneth' (duet), 'A Robyn,' 'Trolly, lolly lolly losynge,' 'While lyve or breth,' and 'You and I and Amyas.'

Of the 3 partsongs by him in the Fayrfax Collection (B.M., Add. MSS. 5465), two were printed by Hawkins in his *History of Music.* They are particularly interesting, as they show that secular music, even of a humorous and satirical nature, was written and practised at an early date, and that the preponderance of sacred music of the period which remains to us may be explained, in part, by the convenience for their preservation in cathedral and college libraries. Thus, in this group of songs, the first is an excellent setting of a humorous poem in four sections by John Skelton, whose jumbling metres and crude crazy satires are as far removed from the spirit of motet and madrigal as can be imagined; the second, beginning 'Hoyda, hoyda joly rutterkyn,' is supposed to be a satire on the drunken Flemings who came to England with Anne of Cleves on the occasion of her marriage with Henry VIII. In Wynkyn de Worde's song-book (1530) there are also the bass parts of four songs by Corynshe: 'Paternoster,' 'Pleasure it is,' 'Concord as musicall,' and 'Fa la sol.' Of his sacred music there are four compositions in the choir books at Eton, a Magnificat in the library of Caius College, Cambridge, the medius part of a 5-part motet, 'Salve regina mater misericordiae' (B.M., Harl. MSS. 1709/51*b*), and an Ave Maria for 5 voices (R.C.M.).

For further details and extracts from the Household Book of Henry VIII., see an article by Dr. Grattan Flood in *Mus. T.*, Nov. 1919. For an account of his career as court dramatist, actor and producer, see Professor Wallace's book, *Evolution of the English Drama up to Shakespeare*, Berlin, 1912. J. M[K].

CORONA, a synonym for Fermata or Pause, of somewhat rare occurrence; a familiar instance of its use is in the 'Virgo virginum' of Dvořák's Stabat Mater, in which *senza corona* is placed over the last note of the movement in the vocal parts to emphasise the fact that the instruments alone hold out the pause. M.

CORONACH (Gaelic), a funeral cry, from *co*, 'together'—analogue of the Latin *con*—and *ranach*, 'a shrieking or weeping': root *rān*, 'a shriek or cry.' This was the dirge chanted in former times in Celtic Scotland by the Bard or Seannachie on the death of the chief or other great personage of a clan. In some degree it resembled the song of praise composed and led by special bards: the genealogy, the virtues and the great deeds of the deceased were recounted in pathetic verse to plaintive wild music, the bard giving vent to his own grief, while the sounds of the harp and the wailings of women excited that of the hearers. However rude, it appears to have been rhythmical, and was chanted in recitative. Although the great funeral ceremonial, of which the dirge was only a part, must have been confined to persons of distinction, yet in all cases the coronach was indispensable, as without it, according to popular belief, the spirit was condemned to wander forlorn, bewailing its miserable fate that this rite had been denied to it. These ceremonies had, however, no religious significance; the virtues, heroism and achievements of the dead were alone their subject; and the rite continued thus to be observed in Ireland and the Highlands of Scotland long after the conversion of the people to Christianity. Dr. Stewart of Nether Lochaber wrote:

'Our oldest Gaelic Laments are to this day to be chanted rather than sung; and I can recollect an old seannachie in the Braes of Lochaber, some thirty-five years ago, chanting MacIntosh's Lament to me, in a style of recitative that impressed me greatly; his version of the well-known and beautiful air being in parts very different from that printed in our books; and if ruder and wilder, all the more striking because of its naturalness.'

Sir Walter Scott mentions the coronach as a part of the funeral rite when the body of the chief of clan Quhele was borne to an island in Loch Tay (*Fair Maid of Perth*, chap. xxvii.): and again in *The Lady of the Lake* (canto iii.) he introduces the coronach in the beautiful verses, beginning, 'He is gone on the mountain.' In a note he also gives a translation of a genuine Gaelic coronach. In ordinary cases of death this dirge was simply the expression of the grief of the women of the clan for the loss of a protector or breadwinner, intensified by the genius of a poetic and highly imaginative people.

These funeral customs must have prevailed in Scotland before the advent of the Romans, and been handed down from prehistoric times,

for they were confined to the Gaelic-speaking districts north of the wall of Antoninus, and W. F. Skene has now proved beyond a doubt that the Picts, the inhabitants of that region, were a Celtic race, their language being Gaelic with traces of Cornish. In Scotland in modern times the rhapsody of the bard and the wail of the women are no longer heard: the name Coronach has been transferred to the Cumhadh or musical lament, a kind of pibroch now played by the pipers who lead the funeral procession. These pibroch laments are in a peculiarly weird, wild style, well suited for the bagpipe, but not capable of being reproduced on any other instrument. They begin with a simple *motivo*, and this is worked up, with ever-increasing intricacy and rapidity of notes, through a number of divisions or variations, till the same simple wild strain reappears as the close. Some of these laments have a high reputation, such as those of MacIntosh, MacLeod, MacRimmon (*Cha till mi tuille*—I return no more). The last is often played as the emigrant's farewell to his country.

In Ireland these funeral rites would seem to have been celebrated in early times on a much grander scale than in Scotland. Professor Sullivan, in his excellent *Introduction to O'Curry's Lectures on the Manners and Customs of the Ancient Irish*, quoting from the Book of Ballimote and other Irish MSS., shows that in many cases a funeral pyre was erected, the favourite dogs and horses of the deceased slain and burned with the body, and that, in one instance at least, there was an extraordinary addition to the ceremonial. This took place at the funeral of Fiachra, the son of Eochad Muidhmeadhan. He had won a great battle in Munster, and was returning home to Temar (Tara) with the spoil and hostages taken from the enemy:

'When he reached Ferud in Meath, Fiachra died of his wounds there. His *Leacht* (stones set up to protect the urn) was made; his *Fert* (mound of earth) was raised; his *Cluiche Caintech* (pyre) was ignited; his Ogham name was written; and the hostages which he had brought from the South were buried alive round the *Fert* of Fiachra, that it might be a reproach to the Momonians for ever, and that it might be a trophy over them.'

The *Cluiche Caintech* here used for the pyre was properly the whole funeral rite, and included the burning of the body, the enclosing of the ashes in the urn, the recitation of dirges, and the performance of games. When in Christian times burial took the place of cremation, some of these observances survived, in particular the dirge or wail, while the lighted candles are supposed to represent the ignition of the pyre. Much information of the most interesting nature will be found in Professor Sullivan's work, and not altogether confined to matters of antiquity. The Irish *Cumadh* or CAOINE (*q.v*) was somewhat similar to the *Ochone*, an example of which is in the *Fitzwilliam Virginal Book* (ed. Fuller Maitland and Squire, vol. i. p. 87).

Much interesting matter regarding Celtic customs will be found in O'Curry's *Lectures*; Walker's *Memorials of the Bards*; Logan's *Gael*, edited by Dr. Stewart, and an admirable chapter on the ethnology of the country in W. F. Skene's *Celtic Scotland*. J. M. W.; addn. W. H. G. F.

CORREA, FR. MANOEL (*b.* Lisbon, *c.* 1600; *d.* Saragossa, Aug. 1, 1653), a Portuguese musician who was for a time maestro de capilla at Sigüenza in Spain, and then passed to the Cathedral of La Seo at Saragossa, where he was especially valued for his *villancicos*. Pedrell (*Teatro lírico*, iii. 39) prints a *Bailete*; and a large number of secular works by him for 3 and 4 voices are to be found in the MS. 'Libro de tonos humanos' collected by Diego Pizarro (Madrid, Bibl. Nac. M. 1262). Four sacred works are in the Bibl. de Coro, Seville Cathedral. J. B. T.

CORREA, HENRIQUE CARLOS (*b.* Lisbon, 1680; *d.* after 1747), a Portuguese composer and brother of the military order of S. Tiago (St. James), who was choir-master at Coimbra. His works include Responsorios, Lamentations, etc., a list of which is given by Vasconcellos (*Os musicos Portuguezes*, p. 55). J. B. T.

CORREA DE ARAUJO (ARAUXO), FRANCISCO (*b.* ? Portugal, ? 1581; *d.* Segovia, 1663 ?), a church musician said to have been organist of S. Salvador, Seville, and subsequently a professor at the University of Salamanca and Bishop of Segovia. Vieira, however, doubts this. (*Dict. Biogr. de musicos Portuguezes*, i. 44 ff.) A collection of organ-pieces 'Libro de Tientos y discursos de musica practica . . .' was printed at Alcalá de Henares in 1626. J. B. T.

CORRETTE, MICHEL (*b.* St. Germain, early 18th cent.), was probably a Netherlander (*Q.-L.*). In 1738 he was organist at the Jesuit College, Paris; afterwards organist to the Duc d'Angoulême. He composed masses, motets, pieces for harpsichord, organ, violin, vielle, flute, musette, etc. He also wrote valuable tutors for the voice and all the principal instruments, and compiled an important collection of old violin music, 'L'art de se perfectionner dans le violon.' (For list of works, see *Q.-L.*) E. v. d. S.

In the Catalogue of his works given on p. 4 of his *Maître de Clavecin*, 1753, is mentioned a *Méthode pour la harpe*. M. P.

CORRI, DOMENICO (*b.* Rome, Oct. 4, 1746; *d.* Hampstead, May 22, 1825), studied under Porpora from 1763–67; was invited to Edinburgh in 1771 to conduct the concerts of the Musical Society, and settled there as a publisher and singing-master.

His first publication was a small oblong quarto dated 1772, 'Six Canzones dedicated to Scots Ladies.' He quickly made a reputation and became proprietor of some recreation

and concert gardens near Edinburgh. He brought out his 'Alessandro nell' Indie' in London in 1774, and engaged in theatrical speculation in Edinburgh, taking the Theatre Royal, but the enterprise failed, and Corri was 'sequestrated' in 1779, shortly after which his business as publisher was carried on under the name of his son, John Corri (see CORRI & Co.). In 1787 Corri joined Mazzinghi and Storace in writing additions to Paisiello's 'Re Teodoro,' and he seems to have settled in London about 1790. He entered into partnership with Dussek, who married his daughter in 1792, and for a time success followed him. His opera 'The Travellers' was produced Jan. 22, 1806. He also wrote a large number of songs; sonatas, airs and rondos; *The Art of Fingering*, 1799; *A Musical Dictionary*, 1798; *A Musical Grammar* and *The Singer's Preceptor*, 1810. For Natale Corri his brother, and Montague Corri his son, see CORRI & Co.

Another son, PHILIP ANTONY, was one of the original promoters of the Philharmonic Society, and finally settled in America.

Another, HAYDN (*b.* 1785; *d.* Feb. 12, 1860), settled in Dublin as a pianoforte teacher in 1821, and from 1827–48 was organist and choirmaster of the R.C. Pro-Cathedral, Dublin. (*D.N.B.*; *Brit. Mus. Biog.*; *Q.-L.*; information from F. K. and W. H. G. F.) M.

CORRI & CO. London and Edinburgh music publishers. As stated above (see CORRI, D.), Domenico Corri had, about 1780, started a small music business in Edinburgh, using his son's name, John Corri, probably on account of his own monetary difficulties. In 1780 he, or his son John, was in partnership with James Sutherland, and they opened a shop at 37 North Bridge St. in 1783. On the death of Sutherland in 1790 Domenico removed to London and established himself as a music-seller and publisher at 67 Dean St., Soho. His daughter having, in 1792, married J. L. Dussek the composer, the latter went into partnership with his father-in-law, and as 'Corri, Dussek, & Co.' the firm made great advances, taking additional premises at 28 Haymarket. Meanwhile the Edinburgh business as 'Corri & Co.' had also opened another shop at 8 South St. Andrew St., still retaining the one in North Bridge St.

The London and Edinburgh firms were closely connected, the Scotch business being probably under the management of NATALE CORRI (1765–1822), younger brother of Domenico, and others of the family. The two firms issued quantities of all classes of music, including many Scottish dance and vocal pieces as well as the compositions of Dussek and of Corri, and some works by Haydn.

In 1801 the Corri-Dussek firm in London got into financial difficulties, and Dussek had fled to the continent in 1800 to avoid his creditors. In 1802, and for a couple of years afterwards, D. Corri kept on the Haymarket business alone, until his son, MONTAGUE (*b.* Edinburgh, 1784; *d.* London, 1849), took it over under the style 'M. P. Corri & Co.' In 1805 it stood 'M. P. Corri, Hall, & Co.' and became, in 1806, 'Corri & Pearce.' Corri entirely dropped out in 1807–08, while Pearce & Co., after having spent some little time at 28 Haymarket, removed to 70 Dean St., and ultimately to 24 Panton St., Haymarket. The Edinburgh CORRI & Co. came to grief at the same time as the London firm, and Natale Corri set up for himself at the head of Leith Walk, the business ceasing at his death in 1822. F. K.

CORRI-PALTONI, MME. FRANCES (*b.* Edinburgh, 1801), a dramatic singer of ability, daughter of Natalie Corri, and niece of Domenico, studied under Catalani in 1815 and 1816.

She sang in London (1820); in Germany; in Italy, where she married Paltoni, a singer; in Madrid (1827); and with Lablache in Milan (1828). In 1830 she returned to Germany. Her voice was a fine mezzo-soprano, with a brilliant shake. M. C. C.

CORSI, JACOPO (*d. circa* 1604), a Florentine nobleman whose house is to be regarded as the birthplace of opera.

The 'Dafne' of Peri (1597), and Peri's 'Euridice' (1600), were first performed in his house, Corsi himself playing the harpsichord. (See Vogel, *Bibl. der weltl. Mus. Italiens, s.v.* Peri.) Corsi had also some part in the composition of 'Dafne,' and his setting of some of the songs is the only fragment that has been preserved of that work. They are in the library of the Paris Conservatoire (MS. 8450), and were published by Fritzsch in the *Musik. Wochenblatt*, 1888, p. 347. (*Q.-L.*) M.

CORTECCIA, FRANCESCO DI BERNARDO (*b.* Arezzo, early 16th cent.; *d.* Florence, June 7, 1571), in 1531 organist of S. Lorenzo in Florence, and in 1539 maestro di cappella to Cosimo I.; also a canon of S. Lorenzo. His compositions include:

Nine pieces for 4, 6, and 8 voices with various instruments, in a rare work called 'Musiche fatte nelle nozze, etc.' (Venice, Gardano. 1539), a continuous series, part of a performance in honour of the marriage of his patron; 'Madriali (*sic*) a quattro voci,' lib 1 and 2 (*ib.* 1544 and 1547); 'Primo libro de' madriali a 5 e 6 voci' (*ib.* 1547); 'Responsoria et lectiones hebdomadae [s]anctae' (*ib.* 1570); 'Residuum cantice Zachariae' *a* 4 (apparently forming part of the 'Responsoria') (*ib.* 1570); and 'Canticorum liber primus' *a* 5 (*ib.* 1571), published a few months after his death.

A copy of the madrigals is in the Library of Ch. Ch., Oxford. The Library of S. Lorenzo also contains 32 hymns in 4-part counterpoint. Corteccia, with Striggio, composed music for Cini's intermezzo 'Psichè e l' Amorino,' for the marriage of Francesco de' Medici and Joanna of Austria in 1565. Two four-part madrigals, and an extract from the 'Responsoria' are given in Torchi's *Arte musicale in Italia*, vol. i.

M. C. C., with addns.

CORTELLINI, Camillo (beginning of 17th cent.), composer of church music, in the service of the municipality of Bologna from about 1583. From his proficiency on the violin he went by the name of Il Violino.

Vincenti of Venice published several volumes of his works, consisting of Psalms (1595, etc.), Litanies (1615), Masses (1609, 1617, 1626) and other sacred pieces, and other printers at Ferrara and Bologna issued three books of madrigals in 1583, 1584 and 1586. (See *Q.-L.*) The preface to one of these volumes, 'Messe concertate a otto voci' (1626), is interesting because it gives a hint of the manner in which in those times the instrumental and vocal parts were combined in church music. The passage alluded to is as follows:

'La Messa *In Domino confido* ha la Gloria concertata; e dove saranno le lettere grandi, il cantore canterà solo; e dove saranno le linee, i tromboni e altri simili stromenti soneranno soli.'

E. H. P.

CORTOT, Alfred (*b.* Nyon, Switzerland, Sept. 26, 1877), of French parents, conductor and pianist.

He came to Paris as a child and received his first piano lessons from his sisters. He was admitted to the Conservatoire and became a pupil successively of Decombes (one of the last of Chopin's disciples) and of Diémer, in whose class he obtained in 1896 a brilliant *première prix*. He became known immediately at the Colonne and Lamoureux Concerts as a remarkable interpreter of Beethoven's concertos, and began his triumphal piano tours through Europe. He then became an assistant conductor at Bayreuth, where he was specially in touch with Felix Mottl and Hans Richter. On his return to Paris, 1902, he founded 'La Société de Festival Lyrique' and made his début at 24 as conductor and theatrical director by giving the first performance in Paris of 'Götterdämmerung' and some admirable productions of 'Tristan': unforgettable remembrances for the artists who took part in the performances.

In 1903 Cortot founded a concert society and gave important choral works, being responsible for the first performance in Paris of 'Parsifal,' Liszt's 'St. Elizabeth,' Brahms's Requiem, Beethoven's Mass in D, and unpublished works by Magnard, Albert Roussel, Chausson, Ladmirault, side by side with well-known ones by Chabrier and Vincent d'Indy. In the following year Cortot undertook the direction of the orchestral concerts given by La Société Nationale, and introduced a great number of unpublished works by composers of the young French school. Cortot was also engaged by the Société des Concerts Populaires, Lille, to conduct their orchestral concerts, which gave to the town four seasons of great artistic activity.

In 1905 Cortot founded with Jacques Thibaud and Pablo Casals a trio which gained international fame. In 1917 he succeeded Raoul Pugno as professor in the highest pianoforte class at the Paris Conservatoire, where he obtained the greatest success. He has now retired in order to fulfil his many engagements in the United States and in England; Lazare Lévy has succeeded him.

Throughout, Cortot has remained faithful to the École Normale de Musique, in the foundation of which he actively co-operated; and each year he never fails to give courses in interpretation and technique designed to meet the needs of diploma pupils from the great conservatoires of France and of other countries. He has also found time to publish articles on the piano music of Fauré and Debussy (*Revue musicale*, Dec. 1920 and Oct. 1922; English translation of the essay on Debussy, Chester, London); piano transcriptions of orchestral works by Fauré and a splendid working edition of the 'Études' of Chopin with valuable notes (Sénart).

Cortot excels in the interpretation of music of the romantic and modern schools; he has amazing gifts as a pianist, and whether he is conducting or sitting at the piano he uses his gifts with an equal mastery. While he commands impetuosity and force, he possesses no less delicacy, accuracy and above all a penetrating sensibility which charms and holds his hearers.

F. R[L].

CORYPHÆUS (Gr. κορυφαῖος), chorus-leader, an officer on Dr. Heyther's foundation at Oxford, intended by the founder to take the lead in the musical exercises conducted by the Choragus. The duties of the Coryphæus have long been imaginary: his salary was never more than nominal.

C. A. F.

COSÌ FAN TUTTE, ossia La scuola degli amanti, Ger. Weibertreue, opera buffa in 2 acts, libretto by Da Ponte, music by Mozart; produced Vienna, Jan. 26, 1790; London, King's Theatre, May 9, 1811; in English, by the R.C.M., Savoy Theatre, July 16, 1890. Various attempts have been made to improve the libretto, as 'Le Laboureur chinois' (1807), 'Peines d'amour perdues' (Barbier & Carré, 1863). In England as 'Tit for Tat,' English Opera House (Lyceum), July 29, 1828; 'The Retaliation,' Lyceum, Apr. 14, 1841; 'School for Lovers' (Marmaduke Brown), 1890.

COSIN, see Cosyn, John.

COSSMANN, Bernhard (*b.* Dessau, May 17, 1822; *d.* Frankfort, May 7, 1910), an eminent violoncellist, son of a Jewish merchant.

His first instructors were Espenhahn and Karl Drechsler at Dessau, Theodor Müller at Brunswick, and Kummer at Dresden. After completing his studies, Cossmann went to Paris in 1840, where he played in the orchestra of the Opéra, and thence to London (1841), in the then palmy days of Italian opera. In 1843

he was an acknowledged master of his instrument in Germany. Mendelssohn secured him in 1847 for the Gewandhaus concerts, and he utilised his stay in Leipzig by studying under Hauptmann. His appointment as first violoncello under Liszt at Weimar, in 1850, exercised an important influence on his career. He had a considerable share with Joachim, and also with Bülow and Tausig, in the movement which took place under Liszt's leadership. In 1866 he became professor at the Conservatoire at Moscow, where he worked with Laub and Nicolaus Rubinstein until his return to Germany in 1870. He lived without any fixed appointment at Baden-Baden, 1870–78, when he became professor at the Hoch Conservatorium, Frankfort. Cossmann was a great soloist, and an excellent chamber musician, above all in quartets. A. M.

COSSONI, Carlo Donati (*b.* Milan, early 17th cent.; *d.* Gravedona, Feb. 8, 1700), priest, and first organist at S. Petronio, Bologna, *c.* 1660–71; maestro di cappella, Milan Cathedral, 1689. He composed a large amount of church music of all kinds, as well as a book of secular canzonets (list in *Q.-L.*). His MS. compositions he bequeathed to the monastery of Einsiedeln. E. v. d. S.

COSTA, André de (*c.* 1700), a Portuguese composer of chamber-cantatas, preserved in Bibl. Nac., Lisbon (Pombal MSS., 82), one of which is dated 1708. He is said to have been a member of the Brotherhood of Santa Cecilia at Lisbon, for which he composed 'Vilhancicos' in 1721 and 1722.

The Costa e Faria mentioned by Vasconcellos in 'Os Musicos Portuguezes' as a composer of pastoral operas ('Fabula de Alfeo y Aretusa,' 1712; 'Poder de la armonia,' 1713) seems to have been a poet, an author of *libretti* and words for *vilhancicos*. J. B. T.

COSTA, Andrea (*b.* Brescia), a teacher of singing, settled in London in 1825. His best pupils were Mme. Borzondio and Mme. Albertazzi. He published a Method called *Analytical Considerations on the Art of Singing* (London 1838). M. C. C.

COSTA, Affonso Vaz da (*b.* Lisbon; *d.* Avila, 1610 or 1599), a Portuguese composer, who studied in Rome and afterwards held appointments at Badajoz and Avila. His works, which included secular music as well as sacred, have not been preserved. J. B. T.

COSTA, Michael Andrew Agnus,[1] (*b.* Naples, Feb. 4, 1808; *d.* Hove, Apr. 29, 1884), son of Cavaliere Pasquale Costa, of an old Spanish family. Having a great inclination for music, the rudiments of which he learnt from his maternal grandfather Giacomo Tritto, he was placed at the Real Collegio di Musica in Naples, and at a public examination obtained a free scholarship from Ferdinand I., King of the Two Sicilies.

At the age of 15 he composed a cantata, for the theatre in the college, entitled 'L'Immagine.' In 1826 he composed for the same theatre an opera called 'Il delitto punito'; and in 1827 another, 'Il sospetto funesto.' He composed also at this period a Mass for 4 voices, a 'Dixit Dominus,' three symphonies, and an oratorio, 'La Passione.' In 1828 Costa was engaged by the manager of the Teatro Nuovo to compose an opera semi-seria, called 'Il carcere d'Ildegonda.' In 1829 he composed 'Malvina,' an opera, for Barbaja, the famous impresario of San Carlo. In the autumn of that year, Zingarelli, his maestro, sent him to Birmingham, to direct a cantata of his composition, on Is. xii. On the young Costa's arrival, through some misunderstanding, he was obliged, having a fair tenor voice, to sing in the cantata instead of directing the music. In 1830 he was engaged by Laporte, as maestro al piano at the King's Theatre. In the next year he composed the music of the grand ballet, 'Kenilworth.' In 1832 Monck Mason, the then impresario, engaged him as director of the music; and in that capacity he wrote the ballet, 'Une Heure à Naples,' and several other pieces for operas and concert-rooms. In 1833, engaged by Laporte as director and conductor, he composed the ballet 'Sir Huon' for Taglioni, and the favourite quartet, 'Ecco quel fiero istante.' At the invitation of Severini, the impresario of the Italian opera at Paris, he wrote the opera 'Malek Adhel,' which was performed there in Jan. 14, 1837, with moderate success, but with better fortune in London. H. F. Chorley says on this point:

> 'Whether a great conductor can ever be a great composer, is a doubtful matter. . . . From the first evening when Signor Costa took up the baton,—a young man, from a country then despised by every musical pedant, a youth who came to England without flourish, announcement, or protection . . . it was felt that in him were combined the materials of a great conductor; nerve to enforce discipline, readiness to the second, and that certain influence which only a vigorous man could exercise over the disconnected folk who made up an orchestra in those days. His "Malek Adhel" is a thoroughly conscientious work, containing an amount of melody with which he has never been duly credited.'

In 1842 Costa composed the ballet-music of 'Alma' for Cerito; and in 1844 the opera 'Don Carlos.' In 1844 three new operas were produced in London, of which 'the worthiest,' says Chorley

[1] These names are confirmed by a declaration as to the date of his birth, made in London at the Bow Street Police Court in June 1847, by his brother, Raphael Costa: also in the recommendation paper for admission into the Royal Society of Musicians, in July of the same year. The second document is signed Michael Andrew Agnus Costa, but with evident uncertainty as to the order of the second and third names. In both documents the date of his birth is given as Feb. 4, 1808. Both are quoted in *Mus. T.* for 1897, p. 306, where the third name is incorrectly given as 'Angus.' The date 1810, for the year of birth, given in the first edition of this Dictionary, rests upon the testimony of Costa himself, and is confirmed by the register of deaths at Somerset House. The earlier date is most probably the correct one, as it is confirmed by both the brothers, and occurs in both the official documents mentioned above; and most men would be less likely to err in such a date at the age of thirty-seven or thirty-nine than at the age of sixty-seven or sixty-nine.

'was Signor Costa's "Don Carlos," which had nevertheless not the good fortune to please the public. Yet it is full of good music: the orchestra is handled with a thorough knowledge of effect and colour. One trio for male voices is so solid and fine that it ought not to have been soon forgotten.'

In 1846 he quitted the opera; and the orchestra, which he had brought to a point of perfection previously unknown in England, passed into other hands. In that year Costa undertook the direction of the Philharmonic orchestra; and that of the new Italian Opera, Covent Garden; and in 1848 that of the Sacred Harmonic Society. In 1849 he was engaged for the Birmingham Festival, which he conducted until 1882. With the season of 1854 he gave up the baton of the Philharmonic, and was succeeded (for one year) by Richard Wagner. In 1855 he composed his oratorio 'Eli' for the Birmingham Festival, a march from which was long a favourite piece. He conducted the Bradford Festival in 1853, and the Leeds Festival in 1874; and as conductor of the Sacred Harmonic Society directed the Handel Festivals from 1857–80. Beside other occasional compositions, his second oratorio, 'Naaman,' was also written for Birmingham, in 1864. He wrote additional accompaniments for 'Solomon,' 'Judas,' and others of Handel's oratorios for the Sacred Harmonic Society (see ADDITIONAL ACCOMPANIMENTS). In 1869 he received the honour of knighthood. He was also decorated with orders from the sovereigns of Germany, Turkey, the Netherlands, Würtemberg, Italy, etc., in recognition of his talent and position. He was appointed in 1871 'director of the music, composer, and conductor' at Her Majesty's Opera. His services in those capacities will not soon be forgotten in London (see CONDUCTING). He is buried in Kensal Green Cemetery. J. M.

COSTANTINI, (1) FABIO (*b.* Rome, *c.* 1570), maestro di cappella to the Confraternity of the Rosary at Ancona, and afterwards at the cathedral of Orvieto, where he was in 1614; in 1616 he was at the Basilica Sta. Maria at Tivoli, and in 1618 again at Orvieto.

His compositions include motets for 2, 3 and 4 voices (Rome, 1596). He also published 'Selectae cantiones excellentissimorum auctorum' (Rome, 1614), a collection of 29 8-part motets by Palestrina, the Nanini, the Anerii, Marenzio, Lucatello, Giovanelli and others besides himself; another set of motets by different authors in 1618, a collection of airs and madrigals called 'Ghirlandetta amorosa' (Orvieto, 1621) and another, 'L' Aurata Cintia,' in 1622. All these contain compositions of his own, and by his brother, (2) ALESSANDRO, who succeeded Frescobaldi at St. Peter's in Rome in 1643. M. C. C.

COSTANZI, JUAN, or GIOVANNI BATTISTA, known as Gioannino di Roma, because he was born there (*d.* Mar. 5, 1778), was for some time in the household of Cardinal Ottoboni, and was appointed in 1754 maestro di cappella of St. Peter's, which he retained till his death. He composed an opera, 'Carlo Magno' (Rome, 1729); an oratorio, 'S. Pietro Alessandrino,' a fine Miserere; motets in 16 parts for 4 choirs, offertoriums and other church music. (See list in *Q.-L.*) M. C. C.

COSTE, LA (17th-18th cent.), Royal Chamber musician, Paris; a singer in 1693 in opera chorus; afterwards conductor. He was pensioned in 1708 [1] and was still living in 1757. He composed 5 operas and 2 ballets, performed at the Opéra, Paris, between *c.* 1697–1732; also a book of solo cantatas with basso continuo. E. V. D. S.

COSTE, GASPARD, chorister in the cathedral of Avignon *c.* 1530, composer of songs and madrigals, preserved in the following collections:

'Trente-cinq livres des chansons à quatre parties' (Paris, attaingnant 1539–49); 'Le Parangon des chansons' (Lyons, J. Moderne, 1540–43); 'Motetti del fiore' (*ib.* 1532–39); 'Sdegnosi ardori; Musica di diversi autori sopra un istesso soggetto di parole' (Munich, 1575), and 'Ghirlanda di fioretti musicale' (Rome, 1589), contain madrigals by one, Gasparo Costa. M. C. C.

COSTELEY (COSTELLO), WILLIAM (*b.* 1531; *d.* Evreux, Feb. 1, 1606), an Irish musician who settled in France, and was organist to Henri II. and Charles IX.

He was the author of songs in the 'Chansons à 4 et 5 parties,' published by Le Roy and Ballard (Paris, 1567); also of a set of 'Chansons' called 'Musique de Guillaume Costeley, Organiste ordinaire et vallet de chambre du . . . Roy.' These were republished in 1896, edited by Henry Expert. Some pieces of his are in the library at Orleans.[2] Costeley was a member of the society established in 1571 or 1573 (see *Q.-L.*) in honour of Saint Cecilia, and was its first president. The society established a musical contest, at which, in 1575, Orlando di Lasso carried off the first prize, a silver organ. Costeley sometimes entertained the members at his own house in Evreux.

M. C. C.; addns. W. H. G. F.

COSYN (COSIN, COSENS), BENJAMIN, 17th-century English composer and organist. He was organist of Dulwich College from 1622–24. In 1626 he was employed at the Charterhouse, but in 1643, 'the organs being prohibited,' he was discharged by the Governors. His 'poverty, ould age and imperfections of body' being taken into consideration, however, he was allowed a yearly pension of £13 : 6 : 8. There is an imperfect copy of a Litany at Peterhouse by him, but he is chiefly remembered as the collector of the pieces in 'Benjamin Cosyn's Virginal Book,' which also includes many of his own compositions (see VIRGINAL MUSIC). This is in the Roy. Lib. B.M. and was edited (1923) by J. A. Fuller Maitland and W. Barclay Squire, from the preface to which some of the above

[1] Fétis.
[2] *Recueil des plus beaux ouvrages de musique d' Orlande Reynard et Costeley.*

autobiographical details have been taken. (See *Mus. T.*, 1903, pp. 780, 781). J. MK.

COSYN, JOHN (late 16th cent.), an English composer who published in 1585 'Musike of six and five partes. Made upon the common tunes used in singing of the Psalmes.' This is an arrangement in plain counterpoint of 60 psalm-tunes chiefly taken from those already printed in John Day's Psalter (1563). J. MK.

COTILLON, 'a petticoat,' originally a simple French dance of the age of Louis XIV., which, according to some authors, resembled the BRANLE, but, according to others, was a variety of quadrille. The modern cotillon is simply a species of quick waltz, of great length and elaborate contrivances, but with no special music: for the different varieties of it, waltzes, polkas, mazurkas and galops are employed. E. P.

COTOGNI, ANTONIO (*b.* Rome, Aug. 1, 1831; *d.* Oct. 15, 1918), famous Italian baritone. After earning a high reputation in his native country, he came to London in his prime, appearing first at Covent Garden in 1867. He remained faithful to that theatre, and his career lasted so long that on the night of Melba's début as Lucia in 1888 he was the Henry Ashton. His repertory was very wide, embracing nearly all the operas regularly played at Covent Garden. He was in every way a first-rate artist, but his fine voice—very telling and resonant—had not quite the beauty of timbre of Graziani's. When his singing days were over he settled down in Naples as a teacher and enjoyed great popularity. To his endless patience in placing the voice his pupil Dinh Gilly has borne testimony. S. H. P.

COTREUIL, EDOUARD (*b.* Paris, 1874), operatic bass, studied at the Paris Conservatoire and made his début at the Théâtre de la Monnaie, Brussels. On his first appearance at Covent Garden, in 1904, he sang Vulcain in Gounod's 'Philémon et Baucis'; and in 1919 created here the rôle of Don Inigo Gomez in Ravel's 'L'Heure Espagnole,' which he sang and acted with notable point and skill.

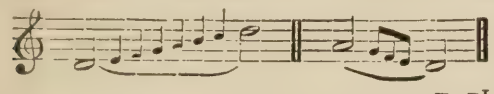
BIBL.—NORTHCOTT, *Covent Garden and the Royal Opera.*

H. K.

COTTA, JOHANNES (*b.* Ruhla, Thuringia, May 24, 1794; *d.* Willerstedt, Mar. 18, 1868), is worthy of mention as composer of the spirited music for four male voices to Arndt's patriotic song, which electrified Germany at the time of the rising against Napoleon in 1813, beginning 'Was ist des Deutschen Vaterland.' The same song was skilfully set, but with undesirable complexity, by G. Reichardt in 1826. R. M.

COTTAGE PIANO (Fr. *piano droit*; Fr., Ger. and Ital. *pianino*), an upright pianoforte usually about 4 feet high, invented early in the 19th century, nearly at the same time as the cabinet piano, but less thought of for some years, until the more convenient height and better action of the lower instrument, combined with cheaper construction, found appreciation, and brought about the displacement of the cabinet and the once familiar square. To Robert Wornum the younger, whose patent (No. 3419) for an upright, with diagonal strings, was taken out in 1811, is due the invention and earliest manufacture of oblique and vertical cottage pianofortes in England. In the year 1815 Ignace Pleyel, founder of the house of Pleyel, Wolff et Cie., employed Henri Pape, an ingenious mechanician, to organise the introduction of the construction of these instruments in Paris (Pape, *Sur les inventions*, etc.; Paris, 1845), from which beginning arose the important manufacture of French cottage pianos. In Germany and America upright pianos have not made much way. (See PIANOFORTE.) A. J. H.

COTTON, JOHN, author of a treatise on music, dating from the latter part of the 11th or the beginning of the 12th century. There exist six copies in MS., at Leipzig, Paris, Antwerp, the Vatican Library, and two at Vienna. A seventh copy, used by Gerbert, who published the treatise in 1784, was destroyed in the fire at St. Blasien in 1768. In the Paris and Antwerp copies the authorship is ascribed to Cotton or Cottonius, two of the others bearing the title 'Joannis Musica.' Gerbert quotes an anonymous work (*De script. eccles.*), in which reference is made to a learned English musician known as Joannes; and the dedication of the book, which runs 'Domino et patri suo venerabili Anglorum antistiti Fulgentio,' bears out the assumption that its author was English. It has been variously proposed to ascribe its authorship to Pope John XXII., and to Joannes Scholasticus, a monk of the monastery of St. Matthias at Trèves, but the above theory is probably correct. The treatise is valuable as explaining the harmonic system of the period in which it was written (*D.N.B.*). See Haberl's *Jahrbuch*, 1888. W. B. S.



COTUMACCI (CONTUMACCI), CARLO (*b.* Naples, 1698; *d.* there, 1775), organist and composer of church music, pupil of A. Scarlatti, succeeded Durante at S. Onofrio. The royal library in Naples contains the autograph of a Requiem, *a* 5-8, 4 sacred songs, toccatas for harpsichord, and a set of 'Partimenti.' He wrote 'Regole dell' accompagnamento' and 'Trattato di contrapunto,' works which have remained in MS., excepting some 'Partimenti,' published by Choron in his *Principes de composition des écoles d'Italie* (Paris, 1808).

M. C. C.

COUAC (Fr. for 'quack'), a sudden horrible noise to which any clarinet is liable when the reed is out of order and the wind not quite under control. Called also 'the goose.' (See a good story in Spohr, *Selbstbiographie*, i. 167.)

COUCHED HARP, an obsolete name for SPINET (*q.v.*).

COULADE, an ornament of the French school, composed of slurred notes following one another by conjoined degrees. It was not noted, but left to the discretion of the executant.

E. B[L].

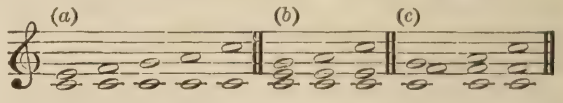
COULÉ, the name of an *agrément* of the French school. The word is sometimes used of the Port de Voix (see ORNAMENTS). E. B[L].

COUNTERPOINT (Lat. *contrapunctus*, Fr. *contrepoint*, Ger. *Kontrapunkt*, Ital. *contrappunto*). The name given to the art of combining melodies, or (more strictly) to the art of adding melody to melody. The term is also often applied to the added melody itself, when a subject invented to accompany another subject is called its counterpoint. The latter meaning suggests more nearly the origin of the word. It is said that when notes were indicated by points a counterpoint signified a note set against another note, hence a part set against another part. Such an origin is confirmed by the subsequent use of the like term *nota contra notam*, which is to be found in Zacconi's treatise (*c.* 1595), and is still to be heard as a definition of the simplest order of strict counterpoint—*note against note*. In a general way the word Counterpoint is often applied to music, of any school, which shows marked melodic independence of parts, such as may be found, for example, in all fugal movements and in most choral works of any magnitude. But in the study of music it is the term still given to a particular and restricted part-writing, in which attention is expressly directed to the melodiousness of every part, and for this purpose the available harmonies are specially and rigorously limited.

Out of these several uses of the term two main aspects of the subject appear: (1) Counterpoint as a principle in education throughout the history of the art, and (2) the actual practice of the great composers of the pure polyphonic school, of whom Palestrina is the generally admitted representative. The former only is treated in the following article; the latter is treated under POLYPHONY: PRINCIPLES OF THE 16TH CENTURY. The article HARMONY should also be consulted.

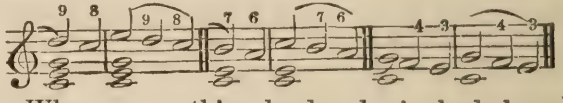
COUNTERPOINT AND HARMONY CONTRASTED. —In attempting to trace the evolution of counterpoint, it is necessary to differentiate minutely between it and the sister art of harmony. The first polyphonic age is conveniently named preharmonic. But in truth harmony has not only existed as long as counterpoint, but in a crude form it necessarily came first. The art of melody naturally preceded both, and for centuries the melodies of the Christian Church and doubtless those of the people must have been sung unisonally. In this the art's infancy, the introduction of a note or notes foreign to the actual melody must have been unmeaning and unallowable.[1] The momentous step towards both harmony and counterpoint which is recorded in Hucbald's simple, crude, well-quoted 'Diaphony' may have been taken in the first instance quite casually (see DIAPHONIA). As it never has been natural for tenors and basses to sing either in the same pitch or a whole octave apart, it seems likely that diaphony, which is practically the doubling of a tune at closer quarters than the octave, was invented by the monk who first dared to find and use an interval better suited to his voice, probably a fifth or fourth above or below the other singers.[2] That which seems (if one may judge from available examples) barely more than a less perfect kind of unisonal singing ought hardly to be called harmony, still less counterpoint. Yet it marks the advent of both. For with the first deliberate sounding of a strange note together with a plain-song, harmony was born; and with the first progression from the newly found interval back to the usual octave or unison, independent movement of parts was discovered and counterpoint was born. Both arts must have seemed utterly new on their first and apparently almost simultaneous arrival. Doubtless their latent possibilities were as unperceived as they were vast. It is easy for us to discern their essential difference in this early stage; and when it is clearly seen, there can be little surprise that the two were destined to be developed as separately as the union of their natures would allow. For it may be said that this incipient harmony required the cultivation of a new sense—the sense to enjoy two simultaneous sounds; while counterpoint required as well a new intellectual power—the power to appreciate two independent parts. The latter has kept its more intellectual nature and reputation throughout. The very name generally suggests erudition. It has even fallen at times into disrepute as the cold, heartless, mental side of music; and while melody has of course always been an easy first in popular esteem, harmony is as easily second, and counterpoint—exacting more effort though perhaps on this very account yielding greater reward—comes last. Had Hucbald's new art depended upon the people for its development, it is easy to imagine that harmony would have had first attention. But the more intellectual promise of the sister-art seems to have attracted

[1] This is hard to realise now, when to any man's mind, if it chance to be stocked with even crude sets of harmonic associations, the most fugitive strain of melody is apt to suggest accompanying chords. The Swiss yodel affords a good example of a melodic line which records a mental harmonic transaction impossible in the old days.



[2] Rockstro supposed that this was first done with or in imitation of the organ (introduced into churches at the end of the 7th century). This origin is strongly suggested by the name *Organum*, which was given to the added part. (But see DIAPHONIA and ORGANUM.)

church musicians, in whose hands the destiny of music then lay ; and as history clearly shows while harmony took good care of itself, counterpoint received almost sole attention for centuries, until it attained its first perfection in Palestrina's work upon an harmonic basis of great innocence and simplicity—as simple as composers in the process of adding melody to melody could even unconsciously have devised.



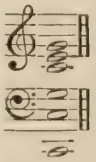
No just appreciation, however, of the essential difference between these two arts can be formed which overlooks their permanent union and interdependence. Though they have each had periods of special attention, they could not but grow together ; and each was developed in the development of its companion, even at the very time of its own greatest apparent neglect. Their co-existence has been so complete as to cause much confusion between them. It is hardly surprising that Zarlino should describe counterpoint as the concordance of several different parts and ' as the very same as that which he named proper harmony.' It is still less so to note, in passing, that Dr. Johnson defined it as ' the art of composing harmony.' But it is strange that Reicha (1770–1836), the famous theorist and friend of Beethoven, boldly states that the terms harmony and counterpoint are synonymous. In criticism of this statement, Sir Frederick Ouseley suggested the clever and now popular distinction that they are respectively the *vertical* and *horizontal* aspect of music (this of course refers to their appearance on paper).[1] It is perhaps more comprehensive to say that in part-music of every kind, simple or complex, ancient or modern, *when two or more parts conspire to convey one idea*, the result is harmony ; *when, while still conveying one idea, each part preserves its own melodic entity and conveys also its own idea*, the result is counterpoint. Thus the very parts which make the most brilliant counterpoint may together present imposing and elaborate harmonic invention.

Evolution of Early Counterpoint.—History seems to show that as soon as such primitive harmonic material as that of Hucbald had made independent conception of parts possible, men were led to set totally different melodies against one another experimentally. They could not long indulge in this premature contrapuntal art without attempts to frame laws for the choice and fitting together of their intervals. It seems paradoxical (quite sufficiently so to account for the frequent confusion of the two arts) that any attempt to combine melodies must at once centre the attention upon questions of harmony. As new serviceable intervals were discovered, classification would soon follow, the euphonious being preferred, the cacophonous rejected ; and by degrees the harmonic basis for the new art of combining melodies would become dogmatically determined.[2]

The most interesting feature in this process was the treatment of the fourth. An almost pathetic interest attaches to its dethronement from its first place among perfect concords to the servile position of a discord. It seems probable that as long as not more than two parts were sung simultaneously, no strong enough reason would occur to cause its banishment. But when three parts were tried, the superior adaptability of the interval of a third must soon have been apparent. It would combine with every other interval except the fourth, whereas the fourth itself was hopelessly at war as a concord with the fifth—the most satisfactory interval of all except the octave itself. At (*a*) in the following example all the available concords are set down (only one third and one sixth being given for the sake of simplicity) :

At (*b*) the combinations are shown which ultimately formed the foundation for the whole art of counterpoint. At (*c*) the fourth displays reason for its rejection in its failure to do what the third succeeds so well in doing.[3] Thus the fourth fell to its inferior position, and became merely a serviceable suspension or a passing note, assuming exactly the same subordinate relationship to the very interval which usurped its place as the ninth naturally assumed to the octave or the seventh to the sixth, as may be seen in the following example :

When once this slender basis had been evolved, musicians found—simple as it was—that it supplied inexhaustible means for melodic combinations to which they turned affectionate attention. In Dowland's charming translation (1609) of *Ornithoparcus* (1513) we read :



' A song in our times hath not one voyce alone but five, six, eight, and sometimes more. For it is evident that Joannes Okeken did compose a Mot-tet of 36 Voyces. Now that part of Musick which effecteth this is called of the Musitians the *Counterpoint*.'

That which follows is worth quoting, as it throws interesting light on the early use of the terms counterpoint and composition.

[1] It is possible that this distinction was made before Ouseley, though he appears to be the author of it.

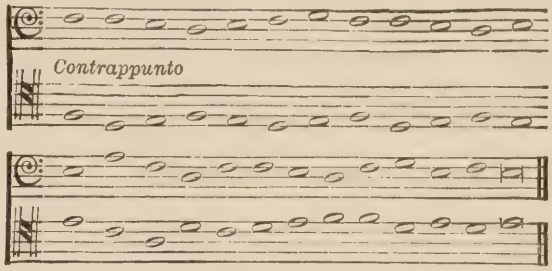
[2] For a full account, see Harmony.

[3] There is no intention here to undervalue the importance of the first six natural harmonics—

as an explanation of the harmonic basis of the art, or to deny the possibility that in some distant future the addition of the seventh of the series—something between A♯ and B♭—may revolutionise and utterly renovate the art by the acquisition of new melodic and harmonic relationships, hitherto unconceived. But while the extreme beauty of the 2nd, 3rd and 5th of the series when sounded together will account for the dignity, importance, and finality of the major triad, there is no reason for the acceptance of the minor triad and chords of $\frac{6}{4}$ which could not be advanced in favour of the rejected $\frac{6}{4}$, for which beautiful and still little used concord it seems safe to prophesy a new era of prosperity.

'For a *Counterpoint*, generally, is nothing else than the knowledge of finding out of a song of many parts. Or it is the mother of *Modulation*, or (as Franchinus writes) it is the Art of bending sounds that may be sung, by proportionable Dimension, and measure of time. For, as the clay is in the hands of the Potter, so is the making of a song in the hands of the Musitian. Wherefore most men call this Art not the *Counterpoint*, but *Composition*, assigning this difference of names, and saying that *Composition* is the collection of divers parts of Harmony by divers *Concords*. For to compose is to gather together the divers parts of Harmony by divers Concords. But the *Counterpoint* is the sodaine, and unexpected ordering of a plaine song by divers Melodies by chance. Now it is called *Counterpoint*, as it were a concordant *Concent* of Voyces set one against another, examined by Art.'

This careful distinction, though not altogether clear to the present-day student, seems to indicate the tendency to identify *composition* with the vague, less-restricted feelings after harmonic invention (the art of the future), and *counterpoint* with the laws which showed how to combine divers melodies in a 'concordant *concent*.' It also clearly indicates how closely the two terms were allied, with just the bare suggestion that the former was superior to, and included, the latter.

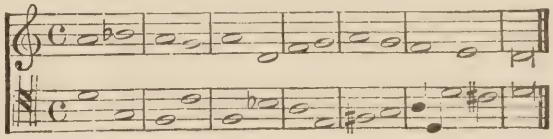


A rather different account of the distinction between counterpoint and the rest of music is given by the later theorist, Zacconi, in his *Prattica di musica*. It seems to have been usual from early times to use the *canto fermo* or fixed song for the cultivation of contrapuntal ingenuity. Its origin may be traced in Guido's *Discantus*, where a free part (*organum*) was added to the plain-song; and, indeed, nothing seems more natural than that the learned musicians should find their greatest pleasure and exercise of skill in adorning the existing songs of the Church. The plan was generally adopted in various ways up to Palestrina's time, but as an educational necessity it seems first to have been dogmatically fixed by Zacconi. In the two opening chapters of the second book of the *Prattica* he insists at length that counterpoint is composition *framed upon one part*, the integrity of which is to be continually kept; and he excludes other musical compositions (including masses, motets, madrigals, songs, etc.) where the parts 'correspond with each other'—by which phrase he probably means, concede to each other's needs. By the vigour of his insistence, and the public manner of 'putting aside the various definitions given by Zarlino and by other former writers,' this may be judged to be the formal inauguration of the *canto fermo* for scholastic purposes, and it is still in use to-day in our college and university examinations.

Early Contrapuntal Exercises.—Some account may now be given of a few early exercises on *canti fermi* which afford interesting prototypes of the five species ultimately formulated (see also Descant).

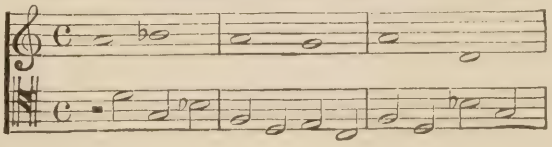
In the first species (note against note) counterpoint and harmony are studied simultaneously, both being reduced to their simplest as well as to equal terms. This will always be the student's preliminary training-ground where he may learn to choose apt harmonies without the sacrifice of melodic beauty. Many early examples may be found, called by various names—by Artusi, *contrappunti semplici*; by Zacconi, *contrappunto di nota contra nota*; by Zarlino, *contrappunto piano*. Two instances may be quoted. The first is from Zarlino, to be found on p. 225 of his *Istitutioni*:

Soggetto del Sesto modo.

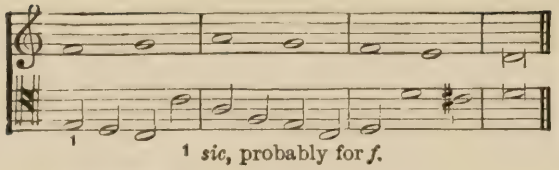


Contrappunto

It is in the Hypophrygian mode, which increases its vagueness to modern ears; but though both vague and quaintly monotonous, striking independence of parts is shown, and a certain beauty of effect obtained in the latter half.

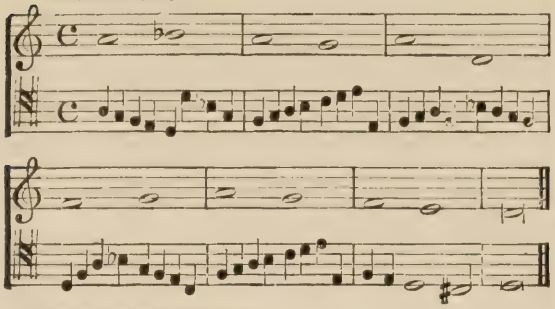


The second is a somewhat later example from Zacconi:

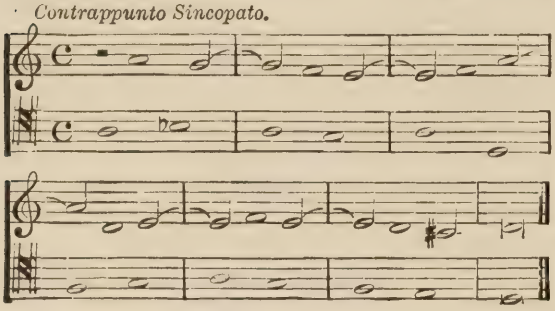


Primo contrappunto di nota contra nota

But plain species, though fundamental, forms the smallest part of the study of counterpoint, since the possibilities of melodic independence of parts are reduced to their lowest point. The two contrapuntal purposes — of cultivating variety of parts and of bending them to 'points of concent'— are both better served by the apt use of contrasted note-values in the different parts—one part being held back while the other proceeds in shorter notes, or one being ornamented while the other remains plain. On this account the chief methods of acquiring contrapuntal skill are those of other species, in which students are taught to write two, four, or more notes to one, or suspensions, or varied and ornamental parts (florid species). The following further examples from Zacconi are of great interest; for, besides showing early uses of the second, third, fourth and fifth species, they indicate two other important styles of counterpoint which, it may be regretted, have not survived:



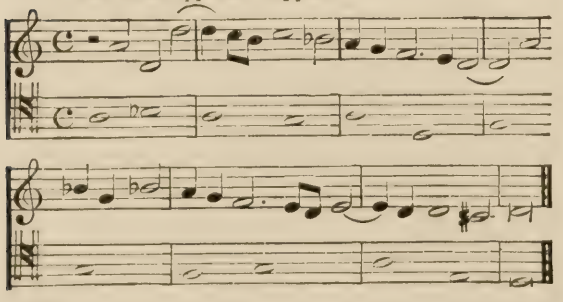
Secondo contrappunto Minime contra una Semibreve



[1] *sic*, probably for *f*.

Without title.

Contrappunto Sincopato.



Contrappunto Fugato.

Contrappunto Ostinato.

Primo Contrappunto Doppio

Other methods of two-part counterpoint even more elaborate are to be found in Morley's *Plaine and Easie Introduction* (1597). It seems a pity that the study of some of these, notably the five-crotchet example, should not be revived. It is not convenient to quote the whole of each exercise; their styles are sufficiently indicated by the five or six opening bars of each:

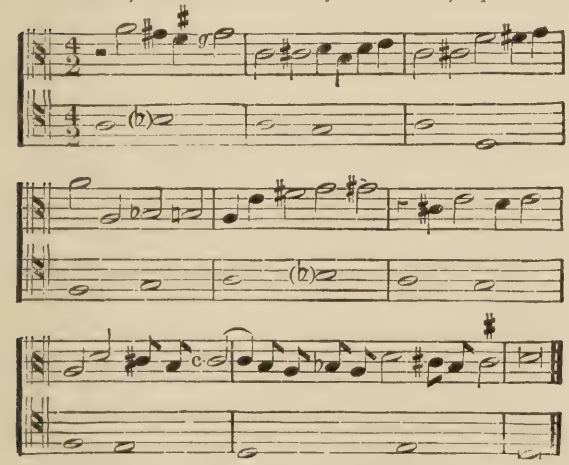
Of these varieties, more like music of the future than of the past, Morley tells his readers

that the first is called *crotchet, minime and crotchet*; the second *minime and crotchet*:

'The third is a driving way in two crotchets and a minime but odded by a rest so that it never commeth even till the close. The fourth waie driveth the crotchet rest throughout a whole lesson all of minims, so that it never commeth even till the end. And in these waies you may make infinite varietie. . . . The fift waie is called *Tripla*, when for one note of the plainesong, they make three blacke minimes, though (as I tolde you before) this bee not the true tripla, yet have I set it downe unto you in this place, that you might know not only that which is right, but also that which others esteemed right. And therefore likewise have I set downe the proportions following, not according as it ought to bee in reason, but to content wranglers.'

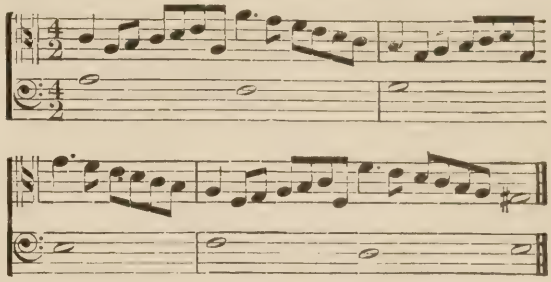
Later he adds:

'It hath been no small toyle for mee to seeke out the authorities of so manie famous and excellent men, for the confirmation of that, which some may thinke scarce worth the making mention of.'



He names the examples 6 and 7 *quadrupla* and *quintupla*, and then says:

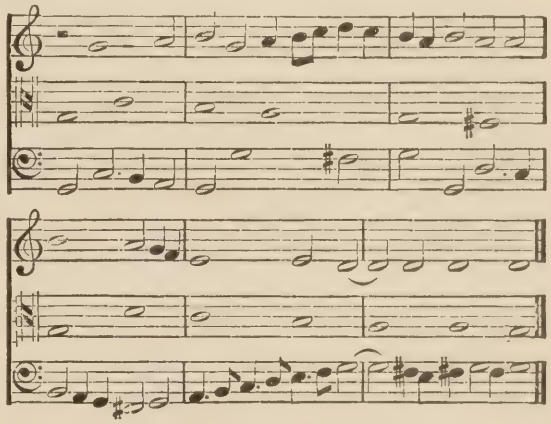
'And so foorth *sextupla*, *septupla*, and infinite more which it will be superfluous to sette downe in this place.'



The examples 8 and 9 are respectively *sesquialtera* and *sesquitertia*. Many, if not all, of these examples are included by Morley rather for the sake of completeness, as the reader will already have perceived. He enumerates them between the practical study of counterpoint in two and three parts, in order to show his pupil 'those things which of olde were taught *before they came to sing two parts*'—a refreshing suggestion that combinations of rhythms which outstrip the most complicated with which Brahms ever puzzled a pianist were after all outside the practical domain of music.

It will be well to add two instances of remarkable anticipations of modern methods, once more from Zacconi. The first is a very speculative, crude attempt at a chromatic example which is still more surprising if, as seems likely, the B in the *canto fermo* was intended to be flat:

Zacconi, Prattica di musica, lib. secondo, cap. 49.

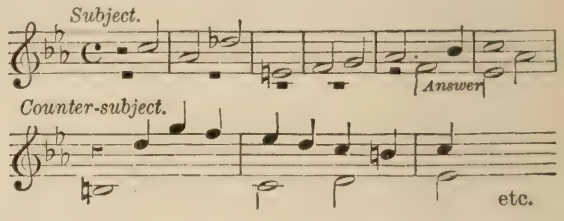


The method of correcting the accidental in bars 1 and 7 is curious and interesting. The second is an extract from a set of short examples of the nature of variations, displaying not only a melodic freedom worthy of Handel, but an exceptional amount of that incipient feeling for key, which is so characteristic of 16th-century music, and which made the revolution of Monteverdi natural and inevitable:

It is noteworthy that this should have been published within two years of the death of Palestrina.

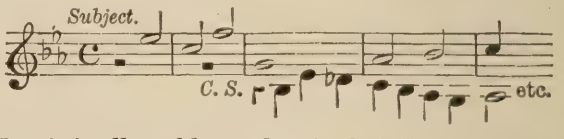
These interesting examples will serve to indicate the manner in which the five species of strict counterpoint were attained, as well as to foreshadow the freer art of subsequent periods. It will not for a moment be supposed that this strict style was stereotyped, perfected, and closed before the freer harmonic style was attempted. A comparison of Zacconi's masterly little sequence (quoted above) with the following fair example of three-part florid counterpoint published by Morley a year later will actually show less perfect workmanship in the old style than in the new:

But it is not surprising if the perfection and severity of Palestrina should not be matched by a contemporary perfection of scholastic exercise. The ideal conservative can be in advance of his time as well as the radical. Indeed the perusal of Zacconi and other writers makes it rather the matter for surprise that the writings of Palestrina and some of his compeers could be so pure, restrained and serene as they were.



Post-harmonic Counterpoint.—The debts which harmony had contracted towards counterpoint in the 16th century were destined to be paid in the 18th. When, in the time of Bach, counterpoint in its ideal sense came into its own again, intervening development enabled harmony to confer return benefits; and an

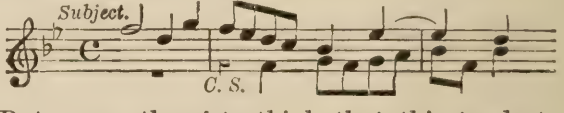
altogether new vitality is characteristic of the more elaborate counterpoint acquired through the wider scope which a full-grown harmonic system necessarily bestowed upon it.



It is here that we pass from counterpoint in its early restricted sense—that upon which the study of strict counterpoint is founded, and for which Rockstro desired to reserve the title—to that which in the ideal sense still bears the name. They can roughly be distinguished as the pre-harmonic and post-harmonic styles. The second style, it need hardly be said, is infinitely more complex in possibilities, and offers embarrassment to students—the embarrassment of riches. As Palestrina marked the highest point of the one, so Bach seems still the hero of the other. A comparison of any of Palestrina's works with the first chorus of the 'St. Matthew Passion' will give a striking idea of the contrast of styles. In the later art, to all the difficulties of setting good melodies to melodies are added the privileges and problems of ever-developing harmony.

The most complicated passages in the second style have grown out of the first as naturally and as beautifully as a tree's foliage grows from its stem. But the great increase of scope can hardly be estimated. If it be remembered that the first polyphony involved a basis of but two chords, it will be recognised that even the addition of one new chord would have incalculably extended the possibilities. But Monteverde's revolution opened the gates not only to his own unprepared seventh, but to every four-note chord and to every four-note chord-progression; and as Bach's work showed, all good and clear chord-progressions could be used as bases for new contrapuntal device. This is of course no less true of the five-note and six-note chords and chord-progressions unused, it may be believed even unthought, by Bach, as his own were unused and perhaps unthought by Palestrina. It is well to note in conclusion that new post-Bach counterpoint has been made possible and perhaps even easy by such writers in our own day as have shown chords with five or more component notes to be clear to the mind when sounded, and eloquent in common use. Bach was an explorer into tracts never traversed before him, even now barely grasped. But composers have ever since continued to discover new harmonies which together with the old afford material for new counterpoints as yet unattempted; and the fields of contrapuntal thought yet to be won are limitless. In music clear thought seems naturally to make for speed of thought; and advance in the joys of counterpoint (in which speedy thought is, as it were, of the very essence of the contract) will, it would seem, ever have to wait upon advance into harmonic clearness. (Cf. HARMONY and POLYPHONY.) H. W. D.

COUNTER-SUBJECT. When the subject of a fugue has been proposed by one voice it is usual for the answer, which is taken up by another voice, to be accompanied by the former with a counterpoint sufficiently recognisable as a definite subject to take its part in the development of the fugue, and this is called the counter-subject; as in the chorus 'And with his stripes,' in Handel's 'Messiah':



It should be capable of being treated with the original subject in double counterpoint (see INVERTIBLE COUNTERPOINT)—that is, either above or below it, as in the chorus just named, where it first appears in an upper part, but farther on in the tenor, with the original subject in the treble; thus:

But it is allowable to alter it slightly when thus treated, so long as its character is distinctly marked. The principal subject of the above was a favourite with the composers of the 18th century; instances of it with different counter-subjects will be found in Bach's *Wohlt. Clavier*, bk. ii., No. 20, Handel's 'Joseph,' in Mozart's Requiem, and in a quartet of Haydn's in F minor; also in Corelli's Solos, op. 1, No. 3, and in Buxtehude (see Spitta's *Bach*, Engl. tr. i. 276).

When a second subject appears simultaneously with the first proposition of the principal subject it is common to speak of it as the counter-subject, as in the following, by Handel (6 organ fugues No. 3):

But many theorists think that this tends to confusion, and wish it to be called a second subject. Cherubini held that a fugue could not have more than one principal subject, and that therefore the terms first, second, or third counter-subject should be used to designate any subjects which follow after the first; but the question does not seem to be of any very great importance.

For further treatment of this question see FUGUE. C. H. H. P.

COUNTER-TENOR, see ALTO (1).

COUNTRY DANCE, a dance popular in England from an early time to a comparatively

recent period, when it was gradually displaced by the introduction of the quadrille, waltz and polka.

The supposition that the dance is of French origin and that its title is merely a corruption of ' contre-danse ' or ' contra-danse ' (so named from the dancers being ranged opposite each other at the beginning of the figure) has been sufficiently exploded. There can now be but little doubt that the name ' country dance ' correctly expresses what the dance really was when introduced into more refined society from the village green, the barn, or the country ale-house. Record of the English ' country dance ' so named exists long before any reference to the pastime as popular on the Continent.

Much allusion to the dancing of ' country dances ' and the names of them is found in 16th and 17th century literature, and the traditional melodies employed for the dances were used by such musicians as William Byrd and his contemporaries for elaboration into virginal pieces —' Sellinger's Round ' is one of these. ' Trenchmore,' ' Paul's Steeple,' ' Half Hannikin,' ' Green-sleeves,' ' John, come kiss me now,' and others, are melodies which employed the feet of Elizabethan dancers, and all, either as ballad airs or as dance tunes to which ballads were sung, appear to have had birth with the rustic and untutored musician. One peculiarity of the country dance, which has few parallels in other dances, is that it was not confined to any special figure or step, and its music was never limited by any special time-beat or accent. As the dance grew in favour in the ball-room and during various periods, the figures appear to have varied somewhat, and there seems to have been a good deal more regularity in them. After the 17th century the early round form of the dance became obsolete, only the long form being in favour. The 17th century figures of the country dance contained many eccentric movements. In ' The Cobbler's Jigg,' for instance, some of the performers are directed to ' act the cobbler,' and in ' Mall Peatly the new way,' you are to

'hit your right elbows together and then your left, and turn with your left hands behind and your right hands before, and turn twice round, and then your left elbows together, and turn as before, and so to the next.'

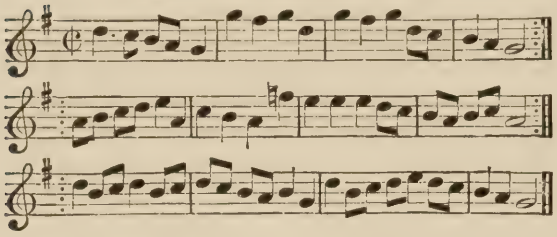
The present writer remembers to have seen traditional survivals of these old country dances performed in a cottage on the remote Yorkshire moors, and in these such embellishments occurred.

The first collection of country dances was English, and was issued by John Playford, bearing the date 1651, but really printed at the latter end of the preceding year. This work, entitled *The English Dancing Master*, contains over a hundred tunes, without bass or even barring, having the dancing directions under each. Country dancing had sufficiently grown into favour even in Puritan times to demand a scientific work on the subject. Playford's *Dancing Master* forms a record of English melody invaluable to the student of the subject, and the history of our national ballad and song airs is so dependent on it that were the work non-existent we should have no record of many of our once famous tunes. It is in this respect fortunate that country dances were so elastic as to permit the use of almost any air. The *Dancing Master* ran through eighteen editions, ranging in date down to 1728, each edition varying and getting larger, even in the later ones extending to two and three volumes. Following Playford's publication, music publishers with scarcely a single exception issued yearly sets of country dances generally in books of twenty-four, which were frequently reprinted into volumes containing two hundred. They are nearly all in a small, long, oblong shape for the convenience of dancing masters' pockets—the kit being in one and the dance book in the other. This now obsolete type of country dance book expired about 1830, but the form was preserved in the present writer's *Old English Dances* (Reeves, 1890), in which an attempt is made towards a bibliography of dance collections. The early dance books are rare and much sought after.

The music for the original country dances of the villages was supplied by a bagpipe, a fiddle, or very frequently by the pipe and tabor, a pair of instruments much used for the Morris dance ; but from the frontispieces to the 18th century dance books, which generally depicted a country dance in progress, we can see that in the ball-room a more extended orchestra was in vogue.

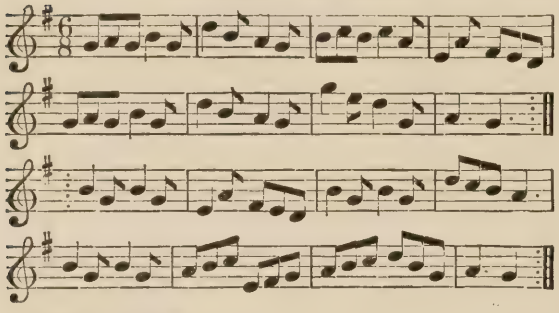
Some of the pictures show the performance of a bass viol, two violins, and a hautboy, and in one instance there is a harpsichord in addition.

Besides the dance collections which gave both tunes and figures there were many elaborate treatises on the dance, and its complicated figures certainly demanded some trustworthy guide.



John Weaver wrote several works on the subject, one dated 1720, and Thomas Wilson, a dancing master, a century later was the author of *The Complete System of English Country Dancing* (*c.* 1820) and other works in which this kind of dancing is attentively dealt with. It is perhaps worthy of notice that the country dance never obtained any great degree of favour in Scotland, though, danced at the Edinburgh and other fashionable assemblies, the native reel has always held ground against newly introduced dances.

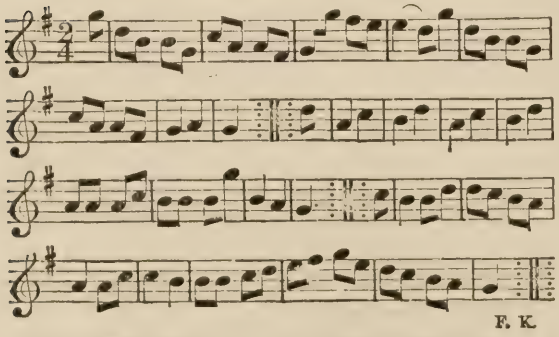
The strange titles found to country dances are due to the circumstance that where the airs are not those of songs or ballads, the composer or dancing masters named them from passing



events, persons prominently before the public, patrons of assemblies, etc. 'The Rebell's Flight,' 'Jenny Cameron' (1745–46), 'Miss M'Donald's Delight,' 'Woodstock Park,' etc., are examples. The giving of fresh life to old tunes by new names was of course frequent.

The airs below are types of ordinary dance tunes at different dates.

'Mayden Lane.' Longwayes for six.
Playford's *Dancing Master*, 1651-52, etc.



'Culloden Fight.'
Johnson's '200 Dances,' vol. iv. 1748.

'The Blanket.'
Longman & Broderip's 'Dances,' vol. ii. *c.* 1780.

'The Triumph.'
Hines' Collection of Country Dances for 1810.

F. K.

Bibl.—Cecil Sharp, (1) 'The Country Dance Book'; (2) 'Country Dance Tunes' (published separately but as a companion to the above, containing tunes from Playford's 'Dancing Master' in piano arrangements).

COUPART, Antoine Marie (*b.* Paris, 1780; *d.* there 1854), originator and editor of the *Almanach des spectacles* (Paris, 1822–36). Coupart was for many years an employé in the Bureau des Journaux et des Théâtres and had special opportunities for gaining his information. He also wrote vaudevilles and comedies, and edited several collections of songs.

M. C. C.

COUPERIN, the name of a family of illustrious French musicians who, from the middle of the 17th century up to the first half of the 19th, have successfully pursued the profession of music. Investigation undertaken in France in recent years, and steadily continued, has shed new light on the family and made it possible to correct here many previously received statements. The first musicians of the family were three brothers, sons of Charles Couperin, a merchant, also organist, and of Marie Andry, his wife,[1] both originating from la Brie (now part of the 'departement' of Seine et Marne).

The three brothers, all born at Chaumes, were pupils of Chambonnières, whose estate was in the neighbourhood of their native place. The eldest (1) Louis (*b. circa* 1626; *d.* Paris, Aug. 29, 1661) came there with Chambonnières, and through him became organist at St. Gervais (*c.* 1650–61), the first of his family in that post. Violinist and violist, he played in the orchestras of the court ballets from 1656 and belonged to the musicians of the 'Chambre du Roi.' He wrote a set of 'Pièces de clavecin,' 'Carillons' for the organ, viol and violin music, etc.[2]

The second brother was (2) François, 'Sieur de Crouilly' (*b. circa* 1631; *d.* Paris *c.* 1701). He died from the effects of an accident. His daughter, Marguerite Louise (*b.* Paris, 1676 or 1679; *d.* Versailles, May 30, 1728), was a singer and harpsichord player of repute.

The youngest of the brothers, (3) Charles (*b.* Apr. 7 or 8, 1638; *d.* Paris, 1679), was organist at St. Gervais[3] until his death. He married Marie Guérin on Feb. 20, 1662, and was the father of François (4), called 'le Grand,' who immortalised the name of Couperin.

(4) François (*b.* Paris, Nov. 10, 1668; *d.* there Sept. 12, 1733). He was pupil of his father and also of Jacques-Denis Thomelin, organist of the King's chapel, to which office he succeeded after a successful competition (Dec. 26, 1693), with the title of 'organiste du roi.' He was organist at St. Gervais from 1685 to the year of his death. His title of 'Ordinaire de la musique de la chambre du roi' as harpsichord player (replacing d'Anglebert's son), dates from 1717. He instructed the duke of Bourgogne and six other royal princes and princesses. Though he is

[1] Born Chaumes (Brie), July 23 or 24, 1601.
[2] MSS. in the Bibliothèque Nationale, Paris
[3] He was succeeded by Lalande (1679–85).

reported to have been a first-rate organist, he did not compose much music for the organ,[1] but left church music, some of which was printed: 'Versets de motets' (1703, 1704, 1705), 'Leçons de Ténèbres' (1713–15).

Couperin's reputation as performer on, and composer for, the 'clavecin' remains an historical fact, and the fame of his style in composition spread beyond France. It is of particular interest to note the unmistakable influence of his harpsichord music and Method: ('L'Art de toucher le clavecin') on J. S. Bach, both in practice and composition. On this point what was written by Dannreuther in previous editions of this Dictionary deserves attention:

'It is of particular interest for historians of music, as well as for professed pianists, to note the unmistakable influence which Couperin's suites and "Méthode" had upon Sebastian Bach, both in his practice (mode of touch, fingering, execution of "les agréments"—shakes, turns, arpeggi, etc.) [see ORNAMENTS] and in the shape and contents of some of his loveliest contributions to the literature of the instrument, such as his suites and partitas. The principal pieces in Bach's "Suites françaises," "Suites anglaises," "Partitas," and even in some of his solo works for violin and violoncello, as well as in his suites for stringed or mixed stringed and wind instruments—"Concerti grossi,"—the allemandes, courantes, sarabandes, gavottes, gigues, etc., are frequently in close imitation of the French types of dance tunes then current, of which Couperin's suites furnished the best specimens. Bach here and there goes to the length of copying the curious rhythmical oddities which give to some of Couperin's pieces, particularly his courantes, an air of stiffness and angularity akin to ill-carved wooden puppets:—compare Bach's second courante, in the first of the Suites anglaises, particularly the first Double thereof, or the courante in the fourth Partita in D major, with Couperin's courantes in G minor and D minor, C minor, A major, and B minor, from the first, second, third, fifth, and eighth "ordre" of his "Pièces de clavecin." A distinction should be made between Couperin's type of "courante" and the Italian "corrente," as it is to be found in Corelli's works—of which latter type Bach also gives many specimens.' (See COURANTE.)

Though his works represent, as it were, the essence of French music, the influence of Italy cannot be denied; that of Corelli, whom he greatly admired and whose music he had studied closely, is visible in his chamber music.

Couperin's published works consist of:

'Air à boire.' (1697.)
'Air sérieux.' (1701.)
Four sets of 'Pièces de clavecin'[2] (1713, 1716, 1722, 1730), divided into 'Ordres.'
'L'Art de toucher le clavecin'[3] (1716, 2nd ed. 1717), containing also 8 Preludes.
'Concerts royaux' (4 instrumental suites with bass), included in the 3rd set of Pièces de clavecin. (1722.)
'Les Goûts réunis ou nouveaux concerts . . . augmentés d'une grande sonate en trio intitulée le Parnasse ou l'apothéose de Corelli.' (1724.)
'Concert instrumental sous le titre d'Apothéose composé à la mémoire immortelle de l'incomparable M. de Lully.' (1725.)
'Les Nations: sonades (sic!) et suites de symphonies en trio' (4 Suites). (1726.)

These 3 last compositions are written for 2 violins and bass. Couperin was the first in France to introduce trio-sonatas. More compositions in that style are found in MSS. (Paris National Library, Library of Lyons), some of which have been published only in modern editions (Sénart, Paris). To these MSS. must be added others containing sacred and secular music ('Elevations,' motets, etc.). His 'Pièces de viole avec la basse chiffrée' (Boivin, 1728) consisting of 2 Suites have been reprinted (Durand, Paris).[4]

Couperin probably married in 1689 Marie-Anne Ansault. Of his two daughters, the second, MARGUERITE-ANTOINETTE (*b.* Paris, Sept. 19, 1705), talented harpsichord player, was teacher to the daughters of Louis XV. She acted as her father's substitute during the last three years of his life as 'claveciniste' to the king (not organist)—the first woman to occupy this post; she was succeeded by Bernard de Bury in 1741, but kept the title and emoluments until her death (1778).

The line of the second brother (François (2)) was carried on by his second son (5) NICOLAS (*b.* Paris, Dec. 20, 1680; *d.* there July 25, 1748). At first in the service of the Comte de Toulouse, he was subsequently organist at St. Gervais, 1733–48. His son (6) ARMAND-LOUIS (*b.* Paris, Feb. 25, 1727; *d.* there, Feb. 2, 1789) was considered to be a very talented organist. Dr. Burney heard him in 1770. He held the post at St. Gervais 1748–89, was organist to the king from 1770 to his death, and in addition had appointments at the Sainte-Chapelle, St. Barthélemy, St. Jean-en-Grève, Ste. Marguerite, etc., as well as being one of the four organists at Notre Dame. His published works are: 'Pièces de clavecin' (1752), dedicated to Mme. Victoire de France, falsely attributed to François le Grand (4), some for harpsichord and violin (1765), trio sonatas (1770), 'L'Amour médecin,' 'Cantatille' (1750), etc. His MS. music contains quartets with 2 harpsichords, variations, 'symphonie de clavecins,' etc. His wife, Elisabeth Blanchet, sister-in-law to Pascal-Joseph Taskin, the court instrument-keeper under Louis XV., was also a very good organist; she acted, with her sons, as deputy in some of her husband's numerous posts.

Of these sons the eldest, (7) PIERRE-LOUIS (*b.* Paris, Mar. 14, 1755; *d.* there, Oct. 10, 1789), called either 'M. Couperin l'aîné' or 'Couperin fils,' was organist first to the king, then at Notre Dame, St. Jean, St. Merry and at St. Gervais (1789). Some pieces of his are found in the printed collections: 'Journal de clavecin,' 'Journal de harpe,' as well as in MS. (variations, harpsichord pieces, etc.). His younger brother, (8) GERVAIS-FRANÇOIS[5] (*b.* Paris, May 12, 1759; *d.* there, July 1826), organist at St. Gervais from 1789 to the year of his death, succeeded Pierre-Louis in all his appointments. He composed pianoforte sonatas, variations, 'romances,' etc.; he was the last of the Couperins to serve in title the church of

[1] 'Pièces d'orgue consistantes en deux messes' (1690) is now attributed to him.

St. Gervais, although his only daughter, (9) CÉLESTE (*b. circa* 1793–94; *d.* Belleville, near Paris, Feb. 14, 1850), played the organ there at the death of her father. Singer and pianist also, she taught both branches at Beauvais, where she stayed about ten years.

REPRINTS OF WORKS

(Detailed list in the *Revue de Musicologie*, 1922, 2.)

LOUIS COUPERIN: 'Trésor des pianistes' vol. 20; 'Collection Charles Bouvet' (Demets, Paris) ('Pièces de clavecin,' Viol music, 'Carillons pour orgue').

FRANÇOIS COUPERIN: 'Pièces d'orgue consistantes en deux messes,' in the 'Archives des Maîtres de l'Orgue,' vol. 5 (with preface by A. Pirro); 'Pièces de clavecin' (four books in two), published by J. Brahms and F. Chrysander in the latter's 'Denkmäler der Tonkunst,' and subsequently by Augener.

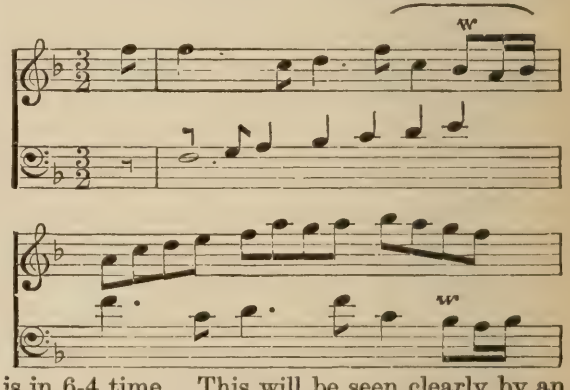
A complete edition of Couperin le Grand's works is in progress (Durand).

Four Trio Sonatas. (Sénart.)

'Collection Charles Bouvet.' (Demets.)

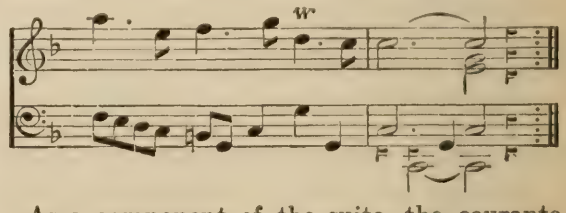
'Pièces de clavecin' are also reprinted in collections such as 'Trésor des pianistes'; 'Les Clavecinestes' (A. Méreaux); 'Les Clavecinistes français' (L. Diémer).

ARMAND, LOUIS COUPERIN: 'Collection Charles Bouvet' (Sonata for harpsichord and violin); 'Les Maîtres français du clavecin' (Sénart, Paris); 'Les Cacqueteuses'; Collection: 'La Cantate au XVIIe et au XVIIIe siècles.' (Rouart et Lerolle, Paris.)



M. L. P.

COUPLER. All modern organs are provided with mechanical appliances called 'couplers.' They are of two general kinds—'manual couplers' and 'pedal couplers.' (1) The former operate in one of three ways: either by taking down on one manual the key corresponding to that played on another, in which case it is a 'unison coupler'; or by taking down the octave above the note pressed down, when it forms an 'octave coupler,' sometimes incorrectly called a 'super-octave coupler'; or by operating on the octave below, forming a 'sub-octave coupler.' The octave and sub-octave couplers sometimes act on the manual on which the note is struck. Manual couplers date back at least as far as 1651, when Geissler's organ at Lucerne was completed; which, according to the account formerly existing over the keys, contained 'several registers, whereby one may make use of the three manuals together, or of one or two of them separately.' (2) A pedal coupler attaches a particular manual to the pedal-clavier; and by bringing the lower 2½ octaves of the compass of the manual under the control of the feet produces the effect of a third hand on any manual required. (See ORGAN.) E. J. H.



COUPPEY, FÉLIX LE (*b.* Paris, Apr. 14, 1811; *d.* there, July 4, 1887), was a pupil of the Conservatoire, where, in his seventeenth year, he was an assistant teacher of harmony. In 1825 he obtained the 1st PF. prize, and in 1828 that for harmony and accompaniment. In 1837 he became Professor of Solfège until 1843, when he succeeded his master, Dourlen, as teacher of harmony and accompaniment until 1854. From 1854–86 he was teacher of PF. In this capacity he wrote many studies and similar things for his instrument. His work entitled *Cours de instrument* comprises *A B C du piano*; *L'Alphabet*; *Le Progrès*; *L'Agilité*; *Le Style*; *La Difficulté*. He also wrote *École du méchanisme du piano*; *L'Art du piano*; *De l'enseignement du piano*; *Conseils aux femmes professeurs* (1865). M. L. P.

COURANTE (Ital. *corrente*, Eng. *corant*). (1) A dance of French origin, the name of which is derived from *courir*, to run. It is described by Thoinot Arbeau (*Orchésographie*) as a dance of duple rhythm, which remained in this form as long as it was used for dancing only. Its transformation into 3-2 time was gradual. Mersenne (*Harmonie universelle*) notes its popularity amongst all other dances practised in France Its vogue was great in the 17th century, and it attained its apogee under Louis XIV. Defined in Brossard's Dictionary of Music, it was considered by d'Alembert as a slow saraband. (See J. Ecorcheville, *Vingt Suites d'orchestre du dix-septième siècle français.*)

It begins with a short note (usually a quaver) at the end of the bar. It is distinguished by a predominance of dotted notes, as the following, from Bach's 'English Suites,' No. 4, and requires a staccato rather than a legato style of performance. Like most of the other old dances, it consists of two parts, each of which is repeated. A special peculiarity of the courante is that the last bar of each part, in contradiction of the time signature,

is in 6-4 time. This will be seen clearly by an extract from the movement quoted above:

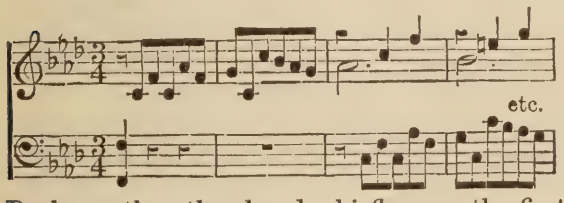
As a component of the suite, the courante follows the ALLEMANDE, with which in its

JOHN BLOW

From a painting by Sir Peter Lely in the possession of Algernon Ashton

F. COUPERIN

From the print by J. C. Flipart after André Bouys



character it is strongly contrasted. In losing its connexion with the dance it underwent a slight modification: whereas in its earlier shape the 6-4 time was only to be found in the concluding bar of each part, courantes are frequently to be met with in suites wherein the two times are mixed up, and sometimes even where, in spite of the time-signature, the 6-4 predominates throughout. This is especially the case in many of those by Couperin. Its chief points may be briefly summed up thus —triple time, prevalence of dotted rhythms, alternations of 3-2 and 6-4 times, and polyphonic treatment.

(2) The Italian courante (*Courante italienne*), called also, like the preceding, simply *corrente* or *courante*, is a different form, quite independent of that just mentioned. It answers more nearly to the etymological meaning of its name, consisting chiefly of *running* passages. This courante is also in triple time—usually 3-8, but sometimes 3-4—and of rapid tempo, about allegro, or allegro assai. It is thus, like the French courante, contrasted with the allemande. As an example of this class may be taken the following from Bach's 'Partita' No. 5:

Other specimens of this kind of courante may be found in No. 5 of Handel's 'First Set of Lessons,' and in Nos. 5 and 6 of Bach's 'Suites Françaises,' these last being in 3–4 time. They are also frequent in Corelli's violin sonatas.

(3) One more species of courante remains to be noticed, which is founded upon and attempts to combine the two preceding ones, but with the peculiarity that the special features of both —viz. the French change of rhythm, and the Italian runs—are not introduced. It is in fact a hybrid possessing little in common with the other varieties, except that it is in triple time, and consists of two parts, each repeated. Most of Handel's courantes belong to this class. The beginning of one, from his *Lessons*, bk. i. No. 8, will show at once the great difference between this and the French or Italian courante.

Bach, on the other hand, chiefly uses the first kind of courante, his movements more resembling those of Couperin. E. P.; addns. M. L. P.

COURTEVILLE, (1) Raphael (*d.* Dec. 28, 1675) was one of the gentlemen of the Chapel Royal in the reign of Charles I. He lived through the interregnum, and resumed his place in the chapel on its re-establishment in 1660.

His son (2) Ralph or Raphael, also called Cortevil, Courtaville and Courtivill (*d. circa* 1735), was brought up as a chorister in the Chapel Royal. Many of his songs appear in the collections published in the latter part of the 17th century and the beginning of the 18th. He published six Sonatas 'composed and purposley (*sic*) contriv'd for two flutes' about 1690; songs by him were introduced into Wright's 'Female Virtuosoes,' 'Duke and No Duke' and 'Oroonoko,' and he was one of the composers who furnished the music for Part 3 of D'Urfey's 'Don Quixote.' His best-known composition is the hymn-tune called 'St. James's.' Queen Mary had presented the organ from the Chapel Royal to the Church of St. James's, Westminster, and on Sept. 7, 1691, 'Ralph Courtaville' was appointed the first organist of that church at a salary of £20 per annum.

It seems highly probably that he was succeeded by his son, (3) Raphael Courteville (*d.* June[1] 1772); but in the vestry minutes of the parish, though they are very carefully kept, no record of this appointment or of the death of Courteville (2) can be found, and it has been assumed that one individual held the post of organist for eighty years.[2] The only direct evidence against this assumption is such as can be derived from the fact that there is a tablet in the church, recording the burial of the wife (Elizabeth Abbot) of 'Raphael Courteville Junr. of this parish, Gent . . .' in May 1735; as he is not called organist, it is likely that Courteville (2) was alive at the time. In Sept. 1735 the widower married Miss Lucy Green, a lady of large fortune.[3] This Courteville devoted himself mainly to political writing. He published *Memoirs of the Life and Administration of William Cecil, Baron Burleigh*, in 1738, signing it only with the initials 'R. C.' He was the reputed author of *The Gazetteer*, a paper written in support of Sir Robert Walpole's administration, and, probably from this, obtained the nickname of 'Court-Evil' from the opposition. A letter appeared over his signature in No. 50 of the *Westminster Journal*, probably as a joke on his own productions; in this he is styled 'Organ-blower, Essayist, and Historiographer.' He published a pamphlet, *Arguments respecting Insolvency*, in 1761. For some years before this, entries in the minute-books of the church show that he had practically neglected his duties as organist: he is warned in 1752–53 and in 1754; and in 1764 his assistant, one Richardson, was consulted as to the repairs of the organ. In 1771 it was reported that Courteville was only giving his assistant one quarter of his salary, and was ordered to share it equally with him. M.

[1] Buried June 10.

[3] *Notes and Queries*, ser. II. x. 496.

COURTOIS (Courtoys, Cortois), Jean (first half of 16th cent.), an eminent composer: was maître de chappelle to the Archbishop of Cambrai in 1539 when Charles V. passed through that city on his way to Ghent; he composed a Motet in four parts, 'Venite populi terrae,' which was performed in the Cathedral and printed in 'Declaration des triumphantz honneur et accueil faictz à la maiesté Imperialle à sa joyeuse et première entrée . . . Cambray, 1539.'

He composed many motets, published in collections (see Eitner's *Bibl. d. Musiksammelwerke*). Masses and motets in MS. are in the Munich Library, and some at Cambrai and Leyden; also at Bologna in MS. in great number,[1] and at Hamburg. Several collections of the 16th century, printed in France, Italy and Germany, contain sacred and secular compositions by Courtois. His French songs include a canon and two songs in five and six parts in 'Chansons à 4, 5, 6 et 8 parties de divers auteurs' (Antwerp, 1543–50); 'Si par souffrir,' in 'Trente chansons musicales à 4 parties' (Paris, 1539); 'Trente et une chansons musicales à 4 parties' (1529)[2]; and two songs in 'Trente-cinq livres de chansons nouvelles à 4 parties de divers auteurs' (1533–49).[3]

M. C. C.; addns. M. L. P.

COUSINEAU, (1) le Père (*b.* Paris, *c.* 1753; *d.* there, 1824), celebrated instrument-maker (luthier), but best known as a maker of harps; virtuoso harpist and composer for his instrument. The Christian name of Pierre Joseph, which Fétis gives him, should not be accepted too confidently (cf. Constant Pierre, *op. cit.* p. 115). His harps had in general a fine sonorousness, but they were accused of excessive fragility. Cousineau invented various improvements which were all superseded by the innovations of Sebastian Erard: in 1781 the addition of a second row of pedals, which brought the number up to fourteen, in order to produce the D, G, C, F flat and the D, A and B sharp; in 1787 an arrangement to produce the crescendo (*Journal de Paris*, Nov. 19, 1787); in 1798 a new arrangement, simpler but more fragile, to produce half tones. For more than 20 years Cousineau was luthier-in-ordinary to the queen, and harpist at the Opéra. He composed for his instrument 20 works; including a *Méthode*. M. P.

(2) Georges, son of the preceding (*b.* Paris), was his father's partner and assistant in his various occupations as instrument maker (luthier) and executant. We are indebted to him for the 'Airs variés pour la harpe' and a little *Méthode* (Paris, Lemoine).

COUSSEMAKER, Charles Edmond Henri de (*b.* Bailleul, Nord, Apr. 19, 1805; *d.* Bourbourg, Nord, Jan. 12, 1876), a distinguished French writer on the history of music.

His family dates from the 15th century, and had for many generations held important magisterial posts in Bailleul; his father, a 'juge de paix,' destined him for the law; but his musical aptitude was such that at 10 he could play any piece upon the piano at sight. He also learned the violin and violoncello. He was educated at the Douai Lycée, and took lessons in harmony from Moreau, organist of St. Pierre. In 1825 he went to Paris, and studied composition, etc., under Reicha and others. The recent researches of Fétis had roused a general interest in the history of music, and Coussemaker's attention was turned in that direction. Having completed his legal studies he was appointed 'juge' successively at Douai, where he continued to study music with Victor Lefebvre, Bergues, Hazebrouck, Dunkerque and Lille. He was a member of the Institut for twenty years, and belonged to several other learned societies, besides being a chevalier of the Legion of Honour, and of the order of Leopold of Belgium. His works are:

Mémoire sur Hucbald, etc. (1841); *Notices sur les collections musicales de la bibliothèque de Cambrai*, etc. (1843); *Histoire de l'harmonie au moyen âge* (1852); *Trois chants historiques* (1854); *Essai sur les instruments de musique au moyen âge* (1856); *Chants populaires des Flamands* (1856); *Chants liturgiques de Thomas à Kempis* (1856); *Notice sur un MS. musical de . . . S. Dié* (1859); *Drames liturgiques*, etc. (1860); *Messe du XIIIe siècle*, etc. (1861); *Scriptorum de musica medii aevi nova series*[4] (1864–76, 4 vols.); *Les Harmonistes des XIIe et XIIIe siècles* (1865); and *L'Art harmonique aux XIIe et XIIIe siècles* (1865); *Traités inédits sur la musique du moyen âge* (1865, 1867, 1869).

He also edited the works of Adam de la Halle (Paris, 1872) and Tinctor's treatise 1875). At the time of his death he was preparing a continuation of his *L'Art harmonique* to the 14th century. His legal writings are good, especially one on Flemish law. In early life he composed some masses and other church music and published a volume of songs. In spite of certain errors his works form a most important contribution to the history of music.

F. G.

COUSSER (Kusser), Johann Sigismund, (*b.* Presburg, Feb. 13, 1660; *d.* Dublin, 1727), the son of a musician. He studied six years in Paris under Lully, and on his return to Germany lived at Stuttgart (1675–81), where he played in the court band from 1682.

From 1683–85 he was in the service of the Bishop of Strassburg, and from about 1690–1693 was Kapellmeister at Brunswick. He lived at Hamburg from 1693–97, conducting the performances at the opera, and is said to have been one of the first to introduce the Italian method of singing into Germany. In 1698 he was again at Stuttgart, where he was ober-Kapellmeister from 1700, resigning his appointment in 1704. Between 1700 and 1705 he made two journeys to Italy for study.

[4] In continuation of Gerbert's *Scriptores ecclesiastici*.

Soon after, he came to London, and in 1710 received an appointment in Christ Church Cathedral, Dublin, and as 'Master of the musick attending his Majesty's state in Ireland' (1716). His published works comprise:

'Composition de musique suivant la méthode française contenant six ouvertures de théâtre accompagnées de plusieurs airs . . .' (Stuttgart, 1682), that is, suites for string orchestra; the operas 'Erindo' (1693), 'Porus,' 'Pyramus and Thisbe' (1694), 'Scipio Africanus' (1694) and 'Jason' (1697), many of them and others performed at Hamburg; 'Apollon enjoué,' six operatic overtures and airs published at Stuttgart, 1700; an opera, 'Ariadne'; and 'Heliconische Musenlust,' a collection of airs from 'Ariadne' (Stuttgart, 1700); an Ode on the death of Arabella Hunt; and a 'Serenade' for the King's birthday (1724).

M. C. C.; addns. by W. H. G. F., M. L. P. and from *Q.-L.*

COUSU, Antoine de (*b.* Amiens; *d.* St. Quentin, Aug. 11, 1658). He was first a singer in the Sainte-Chapelle, afterwards choirmaster at Noyon, and finally canon at St. Quentin. He wrote *La Musique universelle*, 1658, one of the earliest works dealing with hidden fifths and octaves. Riemann thinks that a 4-part fantasy in Kircher's 'Musurgia' by Jean Cousu is probably attributable to the above.

E. v. d. S.

COVENT GARDEN THEATRE, opened Dec. 7, 1732, under the management of Rich, who moved there with all his company from the theatre he had previously directed in Lincoln's Inn, burned on the night of Sept. 19, 1808; new theatre opened Sept. 18, 1809; converted into an opera-house, 1847; burnt down, Mar. 5, 1856; reconstructed and opened again as an opera-house, May 15, 1858.

Though licensed for the performance of the higher class of dramatic works, to which the name of 'legitimate' is given, Covent Garden Theatre has been the scene of all kinds of theatrical representations; and two years after the first opening of the theatre, in 1734, we find the bill for Mar. 11 announcing

'a comedy called The Way of the World, by the late Mr. Congreve, with entertainments of dancing, particularly the Scottish dance, by Mr. Glover and Mrs. Laguerre, Mr. Le Sac and Miss Boston, Mr. de la Garde and Mrs. Ogden; with a new dance called Pigmalion, performed by Mr. Malter and Mlle. Sallé.'

'No servants,' it is stated, in a notification at the end of the programme, 'will be permitted to keep places on the stage.' Mlle. Sallé is said on this occasion to have produced the first complete *ballet d'action* ever represented on the stage. She at the same time introduced important reforms in theatrical costume. (See Ballet.) In the autumn of the same year (1734) Handel opened his first season there with a ballet and 'Il Pastor Fido,' and his subsequent operas with the majority of the oratorios were produced there. Next to him, but at a considerable distance both in time and artistic importance, the chief composer of eminence connected with the theatre was Sir Henry Bishop, who between 1810 and 1824 produced at Covent Garden no less than fifty musical works of various kinds, including 'Guy Mannering,' 'The Miller and his Men,' 'The Slave' and 'Clari,' besides adaptations of Rossini's 'Barber of Seville,' Mozart's 'Marriage of Figaro' and other celebrated operas. 'Der Freischütz,' soon after its production in Germany, was brought out in an English version both at Covent Garden and at Drury Lane (1824). So great was its success that Weber was requested to compose for Covent Garden an entirely new opera. 'Oberon,' the work in question, was brought out Apr. 12, 1826, when, though much admired, it failed to achieve such popularity as 'Der Freischütz' had obtained. It has been said that Weber was much affected by the coolness with which 'Oberon' was received. Scudo, the eminent French critic, writing on this subject in the *Revue des Deux Mondes*, records the fact that 'Oberon' was very successful on its first production at Covent Garden, and adds that it was 'received with enthusiasm by those who were able to comprehend it.' (See Weber.)

Between 1826 and 1846 operas and musical dramas were from time to time played at Covent Garden. But it was not until 1846 that the theatre was turned permanently into an opera-house; when, with the interior reconstructed by Albano, it was opened, in the words of the prospectus, 'for a more perfect representation of the lyric drama than has yet been attained in this country.' The director was Frederick Beale (of the firm of Cramer, Beale, & Co.), with whom was associated Persiani, husband of the eminent prima donna of that name (see Persiani), and others. The musical conductor was Costa. In the company were included Grisi and Mario, who with Costa and nearly all the members of his orchestra had suddenly left Her Majesty's Theatre for the new enterprise, in which they were joined by Persiani, Tamburini, Ronconi and Alboni who, on the opening night—Apr. 6, 1847—sang (as Arsace in 'Semiramide') for the first time on this side of the Alps. The management of the Royal Italian Opera, as the new musical theatre was called, passed after a short time into the hands of Delafield, who was aided by Gye; and after Delafield's bankruptcy the establishment was carried on solely by Gye (1851), who, when the theatre was burned down in 1856, rebuilt it at his own expense from the design of Edward Barry, R.A. Madame Patti made her début at the Royal Italian Opera in 1861, when she sang for the first time on the boards of a European theatre. Lucca and Albani, Tamberlik and Graziani, may be mentioned among other artists of European fame who appeared at the Royal Italian Opera. For some dozen years (between 1840 and 1855) Jullien directed promenade concerts at this theatre; and from time to time, during the winter months, performances of English opera were given at Covent Garden. Thus Balfe's 'Rose of Castille,' 'Satanella' and

'Armourer of Nantes,' Wallace's 'Lurline,' and Benedict's 'Lily of Killarney,' were produced here under the management of Louisa Pyne and William Harrison. The 'Royal Italian Opera' suffered financial collapse soon after the season of 1884; and between that date and the beginning of the prosperous regime of Sir Augustus Harris, a few seasons of opera were managed by an impresario named Lago. In 1888 HARRIS (*q.v.*) opened with a very large subscription, and with a company which he had formed at Drury Lane in the previous year. From that date until his death in June 1896 success followed all that he undertook, and the 'Royal Opera' (as it was called from 1892 onwards) once more drew all the world to Covent Garden. It was during Harris's management that Wagner's 'Der Ring des Nibelungen' was first given as a whole at Covent Garden (June 1892) under Mahler. After his death the Grand Opera Syndicate became lessees of the theatre, and the traditions established by Harris were maintained until the war (1914) brought an interruption. Under this management were given brilliant performances of 'Der Ring,' conducted first by Mottl (1898), later by Richter (beginning 1903). Both German and French opera took an equal place with Italian works, and the custom was established of performing operas in the language in which they were composed. The house was closed from the summer of 1914 till 1919. Sir Thomas BEECHAM (*q.v.*) took charge of the two summer seasons of 1919 and 1920, but London was again without its 'Royal Opera' in 1921. The CARL ROSA OPERA COMPANY and the BRITISH NATIONAL OPERA COMPANY (*q.v.*) rented the house from the syndicate for short seasons of opera in English between 1921 and 1924. On May 5, 1924, the Grand Opera Syndicate (chairman, Mr. H. V. Higgins) resumed operations with a German company, and the London Opera Syndicate, leasing the house from the Grand Opera Syndicate, has given 'international' seasons in 1925 and 1926.

H. S. E., with addns.

COWARD, SIR HENRY (*b.* Liverpool, Nov. 26, 1849), a distinguished chorus-master.

His father was a Sheffield grinder who had given up this trade and became a banjoist and 'nigger minstrel' and later a publican in Liverpool; his mother was a good singer. After the death of the father the family moved back to Sheffield where, at the age of 9, the boy was put to learn the trade of cutler. Almost entirely without schooling, even of the most elementary kind, he taught himself to read and write and made good progress at his trade, winning a number of prizes for craftsmanship. He attended Tonic Sol-fa classes, and at the age of 17 started one of his own, which later gave several concerts.

At 22 he threw up his trade and became a pupil teacher, advancing with remarkable rapidity to the position of headmaster of an Elementary School. Meanwhile he was still working hard as a conductor and in 1876 formed a choral body, the Sheffield Tonic Sol-fa Association, which developed in a few years into a first-rate choral society, the Sheffield Musical Union.

In 1887 the school of which he was the head was merged into another larger one, and he decided to make music his profession. Eighteen months later he had taken the degree of Mus.B. at Oxford, proceeding in due course to that of Mus.D. He was much in demand as a conductor of large bodies of singers connected with outdoor festivals; on the occasion of a visit of Queen Victoria to Sheffield in 1887 he had about 60,000 children under his baton. His greatest opportunity occurred, however, when in 1895 he was appointed chorus-master, with August Manns as conductor, of the then newly formed Sheffield Musical Festival. At one stroke the fame of Sheffield choral singing and of Coward as chorus-master was made.

In 1906 Coward was invited to take a chorus to the Rhine Provinces, and for this purpose called in the assistance of the Sheffield Musical Union and the Leeds Choral Union, the two principal permanent choral bodies with which he was associated. Concerts were given in Cologne, Düsseldorf and Frankfort, with the assistance of local orchestras, Elgar's 'The Dream of Gerontius' and Handel's 'Messiah' being the principal works performed. The great success of this tour led to a longer one during the summer of 1910, when Düsseldorf, Aix-la-Chapelle, Essen, Leipzig and Dresden were visited. Between these two tours several visits had been made by the Sheffield Choral Union to London, Birmingham and Arundel, with equal success, and in 1908 a long tour in Canada was undertaken by a choir of two hundred drawn chiefly from that society. Eleven days were spent in the Dominion; sixteen concerts, some with and some without orchestra, being given at Montreal, Quebec, Toronto, Ottawa, Buffalo, Niagara, St. Catherines, Hamilton, Brantford, London, Lindsay and Peterborough. Both Coward himself and his choir were highly complimented, and received many tributes at social gatherings arranged by the Governor-General and various municipalities and by the Toronto Clef Club.

This tour had been proposed and organised by Dr. C. A. E. Harriss, a well-known Canadian musician and entrepreneur, who at the close of it again suggested a world tour by the same or a similar choir, the places to be visited being in the British Dominions and the United States of America. This took place in 1911, among

the many places visited being Halifax (Nova Scotia), the chief Canadian towns, Chicago, Winnipeg, Vancouver, Victoria (B.C.), Honolulu, Brisbane, Adelaide, Perth, Wellington, Sydney, Auckland, Melbourne, Durban and Cape Town. As this lasted six months Coward drew on a wider area than previously for his chorus, with the result that the success was less complete, some American criticisms being particularly disparaging. Of Coward's own powers, however, there was no question.

Besides his activities centring in Sheffield, Coward has been the conductor of large choral bodies in Leeds, Huddersfield, Preston, Derby, Newcastle-on-Tyne, Glasgow and other places. His services as judge at competitive festivals are much in demand, and he has had considerable influence as a lecturer and as a humorous and instructive writer in local newspapers, besides composing a number of agreeable, if undistinguished, cantatas and shorter works. He received knighthood in 1926. He is also the author of a useful treatise on choral singing published by the firm of Novello. A biography of *Dr. Henry Coward, The Pioneer Chorus-master*, by J. A. Rodgers, was published by John Lane in 1911. H. A.

COWARD, James (*b.* London, Jan. 25, 1824; *d.* there, Jan. 22, 1880), entered the choir of Westminster Abbey at an early age. He was given the appointment of organist at the parish church, Lambeth; and at the opening of the Crystal Palace at Sydenham in 1857, he received a similar appointment there, which he retained until his death, which took place at his house in Lupus Street.

He held various church appointments in addition to this, being at one time or another organist of St. George's, Bloomsbury, and St. Magnus the Martyr, London Bridge. He was conductor of the Western Madrigal Society from 1864–72, and directed also the Abbey and City Glee Clubs for some time before his death. He was for some time organist to the Sacred Harmonic Society, and the Grand Lodge of Freemasons. Although best known by his brilliant transcriptions for the organ of operatic melodies, etc., his published works show him to have possessed considerable musical knowledge and artistic feeling. They include an anthem, 'O Lord, correct me'; 'Sing unto God,' a canon four in two; two other canons; Ten Glees, 1857; 'Ten Glees and a Madrigal,' 1871; besides many pieces for pianoforte, organ, etc. He had a remarkable power of improvisation. M.

COWEN, Sir Frederic Hymen, Mus.D. (originally Hymen Frederick) (*b.* Kingston, Jamaica, Jan. 29, 1852), composer and conductor.

He was brought by his parents to England at the age of 4, and even in earliest childhood exhibited an extraordinary love of music; he published a waltz at the age of 6, and in 1860 composed an operetta called 'Garibaldi; or the Rival Patriots,' to a libretto by his sister, aged 17. In November of the same year he became a pupil of Goss and Benedict, and by 1863 was advanced enough to give a morning concert (or piano recital) in the concert-room of Her Majesty's Theatre, playing a number of pieces from memory. In 1864 he played Mendelssohn's D minor concerto at Dudley House, at a concert at which Joachim and Santley appeared. In 1865, also at Dudley House (the composer's father was private secretary to the Earl of Dudley), a trio in A, composed by Cowen, was played by himself, Joachim and Pezze. In the same year he competed successfully for the Mendelssohn Scholarship, but the scholarship was relinquished, as his parents objected to give up the control of their son. They took him to Leipzig, where he entered the Conservatorium as a pupil of Plaidy, Moscheles, Reinecke, Richter and Hauptmann. A string quartet was played at the Conservatorium in Jan. 1866, but his residence abroad was cut short by the war between Prussia and Austria, and he returned to England, appearing as a composer for the orchestra in an overture in D minor played at Mellon's promenade concerts at Covent Garden. He appeared elsewhere as a pianist a few times, and Oct. 1867 entered the Stern Conservatorium at Berlin, where he studied under Kiel, and laid the foundation of his remarkable skill as a conductor. He stayed less than a year abroad, coming back to London in 1868, and playing at various concerts, such as the Philharmonic, the Monday Popular and elsewhere. He made his most prominent appearance as a composer on Dec. 9, 1869, at a concert in St. James's Hall, where were produced his symphony in C minor and pianoforte concerto in A minor. From that time he was recognised primarily as a composer, but as, even for a young man so highly gifted as he, composition was not yet a practical means of livelihood, he undertook to act as accompanist to Mapleson's concert-party and assistant-accompanist at Her Majesty's under Costa. This eminent conductor got Cowen his first festival commission, as a result of which 'The Corsair' was brought out at Birmingham in 1876. In the same year his first opera, 'Pauline,' was produced by the Carl Rosa Company at the Lyceum. It was the production of his 'Scandinavian Symphony' at St. James's Hall on Dec. 18, 1880, that gave Cowen his place among the most prominent of English composers. The work rapidly made its way on the Continent and in America, and as the work of one who never had a lesson in orchestration it is a very remarkable feat. Local colour is used with admirable felicity, and there is little wonder that it soon became popular. In 1881

his 'St. Ursula' at Norwich enhanced his fame, and in 1884 he conducted five concerts for the Philharmonic Society. From 1888–92 he was permanent conductor of the society, appointed on the resignation of Sullivan; and in 1888 he went to Melbourne, where he conducted the daily orchestral concerts at the Centennial Exhibition for six months, receiving the unprecedented sum of £5000 for the engagement. He conducted the Hallé Orchestra in Manchester from 1896–99; the Liverpool Philharmonic Society (1896–1913), and Bradford Festival Choral Society and Subscription Concerts from the same date. He conducted the Bradford Permanent Orchestra, 1899–1902, and the Scarborough Festival of 1899. In 1900 he was again appointed, in succession to Sir A. C. Mackenzie, as conductor of the Philharmonic Society, and conducted its concerts regularly until 1907 and occasionally later. In this capacity some of his best work was done, for he raised the society to a higher position than it had held since the death of Costa. The conductorship of the Scottish Orchestra was added to Cowen's other appointments in 1900, that of the Cardiff Festival in 1902, and that of the Handel Festival in 1903. In Nov. 1900, the honorary degree of Mus.D. was conferred upon him by the University of Cambridge and by Edinburgh (1910). He received the honour of knighthood (1911). Four Cardiff Festivals were held under his direction (1902–10), and at the last of them the most important composition of his later years, 'The Veil,' a setting for soli, chorus and orchestra of a poem by Robert Buchanan, was produced. It was subsequently given in London by the Royal Choral Society and frequently given elsewhere. Cowen conducted all the triennial Handel Festivals from his appointment until the break caused by the war, and two since (1920, 1923).

Cowen's music is marked by a certain fantastic grace that is all his own; for this reason he succeeds best in subjects that deal with fairy tales and the like. Here he is always in his element, and the variety of treatment which he has shown in a long succession of choral and orchestral works of this kind is very remarkable. Some of his many songs are genuinely expressive, and in his operas there are things in which the deeper emotions are skilfully handled; but it is in the lighter moods that he is most successful. In spite of all the serious work he has done in every form of composition he is probably still most widely known as the composer of 'The Better Land.'

ORCHESTRAL MUSIC

Symphonies.—No. 1, in C minor (1869); No. 2, in F minor (1872); No. 3, in C minor ('Scandinavian,' 1880); No. 4, in B flat minor ('Welsh,' Philharmonic, 1884); No. 5, in F (Cambridge, 1887); No. 6, in E ('Idyllic,' Richter, 1897).

Overtures.—In D minor (1866); Festival Overture (Norwich, 1872); Characteristic Overture, 'Niagara' (Crystal Palace, 1881); 'The Butterfly's Ball,' Queen's Hall Symphony Concerts, 1901.

Suites, Marches, etc.—'The Language of Flowers' (1) (1880); 'In the Olden Time' (for strings, 1883); 'In Fairyland' (1896); 'Four English Dances in the Olden Style'; Sinfonietta in A (1881); 'A Phantasy of Life and Love' (Gloucester Festival, 1901). Various marches, among them the 'Coronation March' (1902); Indian Rhapsody (Hereford Festival, 1903). Two pieces for small orchestra, 'Childhood' and 'Girlhood' (1903). Four old English Dances (2nd set) (1905). 'The Language of Flowers' (2) (Promenade Concerts, 1914).

Concertos.—In A minor, PF. and orch. (1869); Concertstück, for PF. and orch. (Philharmonic, 1900); Rêverie for vln. and orch., arranged from a piece for vln. and PF.

CHAMBER MUSIC

Trio in A, PF. and strings (1865); string quartet in C minor (1866); Rêverie, vln. and PF.; Suite, 'Flower Fairies,' sonata, fantasia, allegretto grazioso; 'Petite Scène de ballet' (4 pieces), and many other pieces for piano solo.

DRAMATIC MUSIC

Operas.—'Pauline' (Lyceum, 1876); 'Thorgrim' (Drury Lane, 1890); 'Signa' (Milan, 1893, and Covent Garden, 1894); 'Harold' (Covent Garden, 1895).

Operettas, etc.—'Garibaldi' (1860); 'Maid of Orleans (incidental music, 1871); 'One too many' (German Reeds, 1874); Pantomime, 'Monica's Blue Boy'; Comedy Ballet, 'Cupid's Conspiracy' (1918); 'The Enchanted Cottage' (incidental music, Duke of York's Theatre, 1922).

CHORAL MUSIC

Oratorios.—'The Deluge' (Brighton, 1878); 'St. Ursula' (Norwich, 1881); 'Ruth' (Worcester, 1887); 'Song of Thanksgiving' (Melbourne, 1888); 'The Transfiguration' (Gloucester, 1895); 'He giveth His beloved sleep' (Cardiff, 1907); 'The Veil' (Cardiff, 1910).

Cantatas, etc.—'The Rose Maiden' (1870); 'The Corsair' (Birmingham, 1876); 'The Sleeping Beauty' (Birmingham, 1885); 'St. John's Eve' (1889); 'The Water Lily' (Norwich, 1893); 'All hail the glorious reign' (Jubilee Ode, 1897); 'Ode to the Passions' (Collins's words) (Leeds, 1898); Coronation Ode (Norwich, 1902); 'John Gilpin' (Cardiff, 1904).

Cantatas for female voices.—'Summer on the River,' 'Christmas Scenes,' 'The Rose of Life,' 'A Daughter of the Sea,' 'Village Scenes,' 'The Fairies' Spring.' Anthems, etc., and partsongs.

VOCAL MUSIC

'The Dream of Endymion,' tenor solo and orch. (Philharmonic, 1897); 'Nights of Music,' duet with orch. (1900); Songs, nearly 300 in number.

M., with addns.

COX AND BOX, a 'triumviretta,' or musical farce, altered from Madison Morton's 'Box and Cox' by F. C. Burnand, music by A. Sullivan. First performed at Moray Lodge, Campden Hill, and in public, Adelphi Theatre, May 11, 1867.

CRACOVIENNE. see KRAKOVIAK.

CRAMER, a family of German musicians, of whom the head was (1) JACOB CRAMER (*b.* Sachau, Silesia, 1705; *d.* Mannheim, 1770), violinist in the then celebrated band at Mannheim.

Of his sons, (2) JOHANN (*b.* Mannheim, 1743) was drummer in the court band at Munich, and (3) WILHELM (*b.* Mannheim, 1745; *d.* London, Oct. 5, 1799) made himself a considerable reputation as a violinist and leader. The latter was a pupil of Johann Stamitz, sen., and of Cannabich, and when still very young gave evidence of unusually brilliant abilities. His contemporaries declared that his playing united the facility of Lolli with the expression of Franz Benda. At 16 he was admitted into the band at Mannheim, but left it after his father's death for London, where he was well received in 1772, and soon obtained a creditable position. His first appearance was Mar. 22, 1773. He was appointed head of the king's band, and leader at the Opera and Pantheon, the Antient Concerts (1780–89) and the Professional Concerts. He was famous as the leader of the Handel Festivals at Westminster Abbey in 1784 and 1787. His last appearance was at the Gloucester Festival in 1799, and he died in Charles St., Marylebone, in that year. As a solo-player he was for a time considered to be

without a rival in England till superseded by Salomon and Viotti. He published three concertos in Paris, several solos and trios, but they are of no value.

Of his sons are known, (4) FRANZ or FRANÇOIS (*b.* 1772 ; *d.* Aug. 1, 1848), a violinist of repute in London, who was appointed master of the King's music in 1827.

(5) CARL (*b.* 1780), a good pianist and valued teacher. And finally,

(6) JOHANN BAPTIST (*b.* Mannheim, Feb. 24, 1771 ; *d.* London, Apr. 16, 1858), the eldest son and the best known of the whole family, an eminent pianist, and one of the principal founders of the modern pianoforte school. He was but a year old when his father settled in London, and it was there that he lived and worked for the greatest part of his life. To his father's instruction on the violin and in the elements of the theory of music, pianoforte-playing was added, and for this the boy manifested the most decided preference and unmistakable talent. His teachers were a certain Benser, Schroeter, and above all, Muzio Clementi, under whom he studied for two years till Clementi's departure in 1784. His first appearance in public took place in 1781. His mind and taste were formed on Handel, Bach, Scarlatti, Haydn and Mozart, and by this means he obtained that musical depth and solidity so conspicuous in his numerous works. Cramer was in the main self-educated in theory and composition. He had, it is true, a course of lessons in thorough-bass from C. F. Abel in 1785, but his knowledge was chiefly acquired through his own study of Kirnberger and Marpurg. From 1788 Cramer undertook professional tours on the Continent, and in the intervals lived in London, enjoying a world-wide reputation as pianist and teacher. Forty-two studies for the pianoforte were first published by him in 1804 at 6 Coventry Street, Haymarket. In 1824 he established the firm of J. B. CRAMER & Co., music-publishers (*q.v.*). After a residence of some years abroad, at first (from 1835) in Munich, and afterwards in Paris, he returned in 1845 to London, and lived to play a duet with Liszt in London. He passed the rest of his life in retirement. He was buried in Brompton Cemetery. There are references to him in Beethoven's letters of June 1, 1815, and Mar. 5, 1818, and frequent notices in Moscheles's Life. Ries has left on record (*Notizen*, p. 99) that John Cramer was the only player of his time of whom Beethoven had any opinion—' all the rest went for nothing.'

A. M.

J. B. Cramer's playing was distinguished by the astonishingly even cultivation of the two hands, which enabled him, while playing legato, to give an entirely distinct character to florid inner parts, and thus attain a remarkable perfection of execution. He was noted among his contemporaries for his expressive touch in adagio, and in this, and in facility for playing at sight, he was able when in Paris to hold his own against the younger and more advanced pianists. His improvisations were for the most part in a style too artistic and involved for general appreciation. Cramer's mechanism exhibits the development between Clementi and Hummel, and is distinguished from the period of Moscheles and Kalkbrenner which followed it, by the fact that it aimed more at the cultivation of music in general than at the display of the specific qualities of the instrument. All his works are distinguished by a certain musical solidity, which would place them in the same rank with those of Hummel, had his invention been greater and more fluent ; but as it is, the artistic style, and the interesting harmony, are counterbalanced by a certain dryness and poverty of expression in the melody. It is true that among his many compositions for pianoforte there are several which undeniably possess musical vitality, and in particular his seven concertos deserve to be occasionally brought forward ; but, speaking generally, his works (105 sonatas, 1 quartet for pianoforte, 1 quintet, and countless variations, rondos, fantasias, etc.) are now forgotten. In one sphere of composition alone Cramer has left a conspicuous and abiding memorial of his powers. His representative work, ' 84 Studies in two parts of 42 each,' is of classical value for its intimate combination of significant musical ideas, with the most instructive mechanical passages. No similar work except Clementi's *Gradus ad Parnassum* has been so long or so widely used, and there are probably few pianists who have not studied it with profit. It forms the fifth part of Cramer's *Grosse praktische Pianoforte-Schule* (Schuberth, Leipzig), and has appeared in numerous separate editions. Of these the earliest is probably the lithograph edition of Breitkopf & Härtel, of which the second part appeared in 1810 ; next in importance ranks the last that was revised by Cramer himself, viz., the original English edition of Cramer & Co., which contained, as op. 81, ' 16 nouvelles études,' making in all 100 ; and finally an edition without the additional numbers, revised by Coccius, and published a few years later than that last mentioned, by Breitkopf & Härtel. A selection of ' 50 études,' edited by Von Bülow (Aibl, Munich), is specially useful to teachers from the excellent remarks appended to it, though, on the other hand, it contains a number of peculiarities which may or may not be justifiable, the editor having transposed one of the studies and modified the fingering of them all to meet the exigencies of the modern keyboard. The above edition in 100 numbers must be distinguished from the ' Schule der Geläufigkeit ' (op. 100), also containing 100 daily studies, and which forms the second part of the *Grosse Pianoforte-Schule*, and

should be used as a preparation for the great 'Études.' A copy of the Études, with comments by Beethoven, was discovered in 1893 in the Royal Library of Berlin, by J. S. Shedlock, who published a selection from the book, with a prefatory account and careful annotations in the same year (Augener). E. D.

CRAMER & CO. This eminent music-publishing house was founded in the year 1824 by J. B. Cramer in partnership with Robert Addison and T. Frederick Beale; the two latter had previously carried on a small business at 120 New Bond Street, and had moved to 201 Regent Street in 1822. J. B. Cramer's popularity and influence soon drew around him a goodly proportion of the professors of the day, who with his own pupils created a large circulation for the pianoforte works of the firm. The catalogue of publications continued on the increase until, in the year 1830, the firm bought the whole of the music plates belonging to the Harmonic Institution, which contained a considerable portion of the works of Dussek, Clementi, Haydn, Herz, Hummel, Mozart and Steibelt, besides a few of Beethoven and Moscheles, with Handel's choruses arranged as solos and duets, many of the popular songs of C. Horn, the operas 'Oberon' and 'Freischütz,' the oratorio of 'Palestine' by Dr. Crotch, and a large number of Italian songs and duets by Gabussi, Meyerbeer, Mozart, Pacini, Paër, Rossini, Vaccaj and others, thus giving the house a very strong position in the music trade. Upon this followed the English operas of Balfe, Benedict and Barnett, the glees of Horsley and Callcott, the songs of Neukomm, pianoforte works of Döhler, Moscheles, Thalberg, Leopold de Meyer, etc. Between 1835 and 1845 Cramer was much abroad, and between 1844–45 Addison retired from the business, becoming senior partner with Hodson at 210 Regent Street, and was succeeded by W. Chappell, when the firm became Cramer, Beale & Chappell. In 1845 Vincent Wallace returned from America, and Cramer & Co. secured his 'Maritana,' publishing also, as years went on, his other successful works. After the death of Cramer in 1858, and the retirement of Chappell in 1861, George Wood, one of a family of Edinburgh and Glasgow music publishers, became partner with Beale. In 1862 the firm took additional premises with a large gallery at 207 and 209 Regent Street, and about the same time devoted much attention to the manufacture of pianos. On the death of Beale in 1863 the whole of the business fell into the hands of Wood, who carried it on with great success, giving, however, more attention to pianoforte manufacturing than to publishing, having introduced and very extensively carried out a novel mode of supplying pianofortes on a hiring system, which seems to have become very general. On the death of George Wood in 1893 the business passed to his two nephews, and the premises at 199 and 201 Regent Street were given up.

In 1897 the firm was turned into a limited company, and at the end of 1902 removed to 126 Oxford Street, with other establishments in Moorgate Street and at Notting Hill Gate and thence to their present (1926) address, 139 Bond Street, with the piano factory at Castle Road, N.W.1. C. H. P.; addns. F. K.

CRANFORD, William (17th cent.), composer and singing-man of St. Paul's. He wrote many rounds and catches as well as church music, and is thus represented in Hilton's 'Catch that catch can,' 1652 (and other collections), as well as in the Ravenscroft Psalter of 1621. A 'passion' on the death of Prince Henry (1613), 'Weepe, Brittaynes, weepe' (*a* 6) and a madrigal 'Woods, Rockes and Mountaynes' (*a* 6) are in the library at Christ Church, Oxford (the bass part is wanting). The same library also contains a 5-part 'In nomine,' and a 3-part Almaine by him. Below is a list of his sacred compositions:

Evening Service (M. and N.D.). Tenb. O.B./229v.

ANTHEMS

'My sinfull soul.' Ch. Ch. 56–60 (Bass part missing).
'Heare my prayer, O Lord.' Durh. C 16/213 (imperf.).
'How long.' R.C.M. 1046/12 (single part only).
'I will love thee, O Lord,' for two basses. Durh., PH.; Add. MSS. 30,478/9 (Tenor Cantoris part only).
'My beloved spake.' Tenb. O.B./470v.
'O Eternal God.' Tenb. O.B./472; Harl. 6346/74 (words only).
'O Lord, I have sinned.' Tenb. O.B./474v.
'O Lord, make thy servant.' } Durh., PH.; Add. MSS. 17,784/3
'The King shall rejoice' (verse anthem for the King's Day). } (Bass part only); Harl. 6346/44 (words only).
'O most gracious God.' Tenb. O.B./473v.

J. MK.

CRANG & HANCOCK, organ-builders. John Crang, a Devonshire man, settled in London and became a partner with Hancock, a good voicer of reeds. The latter added new reeds to many of Father Smith's organs. Crang altered the old echoes into swells in many organs, as at St. Paul's Cathedral, St. Peter's, Cornhill, etc. There appear to have been two Hancocks, (1) John (*d.* 1792) and (2) James (living in 1820), probably brothers; both are mentioned in the contract for an organ at Chelmsford in 1772. Crang appears to have given his name to Crang Hancock, a pianoforte-maker. V. de P.

CRAS, Jean Emile Paul (*b.* Brest, Finistère, May 22, 1879), composer. He was not intended for a musical career; but his passion and his gifts for music being great, he devoted his life to it in spite of his naval career, which, unlike the composers A. Roussel and A. Mariotte, he did not abandon. (He is now captain.) Of a family of musical amateurs, he was composing by instinct when only 15, and was self-taught until he was befriended by Henri Duparc (Oct. 1901), who gave him musical instruction. He also attended for some time Guilmant's organ class at the Paris Conservatoire. His first songs were composed from 1900–05, followed by a set of 'Élégies' for voice and orchestra (1910), performed at the Société Nationale de Musique in

1912. 'L'Offrande lyrique' (6 songs) (text of Rabindranath Tagore; translation by André Gide), written 1920 and performed by the same society (Jan. 28, 1922), has been orchestrated and played in that form (Nov. 1924). The songs show their author in possession of the style peculiar to him. He has not tried to give them an outward Oriental colour, but has aimed at rendering the accent and the intensity of the verses, the result of which is very taking. Another collection of songs, 'Fontaines' (1923), was sung for the first time the following year. For the piano he has written 'Poèmes intimes,' 'Danze,' 'Paysages' (the last two 1917); an orchestral suite, 'Âmes d'enfants' (1918); 'Le Songe d'Acis et Galathée' (unpublished), also for orchestra. His chamber music consists of a sonata (PF., v'cl.), a trio (PF., vln., v'cl., 1907), a string quartet (1909), a quintet (PF. and strings, 1922), these two last works having been first played at the Société Nationale, Mar. 5, 1910, and Jan. 13, 1923, another trio (vln., vla., v'cl., 1926). Amongst recent works are also 'Dans la montagne' (male voice choruses, 1925); 'Deux impromptus' (harp); and 'Air varié' (vln. and PF., 1926). The composition of 'Polyphème' (poem by A. Samain), a lyrical drama in 4 acts and 5 scenes, plays an important part in J. Cras's life. Begun in 1912 and finished in 1914, it was orchestrated from 1916 to Mar. 1918, during the leisure hours spared from the submarine war in the Adriatic. This dramatic production was crowned at the 'concours' of the Ville de Paris (Mar. 21, 1921), and given at the Opéra-Comique as a special performance (Dec. 29, 1922) preceding its first official representation, Jan. 3, 1923. There again he has clad the poet's verses in a musical garment which reflects their expression and their lyrical colour. His music, free from formulas either old or new, does not affect any particular modern stamp, but its substance is rich and its inspiration wholly and purely musical.

BIBL.—*Le Monde musical*, Mar. 1922, article by H. WOOLLETT; E. SCHNEIDER, *Nos Musiciens*.

M. L. P.

CREATION, THE, Haydn's oratorio, written at the suggestion of Salomon; the words selected—originally for Handel—from Genesis and *Paradise Lost* by Lidley or Liddell, and translated into German, as 'Die Schöpfung,' with modifications, by Baron van Swieten. Produced by a body of dilettanti at the Schwartzenberg Palace, Vienna, Apr. 2, 1798; Covent Garden, under Ashley, Mar. 28, 1800; and Paris, Dec. 24, 1800. (See *Mus. T.*, 1891, p. 330; 1898, p. 236; and 1899, p. 160.)

CRECQUILLON, THOMAS (*d. circa* 1557), a Flemish musician of the middle of the 16th century. Ambros says that he succeeded Canis as choirmaster of the Imperial Chapel of Charles V. in the Netherlands, but from the dates and other particulars given by E. van der Straeten in his *La Musique aux Pays-Bas*, it would almost appear that it was Canis who succeeded Crecquillon, for already in 1544 Susato describes Crecquillon as choirmaster, while in 1550 Canis is described as '*praefectus sacelli*,' and Crecquillon as being 'singer and composer to the chapel' ('*cantor et cantionum conditor, quem vulgo componistam vocant*'). He was afterwards rewarded with various canonries. Apart from two volumes of motets of his composition published separately by Phalèse in 1559 and 1576, his very numerous works consisting of chansons and motets, lamentations and masses, are contained in the great collections of the time. Ambros has much to say in commendation of the music of Crecquillon. Beauty of harmony, great constructive power and a simple grandeur of expression characterise his works and entitle him to be reckoned among the great masters of the polyphonic style. He shows a certain kinship to the Spaniard Morales and approaches the pure ideal style of Palestrina. Two of his motets appear in Commer, *Coll. Op. Mus. Bat.*, and three very attractive chansons in Eitner's reprint of Ott's 'Liederbuch' of 1544.

J. R. M.

CREDO, the first word of the Nicene Creed in Latin, is the name by which that creed is known to musicians by reason of the magnificent music to which it has been set by the greatest composers of the Mass. The traditional figure to which the first sentence or 'intonation' is given out by the priest is

and upon this Bach developed the stupendous contrapuntal chorus to those words in his B minor Mass.

The Nicene Creed is distinguished in the English Church by an extensive musical treatment (see SERVICE). Merbecke's setting of it in the *Book of Common Prayer Noted* of 1550 for the use of the English Church follows plain-song originals less closely than most of the other parts of his setting of the service. The Apostles' Creed and that known as the Creed of St. Athanasius (*Quicunque vult*) have never been given the elaborate musical treatment devoted to the Nicene Creed.

CRESCENDO—increasing, *i.e.* in loudness. One of the most important effects in music. It is expressed by *cresc.* and by the sign  . Sometimes the word is expanded—*cres . . . cen . . . do*—to cover the whole space affected.

CRESCENDO PEDAL (Ger. *Rollschweller*), a term sometimes used for the ordinary swell pedal of the organ, but more appropriately applied, in the form of 'Crescendo and Decrescendo Pedal' to a contrivance which throws out and takes in the stops in their proper order as to pitch and power. (See ORGAN.)

T. E.

CRESCENTINI, Girolamo (*b.* Urbania, near Urbino, Feb. 2, 1766 ; *d.* Naples, Apr. 24, 1846), a celebrated Italian sopranist. At the age of 10, he began the study of music, and was afterwards placed with Gibel i, to learn singing. Possessed of a beautiful mezzo-soprano voice, and a perfect method of vocalisation, he made his début at Rome in 1783. He then obtained an engagement as *primo uomo* at Leghorn, where he appeared in Cherubini's 'Artaserse.' In the spring of 1785 he sang at Padua in the 'Didone' of Sarti, and was engaged for Venice. In the following summer he was at Turin, where he sang Sarti's 'Ritorno di Bacco.' He now came to London, and remained sixteen months. He was here thought so moderate a performer that, before the season was half over, he was superseded by Tenducci, an old singer, who had never been first-rate, and had scarcely any voice left. Lord Mount-Edgcumbe wrote :

'It is but justice to add that, when he was here, Crescentini was very young, and had not attained that excellence which has since gained him the reputation of a first-rate singer. He never returned to this country.'

In 1787 he was engaged for the carnival at Milan, and in 1788 and 1789 sang at the San Carlo in Naples. In 1791 and 1793 he appeared at the Argentina at Rome, and in 1794 at Venice and Milan. In 1796 Cimarosa composed expressly for him 'Gli Orazii e Curiazii' at Venice. After singing at Vienna, he returned to Milan for the carnival of 1797, and at the end of this season went to Lisbon, where he sang for the next four years. He reappeared at Milan in 1803, sang at Piacenza, at the opening of the new theatre, and went to Vienna in 1805, with the appointment of professor of singing to the imperial family. Napoleon having heard him there was so charmed that he determined to engage him permanently, and secured to him a handsome salary. Crescentini sang at Paris from 1806–12, when his voice showed signs of suffering from an uncongenial climate, and he with difficulty obtained permission to retire. He went to Bologna, and then to Rome, where he remained till 1816, when he settled at Naples as professor at the Real Collegio di Musica. He was the last great singer of his school. Crescentini was also a composer and published at Vienna in 1797 several collections of *ariette*, and some admirable exercises for the voice, with a treatise on vocalisation in French and Italian, at Paris. J. M.

CREYGHTON, Rev. Robert, D.D. (*b. circa* 1639 ; *d.* Wells, Feb. 17, 1733/34), son of the Rev. Dr. Robert Creyghton, Professor of Greek at Cambridge, afterwards Dean of Wells, and in 1670 Bishop of Bath and Wells.

In 1662, he, like his father, held the Greek Professorship at Cambridge. In 1674 he was appointed canon residentiary and precentor of Wells Cathedral. Creyghton composed several services and anthems still extant in the library of Wells Cathedral. Two services in E♭ and B♭ are now printed. Tudway's MS. (B.M. Add. MSS. 7338, 7339) contains a third, in C, besides an anthem, 'Praise the Lord.' He is widely known by his anthem 'I will arise.'

W. H. H.

CRICKET ON THE HEARTH, THE ; (1) Opera in 3 acts, after Dickens, music by Mackenzie ; produced at R.A.M., June 6, 1914. (2) Opera in 3 acts, text by A. M. Willner (after Dickens), German title Das Heimchen am Herd, music by Goldmark ; produced, Vienna, Mar. 21, 1896 ; in English, Brixton Theatre, Nov. 22, 1900 ; U.S.A., 1910.

CRIES OF LONDON. The custom of hawking wares in the streets led, at a very early date, to the stereotyping of the forms of words which the hawkers used. And it would seem that almost simultaneously there was evolved from the inflections of the voice with which each hawker cried out his wares, a series of short musical phrases which became a distinctive part of each hawker's formula. Many early examples of the old street cries as used in London are to be found in a 14th-century poem called 'Lackpenny' ; and an example of a cry in 1393 is given in the New English Dictionary, Langl. P. Pl. C. i. 226, 'Kokes and here knaues crieden hote pyes hote.' It is remarkable that almost all the street cries preserved their peculiar and distinctive features of phraseology through many centuries. The cry 'hot pies hot,' with its repetition of the word 'hot,' remained unchanged at the close of the 18th century. The Roxburghe Ballads at the end of the 16th century include a set of verses giving a very large number of 'cries.' The cries of the London hawkers were the subject of several sets of engravings, notably those of R. Tempest in 1688 and the well-known set by Wheatley at the end of the 18th century.

Some of the traditional cries were arranged in the form of rounds by Elizabethar musicians, as well as at a later period ; but a very large number of them have been preserved in their original traditional form in important settings,[1] dating from the beginning of the 17th century. Three of these are by Weelkes, Gibbons and Dering, and two more are anonymous. It is important to state that these composers did not write original music to the cries, but incorporated the traditional melodies together with the words in rather elaborate works written in the form of fantasies. Sir Frederick Bridge, in his *Old Cryes of London*,[2] discusses the settings of Weelkes, Gibbons and Dering, and states that they contain between them quite 150 different cries. His edition of these three settings was published by Novello. These pieces include, besides the hawkers' cries, some proclamations of the Town Crier, opening with the traditional

[1] B.M. Add. MSS. 17,792-6, 18,936-9, 29,372-6, 37,402-6.
[2] Novello, 1921.

'Oyez,' or 'O yes,' and dealing with pieces of lost property; the watchman's 'cries,' calling the hours, are also introduced. Dering put together in similar form an interesting set of Country Cries,[1] which touch on the sports of the field and the yelping of a pack of hounds.

E. H. F.

CRISTOFORI, Bartolommeo di Francesco—written Cristofali by Maffei (*b.* May 4, 1665[2]; *d.* Jan. 27, 1731), a harpsichord-maker of Padua, and subsequently of Florence, and the inventor of the pianoforte.

Other claims to this discovery have great interest and will be noticed elsewhere (see Pianoforte and Schröter), but the priority and importance of Cristofori's invention have been so searchingly investigated and clearly proved by the late Cavaliere Leto Puliti,[3] that the Italian origin of the instrument, which its name would indicate, can be no longer disputed.

It may be surmised that he was the best harpsichord-maker in Padua, inasmuch as Prince Ferdinand, son of the Grand Duke Cosmo III., a skilled harpsichord-player, who visited Padua in 1687, induced him then or very soon after to transfer himself from that city to Florence. We have evidence that in 1693 Cristofori wrote from Florence to engage a singer—the only time he appears in the Prince's voluminous correspondence. In 1709 Maffei visited Florence to seek the patronage of Prince Ferdinand for his *Giornale dei Letterati d' Italia* and in vol. v. of that work, published in 1711, Maffei states that Cristofori had made four 'gravicembali col piano e forte,' three distinctly specified as of the large or usual harpsichord form, the fourth differing in construction, and most likely in the clavichord or spinet form: there was among the Prince's musical instruments a 'cimbalo in forma quadra,' an Italian spinet which when altered to a pianoforte would be termed a square. In 1719, in his *Rime e prose*, published at Venice, Maffei reproduced his description of Cristofori's invention without reference to the previous publication. As these pianofortes were in existence in 1711, it is just possible that Handel may have tried them, since he was called to Florence in 1708 by Prince Ferdinand to compose the music for a melodrama, remained there a year and brought out his first opera, 'Rodrigo.'

The Prince died in 1713, and Cristofori continuing in the service of the Grand Duke, in 1716 received the charge of the eighty-four musical instruments left by the Prince. Of these nearly half were harpsichords and spinets—seven bearing the name of Cristofori himself. It is curious, however, that not one of them is described as 'col piano e forte,' and also interesting that in the receipt to this inventory we have Cristofori's own handwriting as authority for the spelling of his name now adopted.

The search for Cristofori's workshop proving unsuccessful, Puliti infers that the Prince had given him a room in the Uffizi, probably near the old theatre, in the vicinity of the foundry and workshops of the cabinet-makers. He imagines the Prince suggesting the idea of the pianoforte, and taking great interest in the gradual embodiment of the idea thus carried out under his own eyes. M. René Savage of Paris has, however, in his collection an instrument of 1610 which, if accepted as a pianoforte, would antedate Cristofori's invention by a hundred years. It has small hammers but no dampers and is shaped like a dulcimer. This may be the Dulce Melos[4] (*Doucemelle*), really a keyed dulcimer according to a 15th-century MS. unearthed by Bottée de Toulmon[5] (1840), who described the illustration given as a pianoforte of four octaves.

Maffei gives an engraving of Cristofori's action or hammer mechanism of 1711. It shows the key with intermediate lever, and the hopper, the thrust of which against a notch in the butt of the hammer jerks the latter upwards to the string. The instant return of the hopper to its perpendicular position is secured by a spring; thus the escapement or controlled rebound of the hammer is without doubt the invention of Cristofori. The fall of the intermediate lever governs an underdamper, but there is no check to graduate the fall of the hammer in relation to the force exercised to raise it. For this, however, we have only to wait a very few years. There was in the possession of the Signora Ernesta Mocenni Martelli in Florence (now, by gift of Mrs. J. Crosby Brown, in the Metropolitan Museum, New York), a grand pianoforte made by Cristofori in 1720, the namepiece 'Bartholomaeus de Christoforis Patavinus Inventor faciebat Florentiae MDCCXX.' being the guarantee for its origin and age. Puliti had two exact drawings made of the action, one with the key at rest and the other when pressed down, and has described each detail with the greatest care. The hammer is heavier than that represented in 1711, the intermediate lever is differently poised, and the damper raised by the key when in movement now acts above instead of under the strings. Finally there is the check completing the machine.

What doubts have not found their solution by the discovery of this interesting instrument, which was exhibited at the Cristofori Festival at Florence in May 1876? The story of it begins about eighty years since, when Signor Fabio Mocenni, the father of the late owner,

[1] B.M. Add. MSS. 17,792, 18,936, 29,427 and St. Mich. Tenbury MSS. 1162-7.

[2] Fétis and Pietrucci in their respective memoirs erroneously state 1683 as the date of his birth.

[3] Cenni storici della vita del serenissimo Ferdinando dei Medici, etc. Estratto dagli Atti dell' Accademia del R. Istituto Musicale di Firenze, 1874.

[4] *History of the Pianoforte*, p. 55, A. J. Hipkins.

[5] Bibliothèque Nationale de Paris.

obtained it from a pianoforte-tuner at Siena in exchange for wine. Its anterior history is not known, but Puliti offers suggestive information in the fact of Violante Beatrice di Baviera—the widow of Cristofori's master and protector Prince Ferdinand—having lived at Siena at different times, particularly when her nephew was studying at the Sienese University in 1721.

But if it were only a harpsichord turned by the addition of hammers to a pianoforte ? The careful examination of Puliti is the authority that all its parts were constructed at one time, and the word ' Inventor ' appended to Cristofori's name would not have been applied to a simple harpsichord or spinet. It is a bichord instrument, compass from D to F, exceeding four octaves. Another grand pianoforte by Cristofori, a few years later in date, 1726, is in the famous museum at Florence belonging to Baron Kraus and his son the Commendatore Alessandro Kraus figlio. This instrument was shown by them in the Paris Exhibition of 1878, and was, at that time, in satisfactory playing order : the touch light and agreeable. The pianoforte is now in the Wilhelm Heyer Museum of old instruments at Cologne. Yet another instrument existing accredited to Cristofori is a harpsichord with three keyboards, dated A.D. 1702, and bearing the arms of Ferdinando de' Medici. It now belongs to the University of Michigan.

Cristofori's reputation had extended during his lifetime into Germany, for Mattheson had published the translation by König of Maffei's article in the second volume of his *Critica musica* (Hamburg, 1722–25), (reproduced in Adlung's *Musica mechanica organoedi*, 1767) and Walther, in his *Musikalisches Lexikon* (Leipzig, 1732), article ' Pianoforte,' treating of the invention, attributes it exclusively to Cristofori.

On May 7, 1876, a stone in the device of a tuning hammer was placed in the cloisters of Santa Croce at Florence bearing the following inscription—

A BARTOLOMEO CRISTOFORI | Cembalaro da Padova | che | in Firenze nel MDCCXI | INVENTÒ | IL CLAVICEMBALO COL PIANO E FORTE.

A. J. H., with addns.

CRITIC, THE, or AN OPERA REHEARSED ; opera in 2 acts, libretto arranged from Sheridan's play by L. Cairns James, music by Stanford; produced Shaftesbury Theatre (Beecham Co.), Jan. 14, 1916.

CRIVELLI, (1) GAETANO (*b.* Bergamo, 1774 ; *d.* Brescia, July 10, 1836), tenor singer. He made his first appearance when very young ; and married at the age of 19. In 1793 he was at Brescia, where he was admired for his fine voice and large manner of phrasing. He was engaged to sing at Naples in 1795, where he remained several years. From thence he went to Rome, Venice, and at last to Milan, where he sang at La Scala in the carnival of 1805. In 1811 he succeeded Garcia at the Italian Opera in Paris, and produced a great effect in the ' Pirro ' of Paisiello, in which he first appeared. His superb voice, excellent method and nobly expressive style of acting combined to make him a most valuable acquisition to the stage. He remained there until Feb. 1817. He then came to London. He had, according to Lord Mount-Edgcumbe,

'a sonorous mellow voice, and a really good method of singing, but he was reckoned dull, met with no applause, and staid only one year.'

In 1819 and 1820 he sang at La Scala in Milan ; but in the latter year signs of decay were apparent in his voice, and these became more evident when he appeared in that town in Lent, 1823. In Dec. 1830 he sang at Venice in Generali's opera, ' I Baccanali di Roma.' He published some canzonets and songs in London and Milan. J. M.

(2) His son, DOMENICO (*b.* Brescia, June 7, 1793 ; *d.* London, Feb. 11, 1857), some years teacher at the Real Collegio of Naples, when called to London by his father, brought out an opera buffa, ' La Fiera di Salerno.' He settled in London as a singing-master, and published *The Art of Singing.* (*Riemann* ; *Baker.*)

CROCE, GIOVANNI (*b.* Chioggia, near Venice, *c.* 1557 or 1559 ; *d.* May 15, 1609), a learned and original composer.

He was a pupil of Zarlino, by whom he was placed in the choir of San Marco. In 1568, and again in 1599, he is called ' Archimusico ' of San Marco ; in 1593 he taught at the Seminario. In 1603 he succeeded Donati as maestro at that cathedral, and still held the post when he died. He was in priest's orders, and in this capacity was attached to the church of Santa Maria Formosa. His publications chiefly consist of a long list of madrigals, motets, psalms and other pieces in the ordinary musical forms of his epoch. One curious volume deserves special mention. This is entitled

'Triaca Musicale, nelle quale vi sono diversi capricci a 4, 5, 6 e 7 voci, nuovamente composta e data in luce' (Gi. Vincenti, Venice, 1595).

The pieces in it are mostly comic, and are composed upon words written in the Venetian patois. A 2nd edition of this was issued in 1596, a 3rd in 1607, and a 4th in 1609. Two motets for 8 voices are in Bodenschatz's ' Florilegium Portense ' (Part 2, Nos. 111 and 150). A collection of church music by Croce, set to English words, under the title of ' Musica Sacra to Sixe Voyces,' was published in London in 1608. Several fine motets of his, full of expression and beauty, were published with English words by Hullah in his *Part Music*, and nine in the collection of the Motet Society ; three of his madrigals are in Yonge's ' Musica Transalpina ' ; of these ' Cynthia, thy song ' is well known. Two motets and a ' Giuoco

dell' Oca' from the 'Triaca,' are in Torchi's *Arte musicale in Italia*, vol. ii.

E. H. P., with addns.

CROCIATO IN EGITTO, IL, heroic opera in 2 acts; words by Rossi; music by Meyerbeer; produced at the Fenice, Venice, in 1824, and King's Theatre, London, July 23, 1825.

CROES, Henri Jacques de (*bapt.* Antwerp, Sept. 19, 1705; *d.* Brussels, Aug. 16, 1786), member of a numerous family of musicians. He was first a violinist and deputy Kapellmeister at St. James's, Antwerp; on Sept. 4, 1729, was appointed (?) Kapellmeister at the court of Turn and Taxis; returned in 1745; on July 23, 1749, was made temporary director of the Brussels court chapel; and on Aug. 13, 1755, permanent maître de chapelle. He composed a large amount of masses and other church music, symphonies, sonatas, instrumental pieces, etc. (*Fétis*; *Q.-L.*).

CROFT (or, as he sometimes wrote his name, Crofts), William,[1] Mus.D. (*b.* Nether Ettington, Warwickshire, 1678[2]; *d.* Bath, Aug. 14, 1727); one of the children of the Chapel Royal under Dr. Blow, became famous both as organist and composer.

On the erection of an organ in the church of St. Anne, Soho, 1700, Croft was appointed organist. Earlier in the same year he had joined Blow, Piggott, Jeremiah Clarke and John Barrett in publishing a 'Choice Collection of Ayres for the Harpsichord or Spinnet.' On July 7, 1700, he was sworn in as a gentleman extraordinary of the Chapel Royal, with the reversion, jointly with Jeremiah Clarke, of the first vacant organist's place. On May 25, 1704, on the death of Francis Piggott, Croft and Clarke were sworn in as joint organists and on Clarke's death in 1707, Croft was sworn in to the whole place. On the death of Dr. Blow in 1708 Croft was appointed his successor as organist of Westminster Abbey, and master of the children and composer to the Chapel Royal. It was in the discharge of the duties of the latter office that Croft produced, for the frequent public thanksgivings for victories, etc., many of those noble anthems which have gained him so distinguished a place among English church composers. He had before written 'occasional' anthems, as, for example, after the victory of Blenheim in 1704 and 1705. In Jan. 1711/12 he resigned his appointment at St. Anne's in favour of John Isham, who had been his deputy for some years. It has been generally supposed that in 1712 he edited for his friend (afterwards Sir John) Dolben, subdean of the Chapel Royal, the collection of the words of anthems called *Divine Harmony*, but on this matter see Church, (1) John. On July 9, 1713, he took the degree of Doctor of Music in the University of Oxford, his exercise (performed on July 13) being two odes, one in English, the other in Latin, on the Peace of Utrecht; these were afterwards engraved and published under the title of *Musicus apparatus academicus*. In 1715 Croft received an addition of £80 per annum to his salary as master of the children of the Chapel Royal for teaching the children reading, writing and arithmetic, as well as playing on the organ and composition. In 1724 Dr. Croft published in two folio volumes, with a portrait of himself, finely engraved by Vertue, prefixed,

'Musica Sacra, or Select Anthems in Score, consisting of 2, 3, 4, 5. 6, 7 and 8 parts, to which is added the Burial Service as it is now occasionally performed in Westminster Abbey.'

In the preface he states it to be the first essay in printing church music in that way, *i.e.* engraven in score on plates. He was one of the original members of the Academy of Vocal Musick founded 1725. He is buried in the north aisle of Westminster Abbey, where a monument is erected to his memory. In the earlier part of his career he composed for the theatre, and produced overtures and act tunes for 'Courtship à la mode,' 1700; 'The Funeral,' 1702; 'The Twin Rivals,' 1702; and 'The Lying Lover,' 1703. He also published sonatas for both violin and flute. Numerous songs by him are to be found in the collections of the period, and some odes and other pieces are still extant in MS. Two psalm tunes, attributed to him, St. Anne's and St. Matthew's, and a single chant in B minor, will long live in the Anglican Church, even after his fine anthems have become obsolete. (See an interesting article in *Mus. T.*, 1900, p. 577, with a photograph from the portrait in the Music School, Oxford.) W. H. H.

The Burial Service in 'Musica Sacra' has become the classic setting of the Anglican ritual, and it is used in part at least (especially the opening sentences) at practically all public funerals sung in cathedrals and similar establishments. It consists of the three opening sentences, intended, according to the rubric, to be sung in procession, the sentences at the graveside beginning 'Man that is born of a woman,' and the anthem 'I heard a voice from Heaven.' The whole is set in a severe style of four-part harmony, and its simple expression of the feeling of the words makes it one of the masterpieces of English church music. In his preface Croft acknowledges a double indebtedness to Purcell (*q.v.*). He says:

'In that service there is one Verse composed by my predecessor, the famous Mr. Henry Purcell, to which, in justice to his memory, his name is applied. The reason why I did not compose that Verse anew (so as to render the whole service entirely of my own composition) is obvious to every Artist; in the rest of that service composed by me, I have endeavoured as near as I could, to imitate that great Master and celebrated Composer, whose name will for ever stand high in the Rank of those who have laboured to improve the English style in his so happily adapting his Compositions to English words in that elegant

[1] The records of St. Anne's, Soho, give his name as Philip.
[2] Baptized, Dec. 30, 1678.

and judicious manner as was unknown to many of his predecessors; but in this respect both *His* and *My* worthy and honoured Master, Dr. Blow was known likewise to excel.'

The verse of Purcell's composition is the last of the graveside sentences, beginning 'Thou Knowest, Lord.' C.

CROMORNE (Crom Horn), a corruption of Krummhorn (*q.v.*). (*PLATE IV.* No. 2).

CROOK (Fr. *corps de rechange*; Ger. *Ton*; *Bogen*), a name given to certain accessory pieces of tubing applied to the mouthpiece of brass instruments for the purpose of altering the length of the tube, and thus raising or lowering their pitch. Since natural horns and trumpets, without valves or slides, can only play the notes of the harmonic series, the sole method of enabling them to play this series at another pitch is to transpose the fundamental note, and this is done by the crooks. The invention of valves, however, has greatly reduced the necessity for changing the crook. (See Horn and Trumpet.)

The term is also applied to the S-shaped metal tube connecting the body of the bassoon with the reed (Fr. *bocale*), and generally to any such removable bent tube at the mouthpiece end of any instrument, as in the saxophone, and the alto and bass clarinets. W. H. S.

CROSDILL, John (*b.* London, 1751; *d.* Eskrick, Yorks, Oct. 1825[1]), was a violoncellist of some importance. He is said to have been at Westminster School, but no trace of his name is to be found in the school registers, which, however, only begin in 1763; he received his early musical education in the choir of Westminster Abbey under John Robinson and Benjamin Cooke.

In 1768 he became a member of the Royal Society of Musicians, and in the following year appeared at Gloucester, as principal violoncellist at the meeting of the Three Choirs, a position which he continued to occupy until his retirement from his profession, with the exception of the year 1778, when the younger Cervetto filled his place at Gloucester. In 1776, on the establishment of the Concert of Ancient Music, Crosdill was appointed principal violoncellist. On Mar. 10, 1778, he succeeded Nares as violist of the Chapel Royal, an appointment which soon became a sinecure, but which he continued to hold until his death. He also became a member of the King's band of music. In 1782 he was appointed chamber musician to Queen Charlotte, and about the same time taught the Prince of Wales, afterwards George IV., to play the violoncello. In 1783 he was appointed composer of the state music in Ireland. In 1784 he filled the post of principal violoncellist at the Handel Commemoration. In 1788 or later, having married a lady of considerable fortune, he retired from the public exercise of his profession, though he played as a member of the King's band at the coronation of George IV. (1821). Fétis's account of his activities in Paris appears inaccurate as to dates. He certainly visited Paris, and the year 1784 is suggested. Crosdill left all his property to his only son, Lieutenant-Colonel Crosdill, C.B., of the East India Company's service, who, by his father's desire, presented to the Royal Society of Musicians the munificent donation of £1000. W. H. H., with addns.

[1] *The Harmonicon*, vol. iii. p. 235, says that he died at his house in Berners Street, London.

CROSS, Thomas, an early music engraver, and practically the inventor of sheet music. By error he was treated in the 1st edition of this work as two persons—Cross senior and Cross junior; but evidence is conclusive enough that he merely signed himself as 'junior' in the very earliest part of his career (*i.e.* 1683 to about 1708–10) when it may be presumed that his father was alive. There is nothing to connect Cross senior with music engraving, although it is quite possible that if he had such connexion he might have cut some of the music of the few delicately engraved books of instrumental works which were issued near the middle of the 17th century by the elder John Playford. It is also possible that Cross senior may have been the Thomas Cross who engraved portraits, 1646–84 (see Walpole's *Anecdotes of Painting*).

The name of Thomas Cross the music engraver first appears in 1683 on Purcell's 'Sonnata's of III. Parts'; it is there given as 'Tho. Cross junior Sculp.' His latest dated work is D. Wright's 'Minuets and Rigadoons for the Year 1732.'

Between the above dates Cross appears to have had, certainly in the early part, nearly the whole of the music-engraving trade in his hands, working for composers as well as for publishers. Before the 17th century had closed he had engraved several important collections as: Purcell's and Eccles' Songs, folio; a collection of Richard Leveridge's Songs in small folio *circa* 1698; 'Military Musick or the Art of playing the Haut-bois,' 1697, etc. Cross's early work was particularly neat, and clearly cut on copper. It was about this time that he began the engraving and issue of single songs. All vocal music prior to this period had to be purchased in collections, chiefly printed from type. Though instrumental music in small quantity had been engraved yet it is due to Cross that he was the first (in England at least) to engrave vocal music, and the first to issue single songs as separate publications.

Copper was expensive for ephemeral productions sold at a cheap rate, but examination will show that Cross had soon found a cheaper material, probably pewter. The single songs were printed on a half sheet of thin paper, and must have come forth in enormous numbers. At the foot of most the engraver's name appears frequently as 'Exactly engraved by T. Cross.'

The single song had, before 1700, become so popular that Dr. Blow's *Amphion Anglicus*, 1700, contains a tirade against them—

> 'Music of many parts hath now no force,
> Whole reams of single songs become our curse.
>
> While at the shops we daily dangling view
> False concords by Tom Cross engraven true.'

There is another allusion to 'honest Cross' in Purcell's *Orpheus Britannicus*.

About 1720 or a little later Cross had a serious rival in the publication of sheet songs. John Walsh began to issue them in similar form, but from plates produced by the notes and lettering being punched on the pewter as at the present day. This caused Cross to engrave on one of his sheets 'Beware of ye nonsensical puncht ones.—Cross Sculp.' Cross engraved boldly and freely, his lettering being very flowing. Hawkins states that he 'stamped the plates of Geminiani's solos and a few other publications, but in a very homely and illegible character, of which he was so little conscious that he set his name to everything he did, even to single songs.' Hawkins is frequently inaccurate in details; it is doubtful whether Cross ever did any stamped or punched work. His later engraving is not so fine and minute as his earlier, but it is quite clear and legible.

Cross kept a music shop, his first address being 'in Three Horse Shoe Court' (1684–93); thence he moved to 'Katharine Wheel Court near Snow Hill,' or 'near Holbourn Conduit'; afterwards he was 'near the Pound Clerkenwell.' F. K.

CROSS AND THE CRESCENT, THE, opera composed by Colin M'Alpin to a libretto founded on Coppée's 'Pour la couronne.' Produced by Moody-Manners Co., Covent Garden, Sept. 22, 1903. This opera won the £250 prize offered by Charles Manners.

CROSSE, JOHN (*b.* Hull, July 7, 1786; *d.* York, Oct. 20, 1833), published in 1825 a large quarto volume entitled

> 'An Account of the Grand Musical Festival held in September 1823, in the Cathedral Church of York, . . . to which is prefixed a Sketch of the rise and progress of Musical Festivals in Great Britain, with biographical and historical notes,'

an admirably executed work, replete with valuable information. Crosse was buried at St. James's, Sutton, near Hull. W. H. H.

CROSS FINGERING, see FINGERING.

CROSSLEY, ADA (*b.* Tarraville, Gippsland, Australia, Mar. 3, 1874), studied at first with Mme. Fanny Simonsen, of Melbourne, and learnt the piano while carrying on her vocal studies. She sang in Australia for about two years, and won such appreciation in oratorio and concert-singing, that on her departure to continue her studies in Europe, municipal functions of a valedictory kind were held in her honour at Melbourne, Sydney and Adelaide.

After studying with Santley in London and Mme. (Mathilde) Marchesi in Paris, she gave a concert at the Queen's Hall in London on May 18, 1895, when she sang an air from Ambroise Thomas's 'Psyché' with such success as to make her future career a matter of certainty. She very soon attained a foremost rank among the concert contraltos of the time; she sang regularly at the English Festivals up to and including the Gloucester Festival of 1913. She toured in South Africa and in America as well as in her native Australia, where she was received with peculiar enthusiasm. In oratorio (especially 'Elijah' and Elgar's 'Apostles'), in recitals of classical song and in ballad programmes she has appealed to every type of audience. It would be impossible to enumerate even the most prominent of her public appearances, but her performance of the Agnus Dei from Bach's B minor Mass, and of the solo part in Brahms's 'Rhapsody' are among her highest achievements. She married Francis Muecke, F.R.C.S., on Apr. 11, 1905. M., with addns.

CROT, CHROTTA, see CRWTH.

CROTCH, WILLIAM, Mus.D. (*b.* Green's Lane, Norwich, July 5, 1775; *d.* Taunton, Dec. 29, 1847),

His father, a master carpenter who combined a taste for music and mechanics, had constructed for himself a small organ. When little more than 2 years old the child evinced a strong desire to get to this instrument, and being placed before it, contrived shortly to play something like the tune of 'God save the King,' which he was soon able to play with its bass. His ear was remarkably sensitive, and readily distinguished any note when struck, or detected faulty intonation. The Hon. Daines Barrington, a well-known amateur, published an interesting account of him, and Dr. Burney communicated to the Royal Society an account which was printed in the *Philosophical Transactions*, vol. lxix. pt. 1. On Oct. 1779 the child was brought to London, and performed in public on the organ, giving daily recitals (as they would now be called) at Mrs. Hart's, a milliner in Piccadilly. Besides his musical ability he displayed considerable skill in drawing, to which art he remained attached through life, and attained to much eminence in it. In 1786 Crotch went to Cambridge, and remained there about two years as assistant to Dr. Randall, the professor of music, and organist of Trinity and King's Colleges, and Great St. Mary's Church. At 14 years of age he composed an oratorio, 'The Captivity of Judah,' which was performed at Trinity Hall, Cambridge, June 4, 1789. In 1788 he had removed to Oxford, where he studied, under the patronage of the Rev. A. C. Schomberg, of Magdalen College, with a view to entering the Church. His patron's health having broken down he resumed the profession of music, and in Sept. 1790 was appointed, on the death of Thomas Norris, organist of Christ Church. On June 5, 1794, he graduated as Bachelor of Music. In

Mar. 1797 he succeeded Dr. Philip Hayes, deceased, as organist of St. John's College, and professor of music in the University. About the same time he was organist of St. Mary's. On Nov. 21, 1799, he proceeded Doctor of Music, composing as his exercise Dr. Joseph Warton's 'Ode to Fancy,' the score of which he afterwards published. From 1800–04 he delivered lectures in the Music School, and in 1804, 1805 and 1807 lectured at the Royal Institution; in 1810 he composed an Installation Ode for Lord Grenville; in 1812 he produced his oratorio 'Palestine,' which was received with great favour. One number from this work survives in the still popular Epiphany anthem, 'Lo, Star-led Chiefs.' Crotch also published in this year a treatise on the *Elements of Musical Composition*; in 1813 he became an associate of the Philharmonic Society, and was a member from 1814–19. From 1820 onwards he lectured at the Royal Institution, and on the establishment of the R.A.M. in 1822 was placed at its head as principal (see ROYAL ACADEMY OF MUSIC). He resigned the post in June 1832. On June 10, 1834, he produced at Oxford, on the installation of the Duke of Wellington as Chancellor, an oratorio, 'The Captivity of Judah,' wholly different from his juvenile work bearing the same title.[1] On June 28 in the same year he made his last public appearance as a performer, by acting as organist for part of the third day's performance at the Royal Musical Festival in Westminster Abbey. Dr. Crotch died at Taunton while seated at dinner at the house of his son, the Rev. William Robert Crotch, then head master of the Grammar School there; he was interred in the churchyard of Bishop's Hull, near Taunton, where a monumental inscription is placed to his memory. Besides the works above specified, Dr. Crotch produced:

'Ten Anthems'; some chants; a motet, 'Methinks I hear'; several glees; some fugues and concertos for the organ; several pianoforte pieces; an ode on the accession of George IV., performed at Oxford, 1820; Funeral Anthem for the Duke of York, 1827; 'The Lord is King,' anthem for voices and orchestra, 1843; and some works on Thorough-bass and Harmony.

He also published:

Specimens of various styles of Music referred to in a course of Lectures on Music read at Oxford and London, and in 1831 the *Substance of several courses of Lectures on Music read at Oxford and in the Metropolis*.

This collection, containing besides classical excerpts a large number of folk-tunes of many countries (see MALCHAIR) formed the illustrations to a series of lectures delivered at Oxford 1800–04 and 1820. The lectures themselves were published separately. The full contents of the 'Specimens' was printed under that heading in the first edition of this Dictionary.

As a teacher he enjoyed a high and deserved reputation. A complete list of his compositions, compiled by John S. Bumpus, appeared in *Musical News*, Apr. 17 and 24, 1897.

W. H. H., with addns.

[1] The MS. is now at St. Michael's College, Tenbury.

CROTCHET (Fr. *noire*; Ger. *Viertel*, 'a quarter'—*i.e.* of a semibreve; Ital. *semiminima*), a note which is half the value of a minim, and twice that of a quaver, and is represented thus  . The German Viertel is adopted by American musicians, the word anglicised as 'quarter-note.' Its rest is  or  . S. T. W.

CROUCH, MRS. ANNA MARIA (*b.* London, Apr. 20, 1763; *d.* Brighton, Oct. 2, 1805), daughter of Peregrine Phillips, a solicitor. Being gifted with a remarkably sweet voice, Miss Phillips was at an early age placed under the instruction of a music-master named Wafer, and some time afterwards was articled to Thomas Linley, under whose auspices she made her appearance on Nov. 11, 1780, at Drury Lane Theatre, as Mandane in Arne's 'Artaxerxes.'

Her success was great, and for upwards of twenty years she held a high place in public esteem, both as actress and singer. Early in 1785 she married Crouch, a lieutenant in the navy, but after a union of about seven years they separated by mutual consent. She sang at Drury Lane in oratorios in 1787; later on she lived with Michael Kelly, and appeared for the last time at his benefit, May 14, 1801, as Celia in 'As You Like It.' After this, her health became impaired and she withdrew from public life. Two volumes of *Memoirs* by M. Young, were published in 1806, with a portrait. A sketch by Cosway belongs to Lord Tweedmouth, and a miniature by the same artist was in the possession of Baroness Burdett-Coutts. W. H. H.

CROUCH, FREDERICK NICHOLLS (*b.* Warren Street, Fitzroy Square, London, July 31, 1808; *d.* Portland, Maine, U.S.A., Aug. 18, 1896), famous as the composer of the song 'Kathleen Mavourneen,' studied music with his father, an eminent violoncellist, and his grandfather, William Crouch, organist of St. Luke's, London, E.C.

Young Crouch played in the band of the Royal Coburg Theatre at the age of 9; after travelling in Yorkshire and Scotland, he was for two years a common seaman on coasting smacks between London and Leith. He next entered the orchestra of Drury Lane Theatre, and the choirs of Westminster Abbey and St. Paul's. From about 1822 he studied at the R.A.M. under Crotch, Attwood, Lindley and Crivelli, and played in the principal orchestras. He was in Queen Adelaide's private band until 1832, and taught singing at Plymouth. He is said to have invented the engraving process called zincography. About 1838 he gave lectures on the songs and legends of Ireland, and his 'Kathleen Mavourneen' was published (1839–40) as one of a series, 'Echoes of the Lakes.' In 1849 he went to America, and was first engaged as violoncellist

at the Astor Place Opera House, New York; afterwards he went to Boston; to Portland (from 1850); to Philadelphia (1856) as conductor of a series of Saturday Concerts; and to Washington, where he founded an unsuccessful school of music. His next move was to Richmond, where he sang in a church choir; he joined the Confederate army, and served through the civil war. He settled in Baltimore as a singing-teacher. Besides the song that has made his name famous, and many others, Crouch wrote two operas, 'Sir Roger de Coverley,' and 'The Fifth of November.' (*Brit. Mus. Biog.*; *Baker.*) M.

CROWD, see CRWTH.

CROWN DIAMONDS, see DIAMANTS DE LA COURONNE.

CRÜGER, JOHANN (*b.* Gross-Breese, near Guben, Prussia, Apr. 9, 1598; *d.* Feb. 23, 1662), educated chiefly at the Jesuit college of Olmütz, at the school of poetry at Regensburg, and the university of Wittenberg: in 1622 he was appointed cantor at the church of St. Nicolaus at Berlin, a post which he retained till his death.

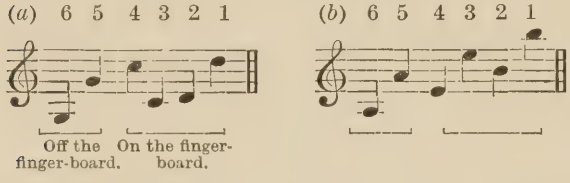
His reputation in his own day both as author and composer was great, but he is now chiefly known as the composer of some of the most favourite chorales. The best known of them are 'Nun danket alle Gott'; 'Jesu meine Zuversicht'; 'Jesu meine Freude'; and 'Schmücke dich, o liebe Seele.' They were published under the title of 'Praxis pietatis melica,' the melodies with bass, in 1644. No copy is known to exist either of the first or second edition (1647), but the work ran through innumerable editions, the fortieth of which appeared in Berlin, 1724. His 'Geistliche Kirchen-Melodien über die von Herrn D. Luthero . . . auffgesetzte Gesänge und Psalmen' in which the tunes are for four voices and two instruments, appeared in Leipzig, 1649. He also composed many concertos and motets which no longer exist. Other works have been preserved; they are:

(1) *Meditationum musicarum Paradisus primus, oder Erstes musikalisches Lust Gärtlein* in 3 and 4 parts (Frankfort, 1622); (2) *Med. mus. Parad. secundus* (Berlin, 1626), a collection of new Magnificats in German, in 2 and 8-part harmony, arranged in all the eight tones; (3) *Recreationes musicae, das ist neue poetische Amorösen* (Leipzig, 1651), containing 33 pieces.

Among his theoretical works may be mentioned:

(1) *Synopsis musices*, a method for thorough-bass (Berlin 1624)—the third edition (Berlin, 1634) has a different title; (2) *Perceptae musicae practicae figuralis* (1625), also published in a German form as 'Rechter Weg zur Singekunst' (Berlin, 1660); (3) *Quaestiones musicae practicae* (Berlin, 1650).

Other works and editions are in *Q.-L.* A. M.



CRUVELLI (CRÜWELL), JEANNE SOPHIE CHARLOTTE (*b.* Bielefeld, Westphalia, Mar. 12, 1826; *d.* Monte Carlo, Nov. 6, 1907), opera singer. She had a voice of admirable quality, compass and truth, but did not receive the instruction which should have developed its advantages and enabled her to avoid those faults and imperfections which are inevitable without it. She made her début at Venice in 1847, and the beauty of her voice ensured her a brilliant success, which was confirmed when she sang in Verdi's 'Attila' at the theatre of Udine on July 24, and in 'I due Foscari.' Coming to London in 1848, she Italianised her name, and became known as Cruvelli. She first appeared as the Countess in 'Le nozze di Figaro.' In 1851 she went to Paris, where she had sung in concerts before her first appearance in Italy. She appeared with immense success in 'Ernani' at the Théâtre Italien, for Verdi's music seemed made for her. She sang again in London that year, her performance in 'Fidelio' being especially admired. In Jan. 1854 she was engaged at the Opéra in Paris, and appeared as Valentine in 'Les Huguenots,' and later in the 'Vêpres Siciliennes' of Verdi. She sang in Dublin in Sept. and Oct. 1854. Besides her splendid voice she had a very fine face and figure, and an enormous energy of accent and dramatic force which led her to exaggeration of effect. In 1856 she retired, and married Vicomte le Vigier. Her eldest sister, FRIEDERIKE MARIE (*b.* Aug. 29, 1824; *d.* Bielefeld, July 26, 1868), appeared in London in 1851, taking her sister's place without great success. (*Riemann.*) J. M., rev.

CRUZ, AGOSTINHO DA (*b.* Braga, 1590), a Portuguese ecclesiastic, member of the order of Santa Cruz, Coimbra (1609), who is described as an excellent performer on the viol and organ. He eventually became choirmaster in the convent of S. Vicente de Fora. He compiled a 'Lyra de arco, ou Arte de tanger rabeca,' Lisbon, 1639 (a method for the viol) but no copies seem to have been preserved. J. B. T.

CRWTH (CROWD), a stringed instrument, the latter word representing the Anglicised form of the Welsh name, which is in turn derived from the old Irish crot or cruit (see CHORUS; ROTTE). The oldest illustrations (11th cent.) depict the instrument as oblong in shape, with both ends slightly rounded: there are four or six strings passing over a bridge (or attached to a holder) placed upon a small sound-box, and it is played with a short bow. There was at that time no finger-board, and in this respect it corresponded with the Finnish 'Tannenharfe,' now on the verge of extinction, in which the strings are stopped by the pressure of the finger nails against their sides. In the 13th century a rudimentary finger-board appears and the instrument possesses a 'waist' like the bowed rotte (or rote) used on the Continent. It should be remembered that this 'waist,' so conspicuous and so convenient in the violin, was not primarily adopted to accommodate the use of the bow; for it appears on a form of guitar figured in a bas-relief, dating from before the year 1000 B.C., and discovered in the old Hittite palace of Ujuk in Asia Minor. (Cf. Periot and Chipiez, *Histoire*

de l'art de l'antiquité, vol. iv.) In Wales the bowed crwth was highly esteemed, and at the close of the 12th century Giraldus Cambrensis mentions it as one of the three favourite instruments of the Welsh. The form shown on *PLATE LXXXVII.* No. 4 is that adopted at a later date: four strings lie over the finger-board and two are placed at the side, as frequently found in the 16th-century lyra-viols: these two strings were bowed or plucked by the left-hand thumb at will, and the arrangement suggests that the instrument was primarily designed for accompaniment: an old Welsh treatise (B.M. Add. MSS. 14,939) informs us that on it were played 'the four principal chords,' and 'the twenty-four musical measures,' *i.e.* set successions of tonic and dominant chords. For the easier fingering of these chords the bridge is set aslant as on the orpharion and, no doubt, the neck was 'fretted' with gut as in the lutes and viols. There is no sound-post, but the left foot of the bridge passes through the circular sound-hole and rests on the flat back of the instrument, as still to be seen in the rustic Greek lyra, a form of rebec.

Edward Jones (*Musical Relics of the Welsh Bards*, 1794) gives the tuning as at (*a*); Bingley (*Musical Bibliography*, 1814) as at (*b*).

Bingley's tunings of the strings on the finger-board should certainly be an octave lower, as the length of string is that of the viola, and a writer in the middle of the 18th century calls the crwth 'a sort of tenor fiddle.' Genuine specimens of this instrument are now very rare: one is in the Victoria and Albert Museum, S. Kensington, and another is in the Corporation Museum at Warrington — both 18th-century instruments. There is also one at Aberystwyth. Aged performers on the crwth certainly lingered on in Wales till almost the middle of the last century, but the name is now given to the violin by the country-folk as crowd is in England.

The crwth trithant or 3-stringed crwth is no doubt identical with the rebec, which in the 16th century was called a crowd. F. W. G.

CRYSTAL PALACE SATURDAY CONCERTS (1855–1901) were one of the most important concert-giving institutions of London and were conducted throughout by August Manns (*q.v.*). On Oct. 14, 1855, Manns was engaged as conductor of the Crystal Palace band. The music there was at that time in a very inchoate condition, the band was still a wind band, and the open Centre Transept was the only place for its performances. Under the efforts of the new conductor things soon began to mend. He conducted a 'Saturday Concert' in the 'Bohemian Glass Court' the week after his arrival; through the enlightened liberality of the directors the band was changed to a full orchestra, a better spot was found for the music, adjoining the Queen's rooms (since burnt) at the north-east end, and at length, through the exertions of Robert Bowley, then General Manager, the concert-room was enclosed and roofed in, and the famous Saturday Concerts began, and were continued with a constant advance, both in the value and variety of the selections and the delicacy and spirit of the performances, until 1901.

The concerts, which began with the first Saturday in October, lasted, with an interval at Christmas, till the end of April. The orchestra consisted of 16 first and 14 second violins, 11 violas, 10 violoncellos and 10 double basses, with single wind, etc. The programmes usually contained two overtures, a symphony, a concerto, or some minor piece of orchestral music, and four songs. The distinguishing feature of the concerts was their choice and performance of orchestral music. Not to mention the great works of Haydn, Mozart, Beethoven, Mendelssohn, Spohr, Weber and other time-honoured classics, the audience were familiar with Schumann's symphonies and overtures, and with Schubert's symphonies and 'Rosamunde' music, at a time when those works were all but unknown in the concert-rooms of the metropolis. Mendelssohn's 'Reformation Symphony' was first played here; so was his overture to 'Camacho'; Brahms's symphonies, pianoforte concertos, variations on a theme of Haydn and 'Song of Destiny'; Raff's various symphonies; Liszt's 'Ideale'; Rubinstein's symphonies; Goetz's symphony, concerto and overtures; Smetana's 'Vltava'; Schubert's symphonies in chronological order; Wagner's 'Faust' overture; Sullivan's 'Tempest' music and symphony in E; Benedict's symphony in G minor, and many other works were obtained (often in MS.) and performed before they were heard in any other place in the metropolis. Bennett's 'Parisina' was first played there after an interval of a quarter of a century. A very great influence was exercised in the renaissance of English music by the frequent performance of new works of importance by Mackenzie, Parry, Stanford, Cowen and others.

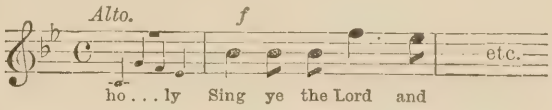
A disposition was apparent in the managers[1] of the concerts to present the audience with pieces of special interest; such as the MS. works of Schubert, and of Mendelssohn; Beethoven's arrangement of his violin concerto for the piano, and his overture 'Leonora

[1] The enterprising character of the programmes was primarily due to Grove himself. G.

No. 2'; an alternative andante written by Mozart for his Parisian symphony; the first version of Mendelssohn's 'Hebrides' overture, and other rare treasures of the same nature. The fact that owing to the wind and a portion of the strings of the orchestra being the permanent band of the Crystal Palace, Manns had opportunities for rehearsal which were at that time enjoyed by no other conductor in London. G.

CSÁRDÁS, see MAGYAR MUSIC.

CUCUEL, GEORGES (*b.* Dijon, Dec. 14, 1884; *d.* Grenoble, Isère, Oct. 28, 1918), French 'musicologist,' son of a lecturer at the University of Dijon. He was a pupil of the Lycée Louis le Grand in Paris, and obtained his doctorate degree (1913) with 2 theses, *La Pouplinière et la musique de chambre au XVIII^e siècle*, and *Études sur un orchestre au XVIII^e siècle*, both valuable contributions to the history of symphony in France and of its orchestra. He was a specialist in all musical questions concerning the 18th century, and his book on *Les Créateurs de l'Opéra-Comique français* (Paris, Alcan, 1914) contains interesting ideas on the subject. Amongst his remarkable articles issued in different periodicals are: *Le Baron de Bagge et son temps; La Critique musicale dans les revues du XVIII^e siècle* (*Année musicale*, 1911, 1912); *Quelques documents sur la librairie musicale au XVIII^e siècle* (*Sammelbände der I.M.G.*, 1912), etc. He contributed to the *Revue du XVIII^e siècle*, to the *Bulletin de la Société Française de Musicologie* (1918): *Les Aventures d'un organiste dauphinois.* He published a study, *Le Pays de Montbéliard vu par les voyageurs du XVIII^e siècle* (1917), and left a collection of documents which were to appear as *Feste musicali italiane del 700.* A posthumous article on Gluck's operas was brought out by the *Revue Musicale* (1922). He died of influenza at the military hospital of Grenoble. He was a zealous worker, with an erudite and precise mind, and his judgment, always based on serious documentation, was of a solid and penetrating quality.



BIBL.—*Bulletin de la Société Française de Musicologie*, No. 4, 1919; L. DE LA LAURENCIE, *Georges Cucuel.* M. L. P.

CUDMORE, RICHARD (*b.* Chichester, 1787; *d.* Manchester, Dec. 29, 1840), received his first instruction in music from James Forgett, an organist of Chichester. At a very early age he became a proficient on the violin, being placed under Reinagle in 1797, and at 11 years old was placed under Salomon.

In 1799 he led the band at the Chichester theatre, and was engaged in the orchestra at the Italian Opera, London. He next resided for nine years in Chichester, and then removed to London for the purpose of studying the pianoforte under Woelfl, and became a member of the Philharmonic Society's band. He afterwards settled in Manchester as leader of the Gentlemen's Concerts there. On one occasion at Liverpool he played a violin concerto, a pianoforte concerto, and a violoncello concerto. He composed several concertos for the violin and others for the pianoforte, as also an oratorio, 'The Martyr of Antioch' (published), portions of which were performed in Birmingham, Manchester and Liverpool.

W. H. H.; with addns. from *D.N.B.*

CUE (Fr. *queue*), (1) the *tail* of the preceding passage. Where a player or singer is reading from a separate part, and not from the score, some help is advisable to aid him in coming in correctly after the long pauses. A few notes of some other part immediately preceding the entrance of his own are therefore printed small in the stave as a guide; and this is called a cue:

(2) Derived from the above but distinct in its object is the practice of 'cue-ing' orchestral parts, so that what is written for a larger band may be played by a small one. For this purpose solo parts for wind instruments are frequently cued into the string parts.

CUELLAR, RAMÓN (*b.* Saragossa, 1777; *d.* Santiago de Compostela, 1833), a Spanish church-musician, who held appointments as maestro de capilla at Saragossa (1814) and Oviedo (1817) from which, owing to differences with the Chapter, he was transferred in 1828 to Santiago. MSS. of his works are found in many Spanish cathedrals, especially La Seo at Saragossa; Eslava prints a motet for 8 voices. J. B. T.

CUI, CÉSAR ANTONOVICH (*b.* Vilna, Jan. 18, 1835; *d.* St. Petersburg, Mar. 14, 1918), composer, was the son of a French officer who, being unable to follow the retreat from Moscow in 1812, remained in Poland, where he subsequently married a Lithuanian lady and settled as professor of French at the High School of Vilna. In this establishment César Cui received his early education. He showed a precocious talent for music, and was taught the piano at an early age. During his schooldays he also received some irregular instruction in theory from the celebrated Polish composer Moniuszko. In 1850 Cui entered the School of Military Engineering, St. Petersburg, and, on passing out in 1857, was appointed to a sub-professorship. He was afterwards recognised as an authority on fortification, and lectured on this subject in the Artillery School and the Staff College. Among his pupils he reckoned the Emperor Nicholas II. Cui held the rank of Lieut.-General of Engineers, and was also president of the Imperial Russian Musical Society. While working for his examinations, he was compelled to lay aside his musical tastes;

but when in 1857, being a full-fledged officer, he came in contact with Balakirev, his enthusiasm was at once rekindled. He was greatly attracted by the new and progressive ideas which the latter discussed with him. Although Cui owed something to Balakirev's guidance and criticism, he must be regarded, on the whole, as a self-taught musician. He married in 1858 Mlle. Bamberg, a gifted pupil of Dargomijsky, and his first opus number was a Scherzo for piano (4 hands) on her name and his own. B. A. B. E. G. and C. C. His earliest operatic work, 'The Mandarin's Son,' an operetta written for private performance in 1859, was quite in the style of Auber, and showed little individuality. 'The Captive in the Caucasus' (1859), an opera on the subject of Poushkin's romantic poem, is a work of more substance, to which he added a middle act in 1881–82. But Cui's reputation as an operatic composer became more firmly established with his third dramatic work: an opera in three acts, based on a romantic tragedy by Heine, 'William Ratcliff' (St. Petersburg, 1861). 'Angelo,' on a libretto from the play by Victor Hugo, was first performed at St. Petersburg in 1876. This work is usually regarded as the finest fruit of Cui's maturity; but it never enjoyed anything like popular success. Cui had a natural predilection for French texts, and his opera 'Le Flibustier' (1889) was composed to a French libretto taken from a play by Jean Richepin. It was first performed at the Opéra-Comique, Paris, in 1894, and attracted considerable attention at the time; but it did not keep its place either in the French or Russian repertories. 'The Saracen,' an opera in 4 acts, from an historical novel by the elder Dumas, was first heard in St. Petersburg in 1889 and again in Moscow in 1902. A short opera, or rather a dramatic scene, in one act, to Poushkin's text, 'A Feast in Time of Plague,' appeared in 1900; while an eighth dramatic work, from Maupassant's novel, 'Mam'zelle Fifi,' was successfully produced at St. Petersburg in 1903. There were two later works, 'Matteo Falcona' (Moscow, 1908) and 'The Captain's Daughter' (St. Petersburg, 1911).

After 1864 Cui was an industrious contributor to many leading Russian papers; while his articles in French and Belgian publications were some of the first to call attention to the remarkable activity of the New Russian school. Most of the leading characteristics of Cui's style are apparent in 'Ratcliff,' and it seems surprising that this opera, with all its poetic charm and pathos, should have been so coldly received by the public and critics in Russia. It is possible that the crude sensationalism of the libretto did not help to commend the opera to a nation whose dramatic traditions are derived from the realistic plays of Gogol and Ostrovsky rather than from the romanticism of Schiller's 'Robbers' and kindred dramas. 'William Ratcliff' tends more to lyrical than to declamatory opera. Cui's melody is refined, and exhales an almost feminine tenderness; but it is not strikingly original. It does not flow in a broad stream of *cantilena*, but takes the form of continuous *arioso*; a method which is often ineffective, because it blurs the clear edges of melody and recitative. In 'Angelo,' which is altogether constructed on broader lines than any other of his operas, Cui shows considerable power of expressive declamation. His harmony is interesting and original, in spite of certain recurrent tricks, such as the excessive use of pedal points, tonic and dominant, and the over-elaboration of the inner parts at the expense of effective melody. Cui was not so great a master of orchestration as some of his compatriots; nor was he in his element when dealing with massive choral effects. He was a miniature painter who worked most effectively on a small scale. In solo, and above all in love-duets, we find him at his best. His lyrical vein was more tender than virile, consequently his heroines were more life-like than his heroes. Mary in 'Ratcliff,' Thisbe and Catharine in 'Angelo,' are sympathetic and convincing creations. After 'Angelo,' Cui's work took a new tendency; that exclusive preoccupation with small forms and polished technique which is best exemplified in such exquisite trifles as his little suites and pieces for pianoforte.

Summing up Cui's position as a composer, it appears in some respects paradoxical. Although he was the first disciple of Balakirev, and one of the chief upholders of the National School, the Russian element is exceedingly attenuated in his own music. His natural gift was vocal rather than symphonic, if we may judge from the preponderance of vocal works in the list of his compositions. 'He needs a text to bring out his power of delicate psychological analysis.' But, while drawn to opera and song, Cui reflected most frequently the influence of such instrumental composers as Chopin, Liszt and Schumann, none of whom are suitable models for the formation of a broad and effective opera style. Again, Cui's music has passion, grace, a delicate and refined lyricism, but not that note of tragic intensity which the subjects of his operas seem to demand. When dealing with such ultra-romantic libretti as those of 'William Ratcliff' and 'Angelo' he gives the impression of a Herrick posing as a John Webster. As a critic, Cui united an elegant literary style with a keen satirical wit. He did good service in the cause of music at a time when Russia stood in need of enlightenment, and was almost entirely given up to idolatry of all things Italian; but, as regards Russian music, his views cannot be accepted as comprehensive.

The following is a list of Cui's compositions :

SONGS AND VOCAL MUSIC

Songs :—Op. 3 (3), op. 5 (6), op. 7 (6), op. 9 (6), op. 10 (6), op. 11 (6), op. 13 (6), op. 15 (13 vignettes musicales).
Six Songs, op. 16 ; Bolero, op. 17.
Seven Songs and Duets, op. 19.
Six Melodies to French words (1885), op. 23.
Six Songs, op. 27 ; Seven Songs, op. 32.
Seven Songs to words by Poushkin and Lermontov (1886), op. 33.
Ave Maria, for one or two female voices and chorus, op. 34.
Three German Lieder, op. 37.
Les Deux Ménétriers op. 42.
Twenty Poems by Jean Richepin (1890), op. 44.
Four Sonnets by Micziewicz (Polish words), op. 48.
Seven Songs, op. 49 ; Five Songs, op. 54 ; Eight Songs, op. 55.
Twenty-five Songs to words by Poushkin (1899), op. 57.
Twenty-one Songs to words by Nekrassov (1902), op. 62.

CHORAL WORKS

Two Choruses for mixed voices, with orchestral accompaniment, op. 4 (Prize of the Imp. Russ. Mus. Society, 1860).
Mystic Chorus for female voices *a cappella* (1885), op. 28.
Five Choruses to words by K. R., op. 46.
Seven Choruses (*a cappella*), op. 28 ; Five Choruses, op. 46 ; Six Choruses, op. 53.
Two Choruses for male voices, op. 58.
Seven Vocal Quartets or Choruses (1902), op. 59.
'Les Oiseaux d'Argenteau,' for children's voices.

FOR ORCHESTRA

1st Scherzo (1857), op. 1.
2nd Scherzo (1857), op. 2.
Tarantella (1859), op. 12.
Marche solennelle (1881), op. 18.
'Suite miniature,' No. 1, op. 20 (from the Sixth Suite for PF., op. 20).
Suite No. 2 (1887), op. 38.
Suite No. 3, 'A Argenteau' (1887), op. 40.
Suite No. 4, 'In modo populari,' op. 43.

FOR STRINGS

String quartet in C minor, op. 45.
'Petite Suite' for violin, op. 14.
Twelve miniatures for violin, op. 20.
Two ditto (with orchestra), op. 24.
'Suite concertante' for violin and orchestra (1883), op. 25.
Seven miniatures for violin (arranged from op. 39 for PF.).
'Kaléidoscope,' twenty-four pieces for violin, op. 50.
Six Bagatelles for violin, op. 51.
Five little duets for flute and violin, op. 56.
Two pieces for violoncello and orchestra, op. 36.
Tarantella for violin.

FOR PF.

Three pieces, op. 8 (1877).
Twelve miniatures, op. 20.
Suite (dedicated to Liszt), op. 21.
Four pieces, op. 22.
Valse-Caprice, op 26.
Two 'Bluettes,' op. 29.
Two Polonaises, op. 30.
Three Valses, op. 31.
Three Impromptus, op. 35.
Six miniatures, op. 39.
Nine pieces (à Argenteau), op. 40 (1887).
The Valse-movements, op. 41.
Five pieces, op. 52.
Four pieces, op. 60.
Theme and Variations, op. 61.
Six numbers of The Paraphrases (see BORODIN).
Three pieces for 2 PF.

OPERATIC WORKS

'The Captive in the Caucasus,' 'The Mandarin's Son,' 'William Ratcliff,' 'Angelo,' 'Le Flibustier,' 'The Saracen,' 'A Feast in Time of Plague,' 'Mam'zelle Fifi,' 'Matteo Falcona,' 'The Captain's Daughter.'

R. N.

CUIVRÉ, the French term for indicating stopped notes on the horn.

CULLEN, JOHN, a London music publisher who flourished from about 1705–10 or a few years later. On the death of Henry Playford he appears to have succeeded to the business and stock, possibly at the latter's shop (or at that of John Carr), for Cullen's address is 'At the Buck without Temple Barr,' or 'At the Buck between the two Temple Gates.' On Keller's *Thorough Bass*, 1707, which he published, he advertises many of the Playford publications. His own include an edition of Simpson's *Compendium of Practical Music*, 1706 ; the opera of 'Camilla' (*c.* 1706) ; Daniel Purcell's 'Six Sonatas,' and other works.

F. K.

CUMBERLAND YOUTHS, THE SOCIETY OF ROYAL. This society was established in the City of London to promote the art and science of change-ringing some time before 1702, and was originally called the SOCIETY OF LONDON SCHOLARS.

In 1746 members of the society rang the bells of Shoreditch Church in honour of the Duke of Cumberland (2nd son of George II.) on his triumphal return to London after his victory of Culloden.

To commemorate this a medal was presented to the society bearing a likeness of the Royal Duke on his charger, which medal is worn by the Master on all special occasions down to the present time.

After this the London Scholars called themselves the Royal Cumberland Youths.

Many eminent names are on the roll of membership, amongst which should be mentioned Shipway, Jones, Reeves and Blackmore —all writers on change-ringing.

In the rules of the society, No. III. enacts that 'Any member who shall join the Society of COLLEGE YOUTHS' (*q.v.*) 'shall thereupon cease to be a member of this society.' This rule is acted upon in both societies for the purpose of keeping up a friendly rivalry, and thus promoting the art of change-ringing.

W. W. S.

CUMMINGS, WILLIAM HAYMAN, Mus.D. (*b.* Sidbury, Devon, Aug. 22, 1831 ; *d.* June 6, 1915), was placed at an early age in the choir of St. Paul's Cathedral, and afterwards in that of the Temple Church. He sang as an alto in the London performance of 'Elijah' in 1847.

On leaving the Temple choir he was appointed in 1847 organist of Waltham Abbey, where he was the first to adapt Mendelssohn's theme from a secular cantata to 'Hark! the herald angels sing.' After a time he was admitted as tenor singer in the Temple, Westminster Abbey and the Chapel Royal, appointments which he subsequently resigned when his success as a leading concert tenor was assured. His first important oratorio engagement was as a substitute for Sims Reeves, under G. W. Martin in 'Judas Maccabaeus.' At the Birmingham Festival of 1864 he sang the tenor part in Sullivan's 'Kenilworth,' instead of Mario, for whom it was written. He sang in the United States in 1871 and subsequently. He was for years identified with the important tenor parts in Bach's Passion, and other works, where an accomplished musician is as necessary as a good singer. He was a professor of singing at the R.A.M. from 1879–96, and belonged to the committee of management. In 1882 he was appointed chorus-master of the Sacred Harmonic Society, and subsequently conductor. He was precentor of St. Anne's, Soho, in 1886–1888, and in 1896 was elected to succeed Barnby as Principal of the Guildhall School of Music. He retired in 1911. He was chiefly instrumental in founding the Purcell Society,

and edited three volumes of its publications. (See PURCELL SOCIETY.) He wrote a life of that master in the *Great Musicians* series. Later research, however, has proved it unreliable on several matters of fact. In addition to all his other avocations, he filled important official posts in connexion with the Philharmonic Society, the Musical Association, and the Incorporated Society of Musicians, and devoted much time to the affairs of the Royal Society of Musicians. In 1900 he received the degree of Mus.D. from Dublin University. He was the possessor of a splendid musical library, sold by auction after his death. His compositions include several prize glees, a Morning Service, an anthem, various songs, a cantata —'The Fairy Ring'; he also wrote a biographical dictionary and a *Primer of the Rudiments of Music* (Novello). M.

CUPIS DE CAMARGO, (1) FRANÇOIS (*b.* Brussels, Mar. 10, 1719; *d.* Paris, *c.* 1764), brother of the famous dancer, CAMARGO (*q.v.*); violinist at the Opéra, 1741. He was an excellent performer as well as composer. He wrote 3 books of violin sonatas (*Fétis*; *Q.-L.*). (2) JEAN BAPTISTE CUPIS (*b.* Paris, *c.* 1741), violoncellist, pupil of Berteau. He joined the orchestra of the Paris Opéra and was an excellent virtuoso and teacher. He toured in 1771 and was in Milan in 1794. He wrote a Tutor for the violoncello, and for the viola, 2 books of violoncello sonatas and several books of solo pieces (E. van der Straeten, *Hist. of Violoncello*; *Q.-L.*)

CURIONI, (1) a seconda donna, engaged at the King's Theatre about 1754. Among other parts, she sang that of Plistene, a male character in the 'Ipermestra' of Hasse and Lampugnani.

She is believed to have been the mother of (2) ALBERICO CURIONI (*b. circa* 1790), a distinguished tenor.

After singing at the San Carlo at Naples and other theatres, he went to Barcelona and had great success. In 1821 he made his first appearance in London as Tito with Camporese. He then seemed the best tenor that had belonged to the theatre for some time, but he hardly gave the full promise of his future excellence. Curioni was re-engaged in 1822, and appeared in 'Otello' with renewed éclat; and again in 'La Clemenza di Tito,' in 'La Donna del lago' and 'Ricciardo e Zoraïde,' in 1823. In 1824 and 1825 he was again engaged. In the latter year he appeared as Orosmane in 'Pietro l' eremita,' and in 'Otello,' 'Così fan tutte' and 'Il Crociato.' In the latter opera he reappeared in 1826, as also in 'Medea,' where he was very effective in the part of Giasone. His portrait was drawn by Hayter in this character, and there is a good lithograph of it. He was re-engaged in 1827, at the increased salary of £1450, and played a principal part in Pacini's 'Schiava in Bagdad.' In 1828 he was again at the King's Theatre, where he was heard by Lord Mount-Edgcumbe in 1834, singing with undiminished powers. He was an honorary member of the R.A.M. J. M.

CURSCHMANN, KARL FRIEDRICH (*b.* Berlin, June 21, 1804; *d.* Langfuhr, near Danzig, Aug. 24, 1841), a song-writer of distinction.

He studied for four years under Spohr and Hauptmann at Cassel, and in 1824 settled in Berlin, making occasional concert tours in Germany, France and Italy. Curschmann's fame rests on his 'Lieder.' He was the favourite song-writer before Schubert's songs were known, and when Schumann had scarcely attempted vocal composition. His songs are full of real melody and generally deserved their wide popularity. Curschmann's collected 'Lieder' (2 vols., Berlin, 1871) comprise 83 solos, and 9 songs in 2 and 3 parts. A few of them have Italian words. Among his other works may be mentioned a one-act opera, 'Abdul und Erinnieh,' written and performed at Cassel in 1828. In England he was best known by his song 'In every opening flower,' and his trios 'Ti prego' and 'Addio.' A. M.

CURTAIN-TUNE, see ACT-TUNE.

CURTALL, a name given to the bassoon upon its first introduction into England in the 16th century, and derived from the German *Corthol* (? *Kurzholz*, 'short wood'), or the French *courtaud*, to distinguish it from the long, straight pommers or bass shawms. Probably the 'short instruments called dulcenses' belonging to King Henry VIII. were of the curtall kind, for the name dolcian or dulcino was given to the bassoon in later times. In a manuscript (B.M. Harl. 2027) dated 1688, a sketch is given of a curtall which closely resembles a small bassoon, and the author tells us that the double curtall is '8 notes deeper than other and double the bignesse.' Praetorius (1618) says that the small instrument was called a 'single' curtall, so that by analogy the old English terms 'single' and 'double organs' most probably refer to the compass of the instrument and not to keyboards or ranks of pipes. F. W. G.

CURWEN, (1) JOHN (*b.* Heckmondwike, Yorks, Nov. 14, 1816; *d.* Manchester, May 26, 1880), founder of the Tonic Sol-fa method of teaching singing. (See TONIC SOL-FA and TONIC SOL-FA COLLEGE.)

He came from an old Cumberland family, and was educated (at Wymondley College and University College, London) for the profession of his father, a Nonconformist minister. In 1838 he was appointed assistant minister at Basingstoke, and held similar appointments elsewhere until 1864. It was at a conference of Sunday-school teachers held in Hull in 1841 that he was commissioned to make inquiry as to the best and simplest way of teaching to sing by note,

and this led to the practical adoption of Miss Glover's system ; the investigations thus begun led him to make the spreading of music among the people the great object of his life. In 1843 his *Grammar of Vocal Music* appeared. In 1853 he founded the Tonic Sol-fa Association, and in 1879 the Tonic Sol-fa College was opened ; it had been incorporated in 1875, and owed its origin in great part to the opposition of the Education Department and the appointment of John Hullah (an acknowledged enemy of the Sol-fa movement) as inspector of music in training colleges. In 1864 he gave up ministerial work, and devoted his whole time ' to the direction of the large organisation ' which had grown up under his care. He founded the firm which bears his name (see CURWEN & SONS). A biography was published in 1882 by his son JOHN SPENCER CURWEN under the title of *Memorials of John Curwen.*

The following is a list of Curwen's principal educational works :

The Standard Course of Lessons and Exercises on the Tonic Sol-fa Method. First edition, 1861 ; issued in a new form, 1872, as the *New Standard Course*, the most complete class book of the method for general use, includes Harmony, Musical Form, Composition, etc.

How to observe Harmony. First edition, 1861 ; reissued in a new form, 1872.

Musical Statics an attempt to show the bearing of the recent discoveries in Acoustics on Chords, Discords, Transitions, Modulations, and Tuning, as used by modern musicians, 1874.

The Teacher's Manual of the Art of Teaching in General, and especially as applied to Music, 1875. A book designed for the teaching of teachers, which superseded an earlier book of a similar character—*Singing for Schools and Congregations*, 1843.

A Tonic Sol-fa Primer (No. 18 of the series of Primers edited by Dr. Stainer, and published by Novello). Written ' to explain the T.S.F. notation and method of teaching to those already familiar with the established mode of writing music by means of the Staff.'

Musical Theory, 1879.

Tonic Sol-fa Reporter. Published monthly. Begun 1851 ; successfully carried on until 1889, when it became *The Musical Herald*, a monthly journal.

Various Hymn and Tune Books, Collections of Part Music, School Songs, etc., including ' Modern Part Songs ' in 96 numbers.

Curwen edited in Sol-fa a large number of classical works (oratorios and other compositions by Handel, Haydn, Mozart, Rossini, etc.), and works by later composers (Macfarren, Mendelssohn and others).

R. B. L., with addns.

(2) JOHN SPENCER (*b.* Plaistow, Sept. 30, 1847 ; *d.* Aug. 6, 1916) carried on his father's interests and developed them. Originally intended for the ministry, he took up the printing side of his father's business and, in order to qualify himself as a musician, studied at the R.A.M. under Macfarren, Sullivan and Prout. He visited schools in France, Germany, Canada and U.S.A., and examined the methods of teaching sight-singing to children. He started the competitive festival movement in England with the foundation of the Stratford Festival (1882), importing the idea from Wales where he had judged at Eisteddfodau. (See COMPETITION FESTIVALS.) His *Studies in Worship Music* was the result of study of all kinds of religious services, from those of Westminster Abbey and Brompton Oratory to meetings of Moody and Sankey and the Salvation Army. His sympathetic interest in what people were doing always formed the basis of improvements he desired to stimulate. He became principal of the Tonic Sol-fa College in 1880, and as director of the firm of J. Curwen & Sons and editor of the *Musical Herald*, exerted a wide influence.

(3) ANNIE JESSY (*née* GREGG) (*b.* Dublin, 1845) married John Spencer Curwen in 1877. After a rather desultory education in music, chiefly at the Royal Irish Academy of Music, she began her career as a teacher first in Dublin then in Scotland. There she came across the work of John Curwen, and she proceeded to apply his principles to the problems of elementary piano teaching. The result was *Mrs. Curwen's Method*, which has had a very wide and beneficent influence. The *Teacher's Guide*, the handbook to the method, grew out of her experience in teaching her own children. The following is a list of the chief publications concerned with the system :

Teacher's Guide, containing instructions to the teacher for the use of the work.

Pupil's books : Exercises and Illustrative Duets, by John Kinross, 1st four Steps.

The same exercises with Duets, by Felix Swinstead.

Steps V. and VI. : Exercises for Reading and Transposition. Duets by John Kinross.

Interval Exercises of Steps I. to IV., with some from Step V., for 1st Grade Certificate.

C clef exercise book, for practice in reading (of use to v'cl. and viola learners).

Illustrative Tunes for the Time Lessons.

Music Slates, specially ruled. Keyboard Diagram, for class-work.

Staff Cards, graded, for home work in Preliminary Course.

Certificate Cards for Step Exams.

C.

CURWEN & SONS, LTD., J. This firm was founded by John Curwen in 1863 and is now carried on by his grandsons. Its first publications were mainly works for popular singing classes, and as time went on, music for schools, mainly at that time in the Tonic Sol-fa notation. In 1885 the grant for sight-singing in schools and the recognition by the Education Department of the Tonic Sol-fa method opened the way for an increased output of school music, of which the firm immediately availed itself, and in so doing attained a prominence in that line which it still retains.

The foundation by John Spencer Curwen of the Stratford Musical Festival in 1882 brought a demand for better choral music, and the firm's catalogue has gradually improved and now contains choral music of the highest class by foremost contemporary composers.

Nearly a generation ago was issued Mrs. J. S. Curwen's Pianoforte Method (see above). More recently Ernest Fowles edited a series of teaching pieces to suit the requirements of the various examinations of the Associated Board.

In 1917 the firm began to publish a series of songs, mostly by the younger contemporary composers, which are being included in the programmes of the more serious recitalists of the day. In 1923 they amalgamated with Messrs. F. & B. Goodwin, Ltd., which added to its catalogue a considerable amount of chamber and orchestral music by modern composers. The punches used by the firm for engraving its music were specially designed by Paul

Woodruffe to combine beauty of form with clearness of notation. *The Musical News and Herald*, a weekly newspaper, and *The Sackbut*, a monthly review, are published for the Musical News Syndicate, Ltd. (see PERIODICALS, MUSICAL). Messrs. Curwen are also agents for the *Universal*, the *Sénart*, the *Cranz* and several other foreign editions.

CURZON, EMMANUEL HENRI PARENT DE (*b.* Havre, July 6, 1861), writer on music, has the degree of 'Dr. ès lettres,' and was archivist of the Archives Nationales in Paris (retired 1926). He is the author of the catalogue of all the documents concerning music kept there.

Since 1889 he has been musical critic to the *Gazette de France*, *Guide musical*, *Le Théâtre*, *Musica*, etc. Among his various works of musical history and criticism may be mentioned:

Translations of Mozart's letters (1888), followed by *Nouvelles Lettres des dernières années de la vie de Mozart*, 1898; of Robert Schumann's writings on music (1894, 1898); and of *Fantasiestücke in Callot's Manier* (Hoffmann, 1891). An essay on the 'Sigurd' legend in the Edda, apropos of Reyer's opera, was published in 1890. Biographies of Grétry, Meyerbeer, Mozart, Rossini (1920); studies and essays *Musiciens du temps passé*, *Croquis d'artistes*, *Les Lieder de F. Schubert*, *Les Lieder et airs détachés de Beethoven*, *Documents inédits sur le Faust de Gounod* (with A. Soubies, etc.), and *Ernest Reyer, sa vie, ses œuvres* (1924).

G. F.; addns. M. L. P.

CUSANINO, see CARESTINI, GIOV.

CUSHION DANCE, an old English action dance, also bearing the title 'Joan Sanderson.' The dance was common among all classes in the 16th and 17th centuries, even at court. At the present day a survival of it exists among children in the game of 'The Shy Widow.' The cushion dance is alluded to in many 17th-century books; a very full reference to these, and complete description of the dance, are given in Wm. Chappell's 'Popular Music of the Olden Time.'

Briefly, the dance or game is performed thus: A single person, male or female, dances about the room with a cushion, which, after some dialogue, is laid before a favoured one of the opposite sex, who, kneeling on it, kisses the one who has so placed it. The one who has knelt and kissed now takes up the cushion and continues the dance in the same manner. The dialogue begins:

'This dance it will no further go.'
'I pray you, good sir, why say you so?'
'Because Joan (or John) Sanderson will not come to,'
etc.

In Wilson's *Companion to the Ball Room* (*c.* 1818) the dance is mentioned as being then danced; but the author, a fashionable dancing-master, makes an indignant protest against it. The original air and quaint directions are to be found in Playford's *Dancing Master* (1686, and later editions). F. K.

CUSINS, SIR WILLIAM GEORGE (*b.* London, Oct. 14, 1833; *d.* Remonchamps, Ardennes, Aug. 31, 1893), in his 10th year entered the Chapel Royal.

In 1844 he entered the Brussels Conservatoire under Fétis for the study of the piano, violin and harmony. In 1847 he gained the King's Scholarship at the R.A.M. of London, where his professors were Potter, Sterndale Bennett, Lucas and Sainton. In 1849 his scholarship was prolonged for two years, and he made his first appearance in public as a piano-player in Mendelssohn's D minor concerto, and as composer with a MS. overture. In the same year he was appointed organist to the Queen's Private Chapel, and entered the orchestras of the Royal Italian Opera and of the principal concerts of London, in which he played the violin for about five years. In 1851 he was appointed assistant professor at the R.A.M. and afterwards professor; from 1867–83 he was conductor of the Philharmonic Society *vice* Sir W. Sterndale Bennett, resigned; in 1867 he conducted Bennett's 'Woman of Samaria' at the Birmingham Festival; in 1870 he was appointed master of the music to the Queen; in 1875 succeeded Bennett as examining professor at Queen's College; and in 1876 became joint examiner, with Hullah and Otto Goldschmidt, of scholarships for the National Training School of Music. Besides holding these posts Cusins came often before the public as a player and concert-giver, having amongst other places performed at the Gewandhaus, Leipzig, and at Berlin, as well as the Philharmonic and Crystal Palace. In 1885 he became a professor in the Guildhall School of Music, and conductor of the London Select Choir. He received the honour of knighthood, Aug. 5, 1892, and the cross of Isabella the Catholic in 1893. He died of influenza and was buried in Kensal Green Cemetery (*Brit. Mus. Biog.*). His works, if not numerous, are all on an important scale:

'Royal Wedding Serenata' (1863); 'Gideon,' an oratorio (Gloucester, 1871); two Concert overtures, 'Les Travailleurs de la mer' (1869), 'Love's Labour's Lost' (1875); Piano concerto in A minor; besides marches, songs, etc.

CUTELL, RICHARD (15th cent.), an English musician, author of a treatise on counterpoint, a fragment of which is preserved among the manuscripts in the Bodleian Library.

W. H. H.

CUTTING, THOMAS, was lutenist, in 1607, in the service of Lady Arabella Stuart when Christian IV. of Denmark begged him of her. He returned to England in 1611 and entered Prince Henry's private band. There is also a lutenist, Francis Cutting, who wrote lute pieces *c.* 1596, preserved in collective volumes. (See *Q.-L.*) Whether and how far the two are connected has not yet been cleared up.

E. v. d. S.

CUZZONI, FRANCESCA (*b.* Parma,[1] or Modena,[2] *c.* 1700[3]; *d.* Bologna, 1770), received her first instruction from Lanzi, a noted master, and became one of the most famous singers of the 18th century.

She made her début at Venice with Faustina, 1719, in M. A. Gasparini's 'Lamano,' being described as 'Virtuosa di camera' of the Grand

[1] Burney. [2] Hawkins. [3] Fétis.

Duchess of Tuscany; and she appeared again with Faustina and Bernacchi in the 'Pentimento generoso,' in the same year and at the same place. After singing on most of the principal stages of Italy she came to England. On her first arrival here she married Sandoni, a harpsichord-master and composer of some eminence.[1] Her first appearance in London was on Jan. 12, 1722, as Teofane in Handel's 'Otho.' Her singing of her first air, a slow one, 'Falsa immagine,' fixed her reputation. A story is told about this song which illustrates her character as well as that of Handel. At rehearsal she took a dislike to the air and refused to sing it; whereupon Handel seized her by the waist, and swore he would throw her out of the window if she persisted. She gave way, and in that very song achieved one of her greatest triumphs. Success followed her in 'Coriolano,' in 'Flavio' and in 'Farnace'; and she became a popular favourite.

In the following year she sang in 'Vespasiano' and 'Giulio Cesare.' Meanwhile Cuzzoni's popularity had diminished that of Durastanti, who left England, and had eclipsed that of Anastasia Robinson, who soon after retired. Cuzzoni continued her triumphal career in 'Calfurnia,' 'Tamerlane' and 'Artaserse'; and in 'Rodelinda' (1725) she created one of her most successful parts, gaining great reputation by her tender singing of the song 'Ho perduto il caro sposo.' Fresh applause met her in 'Dario,' 'Elpidia,' 'Elisa,' 'Scipio' and finally in 'Alessandro' (Handel), when she first encountered, on the English stage, the redoubtable Faustina. In this opera her style and that of her rival were skilfully contrasted by the composer; but the contest was the first of a series which did the Italian Opera much harm.

In 1727 she created a great effect in the song 'Sen vola' ('Admeto'), which displayed her warbling style; and an enthusiast in the gallery was so far carried away by the charm that he exclaimed, 'D—— her! she has a nest of nightingales in her belly!' Her next part was in 'Astyanax.' The violence of party feeling had now become so great that, when the admirers of Cuzzoni applauded, those of Faustina hissed; and *vice versa*. This culminated during the performance of 'Astyanax,' when shrill and discordant noises were added to the uproar, in spite of the presence of the Princess Caroline. Lady Pembroke headed the Cuzzonists, and was lampooned in the following epigram[2]:

UPON LADY PEMBROKE'S PROMOTING THE CAT-CALLS OF FAUSTINA

Old poets sing that beasts did dance
Whenever Orpheus play'd,
So to Faustina's charming voice
Wise Pembroke's asses bray'd.

Cuzzoni's chief supporters, among the men, are commemorated in the following[2]:

EPIGRAM ON THE MIRACLES WROUGHT BY CUZZONI

Boast not how Orpheus charm'd the rocks,
And set a-dancing stones and stocks,
And tygers rage appeas'd;
All this Cuzzoni has surpass'd,
Sir Wilfred[3] seems to have a taste,
And Smith[4] and Gage[5] are pleas'd.

In 1728 Cuzzoni appeared in 'Siroe' and 'Tolomeo' with unabated success, in spite of the 'Beggar's Opera' and all these heart-burnings. At the close of the season, however,[6] the directors, troubled by the endless disputes of the rivals, decided to offer Faustina one guinea a year more than the salary of Cuzzoni. The latter had been persuaded to take a solemn oath that she would not accept less than her enemy, and so found herself unengaged. About this time[7] she yielded to the invitation of Count Kinsky, and went to Vienna. She sang at court with great éclat; but her arrogant demands prevented her from getting an engagement at the theatre.

At Venice she next sang at one theatre, while Faustina performed at another. In London again, a few years later (1734), she appeared in Porpora's 'Ariadne'; and, with Farinelli, Senesino and Montagnana, in 'Artaserse' as Mandane, and also in other operas.

Hawkins says that she returned again in 1748, and sang in 'Mitridate'; but this is not recorded by Burney, who puts her third visit in 1750, when she had a benefit concert (May 23). She was now old, poor and almost voiceless. The concert was a failure, and she disappeared again. She then passed some time in Holland, where she soon fell into debt, and was thrown into prison. Gradually she paid her debts by occasional performances given by the permission of the governor of the prison, and returned to Bologna, where she was obliged to support herself by making buttons. She died there in extreme poverty and squalor.[8]

Her power of conducting, sustaining, increasing and diminishing her notes by minute degrees acquired for her, among professors, the credit of being a complete mistress of her art. Her shake was perfect: she had a creative fancy, and a command of *tempo rubato*. Her high notes were unrivalled in clearness and sweetness, and her intonation was so absolutely true that she seemed incapable of singing out of tune.[9] She had a compass of two octaves, c' to c'''.

Her face was 'doughy and cross, but her complexion fine.'[10] There are no good portraits of her; but she figures in several of the caricatures of the time, and notably in Hogarth's *Masquerades and Operas*, where she is the singer to whom the Earl of Peterborough is presenting £1000. Her portrait in Hawkins's *History* is taken from a print by Vander Gucht after Seeman.

CYCLE OF SONGS, see LIEDERKREIS.

CYMBALS, (1) (Fr. *cymbales*; Ger. (one) *Schale*; (a pair) *Becken*; Ital. *piatti* or *cinelli*) are two thin, round metal plates, with a leather strap through the centre of each, by which the performer holds them, one in each hand. They are sounded by striking them together, not directly so as to coincide, but rather with a rubbing, sliding motion (Fr. *froisser*). This is the ordinary way in which they are used. Unfortunately, from motives of economy and the fact that the cymbals have been so closely associated with the bass drum, one of the plates is often to be found fixed to the drum, and a single player will sound the cymbals with the left hand and beat the drum with the right. This naturally diminishes the tone and effect of the cymbals. There are other ways of playing the cymbals. A single plate can be struck with a hard side-drum stick or soft kettle-drum stick, or the plate can be hung and a drum-stick roll performed on it, while a form of 'roll' can be produced by agitating the edges of the plates against each other. The exact intentions of the composer are, of course, indicated in the part which is written usually on the bass clef and sometimes on one single line. If the parts for cymbals and bass-drum are written on the same stave two sets of stems are of course used. In German scores the indication *beide Schalen* means resume sounding the two cymbals in the ordinary way after the use of drum-stick strokes on one.

(2) Mention must also be made of the 'ancient cymbals,' revived by Berlioz in his 'Les Troyens' and 'Roméo'; and later to be found in Debussy's 'L'Après-midi d'un faun.' Their origin dates from Egyptian and Greek and Roman times. They are much smaller than the modern cymbals and differ further in giving out a musical note. A common practice is to play the part on the GLOCKENSPIEL (*q.v.*). N. C. G.

CYMBALS, see CHIME-BELLS.

CYMBELSTERN, an old mixture stop of the organ. H. G.

CZAAR UND ZIMMERMANN, opera in 3 acts, by Lortzing; produced Leipzig, Dec. 22, 1837, and the Gaiety Theatre, London, as 'Peter the Shipwright,' Apr. 15, 1871. Other operatic versions of the story of Peter the Great include Donizetti's 'Borgomastro di Saardam' (Naples, 1827), 'Peter the Great,' by T. S. Cooke (London, 1829), L. A. Jullien's 'Pietro il Grande' (Covent Garden, Aug. 17, 1852), and Meyerbeer's 'L'Étoile du nord' (*q.v.*).

CZAKAN, or STOCKFLÖTE, a Bohemian or Transylvanian instrument of the flageolet family, usually standing in the key of A, though made to other pitches. It is said to have been lost for many years after its original invention, and to have been rediscovered in a Transylvanian monastery in 1825. However this may be, it rose to great popularity at Vienna about 1830, and received many additions and improvements. It consisted of a large flageolet mouthpiece, with a long slender body, bored with an inverted conical tube like that of the old flute, at right angles to the mouthpiece. It thus resembled an ordinary handled walking-stick, and indeed was commonly put to that use. It had the octave scale of the old concert flute, with fingering intermediate between that and the oboe. There was also a small vent-hole for the thumb at the back, as in the flageolet. It possessed about two octaves compass, starting from *b* of the flute. There exists a Method for this almost forgotten instrument by Krämer dated 1830. Its music appears to have been written in the key of C. W. H. S.

CZERNOHORSKY, see ČERNOHORSKY.

CZERNY, KARL (*b.* Vienna, Feb. 20, 1791; *d.* July 15, 1857), an excellent pianoforte teacher and a prolific composer.

His father, a cultivated musician, taught him the pianoforte when quite a child, and at the age of 10 he could play by heart the principal compositions of all the best masters. He gained much from his intercourse with Wenzel Krumpholz the violinist, a great friend of his parents, and a passionate admirer of Beethoven. Having inspired him with his own sentiments, Krumpholz took his small friend to see Beethoven, who heard him play and at once offered to teach him. From 1800–03 Czerny made rapid progress, and devoted himself especially to the study of the works of his master, whose friendship for him became quite paternal. Czerny also profited much by his acquaintance with Prince Lichnowsky, Beethoven's patron; with Hummel, whose playing opened a new world to him; and with Clementi, whose method of teaching he studied. He was soon besieged by pupils, to whom he communicated the instruction he himself eagerly imbibed. In the meantime he studied composition with equal ardour. Czerny was always reluctant to perform in public, and early in life resolved never to appear again, at the same time withdrawing entirely from society. In 1804 he made preparations for a professional tour, for which Beethoven wrote him a flattering testimonial, but the troubled state of the Continent obliged him to give up the idea. Three times only did he allow himself to travel for pleasure, to Leipzig in 1836, to Paris and London in Apr. 1837 and to Lombardy in 1846. He took no pupils but those who showed special talent; the rest of his time he devoted to self-culture, and to composition and the arrangement of classical works. His first published work, '20 Variations concertantes' for pianoforte and violin, on a theme by Krumpholz, appeared in 1805. It was not till after his acquaintance with the publishers Cappi and Diabelli that his second

work, a 'Rondo brillante' for four hands, followed (1818). From that time he had difficulty in keeping pace with the demands of the publishers, and was often compelled to write at night after giving ten or twelve lessons in the day. From 1816–23 Czerny had musical performances by his best pupils at his parents' house every Sunday. At these entertainments Beethoven was often present, and was so charmed with the peaceful family life he witnessed, as to propose living there entirely; the project, however, fell through owing to the illness of the parents. One of Czerny's most brilliant pupils was Ninette von Belleville, then 8 years old, who in 1816 lived in the house, and afterwards spread the fame of her master through the many countries in which she performed. She married Oury (*q.v.*) the violinist, and settled in London. She was followed by Franz Liszt, then 10 years old, whose father placed him in Czerny's hands. The boy's extraordinary talent astonished his master, who says of him in his *Autobiography* 'it was evident at once that Nature had intended him for a pianist.' Theodor Döhler and a host of other distinguished pupils belong to a later period.

About 1850 Czerny's strength visibly declined; his health gave way under his never-ceasing activity, and he was compelled to lay aside his indefatigable pen. His active life closed shortly after he had, with the help of his friend Dr. Leopold von Sonnleithner, disposed of his considerable fortune in a princely manner. Czerny was never married, and had neither brothers, sisters, nor other near relations. His industry was truly astounding. Besides his numerous printed works, which embrace compositions of every species for pianoforte, he left an enormous mass of MS., now in the archives of the Gesellschaft der Musikfreunde at Vienna. These compositions comprise 24 masses, 4 requiems, 300 graduales and offertories, symphonies, overtures, concertos, string-trios and quartets, choruses, songs for one or more voices, and even pieces for the stage. His book *Umriss der ganzen Musikgeschichte* was published (1851) by Schott of Mayence, and in Italian by Ricordi of Milan. His arrangements of operas, oratorios, symphonies and overtures for two and four hands, and for eight hands on two pianofortes, are innumerable. As a special commission he arranged the overtures to 'Semiramide' and 'Guillaume Tell' for eight pianofortes, four hands each. An arrangement for pianoforte of Beethoven's 'Leonora,' which he made in 1805, was of great service in training Czerny for this kind of work. He says in his *Autobiography*, 'It is to Beethoven's remarks on this work that I owe the facility in arranging which has been so useful to me in later life.' His printed compositions amount to nearly 1000, of which many consist of 50 numbers or even more. A catalogue containing opp. 1-798, with the arrangements and the MS. works, is given in his *School of Practical Composition* (op. 600, 3 vols.). Czerny's pianoforte compositions may be divided into three classes, scholastic, solid and brilliant. The best of all, especially if we include the earlier works, are undoubtedly the scholastic (Études), opp. 299, 300, 335, 355, 399, 400 and 500, published under the title 'Complete Theoretical and Practical Pianoforte School' (3 vols.). However worthy of admiration Czerny's industry may be, there is no doubt that he weakened his creative powers by overproduction, and the effect has been that the host of lesser works have involved the really good ones in undeserved forgetfulness. C. F. P.

CZERWENKA, Joseph (*b.* Benadek, Bohemia, 1759; *d.* Vienna, 1835), one of the finest oboists of his time.

In 1789 he entered the private band of Count Schafgotsche at Johannisberg in Silesia. In the following year he played in Prince Esterhazy's band, under Haydn, where his uncle played the bassoon. In 1794 he settled in Vienna as solo oboist in the imperial band, and the court theatre, and professor at the Conservatorium. He retired in 1820.

M. C. C.

CZIAK, see Žák.

CZIBULKA, Alphons (*b.* Szepes-Várallya, Hungary, May 14, 1842; *d.* Vienna, Oct. 27, 1894). He held an important post as military bandmaster at Vienna, was a prolific composer of dance music, and his compositions include six operettas. (*Riemann.*)
